A. Policy

1. SNAP

The value of the food under the Supplemental Nutrition Assistance Program (SNAP--formerly Food Stamps) to any household is excluded from income and resources.

2. School Lunch Programs

The value of any assistance to children under chapter 13 of title 42 of the U.S. Code, School Lunch Programs, is excluded from income and resources.

3. Child Nutrition Programs

The value of any assistance to children (e.g., school breakfasts, WIC Program, Milk Programs) under chapter 13A of title 42 of the U.S. Code, Child Nutrition, is excluded from income and resources.

4. Nutrition Programs for Older Americans

The value of any assistance (other than a wage or salary) provided by any project under chapter 35 of title 42 of the U.S. Code, Programs for Older Americans, is excluded from income.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date April 2019
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.640	Page 113

S0830.640 PROGRAMS FOR OLDER AMERICANS

A. Introduction

The Federal Government through the Administration on Aging is involved in a variety of programs for older Americans. The programs may be operated by State or local governments or community organizations. Some types of programs are:

- health services;
- nutrition services (see S0830.635);
- legal assistance; and
- community service employment.

B. Policy

1. Wage or Salary

A wage or salary paid under Chapter 35 of Title 42 of the U.S. Code, Programs for Older Americans, is earned income subject to the general Medicaid policies on earned income.

2. Not a Wage or Salary

Anything provided under Chapter 35 of Title 42 of the U.S. Code, Programs for Older Americans, other than a wage or salary is excluded from income.

C. Procedure

1. Verify Program

Use documents in the individual's possession, contact with the provider or a local council on aging, or a precedent to verify that the program is funded by the Federal Government under chapter 35 of "The Older Americans Act" and whether a wage or salary is paid.

2. Wage or Salary

See S0820.100.

3. Not a Wage or Salary-Accept Allegation

Accept the individual's allegation of receipt of anything other than a wage or salary and exclude it without further development unless you have reason to question the allegation.

S0830.645 REFUGEE CASH ASSISTANCE, CUBAN AND HAITIAN ENTRANT CASH ASSISTANCE, AND FEDERALLY REIMBURSED GENERAL ASSISTANCE PAYMENTS TO REFUGEES

A. Background

Refugee Cash Assistance and Cuban Haitian Entrant Cash Assistance and federally funded programs which make ongoing needs-based payments to refugees during their first *12* months in the United States.

B. Policy Principles

1. Refugee Cash Assistance, Cuban and Haitian Entrant Cash Assistance and federally reimbursed general assistance payments to refugees are federally funded income based on need and, unless excluded under a PASS (S0810.430) are counted as income. The \$20 general income exclusion (S0810.420) does not apply to this income.
2. A payment under one of these programs is always considered to be a cash payment.

C. Operating Procedures

If a payment is made under one of these programs to a family unit or a group of people, the amount of the grant attributable to one individual in the family is determined by the incremental method (i.e., the income is the difference between the amount paid and the amount which would have been paid had the individual not been included).

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date November 1995
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.650	Page 115

S0830.650 REFUGEE RECEPTION AND PLACEMENT GRANTS AND REFUGEE MATCHING GRANTS

A. Background

Federal funds are provided to national voluntary refugee resettlement agencies such as Catholic Charities or the Hebrew Immigrant Aid Society, which provides services (including food, clothing and shelter) related to initial resettlement of new refugees. Assistance involving these funds will usually be received during the first 30 days after the refugee arrives in this country.

Refugee reception and placement grants are provided by the Department of State. Refugee matching grants are provided by the Department of Health and Human Services.

B. Policy Principle

Assistance involving a refugee reception and placement grant or a refugee matching grant is subject to the general rules pertaining to income and income exclusions.

NOTE: Assistance involving a refugee reception and placement grant or a refugee matching grant is not federally funded income based on need (S0830.170). However, do not confuse this assistance with Refugee Cash Assistance, Cuban and Haitian Entrant Cash Assistance, and federally reimbursed general assistance. The latter three types of assistance are provided by governmental entities rather than the voluntary agencies and pertinent instructions are found in S0830.645.

C. Operating Procedures

Consider the assistance to be provided and funded by the voluntary agency. Determine the nature of the assistance and apply the appropriate operating instructions pertaining to income and income exclusions. Related instructions include:

S0815.050 (Medical and Social Services)
 S0830.605 (Home Energy Assistance and Support Maintenance Assistance)
 S0810.420 (\$20 General Income Exclusion)

Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.655	Page 116

S0830.655 RELOCATION ASSISTANCE

A. Kinds of Relocation Assistance

Relocation assistance is provided to persons displaced by projects which acquire real property. The following types of reimbursement, allowances, and help are provided:

- moving expenses;
- reimbursement for losses of tangible property;
- expenses of looking for a business or farm;
- displacement allowances;
- amounts required to replace a dwelling which exceed the agency's acquisition cost for the prior dwelling;
- compensation for increased interest costs and other debt service costs of replacement dwelling (if it is encumbered by a mortgage);
- expenses for closing costs (but not prepaid expenses) on replacement dwelling (if it encumbered by a mortgage);
- rental expenses for displaced tenants;
- amounts for downpayments on replacement housing for tenants who decide to buy;
- mortgage insurance through Federal programs with waiver of requirements of age, physical condition, personal characteristics, etc., which borrowers must usually meet; and
- direct provision of replacement housing (as a last resort).

B. Policy - Federal or Federally Assisted Project

1. Exclusion

Relocation assistance provided under title II of the Uniform Relocation Assistance and Real Property Acquisitions Policies Act of 1970 (subchapter II, chapter 61, title 42 of the U.S. Code) is excluded from income.

2. Applicability

This exclusion applies to relocation assistance provided to persons displaced by any Federal or federally-assisted project. Any Federal assistance is sufficient to bring into play the Federal statutes controlling acquisition of real property, requiring that relocation assistance be available and excluded from income.

3. Exception: Revenue Sharing

If the only Federal assistance is revenue sharing, this exclusion does not apply, since such funds are considered to belong to the governmental unit which received them from the Federal Government. However, the exclusion in C. below may apply.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date November 1995
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.660	Page 117

**C. Policy - State,
Local, or State -
Assisted/Locally
Assisted Project**

1. Exclusion

Relocation assistance provided by a State or local government or through a State-assisted or locally-assisted project, which is the same type of assistance described in A. above (i.e., comparable to relocation assistance provided under the statute shown in B.1. above) is excluded from income.

2. Applicability

This exclusion applies to relocation assistance provided by persons displaced by any State, local, or State-assisted/locally-assisted project.

D. Procedure

Verify that the project which displaces the individual has governmental involvement. This can be done by using documents in the individual's possession, contacting the provider or entity involved in the project, or using a precedent. Once verified, accept the individual's signed statement of the assistance without further development or documentation.

NOTE: If the individual retains relocation assistance beyond the month of receipt, see S1130.670B.

E. References

- Treatment of resources excluded by other Federal statutes, S1130.640.
- Treatment of resources excluded as relocation assistance, S1130.670.

S0830.660 VICTIMS COMPENSATION PAYMENTS

A. Policy

Any payment received from a fund established by a State to aid victims of crime is excluded from income.

B. Procedure

1. Verification

Verify that the compensation came from a State-established fund to aid victims of crime. This can be done by using documents in the individual's possession, contacting the provider or using a precedent. Once verified, accept the individual's allegation of amounts and date of receipt and exclude the payment without further development.

NOTE: If the individual retains compensation payments beyond the month of receipt, see S1130.665 for additional verification requirements.

C. References

- Exclusion from resources of crime victim's compensation payments, S1130.665.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date November 1995

OTHER UNEARNED INCOME EXCLUSIONS

S0830.700 HOME PRODUCE FOR PERSONAL CONSUMPTION

A. Definition Home produce is food which a person catches in the wild or raises.

B. Policy

- 1. Home Produce Which is Consumed** Home produce is excluded from income if it is consumed by the individual or his or her household.
- 2. Home Produce Which is Sold** The proceeds from the sale of home produce are earned or unearned income according to the chart below:

If the activity is	and the individual is	and the income was derived from land the income from which is...	then the value received is.....
not a trade or business	N/A	N/A	unearned income
A trade or business	not an Indian	N/A	net earnings from self-employment (NESE)
	an Indian	exempt from income tax by reason of a Federal statute or treaty	unearned income
		not exempt from income tax by reason of a Federal statute or treaty	NESE

C. Procedure

- 1. Assumption About Use** Assume that any home produce which an individual alleges will be used for personal or household consumption will be so used.
- 2. Amount of Home Produce Traded or Sold is Small** If the produce is basically raised for home consumption rather than as a business and the amount of produce traded or sold is small (e.g., extra eggs, home-canned beans, etc.), assume that the production costs equaled the value of what was received. No income is derived from such a trade or sale.
- 3. Accept Allegation** Accept an individual's allegations concerning the raising, catching, and consuming of home produce unless you have reason to question the allegation.
- 4. Documentation** If you apply an assumption from 1. or 2. above, document the allegation only. No further development or documentation is needed.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date January 2010
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.710	Page 119

S0830.705 REFUNDS OF TAXES PAID ON REAL PROPERTY OR FOOD

- A. Policy** Any amount received from any public agency as a return or refund of taxes paid on real property or on food purchased is excluded from income.
- B. Procedure** Accept an allegation that a refund of this nature has been received and exclude the income without further development unless you have reason to question the allegation (e.g., the program making the refunds is unknown, the amount of the refund appears inordinate, etc.).
- C. Reference** Income tax refunds, S0815.270.

S0830.710 GERMAN REPARATIONS PAYMENTS

- A. Introduction** German reparations payments are made under the Republic of Germany's Federal Law for Compensation of Nationalist Socialist Persecution ("German Restitution Act") to certain survivors of the Holocaust. The payments may be made periodically or as a lump sum.
- B. Policy**
- 1. Income Rule** Reparations payments received from the Federal Republic of Germany are excluded from income. These payments are excluded prior to application of the \$20 general income exclusion.
 - 2. Interest Income** *Interest earned on German Reparations payments received on or after July 1, 2004 is excluded from income.*
- C. Procedure** If an individual reports receiving German reparations payments, accept a signed allegation of the amount(s) involved and the date(s) these payments were received. No further development or documentation is needed.
- D. Reference** Exclusion of German reparations payments from resources, S1130.610.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date January 2010
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.715	Page 120

S0830.715 AUSTRIAN SOCIAL INSURANCE PAYMENTS

A. Background

The nationwide class action lawsuit, *Bondy v. Sullivan*, involved Austrian social insurance payments which were based, in whole or in part, on wage credits granted under Paragraphs 500-506 of the Austrian General Social Insurance Act (GSIA). These paragraphs grant credits to individuals who suffered a loss (i.e., were imprisoned, unemployed, or forced to flee Austria) during the period from March 1933 to May 1945 for political, religious, or ethnic reasons. (The GSIA does not specify what entity, e.g., the government or an employer, must be responsible for the loss in order for the credits to be granted.) Not all Austrian social insurance payments are based on Paragraphs 500-506.

B. Policy

1. Income Rule

Austrian social insurance payments based, in whole or in part, on wage credits granted under Paragraphs 500-506 of the Austrian General Social Insurance Act are not counted as income. Austrian social insurance payments not based, in whole or in part, on wage credits granted under Paragraphs 500-506 are counted as income for Medicaid purposes.

2. Interest Income

Interest earned on Austrian social insurance payments received on or after July 1, 2004 is excluded from income.

C. Description of Award Notices

Austrian pension insurance agencies issue many types of award notices. Some notices contain information about wage credits granted under Paragraphs 500-506 of the Austrian General Social Insurance Act. The notices are written in German, and anywhere in the notice, the following language may appear:

DIE BEGUENSTIGUNGSVORSCHRIFTEN FUER GESCHAEDIGTE AUS POLITISCHEN ODER RELIGIOESEN GRUENDEN ODER AUS GRUENDEN DER ABSTAMMUNG WURDEN ANGEWENDET (§500FF ASVG);

TRANSLATION: "The regulations which give preferential treatment for persons who suffered because of political or religious reasons or reasons of origin were applied (§500ff ASVG)."

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date November 1995
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.715	Page 121

D. Procedure

Use this chart to determine whether or not to count Austrian social insurance payments as income.

STEP	ACTION
1	Does the individual have an award notice from an Austrian pension insurance agency? If yes, go to step 2. If no, go to step 4.
2	Does the notice include the German phrase from C. above? If yes, retain a copy of the notice for the file. Go to step 3. If no, retain a copy of the notice for the file. Go to step 4.
3	<ul style="list-style-type: none"> Do not count the payment as income. STOP.
4	Does the individual allege that the payment is based, in whole or in part, on wage credits under Paragraph 500-506 of the Austrian General Social Insurance Act? If yes , document the allegation. Go back to step 3. If no , document the allegation. Go to step 6. If unknown , go to step 5.
5	Does the individual allege being imprisoned, unemployed or forced to flee Austria during the period 1933 - 1945 because of political or religious reasons? NOTE: The individual need not specify which entity caused the loss. If yes , document the allegation. Go back to step 3. If no , document the allegation. Go to step 6.
6	<ul style="list-style-type: none"> Count the payment as unearned income. Follow verification requirements in S0830.005 and S0830.105. If verification is not readily available, accept the individual's signed statement as to the amount, source, and frequency of the payment. STOP.

Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.725	Page 122

S0830.720 JAPANESE-AMERICAN AND ALEUTIAN RESTITUTION PAYMENTS

A. Policy

Restitution payments made by the U.S. Government to individual Japanese-Americans or the spouse or parent of an individual of Japanese ancestry (or, if deceased, to their survivors) and Aleuts who were interned or relocated during World War II are excluded from income and resources. Also, restitution payments from the Canadian Government to individual Japanese-Canadians who were interned or relocated during World War II are excluded from income and resources.

Interest earned on Japanese-American and Aleutian Restitution payments received on or after July 1, 2004 is excluded from income.

B. Procedure

Use documents in the individual's possession to verify the nature of these payments. Accept the individual's signed allegation of the amount and date of receipt if this is not evident from the documents.

If the individual alleges receiving restitution payments from the U.S. Government but has no documents which verify this, obtain verification from the:

Office of Redress Administration
U.S. Department of Justice
P. O. Box 66260
Washington, DC 20035-6260

Provide the individual's name, address, date of birth and Social Security number in the request accompanied by signed authorization from the individual for release of information.

If the individual alleges receiving restitution payments from the Canadian Government but has not documents which verify this, ask if the individual was imprisoned, relocated, deported, or deprived of other rights in Canada during the period December 1941 to March 1949 because of their Japanese ancestry.

If the answer is "yes," exclude the payment. If the answer is "no," count the payment as income.

Funds commingled, \$1130.700

S0830.725 NETHERLANDS WUV PAYMENTS TO VICTIMS OF PERSECUTION

A. Background

The Dutch government, under the Netherlands' Act on Benefits for Victims of Persecution 1940-1945 (Dutch acronym, WUV), makes payments to both Dutch and non-Dutch individuals who, during the German and Japanese occupation of the Netherlands and Netherlands East Indies (now the Republic of Indonesia) in World War II, were victims of persecution because of their race, religion, beliefs, or homosexuality and, as a result of that persecution are presently suffering from illnesses or disabilities.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date January 2010
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.730	Page 123

Payments under this Act began January 1, 1973 and include four categories of benefits: periodic income payments, compensation for non-definable disability expenses (Dutch acronym, NMIK), reimbursement of persecution related disability expenses, and partial compensation for persecution related disability expenses.

B. Policy

1. Income Rule

WUV payments are excluded from income.

2. Interest Income

Interest earned on WUV payments received on or after July 1, 2004 is excluded from income.

C. Procedure

Use documents in the individual's possession to verify that the payment is a Netherlands WUV payment. If the individual has no documentation or there is reason to question the source of the payments, obtain verification from:

Consulate General of the Netherlands
Attn: WUV Department
Suite 509
3460 Wilshire Blvd.
Los Angeles, CA 90010-2270
(213) 480-1471 (9:00 - 12:30 Pacific Time)

If you will also be developing a resource exclusion for retained WUV payments, see S1130.605 for instructions on verifying dates and amounts of payments.

D. References

Exclusion of Netherlands WUV Payments From Resources, S1130.605.

S0830.730 AGENT ORANGE SETTLEMENT PAYMENTS

A. Background

Agent Orange settlement payments made in connection with the case of **In re Agent Orange Product Liability Litigation** come from a fund created by manufacturers of Agent Orange who agreed to pay into a settlement fund. Payments began in March 1989. Qualifying veterans will receive at least one payment a year for the life of the program. Qualifying survivors of deceased veterans will receive a single lump sum payment.

Interest earned on Agent Orange settlement payments received on or after July 1, 2004 is excluded from income.

B. Policy

Effective January 1, 1989, payments made from the Agent Orange settlement fund or any other fund established pursuant to the settlement in the Agent Orange product liability litigation are excluded from income and resources.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date January 2010

S0830.740 RADIATION EXPOSURE COMPENSATION TRUST FUND (RECTF) PAYMENTS

A. Background

Fallout emitted during the U.S. Government's atmosphere nuclear testing in Nevada during the 1950's and during a brief period in 1962 exposed some individuals to doses of radiation that put their health at risk. In addition, some individuals employed in uranium mines during the period January 1, 1947 to December 31, 1971 were exposed to large doses of radiation. Public Law 101-426 created the Radiation Exposure Trust Fund (RECTF) and authorizes the Department of Justice (DOJ) to make compensation payments to individuals (or their survivors) who were found to have contracted certain diseases after the exposure. The payments will be made as one-time lump sum. Generally, the exposure occurred in parts of Arizona, Colorado, Nevada, New Mexico, Utah, and Wyoming.

B. Policy

1. RECTF Payments

Payments from RECTF are excluded from income.

2. Interest on Unspent RECTF Funds

Interest earned on unspent RECTF payments received on or after July 1, 2004 is excluded from income.

C. Procedure

Use documents in the individual's possession to verify that the payment is from the RECTF. Accept the individual's signed allegation of the amount and date of receipt if it is not evident from the documents.

If the individual has no documents or there is reason to question the source of the payments, obtain verification from:

The Radiation Exposure Compensation Program
U.S. Department of Justice
P. O. Box 146
Benjamin Franklin Station
Washington, DC 20044-0146

Use the individual's name and Social Security number (SSN) as identifying information when writing to the DOJ. When writing on behalf of a survivor, also include the survivor's name and SSN. Include an authorization from the individual for release of the information.

D. Reference

Exclusion of Radiation Exposure Compensation Trust Fund payments from resources, S1130.680.

S0830.741 ENERGY EMPLOYEES OCCUPATIONAL ILLNESS COMPENSATION PLAN (EEOICP)

A. Background

The EEOICP was established to pay claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (the EEOICP Act). The EEOICP Act authorizes lump sum payments and the reimbursement of medical expenses to employees of the Department of Energy (DOE) or of private companies under contract with DOE, who suffer from specified diseases as a result of their work in the nuclear weapons industry. The EEOICP Act also authorizes compensation to the survivors of these employees under certain circumstances. The Department of Labor (DOL) is responsible for the administration, adjudication and payment of claims under the EEOICP. DOL makes payments from the Energy Employees Occupational Illness Compensation Fund. Part B and Part E of the EEOICP have different effective dates, illness criteria and medical/compensation allowances.

B. Policy

1. EEOICP Payments

Lump sum payments made under the EEOICP, including reimbursement for medical expenses, are excluded from income for Medicaid purposes.

2. Interest on EEOICP Payments

NOTE: *Individuals who are eligible under Section 5 of the Radiation Exposure Compensation Program (RECP) may also be eligible for compensation and paid medical expenses under the EEOICP.*

C. Procedure

Effective July 1, 2004, interest earned on unspent EEOICP payments is excluded from income for SSI purposes.

Use documents the applicant provides to verify the payment is from EEOICP. Accept the individual's signed allegation of the amount and date of receipt if it is not evident from the documents.

If the individual has not documentation or there is reason to question the source of the payments, contact the Department of Labor (DOL). A list of the DOL district offices and telephone numbers can be found on the DOL website at: <http://www.dol.gov/esa/regs/compliance/owcp/eeoicp/main.htm>

S0830.755 RICKY RAY HEMOPHILIA RELIEF FUND PAYMENTS

A. Background

On November 12, 1998, the President signed into law the Ricky Ray Hemophilia Relief Fund Act of 1998, P.L. 105-369.

This Act provides for a single payment of \$100,000 from the Ricky Ray Hemophilia Relief Fund to:

- Certain individuals with a blood-clotting disorder who may have contracted an HIV infection from a blood transfusion, and*
- Certain current and former spouses of these individuals who also contracted an HIV infection, and*
- Certain children of these individuals who also contracted an HIV infection, and*
- Certain surviving spouses, children, and parents of the above persons.*

B. Policy

The Act provides for exclusion of payments from the Ricky Ray Hemophilia Relief Fund for Medicaid purposes.

C. Procedure

If verification of the payment is available from the individual:

- For private payments, contact Metropolitan Life at 1-800-638-8787 for verification of the type and amount of the private payment. Document the case record with the type and amount of the payment.*
- For payments from the Ricky Ray Hemophilia Relief Fund, contact the Ricky Ray Program Office at 1-888-496-0338 for verification of the type and amount of the payment. Document the case record with the type and amount of the payment.*

Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.800	Page 125

M0830.760 WALKER V. BAYER SETTLEMENT PAYMENTS

A. Policy

Section 4735 of the Balanced Budget Act of 1997 (P.L. 105-33) states that payments described in this subsection from the settlement of the Susan Walker v. Bayer Corp., et.al., class action lawsuit are NOT counted as income in determining eligibility for Medicaid. Payments described in this subsection are:

- a. payments made from any fund established pursuant to a class settlement in the case of Susan Walker v. Bayer Corp., et. al., 96-C-5024 (N.D.III.); and
- b. payments made pursuant to a release of all claims in a case that is entered into in lieu of the class settlement of Susan Walker v. Bayer Corp., et. al., and that is signed by all affected parties on or before the later of
 - December 31, 1997, or
 - the date that is 270 days after the date on which such release is first sent to the persons to whom the payment is to be made.

Interest earned on retained funds from payments made pursuant to a class settlement in the case of Susan Walker v. Bayer Corp, et. al. on or after July 1, 2004 is excluded from income.

B. Procedure

Information received by claimants in this lawsuit shows that claimants can choose to receive the payment in one of three ways - in a lump sum, a structured settlement, or a special needs trust. Regardless of which form the individual chooses, the payment(s) are excluded if the above requirements are met.

Verify the source of the funds from a letter from the individual's attorney or a copy of the check which identifies the payer as a Walker v. Bayer settlement account.

SPECIAL CONSIDERATIONS FOR NATIVE AMERICANS

S0830.800 BUREAU OF INDIAN AFFAIRS GENERAL ASSISTANCE

A. Definition

Bureau of Indian Affairs General Assistance (BIA GA) is a federally funded program administered by the Bureau of Indian Affairs (BIA) through its local agency or a tribe. The program makes periodic payments to needy Indians.

B. Policy

BIA GA payments are federally funded income based on need and, therefore, count as income. The \$20 per month general income exclusion does not apply.

C. Procedure

Develop BIA GA payments using the instructions and development guidelines for AFDC payments in S0830.400 D. except contact the local agency administering the BIA GA program.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date July 2000
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.820	Page 126

S0830.810 BUREAU OF INDIAN AFFAIRS ADULT CUSTODIAL CARE AND CHILD WELFARE ASSISTANCE PAYMENTS

- A. Introduction** Bureau of Indian Affairs (BIA) Adult Custodial Care (ACC) and Child Welfare Assistance (CWA) payments are made on behalf of both institutionalized and noninstitutionalized recipients. BIA foster care payments are made under the ACC and CWA programs.
- B. Policy**
- 1. Noninstitutionalized Recipients** BIA ACC and CWA payments (other than foster care assistance) made to noninstitutionalized individuals are federally funded income based on need and, therefore, count as income.
 - 2. Foster Care** BIA foster care assistance is considered a social service and, therefore, is not income for Medicaid purposes.
- C. References**
- Definition of foster care, S0830.410
 - Income Based on need, S0830.170
 - Social Services, S0815.050

S0830.820 INDIVIDUAL INDIAN MONEY ACCOUNTS

- A. Introduction** No special policy applies to Individual Indian Money (IIM) accounts. Regular income and resources rules concerning restricted and unrestricted accounts apply. The following material is provided for informational purposes only.
- IIM accounts are similar to regular bank accounts. Funds retained in an IIM account may earn interest. The BIA area office or agency on the reservation administers these accounts which are either restricted or unrestricted. A restricted account may be converted to an unrestricted account or vice versa, but only with BIA approval.
- B. Definitions**
- A restricted IIM account requires BIA authorization for the individual to make a withdrawal.
- 1. Restricted IIM Account**
 - 2. Unrestricted IIM Account** An unrestricted account does not require BIA authorization for the individual to make a withdrawal.
- C. List of IIM Deposit Sources** The following are typical sources of deposits to IIM accounts. The following list is not all-inclusive:
- Money distributed from tribal funds;
 - Proceeds from trust sources;
 - Proceeds from the sale or conversion of trust capital assets;
 - Proceeds from an inheritance interest in trust lands;
 - Per capita payments from judgments of the Indian Claim

Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.820	Page 126a

Commission;

- Proceeds from the sale of crops, livestock, or other personal property held in trust;
- Restricted funds pursuant to a specific plan approved by the Federal Government;
- Benefits from Federal agencies due minors and incompetents who have neither guardians nor payees;
- Lease income.

D. Procedures

Use the following guidelines, when necessary, to develop IIM accounts.

REMINDER: Regular income and resources rules apply to the development of IIM accounts.

As necessary, use information in the recipient's possession, or determine through contact with BIA.

If an account has been converted from restricted to unrestricted or vice versa, note the beginning and ending dates for each period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date November 1995
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.820	Page 127

E. Examples

These examples show how regular income and resources rules apply to IIM accounts.

Example 1 - Restricted Account

In March, Mr. Strong's \$2,200 annual individual Indian trust income payment is deposited, as required by BIA, into the restricted IIM account. The same month, his title II check of \$250 is also directly deposited into that account. Because Mr. Strong's title II check was available to him in March (though he opted to have it deposited into his restricted account), regular income rules require treating the \$250 as unearned income for that month. If retained in the restricted account, the title II benefits are not a resource.

Under P.L. 103-66, \$2,000 of lease income would be excluded per S0830.850. However, per S1140.200, none of the lease income is income when deposited or a resource when retained in the IIM account since Mr. Strong does not have direct control of the funds.

In April, the BIA releases \$200 to Mr. Strong. Per S0810.030 A., \$200 is counted as unearned income for the month of April since the nonexcludable \$200 of the \$2,200 lease income was then available to him. Per S1130.700 B.2., the EW assumes that the nonexcludable lease income funds are withdrawn first, leaving as much of the excludable funds in the account as possible.

Example 2 - Unrestricted Account

In May, a \$150 per capita payment from locally managed tribal funds is deposited into Mr. Thornton's unrestricted IIM account. Development reveals that these funds were not held in trust by the Secretary of the Interior and, therefore, are not excluded from income and resources. The \$150 counts as income to Mr. Thornton in May, per S0810.030 A., and counts as a resource, to the extent retained, in June per S1120.005 B.2. In June, Mr. Thornton withdraws the money from his account. The \$150 is a conversion of a resource in June per S0815.200, and is therefore not counted as income for that month.

S0830.830 INDIAN-RELATED EXCLUSIONS ACCOUNTS

A. Introduction

For Medicaid purposes, many Federal statutes provide for the exclusion from income and resources of certain payments made to members of Indian tribes and groups. Some statutes pertain to specific tribes or Indian groups while others apply to certain types of payments. Some statutes that predate the SSI program provide that some payments made under those acts shall not be considered as income or resources when determining eligibility for assistance under the Social Security Act.

B. Definition Per Capita Payments

Per capita payments are payments that are made according to the number of individual in a specific group and in which each individual shares equally.

C. Policy - Type of Payment

The following statutes provide that certain **types of payments** made to members of Indian tribes are excluded from income **and** resources (1.-4., below), or **only** from income (5., below).

1. Indian Judgment Funds Distribution Act—Public Law (P.L.) 93-134

Effective October 19, 1973, per capita distribution payments to members of Indian tribes who are due judgment funds, according to a plan of the Secretary of the Interior (or legislation, when a plan cannot be prepared or is not approved by the Congress) are excluded from income and resources. This does not include payments of funds distributed or held in trust (i.e., in the possession or care of a trustee) according to public laws enacted before October 19, 1973.

2. Distribution of Indian Judgment Funds—P.L. 97-458

Effective January 12, 1983, Indian judgment funds held in trust (i.e., in the possession or care of a trustee) or distributed per capita, pursuant to an approved plan, or their availability, are excluded from income and resources. Indian judgment funds include interest and investment income accrued while the funds are held in trust. Initial purchases made with distributed judgment funds are excluded from resources.

3. Per Capita Act — P.L. 98-64

Effective August 2, 1983, per capita distributions of all funds held in trust by the Secretary of the Interior to members of Indian tribe are excluded from income and resources.

NOTE: Any local tribal funds that a tribe distributes to individuals on a per capita basis, but which have not been held in trust by the Secretary of the Interior (e.g., tribally managed gaming revenues) are **not** excluded from income and resources under this provision.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M08	November 1995
Subchapter Subject	Page ending with	Page
M0830 UNEARNED INCOME	S0830.830	129

4.

Alaska Native Claims Settlement Act (ANCSA) — P.L. 100-241

Effective February 3, 1988, the following items received from a native corporation are excluded from income and resources:

 - cash received from a native corporation (including cash dividends on stock received from a native corporation) to the extent it does not exceed \$2,000 per individual per year;
 - stock (including stock issued or distributed by a native corporation as a dividend or distribution on stock);
 - a partnership interest;
 - land or an interest in land (including land or an interest in land received from a native corporation as a dividend or distribution on stock);
 - an interest in a settlement trust.

The ANCSA also provides that up to \$2,000 in retained distribution from a native corporation may be excluded from resources for each year beginning with 1988.
5.

Payments From Individual Interests in Trust or Restricted Lands — P.L. 103-66

Effective January 1, 1994, up to \$2,000 per year received by Indians that is derived from individual interests in trust or restricted lands is excluded from income. (See S0830.850.)

NOTE: Interests of individual Indians in trust or restricted lands are excluded from resources (S1130.150.)

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date November 1995
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.830	Page 130

D. Policy — Payments to Specific Indian Tribes and Groups

The following statutes provide that certain payments made to members of **specific Indian tribes and groups** and excluded from income and resources.

1. Distribution of Per Capita Funds — P.L. 85-794

Effective August 28, 1958, per capita payments to members of the **Red Lake Band of Chippewa Indians** from the proceeds of the sale of timber and lumber on the Red Lake Reservation are excluded from income and resources.

2. Distribution of Judgment Funds — P.L. 92-254

Effective March 18, 1972, per capita distribution payments by the **Blackfeet and Gros Ventre** tribal governments to members, which resulted from judgment funds to the tribes, are excluded from income and resources.

3. Distribution of Claims Settlement Funds — P.L. 96-531 and 96-305

Effective December 22, 1974, settlement fund payments to members of the **Hopi and Navajo Tribes**, and the availability of such funds, are excluded from income and resources.

4. Receipts from Lands Held in Trust for Indian Tribes — P.L. 94-114

Effective October 17, 1975, receipts derived from the following trust lands and distributed to members of designed Indian tribes are excluded from income and resources.

The first four Indian groups had lands conveyed with mineral rights prior to P.L. 94-114; that law conveyed the rest of the lands to the remaining Indian groups.

Indian Group	Conveyance Statue	State
Seminole Indians	P.L. 84-736 (70 Stat 581) (July 20, 1956)	Florida
Pueblos of Zia and Jemez	P.L. 84-926 (70 Stat 941) (August 2, 1956)	New Mexico
Stockbridge Munsee Indian Community	P.L. 92- 480 (86 Stat 795) (October 9, 1972)	Wisconsin
Burns Indian Colony	P.L. 92-488 (86 Stat 806) (October 13, 1972)	Oregon

5. **Distribution of Judgment Funds — P.L. 94-189** Effective December 31, 1975, judgment fund distributed per capita to, or held in trust for, members of the **Sac and Fox Indian Nation**, and the availability of such funds, are excluded from income and resources.
6. **Distribution of Judgement Funds — P.L. 94-540** Effective October 18, 1976, judgment funds distributed per capita to, or held in trust for, members of the **Grand River Band of Ottawa Indians**, and the availability of such funds, are excluded from income and resources.
7. **Distribution of Judgment Funds — P.L. 95-433** Effective October 10, 1978, any judgment funds distributed per capita to members of the **Confederated Tribes and Bands of the Yakima Indian Nation** or the **Apache Tribe of the Mescalero Reservation** are excluded from income and resources.
8. **Receipts from Lands Held in Trust — P.L. 95-498** Effective October 21, 1978, receipts derived from trust lands awarded to the **Pueblo of Santa Ana** and distributed to members of that tribe are excluded from income and resources.
9. **Receipts from Lands Held in Trust — P.L. 95-499** Effective October 21, 1978, receipts derived from trust lands awarded to the **Pueblo of Zia** and distributed to members of that tribe are excluded from income and resources.
10. **Distribution of Judgment Funds — P.L. 96-318** Effective August 1, 1980, any judgment funds distributed per capita or made available for programs for members of the **Delaware Tribe of Indians** and the absentee **Delaware Tribe of Western Oklahoma** are excluded from income and resources.
11. **Maine Indian Claims Settlement Act — P.L. 96-420** Effective October 10, 1980, all funds and distributions to members of the **Passamaquoddy Tribe, the Penobscot Nation, and the Houlton Band of Maliseet Indians** under the Maine Indian Claims Settlement Act, and the availability of such funds, are excluded from income and resources.
12. **Distribution of Judgment Funds — P.L. 97-95** Effective December 17, 1981, any distributions of judgment funds to members of the **San Carlos Tribe of Arizona** are excluded from income and resources.
13. **Distribution of Judgment Funds — P.L. 97-371** Effective December 20, 1982, any distributions of judgment funds to members of the **Wyandot Tribe of Indians of Oklahoma** are excluded from income and resources.
14. **Distribution of Judgment Funds — P.L. 97-372** Effective December 20, 1982, distributions of judgment funds to members of the **Shawnee Tribe of Indians (Absentee Shawnee Tribe of Oklahoma, the Eastern Shawnee Tribe of Oklahoma, and the Cherokee Band of Shawnee descendants)** are excluded from income and resources.
15. **Distribution of Judgment Funds — P.L. 97-376** Effective December 21, 1982, judgment funds distributed per capita or made available for programs for members of the **Miami Tribe of Oklahoma and the Miami Indians of Indiana** are excluded from income and resources.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date November 1995

16. **Distribution of Judgment Funds — P.L. 97-402** Effective December 31, 1982, distributions of judgment funds to members of the **Clallam Tribe of Indians of the State of Washington (Port Gamble Indian Community, Lower Elwha Tribal Community, and the Jamestown Band of Clallam Indians)** are excluded from income and resources.
17. **Distribution of Judgment Funds — P.L. 97-403** Effective December 31, 1982, judgment funds distributed per capita or made available for programs for members of the **Pembina Chippewa Indians (Turtle Mountain Band, Chippewa Cree Tribe, Minnesota Chippewa Tribe, and Little Shell Band of Chippewa Indians of Montana)** are excluded from income and resources.
18. **Distribution of Judgment Funds — P.L. 97-408** Effective January 8, 1983, per capita distributions of judgment funds to members of the **Gros Ventre and Assiniboine Tribes of Fort Belknap Indian Community, and the Papago Tribe of Arizona**, are excluded from income and resources.
19. **Distribution of Judgment Funds — P.L. 97-436** Effective January 8, 1983, up to \$2,000 of per capita distributions of judgment funds to members of the **Conferated Tribes of the Warm Springs Reservation** are excluded from income and resources.
20. **Distribution of Judgment Funds — P.L. 98-123** Effective October 13, 1983, judgment funds distributed to the **Red Lake Band of Chippewa Indians** are excluded from income and resources.
21. **Distribution of Claims Settlement Funds — P.L. 98-124** Effective October 13, 1983, funds distributed per capita or family interest payments for members of the **Assiniboine Tribe of the Fort Belknap Indian Community of Montana and the Assiniboine Tribe of the Fort Peck Indian Reservation of Montana** are excluded from income and resources.
22. **Distribution of Claims Settlement Funds — P.L. 98-432** Effective September 28, 1984, judgment funds and income therefrom distributed to members of the **Shoalwate Bay Indian Tribe** are excluded from income and resources.
23. **Distribution of Claims Settlement Funds — P.L. 98-500** Effective October 19, 1984, all distributions to heirs of certain deceased Indians under the Old Age Assistance Claims Settlement Act are excluded from income and resources.
24. **Distribution of Judgment Funds — P.L. 98-602** Effective October 30, 1984, judgment funds distributed per capita or made available for any tribal program, for members of the **Wyandotte Tribe of Oklahoma** and the **Absentee Wyandottes**, are excluded from income and resources.
25. **Distribution of Judgment Funds — P.L. 99-130** Effective October 28, 1985, per capita and dividend payment distributions of judgment funds to members of the **Santee Sioux Tribe of Nebraska, the Flandreau Santee Sioux Tribe, and the Prairie Island Sioux, Lower Sioux, and Shakopee Mdewakanton Sioux Communities of Minnesota** are excluded from income and resources.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date November 1995
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.830	Page 134

26. **Distribution of Judgment Funds — P.L. 99-146**
Effective November 11, 1985, funds distributed per capita or held in trust for members of the **Chippewas of Lake Superior** and the **Chippewas of the Mississippi** are excluded from income and resources.

27. **Distribution of Claims Settlement Funds — P.L. 99-264**
Effective March 24, 1986, distributed of claims settlement funds to members of the **White Earth Band of Chippewa Indians** as allottees, or their heirs, are excluded from income and resources.

28. **Distribution of Judgment Funds — P.L. 99-346**
Effective June 30, 1986, payments or distributions of judgment funds, and the availability of any amount for such payments or distributions, to members of the **Saginaw Chippewa Indian Tribe of Michigan** are excluded from income and resources.

29. **Distribution of Judgment Funds — P.L. 99-377**
Effective August 8, 1986, judgment funds distributed per capita or held in trust for members of the **Chippewas of Lake Superior and the Chippewas of the Mississippi** are excluded from income and resources.

30. **Distribution of Judgment Funds — P.L. 100-139**
Effective October 26, 1987, judgment funds distributed to members of the **Cow Creek Band of Umpqua Tribe of Indians** are excluded from income and resources.

31. **Aleutian and Pribilof Islands Restitution Act — P.L. 100-383**
Effective August 10, 1988, per capita restitution payments made to eligible **Aleuts** who were relocated or interned during World War II are excluded from income and resources. See S080.720.

32. **Distribution of Claims Settlement Funds — P.L. 199-411**
Effective August 22, 1988, per capita payments of claims settlement funds to members of the **Coushatta Tribe of Louisiana** are excluded from income and resources.

33. **Hoopa-Yurok Settlement Act —P.L. 100-580**
Effective October 31, 1988, funds distributed per capita for members of the **Hoopa Valley Indian Tribe and the Yurok Indian Tribe** are excluded from income and resources.

34. **Distribution of Judgment Funds — P.L. 100-581**
Effective November 1, 1988, judgment funds held in trust by the United States, including interest and investment income accruing on such funds, and judgment funds made available for programs or distributed to members of the **Wisconsin Band of Potawatomi (Hannahville Indian Community and Forest County Potawatomi)** are excluded fro income and resources.

35. **Distribution of Money and Land — P.L. 101-41**
Effective June 21, 1989, all funds assets, and income from the trust fund transferred to the member of the **Puyallup Tribe** under the Puyallup Tribe of Indians Settlement Act of 1989 are excluded from income and resources.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date November 1995
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.830	Page 135

- 36. Distribution of judgment Funds — P.L. 101-277** Effective April 30, 1990, judgment funds distributed per capita, or held in trust, or made available for programs, for members of the **Seminole Nation of Oklahoma, the Seminole Tribe of Florida, and Miccosukee Tribe of Indians of Florida**, (plus any interest and investment income accruing on the funds held in trust), and the availability of those funds, are excluded from income and resources.
- 37. Distribution of Settlement Funds — P.L. 101-503** Effective November 3, 1990, payments, funds, distributions, or income derived from them under the **Seneca Nation** Settlement Act of 1990 are excluded from income and resources.
- 38. Distribution of Settlement Funds — P.L. 101-618** Effective November 16, 1990, per capita distributions of settlement funds under the **Fallon Paiute Shoshone Indian Tribes** Water Rights Settlement Act of 1990 are excluded from income and resources.

E. Procedure

If there is an allegation or other indication that an individual received excluded judgment funds or settlement fund distributions, per capita payments, land, or receipts from land, follow these procedures.

- 1. Verification of Tribe Membership** **As necessary, verify that the individual is a member** of the relevant tribe by contact with BIA or tribal authorities.
- 2. Payment/Distribution Development** **Develop the identity and amount of excludable payment or distribution** by contact with BIA or tribal authorities or use of a precedent file. Trust Property Income (TPI) reports may also be available from BIA, which list to whom restricted individual Indian property is assigned, and show if lease or grazing rights payments are not paid through BIA or the tribe. If land is distributed, identify the location of the land as recorded by deed or other legal conveyance. (Additional contacts with the Bureau of Land Management may be necessary to develop land information.)
- 3. Documentation** **Document the file** using the method(s) below as needed:
 - Document case record for verifications made over the phone with the tribal authorities or the BIA area office.
 - Income report or comparable document from the BIA, the tribe's governing body, or its official financial representatives.
 - Signed statement from the tribal authorities, the BIA area offices, or Bureau of Land Management.

S0830.840 ALASKA NATIVE CLAIMS SETTLEMENT ACT EXCLUSIONS

A. Policy

1. Current Exclusions-- Effective February 3, 1988

- P.L. 100-241 provided Medicaid income and resource exclusions to Alaska Natives and their descendants. The following items received from a Native Corporation, are excluded from income and resources for Medicaid purposes:
- cash received from a native corporation (including cash dividends on stock received from a native corporation) to the extent it does not exceed \$2,000 per individual per year;
 - stock (including stock issued or distributed by a native corporation as a dividend or distribution on stock);
 - a partnership interest;
 - land or an interest in land (including land or an interest in land received from a native corporation as a dividend or distribution on stock);
 - an interest in a settlement trust.

S0830.850 EXCLUSION OF INCOME FROM INDIVIDUAL INTERESTS IN INDIAN TRUST OR RESTRICTED LANDS

A. Introduction

Native American income derived from tribal trust lands is excluded by federal statutes (see S0830.830 B). Individual interests of Native Americans in trust or restricted lands are excluded from resources (see S1130.150). The Omnibus Budget Reconciliation Act of 1993 (P.L. 103-66), enacted August 10, 1993, further provides for an exclusion of income derived from those individual interests in Indian trust or restricted lands for purposes of determining Medicaid eligibility.

This income (often called individual Indian trust or lease income) generally comes from interests in lands that were allotted to individual Indians many years ago. The income generated by those interests may be quite small since many of the original interests in allotted lands have fractionated over time, e.g., due to inheritance by multiple heirs over several generations.

B. Policy

Up to \$2,000 per year in payments derived from individual interests in Indian trust or restricted lands is excluded from income. Such payments include any interest which accrues on funds while held by B/A and before being distributed or credited to an individual's account.

This exclusion applies to the income of an ineligible spouse or ineligible parent(s) in the deeming process.

For purposes of applying the \$2,000 annual exclusion, for both eligibles and deemors, only payments received in months of the Medicaid individual's eligibility count toward the \$2,000 annual exclusion.

C. Procedure-- Development and Documentation

Verify and document income derived from individual interests in trust or restricted lands per S0830.820 E.

If that income exceeds \$2,000 per calendar year, determine the month that the \$2,000 annual exclusion was exceeded, and count the excess as unearned income in the months received.

EXAMPLE: During a redetermination interview, Mr. Elwell, a member of the Yakima Indian Tribe, reports receiving accumulated lease payments of \$2,800 in 1994 from his individual interests in allotted Indian grazing lands. He alleges receiving \$1,000 in March, \$700 in June and \$1,100 in October. Review of case records shows that the payments for March and June were reported timely, but Mr. Elwell was ineligible for Medicaid in June due to receipt of earned income. The eligibility worker (EW) excludes the payment received in March and \$1,000 of the payment received in October, and does not consider the \$700 received in June. The EW determines unearned income of \$100 for October, the month the \$2,000 annual exclusion was exceeded.

OVERVIEW

M1110.001 ROLE OF RESOURCES

A. Introduction

As a program based on need, Medicaid uses the value of a person's countable resources as one of two financial criteria in determining eligibility. The other criterion is income.

B. Policy Principles

1. Monthly Determinations

Eligibility with respect to resources is a determination made for each calendar month, beginning with the month of application or, if retroactive eligibility is being determined, the third month prior to the month in which the application is submitted. Resource eligibility exists for the full month if countable resources were at or below the applicable resource limit for any part of the month.

2. Countable Resources

Not everything a person owns (i.e., not every asset) is a resource and not all resources count against the resource limit. *The location of a resource does not by itself exclude the resource.* "The Social Security Act and other Federal statutes require the exclusion of certain types and amounts of resources. Any assets that are resources but not specifically excluded are "countable." See:

- M1110.003 B.2. for the resource limits;
- S1110.100 for the distinction between assets and resources; and
- S1110.210 for a listing of exclusions.

3. Whose Resources Can Count

Medicaid law specifies that resources are only considered available between spouses and from parents to their children under age 21, and for certain blind and disabled children ages 18 to 21.

See M1110.530 for blind and disabled children age 18 to 21.

4. Whose Resources Can Not Count

Medicaid law will not allow certain resources to be considered in determining eligibility. Do not count resources:

- From a step-parent.
- From siblings.
- From spouse or parent living apart unless it is a voluntary financial contribution. (Exception for Long-term care)
- From an alien sponsor.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2022
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with M1110.003	Page 2

M1110.003 RESOURCE LIMITS

A. Introduction

The resource limit is the maximum dollar amount of countable assets an individual, couple, or family may own and still meet the established criteria for Medical Assistance in an ABD category. These amounts are established by law.

B. Policy Principles

1. Resource Ineligibility

An individual (or couple) with countable resources in excess of the applicable limit is not eligible for Medicaid.

2. Resource Limits

ABD Eligible Group	One Person	Two People
Categorically Needy Medically Needy	\$2,000	\$3,000
ABD with Income \leq 80% FPL	\$2,000	\$3,000
QDWI	\$4,000	\$6,000
QMB SLMB QI	Calendar Year 2021 \$7,970 2022 \$8,400	Calendar Year 2021 \$11,960 2022 \$12,600

3. Change in Marital Status

A change in marital status can result in a change to the applicable resource limit. The resource limit change is effective with the month that we begin treating both members of a couple as individuals. For example, separation from an ineligible spouse can change the limit from \$3,000 to \$2,000. See M1110.530 B.

4. Reduction of Excess Resources

Month of Application

Excess resources throughout the month of application causes ineligibility for the application month. Reduction of excess resources within the application month can cause resource eligibility for that month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with S1110.100	Page 3

ASSETS vs. RESOURCES

S1110.100 DISTINCTION BETWEEN ASSETS AND RESOURCES

A. Introduction

Not everything an individual owns (assets) are resources for Medicaid purposes. Moreover, in certain situations, an asset that is not a resource may become one at a later date or vice versa. The distinction is important since:

- an asset that is not a resource does not count against the resource limit; and
- proceeds from the sale or trade of a resource (i.e., the amount representing conversion of principal from one form to another) are also resources but what a person receives from a nonresource is subject to evaluation as income at the time of receipt.

EXAMPLE: An individual is the beneficiary of a trust which is not his resource. Therefore, when the trust pays him his monthly allowance, he receives income.

B. Policy Principles

1. Resources Defined

Resources are cash and any other personal or real property that an individual (or spouse, if any):

- owns;
- has the right, authority, or power to convert to cash (if not already cash); and
- is not legally restricted from using for his/her support and maintenance.

2. Resources with Zero Value

Property does not cease to be a resource simply because it has no current market value. Even though there is no value to count, the property remains a resource for so long as it meets the criteria in 1. above. If the property develops a market value at a later time, there has been an increase in the value of a resource rather than a receipt of income.

3. Property That Is Not a Resource

Any property (an asset) that does not meet the criteria in 1. above is not a resource even though it may be an asset (e.g., an individual who has an ownership interest in property but is not legally able to transfer that interest to anyone else does not have a resource).

C. Definitions

1. Real Property

Real property is land, including buildings or immovable objects attached permanently to the land.

2. Personal Property

Personal property is any property that is not real property. The term encompasses such things as cash, tools, life insurance policies, and automobiles.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with S1110.115	Page 4

D. Related Policies

- | | |
|--|--|
| 1. Conserved Fund in Change-Of-Payee Situations | Conserved funds (or other property) remain resources even during a period when they are being held in a bank account or by the paying agency because it is necessary to obtain a new payee or guardian. See S1120.022. |
| 2. Liquid vs. Nonliquid Resources | Except for cash, any kind of real or personal property may be either liquid or nonliquid. For the distinction between liquid and nonliquid resources, and its significance, see S1110.300. |
| 3. Evaluation of Receipt of Property As Income | When an individual first receives property (as a gift or inheritance, for instance, but not as a purchase or trade of one resource for another), the new property is subject to evaluation under the income rules for the month of receipt and under the resources rules thereafter. |
| 4. Discovery of Unknown Assets | For the resources treatment of previously unknown assets, see S1110.117. |

S1110.115 ASSETS THAT ARE NOT RESOURCES

A. Policy Principle-- General Rule

Assets of any kind are not resources if the individual does not have:

- any ownership interest; and
- the legal right, authority, or power to liquidate them (provided they are not already in cash); or
- the legal right to use the assets for his/her support and maintenance.

EXAMPLE: An individual owns a block of stock jointly with his brother. Although the form of ownership is one which would permit either to sell the property without the other's consent, the brothers have a legally binding agreement that one will not sell without consent of the other. The individual's brother refuses his consent, thereby making the stock not a resource for the individual. However, if the brother should give his consent, the stock would be subject to evaluation under the resources-counting rule beginning with the month following the month of consent.

The value of the stock would **not** be counted as income to the individual in the month consent is given.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with S1110.117	Page 5

**B. Policy Principles--
Certain Specific
Assets That Are
Not Resources**

Though not an exhaustive listing, the term "resources" does not apply to the assets described below.

**1. Cash to
Purchase
Medical or
Social Services**

For 1 calendar month following its receipt, cash paid by a recognized medical or social services program is not a resource provided the cash is:

- ☐ not income under S0815.050; and
- ☐ not repayment for a bill already paid.

See S1120.110.

**2. Home Energy
Assistance/
Support and
Maintenance
Assistance**

(HEA/SMA) HEA/SMA which is excluded from income and is not a resource regardless of how long a person retains it (S1120.100).

S1110.117 UNKNOWN ASSETS

A. Policy

An individual may be unaware of his or her ownership of an asset. If this is the case, the asset is not a resource during the period in which the individual was unaware of his/her ownership.

The value of the previously unknown asset, including any monies (such as interest) that have accumulated on it **through the month of discovery by the individual**, is **income** (not a resource) in the **month of discovery**.

For months after the month of discovery, the previously unknown asset is a **resource** subject to the usual resource-counting rules.

**B. Procedure-
Documentation**

When an individual alleges having been unaware of his/her ownership of an asset, obtain a signed statement from the individual. Also obtain any available supporting documentation, including (but not limited to) signed statements from other individuals who are familiar with the individual's situation.

Document the file with your determination regarding the alleged "unknown" resource.

C. Examples

1. As a result of contacting a tax assessor's office, the eligibility worker (EW) learns that the recipient has an ownership interest in previously unreported property (undeveloped land). The property is co-owned with another individual who has always paid the property taxes. Contacts with the recipient and the other individual confirm the recipient's allegations that he was unaware the original owner of the property has died and, therefore, the recipient never knew that he had inherited an ownership interest. The value of the recipient's ownership interest is counted as **income** in the month he learned of the ownership interest and as a **resource** in the following month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with M1110.210	Page 6

C. Example (cont.)

2. While in the hospital, the recipient received a check for \$25 as a "get-well" gift from her neighbors. She was unaware of the gift. At the time, her affairs were being managed by her daughter, who put the check in a desk drawer and failed to tell the recipient anything about it.

In the month the recipient learns of the existence of the check, the check is counted as her **income**. In the following month, the \$25 is counted as her **resource**.

COUNTABLE VS. EXCLUDED RESOURCES**S1110.200 COUNTABLE RESOURCES****Policy**

The value of any asset that meets the definition of a resource counts against the applicable resource limit to the extent that the instructions in S1130.100 do not provide for its exclusion.

M1110.210 EXCLUDED RESOURCES**A. Introduction**

Once you have determined that an asset meets the definition of a resource, it is necessary to determine that resource's effect on eligibility. Certain resources do not count against the resource limit; i.e., they are excluded.

**B. Description --
List of
Resource
Exclusions**

Exclusion	Reference	No Limit on Value and/or Length of Time	Limit on Value and/or Length of Time
Home serving as the principal place of residence, including the land on which the home stands (*contiguous property exempt for QDWI, QMB, SLMB, <i>QI and ABD 80% FPL</i>).	M1130.100	* X	X

Subchapter Subject ABD RESOURCES - GENERAL	Page ending with S1110.305	Page 8

LIQUID VS. NONLIQUID RESOURCES

S1110.300 DETERMINING THE LIQUIDITY/NONLIQUIDITY OF RESOURCES

A. Policy

1. Definitions

- **Liquid resources** are any resources in the form of cash or in any other form which **can** be converted to cash within 20 workdays.
- **Nonliquid resources** are any resources which are not in the form of cash which **cannot** be converted to cash within 20 workdays.
- Workdays are any days other than Saturdays, Sundays, and Federal holidays.

Liquidity/nonliquidity has no effect on a resource's countability.

B. Reference

Liquid resources do not qualify for exclusion as property essential to self-support unless they represent necessary assets of a trade or business. See S1130.500 B.3.

S1110.305 RESOURCES ASSUMED TO BE LIQUID

A. Introduction

Cash is **always** liquid. In addition, certain noncash items are nearly always liquid.

B. Policy

1. Assumption of Liquidity

Absent evidence to the contrary, we assume that the following types of resources are liquid:

- stocks, bonds, and mutual fund shares;
- checking and savings account and time deposits;
- United States Savings Bonds, Treasury bills, notes and bonds; and
- mortgage and promissory notes.

2. Evidence to the Contrary

If there is no apparent evidence to the contrary of the assumptions in 1. above, we do not seek out any evidence to the contrary. There is no need to document a lack of evidence to the contrary.

We resolve any issue and document the file if:

- liquidity is material to a particular resource; and
- an individual's statement or information in file suggests that one of the above-listed types of resources is not liquid.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with S1110.305	Page 9

**C. Examples-
Evidence to the
Contrary**

**1. Recently
Issued U.S.
Savings Bond:
Not a Resource**

- a. Situation - On January 6, 1994 Ms. Minnie Marbel applied for Medicaid benefits. Among her alleged resources was a \$500 series EE U.S. Savings Bond which she had won a month earlier in a Christmas raffle at church. Since series EE bonds are never redeemable for 6 months following issue, the EW questioned whether the minimum retention period had expired.
- b. Analysis - The bond's issue date was December 1, 1993. Therefore, Ms. Marbel by law could not redeem it before June 1, 1994. Consequently, the bond not only was not a liquid resource, it was not a resource at all. The value of the bond, including any interest accrued, does not become a liquid resource until July 1, 1994.

**2. Guardianship
Account --
Guardian
Dies: Non-
Liquid
Resource**

- a. Situation - Ms. Harriet Dalton had a court-appointed guardian who had sole access to Ms. Dalton's savings account. On September 8, 1988 the guardian filed for Medicaid on Ms. Dalton's behalf. On November 2, while the claim was still pending, the guardian died. Because of the delay in having a new guardian appointed and establishing a new account signatory, there was no one authorized to withdraw funds from the account for at least 60 days (and possibly longer).
- b. Analysis - For September through November the account was Ms. Dalton's liquid resource because her guardian had access to it as of the first moment of each month. Beginning in December and until the first of the month in which a new guardian had access to the account, it was a nonliquid resource.

**3. Comparison of
Analyses in 1. And
2. Above**

The guardianship account continues to be a resource because, at all times, Ms. Dalton owned it and had the legal right to use it for her own support and maintenance. The delay in appointing a new guardian who could access it within 20 days does not remove Ms. Dalton's right to the funds.

In the case of the savings bond, neither Ms. Marbel nor anyone acting on her behalf had the right, authority or power to redeem the bond for cash until 6 months from the date of issue.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2019
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with M1110.400	Page 10

S1110.310 RESOURCES ASSUMED TO BE NONLIQUID

A. Introduction

Certain non-cash resources, though they may occasionally be liquid, are nearly always non-liquid.

B. Operating Policy

1. Assumption of Nonliquidity

Absent evidence to the contrary, we assume that the following type of resources are non-liquid.

- automobile, trucks, tractors, and other vehicles;
- machinery and livestock;
- buildings, land and other real property rights; and
- non-cash business property.

2. Evidence to The Contrary

- a. If there is no apparent evidence to the contrary of the assumptions in 1. above, we do not seek out any evidence to the contrary. There is no need to document a lack of evidence to the contrary.
- b. In very rare situations an individual may volunteer firm evidence that one of the above types of resources is liquid (i.e., its sale has been accomplished or arranged within 20 workdays). Document the file *in the VaCMS case record* and proceed accordingly only if the distinction is material.

C. Operating Policy-- Life Insurance

This subchapter provides no categorical assumption regarding the liquidity or non-liquidity of life insurance policies.

VALUATION OF RESOURCES

M1110.400 WHAT VALUES APPLY TO RESOURCES

A. Policy Principles

1. Definitions

- a. The current market value (CMV) or fair market value (FMV) of a resource is:
 - Real property – 100% of the local tax assessed value **or** effective 10/4/16, the certified value as determined by an appraiser licensed in the state in which the real property is located. The use of an appraisal is applicable only to non-commercial real property. *A licensed appraiser's certified value can be used if the appraisal was completed no more than six months previous to the date of the application.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2019
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with M1110.400	Page 10a

The cost of the appraisal must be paid by either the applicant/recipient or the individual acting on the applicant or recipient's behalf. Certified appraisals documenting the value of the property must contain the name and license number of the individual conducting the appraisal. *A copy of the appraisal must be scanned into the VaCMS case record or placed in the hard case record.*

If tax assessment and appraisal are both provided, use the value that is most beneficial to the applicant.

License validity for appraisers in Virginia, if necessary, can be verified through the "License Lookup" tool on the Department of Professional and Occupational Regulation's website at www.dpor.virginia.gov or by calling the Real Estate Appraiser staff at 804-367-2039. *A copy of the appraisal must be scanned into the VaCMS case record or placed in the hard case record.*

If tax assessment and appraisal are both provided, use the value that is most beneficial to the applicant.

- Countable vehicles – the **average trade-in value** listed in the National Automobile Dealers Official Used Car Guide (NADA) Guide, **or** the value assessed by the locality for tax purposes may be used, if vehicle is not listed in N.A.D.A. Guide.
- b.** Equity value (EV) is the CMV of a resource minus any encumbrance on it.
- c.** An encumbrance is a legally binding debt against a specific property. Such a debt reduces the value of the encumbered property but does not have to prevent the property owner from transferring ownership (selling) to a third party. However, if the owner of encumbered property does sell it, the creditor will nearly always require a debt satisfaction from the proceeds of sale.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2017
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with S1110.500	Page 11

2. Valuation**General Rule**

The value of a resource is the amount of an individual's/couple's equity in it.

3. Determining the Countable Value of Real Property

The procedures for determining the countable value of real property are found in Appendices 1 *and* 4 to subchapter S1130. An "ABD Home Property Evaluation Worksheet" is found in Appendix 2 to subchapter S1130.

B. Related Policy

See M1110.600 concerning the points in time for establishing resource values.

OWNERSHIP INTERESTS**S1110.500 SIGNIFICANCE OF OWNERSHIP****A. Introduction**

Ownership interests in property, whether real or personal, can occur in various types and forms. Since the type and form of ownership may affect the value of property and even its status as a resource, they are significant in determining resource eligibility.

B. Description-Types of Ownership**1. Sole vs. Shared Ownership**

An individual may have sole ownership of a property or may share its ownership with others. See S1110.510.

2. Fee Simple Ownership

Fee simple ownership, which relates only to real property, is completely free of conditions imposed by others. See S1110.515 A.1.

3. Less than Fee Simple Ownership

- a. A life estate interest conveys ownership of limited duration. See S1110.515 A.2. and B.
- b. Equitable ownership can occur when an individual does not have legal title to property. See S1110.515 A.2b. and C.

4. Property Rights Without Ownership

- a. A leasehold conveys a time-limited control of property but not ownership of it. See S1110.520 B.1.
- b. An incorporeal interest in property is a right to use the property but without any right to possess it or sell it. See S1110.520. B.2.

C. Operating Policy--Variance in State Laws with Respect to Ownership

The explanations of ownership in the following sections represent general legal principles. However, specific points may vary with State law and issues may have to be reviewed by the Regional Office and/or Assistant Attorney General's Office.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2001
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with S1110.510	Page 12

S1110.510 SOLE VS. SHARED OWNERSHIP

A. Introduction

An individual may be the sole owner of real or personal property or may share ownership with one or more others.

B. Definitions

1. Sole Ownership

Sole ownership of (real or personal) property means that only one person may sell, transfer or otherwise dispose of the property. However, sole ownership may be subject to conditions imposed by others as, for example, sole ownership of a remainder interest in property. See S1110.515.

2. Shared Ownership

Shared ownership of (real or personal) property means that two or more people own it concurrently. See C. below concerning different types of shared ownership.

C. Descriptions- Shared Ownership

1. Tenancy-In-Common

a. Owners Do Not Have Same Interests

In tenancy-in-common, two or more persons each has an undivided fractional interest in the whole property for the duration of the tenancy. These interests are not necessarily equal; e.g., two joint tenants do not necessarily each own half of the property. One owner may sell, transfer or otherwise dispose of his or her share of the property without permission of the other owner(s) but cannot take these actions with respect to the entire property.

b. No Survivorship Rights

When a tenant-in-common dies, the surviving tenant(s) has no automatic survivorship rights to the deceased's ownership interest in the property. Upon a tenant's death, the deceased's interest passes to his or her estate or heirs.

c. Example

Don, Charles, and Fred Evans own property as tenants-in-common. Charles and Fred each owns an undivided one-fourth interest in the property while Don owns the remaining one-half interest. If Don Evans were to sell his half interest to Stanley Long, Mr. Long would become a tenant-in-common with Charles and Fred Evans. If Mr. Long were then to die so that his property passed to his four children, each of them would own one-eighth interest as tenants-in-common with Charles and Fred who would each continue to own one-fourth interest.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2001
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with S1110.510	Page 13

2. Joint Tenancy

a. Each Owner Has Same Interest

In joint tenancy, each of two or more persons has one and the same undivided ownership interest and possession of the whole property for the duration of the tenancy. In effect, each owner owns all of the property.

b. Survivorship Rights

Upon the death of one of only two joint tenants, the survivor becomes sole owner. On the death of one of three or more joint tenants, the survivors become joint tenants of the entire interest.

c. Conversion to Tenancy-in-Common

In most States, it is possible for joint tenants to take action during their lifetime to convert the joint tenancy to a tenancy-in-common (see 1. above).

3. Tenancy by The Entirety

a. Married Couples Only

A tenancy by the entirety can exist only between the members of a married couple. The wife and husband as a unit own the entire property which can be sold only with the consent of both parties. However, if a marriage has been legally dissolved, the former spouses become tenants-in-common and one can sell his or her share without the consent of the other.

b. Survivorship Rights

Upon the death of one tenant by the entirety, the survivor takes the whole.

D. Operating Policy-- Shared Ownership

1. General Rule

With the exception noted below, we assume, absent evidence to the contrary, that each owner of shared property owns only his or her fractional interest in the property. We divide the total value of the property among all of the owners in direct proportion to the ownership share held by each.

2. Exception: Checking/ Savings Accounts and Time Deposits

For a joint checking or savings account or a jointly-owned time deposit, we assume that all of the funds in the account belong to the applicant(s) recipient(s), in equal shares if there is more than one applicant or recipient (S1140.205 B and .210 B).

3. Determining the Countable Value of Jointly Owned Real Property

The procedures for determining the countable value of jointly owned real property are found in Appendix 1 to subchapter S1130.

Subchapter Subject ABD RESOURCES - GENERAL	Page ending with M1110.515	Page 14

M1110.515 OWNERSHIP IN FEE SIMPLE OR LESS THAN FEE SIMPLE

A. Definitions

1. Fee Simple

Fee simple ownership means absolute and unqualified legal title to real property. The owner(s) has unconditional power of disposition of the property during his or her lifetime. Upon his or her death, property held in fee simple can always pass to the owner's heirs. Fee simple ownership may exist with respect to property owned jointly or solely.

2. Less than Fee Simple Ownership

a. Life Estate

A life estate confers upon one or more persons (grantees) certain rights in a property for his/her/their lifetimes or the life of some other person. A life estate is a form of legal ownership and usually created through a deed or will or by operation of law. See B. below.

b. Equitable Ownership

An equitable ownership interest is a form of ownership that exists without legal title to property. It can exist despite another party's having legal title (or no one's having it). See C. below.

B. Description--Life Estate

1. Rights of Life Estate Owner

a. What Owner Can Do

Unless the instrument (will or deed) establishing the life estate places restrictions on the rights of the life estate owner, the owner has the right to possess, use, and obtain profits from the property and to sell his or her life estate interest.

Whether the value of a life estate is counted as a resource depends on when the life estate was created.

- The value of a life estate created prior to August 28, 2008 is **not** counted as a resource.
- *The value of a life estate created on or after August 28, 2008 but before February 24, 2009 is a countable resource to the owner of the life estate unless the life estate is excluded under one of the real property exclusions contained in Chapter S11.*
- The value of a life estate created on or after February 24, 2009 is **not** counted as a resource.

Exception: The value of a life estate owned by a QDWI enrollee is countable, regardless of the date on which it was created. See M1140.110 for additional information.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date May 2009
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with M1110.515	Page 15

b. What Owner Cannot Do

A life estate owner owns the physical property only for the duration of the life estate. The owner generally can sell only his or her interest; i.e., the life estate. The owner cannot take any action concerning the interest of the remainderman.

2. Remainder Interest

a. Future Interest in Physical Property

A life estate instrument often conveys property to one person for life (life estate owner) and to one or more others (remaindermen) upon the expiration of the life estate. A remainderman has an ownership interest in the physical property but without the right to possess and use the property until termination of the life estate.

b. Sale of Remainder Interest

Unless restricted by the instrument establishing the remainder interest, the remainderman is generally free to sell his/her interest in the physical property even before the life estate interest expires. In such cases, the market value of the remainder interest is likely to be reduced since such a sale is subject to the life estate interest.

3. Example

Mr. Heath, now deceased, had willed to his daughter a life estate in property which he had owned in fee simple. The will also designated Mr. Heath's two sons as remaindermen. Ms. Heath has the right to live on the property until her death at which time, under the terms of her father's will, the property will pass to her brothers as joint tenants.

C. Policy--Equitable Ownership Interest

Basically, existence of an equitable ownership interest is determined by a court of equity.

1. Unprobated Estate

For Medicaid purposes, an individual may have an equitable ownership interest in an unprobated estate if he or she:

- is an heir or relative of the deceased;
- receives income from the property; or
- has acquired rights in the property due to the death of the deceased in accordance with State intestacy laws.

M1120.215 contains instructions on how to determine whether an interest in an unprobated estate is a resource.

2. Trust

A trust is a right of property established by a trustor or grantor. One party (trustee) holds legal title to trust property which he or she manages for the benefit of another (beneficiary). The beneficiary does not have legal title but does have an equitable ownership interest.

M1120.200 contains instructions concerning resources treatment of trusts in the Medicaid program.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2021
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with S1110.520	Page 16

M1120.201 contains instructions for the resources treatment of trust established on or after August 11, 1993.

3. Equitable Home Ownership

If an individual alleges equitable ownership (e.g., an unwritten ownership interest or right of use for life) obtain any pertinent documents and a signed statement from each of the parties involved regarding any arrangement that has been agreed to. Forward the documents to a medical assistance practice consultant for an opinion from legal counsel.

D. References

The following references pertain to trust situations:

- Property held under a State's Uniform Gift to Minors Act, S1120.205
- Situations involving an agent acting in a fiduciary capacity on behalf of another party, S1120.020
- Trust established on or after August 11, 1993, M1120.201

S1110.520 PROPERTY RIGHTS WITHOUT OWNERSHIP OF THE PROPERTY

A. Introduction

An individual may have certain rights with respect to property without also having the right to dispose of the property. However, the individual may have the right to sell his/her right or interest (i.e. the right to use or possess the property).

B. Definitions

1. Leasehold

A leasehold does not designate rights of ownership. Rather, it conveys to an individual use and possession of property for a definite term and usually for an agreed rent.

2. Incorporeal Interests

There are several types of real property rights called "incorporeal interests." They do not convey ownership of the physical property itself. They convey the right to use the property but not to possess it. These rights encompass mineral and timber rights and easements (explained in more detail at S1140.110).

M1110.530 WHOSE RESOURCES TO CONSIDER

A. Introduction

In addition to resources that actually belong to an eligible (or would-be eligible) individual, Medicaid Law provides that the resources of certain other persons are considered to be available to the individual. Therefore, all appropriate resources determinations include those other persons' resources.

B. Policy

1. Spouse of Adult Individual

The resources of an individual include those of a spouse, and the applicable resource limit is that for a couple, provided that the spouse:

- if **eligible**, lives in the same household as the individual as of the first of the month for which resources are being determined.
- if **ineligible**, lives in the same household as the individual as of the first of the month for which resources are being determined.

For institutionalized individuals with a community spouse, *see subchapter M1480*.

2. Parent(s) of Child under 18

If a blind or disabled child is under age 18 and is living in the same household with a parent, the agency must consider the parent's resources available to the child, whether or not they are actually contributed.

The applicable resource limit for a blind and/or disabled child is always that for an individual.

3. Parent(s) of Child Age 18 to 21

If a blind or disabled child age 18 to 21 is living in the same household with his parent, the agency must consider the parent(s') resources available to the child, whether or not they are actually contributed:

The applicable resource limit for a disabled or blind child is always that for an individual.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2006
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with M1110.600	Page 18

DETERMINING ELIGIBILITY BASED ON RESOURCES

M1110.600 RULE FOR MAKING DETERMINATIONS

A. Policy Principle-- Rule

Make all resource determinations per calendar month. Resource eligibility exists for the full month if countable resources were at or below the resource standard for any part of the month.

B. Policy Principle-- Significance of the Rule

1. Increase in Value of Resources

Consider any increase in the value of an individual's resources in the resources determination the month following the month in which:

- the value of an existing resource increase (e.g., the value of a share of stock goes up or installment payments increase a property's equity value);
- an individual acquires an additional resource (e.g., inherits property); or
- an individual replaces an excluded resource with one that is not excluded (e.g., sells an excluded automobile for nonexcludable cash).

2. Decrease in Value of Resources

Consider any decrease in the value of an individual's resources in the resource determination the month in which:

- the value of an existing resource decreases (e.g., the value of a share of stock goes down);
- an individual spends a resource (e.g., withdraws \$150 from a savings account to pay bills); or
- an individual replaces a countable resource with one that is not countable (e.g., trades a countable piece of real property for an excluded automobile).

3. Treatment of Assets Under Income and Resource Counting Rules

When an individual receives an asset (real or personal property) during a month, *it is evaluated* under the appropriate income-counting rules in that month. If the individual retains the item into the month following the month of receipt, *it is evaluated* under the resource-counting rules. Do not evaluate the same asset under two sets of counting rules for the same month.

Funds cannot be both income and a resource in the same month. Income that has been added to a bank account during the month must be subtracted from the ending balance to ensure that the income is not also counted as a resource. See M1140.200.

EXCEPTION: Trusts established on or after August 11, 1993, have different counting rules. See M1120.201.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2008
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with M1110.600	Page 19

4. Receipts from the Sale, Exchange, or Replacement of a Resource

If an individual sells, exchanges, or replaces a resource, what he/she receives in return is not income. It is a different form of resource. This includes assets which have never been subject to resources counting because the owner sold, exchanged, or replaced them in the same month in which he/she received them.

Capital gains, which are profits made from the sale of capital assets (long-term assets such as land or buildings), are also not income. Any proceeds that remain the month after this type of sale must be evaluated as a resource.

The concept of such transactions not producing income does not apply to receipts from the sale of timber, minerals, or other like items which are part of the land.

C. Example--Receipt of a Resource Considered as Income and Exchanged in Same Month

Miss Laramie, a disabled individual, received a \$350 unemployment insurance benefit on January 10 at which time it was unearned income. On January 18, she used the \$350 to purchase several shares of stock; i.e., she exchanged one resource (cash) for another resource (stock). We never counted the \$350 cash payment as a resource because Miss Laramie exchanged it for stock in the month of receipt. The stock is not income; it is a different form of resource. Since a resource is not countable until the first moment of the month following its receipt, we first count the stock in the resources determination made as of February 1.

IDENTIFYING RESOURCES

OVERVIEW

S1120.001 PURPOSE OF SUBCHAPTER

A. Introduction

This subchapter deals with the process of applying the basic principles in subchapter S1110 in determining whether property (an asset) is a resource. If it is a resource, subchapter S1130 provides guidance on possible exclusions. If a resource is not excludable, see subchapter S1140. These guidelines apply to both initial applications and to posteligibility situations.

B. Related Policies

- | | |
|--|--------------------------|
| 1. Significance of Asset/ Resources Distinction | S1110.100 A. |
| 2. Resources Defined | S1110.100 B. |
| 3. Assets That Are Not Resources | S1110.115; S1120.100 ff. |
| 4. Treatment of Assets as Income/ Resources | S1120.005. |
| 5. Resource Conversion | S1110.600 B.4. |

S1120.005 DISTINGUISHING RESOURCES FROM INCOME

A. Introduction

It is important to distinguish between resources and income to know which counting rules to use for any given month. An item is not subject to both income and resources counting rules in the same month.
Exception - Trusts established on or after August 11, 1993, See M1120.201

B. Policy Principles

- | | |
|-----------------------------------|---|
| 1. Income-Counting Rules | Items received during a month are evaluated under the income-counting rules. |
| 2. Resource-Counting Rules | Items retained as of the first moment of the month following receipt are subject to evaluation under resource-counting rules. |

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.010	Page 2

C. Example**1. Situation**

Beverly Thompson, a single, disabled recipient, received \$275 as a birthday gift in January. She used \$50 to repay a loan; spent \$100 for a Series EE U.S. Savings Bond; and put the remainder (\$125) in her savings account. As of February 1, the account balance was \$1,400.

2. Analysis

The \$275 gift was income to Ms. Thompson in January when she received it. In February, only \$125 of the cash gift counts as a resource; the remaining \$150 she spent or converted into another form in the same month she received it. The U.S. Savings Bond is not a resource in February since Ms. Thompson cannot legally redeem it for 6 months. However, it will become a resource on August 1, when it is first legally redeemable. The \$125 that she put in her savings account is a resource (along with the \$1,275 deposited previously) as of February 1.

S1120.010 FACTORS THAT MAKE PROPERTY A RESOURCE**A. Introduction**

Property of any kind, including cash, cannot be a resource in a month unless, it meets all three criteria in B. below. However, it is not unusual for a nonresource to become a resource or vice versa.

B. Policy-Resources Criteria**1. Ownership Interest**

An individual must have some form of ownership interest in property in order for the property to be considered a resource. The fact that an individual has access to property, or has a legal right to use it, does not make it a resource if there is no ownership interest (S1110.100).

2. Legal Right to Access (Spend or Convert Property)

An individual must have a legal right to access property. Despite having an ownership interest, property cannot be a resource if the owner lacks the legal ability to access funds for spending or to convert noncash property into cash (S1110.100).

The fact that an owner does not have physical possession of property does not mean it is not his/her resource, provided the owner still has the legal ability to spend it or convert it to cash. However, see S1140.240 if a U.S. Savings Bond is involved.

3. Legal Ability to Use for Personal Support and Maintenance

Even with ownership interest and legal ability to access property, a legal restriction against the property's use for the owner's own support and maintenance means the property is not his/her resource (S1110.100).

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.010	Page 3

C. Policy – Access to Resources

1. **Access via an Agent**
We consider that an individual has free access to, and unrestricted use of, property even when he/she can take those actions only through an agent; e.g., a representative payee, guardian, etc. (S1120.020). **For real property where reasonable but unsuccessful efforts to sell must be established, see M1130.140.**

2. **Access Only via Litigation**
When there is a legal bar to sale of property (e.g., if a co-owner legally blocks sale of jointly-owned property), we do not require an individual to undertake litigation in order to accomplish sale or access. The property is not a resource under such circumstances in a month if a legal bar exists anytime during that month.

An individual's interest in an unprobated estate is a countable resource. An heir can initiate a court action to partition. If a partition suit is necessary (because at least one other owner of or heir to the property will not agree to sell the property) in order for the individual to liquidate the interest, estimated partition costs may be deducted from the property's value.

An applicant or recipient's proportional share of the value of property owned jointly with another person to whom the applicant or recipient is not married as tenants in common or joint tenants with the right of survivorship at common law is counted as a resource unless it is exempt property or is unsalable.

3. **Access via Petition - Conservatorship Accounts**
If State law requires that funds in a conservatorship account be made available for the care and maintenance of an individual, we assume, absent evidence to the contrary, that funds in such an account are available for the individual's support and maintenance and are, therefore, that individual's resource. This is true despite the fact that the individual or his/her agent is required to petition the court to withdraw funds for the individual's support and maintenance. See S1140.215 for instructions concerning conservatorship accounts.

D. Examples

1. **Lack of Ownership**
 - a. **Situation** - In response to unstated income development, Mr. John Hart, explains that his brother, Ted, who lives in an adjacent State, allows him (John) access to his bank account in emergencies. John Hart says he withdraws funds to pay an overdue utility bill to avoid shutoff.

The EW confirms that the account is titled "Ted Hart by Ted Hart or John Hart." John Hart states that he uses the funds solely for his own benefit and not as an agent for his brother.
 - b. **Analysis** - Even though John Hart has unrestricted access to the account and can use the funds at his own discretion, the funds are not his resources because he has no ownership interest in them. The title of the account clearly designates Ted Hart as sole owner. However, whatever funds John withdraws from Ted's account are John's income in the month of the withdrawal.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.010	Page 4

- c. **Situation** - A member of an Indian tribe states that he has several items, valued at several thousand dollars, that he would not sell because they are ceremonial in nature (clothing and beadwork). The EW questions him about the items and determines they were "entrusted" to him by the tribe for safekeeping.
- d. **Analysis** - In order for an asset to be a resource, the individual must have an ownership interest in the asset. Since the individual in the above situation does not own the ceremonial items, they are not his resources.

2. Court Order Restricts Access

- a. **Situation** - At the time of his divorce, Mark Thomas, an SSI recipient, was sole owner of the house in which his ex-wife and their two young sons are living. Under the terms of the divorce decree, Mr. Thomas must pay the taxes on the property and maintain it as a home for his ex-wife and the children until the younger boy reaches age 18. The decree also specifies that he is free to sell the property only after the younger boy's eighteenth birthday.
- b. **Analysis** - Although Mr. Thomas clearly owns the property, he is legally barred from converting it to cash to be used for his own support and maintenance until 1997. Therefore, it is not his resource until the month following the month of his younger son's eighteenth birthday.

3. Binding Agreement Restricts Access

- a. **Situation** - As a gift from their parents, Tom Brown, a Medicaid recipient, and his brother who is not eligible for Medicaid, received some shares of stock valued at \$3,000. The stock certificates show that the brothers are joint tenants (S1110.510 C.2.), but the brothers have a legally binding agreement that one will not sell without consent of the other. The EW confirms that Tom's brother will not consent to sell.
- b. **Analysis** - Normally, the gift would be valued under the income rules in the month of receipt and the resources rules thereafter. However, since Tom's brother will not consent to sale of the stock, Tom's share of the stock is not income in the month of receipt nor resources thereafter since it cannot be used for Tom's support and maintenance. If Tom's brother consents to sell, Tom's share would be a countable resource beginning with the month following the month that consent was given.

4. Lack of Possession Restricts Ability to Use-Savings Bonds

- a. **Situation** - During a posteligibility review, the EW learns that George Jones, a Medicaid recipient, is co-owner along with his father of U.S. Savings Bonds with a face value of \$3,500. The EW learns that George's father bought the bonds over a period of years with his own money and designated George as co-owner. The bonds are in the father's safe deposit box to which he will not give George access under any circumstances.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.020	Page 5

- b. **Analysis** - The EW questions George's father and confirms that he will not give George the bonds under any circumstances. George's father states that, George can take possession of the bonds only after he (the father) dies. Generally, lack of physical possession of an otherwise liquid resource does not affect its status as a resource. However, physical possession of savings bonds is a legal requirement for cashing them. Although George is a legal owner, he cannot legally redeem the bonds for his own use. Therefore, they are not his resources.
5. **Insurance Settlement Restricts Use**
- a. **Situation** - Bob Warfield, a Medicaid recipient, was injured in an automobile accident. A court awarded him damages of \$10,000 to be used solely for medical expenses related to the accident.
- b. **Analysis** - Although Mr. Warfield owns the funds and has direct access to them, he is not legally free to use them for his own support and maintenance. Therefore, the award funds are neither income nor resources.

Third party liability should be entered during enrollment.

6. **No Access Without Litigation**
- a. **Situation** - Andrea Matthews, a disabled Medicaid recipient, has been separated from her spouse, who is not eligible for Medicaid, for 5 years. She and her spouse own a summer cottage in another State as tenants-by-the-entirety. Her spouse lives in the cottage and refuses to sell.
- b. **Analysis** - If Ms. Matthews were to divorce her husband, she would, as a tenant-in-common, have the right to market her interest in the property without her ex-spouse's consent. However, since we do not require litigation to obtain access, the property is not a resource unless her husband changes his mind about the sale. Therefore, the cottage is not Ms. Matthew's resource. Even if Ms. Matthews could market her ownership interest in the cottage, for a QDWI, QMB, and SLMB coverage only, the cottage would be excluded from countable resources if its sale would cause undue hardship for Mr. Matthews due to loss of housing (S1130.130 in Appendix 2).

S1120.020 TRANSACTIONS INVOLVING AGENTS

A. Introduction

An eligible individual (EI) or deemor may have an agent to act on his/her behalf or may serve as an agent for someone else. When an agency relationship exists, it is important to distinguish an agent's actions on his/her own behalf from those on behalf of the person for whom he/she serves as agent.

B. Definitions

1. Agent

An agent is a person or organization acting on behalf of and/or with the authorization of another person. For Medicaid purposes, the term applies to anyone acting in a fiduciary capacity, whether formal or informal, and regardless of the applicable title (representative payee, conservator, guardian, etc.).

2. Ward

A ward, as used in this section, is the categorical designation of a party for whom an agent has authority to act. This is not necessarily a "ward" in the legal sense.

C. Operating Policies-Agent Holds Assets

1. Actions by Agent

For purposes of this section, an action by someone in his/her capacity as an agent is equivalent to an action by the ward for whom he/she acts. For example, RSDI funds held by a representative payee for a title II beneficiary are the same as funds held by the beneficiary himself.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.020	Page 6

- 2. Status of Assets Held for Ward** Unless there is a legal restriction on the agent's access to assets held for a ward or against their use for the ward's support and maintenance, the assets are the ward's resources. They are not the agent's resources since the agent has no ownership interest in them and often is not legally free to use them for his/her own support and maintenance.
- 3. Property Title Must Show Ownership** An agent holding property of any kind for a ward must keep it in a form that clearly shows ownership by the ward.
- D. Operating Policies- Improperly Titled Financial Account** The most common type of improperly titled account is the savings account designated as held "in trust for" a ward. This form of holding is not a formal trust (M1120.200) and is misleading as to ownership of the funds. If State law does not recognize the funds as the ward's property, see E.3. below. If evaluating an improperly titled account, consult your Regional Coordinator.
- 1. Singly Owned Account; EI/Deemor Is Ward**
- Agent Agrees Funds Belong to Ward - If there is an agency relationship so that deposits to the account are income to the ward, not the agent (S0810.120): we
 - assume the funds are the ward's property; and
 - request that the agent change the account designation.
 - Agent Does Not Agree Funds Belong to Ward - If the agent does not agree that the funds belong to the ward and refuses to correct the account title, we do not treat the funds as the ward's resources. See E.4. if the agent is a representative payee. See E.3. b. if the agent is not a representative payee.
- 2. Singly Owned Account; EI/Deemor Is Agent** Although deposits to the account are not the agent's income per S0810.120.D 2, we treat the account as the agent's resource. The account is the resource of the person shown as owner on the account title.
- 3. Jointly Owned Account** Regardless of whether the EI/deemor is ward or agent, an agent can rebut ownership of the funds and establish that they are the ward's property (S1140.205).
- E. Development and Documentation**
- 1. Verify Agency Relationship** Verify any allegation of an agency relationship per S0810.120 F.
- 2. Determine Resources** Document your decisions concerning the form and value of resources belonging to the EI/deemor. Follow the guidelines in C. and D. above, as well as in sections dealing with the specific type of property involved.
- 3. Improperly Titled Financial Account; EI/Deemor Has Agent**
- Agent Acknowledges Funds as Ward's
 - Document the file with the agent's signed statement as to the ward's ownership.
 - Ask the agent to have the account retitled.
 - Treat the funds as the ward's property.
 - Agent Is Not Representative Payee and Does Not Acknowledge Funds as Ward's
If an agent (other than a representative payee) has set up an account incorrectly, will not change the account designation, and will not acknowledge the funds as the ward's:
 - document the file with the agent's refusal;
 - do not treat the funds as the ward's property; and
 - see S0820.120 E. for the income rules that apply when the EI/deemor has an agent.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.022	Page 7

4. **Representative Payee is Agent Who Does Not Acknowledge Funds As Ward's**
 - a. If the conserved funds are SSI or RSDI funds and the representative payee will not change the account designation and acknowledge the ward's ownership of the funds:
 - do not treat the funds as the EI's or deemor's property
 - b. Situation Changes - Consider the funds the ward's property the month following the month in which:
 - the representative payee designates the funds properly; or
 - a new representative payee establishes the account correctly.

NOTE: Do not consider any conserved SSI or RSDI funds as the EI's or deemor's income in the month the account is redesignated (S1120.022.B.2.)

F. Related Policies

1. **Misuse of Funds by Representative Payee Who Is an EI or Deemor**
See S0810.120 D.4. concerning misused funds as income to the agent. If the agent retains the misused funds, consider them his/her resources effective with the month following the month the funds are counted as income.
2. **Representative Payee**
SSA selects representative payees for recipients who are unable to manage their own funds. Representative payees have financial jurisdiction only over financial transactions involving SSI/RSDI benefits.
3. **Agents and Income Determinations**
For the effect on the income determinations of fees paid to an agent, misuse of funds, and correctly titled accounts, see S0810.120.

S1120.022 CONSERVED FUNDS WHEN FORMALLY DESIGNATED AGENT CHANGES

A. Introduction

1. **General**
An agent designated formally by an agency or court may conserve funds not used for a ward's (beneficiary's) current needs. If there is a change of agent, the former agent may return these savings to SSA or other paying agency (e.g., Veterans Administration).
2. **Funds Reissued**
SSA or other paying agency may reissue accumulated funds to a new payee or directly to the ward. The reissued funds may be paid in a lump sum or in installments and may be combined in a check with a current month's benefits.

B. Policy Principles

1. **Conserved Funds as Resources**
Conserved funds are a ward's resources while SSA or another agency is holding them for the ward. This is the case because the ward:
 - owns the funds; and
 - is legally entitled to use them (or have them used on his/her behalf) for his/her own support and maintenance.
2. **Reissued Funds Not Income**
Conserved funds are not income to the owner when reissued because they have been his/her resources while held for him/her. They may have changed from nonliquid to liquid in form but they are not new funds.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.010	Page 8

**3. New Funds
Issued Subject
to Income
Counting
Rules**

If a single check contains both reissued funds and new funds that do not represent income previously charged for a prior month, the new funds are subject to income-counting rules.

ASSETS THAT ARE NOT RESOURCES

S1120.100 HOME ENERGY ASSISTANCE/SUPPORT AND MAINTENANCE ASSISTANCE

A. Policy Principle

The term "resources" does not include home energy assistance/support and maintenance assistance (HEA/SMA) which qualifies for exclusion from income.

B. Operating Policy

We do not develop for HEA/SMA unless:

- retained funds, plus other countable resources, exceed the applicable resource standard, and
- resources exclusive of the alleged HEA/SMA funds would be within the limit.

C. Development and Documentation

When it is necessary to develop resources which include HEA/SMA, obtain the individual's signed statement identifying (if not already documented in file):

- amount of HEA/SMA funds received;
- when received and from what source, and
- amount of remaining funds.

S1120.110 CERTAIN CASH TO PURCHASE MEDICAL OR SOCIAL SERVICES

A. Introduction

An individual cannot always disburse in the month of receipt cash given him/her to purchase approved medical or social services. To permit use of such funds in the manner intended, it is reasonable to assume, for a limited time, that the individual will use them to pay for the approved services and, therefore, that they are not available for his/her support and maintenance.

B. Policy

1. What Is Not a Resource

Effective July 1, 1988, a cash payment for medical or social services that is not income under S0815.050, also is not a resource for one calendar month following the month of receipt.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.112	Page 9

2. Exception The rule in 1. above does not apply to cash received as repayment for medical or social services bills an individual has already paid. Even though not income, such cash is a resource and, if retained, is subject to resource-counting rules as of the first moment of the month following receipt.

3. Determination If the cash was neither income nor payment, it is not a resource for one calendar month following the month of receipt.

D. References • Commingled funds, S1130.700.

S1120.112 RETROACTIVE IN-HOME SUPPORTIVE SERVICES PAYMENTS TO INELIGIBLE SPOUSES AND PARENTS

A. Introduction In limited circumstances, governmental programs will pay a spouse or parent to provide a disabled spouse or child with certain in-home supportive (chore, attendant, and homemaker) services (IHSS). IHSS payments are income when received by the ineligible spouse or parent but are not included as income for deeming purposes.

So that the intended benefit of having services provided by a caregiver in the home can be realized, and to avoid Medicaid ineligibility due to excess deemed resources, the regulations provide for a reasonable period of time during which retroactive IHSS payments are not considered resources and, therefore, are not subject to resources deeming.

B. Policy

1. When an IHSS Payment Is Not a Resource A **retroactive** IHSS payment paid to an ineligible spouse or parent to provide chore, attendant, or homemaker services to an eligible individual is not a resource for one calendar month following the month of receipt. If retained into the second calendar month following receipt, the payment is a resource subject to deeming.

This provision applies only to **retroactive** IHSS payments.

2. "Retroactive" IHSS Payment For the purposes of this provision, a "retroactive" IHSS payment is one that is paid after the month in which it was due. If payment is made in the month due, but following the month in which services were rendered, such payment is not considered "retroactive" for purposes of this provision.

3. Interest Included in IHSS Payment If the retroactive IHSS payment includes an interest amount, the entire payment, and any interest included in the retroactive payment, is subject to the rule 1. above.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.115	Page 10

S1120.115 DEATH BENEFITS FOR LAST ILLNESS AND BURIAL EXPENSES

A. Introduction

Death benefits, including gifts and inheritances an individual will use to pay the deceased's last illness and burial expenses, may still be on hand the first moment of the month following the month of receipt. It is reasonable to assume, for a limited time, that death benefits will be used for last illness and burial expenses and are not available for support and maintenance.

B. Policy

1. When a Death Benefit Is Not a Resource

Effective August 1991, death benefits, including gifts and inheritances, that are not income under S0830.545, also are not a resource for **one calendar month** following the month of receipt. If retained until the first moment of the second calendar month following receipt, death benefits are resources.

2. Exception--Bills Already Paid

Death benefits that are repayment of bills for last illness and burial expenses the individual has already paid are subject to resources rules beginning with the first moment of the month following the month of receipt.

C. Procedure

1. Development Not Required

Do not develop unless the amount retained plus other countable resources exceeds the applicable resources limit.

2. Development Required

If an individual would have excess resources, determine and document whether death benefits:

- were income under S0830.545; and
- if not income, whether the amounts were for repayment of bills already paid.

If you determine that death benefits should not be counted for one calendar month, document the amounts and that month.

D. References

- Death benefits as income, S0830.545.

E. Example--Death Benefits Not a Resource

1. Situation

As a result of her uncle's death, Barbara Smith, a disabled recipient, receives \$4,000 in July as beneficiary of his life insurance policy. She intends to spend the entire amount on his last illness and burial expenses. She has already received bills totaling \$900 which she pays. On August 1, she receives a funeral bill for \$2,900 and a few days later receives a cash gift of \$500 to be used for last illness and burial expenses. She pays the \$2,900 funeral bill in August and intends to use the remainder to pay some hospital expenses.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.150	Page 11

2. Analysis

Neither the \$4,000 Ms. Smith receives in July nor the \$500 she receives in August is unearned income. Since she uses \$900 of the \$4,000 life insurance check in July, as of August 1, she has a \$3,100 balance which is not a resource for August. During August she pays the \$2,900 bill and then has \$200 left. However, the \$500 she receives in August gives her \$700 to use for funeral expenses. She must spend \$200 in August for burial or last illness expenses, otherwise, the \$200 will count as a resource September 1. She has until the end of September to spend the remaining \$500, otherwise it will count as a resource October 1.

F. Example--Death Benefits Resource

1. Situation

Ruth Taylor, a 68 year old recipient, has total countable resources of \$1,980 consisting of a \$1,000 savings account and \$980 checking account. Her brother died in late October. In November she receives \$3,000 as beneficiary of her brother's life insurance policy. She has last illness and burial expenses of \$2,750 to pay. There will be no more bills after these.

2. Analysis

Of the \$3,000 Ms. Taylor received, \$250 is unearned income in November because last illness and burial expenses are only \$2,750. The \$2,750 is not unearned income and will not be a resource until January 1 if she still has it then. The \$250 amount will be a resource on December 1. This money will be added to the money she has in her checking and savings accounts. If the total is more than \$2,000, she will be ineligible for Medicaid.

S1120.150 GIFTS OF DOMESTIC TRAVEL TICKETS

A. Policy

This policy is effective for tickets received on or after March 1, 1990.

The value of a ticket for domestic travel received by an individual (or spouse) is not a resource if the ticket is:

- received as a gift;
- not **converted** to cash; and
- excluded from income per S0830.521.

B. Procedure

1. When to Develop

Develop under this section when an individual alleges having retained an uncashed ticket for domestic travel **and** the value of the ticket, plus the value of other countable resources, exceeds the applicable resource limit.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.200	Page 12

PROPERTY THAT MAY OR MAY NOT BE A RESOURCE

M1120.200 TRUST PROPERTY

A. Introduction

A trust is a legal arrangement involving property and ownership interests. Property held in a trust may or may not be considered a resource. The general rules concerning resources apply to evaluating the resource status of property held in a trust.

Trusts are often complex legal arrangements involving State law and legal principles that an eligibility worker (EW) is not expected to know or be able to apply without legal counsel.

Therefore, the following instructions may only be sufficient for you to recognize that an issue is present and should be referred to the Regional Coordinator or Assistant Attorney General through your regional office. When in doubt, refer the issue for a legal opinion.

The enactment of OBRA 93 changed the evaluation of trusts established (other than by a will) on or after August 11, 1993. Assets of trusts established other than by a will may be countable as income, resources, or as asset transfers. Trusts established for disabled individuals are treated differently; see M1120.202.

Policy relating to trusts is located in the following sections.

- M1120.200, Trust Property
- M1120.201, Trust Established on or after August 11, 1993
- M1120.202, Trusts Established for Disabled Individuals On or After August 11, 1993
- M1130.520, Trusts Established Between July 1, 1993 and August 11, 1993
- M1140.400 Trust Established By A Will
- M1140.401, Trusts Which Were Not Created by a Will
- M1140.402, Medicaid Qualifying Trust (Created Prior to August 11, 1993)
- M1140.403, Trusts Created After July 1, 1993 and Before August 11, 1993 With Corpus In Excess of \$25,000
- M1140.404, Trust Established on or After August 11, 1993

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.200	Page 12a

B. Definitions

1. **Trust**
A trust is a property interest whereby property is held by an individual (trustee) subject to a fiduciary duty to use the property for the benefit of another (the beneficiary).
2. **Grantor**
A grantor (also called a settlor or trustor) is a person who creates a trust. An individual may be a grantor if an agent, or other individual legally empowered to act on his/her behalf (e.g., a legal guardian, representative payee for title II/XVI benefits, a person acting under a power of attorney or conservator), establishes the trust with funds or property that belong to the individual. The terms grantor, trustor, and settlor may be used interchangeably.
3. **Trustee**
A trustee is a person or entity who holds legal title to property for the use or benefit of another. In most instances, the trustee has no legal right to revoke the trust or use the property for his/her own benefit.
4. **Trust Beneficiary**
A trust beneficiary is a person for whose benefit a trust exists. A beneficiary does not hold legal title to trust property but does have an equitable ownership interest in it.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.200	Page 13

5. **Trust Principal**
The trust principal is the property placed in trust by the grantor which the trustee holds, subject to the rights of the beneficiary plus any trust earnings paid into the trust and left to accumulate.
6. **Trust Earnings (Income)**
Trust earnings or income are amounts earned by trust principal. They may take such forms as interest, dividends, royalties, rents, etc. These amounts are unearned income to the person legally able to use them for personal support and maintenance.
7. **Totten Trust**
A Totten trust is a tentative trust in which a grantor makes himself/ herself trustee of his/her own funds for the benefit of another. The trustee can revoke a Totten trust at any time. Should the trustee die without revoking the trust, ownership of the money passes to the beneficiary.
8. **Grantor Trust**
A grantor trust is a trust in which the grantor of the trust is also the sole beneficiary of the trust.
9. **Mandatory Trust**
A mandatory trust is a trust which requires the trustee to pay trust earnings or principal to or for the benefit of the **beneficiary** at certain times. The trust may require disbursement of a specified percentage or dollar amount of the trust earnings or may obligate the trustee to spend income and principal, as necessary, to provide a specified standard of care. The trustee has no discretion as to the amount of the payment or to whom it will be distributed.
10. **Discretionary Trust**
A discretionary trust is a trust in which the trustee has full discretion as to the time, purpose and amount of all distributions. The trustee may pay to or for the benefit of the beneficiary, all or none of the trust as he or she considers appropriate. The beneficiary has no control over the trust. The kind and degree of the "discretion" given to the trustee is determined by the terms of the trust.
11. **Medicaid Qualifying Trust**
A "Medicaid qualifying trust" is a trust, or similar legal device, established (other than by a will) by an individual or an individual's spouse prior to August 11, 1993 under which the individual may be beneficiary of all or part of the payments from the trust. The distribution of such payments is determined by one or more trustees who are permitted to exercise discretion with respect to the distribution to the individual.

EXCEPTION: A trust or initial trust decree established **prior to** April 7, 1986, solely for the benefit of a mentally retarded individual who resides in an intermediate care facility for the mentally retarded is not a "Medicaid Qualifying Trust".
12. **Residual Beneficiary**
A residual beneficiary is not a current beneficiary of a trust, but will receive the residual benefit of the trust contingent upon the occurrence of a specific event, e.g., the death of the primary beneficiary.
13. **Fiduciary**
A person or other entity that holds something in trust for another and has a legal obligation to act in the best interests of that person in all matters regarding the property held, as the executor of a will who is responsible for preserving assets and investing wisely, when required to do so.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.200	Page 14

**C. Policy-Accounts
That May or May
Not Be Trusts**

**1. Accounts That
Are Not Trusts**

The following accounts and instruments are similar to trusts and may be titled as trusts, but should generally not be developed under these instructions for Medicaid purposes.

a. Conservatorship Accounts

These accounts, established by a court, are usually administered by a court-appointed conservator for the benefit of an individual. They differ from a trust in that the "beneficiary" retains ownership of all of the assets, although in some cases they may not be available for support and maintenance. (See S1140.215 for instructions pertaining to conservatorship accounts.)

b. Patient Trust Accounts

Many nursing homes and institutions maintain so called "patient trust accounts" for individuals to provide them with toiletries, cigarettes, candy and sundries. Although titled trust accounts, these are agency accounts. The individual owns the money in the account which the institution is merely holding for him or her and making disbursements on his or her behalf as necessary. (See S1120.020, S0810.120 for information on transactions involving agents.)

**2. "In Trust For"
Financial
Accounts**

These accounts may or may not be trusts depending on the circumstances in the individual case. Examples of the most common situations follow:

a. Representative Payee Accounts

One of the most common types of "in trust for" accounts are representative payee accounts. These accounts are not trusts, but improperly titled accounts and are misleading as to the actual owner of the funds. If a representative payee deposits current or conserved benefits in an account, the account must be titled to reflect the beneficiary's ownership interest. (See S1120.020 and S0810.120 for instructions pertaining to agency accounts.)

b. Totten Trusts

An "in trust for" financial institution account may be a Totten trust if an individual deposits his or her own funds in an account and holds the account as owner for the benefit of another individual(s).

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2017
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.200	Page 15

D. Policy - Trust as Resources

1. Trusts Which Are Resources

a. General

If an individual (applicant or recipient) has legal authority to revoke the trust and then use the funds to meet his food, clothing or shelter needs, or if the individual can direct the use of the trust principal for his/her support and maintenance under the terms of the trust, the trust principal is a resource for Medicaid purposes.

If the individual can sell his beneficial interest in a trust, that interest is a resource. For example, if the trust provides for payment of \$100 per month to the beneficiary for spending money, absent a prohibition to the contrary, the beneficiary may be able to sell the right to future payments for a lump-sum payment.

- M1120.200, B, 11
- M1140.402, Medicaid Qualifying Trust

b. Authority to Revoke Trust or Use Assets

- Grantor

In some cases, the authority to revoke a trust is held by the grantor. Even if the power to revoke a trust is not specifically retained, a trust may be revocable in certain situations. (See B.8. above and 3. below for information on grantor trusts.) Additionally, State law may contain presumptions as to the revocability of trusts. If the trust principal reverts to the grantor upon revocation and can be used for support and maintenance, then the principal is a resource.

- Beneficiary

A beneficiary generally does not have the power to revoke a trust. However, the trust may be a resource to the beneficiary, in the rare instance, where he/she has the authority under the trust to direct the use of the trust principal. (The authority to control the trust principal may be either specific trust provisions allowing the beneficiary to act on his/her own or by ordering actions by the trustee.) In such a case, the beneficiary's equitable ownership in the trust principal and his/her ability to use it for support and maintenance means it is a resource.

The beneficiary's right to mandatory periodic payments may be a resource equal to the present value of the anticipated string of payments unless a valid spendthrift clause or other language prohibits anticipation of payments.

While a trustee may have discretion to use the trust principal for the benefit of the beneficiary, the trustee should be considered a third party and not an agent of the beneficiary, i.e., the actions of the trustee are not the actions of the beneficiary, unless the trust specifically so provides.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.200	Page 16

- Trustee

Occasionally, a trustee may have the legal authority to revoke a trust. However, the trust is not a resource to the trustee unless he/she becomes the owner of the trust principal upon revocation. The trustee should be considered a third party. Although the trustee has access to the principal for the benefit of the beneficiary, this does not mean that the principal is the trustee's resource. If the trustee has the legal authority to withdraw and use the trust principal for his/her own support and maintenance, the principal is the trustee's resource for Medicaid purposes in the amount that can be used.

- Totten trust

The creator of a Totten trust has the authority to revoke the financial account trust at any time. Therefore, the funds in the account are his/her resource.

2. Trusts Which May Not Be A Resource

If an individual does not have the legal authority to revoke the trust or direct the use of the trust assets for his/her own support and maintenance, the trust principal is not the individual's resource.

The revocability of a trust and the ability to direct the use of the trust principal depends on the terms of the trust agreement and/or on State or federal law. If a trust is irrevocable by its terms and under State law cannot be used by an individual for support and maintenance, it may not be a resource. Evaluate the trust in accordance with the following sections.

- M1120.201, Trusts Established on or after August 11, 1993
- M1120.202, Trusts Established for Disabled Individuals on or after August 11, 1993.
- M1130.520, Trusts Established Between July 1, 1993 and August 10, 1993
- M1140.400, Trust Created By A Will
- M1140.402, Medicaid Qualifying Trust (created prior to August 11, 1993)
- M1140.403, Trusts Created After July 1, 1993 and before August 11, 1993 with Corpus in Excess of \$25,000

3. Revocability of Grantor Trusts

Virginia follows the general principle of trust law that if a grantor is also the sole beneficiary of a trust, the trust is revocable regardless of language in the trust document to the contrary.

Virginia recognizes the irrevocability of a grantor trust if there is a named "residual beneficiary" in the trust document who would, for example, receive the principal upon the grantor's death or the occurrence of some specific event.

NOTE: The above policies regarding grantor trusts may or may not apply in some States.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2017
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.200	Page 17

E. Policy – Disbursements from Trusts

1. When Trust Principal Is Not a Resource

If the trust principal is not a resource, disbursements from the trust may be income to the beneficiary, depending on the nature of the disbursements. Regular rules to determine when income is available apply.

a. Disbursements Which are Income

Cash paid directly from the trust to the individual is unearned income.

b. Disbursements Which Result in Receipt of In-kind Support and Maintenance

Food, clothing or shelter received as a result of disbursements from the trust by the trustee to a third party are income in the form of in-kind support and maintenance and are not counted for Medicaid purposes.

c. Disbursements Which Are Not Income

Disbursements from the trust by the trustee to a third party that result in the individual receiving items that are not food, clothing or shelter are not income. For example, if trust funds are paid to a provider of medical services for care rendered to the individual, the disbursements are not income for Medicaid purposes.

2. When Trust Principal Is a Resource – Trusts Created By Will or Prior to Aug. 11, 1993

If the trust principal is a resource to the individual, disbursements from the trust principal received by the individual are not income, but conversion of a resource. *However, trust earnings are income.* See S1110.100 for instructions pertaining to conversion of resources from one form to another and F.2. below for treatment of income when the trust principal is a resource.

3. When Trust Principle is a Resource – For Trust Created on or After August 11, 1993

Effective August 11, 1993:

- payments for the benefit of the individual are counted as unearned income;
- corpus is a resource, and
- payments to other individual(s) are evaluated as asset-transfer;
- trust earnings, e.g., interest, are income.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2017
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.200	Page 18

**F. Policy
Earnings/Additions
to Trusts**

**1. Trust Principal
Is Not a
Resource**

a. Trust Earnings

Trust earnings are not income to the trustee or grantor unless designated as belonging to the trustee or grantor under the terms of the trust; e.g., as fees payable to the trustee or interest payable to the grantor.

Trust earnings are not income to the Medicaid *applicant*/recipient who is a trust beneficiary unless the trust directs, or the trustee makes, payment to the beneficiary.

b. Additions to Principal

Additions to trust principal made directly to the trust are not income to the grantor, trustee or beneficiary. Exceptions to this rule are listed in c. and d. below.

c. Exceptions

Certain payments are non-assignable by law and, therefore, are income to the individual entitled to receive the payment under regular income rules. They may not be paid directly into a trust, but individuals may attempt to structure trusts so that it appears that they are so paid. Non-assignable payments included:

- *Temporary Assistance to Needy Families (TANF)*;
- Railroad Retirement Board-administered pensions;
- Veterans pensions and assistance;
- Federal employee retirement payments (CSRS, FERS) administered by the Office of Personnel Management;
- Social Security title II and SSI payments; and
- Private pensions under the Employee Retirement Income Security Act (ERISA) (29 U.S.C.A. section 1056(d)).

d. Assignment of Income

A legally assignable payment (see c. above for what is not assignable), that is assigned to a trust, is income for Medicaid purposes unless the assignment is irrevocable. If the assignment is revocable, the payment is income to the individual legally entitled to receive it.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.200	Page 19

2. Trust Principal Is a Resource

a. Trust Earnings

Trust earnings are income to the individual for whom the trust principal is a resource, unless the terms of the trust make the earnings the property of another. See S0810.030 for when income is counted.

b. Additions to Principal

Additions to principal may be income or conversion of a resource, depending on the source of the funds. If funds from a third party are deposited into the trust, the funds are income to the individual. If funds are transferred from an account owned by the individual to the trust, the funds are not income, but conversion of a resource from one account to another.

Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.201	Page 20

M1120.201 TRUSTS ESTABLISHED ON OR AFTER AUGUST 11, 1993

A. Introduction

The enactment of OBRA 93 affects the treatment of trusts. For purposes of determining an individual's eligibility for Medicaid, the rules specified in this section shall apply to a trust established by such individual on or after August 11, 1993.

EXCEPTION: Certain trusts established for disabled individuals. See M1120.202.

B. Definitions

1. Assets

Assets means both income and resources of an individual and an individual's spouse. Assets of a trust established other than by a will may be countable as income, resources, or as asset transfers.

2. Revocable Trust

A revocable trust is a trust that can be legally revoked by the individual who established it. If a trust is revocable, the entire amount of the principle or corpus is counted as a resource.

3. Irrevocable Trust

An irrevocable trust is a trust that cannot be legally revoked by the individual who established it.

C. Policy

1. Who Established Trust

An individual shall be considered to have established a trust if assets of the individual were used to form all or part of the corpus of the trust and if any of the following individuals established such trust other than by a will:

- the individual,
- the individual's spouse,
- a person, including a court or administrative body, acting at the direction or upon the request of the individual or the individual's spouse,
- a person, including a court or administrative body, with legal authority to act in place of or on behalf of the individual or the individual's spouse.

NOTE: The individual does not establish a trust when a funeral home director is named as the "grantor" on the trust document. See M1140.404.

2. Treatment of Trust Assets

In the case of a trust the corpus of which includes assets of an individual and assets of any other person or persons, the provisions of this section shall apply to the portion of the trust attributable to the assets of the individual.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date February 1997
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.201	Page 21

This section shall apply without regard to:

- the purpose for which a trust is established,
 - whether the trustees have or exercise any discretion under the trust,
 - any restrictions on when or whether distributions may be made from the trust, or
 - any restriction on the use of *or* distribution from the trust.
- a. In the case of a **revocable trust**:
- the corpus of the trust shall be considered resources available to the individual.
 - Payments from the trust to or for the benefit of the individual shall be considered income of the individual.
 - Any other payments from the trust shall be considered assets disposed of by the individual.
- b. In the case of an **irrevocable trust** if there are any circumstances under which payment from the trust could be made to or for the benefit of the individual, the portion of the corpus from which, or the income on the corpus from which, payment to the individual could be made shall be considered
- resources available to the individual, and
 - payments from that portion of the corpus or income to or for the benefit of the individual, shall be considered income of the individual, and
 - payments from that portion of the corpus or income for any other purpose, shall be considered a transfer of assets by the individual.

Any portion of the trust from which, or any income on the corpus from which, no payment could under any circumstances be made to or for the benefit of an individual shall be considered,

- as of the date *the trust is established* (or, if later, the date on which payment to the individual was foreclosed) to be assets disposed by the individual for evaluation of asset transfers, and
- the value of the trust shall be determined for purposes of such asset transfer by including the amount of any payments made from such portion of the trust after such date.

M1120.202 TRUSTS ESTABLISHED FOR DISABLED INDIVIDUAL ON OR AFTER AUGUST 11, 1993

A. Introduction

Irrevocable trusts established after August 11, 1993 solely for the benefit of disabled individuals will not affect Medicaid eligibility. The following policy must be met for trusts of disabled individuals.

Disability must be met as defined by SSA or SSL.

B. Policy

1. Trusts for Disabled Individual Under Age 65 (Individual Trust)

A trust containing the assets of an individual under age 65 who is disabled and which is established for the benefit of such individual by a

- a parent,
- a grandparent
- legal guardian of the individual,
- a court, or
- *the individual (when the trust was established on or after December 12, 2016)*

The trust policy in M1120.201 will not be applied, if the State will receive all amounts remaining in the trust upon the death of such individual up to an amount equal to the total medical assistance paid on behalf of the individual.

2. Trusts for Disabled Individuals ("Pooled" Trust Funds)

A pooled trust is one containing the assets of a disabled individual (no age requirement). The trust must meet the following conditions to be exempt from the trust policy in M1120.201.

- The trust was established by and is managed by a non-profit association.
- A separate account is maintained for each beneficiary of the trust but, for purposes of investment and management of funds, the trust pools these accounts.
- Accounts in the trust are established solely for the benefit of disabled individuals by the parent, grandparent, or legal guardian of such individuals, by such individuals or by a court.
- To the extent that amounts remaining in the beneficiary's account upon the death of the beneficiary are not retained by the trust, the trust pays to the State from such remaining amounts in the account an amount equal to the total amount of medical assistance paid on behalf of the beneficiary under the State Plan.

For an individual who meets the definition of an institutionalized individual in M1410.010 B.2, the placement of the individual's funds into a pooled trust when the individual is age 65 years or older must be evaluated as an uncompensated transfer, if the trust is structured such that the individual irrevocably gives up ownership of funds placed in the trusts. See M1450.550 D for additional information.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2018
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.202	Page 22a

**3. Transfers of
Income into a
Trust
Established for
a Disabled
Individual**

The treatment of income transferred into a *trust established for a disabled individual or pooled trust* as described in M1120.202 is dictated for *Medicaid eligibility purposes* by federal rules for the treatment of *transferring* such income into a Qualified Income Trust, also referred to as a Miller Trust. *Although Virginia does not* recognize Miller trusts, *the Medicaid income exclusion provided for in a Miller trust* is equally applicable in states that do not have Miller Trusts to trusts established for disabled individuals.

*Under Miller Trust rules, income received and placed into a trust established for a disabled individual or pooled trust is not counted in determining the individual's income eligibility. Additionally, if the **right** to income is transferred to the trust, the income is not counted because it does not meet the Supplemental Security Income (SSI) and Medicaid definitions of income.*

Transfers of income and the right to income into a trust established for a disabled individual or pooled trust are not considered uncompensated transfers of assets when the individual is under age 65.

S1120.205 UNIFORM GIFTS TO MINORS ACT

A. Introduction

1. General

Virginia like most states has adopted the Uniform Gifts to Minors Act (**UGMA**) which permits making to minors gifts which are free of tax burdens. The UGMA is sometimes called the Uniform Transfers to Minors Act.

When a gift is made to a minor under the Uniform Gifts to Minors Act (U.G.M.A.), the minor does not have the right to liquidate the property until he/she reaches an age (age of majority) specified by State law.

In Virginia the age of majority was lowered from age 21 to age 18 for gifts, under the U.G.M.A., made after June 30, 1973. A 1984 amendment, which became effective July 1, 1984, extended the definition of "minor" to include a person who has not attained the age of 21 years if the gift to the minor expressly provides that the custodial property shall be conveyed to the minor on his/her attaining the age of 21 years. Such provisions may be made by making the gift under the "Virginia Uniform Gifts to Minors Act (21)."

2. UGMA Provisions

Under UGMA legislation:

- an individual (donor) makes an **irrevocable gift** of money or other property to a minor (the donee);
- the gift, plus any earnings it generates, is under the **control of a custodian** until the donee reaches the age of majority established by State law;
- the **custodian has discretion** to provide to the minor or spend for the minor's support, maintenance, benefit, or education as much of the assets as he/she deems equitable; and
- the donee **automatically receives control** of the assets upon attainment of majority.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.210	Page 24

B. Policy Principles

1. UGMA and Resources

a. General

Since a custodian of UGMA assets cannot legally use any of the funds for his or her own personal benefit, they are not his or her resources. Similarly, once there is a gift under UGMA, additions to or earnings on the principal are not income to the custodian who has no right to use them for his/her own support and maintenance. (Additions to the principal may be income to the donor prior to becoming part of the UGMA principal.) For example, if the donor is a deemor who receives rental income and adds it to a child's UGMA funds, we would have to consider the rental income as income for deeming purposes.

b. While Donee Remains a Minor

- UGMA property, including any additions or earnings, is not income to the **minor**;
- the custodian's UGMA disbursements to the minor **are income to the minor**;
- the custodian's UGMA disbursements on behalf of the minor may be income to the latter if used to make certain third party-vendor payments.

c. When Donee Reaches Majority

All UGMA property becomes available to the donee and subject to evaluation as income in the month of attainment of majority.

M1120.210 RETIREMENT FUNDS

A. Definitions

1. Retirement Funds

Retirement funds are annuities or work-related plans for providing income when employment ends (e.g., pension, disability, or retirement plans administered by an employer or union). Other examples are funds held in an individual retirement account (IRA) and plans for self-employed individuals, sometimes referred to as Keogh plans. Also, depending on the requirements established by the employer, some profit sharing plans may qualify as retirement funds.

2. Periodic Retirement Benefits

Periodic retirement benefits are payments made to an individual at some regular interval (e.g., monthly) and which result from entitlement under a retirement fund.

3. Value of a Retirement Fund

The value of a retirement fund is the amount of money that an individual can currently withdraw from the fund. If there is a penalty for early withdrawal, the fund's value is the amount available to an individual after penalty deduction. However, any taxes due are not deductible in determining the fund's value.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.210	Page 25

B. Policy Principle

A retirement fund owned by an eligible individual is a resource if he/she has the option of withdrawing a lump sum even though he/she is not eligible for periodic payments. However, if the individual is eligible for periodic payments, the fund may not be a countable resource.

A previously unavailable retirement fund is not income to its recipient when the fund becomes available. The fund is subject to resources counting rules in the month following the month in which it first becomes available.

C. Operating Policies

- 1. Termination of Employment** A retirement fund is not a resource if an individual must terminate employment in order to obtain any payment.
- 2. Fund Not Immediately Available** A resources determination for the month following that in which a retirement fund becomes available for withdrawal must include the fund's value. A delay in payment for reasons beyond the individual's control (e.g., an organization's processing time) does not mean that the fund is not a resource since the individual is legally able to obtain the money. It is a nonliquid resource.
- 3. Claim of Periodic Payment Denied** If an individual receives a denial on a claim for periodic retirement payments but can withdraw the funds in a lump sum, include the fund's lump sum value in the resources determination for the month following that in which the individual receives the denial notice.

D. Development and Documentation

- 1. Evidence** If an individual has a retirement fund, obtain evidence of the availability of payments from the retirement fund. Determine if the individual is eligible for lump sum or periodic payments.
- 2. Determination** If the individual can withdraw a lump sum, the retirement fund is a resource in the amount that is currently available.

E. Related Policies

- 1. Nonliquid Resource** Absent evidence to the contrary, assume that resources in the form of retirement funds are nonliquid (S1110.300 B.).
- 2. Deeming Exclusion** If an ineligible spouse, or parent, owns a retirement fund, we exclude it from the deeming process. See S0830.500 regarding the treatment of interest income.

NOTE: If the individual is a married institutionalized individual with a community spouse, the retirement funds are evaluated as resources in the resource assessment and the eligibility determination (see M1480).

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2018
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.215	Page 26

F. Example

1. **Situation** Jeff Grant currently works 3 days a week for a company where he has been employed full-time for 20 years. Under his employer's pension plan, Mr. Grant has a \$4,000 retirement fund. The EW confirms that Mr. Grant could withdraw the funds now, but there would be a penalty for early withdrawal and he would forfeit eligibility for an annuity when he stopped working.
2. **Analysis** Since Mr. Grant can withdraw the retirement funds without terminating employment, they are a resource in the amount available after penalty deduction. This is true despite the fact Mr. Grant forfeits eligibility for periodic annuity payments in the future. All sources of available support (unless otherwise excluded) are considered in determining eligibility.

S1120.215 INHERITANCES AND UNPROBATED ESTATES

- A. Introduction** Property in the form of an interest in an undivided estate is to be regarded as an asset when the value of the interest plus all other resources exceed the applicable resource limit, unless it is considered unsalable for reasons other than being an undivided estate. An heir can initiate a court action to partition. If a partition suit is necessary (because at least one other owner of or heir to the property will not agree to sell the property) in order for the individual to liquidate the interest, estimated partition costs plus *the individual's (applicant/recipient) attorney fees* may be deducted from the property's value. However, if such an action would result in the applicant/recipient securing title to property having a value less than the cost(s) of the *partition action*, the property would not be regarded as an asset.

An ownership interest in an unprobated estate may be a resource if an individual:

- is an heir or relative of the deceased; or
- receives any income from the property; or
- under State intestacy laws, has acquired rights in the property due to the death of the deceased.

The procedure for determining the countable value of an unprobated or undivided estate is found in Appendix 1 to subchapter S1130.

- B. For QDWI, QMB, SLMB, QI and ABD 80%FPL** The policy for treatment of an unprobated or undivided estate for the QDWI covered group is in Appendix 1 to chapter S11. The policy for treatment of an unprobated or undivided estate for the QMB, SLMB, QI and ABD 80% FPL covered groups is in Appendix 2 to chapter S11.

C. Operating Policies

1. **When to Develop** We develop for this type of resource only if:
 - the property in question is not excludable under any of the provisions in S1110.210 B.; and
 - counting the property's value would result in excess resources.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2021
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.220	Page 27

2. Ownership Interest

There is an ownership interest in an unprobated estate if:

- documents (e.g., a will or court records) indicate an individual is an heir to property of a deceased; or
- an individual has use of a deceased's property or receive income from it; or
- documents establish, or the individual alleges, a relationship between himself and the deceased which, under State intestacy laws, awards the individual a share in the distribution of the deceased property; and
- the inheritance, use of income, and distributions are uncontested.

3. When Unprobated Estate Can Be a Resource

We do not consider that an inheritance is a resource until the month following the month in which it meets the definition of income. See S0830.550 for the income rules on inheritances. Thereafter, if retained, we evaluate the property as a resource.

S1120.220 CASH LOANS

A. Definitions

1. Loan

A loan is a transaction whereby one party advances money to, or on behalf of another party, who promises to repay the lender in full, with or without interest. The loan agreement may be written or oral, and must be enforceable under State law.

2. Negotiable Agreement

A negotiable agreement is (e.g., a loan) where the owner of the agreement itself can transfer it from one person to another to include the whole amount of money expressed on its face.

3. Bona Fide Agreement

A bona fide agreement is legally valid *under the applicable State's law* and made in good faith.

B. Policy--General

The following rules relate only to the principal amounts involved in the credit arrangements described in A. above. They do not include a creditor's receipt of interest which is unearned income.

1. Borrower

a. Agreement is a Bona Fide Loan

- *The loan agreement itself is not a resource.*
- *The cash provided by the lender is not income but is the borrower's resource if retained in the month following the month of receipt.*

b. Agreement is Not a Bona Fide Loan

- *The loan agreement itself is not a resource.*
- *The cash provided by the lender is income in the month received and is a resource if retained in the month following the month it was received.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2021
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.220	Page 28

2. Lender

a. Agreement is a Negotiable, Bona Fide Loan

- *A negotiable, bona fide loan agreement is a resource of the lender valued at the outstanding principal balance.*
- *The cash provided to the borrower is no longer the lender's resource because the lender cannot access it for his or her own use; the loan agreement replaces the cash as the lender's resource.*
- *Payments received from the borrower against the loan principal are conversions of a resource, not income. If retained, the payments are counted as the lender's resource starting in the month following the month of receipt.*

b. Agreement is Neither Bona Fide Nor Non-negotiable

- *The agreement is not a resource of the lender because the loan cannot be sold.*
- *Payments received against the principal are income to the lender, not conversion of a resource.*
- *The cash provided to the borrower may be a resource if the lender can access it for his or her own use.*

c. Agreement is Non-negotiable and Bona Fide

- *The agreement is not a resource of the lender because the loan cannot be sold.*
- *The cash provided to the borrower is no longer the lender's resource because the lender cannot access it for his or her own use; the loan agreement is not a resource because it cannot be transferred.*
- *Payments received from the borrower against the loan principal are income. If retained, count the payments as the lender's resource starting in the month following the month of receipt.*

NOTE: Interest income received by the lender is unearned income whether the loan is bona fide or not. If the loan payments received by the lender include both principal and interest, only consider the interest portion as income.

C. Informal Loans

1. Policy

An informal loan is a loan between individuals who are not in the business of lending money or providing credit. An informal loan can be oral or written. An informal loan is "written" when the parties to the loan commit to writing the terms of their agreement.

An informal loan (oral or written) is bona fide if it meets all of the following requirements.

- **Enforceable under State law**
A bona fide loan is an agreement that must be enforceable under the applicable State law.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2021
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.220	Page 28a

- ***Loan agreement in effect at time of transaction***

The loan agreement must be in effect at the time that the lender provides the cash to the borrower. Money given to an individual with no contemporaneous obligation to repay cannot become a loan at a later date.

- ***Acknowledgement of an obligation to repay***

A loan is a cash advance from a lender that the borrower must repay, with or without interest. For a bona fide loan to exist, the lender and the borrower must acknowledge the obligation to repay. When money or property is given and accepted based on any understanding other than it is to be repaid by the receiver, there is no loan for Medicaid purposes. A statement by the individual that he or she feels personally responsible to pay back the friend or relative on its own does not create a legal obligation to repay the individual who provided the cash. Similarly, the lender's statement that the borrower must only repay the cash if he or she becomes financially able to do so does not, on its own, create a legal obligation to repay.

- ***Plan for repayment***

*The loan must include a plan or schedule for repayment, and the borrower's express intent to repay by pledging real or personal property or anticipated future income (such as retirement insurance benefits starting in a year when they turn 62). The claimant may use anticipated income such as Title II, Title XVI, Veterans benefits, etc., to establish a plan for a **feasible** repayment of the loan as long as the loan states the claimant **must** pay the money back.*

- ***Repayment plan must be feasible***

The plan or schedule must be feasible. In determining the plan's feasibility, consider the amount of the loan, the individual's resources and income, and the individual's living expenses.

2. Procedures

Follow these procedures to determine whether an informal loan is bona fide and to determine the resource value, if any, for the individual.

a. Document the loan allegation

- *If there is a written agreement between the parties, obtain a copy*
- *If there is no written agreement, obtain signed statements from the borrower and the lender.*

b. Determine whether the loan is bona fide

Determine whether the loan is bona fide. If the loan is bona fide, the cash proceeds are not income to the borrower but are a resource if retained until the following month. For the lender, the loan agreement itself is a resource if it is bona fide and negotiable. The borrower's repayment of principal is not income to the lender, but the interest portion is unearned income.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2021
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.220	Page 28b

c. Determine the resource value of the loan

(1). Eligible individual is the borrower

- *Count the loan proceeds, if retained, as a resource starting in the month after the month the borrower received the proceeds.*
- *Determine the resource value of the proceeds of the loan that the borrower still holds (if any). Use procedures appropriate to the type of resource being evaluated.*

(2) Eligible individual is the lender

- *Assume that the bona fide loan agreement is negotiable, is a resource, unless the lender raises questions about the negotiability of the agreement, and wants to rebut this assumption.*
- *The agreement is a resource starting in the month after the month that the lender provides the proceeds to the borrower.*
- *Assume that the agreement's resource value is its outstanding principal balance unless the lender disagrees and wants to rebut this assumption.*

EXAMPLE: *Prior to filing for SSI, Mr. Jones made a \$1,500 cash loan to his brother. Subsequently, Mr. Jones received \$300 in repayment. At the time of filing for SSI, the outstanding principal balance for the loan was \$1,200 and is a countable resource.*

d.. Offer rebuttal rights

If the outstanding principal balance combined with the individual's other resources causes ineligibility, inform the individual that the outstanding principal balance will be counted in determining resources unless he or she submits:

- *Evidence of a legal bar to the sale of the agreement; or*
- *An estimate from a knowledgeable source showing the current market value (CMV) of the agreement is less than its outstanding principal balance. Knowledgeable sources include anyone in the business of making such estimates (e.g., banks or other financial institutions, private investors, real estate brokers). The estimate must show the name, title, and address of the source.*

e. Document the loan determination in the case record.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2021
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.220	Page 28c

C. Procedures for Formal Loans

1. Applicant/ Member is Lender

With a formal loan, there is rarely a question about whether the loan is bona fide. The key issues are determining the resource value of the loan agreement for the lender and the amount of interest income received.

If the value of the loan agreement could affect resource eligibility:

- *Obtain the written loan agreement. Assume the agreement is bona fide and negotiable unless the creditor presents convincing evidence of a legal bar to transferring ownership.*
- *Assume if the agreement is a resource, that its value is its outstanding principal balance. If the individual wishes to rebut the value, follow the instructions in S1120.200 C.2.d above.*
- *Determine the amount of interest income the lender receives using the formal loan agreement or an amortization schedule. Document the case record.*

2. Applicant/ Member is Borrower

With a formal loan, the key issue is determining whether the borrower retains proceeds of the loan that are countable as resources. Follow these steps to determine the countable resources:

- *Assume a formal loan is bona fide. However, the proceeds of the loan are potentially countable resources of the borrower whether or not the loan is bona fide or negotiable.*
- *Determine the value of the loan proceeds using procedures appropriate to the type of resource being evaluated. Document the case record.*

F. Example-- Contractor Sale

1. Situation

Mr. Dottle, an aged applicant, tells the EW that he has an agreement to sell unused farmland in a nearby county to a neighbor for \$1,800 plus interest. His neighbor has already paid \$1,200 to Mr. Dottle. The sales contract specifies that Mr. Dottle will receive one additional payment of \$600 plus interest.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2021
Subchapter Subject IDENTIFYING RESOURCES	Page ending with S1120.220	Page 28d

2. Analysis

The EW correctly recognizes that the farmland is no longer Mr. Dottle's resource even though it is still his property; because he is bound by an agreement to sell that land, he cannot transfer title to anyone else. Mr. Dottle has converted his ownership interest in the land into a contract. Unless there is a legal restriction against converting the contract into cash, it is his resource in the amount of the \$600 principal balance (absent convincing evidence of a lesser CMV).

If the contract is a resource, any payment against the principal represents a conversion of that resource.

If the contract is not a resource, payment against the principal is income.

Regardless of the resource status of the contract, any interest payment he receives is income.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2019
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.225	Page 29

**G. Example--
Installment Sale
Contract**

1. Situation

Henry Little, a Medicaid applicant, recently became a widower and moved out of the family home to live in a rented apartment. He has just entered into an installment sale contract on his former home with Thomas Higgins, a Medicaid recipient. Mr. Higgins made a \$6,000 down payment on the house, using retroactive SSI benefits paid under a court order, and immediately moved into his new home in which he already has an equitable ownership interest, even though he does not yet have title. The outstanding principal balance on the installment agreement is \$8,000.

2. Analysis

The EW must determine resources eligibility for both men. Although Mr. Little still has title to the house, he cannot sell it; rather, its value as a resource to Mr. Little has folded into the value of the installment contract. However, the installment sale contract (which the EW confirms has no legal restrictions against its sale) is Mr. Little's resource in the amount of the outstanding principal balance unless he presents convincing evidence that its CMV is a lower amount.

The installment sale contract has no bearing on Mr. Higgins' eligibility, as either income or resources. His ownership interest in the house he is buying from Mr. Little is an excluded resource since it is his principal place of residence.

M1120.225 REVERSE MORTGAGES

A. Definition

A reverse mortgage is a contract with a bank or other lending institution whereby the bank provides the borrower with monthly payments which do not have to be repaid as long as the individual lives in the home. These payments are a loan against the equity in the home and must be repaid when the individual dies, sells his home, or moves.

The individual, not the bank or lending institution, continues to retain ownership of the home and is responsible for property taxes and insurance.

B. Policy

The payments from a reverse mortgage are loan proceeds and are not income to the borrower. Proceeds retained after the month of receipt are a resource.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2018
Subchapter Subject IDENTIFYING RESOURCES	Page ending with M1120.235	Page 30

M1120.235 HEALTH AND MEDICAL SAVINGS ACCOUNTS

A. Introduction

The Medicare Prescription Drug, Improvement, and Modernization Act, signed into law on December 8, 2003, created the Health Savings Accounts (HSAs) system. An HSA is a tax-exempt trust or custodial account used to pay for the qualified medical expenses listed in the Internal Revenue Service (IRS) publication 502, of the account beneficiary, spouse, or dependents. HSAs are set up with qualified trustees, which can be banks, insurance companies or any entity already approved by the IRS to be a trustee of individual retirement arrangements (IRAs) or Archer MSAs.

Medical Savings Accounts, also known as MSAs or Archer MSAs, are trust-like accounts set up solely as an IRS-related, tax-exempt financial instrument for medical expense purposes. HSAs superseded MSAs; however, some valid MSAs still exist based on previously existing law.

B. Policy Principles

Generally, HSAs and MSAs are countable resources for Medicaid purposes because individuals may use those funds to pay for expenses unrelated to their medical needs. However, there are some HSAs and MSAs that may not count towards the resource limit. For HSAs and MSAs that are not countable resources, see Medicaid Works M0320.400.D.2.

Unused account funds remain in the account, drawing interest on a tax-favored basis, until needed for future medical expenses or retirement. The resource value of an HSA or MSA is the balance in the account available for withdrawal.

C. Health Savings Accounts

HSAs require individuals to have coverage under a high deductible health plan (HDHP). Although individuals generally use HSAs to pay for qualified medical expenses listed in the IRS publication 502 (Medical and Dental Expenses), individuals may use HSA funds at any time for expenses unrelated to their medical needs.

D. Medical Savings Accounts

Individuals generally use MSAs to pay for qualified medical expenses, as listed in the IRS publication 502 (Medical and Dental Expenses). Deposits made toward the savings plan may be tax-deductible, and can be used to pay for out-of-pocket medical expense, like paying a premium, satisfying a deductible, covering office visits, paying for prescription drugs, etc.

Distributions from an MSA is not income, however an MSA distribution would be counted as a conversion of a resource.

M1130.000 RESOURCES EXCLUSIONS

REAL PROPERTY

M1130.100 THE HOME

A. Policy Principles -- General Rules

This policy only applies to SSI Recipients, ABD Individuals with Income \leq 300% SSI, and ABD Medically Needy (MN) covered groups. It does NOT apply to the following ABD covered groups:

- Qualified Disabled and Working Individuals (QDWI),
- Qualified Medicare Beneficiaries (QMB),
- Special Low-income Medicare Beneficiaries (SLMB),
- Qualified Individuals (QI), and
- ABD 80% FPL.

The home property resource exclusion for the QDWI covered group is in Appendix 1 to Chapter S11. The home property resource exclusion for the QMB, SLMB, QI and ABD 80% FPL covered groups is in Appendix 2 to Chapter S11.

1. Home Exclusion

Ownership of a dwelling occupied by the applicant as his home does not affect eligibility.

2. Definition of the Home

An individual's home is property that serves as his or her principal place of residence.

A home means the house and lot used as the principal residence and all contiguous property, as long as the value of the land, exclusive of the lot occupied by the house, does not exceed \$5,000.

In any case in which the definition of home as provided here is more restrictive than that provided in the State Plan for Medical Assistance in Virginia as it was in effect on January 1, 1972, then a home means the house and lot used as the principal residence and all contiguous property essential to the operation of the home regardless of value.

3. Principal Place of Residence

An individual's principal place of residence is the dwelling the individual considers his established or principal home and to which, if absent, he intends to return. It can be real or personal property, fixed or mobile, and located on land or water. Only one resource can be exempted as home property. *See M1130.100.D2 and M1460.530.B.*

4. Individual Owns the Land but Not the Shelter

For purposes of excluding "the land on which the shelter is located" (see A.2. above), it is not necessary that the individual own the shelter itself.

EXAMPLE: If an individual lives on his own land in someone else's trailer, the land meets the definition of home and is excluded.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2006
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.100	Page 2

B. Operating Policy --

Home Lot

1. Land

The home exclusion applies to the plot of land on which the home is located. The excluded home lot size may vary according to the locality's building requirements.

For localities with set minimum building lot size use the lesser of:

- *the plat;*
- *the survey; or*
- *the locality's minimum size for a building lot.*

For localities with no minimum building lot requirements, use the lesser of:

- *the plat;*
- *the survey; or*
- *one acre.*

2. Buildings

The home exclusion applies to all buildings on land excluded in B.1. above.

C. Operating Policy -- Contiguous Property Allowed Under Home Exclusion

The home exclusion may be applied to property contiguous to the home. Property adjoining the home lot may come under the home exclusion by using one of two different calculations. Apply the calculation which is most advantageous.

1. \$5,000 Assessed Value of Contiguous Land

The home exclusion applies to land adjoining the home plot if not completely separated from it by land in which neither the individual nor his or her spouse has an ownership interest. **\$5,000 of assessed value of land contiguous to the home lot can be included in the home exclusion.**

Easements and public rights of way (utility lines, roads, etc.) do not separate other land from the home plot.

2. Contiguous Property Essential to the Operation of the Home

The equity value of countable contiguous property may cause resources to exceed the maximum limit. In these cases, reevaluate the home property applying the definition of the home used in the State Plan for Medical Assistance in Virginia in effect on January 1, 1972. At that time a home means the house and lot used as the principal residence and all contiguous property essential to the operation of the home regardless of value.

Property essential to the operation of the home means:

- a. land used for regular production of any food/goods for the household's consumption only, including:
 - vegetable gardens;
 - pastureland for livestock raised for milk or meat;
 - land to raise chickens, pigs, etc;
 - outbuildings used to process and/or store any of the above.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2018
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.100	Page 3

The amount of land necessary to support animals named above is established by the local extension service. However, only actual land being used to support the animals will be allowed.

- b. driveways connecting the homesite to public roadways.
- c. land necessary to **the** homesite to meet local zoning requirements (e.g. building site, mobile home sites, road frontage, distance **from** road, etc.).
- d. land necessary for compliance with state local health requirements (e.g., distance between home and septic tank(s));
- e. water supply for the household.
- f. existing burial plots.
- g. outbuildings used in connection with dwelling, such as garages or tool sheds.

3. ABD Home Property Evaluation Worksheet

See Appendix 2 to this subchapter for the "ABD Home Property Evaluation Worksheet."

D. Limitations On Home Property Exclusion

1. Property That No Longer Serves as the Principal Place of Residence

Property ceases to be the principal place of residence, and is no longer excludable as the home, as of the date that an individual who has left the home determines that he does not intend to return to it. *See M1460.530.B for additional information.*

Such property, if not excluded under another provision, will be included in determining countable resources.

2. 6-Month Exemption

An institutionalized individual's former *home in which he has an ownership interest, and which he occupied as his residence before becoming institutionalized* is an excluded resource for six months beginning with the month following the month of the *individual's* admission to a medical institution. The following are types of medical institutions:

- chronic disease hospitals,
- hospitals and/or training centers for the mentally retarded,
- institutions for mental diseases (IMDs),
- intermediate care facilities(ICFs),
- nursing facilities, and
- rehabilitation hospitals.

After six months the former residence is counted as an available resource.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2020
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.100	Page 4

The six-month home exclusion allowed for an institutionalized individual's former home also applies to the home owned by an individual receiving Medicaid *home* and community-based services (*HCBS*) in another person's home, providing the individual resided in the home prior to receipt of Medicaid *HCBS*. See M1460.530 for additional information.

3. Extended Exclusion for Institutionalized Individual

An institutionalized individual's home property continues to be excluded if it is occupied by his:

- spouse;
- minor dependent child under age 18;
- dependent child, **under** age 19, **who attends** school or vocational training; or
- individual's parent or adult child who:
 - has been determined to be disabled according to the Medicaid disability definition, and
 - lived in the home with the individual for at least one year prior to the individual's institutionalization, and
 - is dependent upon the individual for his shelter needs.

E. Development and Documentation-- Initial Applications

1. Ownership

a. Verify Ownership

Verify an individual's allegation of home ownership. Have the individual submit one of the items of evidence listed in b.- d. below.

For manufactured (mobile) homes, if a mobile home is assessed and taxed by the county/locality as real estate (not personal property), it is treated as real property. If the mobile home is registered and titled at the DMV and taxed as personal property, it is treated as personal property.

b. Evidence of real property ownership;

- tax assessment notice;
- recent tax bill;
- current mortgage statement;
- deed;
- report of title search;
- evidence of heirship in an unprobated estate (e.g., receipt of income from the property, a will, or evidence of relationship recognizable under State intestate distribution laws in cases where the home is unprobated property).

c. Evidence of personal property ownership (e.g., a mobile home):

- title,
- current registration.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2021
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.100	Page 5

d. Evidence of life estate or similar property rights:

- a deed,
- a will,
- other legal document.

e. Equitable Ownership

If an individual alleges equitable ownership (e.g., an unwritten ownership interest or right of use for life) obtain any pertinent documents and a signed statement from each of the parties involved regarding any arrangement that has been agreed to. Forward the documents to a medical assistance practice consultant for an opinion from legal counsel.

2. Principal Place of Residence--Operating Assumption

If the individual does not own more than one residence and there is no evidence that raises a question about his principal place of residence, assume that the alleged home is the individual's principal place of residence.

3. Indication of More than One Residence

If an individual alleges or other evidence indicates ownership of more than one residence, obtain his signed statement concerning such points as:

- how much time is spent at each residence;
- where he is registered to vote;
- which address he uses as a mailing address or for tax purposes.

Determine the principal place of residence accordingly and document the determination in the case file.

4. Evidence Indicates Non-adjointing Property

a. Individual Agrees With Evidence

If evidence indicates that land the individual owns does not adjoin the home plot, and the individual agrees that it does not:

- **obtain** his statement to that effect; and
- **develop** the non-adjointing portion per S1140.100 (Non-home Real Property) or S1130.500 (Property Essential to Self-Support), as applicable.

b. Individual Disagrees With Evidence

If the individual maintains that all the land adjoins the home plot, document the file with:

- a sketch of the land showing the boundaries of the various plots and the location of the shelter used as the home; and
- evidence of how the land is treated for tax assessment purposes.

The sketch may be by the individual, from public records, or by EW (from direct observation).

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2006
Subchapter Subject M1130.000 M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.100	Page 6

The tax assessment information may be in the form of a tax assessment notice or obtained from the appropriate tax jurisdiction.

c. Combined or Single Holding for Tax Assessment

Assume that the land is a single piece of property in which all the land adjoins the home plot if:

- it is recorded and treated as a single holding for tax assessment purposes; or
- the original holding has been subdivided, but still is treated as a single holding for tax assessment purposes.

d. More Than Single Holding for Tax Assessment

If the land is recorded and treated as two or more holdings for tax assessment purposes, use the sketch to determine whether other holdings adjoin the home plot.

5. Absences From The Home

a. Summary of Development

If the individual is in an institution, determine whether a spouse or dependent relative is living in the home (see b. below).

If no spouse or dependent relative is living in the home, or if the absence is for a reason other than institutionalization, determine *if the individual intends to return when the purpose of the absence (such as medical care, rehabilitation, vacation/visit, education, employment, military service) is completed.*

NOTE: If a previously undeveloped absence from the home has ended, assume that the individual always intended to return. The absence, regardless of duration, will not affect the home exclusion.

b. Spouse or Dependent Relative Development

Obtain a signed statement from the individual as to:

- whether anyone is living in the home while the individual is in the institution;
- if so, how that person is related to the individual, if at all; and
- if related (except for the individual's spouse), how that person is dependent on the individual for shelter needs, if at all.

Absent evidence to the contrary, accept the allegation.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2006
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.100	Page 7

6. Value of Home Lot

Verify the current assessed value of the home lot from the locality's Real Estate Assessment Office.

NOTE: The home lot assessed value is usually more than the value assessed to the contiguous property. Therefore, prorating the total assessed land value on the real estate tax assessment bill may not give the true assessed value of the home lot.

7. Total Home Exclusion Value

a. Add Together:

- the assessed value of the home lot as verified in 6. above, and
- \$5,000 of contiguous assessed property value.

This total equals the amount of assessed land value allowed under the Home Exclusion.

If excess resources exist and any countable contiguous property was included in the evaluation, the Home Exclusion must be re-evaluated.

b. Add Together:

- the assessed value of the home lot as verified in 6. above, and
- the assessed value of contiguous property essential to the operation of the home.

This equals the amount of assessed property value allowed under the Home Exclusion used under the State Plan for Medical Assistance in Virginia in effect on January 1, 1972.

F. Procedure – Post-eligibility

If, after Medicaid eligibility is established, an individual receives real property—for example, as an inheritance or gift—which may be excludable as his home, apply the policy and procedures in A. and B. above to determine whether the home exclusion applies.

Redevelop the exclusion from resources of an individual's home only if something raises a question about the correctness of the original determination or indicates that the exclusion may no longer apply (e.g., a change of address).

G. References

- Home replacement funds, S1130.110
- Real property whose sale would cause undue hardship due to loss of housing, to a co-owner, Appendix 2 to chapter S11.
- Real property following reasonable but unsuccessful efforts to sell it, **M1130.140.**

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.110	Page 8

S1130.110 HOME REPLACEMENT FUNDS

A. Policy Principles

1. General

When an individual sells an excluded home, the proceeds of the sale are excluded resources if the individual:

- plans to use them to buy another excluded home, and
- does so within 3 full calendar months of receiving them.

2. Installment Sales Contracts

If an individual receives the proceeds under an installment contract, the contract is an excluded resource for as long as the individual:

- plans to use the entire down payment and the entire principal portion of a given installment payment to buy another excluded home; and
- does so within 3 full calendar months of receiving such down payment or installment payment.

B. Operating Policy

1. Proceeds Defined

a. If Paid in a Lump Sum

The proceeds are the net amount the seller receives at settlement.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.110	Page 9

b. If Paid in Installments The proceeds consist of:

- any down payment; and
- that portion of any subsequent payment that is not interest.

2. Allowable Uses of Proceeds

Use of proceeds to buy another excluded home includes payment of any costs that stem from the purchase. These include, but are not necessarily limited to:

- down payment;
- settlement costs;
- loan processing fees and points;
- moving expenses;
- necessary repairs to or replacements of the new home's structure or fixtures (e.g., roof, furnace, plumbing, built-in appliances) that are identified and documented prior to occupancy; and
- mortgage payments.

Use of proceeds to pay other costs will warrant their exclusion if such costs are identified and documented prior to occupancy and stem directly from the purchase or occupancy of the new home.

3. Timely Use of Proceeds

a. Timely

"Within 3 full calendar months" means by the end of the last day of the third month after the month in which the proceeds are received.

b. Use

"Using" the proceeds includes obligating them by contract as well as actually paying them out.

c. Proceeds Not Used Timely --Lump Sum

The exclusion of the unused funds will be revoked retroactively to the date of their receipt.

d. Proceeds Not Used Timely--Installment Payments

The exclusion of the installment contract itself, and of the unused portion of any installment payments, will be revoked retroactively to the date the unused proceeds were received.

4. Reinstatement of Exclusion After Revocation

a. General

The exclusion of an installment contract, once revoked, will be reinstated if the individual intends to and does use the entire principal portion of a subsequent installment payment toward the purchase of another excluded home within 3 full calendar months of receiving such installment payment.

b. Effective Date

Reinstatement of the exclusion is effective as of the date the individual signs a new statement of intent (see C.2.b. below) and affects resource determination for that month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.110	Page 10

**5. Example--
Installment
Payments Not
Used Timely**

An installment contract has a principal balance of \$5,000 as of July 1. On July 10, the buyer makes a payment of \$200. As of October 31, the recipient has used only \$150 of the July payment in connection with the purchase of a new home.

The exclusion of the unused \$50 - and of the installment contract itself - is revoked back to July 10. As a result, the \$50 and the value of the contract as of August 1 (\$4,800) are included in a revised determination of resources for August.

**C. Development and
Documentation--
Initial
Applications**

**1. Explanation
To Individual**

Explain the home replacement exclusion to any individual who has sold an excluded home (if it is not too late to exclude any of the proceeds) or who plans to do so. Include the date, if known, by which the proceeds must be used in order to qualify for exclusion.

**2. Statement Of
Intent**

a. General

Obtain a signed statement from the individual as to whether he or she intends to use the proceeds to buy another home by the date specified. If so, the statement also must reflect his or her understanding that the exclusion of any funds not used by the date specified will be revoked retroactively.

b. Installment Contracts

When the proceeds are being paid in installment, the individual's statement of intent must reflect his or her understanding that, if the noninterest portion of any payment is not used within 3 months of its receipt, the exclusion of

- the unused portion of such payment and
- the contract itself will be revoked retroactively to the date of receipt of such payment.

**3. Documenting
Proceeds Of
Sale**

Document the file with a copy of the settlement sheet, contract for sale and/or other evidence that shows the net proceeds of the sale and how paid or payable, i.e.: paid in full at statement, dates and amounts of downpayment and installment payments, interest, etc.

a. Lump-Sum Proceeds

Set a special review to contact the individual in the month in which the exclusion period for the proceeds expires.

b. Installment Contact

Set the special review for the month in which the exclusion period for the downpayment on the prior home expires. If no downpayment is made, review the case the month in which the exclusion period for the first monthly payment expires.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.110	Page 11

- c. Required Evidence** Document the file with the same types of evidence used to document the proceeds of the sale of the prior home (see 3. above) and, if necessary, with bills, receipts, or other evidence of related allowable expenses

4. Proceeds Used to Replace Home

a. Lump-Sum Proceeds

If the amount paid at settlement for the new home equals or exceeds the lump sum received for the old home, and there is no question about where any excess came from, cease development.

b. Installment Payments

Unless there is a question of unstated income or previously undetected resources, cease current development if:

- the downpayment on the new home equals or exceeds the downpayment received from the sale of the prior home; and
- monthly payments on the new home equal or exceed the noninterest portion of the installment payments being received on the prior home.

5. Proceeds Not Used to Replace Home

a. Lump Sum Proceeds or Downpayment

Document use of proceeds for related allowable expense (B.2. above) if:

- the amount paid at settlement for the new home is less than the lump-sum proceeds of the sale of the prior home; or
- the downpayment on the new home is less than the downpayment received from the sale of the prior home.

If not all of the proceeds will be used timely, redetermine resources for the months after the proceeds were received. Do not exclude:

- the unused portion of the lump-sum proceeds or downpayment; or
- the value of an installment contract.

NOTE: Any proceeds spent at all, whether or not for an allowable use, will not affect the resources determination for the month after they were spent.

b. Installment Payments

If the noninterest portion of the payments the individual receives on the old home exceeds the amount of the payments he or she makes on the new home, document use of the excess for related allowable expenses.

If the individual cannot provide evidence of allowable expenses for which a given month's excess can be earmarked for timely use, the installment contract cannot be excluded for that month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.130	Page 12

**D. Development and Documentation--
Post-Eligibility**

Do not develop for the continuing applicability of the home replacement funds exclusion unless something indicates that less than the entire noninterest portion of the installment payments is being applied to the purchase of the replacement home.

1. Federal Disaster Assistance

See S1130.620 regarding the exclusion of funds received under the Disaster Relief and Emergency Assistance Act of 1974 or under some other Federal statute because of a catastrophe declared by the President to be a major disaster.

2. Commingled Funds

See S1130.700 if funds excluded under this provision are commingled with other funds.

3. Interest

Interest earned on funds excluded under this provision is not excluded from income or resources by this provision. See S0830.500 for its treatment as income.

E. Related Policies

1. Federal Disaster Assistance

See S1130.620 regarding the exclusion of funds received under the Disaster Relief and Emergency Assistance Act of 1974 or under some other Federal statute because of a catastrophe declared by the President to be a major disaster.

2. Commingled Funds

See S1130.700 if funds excluded under this provision are commingled with other funds.

3. Interest

Interest earned on funds excluded under this provision is not excluded from income or resources by this provision. See S0830.500 for its treatment as income.

S1130.130 REAL PROPERTY WHOSE SALE WOULD CAUSE UNDUE HARDSHIP, DUE TO LOSS OF HOUSING, TO A CO-OWNER FOR QDWI, QMB, SLMB, QI and ABD 80% FPL ONLY

A. Policy Principles

1. Exclusion

*The value of an individual's ownership interest in jointly owned real property is an excluded resource **for as long as** sale of the property would cause undue hardship, due to loss of housing, to a co-owner.*

2. Undue Hardship

Undue hardship would result if such co-owner:

- *uses the property as his or her principal place of residence;*
- *would have to move if the property were sold; and*
- *has no other readily available housing.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.130	Page 12a

**3. Exclusion
Applies to
Certain
Groups**

This exclusion only applies to:

Qualified Disabled Working Individuals (QDWI)

- *Qualified Medicare Beneficiary (QMB)*
- *Special Low Income Beneficiary (SLMB)*
- *Qualified Individuals (QI-1 and QI-2)*
- *ABD with Income \leq 80% FPL (ABD 80% FPL).*

This exclusion does not apply to other ABD covered groups.

**B. Development and
Documentation--
Initial Applications
and Post-Eligibility**

**1. Allegations of
Loss of
Housing for
Co-Owner**

If someone alleges that the sale of certain real property would force a co-owner living on it to move, obtain:

- *the individual's signed statement to that effect, and*
- *evidence of joint ownership (see S1130.100 B.1.b.-d.).*

If co-ownership is not proven, skip to 3. below. Otherwise, obtain the statement in 2. below.

**2. Required
Statement
from Resident
Co-Owner**

Obtain a statement from the co-owner regarding whether he or she:

- *uses the property as his or her principal place of residence;*
- *would have to move if the property were sold; and*
- *has other living quarters readily available.*

Apply the policy principle in A. above to determine whether, on the basis of the statements of the individual and the co-owner, the sale of the property would cause undue hardship to the co-owner.

Accept any reasonable allegation from the co-owner that there is no readily available housing (e.g., no other affordable housing available or no other housing with necessary physical modifications for a handicapped individual).

**3. Determination-
Not Undue
Hardship**

If the property cannot be excluded on the basis of undue hardship:

- *document the file to that effect;*
- *issue appropriate notice.*

**4. Determination-
Undue
Hardship**

If the property can be excluded on the basis of undue hardship:

- *document the file to that effect;*
- *issue appropriate notice.*

Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2019
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.140	Page 13

M1130.140 REAL PROPERTY FOLLOWING REASONABLE BUT UNSUCCESSFUL EFFORTS TO SELL

A. Policy Principles

1. Exclusion

Real property, including a life estate in real property created on or after August 28, 2008 but before February 24, 2009, that an individual has made reasonable but unsuccessful efforts to sell, will continue to be excluded for as long as:

- the individual continues to make reasonable efforts to sell it; and
- including the property as a countable resource would result in a determination of excess resources.

This exclusion is effective the first of the month in which the most recent application was filed or up to three months prior if retroactive coverage is required.

B. Operating Procedure

The "current market" value (CMV) of real property located in Virginia is the tax assessed value of the property **or**, effective 10/4/16, the certified value as determined by an appraiser licensed in Virginia.

For property located outside of Virginia the CMV is determined by applying the tax assessed value of the property to the local assessment rate, if the rate is not 100%, ***or the certified value as determined by an appraiser licensed in the state in which the real property is located.***

A licensed appraiser's certified value can be used if the appraisal was completed no more than six months previous to the date of the application. The use of an appraisal is applicable only to non-commercial real property. See M1110.400.

1. Initial Effort Established

The following criteria define reasonable efforts to sell. The listing price must not exceed 100% of CMV in order for the initial effort to sell to be met.

A reasonable effort to sell is considered to have been made:

- As of the date the property becomes subject to a realtor's listing agreement (must be actively marketed) if it is listed at no more than current market value **AND** the listing realtor verifies that it is unlikely to sell within 90 days of listing given particular circumstances involved; for example
 - owner's fractional interest;
 - zoning restrictions;
 - poor topography;
 - absence of road frontage or access;
 - absence of improvements;
 - clouds on title;
 - right of way or easement;
 - local market conditions; or

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2017
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.140	Page 14

- b. When at least two realtors employed by different realty companies refuse to list the property. The reason for refusal must be that the property is unsalable at CMV (other reasons are not sufficient – documentation of the property's deficiencies must be provided); or
- c. When the applicant has personally advertised his property at or below CMV for 90 days by use of a "Sale by Owner" sign located on the property and by other reasonable efforts, such as newspaper advertisements, reasonable inquiries with all adjoining land-owners, or other potential interested purchasers.
- d. For property which is an interest in an undivided estate and for jointly owned property when a co-owner refuses to sell, an initial reasonable effort to sell shall have been made when all other co-owners have refused to purchase the applicant's or recipient's share, and at least one of the other co-owners has refused to agree to sell the property.
- e. For property owned by an individual who is incompetent and has no one authorized to sell real property on his behalf, when court action is initiated for appointment of a guardian or conservator to secure the court's approval to dispose of the property, an initial effort to sell shall be deemed to have been made beginning the date the hearing for appointment of a guardian is placed on the court docket and continuing until the court authorizes sale of the property or through the sixth month after the initiation of the court action, whichever comes first. Any period of time in excess of six months to secure appointment of a guardian and authorization to sell by the court is not deemed reasonable and the property loses this exemption.

Upon authorization, and only upon authorization, the guardian must place the property on the market according to the criteria in M1130.140 B.1.a-d and make a continuing effort to sell the property as described in M1130.140 B.3.

2. Retroactive Exclusion

There will be applications received with property already listed for sale. Inform the applicant of Reasonable Efforts to Sell policy. If the real property was already listed for more than the CMV when the individual applied for Medicaid, a reasonable effort to sell was made for the retroactive period and the month of application if:

- the property was listed at no more than 100% CMV
or
- the property was listed at or below 150% of CMV and the initial effort to sell requirement described above is met except for the listing price.

If the list price was initially higher than 100% of the CMV, the listed sales price must be reduced to no more than 100% of the CMV to meet the continuing efforts to sell requirement.

If property was not listed when the application was filed or was listed higher than 150% of CMV, a reasonable effort to sell exclusion cannot be established for the retroactive period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2017
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.140	Page 15

3. Continuing Effort to Sell

Notwithstanding the fact that the recipient made a reasonable effort to sell the property and failed to sell it, and although the recipient has become eligible, the recipient must make a continuing reasonable effort to sell until the property is sold or Medicaid coverage is canceled. Depending on how the initial effort to sell was met, a continuing effort to sell is met as follows:

- a. When the property was listed at no more than the CMV and the listing realtor verified that the property is unlikely to sell within 90 days of listing per M1130.140 B.1.a, the listing agreement must continually be renewed at no more than 100% of the taxed assessed value, until the property is sold. If the list price was initially higher than the tax-assessed value, the listed sales price must be reduced to no more than 100% of the tax-assessed value.
- b. In the case where at least two realtors have refused to list the property per M1130.140 B.1.b, the recipient must personally try to sell the property by efforts described in B.1.c. above, for 12 months.
- c. In the case of recipient who has personally advertised his property for a year without success per M1130.140 B.1.c, (the newspaper advertisements, "for sale" sign, do not have to be continuous; these efforts must be done for at least 90 days within a 12 month period), the recipient must then:
 - subject his property to a realtor's listing agreement (must be actively marketed) priced at or below current market value; or
 - meet the requirements of M1130.140 B.1.b. above, which are that the recipient must try to list the property and at least two realtors must refuse to list it because it is unsaleable at current market value; other reasons for refusal to list are not sufficient.
- d. When there is jointly owned property which a co-owner has refused to sell or when the property is an interest in an undivided estate, and the initial effort to sell was met per M1130.140 B.1.d., a partition suit is necessary in order to liquidate the property. A continuing reasonable effort to sell the property shall be demonstrated by filing suit with the court to partition the property within 60 days of proving the property is otherwise unsaleable (in accordance with section B.1.e.) and shall continue until the property is sold or 9 months, whichever is less. Any period of time in excess of 9 months to sell shall not be deemed reasonable and the property loses this exemption.

4. After Continuing Effort Has Been Established

Even when real property is excluded while reasonable efforts to sell it are met, the sale of real property for less than *its CMV* is subject to an asset transfer penalty for the Medicaid payment of long-term care services (see M1450). However, if the individual made a continuing effort to sell the property for 12 months, then the individual may sell the property between 75% and 100% of its *CMV* without a penalty.

If the individual sells his property at less than 75% of *its CMV*, he must submit documentation from the listing realtor, or knowledgeable source if the property was not listed with a realtor, that the sale price was the best price the recipient can expect to receive for the property at this time. In this situation a sale can take place for less than 75% of *its CMV* without penalty.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date May 2015
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.160	Page 16

5. Date Property is Disregarded

After the applicant has demonstrated that his property is unsalable by following the procedures in Section B., the property is disregarded in determining eligibility starting the first day of the month in which the most recent application was filed, or up to three months prior to the month of application if the applicant met all other eligibility requirements in the period. A recipient must continue his reasonable efforts to sell the property as required in B.3.

S1130.150 INTERESTS OF INDIVIDUAL INDIANS IN TRUST RESTRICTED LANDS

A. Policy

In determining the resources of an individual (and spouse, if any) who is of Indian descent from a federally recognized Indian tribe, **any** interests of the individual (or spouse) in trust or restricted lands are excluded from resources.

B. Procedure

If an individual Indian alleges an interest in trust or restricted land:

- obtain for the file a copy of any document or documents that might identify it as such; and/or
- verify the allegation with the appropriate Indian agency.

If verification is by phone, document the case record. Prepare a determination on the basis of the evidence.

C. References

- Income derived from individuals interests in trust or restricted lands, S0830.850
- Other resource exclusions from members of Indian tribes, S0830.830

M1130.160 OTHER REAL PROPERTY

A. Policy Principles

1. Countable

Ownership of other real property generally precludes eligibility. The property's equity value is counted with all other countable resources.

2. Exceptions

- a. When equity value of the property, plus all other resources, does not exceed the appropriate resource limit;
- b. The property is smaller than the county or city zoning ordinances allow:
 - for home sites or building purposes, or
 - property has less than the amount of road frontage required by the county or city for building purposes, and
 - adjoining land owners will not buy the property;
- c. The property has no access, or the only access is through the exempted home site;
- d. The property is contiguous to the recipient's home site and the survey expenses required for its sale reduce the value of such property, plus all other resources, below applicable resource limitations; or
- e. The property cannot be sold after a reasonable effort to sell it has been made.

**B. Procedures for
Determining the
Countable Value of
Real Property**

The procedures for determining the countable value of real property, and examples, are found in Appendix 1 to this subchapter.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2007
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.200	Page 17

PERSONAL PROPERTY

M1130.200 AUTOMOBILES

A. Policy Principles

1. **Automobile Defined**
For ABD Medicaid purposes, "automobile" means any vehicle used for transportation. It thus can include, in addition to cars and trucks: boats, snowmobiles, animal-drawn vehicles, and animals *that are used for transportation. Animals that are kept primarily for recreational purposes, such as horses, are not considered vehicles if they are not used primarily for transportation.*
2. **Current Market Value Defined**
The CMV of an automobile is the average trade-in value listed in the NADA Guide.
3. **Exclusion Regardless of Value**
Ownership of one motor vehicle does not affect eligibility. One automobile, regardless of value, is excluded for the individual or a member of the individual's household.
4. **Other Automobiles**
Any automobile an individual owns in addition to the one excluded will be evaluated as a countable resource.
5. **Rebuttal of NADA Value**
If the individual disagrees with the NADA value, *he* must be given the opportunity to rebut it. Rebuttal evidence consists of one written appraisal for the automobile's value from a knowledgeable source, such as a used vehicle dealer or an automobile insurance company.
6. **Rebuttal of Ownership**
Assume that the individual owns the automobile if his name appears on the title or note or if he is listed as the owner in Division of Motor Vehicles' records. The principle of "equitable ownership," however, applies to situations in which one individual's name appears on the records of ownership but another person actually paid for and uses the automobile. If the applicant or enrollee wishes to rebut ownership of a vehicle, he must be given the opportunity to provide evidence that he does not have equitable ownership in the vehicle. Rebuttal evidence consists of:
 - *a statement from the applicant/enrollee **and** the other individual indicating why the automobile is listed in the applicant's/enrollee's name, including the person who actually uses the automobile and in whose possession it is kept, and*
 - *cancelled checks or records from the lender indicating that the other individual has made all payments on the automobile.*

*If the applicant/enrollee does not use the automobile and can provide documentation that another person has made all the payments on the automobile, it is **not** a resource to the applicant/enrollee.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2007
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.300	Page 18

B. Operating Policy-- More than One Automobile Owned

- 1. General Rule** If more than one automobile is owned, one automobile will be excluded and the other will be a countable resource. The exclusion will apply to the automobile with the highest equity value.
- 2. Determining Equity Value** Use the following method to determine equity value:
 - Determine the average trade-in value for each automobile from the NADA Guide. In the event the automobile is not listed, the value assessed by the locality for tax purposes may be used.
 - Determine the equity value in each automobile by subtracting the debt from NADA value.
 - Exempt the automobile with the highest equity value.
- 3. References** See M1110.400 for what values apply to resources.
See Appendix 1 for QDWI development.

M1130.300 LIFE INSURANCE

A. Definitions

- 1. Life Insurance Policy** A life insurance policy is a contract. Its purchaser (the owner) pays premiums to the company that provides the insurance (the insurer). In return, the insurer agrees to pay a specified sum to a designated beneficiary upon the death of the insured (the person on whom, or on whose life, the policy exists).
- 2. Face Value** Face value (FV) is the amount of basic death benefit contracted for at the time the policy is purchased. The face page of the policy may show it as such, or as the "amount of insurance," the amount of the policy, "the sum insured," etc. A policy's FV does not include:
 - the FV of any dividend addition, which is added after the policy is issued (see 5. below);
 - additional sums payable in the event of accidental death or because of other special provisions; or
 - the amount(s) of term insurance, when a policy provides whole life coverage for one family member and term coverage for the other(s).
- 3. Cash Surrender Value** A policy's cash surrender value (CSV) is a form of equity value that it accrues over time. The owner of a policy can obtain its CSV only by turning the policy in for cancellation before it matures or the insured dies. A loan against a policy reduces its CSV.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2007
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.300	Page 18a

4. Dividends

Periodically (annually, as a rule), the insurer may pay a share of any surplus company earnings to the policy owner as a dividend.

Depending on the life insurance company and type of policy involved, dividends can be applied to premiums due or paid by check or by an addition or accumulation to an existing policy.

5. Dividend Additions and Accumulations**a. Additions**

Dividend additions are amounts of insurance purchased with dividends and added to the policy, increasing its death benefit and CSV.

The table of CSV's that comes with a policy does not reflect the added CSV of any dividend additions.

b. Accumulations

Dividend accumulations are dividends that the policy owner has constructively received but left in the custody of the insurer to accumulate as interest, like money in a bank account. They are not a value of the policy per se; the owner can obtain them at any time without affecting the policy's FV or CSV.

Dividend accumulations cannot be excluded from resources under the life insurance exclusion, even if the policy that pays the accumulations is excluded from resources. Unless they can be excluded under another provision (e.g., as set aside for burial), they are a countable resource.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date February 1997
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.300	Page 19

6. Proceeds

Proceeds of a life insurance policy are the FV of the policy plus any additions payable at maturity or death.

Proceeds do not include dividends or interest that are left to accumulate in the policy (see 5.b. above). Also, proceeds do not include a policy's CSV.

**7. Supplement-
ary Contract**

A supplementary contract is not a life insurance policy. It is an agreement whereby, when the policy matures or the insured dies, the proceeds are paid not in a lump sum, but in an alternative manner selected by the individual, usually as an annuity (see B.5. below).

**8. Burial
Insurance**

A burial insurance policy is a contract whose terms preclude the use of its proceeds for anything other than payment of the insured's burial expenses.

NOTE: If a policy has a CSV to which the owner has access, the policy is not burial insurance for Medicaid purposes.

**9. "Accelerated
Life Insurance
Payments"**

Accelerated life insurance payments are proceeds paid to a policyholder prior to death. Although accelerated payment plans vary from company to company, all of the plans involve early payout of some or all of the proceeds of the policy.

Most accelerated payment plans fall into three basic types, depending on the circumstances which cause or "trigger" the payments to be accelerated. These are the:

- **long-term care model**, which allows policyholders to access their death benefits should they require extended confinement in a care facility or, in some instances, health care services at home;
- **dread disease or catastrophic illness model**, which allows policyholders to access their death benefits if they contract or acquire one of a number of specified covered conditions; and
- **terminal illness model**, which allows policyholders to access their death benefits following a diagnosis of terminal illness where death is likely to occur within a specified number of months.

Some companies refer to these payments as "living needs", "accelerated death", or "viatical" payments.

Depending on the type of accelerated payment plan, receipt of accelerated payments may reduce the policy's FV by the amount of the payments and may reduce CSV in a manner proportionate to the reduction in FV. In some cases, a lien may be attached to the policy in the amount of the accelerated payments and a proportionate reduction in CSV results.

See B.6. below for policy regarding accelerated payments and E. below for procedures.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date September 2010
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.300	Page 20

B. Policy

1. Life Insurance as a Resource

A life insurance policy owned by the individual is a resource if it generates a CSV. Its value as a resource is the amount of the CSV.

A life insurance policy which is irrevocably assigned to another person is not a resource to the individual, but it needs to be evaluated as an asset transfer (subchapter M1450). When the life insurance policy is irrevocably assigned to a funeral home or trust to fund the individual's burial contract, go to section M1130.425.

2. Limited Exclusion

A life insurance policy is an excluded resource, **for individuals age 21 and over**, if its FV and the FV of any other life insurance policies the individual owns on the same insured total \$1,500 or less. However, the FV of some policies does not count toward this \$1,500 total (see 3. below). **Life insurance policies on individuals under age 21 are excluded from resource evaluations.**

We do **not** include the FV of dividend additions in determining whether a policy is a countable or excludable resource. If the policy is a countable resource, we include the **CSV** of dividend additions in determining the resource value of the policy.

3. FV of Burial and Certain Term Insurance Not Counted

In determining whether the total FV of the life insurance policies an individual owns on a given insured is \$1,500 or less, the FV of the following are not taken into account:

- burial insurance policies; and
- term insurance policies that do not generate a CSV.

4. Relation to Burial Fund Exclusion

The maximum of \$3,500 that can be excluded as set aside for the burial expenses of an individual must be reduced by the FV of:

- any burial insurance policy for the burial expenses of the individual;

Exceptions: *Huff-Cook Mutual Burial Association life insurance policies (which may be designated as Care Plans on the policy) sold prior to April 7, 1993 do not reduce the \$3,500 burial fund exclusion. Huff Cook life insurance policies sold from April 7, 1993 through November 30, 1993 reduce the burial fund exclusion. Huff-Cook/Settlers life insurance policies sold on or after December 1, 1993 do not reduce the \$3,500 burial fund exclusion unless they are assigned to pay for a pre-need funeral contract.*

- any insurance policy on the life of the individual that is excluded under the life insurance exclusion in B.2. above;

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date September 2010
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.300	Page 20a

- a life insurance policy of any value that was assigned to a funeral provider or of which a funeral provider has been made the irrevocable beneficiary, if the policy owner has irrevocably waived his or her right to, and cannot obtain, any CSV the policy may generate. The amount by which the \$3,500 exclusion is reduced equals the face value of the policy MINUS the total cost of burial space items identified in the contract.

(See **M1130.410** for instructions regarding the burial fund exclusion and **M1130.410** C.1.d. for more discussion of burial insurance.)

5. Eligibility for Other Benefits

a. Supplementary Contracts

Supplementary contracts normally provide for an annuity. We treat such contracts in accordance with the instructions on filing for other benefits, for any benefit with choices about method of payment.

b. Accelerated Life Insurance Payments

Accelerated payments are not "benefits" for purposes of the Medicaid "filing for other benefits" provision. We do not require a policyholder to apply for accelerated payments as a condition of obtaining or retaining Medicaid eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date May 2015
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.300	Page 21

6. Accelerated Life Insurance Payments

a. Income and Resources Treatment

Since accelerated payments can be used to meet food, clothing, or shelter needs, the payments are income in the month received and a resource if retained into the following month and not otherwise excludable.

b. Payments Not "Conversion of a Resource"

The receipt of an accelerated payment is not treated as a conversion of a resource for Medicaid purposes. This is because, under an accelerated arrangement, an individual receives proceeds from the policy, not the policy's resource value--which is its CSV.

C. Procedure Initial Application

1. Using the Individual's Records for Verification

a. Ask the individual to submit:

- all the life insurance policies he or she owns; and
- the most recent annual dividend statement issued for each policy.

b. For countable and excludable policies, use these records to verify:

- the owner;
- the insured;
- the FV;
- whether the policy pays dividends and, if it does, what option the individual selected for their disposition (i.e. accumulations, additions, applied to premiums, paid by check); and
- if dividend accumulations, their current amount.

c. Additionally, for countable policies, use these records to verify:

- whether the policy generates a CSV and, if it does,
- the current CSV (including the CSV of any dividend additions and any loans on the policy which reduce the CSV). *Some insurance policies include a CSV table. For policies that do not pay dividends, if the table lists a CSV value for the specific number of years the individual has owned the policy, no additional verification is needed.*

2. Contacting an Insurance Company or Agent for Verification

If examination of a policy does not reveal an item of information listed in 1. above, obtain that information from the individual's agent or the insurance company, subject to the operating assumptions in 4. below. Do so by phone, if possible, and document the information in the case record.

3. Exception to Verification

Do not verify employer-provided term insurance.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.300	Page 22

4. Operating Assumptions

Apply the following assumptions in determining what development is required. Absent evidence to the contrary, assume that a:

- term policy without a table of CSV's, if it appears otherwise complete, does **not** generate a CSV;
- policy that does not generate a CSV also does **not** pay dividends;
- policy issued by a nonparticipating or stock company does **not** pay dividends;
- policy issued by a participating or mutual company pays dividends.

NOTE: Identification of the kind of company usually follows its name on the face page of the policy.

5. Determination

a. General

Apply the policy in B. above to determine whether each insurance policy owned is a resource and, if it is, whether to count or exclude its CSV in the resource determination.

b. Dividend Additions

Do **not** include the **FV** of dividend additions in determining whether a policy in a countable or excluded resource (B.2. above)

If the policy is a **countable** resource, do include the **CSV** of dividend additions in determining the resource value of the policy.

If the policy is a **excluded** resource, do **not** include the CSV of dividend additions in determining the individual's countable resources.

c. Dividend Accumulations

Do not exclude dividend accumulations under the life insurance provision, even if you exclude the policy that pays the accumulations.

Count the accumulations as resources, even if you exclude the policy itself because the policy's FV is \$1,500 or less unless the accumulations are excludable under another provision (for example, because they have been set aside for burial).

d. Income Treatment of Dividends

See S0830.500 C. regarding the income treatment of life insurance policy dividends.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.300	Page 23

D. Procedure
Accelerated Life
Insurance
Payments

If an individual receives accelerated payments, and the payments do **not** preclude Medicaid eligibility due to excess income or resources, determine whether the FV and/or CSV of the policy must be verified.

Reverify the policy if, prior to receipt of the accelerated payments:

- the policy's CSV precluded Medicaid eligibility, but the individual may now be resource-eligible; or
- the policy was an excluded resource and its FV reduced the maximum burial fund exclusion available to the individual (see B.4. above).

If reverification is necessary, examine the policy and any other relevant documentation in the individual's possession to determine the effect of the accelerated payments on FV and CSV. If necessary, contact the life insurance company for the necessary information.

If the individual expects to receive accelerated payments in the future, explain the effect of any further reduction in the policy's FV on the maximum burial fund exclusion available (if applicable).

Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.400	Page 24

M1130.400 BURIAL SPACES

A. Policy –The Exclusion

1. General

A burial space or agreement which represents the purchase of a burial space held for the burial of the individual, his or her spouse, or any other member of his or her immediate family is an excluded resource, regardless of value.

Cemetery plots are not *counted as resources, regardless of the number owned*, except when evaluating eligibility as QDWI. For QDWI, exclude one cemetery plot (see Appendix 1 to chapter S11). *Accept declaration regarding ownership of cemetery plots. Verification is not required.*

2. No Effect on Burial Funds Exclusion

The burial space exclusion is in addition to, and has no effect on, the burial funds exclusion (M1130.410).

3. Multiple Burial Spaces

When items other than cemetery plots serve the same purpose, exclude only one per person. For example, exclude a cemetery plot and a casket for the same person, but not a casket and an urn.

B. Definitions

1. Burial Space

A burial space is a(n).

- Gravesite (either an existing grave or a plot);
- crypt;
- mausoleum;
- casket;
- urn;
- niche; or
- other repository customarily and traditionally used for the deceased's bodily remains.

The term also includes necessary and reasonable improvements or additions to such spaces, including but not limited to:

- vaults;
- headstones, markers, or plaques;
- burial containers (e.g., for caskets); and
- arrangements for the opening and closing of the gravesite.

For example, a contract for care and maintenance of the gravesite, sometimes referred to as endowment or perpetual care, can be excluded as a burial space.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.400	Page 25

2. Agreement Which Represents the Purchase of a Burial Space

An agreement which represents the purchase of a burial space is a contract with a burial provider for a burial space held for the eligible individual or a member of his/her immediate family.

3. Individual's Immediate Family

"Individual" means the Medicaid recipient or **applicant**. " **Immediate family**" means:

- parents, including adoptive parents;
- minor or adult children; including adoptive and stepchildren;
- siblings (brothers and sisters), including adoptive and stepsiblings.

"Immediate family" also includes the spouse of the above relatives. If the relative's relationship to the recipient is by marriage only, the marriage must be in effect in order for the burial space exclusion to continue to apply. For example, a burial space held for a sister-in-law is no longer excludable if she and the recipient's brother divorce.

4. Held For

A burial space is "held for" an individual when someone currently has:

- title to and/or possesses a burial space intended for the individual's use (e.g., has title to a burial plot or owns a burial urn stored for his or her own use); or
- a contract with a funeral service company for specified burial spaces for the individual's burial (i.e., an agreement which represents the individual's current right to the use of the items at the amount shown).

Until the purchase price is paid in full, a burial space is not "held for" an individual under an installment sales contract or similar device if:

- the individual does not **currently** own the space;
- the individual does not **currently** have the right to use the space; and
- the seller is not **currently** obligated to provide the space.

Until all payments are made on the contract, the amounts paid may be considered burial funds. See M1130.410.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.400	Page 26

**C. Procedure--
Development and
Documentation**

1. General

The following procedures do **not** apply to installment burial contracts or insurance funded burial contracts. For installment contracts, see **M1130.420**. For insurance funded contracts, see **M1130.425**.

- a. If an individual alleges owning only one burial space, or an individual and spouse allege owning no more than two spaces, **assume** that the spaces are excluded.
- b. If an individual or individual and spouse allege owning more than one or two spaces, respectively, obtain a signed statement showing;
 - the name of the person for whose burial each space is intended; and
 - the relationship of each such person to the individual. Exclude only those spaces that are alleged to be for the burial of the individual, the spouse, or a member of the immediate family.

**2. Agreements
Which
Represent the
Purchase of a
Burial Space**

a. General

If the contract shows the purchase of a specified burial space at a specified price, determine whether such space is held for the individual or member of the individual's immediate family per B.4. above.

If the space is held for the individual, determine if the contract is irrevocable or revocable. If irrevocable, it is not a resource. If the contract is revocable, it is an excludable resource. (See **M1130.420** C.3. on single-purpose burial space contracts.)

b. Installment Contract

If the contract calls for installment payments, determine whether the value of the burial space has to be treated as burial funds (**M1130.420** C.5.c.).

D. References

Burial funds exclusion, M1130.410.
Prepaid burial contracts, **M1130.420**.
Interest earned on excluded burial space purchases agreements, S0830.501.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.410	Page 27

M1130.410 BURIAL FUNDS EXCLUSION

A. Policy Principle

Up to \$3,500 of burial funds may be excluded for each member of the ABD assistance unit (i.e., the individual and the individual's spouse, if living together).

NOTE: Burial funds exclusion is separate and apart from burial space exclusion.

For QDWI, see Appendix 1 to chapter S11.

B. Definitions

1. Burial Funds

Burial funds are resources that have been specifically set aside and clearly designated in writing for the cremation or other burial-related expenses of the individual or the individual's spouse.

Burial funds may be:

- irrevocable burial trusts established on or after August 11, 1993 (*irrevocable burial trusts established **before** August 11, 1993 are not countable based on the law in effect at that time*);
- revocable burial trusts;
- revocable burial contracts;
- other revocable burial arrangements (including the value of certain installment sales contracts for burial spaces);
- cash;
- financial accounts (e.g., savings or checking accounts);
- other financial instruments with a definite cash value (e.g., stocks, bonds, certificate of deposit, life insurance policies, etc.).

Property other than that listed in this definition will not be considered burial funds and may not be excluded under the burial funds provisions. For example, a car, real property, livestock, etc., are **not** burial funds.

NOTE: The entire amount of an irrevocable trust established on or after 8/11/93 by a funeral director for an individual for the purpose of paying for funeral and burial expenses is excluded if the following two step process is followed:

- 1) *the individual signs a pre-need contract with a funeral home director promising prepayment in return for specific funeral merchandise and services and pays the agreed upon amount in the form of a direct cash payment or purchase of a life insurance policy or annuity to the funeral director, and*
- 2) *the funeral home director in turn places the money, life insurance policy or annuity into a trust.*

2. Expenses for Burial Funds Exclusion Purposes

a. Expenses Included

Expenses included for burial funds exclusion purposes are generally those related to preparing a body for burial and any services prior to burial.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date March 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.410	Page 28

They usually include, for example: transportation of the body, embalming, cremation, flowers, clothing, services of the funeral director and staff, etc.

b. Expenses Not Included

Usually, expenses for items used for interment of the deceased's remains are not included for burial funds exclusion purposes. Such items may be subject to the burial space exclusion (**M1130.400**). However, items that do not qualify for the burial space exclusion, e.g., a space being purchased by installment contract, may be excluded under the burial fund exclusion.

C. Policy--General

1. Amount of Funds That Can Be Excluded

a. Maximum Exclusion

We can exclude up to \$3,500 each in funds set aside for:

- the burial expenses of the individual; and
- the burial expenses of the individual's spouse (eligible or ineligible) .

This exclusion is separate from and in addition to the burial space exclusion.

Funds paid on an installment contract do **NOT** qualify for the **burial space exclusion**.

Funds paid on an installment contract for burial spaces may qualify for the burial fund exclusion.

b. Reductions in Maximum Exclusion

The maximum \$3,500 that can be excluded from countable resources is reduced by:

- the face value of life insurance (not including term policies) owned by and insuring the individual and/or the individual's spouse, if the cash surrender value of such policies has been excluded from countable resources (cash surrender value of life insurance is excluded when the total face value per insured individual aged 21 or over does not exceed \$1,500), and
- the face value (not including the value of burial space items) of an irrevocable burial trust established before 8/11/93 *or other irrevocable arrangement specifically designated for the purpose of meeting the individual's or spouse's burial expenses*, regardless of whether the arrangement is owned by the individual or someone else, and
- the face value of burial insurance, regardless of whether the burial insurance is owned by the individual or someone else, and

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date March 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.410	Page 29

- the face value of burial contracts (not counting the value of burial space items), regardless of whether the contract is owned by the individual or someone else.

c. Exceptions Related to Huff-Cook/Settlers Policies

Huff-Cook Mutual Burial Association life insurance policies (which may be designated as Care Plans on the policy) sold prior to April 7, 1993 **do not reduce** the \$3,500 burial fund exclusion.

Huff-Cook life insurance policies sold from April 7, 1993 through November 30, 1993 **reduce** the burial fund exclusion.

Huff-Cook/Settlers life insurance policies sold on or after December 1, 1993 **do not reduce** the \$3,500 burial fund exclusion unless they are assigned to pay for a pre-need funeral contact.

d. EXAMPLE – Burial Fund Exclusion

Mrs. Brown has the following burial resources:

\$2,000 designated savings account
 \$ 200 irrevocable burial contract
 \$3,500 maximum exclusion
- 200 irrevocable burial contract
 \$3,300 available exclusion
-2,000 excluded burial funds
 \$1,300 still available for exclusion

Treatment - We exclude the \$2,000 savings account. Two years later, Mrs. Brown wants to add to her designated burial savings account, which now has a balance of \$2,150 due to accumulated interest. She can increase the amount of excluded funds in the account by up to \$1,300. Note that when determining the amount still available for burial fund exclusion, we disregard the amount of interest which accumulated in the account.

e. Subsequent Purchase of Excluded Life Insurance or Irrevocable Burial Contract

A subsequent purchase of an excluded life insurance policy or an irrevocable burial contract reduces the amount of the available burial funds exclusion as described in b. above. The reduction is effective the month after the month in which the life insurance or the irrevocable burial contract was purchased.

f. Burial Insurance

Burial insurance policies are not life insurance policies (see **M1130.300** for a definition of burial insurance). For Medicaid purposes, burial insurance is an irrevocable arrangement whose face value reduces the maximum burial funds exclusion by the policy's face value.

Exceptions: Huff-Cook Mutual Burial Association life insurance policies sold prior to April 7, 1993 do not reduce the \$3,500 burial fund exclusion.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date September 2010
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.410	Page 29a

Huff-Cook/Settlers life insurance policies sold on or after December 1, 1993 do not reduce the \$3,500 burial fund exclusion unless they are assigned to pay for a pre-need funeral contract.

e. Increases in Value of Burial Funds

Any appreciation in the value of excluded burial funds is excluded from resources (and from income), even if the total of the burial funds thus excluded exceeds the \$3,500 maximum. This includes interest earned by burial funds, provided the interest is left to accumulate as part of the funds.

2. Increases in Amount of Excluded Burial Funds

a. Designated Amount is \$3,500

Interest earned on excluded burial funds and appreciation in the value of excluded burial arrangements are excluded from resources if left to accumulate and become part of the separate burial fund.

b. Designated Amount is Less than \$3,500

Until \$3,500 (or such other lesser amount established in accordance with C.1.b.) in burial funds has been designated, additional amounts can be excluded under the burial funds provision if the individual designates them for burial expenses. Interest on excluded burial funds is not included in determining if the \$3,500 maximum has been reached.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.410	Page 30

c. Designated Amount is greater than \$3,500

While an individual may designate greater than \$3,500 for burial, only up to \$3,500 may be excluded for burial. The remainder of the designated amount will be evaluated as a countable resource. If the individual is determined eligible, interest and appreciation that accumulates on the excluded portion of the burial fund will be excluded. Interest and appreciation that accrue over time on the non-excluded portion will be evaluated as a countable resource.

3. Burial Funds Must Be Kept Separate from Non-burial-Related Assets

a. If burial funds are commingled with nonburial-related assets, the exclusion does not apply.

b. Examples

A single burial contract for \$4,500 of burial services and \$2,000 in burial spaces does not have to be separated into 2 contracts since the whole amount is burial-related, even though we can only exclude \$3,500 of the contract as a burial fund.

A bank account containing \$1,200, \$500 of which is designated for burial and \$700 of which is other funds the individual uses for living expenses, is **not** allowable and the \$500 may **not** be excluded as a burial fund. If the \$500 is moved to a separate account, the exclusion may be applicable the month in which the funds are separated.

4. Funds Used for Another Purpose

a. General

If some or all of the excluded funds were withdrawn and used for another purpose, the funds withdrawn may have been either transferred or retained as a resource. If the funds were transferred, the asset transfer policies in subchapter M1450 are applicable. If the funds have been retained as a resource, the resource policies in Chapter S11 are applicable. Any excluded funds remaining in the designated burial fund continue to be excluded.

b. Change of Form

Transferring excluded burial funds from one form to another (e.g., from a certificate of deposit to a burial contract) is not use for another purpose.

c. Examples - Use for Another Purpose

A loan against the cash surrender value (CSV) of a life insurance policy that has been designated for burial expenses **is not** use for another purpose **if** the loan is for the purchase of another burial fund.

Use of a burial fund as collateral for a loan **is** use for another purpose because the loan creates an encumbrance on the funds. Since the funds are not available for the individual's burial as long as they are encumbered, the funds cannot be considered set aside for the individual's burial.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2021
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.410	Page 31

5. When to Develop Use for Another Purpose

Determine if excluded burial funds have been used for some purpose other than as burial funds only if:

- there is some indication that excluded funds may have been used for another purpose, and
- the sum of the excluded funds (including any that may have been spent) and countable resources exceeded the applicable (individual or couple) resources limit as of the month in which the excluded funds may have been used for another purpose, and
- the individual was eligible for the month in which the excluded burial funds may have been used for another purpose.

6. How to Develop Use for Another Purpose

If the criteria in 1. above indicate a need to pursue the issue of use for another purpose:

- obtain the individual's signed statement as to whether any of the funds were so used and, if so, the amount;
- obtain any pertinent evidence, including signed statements from other individuals who may know about the funds in question.
- follow resource policy if funds have been retained as a resource.
- follow asset transfer policy if funds were transferred.

7. Deeming Considerations

If the individual is a blind or disabled child under age 21 who lives with his parent, resources (and income) of the parent are deemed to the child. The burial funds exclusion applies to resources that belong to the parent and are designated as set aside for the burial expenses of the parent and/or his or her spouse.

D. Designation of Burial Funds

1. How Designation May Be Made

Burial funds may be designated by the applicant at the time of application or during the initial application processing period or by an enrollee at any time after eligibility has been determined. Burial funds may be designated by:

- an indication on the burial fund document (e.g., the title on a bank account); or
- a signed statement.

See Appendix 3 for a sample burial funds designation form. A printable version of the form is located <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Training-Documents>.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date May 2015
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.410	Page 32

2. Signed Statement Designating Burial Funds

A signed statement must include:

- the value and owner of the resources;
- for whose burial the resources are set aside;
- the form(s) in which the resources are held (burial contract, bank account, etc.); and
- the date the individual first considered the funds set aside for the burial of the person specified.

3. Date of Intent

We accept the individual's allegation as to the date he or she first considered the funds set aside for burial unless there is evidence that the funds were used and replaced after that date.

4. Effective Date of Exclusion

Once the date that burial funds were considered set aside for burial has been established, the first month for which the exclusion affects resource determination is the latest of:

- the month in which the funds were considered to have been set aside, or
- the month of application, if the funds were considered set aside before the month (or first month of retroactive period, if retroactive coverage is requested).

5. Designating Life Insurance as a Burial Fund

When designating a countable life insurance policy as a burial fund, the policy itself is designated. However, because the countable value of the policy is its cash surrender value, it is the cash surrender value at the time of designation that is applied toward the burial funds exclusion when determining countable resources.

If life insurance is designated as a burial fund, the individual can also designate any dividend accumulations on the life insurance policy (**M1130.300 A.5.b.**) as a burial fund. Dividend accumulations are a separate resource (i.e. **not** considered as an increase in the value of the CSV) and must be designated as burial funds separate from the life insurance policy itself.

6. Designation Remains

Once a burial fund is designated, it remains a burial fund until:

- eligibility terminates or
- the individual states in writing that the funds are no longer set aside for burial.

E. Procedure-Initial Applications Development and Documentation

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2021
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.410	Page 33

1. Ask About Burial Funds

Unless the individual is ineligible for a reason other than resources, inquire to determine the presence of excluded burial funds.

NOTE: Make sure the individual understands what we mean by a burial fund and the effect a burial fund could have on countable resources and income.

2. Verify Form and Separation of Funds

Verify that the funds meet the definition of burial funds in B.1. above and that the funds are separated from all other non-burial-related assets (C.3. above). Burial funds must meet both of these requirements before we can exclude them. If funds cannot be excluded, tell the individual why (e.g., if the funds are not separate from non-burial assets).

3. Determine Date Funds Set Aside for Burial

If an individual alleges having set aside funds for burial, determine the date they were first considered as set aside and document the file with supporting evidence.

- If the funds are already clearly designated (e.g., by the title of a savings account), accept any official record which shows the title of the account and which establishes that the designation was in effect prior to the month of application.
- If the funds are **not** already clearly designated, obtain the statement described in D. above.
- See D.4. above regarding effective date of the exclusion for funds considered set aside for burial prior to filing.

4. Verify Value of Funds

Verify the value of any burial funds to be excluded, using the instructions that apply to the specific resources in question.

5. Determine Amount of Exclusion Available

Document the file with evidence of:

- the face value of life insurance owned by and insuring the individual or the individual's spouse if the cash surrender value of such policies has been excluded from countable resources (cash surrender value of life insurance is excluded when the total face value per insured individual age 21 or over does not exceed \$1,500), and
- the face value (not including the value of burial space items) of an irrevocable burial trust established before 8/11/93 or other irrevocable arrangement specifically designated for the purpose of meeting the individual's or spouse's burial expenses, regardless of whether the arrangement is owned by the individual or someone else, and
- the face value of burial insurance whether owned by the individual or someone else, and
- the face value of burial contracts (not counting the value of burial space items) whether the contract is owned by the individual or someone else.

Should the \$3,500 maximum exclusion be reduced by life insurance, any irrevocable arrangement including an irrevocable burial trust established before 8/11/93, burial insurance, or a burial contract, document the amount by which the exclusion will be reduced, including the computation of the amount. To make this computation, you may use the electronic Burial Funds Exclusion Worksheet located at: <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Training-Documents..>

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2021
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.410	Page 34

**F. Procedures-
Renewal or a
Reported Change**

**1. Verify Funds
Already
Excluded**

If the case record shows excluded burial funds, verify the current amount. When \$3,500 or less was initially designated as a burial fund, increases in the burial fund due to appreciation or accumulated interest are excluded even if they result in the total burial fund exclusion exceeding the \$3,500 maximum.

If more than \$3,500 was initially designated for burial funds exclusion, interest and appreciation that have subsequently accrued on the excluded portion of the burial fund are excluded. Interest and appreciation that have subsequently accrued on the countable portion are countable. To calculate the countable value of a burial fund at renewal or when a change is reported you may use the electronic “BFE Increased Value Determination Worksheet”. The worksheet is located on the Virginia Department of Social Services Local Agency web site (SPARK) at:

<https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Training-Documents>.

Also, inquire whether designated burial funds continue to be maintained separately from non-burial-related assets (C3. above).

If the funds have decreased, see G. below.

**2. Enrollee Wishes
to Designate
Funds**

If an enrollee wishes to designate funds for burial, proceed as you would for an initial application. This applies whether no funds are currently excluded or less than \$3,500 (excluding appreciation or accumulated interest) is currently excluded.

**3. Apply Burial
Funds-Related
Income/
Resources
Exclusions**

See H. below.

**G. Procedure-Burial
Funds Are Used for
Another Purpose**

**1. When to
Evaluate Use
for Another
Purpose**

Determine if excluded burial funds have been used for some other purpose only if:

- there is some indication that excluded funds may have been used for another purpose, and
- the sum of the excluded funds (including any that may have been spent) and countable resources exceeded the applicable (individual or couple) resources limit as of the month in which the excluded funds may have been used for another purpose, and
- the individual was eligible for the month in which the excluded burial funds may have been used for another purpose.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.411	Page 35

**2. How to
Evaluate Use
for Another
Purpose**

If the criteria in 1. above indicate a need to pursue the issue of use for another purpose:

- obtain the individual's signed statement as to whether any of the funds were so used and, if so, the amount;
- obtain any pertinent evidence, including signed statements from other individuals who may know about the funds in question.

**H. Procedure--
Posteligibility
Application of
Burial Fund -
Related
Income/Resource
Exclusions**

**1. Recipient Is
Eligible for All
Months During
Period of
Review**

If the individual remained eligible throughout the period of review:

- exclude from income any interest earned on the excluded burial funds if that interest has been allowed to accumulate as part of such funds; and
- exclude from resources, in addition to the funds previously excluded,
- any interest on such excluded burial funds that has been excluded from income and any appreciation in the value of such excluded funds.

**M1130.411 BURIAL FUNDS EXCLUSION--
JULY 1, 1988 THROUGH JULY 31, 1994**

A. Introduction

The instructions in **M1130.410** apply to the burial funds exclusion for July 1, 1988 through June 30, 1994 with the exceptions noted below.

B. Policy

**1. Form of Burial
Funds**

For months prior to August 1, 1994 burial funds could be in the form of **any** resource, liquid or nonliquid.

**2. Commingled
Funds**

For months prior to August 1, 1994, burial funds could be commingled with other resources (burial-related or nonburial-related), but the funds had to be separately identifiable in order to be excluded (S1130.700).

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.420	Page 36

M1130.420 PREPAID BURIAL CONTRACTS

A. Definition

A prepaid (or preneed) burial contract is an agreement whereby the buyer pays in advance for a burial that the seller agrees to furnish upon the death of the buyer or other designated individual.

B. Policy--General

1. Contract Is a Resource

If a burial contract is revocable or salable, it is a resource. However:

- any portion of the contract that clearly represents the purchase of burial spaces may be excludable, regardless of value (**M1130.400**); and
- some or all of any remaining value of the contract may be excludable as burial funds (**M1130.410**).

2. Contract Is Not a Resource

a. Contract Not Saleable

When a burial contract is funded totally by an irrevocable trust, irrevocably assigned life insurance policy or annuity, the contract is NOT saleable. Do not develop the prepaid burial contract further. Determine whether the trust, the life insurance policy or annuity is a resource using the following policy:

- trusts in sections M1120.200 through 202, M1140.400 through 404.
- life insurance in sections M1130.300 and M1140.310.

b. Contract Issued in Another State

If a burial contract is issued in another State and cannot be revoked or be sold without significant hardship, it is not a resource. However:

- any portion of the contract that represents burial **funds** reduces the \$3,500 maximum otherwise available for the burial funds exclusion; but
- any portion that represents the purchase of burial spaces has no effect on the burial funds exclusion.

3. Contract Revocability

State law determines whether a contract is revocable. Some burial contracts may be partly revocable. For example, if the total value of an otherwise irrevocable contract exceeds the limit set for irrevocability by State law, the excess is revocable.

4. Burial Insurance and Burial Trusts

Prepaid burial contracts do not include burial insurance as defined in **M1130.300** or burial trusts as described in M1120.200.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.420	Page 37

5. Provider Places Funds in Trust

If an individual contracts with a provider of burial services and the **provider** places the funds in trust with the funeral provider named as the grantor on the trust document, this individual has purchased a preneed contract; this is a compensated "transfer" of funds.

C. Policy --Evaluations Contracts

1. Conditions for Liquidation

A prepaid burial contract may have conditions attached to its liquidation or revocation. If either of the following conditions exists, the contract is not a resource.

- Significant hardship may result from the conditions required for selling or revoking a contract. Significant hardship means an unrealistic demand on the buyer; e.g., having to move out of state. If an EW determines that such would be the case, the file must contain a determination to that effect.
- State law or contractual terms may require **mutual consent** of buyers and seller in order to sell or revoke a contract. If the seller will not consent, or will consent only under conditions that would pose a significant hardship to the buyers, the file must reflect those facts.

NOTE: If a condition creating hardship or some other obstacle to liquidation is not evident on the face of the contract, assume it is revocable or salable and, therefore, a resource. The burden is on the applicant/recipient to provide evidence to the contrary.

2. Value of Contract as a Resource

If a burial contract is a resource, use as its value:

- the amount payable to the owner upon revocation; or
- if the contract is not revocable but is salable, its CMV.

3. Single Purpose Burial Space Contracts

a. General

Apply the burial space exclusion to any single-purpose burial space contract that is a resource **if**:

- the contract lists all of the burial spaces **and** either includes a value for each space or the total value of all the spaces combined; and
- the seller's obligation to provide those items is not contingent on further payment (as in certain installment contracts); i.e., the items are actually being held for the individual's future use.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.420	Page 38

THIS PAGE INTENTIONALLY LEFT BLANK.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1999
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.420	Page 39

b. Exception

Treat as burial funds (i.e., as subject to the \$3,500 maximum or as reducing that maximum):

- the unidentified portion of a contract that implies it covers only burial spaces but does **not** identify some or all of the spaces, or does not include either a value for each burial space or the total value of all the spaces combined; and
- the amount paid on an installment contract for burial spaces if the contract does not entitle the person to the spaces until the full purchase price has been paid.

NOTE: Once full payment has been made, these items can become subject to the unlimited burial space exclusion because at the point of full payment the contract becomes an agreement representing the purchase of a burial space (M1130.400).

4. Single-Purpose Contracts for Burial Expenses

A single-purpose contract for burial expenses (M1130.410) includes only services that are consider burial **funds** and that are subject to, or reduce the amount of, the burial funds exclusion.

5. Contracts for Both Burial Spaces and Burial Expenses

a. Irrevocability Designation

If a combined contract designates which portion is irrevocable and which is not, that designation is controlling. That is, if the contract designates only the burial space purchase as irrevocable, the portion dealing with burial funds is revocable and is subject to the burial funds exclusion.

b. Maximum on Irrevocable Amount

Virginia does not have a set maximum irrevocable amount set by law. However, if a State has a law which sets a maximum on the amount that can be irrevocable, but the contract does not designate which part is irrevocable and the contract value exceeds the State maximum, we apply the maximum to burial **spaces** first.

- If space purchases exceed the maximum, we consider the excess revocable but subject to the burial space exclusion.
- If space purchases are less than the maximum, we apply the remainder of the maximum to burial funds items.

NOTE: Irrevocable burial funds reduce the amount available for excluding other burial funds.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.420	Page 40

c. Installment Contracts

We treat as burial funds the amount **paid** for any spaces and services in a combined contract being purchased in installments **if** the contract.

- does not entitle the individual to the spaces and services listed until the full purchase amount has been paid ; or
- relieves the seller of the obligation to provide the spaces and services listed at the price listed until the contract is paid in full.

Once the contract has been paid in full, we apply the space and funds exclusions as appropriate.

**D. Procedure--
Development and
Documentation**

1. General

- a. **Develop** initially whether a prepaid burial contract exists and is a resource.
- b. **Document** the file with respect to:
- revocability;
 - liquidity (as needed); and
 - value, if the contract is a resource or involves burial funds
- c. In **posteligibility** situations:
- **develop and document** any newly acquired contract per a. and b. above;
 - **do not redevelop** a contract if prior development showed that it is not a resource and does not contain burial funds;
 - **redevelop and document** a contract if prior development showed that installment payments could affect applicability of the funds/space exclusions or that it included burial funds (revocable or irrevocable).

**2. Valuing a
Revocable
Contract**

For revocable burial contracts, State law usually sets refund guidelines that may vary by contract. If you cannot determine the refund amount by examining the contract, have the individual contact the provider or, if necessary, make the contact yourself.

**3. Valuing an
Irrevocable but
Transferrable
Contract**

If a contract is irrevocable but can be liquidated some other way (e.g., through sale), **assume** that the contract's CMV is the amount that has been paid on it.

If the individual disagrees with this assumption, he or she can rebut it with an estimate from a disinterested knowledgeable source such as the State Funeral Directors Association or a local funeral director.

**4. Single-Purpose
Contract**

Develop and document the factors outlined in 1. above, following the guidelines above, as appropriate.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.420	Page 41

5. Contract for Both Spaces and Funds

- a. Determine whether the contract designates which portion (if any) is irrevocable.
- b. If designated, develop each portion as appropriate per **M1130.400** or **M1130.410**.
- c. If the contract does not designate, apply the State maximum for irrevocability, if any, first to the total value of all burial spaces and then to the value of the burial funds. (See E. below for examples.)

Any burial spaces not covered are subject to the burial space exclusion.
Any burial funds not covered are subject to the burial funds exclusion.

- d. If you cannot determine which amounts represent the purchase of spaces and which represent burial funds, and which parts of the contract, if any, are irrevocable, the individual has not satisfactorily identified funds versus spaces. In that event, consider the entire contract as a resource in the form of burial funds.

E. Examples--

1. Installment Contract

a. Situation

An individual owns a revocable contract for his own burial. The contract, which covers both spaces and funds, gives the following breakout:

\$ 700	- casket
350	- vault
200	- opening/closing
225	- embalming
300	- use of facilities
<u>525</u>	- services of director and staff
\$2,300	- total value of contract

The contract provides that, until the full price of the contract has been paid, the seller has the option to be released from any obligation to provide the items and services at the contract price. Rather, the seller can charge prices current at the time of death, allowing a credit for amounts already paid.

b. Treatment

Until the contract has been paid in full, we consider all payments to be funds set aside for burial. Amounts paid in excess of the maximum available for exclusion as burial funds are countable resources.

When the contract has been paid in full, the spaces listed in a. above are subject to the burial space exclusion. The \$1,050 value of the remaining items is subject to the burial funds exclusion.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.425	Page 42

M1130.425 LIFE INSURANCE FUNDED BURIAL CONTRACTS AND THE BURIAL SPACE/FUNDS EXCLUSIONS

A. Definitions

1. Life Insurance Funded Funeral Arrangements

A life insurance funded burial contract involves an individual purchasing a life insurance policy on his or her own life and then assigning, revocably or irrevocably, either the proceeds or ownership of the policy to a third party, generally a funeral provider. The purpose of the assignment is to fund a burial contract.

Life insurance funded burial contracts are **not** burial insurance (**M1130.300 A.8.**).

2. Proceeds

Proceeds of a life insurance policy are the face value of the policy plus any additions payable at maturity or death. This does not include dividends, cash surrender value (CSV) or interest.

B. Policy-General

1. Operating Assumptions

We assume that the burial contract itself (without the insurance policy assigned to fund it) has no resource value. We also assume that the contract is not salable because it is a part of a larger arrangement involving life insurance that has been assigned to another party as payment for contract goods and services. This means that the value of the burial arrangement is the value of the life insurance policy.

2. State Limits on the Amount of Funeral Contracts That May Be Made Irrevocable

State limits on the amount of funeral contracts that can be made irrevocable generally address the face amount of the contract that can be made irrevocable. Since we are concerned with the irrevocable assignment of ownership of an insurance policy to fund a burial contract and not with the face amount of the contract itself, State dollar limits are usually of no consequence in evaluating the policy for Medicaid purposes unless State law specifically limits irrevocable assignment of ownership of insurance policies funding burial contracts.

3. Dividend Accumulations

We do not exclude from resources dividend accumulations of a life insurance policy as part of the value of the policy or the burial contract. Dividend accumulations are separate resources and must be designated separately in order to qualify for the burial funds exclusion. (See **M1130.300 A.5.b.** and **C.6.c**)

If ownership of the life insurance policy has been irrevocably assigned, we assume, absent evidence to the contrary, that the dividend accumulations are also assigned.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1999
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.425	Page 43

**C. Policy--Effect Of
Assignment of
Ownership On
Burial Exclusions**

**1. Revocable
Assignment**

a. Burial Spaces

The burial space exclusion does not apply. This is because the funeral provider has not received any payment and no purchase of burial spaces has been made. The provider has no obligation to provide any spaces until the individual dies and therefore no spaces are being held for the individual.

b. Burial Funds

The burial funds exclusion may apply. The resource value of the burial contract is equal to the CSV of the life insurance policy, subject to the \$3,500 burial funds exclusion.

c. Example

Mrs. Emma White has a burial contract funded by the revocable assignment of ownership of a life insurance policy. The face value of both the burial contract and the life insurance policy is \$5,000 and the CSV of the life insurance policy is currently \$3,700. The total resource value of Mrs. White's burial contract is equal to the CSV of \$3,700.

The burial space exclusion does not apply to Mrs. White's contract (per above). However, we can exclude \$3,500 of the CSV under the burial funds exclusion. The remaining \$200 of the CSV will be considered a countable resource.

**2. Irrevocable
Assignment**

a. Burial Spaces

The burial space exclusion may apply, depending on the nature of the contract (**M1130.400.**). Any portion of the contract that represents the purchase of a burial space has no effect on the burial funds exclusion.

b. Burial Funds

The life insurance policy and the burial contract are not resources for Medicaid purposes because the Medicaid recipient no longer owns them. The face value of the burial funds portion of the contract (if any) offsets the \$3,500 burial funds exclusion because the contract represents an irrevocable arrangement available to meet the individual's burial.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1999
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.425	Page 44

- c. Example** Mr. Bill Atkins made provision for his burial by irrevocably assigning ownership of a life insurance policy on his life to a funeral home to fund a burial contract. The face value of the life insurance policy is \$5,000.

The burial contract identifies the purchase of \$1,300 of burial spaces and \$3,700 of burial funds. The \$3,700 burial funds portion of the contract is not a resource, but, since the assignment of policy ownership is irrevocable, the \$3,700 burial funds portion exceeds the \$3,500 burial funds exclusion that he is entitled to so Mr. Atkins may not have any other excluded burial funds. The \$1,300 space purchase is not a resource either, and does not reduce the burial funds exclusion.

D. Policy--Effect Of Assignment Of Proceeds On Burial Exclusions

1. Revocable Assignment

a. Burial Spaces

The burial space exclusion does not apply to the CSV of the life insurance policy. This is because the funeral provider has not received any payment and no purchase of burial spaces has been made. The provider has no obligation to provide any spaces until the individual dies and, therefore, no spaces are being held for the individual.

b. Burial Funds

The resource value of the burial contract is equal to the CSV of the life insurance policy. Treat the CSV according to the policy described in c. below.

c. Treatment of CSV

- If the face value of all life insurance policies on the individual's life is \$1,500 or less, exclude the CSV under the life insurance exclusion (**M1130.300 B.**).
- If the face value of all policies exceeds \$1,500, treat the CSV of the policy according to the burial funds exclusion, if applicable. See **M1130.410** for instructions on the burial funds exclusion.

d. Examples

- Ms. Lydia Fisher has a \$1,300 burial contract funded by the revocable assignment of the proceeds of an insurance policy with a face value of \$1,300 on her life. The CSV of the policy is \$1,000. If this is the only life insurance policy she owns on her life, then the life insurance policy would be excluded under the life insurance exclusion and the burial exclusions would not apply.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2018
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.425	Page 45

The life insurance policy's face value of \$1,300 reduces the maximum \$3,500 burial fund exclusion by that same amount. Ms. Fisher may have an additional \$2,200 in excluded burial funds.

- If Ms. Fisher has another life insurance policy on her life and the total face value of the two policies exceeds \$1,500 (the life insurance exclusion does not apply), then the CSV may be excludable under the burial funds exclusion. No burial space exclusion applies per a. above.

2. Irrevocable Assignments

The eligibility worker must review the policy. If it is found the life insurance policy permits the irrevocable assignment of policy proceeds without requiring the irrevocable assignment of ownership, submit a copy of the policy to the Regional Consultant for review.

E. Policy--Life Insurance Policy Placed in a Trust

A life insurance company may provide an individual with the option of irrevocably transferring ownership of a revocable life insurance policy that funds a burial contract to a trust established by the company.

1. Treatment of Policy's CSV

If an individual assigns a life insurance policy to a trust the CSV (if any) will not continue to be a countable resource; if

- the individual neither owns nor has the legal right to direct the use of trust assets to meet his or her maintenance needs; and
- a *revocable* assigned life insurance policy funds a funeral contract and the policy is placed irrevocably in a trust then the policy's CSV is not a resource for Medicaid purposes.

2. Treatment Of Dividends

If the policy's CSV is not a resource, assume, absent evidence to the contrary, that any dividends paid on the policy are also not a resource.

3. Individual Retains Right to Change Funeral Firm

Under an irrevocable trust arrangement, the life insurance policy's CSV is not a resource even if the individual retains the right to change the funeral firm that will provide the burial goods and services.

4. Burial Fund Exclusions Offset

A *revocable* assigned life insurance policy placed in an irrevocable life insurance trust is treated the same as a life insurance policy for which the ownership has been irrevocably assigned to fund a burial contract (see C.2 above). This means that the value of the burial funds portion of the contract (IF ANY) reduces the \$3,500 burial funds exclusion.

This is the case because the burial funds portion of the contract represents an irrevocable arrangement that is available to meet the individual's burial expenses.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.425	Page 46

F. Procedure--General

1. Development and Documentation

Follow instructions in **M1130.410 E.** regarding the development and documentation of burial funds. See additional instructions below.

a. Life Insurance Policy

Examine the life insurance policy and document whether the ownership/proceeds of the policy have been assigned (revocably or irrevocably) and, if so, to whom.

If ownership or proceeds of the life insurance policy have been **revocably** assigned, follow regular life insurance development procedures. (See **M1130.300 C.** for further development and documentation requirements.)

If ownership of the life insurance policy has been **irrevocably** assigned, apply the policy principles in C.2. above to determine the policy's resource status.

If an insurance policy that funds a funeral arrangement is placed **irrevocably in trust**, apply the policy principles in E. above to determine the policy's resource status. For out-of-state contracts contact the regional specialist.

In all cases, document the file with a copy of:

- the life insurance policy;
- the assignment; and
- any other related documents.

b. Options for Developing Policies Issued by Nonparticipating or Stock Companies

If the insurance policy funding the burial contract is issued by a nonparticipating or stock company (and therefore does not pay dividends), you may be able to curtail development as to the policy's CSV. You can use the CSV chart attached to the policy instead of contacting the life insurance company. See **M1130.300 C.5.** for more information.

c. Burial Contract

Examine the burial contract and determine what items and/or arrangements have been contracted. Document the file with a copy of the burial contract.

2. Determine Applicability of Burial Space/Fund Exclusions

Apply the policy principles in C. and D. above and determine:

- the value of the contract that is excludable as a burial space (if any) (**M1130.400**); and
- the value of the contract that is excludable as burial funds (if any) (**M1130.410**).

Put your determination in the file.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.455	Page 47

**G. Procedures--
Redetermination
Development**

For a previously developed life insurance funded burial contract, redevelop and document the value of the contract using applicable life insurance development procedures if:

- ownership and/or proceeds of the policy have been **revocably** assigned (i.e., the CSV of the policy must be reverified); or
- ownership of the policy has been **irrevocably** assigned (or a revocably assigned policy has been placed irrevocably in trust) and the individual has other excluded burial funds (i.e., the value of the contract reduces the amount of other funds that may be excluded).

M1130.430 HOUSEHOLD GOODS AND PERSONAL EFFECTS

A. Policy Principle

Household goods and personal effects are excluded resources for Medicaid evaluations.

B. Definitions

1. Household Goods

Household goods are items of personal property customarily found in the home and used in connection with the maintenance, use, and occupancy of the premises as a home. They include, but are not limited to: furniture, appliances, televisions sets, carpets, cooking and eating utensils, dishes, etc.

2. Personal Effects

Personal effects are items of personal property that are worn or carried by an individual or that have an intimate relation to him or her. They include, but are not limited to: clothing, jewelry, personal care items, prosthetic devices, and educational or recreational items such as books, musical instruments, or hobby materials.

S1130.455 GRANTS, SCHOLARSHIPS, FELLOWSHIPS, AND GIFTS

A. Policy Principle

Section 435 of The Social Security Protection Act of 2004, Public Law 108-203, provides a 9-month resource exclusion for grants, scholarships, fellowships, and gifts used to pay for tuition, fees, and other necessary educational expenses at any educational institution, including vocational and technical education.

B. Definitions

1. Grants, Scholarships, and Fellowships

Grants, scholarships, and fellowships are amounts paid by private nonprofit agencies, the U.S. Government, instrumentalities, or agencies of the U.S., State and local governments, foreign governments, and private concerns (e.g. a private citizen) to enable qualified individuals to further their education and training by scholastic or research work, etc.

2. Gifts

A gift is something a person receives which is not repayment for goods or services the person provided and is not given because of a legal obligation on the giver's part. To be a gift, something must be given irrevocably (i.e., the

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.455	Page 48

donor relinquishes all control). "Donations" and "contributions" (including crowdsourcing and crowdfunding) may meet the definition of a gift. See M0830.520.

3. ***Tuition, Fees, and Other Necessary Educational Expenses*** *Educational expenses include laboratory fees, student activity fees, transportation, stationery supplies, books, technology fees, and impairment-related expenses necessary to attend school or perform schoolwork (e.g., special transportation to and from classes, special prosthetic devices necessary to operate school machines or equipment, etc.).*

C. Policy – Assistance Under Title IV Of The Higher Education Act Of 1965 (HEA) Or Bureau Of Indian Affairs (BIA)

1. ***Title IV of HEA or BIA Involvement*** *All student financial assistance received under HEA, or under BIA student assistance programs, is excluded from income and resources, regardless of use. The resource exclusion for this educational assistance does not have a time limit, i.e. regardless of how long the assistance is held, it is excluded from resources.*

Examples of HEA Title IV Programs:

- *Pell grants*
- *State Student Incentives*
- *Academic Achievement Incentive Scholarships*
- *Byrd Scholars*
- *Federal Supplemental Educational Opportunities Grants (FSEOG)*
- *Federal Educational Loans (Federal PLUS Loans, Perkins Loans, Stafford Loans, Ford Loans, etc.)*
- *Upward Bound*
- *Gear Up (Gaining Early Awareness and Readiness for Undergraduate Programs)*
- *LEAP (Leveraging Educational Assistance Partnership)*
- *SLEAP (Special Leveraging Educational Assistance Partnership)*
- *Work-Study Programs.*

NOTE: *State educational assistance programs, including work-study, funded by LEAP or SLEAP are programs under Title IV of HEA.*

2. ***Interest and Dividends Earned on Title IV of HEA or BIA Educational Assistance*** *Interest and dividends earned on unspent educational assistance under Title IV of HEA or under BIA are excluded from income. See M0830.500.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.455	Page 48a

***D. Policy - Other
Grants,
Scholarships,
Fellowships, and
Gifts***

Any portion of a grant, scholarship, fellowship, or gift used or intended to be used to pay the cost of tuition, fees, or other necessary educational expenses at any educational institution, including vocational and technical education, is excluded from resources for 9 months beginning the month after the month it was received. This exclusion does not apply to any portion set aside or actually used for food or shelter.

Grants, scholarships, fellowships, and gifts that are retained after the 9-month exclusion period are countable resources beginning the month following the end of the 9th month.

If any portion of this excluded educational assistance is used for something other than tuition, fees, or other necessary educational expenses or the individual no longer intends for the funds to be used to pay tuition, fees, or other necessary educational expenses, then the funds are income at the earliest of the following points: in the month they are spent, or the month the individual no longer intends to use the funds to pay tuition, fees, or other necessary educational expenses.

Interest and dividends earned on unspent educational assistance under Title IV of HEA or under BIA are excluded from income. Interest or dividends earned on other forms of excluded educational assistance are counted as income. Interest or dividends earned on countable educational assistance are excluded from income. See M00830.500.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.500	Page 48b

REAL OR PERSONAL PROPERTY

S1130.500 PROPERTY ESSENTIAL TO SELF-SUPPORT – OVERVIEW

A. Introduction

The Social Security Act provides for the exclusion from resources of property that the Secretary determines is so essential to an individual's means of self-support as to warrant exclusion.

B. Policy Principles

1. Categories Of Property Excluded Under This Provision

Resources excluded under this provision generally fall into 3 categories. Each is listed below and then described in more detail in a subsequent section.

a. Property Excluded Regardless of Value or Rate of Return

This category encompasses:

- property used in a trade or business (effective 5/1/90);
- property that represents government authority to engage in an income producing activity;
- property used by an individual as an employee for work (effective 5/1/90); and
- property required by an employer for work (before 5/1/90).

See S1130.501.

b. Property Excluded up to \$6,000 Equity, Regardless of Rate of Return

This category includes **nonbusiness** property used to produce **goods** or **services** essential to daily activities. For example, it covers land used to produce vegetables or livestock **solely** for consumption by the individual's household. See S1130.502.

c. Property Excluded up to \$6,000 Equity if it Produces a 6% Rate of Return

This category encompasses:

- property used in a trade or business in the period before 5/1/90;
- nonbusiness income-producing property. However, the exclusion does not apply to equity in excess of \$6,000 and does not apply if the property does not produce an annual return of at least 6% of the excluded equity. If there is more than one potentially excludable property, the rate of return requirement applies individually to each. See S1130.503.

2. Current Use Criterion

Resources that are excluded under this provision must be in current use in the type of activity described. If not in current use, there must be a reasonable expectation that the required use will resume. See S1130.504.

3. Liquid Resources

Liquid resources are not considered property essential to self-support except when used as part of a trade or business.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.500	Page 49

**C. Policy--
Limitations On
Development**

It is not necessary to develop for the exclusion of property essential to self-support if:

- the combined value of the self-support property and other countable resources does not exceed the applicable resource limit;
- the value of other countable resources (including any equity over \$6,000 when B.1.b. or c. is involved) exceeds the applicable resource limit;
- the individual is ineligible for a **nonfinancial** reason; or
- the property was excluded under the State plan in effect for October 1972 and the individual meets the "grandfathering" criteria.

D. Related Policies

**1. Home
Property**

When an individual uses home property to perform self-support activities, the property is excluded under S1130.100, regardless of its value, rate of return, or current use.

**2. Plan For
Achieving Self-
Support
(PASS)**

The primary differences between the exclusion of property essential to self-support and the exclusions provided for under a PASS (see *M0810.430*) are that the PASS exclusions:

- cover income as well as resources;
- apply to the blind and disabled, but not to the aged;
- have a time limit; and
- do not have an inherent dollar limit.

Consider the overall resource situation to ensure that the individual receives the benefit of the most advantageous exclusion for him or her.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.501	Page 50

M1130.501 ESSENTIAL PROPERTY EXCLUDED REGARDLESS OF VALUE OR RATE OF RETURN

A. Policy Principles

1. **The Exclusion** The properties described in 2, 3, and 4 below are excluded as essential to self-support regardless of value or rate of return. However, they must be in current use or, if not in use for reasons beyond the individual's control, there must be a reasonable expectation that the required use will resume.
2. **Trade Or Business Property** Property essential to self-support used in a trade or business is excluded from resources regardless of value or rate of return effective 5/1/90.
3. **Government Permits** Government permits represent authority granted by a government agency to engage in income producing activity. Examples are commercial fishing permits granted by a State Commerce Commission and tobacco crop allotments issued by the U.S. Department of Agriculture.
4. **Personal Property Used by an Employee** Personal property used by an employee for work is excluded from resources. Excluded items include tools, safety equipment, uniforms, etc.

- B. Development and Documentation--General** The rules in C., D., and E. below apply unless development can be eliminated in accordance with S1130.500 C.

C. Development and Documentation -- Property Used in a Trade or Business

1. **Trade or Business Not Being Excluded** When an individual alleges owning trade or business property not already being excluded, consider if a valid trade or business exists, and if the property is in current use (see S1130.504). Obtain a statement giving the information below. Absent evidence to the contrary, accept the responses to items a.-d. Verify e. with the business tax returns.
 - a. a description of the trade or business;
 - b. a description of the assets of the trade or business;
 - c. the number of years it has been operating (see 4. below);
 - d. the identity of any co-owners;
 - e. the estimated gross and net earnings of the trade or business for the current tax year (see 3. below).

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.501	Page 51

2. **Redetermination of Excluded Trade or Business Property**
Consider current use of the property in the trade or business. Obtain and verify the individual's allegations as to the estimated gross and net earnings of the trade or business for the current tax year for income purposes (see S0820.230).
3. **Use of Tax Returns**
 - a. **Use Most Recent Tax Return**
Obtain a copy of the business tax return (i.e., Form 1040 and the appropriate schedules) for the tax year prior to the application or redetermination. Use the return to determine the net earnings from self-employment and validity of the trade or business. The following can be particularly helpful:
 - Schedule C, Profit or Loss from Business or Profession;
 - Schedule SE, Computation of Social Security Self-Employment;
 - Schedule F, Farm Income and Expenses;
 - Form 4562, Depreciation and Amortization; and
 - Form 1065, U.S. Partnership Return of Income.
 - b. **Current Tax Return Not Available**
If the current tax return is not available, obtain a copy of the latest tax return available.
4. **Questionable Trade or Business**
If a trade or business has operated a year or less, or there is a question of bona fides, develop to determine whether a trade or business actually exists.
5. **Liquid Resources Used in a Trade or Business**
Effective May 1, 1990, all liquid resources used in the operation of a trade or business are excluded as property essential to self-support. Obtain an individual's signed allegation that liquid resources are used in the trade or business.

D. Development and Documentation Government Permits

1. **Individual's Statement**
Permit Alleged
If an individual alleges owning a government license, permit, or other property that represents government authority to engage in an income producing activity, and that has value as a resource, obtain his or her signed statement as to:
 - the type of license, permit or other property;
 - the name of the issuing agency, if appropriate;
 - whether the law requires such license, permit, or property for engaging in the income producing activity at issue; and
 - how the license, permit, or other property is being used; or
 - if it is not being used, why not.

If the property is not being used, see S1130.504 for development.
2. **Supporting Evidence**
Have the individual submit a copy of the license, permit and/or other pertinent documents. For example, an individual engaged in fishing in Alaska would have to have a permit. In North Carolina, a person growing flue-cured tobacco would

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.501	Page 52

have to have a "marketing sales card" to sell it. If the individual cannot submit the necessary evidence, verify his or her allegations with the issuing agency. Do this by telephone if possible.

3. Common Government Permits

a. Alaska Limited Entry Fishing Permit (ALEFP)

An ALEFP is one of the two most commonly encountered types of property representing required government authority to engage in an income producing activity. Alaska's Commercial Fisheries Entry Commission first issued ALEFP's in 1973 to control commercial salmon fishing. These permits are required for individuals who engage in the fishing trade.

b. Tobacco Crop Allotment (TCA)

The TCA is the other most commonly encountered type of property representing government authority to engage in an income producing activity. It is issued by the U.S. Department of Agriculture's (USDA) Agricultural Stabilization and Conservation Services. It is required for the growing and selling of flue-cured tobacco, which is grown mostly in the southeastern United States. Do not confuse a TCA with a price support or subsidy, or a soil bank program.

Exclude a TCA only when the grower who has it is restricted to growing a certain quantity of the crop.

c. Tobacco Quota Buy-Out Program

The Tobacco Quota Buy-Out Program is administered by the USDA. The program involves a contract between the USDA and the land owner and/or the producer (the individual, other than the land owner, who grows the crop) and provides payments to the land owner and/or producer for their tobacco "base" or quotas. The unpaid balance of the contract is a countable resource.

E. Development and Documentation -- Personal Property Used by an Employee

1. Individual's Statement

If an individual alleges owning items that are used in his or her work as an employee, obtain his or her statement to include:

- the name, address, and telephone number of the employer;
- a general description of the items;
- a general description of his or her duties; and
- whether the items are currently being used.

If the individual is temporarily not working (e.g., job loss, seasonal employment), or the property is not otherwise in current use, see S1130.504.

2. Supporting Evidence

Absent evidence to the contrary, accept the individual's statement.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.502	Page 53

S1130.502 ESSENTIAL PROPERTY EXCLUDED UP TO \$6,000 EQUITY REGARDLESS OF RATE OF RETURN

A. Policy Principles

1. The Exclusion

Up to \$6,000 of the equity value of nonbusiness property used to produce goods or services essential to daily activities is excluded from resources.

- CMV less balance of any recorded liens against the property

There is no requirement that the property produce a certain rate of return. The property must be in current use or, if it is not in use for reasons beyond the individual's control, there must be a reasonable expectation that the required use will resume.

2. Equity Exceeds \$6,000

Any portion of the property's equity value in excess of \$6,000 is not excluded under this provision.

3. Nonbusiness Property Producing Essential Goods or Services

Nonbusiness property essential to self-support can be real or personal property. It produces goods or services essential to daily activities if, for example, it is used to:

- grow produce or livestock solely for personal consumption in the individual's household; or
- perform activities essential to the production of food solely for home consumption.

NOTE: While this category of property may encompass a vehicle used solely in a nonbusiness self-support activity (e.g., a garden tractor, or a boat used for subsistence, fishing), it does not include any vehicle that qualifies as an automobile (see S1130.200 A.).

B. Development and Documentation--Initial Applications and Posteligibility

1. Individual's Statement

When an individual alleges owning property that he or she uses to produce goods or services necessary for daily activities, obtain his or her statement giving:

- a description of the property;
- how it is used; and
- an estimate of its CMV and any encumbrances on it.

Absent evidence to the contrary, accept the statement.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.503	Page 54

2. Supporting Evidence of Value

a. Real Property

Determine the CMV and, if necessary, the EV of real property in accordance with S1140.100.

b. Personal Property

Have the individual obtain a CMV estimate from a knowledgeable source. The estimate must:

clearly identify the source;
contain a description of the item whose CMV is being estimated; and
show the basis for the estimate.

NOTE: If a knowledgeable source provides a value range, use the lower edge of the range.

3. Current Use Criterion

If the property is not in current use, see S1130.504 for development.

S1130.503 ESSENTIAL PROPERTY EXCLUDED UP TO \$6,000 EQUITY IF IT PRODUCES A 6 PERCENT RATE OF RETURN

A. Policy Principles

1. The Exclusion

Up to \$6,000 of the equity value of nonbusiness income producing property (and business income producing property for months of eligibility before May 1, 1990) can be excluded from resources if the property produces a net annual return equal to at least 6% of the excluded equity.

2. Equity Exceeds \$6,000

Any portion of the property's equity value in excess of \$6,000 is not excluded under this provision.

3. Rate of Return Less Than 6%

If the property produces less than 6% return, the exclusion can apply only if:

- the lower return is for reasons beyond the individual's control (e.g., crop failure or illness); and
- there is a reasonable expectation that the property will again produce 6% return (see C. below).

Otherwise, none of the EV is excluded under this provision.

4. More Than One Income Producing Property

If an individual owns more than one piece of income producing property;

- the 6% return requirement applies individually to each; and
- the \$6,000 EV limit applies to the total EV of all the properties meeting the 6% return requirement.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2017
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.420	Page 55

If all properties meet the 6% test but the total EV exceeds \$6,000, that portion of the total EV in excess of \$6,000 is not excluded under this provision.

B. Examples

- 1. Rental Property With an EV in Excess of \$6,000**

At redetermination, Mr. Cameron states that he now lives in an apartment and is renting out his formerly excluded home, which has an EV of \$10,000. Even if the property produces a 6% rate of return, \$4,000 of its equity cannot be excluded under this provision.
- 2. Multiple Income Producing Activities**

Mr. Patterson owns a mobile home (not his residence) that has a CMV and EV of \$3,000. He owns other property that has a CMV and EV of \$2,000. The mobile home produces a net annual rental income of \$750, and the other property produces less than \$50 a year.

Since the mobile home produces more than a 6% return, its EV is excluded. Since the other property produces less than a 6% return, its EV is not excluded.

C. Operating Policy— Time Limit for Resumption of 6% Return

- 1. General Rule**

If the earnings decline was for reasons beyond the individual's control, up to 24 months can be allowed for the property to resume producing a 6% return. The 24 month period begins with the first day of the tax year following the one in which the return dropped to below 6%. See E. below for development.
- 2. Initial Applications**

In an initial application, if the tax returns show that the activity has operated at a loss for the two most recent years or longer, the property cannot be excluded unless the individual submits current receipts and records to show that it currently is producing a 6% return.
- 3. Trade or Business in Operation for One Year or Less**

If a trade or business has operated for a year or less, develop to determine whether a trade or business actually exists.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.503	Page 56

**D. Development and Documentation—
Non-business
Property**

**1. Income
Producing Real
Property**

a. Individual's Statement

When an individual alleges owning non-business real property that produces income (e.g. land or house for rent), obtain his or her signed statement concerning:

- the number of years he has owned the property;
- any co-owners of the property'
- a description of the property'
- the estimated CMV of the property and any encumbrances on it; and
- the estimated net and gross income from the property for the current tax year.

b. Supporting Evidence

Absent evidence to the contrary, accept the statement with respect to years of ownership, identity of owners and description of the property.

Determine the rate of return based on income and value figures shown on the individual's Schedule E (Supplemental Income Schedule) of Form 1040 for the year prior to filing of the Medicaid application. If no tax return is available, obtain other appropriate evidence from the individual (e.g. a copy of the lease agreement for the period in question). If it is necessary to verify EV, see S1140.042.

NOTE: When redetermining the status of property already excluded under this provision, only the value and income need to be redeveloped.

**2. Income
Producing
Personal
Property**

See S1130.502 B. for development of the property's use and value. In addition, obtain the individual's statement giving net and gross income from the property for the current tax year. Verify the property's rate of return by reviewing a copy of Schedule E of Form 1040 for the tax year prior to filing or redetermination. If no tax return is available, obtain the appropriate evidence from the individual to establish the income alleged.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.503	Page 57

**E. Development and Documentation--
Rate of Return Less Than 6%**

Apply these instructions in determining the excludability of nonbusiness income producing property (and business property for periods before May 1, 1990) when the tax return shows an earnings rate of less than 6%.

1. Individual's Explanation

Record the individual's explanation of the earnings decline in the file.

2. Supporting Evidence

Obtain evidence of prior years' earnings (e.g., tax returns for at least 2 years prior to the current tax year) to determine whether the activity has produced a 6% rate of return before.

NOTE: When no tax returns are available, use other evidence such as receipts, check registers, invoices, sales slips, bank statements, etc.

3. Circumstances Beyond The Individual's Control

a. Special Review

If evidence establishes that the earnings decline is for reasons beyond the individual's control, he or she has up to 24 months from the end of the tax year in which the earnings went below 6% to meet the 6% requirement. Set a special review to check progress after 12 months.

b. 12-Month Follow-up

If the 12-month follow-up shows that the activity is again producing a 6% return, further follow-up is necessary.

If the activity still is not producing 6% return but the individual is actively pursuing it, allow an additional 12 months.

If the individual has ceased actively pursuing the activity, include the value of the property in determining resources for the month after the month of review.

c. 24-Month Period Ends

If the property still is not producing a 6% return, include the value of the property in determining resources for the month following the month in which the 24-month period ends.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.504	Page 58

S1130.504 ESSENTIAL PROPERTY--CURRENT USE CRITERION

A. Policy Principle

Property, including property used by an individual as an employee, must be in current use in the type of activity that qualifies it as essential to be excluded as essential to self-support. Current use is evaluated on a monthly basis. Property not in current use can be excluded as essential to self-support only if:

- it has been in use; and
- there is a reasonable expectation that the use will resume.

B. Policy--Time Limit for Resumption of Use

1. 12-Month Rule

Resumption of use must be expected within 12 months of last use. For example, if property was last used in October, resumption of use must reasonably be expected to occur before the end of the following October.

2. 12-Month Extension

The 12-month period can be extended for an additional 12 months if nonuse is due to a disabling condition (see D. below).

C. Procedure--General

1. Individual's Statement

If property is not in current use, obtain the individual's signed statement as to:

- the date of last use;
- the reason(s) the property is not in use; and
- when the individual expects to resume the self-support activity, if at all.

2. Explanation to Individual

Explain that we can exclude the property for up to 12 months if resumption of the self-support activity can reasonably be expected to occur within that time.

3. No Intent to Resume Activity

If the individual does not intend to resume the self-support activity, the property is a countable resource for the month after the month of last use. However, see 5. below.

4. Intent To Resume Activity

a. Special Review Set

If the individual intends to resume use of the property, prepare a special review for 12 months from the date of last use.

b. Special Review Evaluation

In the month of special review, contact the individual to see whether he or she has resumed use of the property. If not, the property is a countable resource for the month after the month in which the 12-month period expired.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2008
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.510	Page 59

5. Change of Intent

If, after property has been excluded because an individual intends to resume self-support activity, the individual decides not to resume such activity, the exclusion ceases to apply as of the date of the change of intent. Thus, unless excluded under another provision, the property is a resource for the following month.

**D. Procedure --
Disabling
Condition**

1. Individual's Statement

If an individual alleges that self-support property is not in current use because of a disabling condition, obtain the individual's signed statement as to:

- the nature of the condition;
- the date he or she ceased the self-support activity; and
- when he or she intends to resume the activity, if at all.

2. Special Review

Prepare a special review as to whether up to an additional 12 months will be allowed for resuming use of the property.

NOTE: Medical review is not an indicator of an individual's intent or ability to do at least some work.

S1130.510 RESOURCES SET ASIDE AS PART OF A PLAN FOR ACHIEVING SELF-SUPPORT

A. Introduction

A plan for achieving self-support (PASS) allows blind and disabled (but not aged) individuals to set aside income and/or resources necessary for the achievement of its goals.

B. Policy Principle

Resources set aside as part of an approved PASS are excluded.

C. Development and Documentation

PASS resources are determined by SSI. See *M0810.430* for additional information about PASS.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date Jul 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.520	Page 60

M1130.520 TRUSTS ESTABLISHED BETWEEN JULY 1, 1993 AND AUGUST 10, 1993

A. Introduction

Trusts established between July 1, 1993 and August 10, 1993 can have up to \$25,000 disregarded from countable resources.

B. Definitions

1. MQT

A trust or similar legal device (SLD) is a legal instrument established other than by a will which:

Is established by an individual or spouse (also includes trusts established by a guardian or representative payee for an incompetent adult or any child);
The individual may be beneficiary of all or part of the funds;
Is either revocable or irrevocable;
Trustees have discretion (whether or not the discretion is actually exercised) in distributing funds to the beneficiary;
May or may not be established for purposes other than to enable the beneficiary to qualify for medical assistance.

2. "SLD"

An "SLD" is a legal instrument:

Under which the individual transfers or surrenders property to another individual;
In which a second individual has legal responsibility to manage the property for the first individual;
Which can include oral trusts, constructive trusts, and trusts created in law, in addition to trusts created by a written legal document; and
Which may not be labeled a "trust" but seems to meet all of the MQT criteria listed above.

C. Policy

Some trusts have provisions which place limits on the discretion of the trustee either directly or indirectly to make payments from the trust to the grantor when the grantor makes a Medicaid application, or requires medical, hospital, or long-term care services. **Any restricting clauses in trusts created after July 1, 1993, are void if they limit the discretion of the trustee when the grantor applies for Medicaid or needs medical, hospital, or long-term care services.**

1. Trusts Less Than \$25,000

Trust(s) Less than \$25,000 created after July 1, 1993 and before August 11, 1993

None of the principle is counted as a resource for single or multiple trusts created after July 1, 1993 and before August 11, 1993 when corpus or corpora **is less than \$25,000**. The maximum **amount** of income payable from the trust according to its terms is considered available income whether or not it is actually paid to the applicant or recipient.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.520	Page 61

2. Trusts Greater Than \$25,000

Trust(s) Greater than \$25,000 created after July 1, 1993 and before August 11, 1993

A single trust or multiple trust created after July 1, 1993 and before August 11, 1993, when the corpus or corpora is more than \$25,000, may have partial exclusion of the corpus.

D. Development/Documentation

1. Verify Trust(s)

- **Obtain copy of trust(s) document(s).**
- **Verify current value of the corpus or corpora of the trust(s).**

2. Apply Disregard

- a. Prorate \$25,000 by the number of trusts**
- b. Subtract prorated amount from corpus or corpora of the trust(s).**

3. Countable Resource

The remainder of the corpus or corpora of the trust(s)

- that may be paid under the terms of the trust
- without any limits imposed by **any** void restrictive clause
- is counted as an available resource to the applicant or recipient regardless of whether or not:
- the trust is irrevocable; or
- the trust was established for purposes other than to make the individual eligible for Medicaid; or
- the trustee exercises his discretion to distribute trust payments to the applicant/recipient.

E. References

Trusts Created After July 1, 1993 and Before August 11, 1993 with Corpus in Excess of \$25,000, M1140.403.

Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.601	Page 62

RETAINED CASH AND IN-KIND PAYMENTS

S1130.600 RETROACTIVE SSI AND SS PAYMENTS

A. Definitions

- 1. Retroactive SSI Benefits** Retroactive SSI benefits -- which include any federally administered State supplementation -- are SSI benefits issued in any month after the calendar month for which they are paid. Thus, benefits for January that are issued in February are retroactive.
- 2. Retroactive SS Benefits** Retroactive SS benefits are those issued in any month that is more than a month after the calendar month for which they are paid. Therefore, SS benefits for January that are issued in February are not retroactive, but SS benefits for January that are issued in March are retroactive.

B. Policy Principles

- 1. 9-Month Exclusion** The unspent portion of retroactive SSI and SS benefits received on or after 11/01/05 is excluded from resources for the nine (9) calendar months following the month in which the individual receives the benefits.
- 2. 6-Month Exclusion** The unspent portion of retroactive SSI and SS benefits received before 11/01/05 is excluded from resources for the six (6) calendar months following the month in which the individual receives the benefits.

C. Related Policies

- 1. Interest** Interest earned by funds excluded under this provision is not excluded from income under this provision. Develop interest per S0830.500.
- 2. Commingled Funds** See S1130.700 if excluded funds have been commingled with other funds.

S1130.601 DEDICATED ACCOUNTS FOR PAST-DUE BENEFITS DUE TO INDIVIDUALS UNDER 18 WHO HAVE A REPRESENTATIVE PAYEE

A. Background and Definitions

*Section 213 of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, P.L. 104-193, enacted August 22, 1996, requires that when an eligible individual under age 18 is eligible for past-due Supplemental Security Income (SSI) monthly benefits which exceeds the amount specified in SSI policy, the representative payee **must** establish a dedicated account in a financial institution into which the past-due benefits will be paid. Subsequent amounts of past-due benefits that exceed this amount must also be paid into this account.*

- 1. Dedicated Account** *A dedicated account is an account in a financial institution, the sole purpose of which is to receive and maintain SSI past-due benefits which are required or allowed to be paid into such an account and the use of which is restricted by section 1631(a)(2)(F) of the Social Security Act. Funds other than those allowed by SSI policy may not be deposited into a dedicated account.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2013
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.601	Page 62a

2. Past-Due SSI Benefits

Past-due SSI benefits are:

- a. *benefits due but unpaid which accrue prior to the month payment was effectuated;*
- b. *benefits due but unpaid which accrue during a period of suspension for which the recipient was subsequently determined to have been eligible; and*
- c. *any adjustment to benefits which results in an accrual of unpaid benefits.*

B. Policy Principles

1. Resources

Past-due benefits and other underpayments described above deposited into a dedicated financial institution account and any accrued interest or other earnings on such an account are excluded from resources. For any month that funds other than accrued interest or other earnings on the account are commingled in this account, the exclusion does not apply to any funds in the account.

EXCEPTION: *Funds, other than past-due benefits, required by a financial institution to open the dedicated account may be commingled in the account, but only until the end of the month following the month that the past-due benefits are paid. However, these funds other than past-due benefits in the account are **not** excluded from resources.*

2. Interest and Other Earnings

Interest and other earnings (e.g., dividends) earned on and left to accrue in the excluded dedicated account are excluded from income and resources.

3. Exclusion During a Period of SSI Suspension or Termination

Restrictions on the use of funds in a dedicated account continue to apply during a period of suspension of SSI benefits (e.g., status S06), non-pay (e.g., status N04), and eligibility but no payment (status E01). The exclusion from resources of the funds in the account continues to apply during a period of suspension, non-pay, or eligibility but no payment, prior to termination (i.e., the 12 months prior to status T31).

Once an individual's eligibility has been terminated, the exclusion of the funds in a dedicated account cannot be carried over if the individual establishes a new period of SSI eligibility by filing a new application for SSI. Reopening of a prior period of eligibility following termination is not a new period of eligibility and, therefore, the exclusion may be reapplied. Any remaining funds are a countable resource.

4.. Nine (9)-month Exclusion of SSI Underpayments from Resources

*When an individual receives past-due benefits that **may** be, but have not yet been, deposited into a dedicated account, the exclusion in S1130.600 applies for the lesser of 9 months or until the payee deposits the payment into the dedicated account.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2010
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.605	Page 63

S1130.605 NETHERLANDS WUV PAYMENTS TO VICTIMS OF PERSECUTION

A. Background

The Netherlands' Act on Benefits for Victims of Persecution 1940-1945, WUV (Wet Uiterking Vervolgingslachtoffers), provides payments to individuals who, during the German and Japanese occupation of the Netherlands and the Netherlands East Indies (now the Republic of Indonesia), were victims of persecution during World War II because of their race, religion, belief or homosexuality and, as a result of that persecution presently are suffering from illnesses or disabilities. There are 4 types of payments available to individuals who meet the eligibility rules for payment under the WUV program--periodical income, NMIK (compensation for non-definable disability expenses), reimbursements of persecution-related disability expenses and partial compensation for persecution related disability expenses.

B. Policy

1. The Resource Exclusion

Unspent WUV payments made by the Dutch government are excluded from resources.

2. Interest on Unspent Payments

Interest earned on unspent WUV payments *prior to July 1, 2004* is not excluded from income or resources. *Interest earned on unspent WUV payments on or after July 1, 2004 is excluded from income and resources* (See S0830.500 for development.)

C. Procedure

1. When to Develop

When an individual would otherwise be ineligible due to excess resources, determine if applying this exclusion would permit eligibility. If the exclusion would permit eligibility, develop per 2. below.

NOTE: If the individual is resources-eligible even without the application of this exclusion, it is not necessary to develop under this section.

2. Development and Documentation

If an individual alleges that his/her resources include unspent Netherlands WUV payments:

- a. Using the documents in the individual's possession, document the date(s), and amount(s) of such payment(s). If the individual has no documentation or it is incomplete, contact the Consulate General of the Netherlands to verify payment date(s) and amount(s). See S0830.725C. for the address and phone number. If the individual has no documentation and the Consulate General of the Netherlands is unable to provide the information, then accept the individual's signed allegation of the amount(s) and the date(s) of receipt.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2010
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.610	Page 64

- b. Obtain a statement as to the date(s) and amount(s) of any account deposits corresponding to the payments; and
- c. Document the case record that the individual's resources include unspent WUV payments that are excludable.

D. References

Excluded funds commingled with nonexcluded funds, S1130.700
Income exclusion, Netherlands WUV payments, S0830.725

S1130.610 GERMAN REPARATIONS PAYMENTS**A. Introduction**

"German reparations payments" are made to certain survivors of the Holocaust under the Federal Republic of Germany's Law for Compensation of National Socialist Persecution, or German Restitution Act. These payments may be made periodically or in a lump sum.

B. Policy**1. The Exclusion**

Unspent German reparations payments are excluded from resources. The exclusion applies only if it would affect eligibility for Medicaid.

2. Interest on Unspent Payments

Interest earned on unspent German reparations payments prior to July 1, 2004 is not excluded from income or resources. Interest earned on unspent German reparation payments on or after July 1, 2004 is excluded from income and resources.

C. References

Excluded funds have been commingled with other funds, S1130.700.
Interest earned by conserved German reparations payments is not excluded from income by this provision, S0830.260.
The exclusion of German reparations payments from income, S0830.710.

D. Development and Documentation-- Initial Application

If an individual alleges that his or her resources include German reparations payments, obtain a statement to:

the date(s) and amount(s) of such payment(s); and
the date(s) and amount(s) of any corresponding account deposit(s).

Absent evidence to the contrary, accept the allegation.

E. Development and Documentation-- Posteligibility

The redetermination development for German reparations payments is the same as the initial application development.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2010
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.615	Page 65

S1130.615 AUSTRIAN SOCIAL INSURANCE PAYMENTS

A. Background

The nationwide class action law suit, *Bondy v. Sullivan*, involved Austrian social insurance payments which were based, in whole or in part, on wage credits granted under Paragraphs 500-506 of the Austrian General Social Insurance Act. These paragraphs grant credits to individuals who suffered a loss (i.e., were imprisoned, unemployed, or forced to flee Austria) during the period of March 1933 to May 1945 for political, religious, or ethnic reasons. Not all Austrian social insurance payments are based on Paragraphs 500-506.

B. Policy

1. The Resource Exclusion

Unspent Austrian social insurance payments based, in whole or in part, on wage credits granted under Paragraphs 500-506 of the Austrian General Social Insurance Act are excluded from resources.

Austrian social insurance payments **not** based on wage credits granted under Paragraphs 500-506 are **not** excluded from resources under this provision.

2. Interest On Unspent Payments

Interest earned on unspent Austrian social insurance payments *prior to July 1, 2004 is not excluded from income or resources. Interest earned on unspent Austrian social insurance payments on or after July 1, 2004 is excluded from income and resources.*

C. Procedure--Initial Applications and Posteligibility

1. When to Develop

When an individual would otherwise be ineligible due to excess resources, determine if applying this exclusion would permit eligibility. If the exclusion would permit eligibility, develop per 2. below.

If the individual is resources-eligible even without the application of this exclusion, it is not necessary to develop under this section.

2. Development and Documentation

If an individual alleges that his or her resources include unspent Austrian social insurance payments:

- a. Determine whether the payments are counted as income, per S0830.715.

If the payments **are** counted as income, this resource exclusion does **not** apply. If the payments are **not** counted as income, go to b.

- b. Obtain a signed statement from the individual as to the date(s) and amount(s) of any account deposits corresponding to the Austrian social insurance payments. Apply the policy in B. above and exclude the unspent payments from the determination of countable resources.

D. References

Excluded funds commingled with nonexcluded funds, S1130.700
Income exclusion, Austrian social insurance payments, S0830.715

Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.620	Page 66

S1130.620 DISASTER ASSISTANCE

A. Policy

1. **The Exclusion-December 1, 1988 and Continuing**
 Unspent assistance received from the following sources is permanently excluded from resources:
 the Disaster Relief and Emergency Assistance Act (P.L. 100-707);
 - another Federal statute because of a presidentially-declared major disaster;
 - comparable assistance received from a State or local government; or
 - from a disaster assistance organization.
 To be excluded from resources, the funds must be excludable from income per S0830.620.
2. **Interest on Excluded Funds**
 Interest earned on funds excluded under this provision is excluded from income and from resources. (For months prior to December 1988, interest was excluded from income and resources for as long as the funds themselves were excluded.)

B. Procedure

1. **When to Develop**
 Develop this exclusion only when an individual alleges the receipt of assistance excludable under this provision and the exclusion would permit eligibility.
2. **Evidence of Excludability**
 Follow the instructions in S0830.620. If the file contains evidence that the disaster assistance is excluded from income, use the same evidence to establish that the assistance is excluded from resources.
3. **Document the Determination**
 Summarize the basis for the exclusion in the case record. Show the amount excluded and the first month and year that the exclusion applies.

S1130.630 CASH AND IN-KIND ITEMS RECEIVED FOR THE REPAIR OR REPLACEMENT OF LOST, DAMAGED, OR STOLEN EXCLUDED RESOURCES

A. Policy-Time Periods

1. The Policy

Cash and in-kind receipts (ISM or other) from any source for the replacement or repair of lost, damaged, or stolen excluded resources are themselves not treated as resources for 9 months from the date of their receipt.

2. Extension for Good Cause

a. General

For cash receipts, the initial 9 month period can be extended for a reasonable period up to an additional 9 months if the individual shows good cause why repair or replacement was not possible during the first 9 months.

b. Definition-Good Cause

Good cause is present if circumstance beyond the individual's control:

- prevent repair or replacement of the lost, damaged, or stolen property; or
- keep the individual from contracting for such repair or replacement.

c. Victims of Hurricane Andrew

Effective March 17, 1994, for victims of Hurricane Andrew only (which occurred in August 1992 and affected South Florida and Louisiana), the period within which the cash or in-kind replacement is not treated as resources can be extended for up to an additional 12 months beyond the 9-month extension in a. above if the individual continues to show good cause.

NOTE: The total exclusion period for victims of Hurricane Andrew cannot exceed 30 months (9-month initial period, 9-month good cause extension period, additional 12-month good cause extension).

B. Policy-Funds Not Treated as Resources

1. Funds Subject to Policy

There are no restrictions on where cash and/or in-kind items come from for purpose of this policy (e.g., it may come from an insurance company, a Federal or State agency, a public or private organization, or an individual).

However, funds received from the following sources are to be excluded in accordance with S1130.620 rather than these instruction:

- the Disaster Relief and Emergency Assistance Act;
- some other Federal statute because of a presidentially declared major disaster,
- comparable assistance received from a state or local government; or
- a disaster assistance organization.

(See S0830.620 for income treatment)

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.630	Page 68

2. Interest on Funds Not Treated as Resources Interest earned by funds not treated as resources under this provision is not treated as income and resources for the period during which the funds themselves are not considered resources.

3. Funds for Temporary Housing This policy applies to funds received for the purchase of temporary housing.

4. Personal Injury Payments This policy does not apply to funds received on account of personal injury.

C. Policy-Intended Use

- 1. During First 9 Months** What the individual intends to do with the funds does not affect their treatment for the first 9 months.
- 2. Role in Extension for Good Cause** An individual cannot qualify for an extension of the initial 9-month period unless he/she intends to use the funds for their designated purpose, i.e., repair or replacement of excluded resources.
- 3. Change of Intent During Extension** The good cause extension will terminate as of the date of the change of intent. The funds previously not treated as resources will be taken into account in determining resources for the following month.

D. Procedure

- 1. When to Develop** When an individual would otherwise be ineligible due to excess resources, determine if applying this policy would permit eligibility. If the policy would permit eligibility, develop per the following instructions.

Note: If the individual is resources-eligible even without the application of this policy, it is not necessary to develop under this section.

- 2. Evidence**
 - a. General**

Make sure the evidence show the source, value, date(s), and intended purpose of the items received, including whether any cash received is for a purpose other than the replacement or repair of the lost, damaged, or stolen (and excluded) resource.

b. Individual's Records

Obtain a copy of any evidence the individual has.

c. Verification from Source

If the individual cannot provide evidence that suffices for a determination, obtain the necessary information from the source of the payment(s). Do so by telephone, if possible.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.630	Page 69

3. Recontact**a. Initial 9-Month Period**

Contact the individual at least 30 days before the initial 9-month period expires to determine if a good cause extension is necessary and if the individual qualifies for the extension.

b. Victims of Hurricane Andrew

For victims of Hurricane Andrew only, recontact the individual at least 30 days before the expiration of the 9-month extension, if applicable, to determine if an additional extension is needed.

If, after the 9-month extension for good cause, you grant an additional extension under the Hurricane Andrew provision and that extension is:.

- for 6 months or less: Review at least 30 days before the extension period expires to determine if continuation of the good cause extension is warranted.
- in excess of 6 months: At the mid-point of the extension period recontact the individual.

4. Recontact Evidence Requirements

- a. Obtain evidence of the amount of payment(s) not treated as resources that are still unspent.
- b. If payment(s) remain unspent, but the individual alleges:
 - good cause (see A.2. above); and
 - the intent to use the funds for their designated repairs or replacement;

obtain his/her signed statement regarding intent. Also have the individual submit evidence to substantiate the allegation of good cause, e.g., letters from contractors, etc.)

5. Determination**a. No Extension for Good Cause**

If the evidence does not establish good cause, include the unspent payment(s) in determining countable resources as of the first moment of the first month after the month in which the policy is no longer applicable.

b. Extension

If such evidence shows good cause, discuss with the individual how much additional time is needed and why. On the basis of that discussion, extend the initial 9-month period for a reasonable period up to an additional 9 months (plus up to an additional 12 months in the case of victims of Hurricane Andrew), repeating development steps 3. and 4. above, as appropriate.

S1130.640 BENEFITS EXCLUDED FROM BOTH INCOME AND RESOURCES BY A FEDERAL STATUTE OTHER THAN TITLE XVI

- A. Introduction** Many Medicaid income and resource exclusions are specified by Federal statutes other than title XVI.
- B. Procedure** See S0830.099 for a list of exclusions and a guide to instructions about exclusions specified by other Federal statutes. Follow those instructions.
- C. Reference** Funds excluded by other statutes are commingled with other funds, see S1130.700.

S1130.660 AGENT ORANGE SETTLEMENT PAYMENTS

- A. Background** See S0830.730.
- B. Policy -The Exclusion** Unspent Agent Orange settlement payments are excluded from resources.
- C. Policy-Applicability** The exclusion applies only if it would permit eligibility.
- D. Policy - General**
- 1. Income Exclusion** See S0830.730.
 - 2. Interest on Unspent Payments** Interest earned *on unspent* Agent Orange settlement payments *prior to July 1, 2004* is not excluded *from income or resources*. Interest earned *on unspent Agent Orange settlement payments on or after July 1, 2004* is excluded *from income and resources*. See S0830.500 for development.
 - 3. Commingled Funds** See S1130.700.
- E. Development and Documentation -- Initial Applications**
- If an individual alleges that his or her resources include unspent Agent Orange settlement payments:
- verify the date(s) and amount(s) of such payment(s) in accordance with S0830.730; and
 - obtain a statement as to the date(s) and amount(s) of any account deposits corresponding to the payments.
- Absent evidence to the contrary, accept the allegation regarding deposits.
- F. Development and Documentation --- Post Eligibility**
- The redetermination development for Agent Orange payments is the same as the initial applications development.

S1130.665 VICTIM'S COMPENSATION PAYMENTS

A. Policy

- 1. The Exclusion** Effective for resource determination made for the month of May 1991 and any subsequent months, unspent payments received from a fund established by a State to aid victims of crime are excluded from resources for 9 months.

To be excluded from resources under this provision, the individual must demonstrate that the payment was compensation for expenses incurred or losses suffered as the result of crime.

- 2. Interest on Unspent Payments** Interest earned on unspent victim's compensation payments is **not** excluded from income or resources by this provision (S0830.500).

B. Procedure--Initial Claims and Post-Eligibility

- 1. When to Develop** Develop this exclusion only when an individual alleges the receipt of compensation excludable under this provision and the exclusion would permit eligibility.

- 2. Development and Documentation** If an individual alleges that his or her resources include unspent victim's compensation payments, ask the individual to submit evidence that:

- verifies the source, date(s), and amount(s) of such payment(s); and
- establishes that the payment was paid as compensation for expenses incurred or losses suffered as the result of a crime.

Obtain a statement as to the date(s) and amount(s) or any account deposits corresponding to the victim's compensation payment(s).
Assist the individual as necessary.

- 3. Acceptable Evidence** Accept the following as evidence establishing that the payment was paid for expenses incurred or losses suffered as the result of a crime:

- a letter or check stub accompanying the payment indicating the reason for the payment;
- a subsequent letter requested by the claimant/recipient to clarify the reason for the payment; or
- any other document indicating the reason for the payment.

If the individual is unable to submit acceptable evidence, attempt to obtain the needed information over the phone through a contact with the agency that issued the victims' compensation payment.

S1130.670 RELOCATION ASSISTANCE PAYMENTS

A. Policy --Federal Relocation Assistance

1. The Exclusion

Relocation assistance is provided to persons displaced by projects which acquire real property. Federal relocation assistance provided under title II of the Uniform Relocation Assistance and Real Property Acquisitions Policies Act of 1970 (subchapter II, chapter 61, title 42 of the U.S. Code) is excluded from resources. Unlike state or local, there is no time limit on the exclusion for federal relocation assistance (see B.1. below). To be excluded under this provision, the payments must be of the type described in S0830.655B.

2. Interest on Unspent Payments

Interest earned on unspent relocation assistance payments is **not** excluded from income or resources by this provision (S0830.500).

B. Policy -- State or Local Relocation Assistance

1. The Exclusion

Effective for resource determinations made for the month of May 1991 and subsequent months, unspent relocation assistance payments from a State or local government are excluded from resources for 9 months.

To be excluded from resources under this provision, the payments must be of the type described in S0830.655C.

2. Payments Received Prior to May 1991

Payments received in August 1990 through April 1991 also can be excluded from resources under this provision beginning in May 1991. The payments can be excluded only for the number of months that remain in the 9-month period following the month of receipt as of May 1991.

EXAMPLE: The 9-month period for a relocation assistance payment received in January 1991 would be February through October 1991. However, the payment may be excluded from resources only for the months of May through October 1991.

3. Interest on Unspent Payments

Interest earned on unspent relocation assistance payments is **not** excluded from income or resources by this provision (S0830.500).

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2021
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.675	Page 73

C. Procedure -- Initial Applications and Posteligibility

- 1. When to Develop** When an individual would otherwise be ineligible due to excess resources, determine if applying this exclusion would permit eligibility. If the exclusion would permit eligibility, develop per 2. below.

NOTE: If the individual is resources-eligible even without the application of this exclusion, it is not necessary to develop under this section.

- 2. Development and Documentation** If an individual alleges that his/her resources include unspent relocation assistance payments:
- follow the procedures in S0830.655D.;
 - document the date(s), type(s) and amount(s) of such payments(s); and
 - obtain a statement as to the date(s) and amount(s) of any account deposits corresponding to the payments.

- D. References** Commingled funds, S1130.700.

M1130.675 TAX ADVANCES, REFUNDS AND REBATES RELATED TO EARNED INCOME TAX CREDITS AND *COVID-19* RELIEF

A. Policy

- 1. EITC Related Refunds** Effective with resource determinations made for the month of January 1991, an unspent Federal tax refund or payment made by an employer related to Earned Income Tax Credits (EITC's) is excluded from resources **only for the month following the month** the refund or payment is received.

Interest earned on unspent tax refunds related to EITC's is **not** excluded from income or resources by this provision (S0830.500).

- 2. *COVID-19* Relief Payments** *COVID-19 relief payments provided under federal law* are **not** counted as resources for **12 months following the month** of receipt.

Interest earned on unspent *COVID-19 relief payments* is **not** excluded from income or resources by this provision (S0830.500).

B. Procedure--Initial Claims and Post-Eligibility

- 1. When to Develop** Develop these exclusions only when an individual alleges the receipt of assistance excludable under this provision and the exclusion would permit eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2021
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.678	Page 74

2. Development and Documentation

If an individual alleges that his or her resources include unspent EITC and/or *COVID-19 relief* refunds or payments:

- verify the source, date(s), and amount(s) of such refund(s) or payment(s) in accordance with S0820.400, and
- obtain a statement as to the date(s) and amount(s) of any account deposits corresponding to the EITC and/or *CARES Act* refunds or payments.

S1130.678 INDIVIDUAL DEVELOPMENT ACCOUNTS – TANF FUNDED

A. Background

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 authorized states to use money from their Temporary Assistance for Needy Families (TANF) grant to fund Individual Development Accounts (IDAs). The Acts of Assembly of 2020, Special Session I allocated funding for the establishment of IDA accounts for Virginia TANF participants, effective July 1, 2021.

An IDA is a special bank account that helps an individual save for his/her education, the purchase of a first home, or to start a business. The individual uses earnings from their work to set up an approved bank account for an IDA and contributes money from their earnings to the IDA. The TANF program matches the contributions to the IDA. The matching money helps the individual reach his/her goal sooner.

B. Policy

1. Contributions

An individual's contributions that are deposited in a TANF IDA are excluded from resources.

2. Matching Funds

Any matching funds that are deposited in a TANF IDA are excluded from resources.

3. Interest

Any interest earned on the individual's contributions and matching funds that are deposited in a TANF IDA is excluded from resources.

C. Procedures

1. How To Verify TANF IDAs

Whenever possible, verify the individual's TANF IDA through available case records. If the TANF IDA cannot be verified through the case record, obtain verification from the individual that the account is a TANF IDA.

2. After TANF Eligibility Ends

The treatment of an IDA after an individual's TANF eligibility ends or after an individual moves from one state to another can vary from state to state. Check with the TANF Program in the appropriate state regarding whether an account stops being an IDA after TANF eligibility ends or an interstate move occurs, and how to treat funds that remain in the account and withdrawals from the account after TANF eligibility ends or an interstate move occurs.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2021
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.678	Page 74a

S1130.680 RADIATION EXPOSURE COMPENSATION TRUST FUND PAYMENTS

A. Background

Fallout emitted during the U.S. Government's atmospheric nuclear testing in Nevada during the 1950's and during a brief period in 1962 exposed some individuals to doses of radiation that put their health at risk. In addition, some individuals employed in uranium mines during the period January 1, 1947 to December 31, 1971 were exposed to large doses of radiation. Public Law 101-426 created the Radiation Exposure Compensation Trust Fund (RECTF) and authorizes the Department of Justice (DOJ) to make compensation payments to individuals (or their survivors) who were found to have contracted certain diseases after exposure. The payments will be made as a one-time lump sum. Generally, the exposure occurred in parts of Arizona, Colorado, Nevada, New Mexico, Utah, and Wyoming.

B. Policy

1. Resource Exclusion

Unspent payments received from the RECTF are excluded from resources.

2. Interest On Unspent RECTF Payments

Interest earned on unspent RECTF payments prior to July 1, 2004 is not excluded from income or resources. Interest earned on unspent RECTF payments on or after July 1, 2004 is excluded from income and resources.

C. Procedure

1. When to Develop

When an individual would otherwise be ineligible due to excess resources, determine if applying this exclusion would permit eligibility.

If the exclusion would permit eligibility, develop per 2. below.

NOTE: If the individual is resources-eligible even without the application of this exclusion, it is not necessary to develop under this section.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2010
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.685	Page 75

2. Development and Documentation

a. Obtain Documentation

If an individual alleges that his or her resources include unspent RECTF payments:

- document such payments in accordance with S0830.740; and
- obtain a statement as to the date(s) and amount(s) of any financial institution (e.g., checking or savings) account deposits corresponding to the RECTF payments.

b. If Necessary, Contact DOJ

If the individual does not have, and cannot obtain, the documentation in 2.a. above, contact the DOJ. Address correspondence to:

The Radiation Exposure Compensation Program
U.S. Department of Justice
P.O. Box 146
Benjamin Franklin Station
Washington, DC 20044-0146

Provide the DOJ with the individual's name and Social Security number (SSN). When writing on behalf of a survivor, include the survivor's name and SSN.

D. References

- Excluded funds commingled with non-excluded funds, S1130.700.
- Exclusion of RECTF payments from income, S0830.740.

M1130.685 WALKER V. BAYER SETTLEMENT PAYMENTS

A. Policy

Section 4735 of the Balanced Budget Act of 1997 (P.L. 105-33) states that payments described in this subsection from the settlement of the Susan Walker v. Bayer Corp., et.al., class action lawsuit are NOT counted as income in determining eligibility for Medicaid. Payments described in this subsection are:

- payments made from any fund established pursuant to a class settlement in the case of Susan Walker v. Bayer Corp., et.al., 96-C-5024 (N.D.III.); and
- payments made pursuant to a release of all claims in a case that is entered into in lieu of the class settlement of Walker v. Bayer Corp., et.al., and that is signed by all affected parties on or before the later of
 - December 31, 1997, or
 - the date that is 270 days after the date on which such release is first sent to the persons to whom the payment is to be made.

Any interest earned on these funds prior to July 1, 2004 is not excluded. Any interest earned on these funds on or after July 1, 2004 is excluded from income and resources.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2017
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.700	Page 76

B. Procedure

Information received by claimants in this lawsuit shows that claimants can choose to receive the payment in one of three ways - in a lump sum, a structured settlement, or a special needs trust. Regardless of which form the individual chooses, the payment(s) are excluded if the above requirements are met.

Verify the source of the funds from a letter from the individual's attorney or a copy of the check which identifies the payor as a Walker v. Bayer settlement account.

OTHER EXCLUDED RESOURCES**S1130.700 IDENTIFYING EXCLUDED FUNDS THAT HAVE BEEN COMMINGLED WITH NONEXCLUDED FUNDS****A. Policy Principle**

Otherwise excludable funds must be identifiable in order to be excluded.

B. Operating Policy**1. Identified vs. Segregated**

Identifiability does not require that excluded funds be kept physically apart from other funds (e.g., in a separate bank account).

2. Operating Assumption

Always assume, when withdrawals are made from an account with commingled funds in it, that **nonexcludable funds are withdrawn first**, leaving as much of the excluded funds in the account as possible.

3. Effect of Account Transactions

If excluded funds are withdrawn, the excluded funds left in the account can be added to only by:

- deposits of subsequently received funds that are excluded under the same provision; and
- excluded interest (see 4. below).

4. Interest

If interest on the excluded funds is excluded (as with disaster assistance), the percent of an interest payment to be excluded is the same as the percent of funds in the account that is excluded **at the time the interest is posted**. The excluded interest is then added to the excluded funds in the account.

C. Development and Documentation - Initial Application and Posteligibility**1. Evidence**

Obtain a **complete** history of account transactions back to the initial deposit of excluded funds. Use the individual's own records if possible.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2017
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with S1130.700	Page 77

2. Determination

- a. Accept the individual's allegation as to the date and amount of a deposit of excluded funds if it agrees with the evidence in file on the receipt of the funds.
- b. Record in case record:
 - each deposit of excluded funds;
 - each withdrawal that reduces the amount of excluded funds;
 - each computation of excluded interest and its addition to the excluded funds.

D. Examples**1. One Time Receipt and Deposit of Excluded Funds**

An individual deposits a \$1,000 SSA check (\$800 for the preceding 4 months and \$200 for the current month) in a checking account. The account already contains \$300 in nonexcluded funds.

- Of the new \$1,300 balance, \$800 is excluded as retroactive SSI benefits.
- The individual withdraws \$300. The remaining \$1,000 balance still contains the excluded \$800.
- The individual withdraws another \$300, leaving a balance of \$700. All \$700 is excluded.
- The individual deposits \$500, creating a new balance of \$1,200. Only \$700 of the new balance is excluded.

2. Periodic Receipt and Deposit of Excluded Funds

An individual deposits \$200 in excluded funds in a non-interest bearing checking account that already contains \$300 in nonexcluded funds.

- The individual withdraws \$400. The remaining \$100 is excluded.
- The individual then deposits \$100 in nonexcluded funds. Of the resulting \$200 balance, \$100 is excluded.
- The individual next deposits \$100 in excludable funds. Of the new \$300 balance, \$200 is excluded.

3. Interest

A \$1,000 savings account includes \$800 in excluded disaster assistance when a \$10 interest payment is posted. Since 80 percent of the account balance is excluded at the time the interest is posted, 80 percent of the interest (\$8) is excluded. The amount of excluded funds now in the account is \$808.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.740	Page 78

M1130.740 ACHIEVING A BETTER LIFE EXPERIENCE (ABLE) ACCOUNTS

A. Policy

The federal Stephen Beck, Jr. Achieving a Better Life Experience Act (ABLE Act), was enacted by Congress on December 19, 2014 and approved by the Virginia General Assembly and Governor in 2015. An ABLE account is a type of tax-advantaged account that an eligible individual can use to save funds for the disability related expenses of the account's designated beneficiary, who must be blind or disabled by a condition that began before the individual's 26th birthday. Funds retained in these accounts are not considered to be resources for Medicaid.

In Virginia, the qualified ABLE program is operated by the Virginia529 program and can be contacted Toll-Free: 1-844-NOW-ABLE (1-844-669-2253).

An eligible individual can be the designated beneficiary/account owner of only one ABLE savings trust account, which must be administered by a qualified ABLE program.

The designated beneficiary is the eligible individual who established and owns the ABLE account. To be an eligible individual, he or she must be:

- Eligible for Supplemental Security Income (SSI) based on disability or blindness that began before age 26;
- Entitled to disability insurance benefits, childhood disability benefits, or disabled widow's or widower's benefits based on disability or blindness that began before age 26; or
- Someone who has certified, or whose parent or guardian has certified, that he or she:
 - Has a medically determinable impairment meeting certain statutorily specified criteria; or is blind; and,
 - The disability or blindness occurred before age 26.

NOTE: A certification that someone meets disability requirements for the ABLE program does not replace a disability determination from either SSA or DDS in determining whether someone meets the Medicaid definition of a disabled individual.

Upon the death of the designated beneficiary, the State can seek to recover funds remaining in the ABLE account, after payment of any outstanding qualified disability expenses, to reimburse the State for Medicaid benefits that the designated beneficiary received.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130.740	Page 79

B. Procedures

The designated beneficiary, or person acting on the individual's behalf, must provide a copy of the ABLÉ account documentation for the case record. The documentation should include the designated beneficiary's/account owner's name, address, and the date the ABLÉ account was established. The eligibility worker must retain the information in the case record.

A copy of the account documentation also must be sent to DMAS at the following address:

Department of Medical Assistance Services
Eligibility & Enrollment Services Division
600 East Broad Street, Suite 1300
Richmond, Virginia 23219

C. Contributions to an ABLÉ Account

Third party contributions to an ABLÉ account are not counted as income or included in total resources of the beneficiary. This includes distributions from special needs or pooled trusts. Earnings on an ABLÉ account (e.g. interest) are part of the account and to be disregarded in determining Medicaid eligibility.

Income contributed into an ABLÉ account by the designated beneficiary is counted as available income, and not disregarded.

D. Distributions From an ABLÉ Account

Distributions from an ABLÉ account are not included in the designated beneficiary's taxable income or counted as income for eligibility determination as long as used for qualified disability expenses, *as determined by the Internal Revenue Service (IRS)*.

Examples of Qualified Disability Expenses include, but are not limited to:

- *Education*
- *Housing*
- *Transportation*
- *Employment training and support*
- *Assistive technology and related services*
- *Health*
- *Prevention and wellness*
- *Financial management and administrative services*
- *Legal fees*
- *Expenses for oversight and monitoring*
- *Funeral and burial*
- *Basic living expenses*
- *Other expenses approved by the Secretary of the U.S. Treasury.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 1

DETERMINING THE COUNTABLE VALUE OF *HOME & CONTIGUOUS* PROPERTY

Definitions

1. “Assessed value” means the tax assessed value that a tax assessor’s office places on real property for tax purposes; the tax assessed value is the current fair market value (FMV) of real property. In Virginia, all real property is assessed at 100% of its current FMV, so the assessed value of real property is the current FMV of the property.
2. “Equity value” means the property’s assessed value minus the balance due on the lien (a mortgage or a court-ordered judgment) against the property, **when the lien is in the Medicaid applicant’s name, when the Medicaid applicant is one of the individuals listed on the lien, or when the Medicaid applicant is one of the owners subject to the lien, meaning that he is responsible for paying the lien. If the Medicaid applicant is not subject to the lien, the balance due on the lien is not subtracted from the value of the property. If the Medicaid applicant is one of two or more individuals subject to the lien, then **ONLY** the Medicaid applicant’s fractional share of the lien balance is deducted from the applicant’s share of the property’s value.**
3. “Home property exclusion” means an exclusion for the plot of land on which the home is located. The excluded home lot size may vary according to the locality's building requirements. For localities with a set minimum building lot size, use the lesser of:
 - the plat;
 - the survey; or
 - the locality's minimum size for a building lot.

For localities with no minimum building lot requirements, use the lesser of:

 - the plat;
 - the survey; or
 - one acre.

If the equity value of countable contiguous property causes resources to exceed the maximum limit, re-evaluate the home property applying the definition of the home used in the State Plan for Medical Assistance in Virginia in effect on January 1, 1972. At that time, a “home” meant the house and lot used as the individual’s principal residence and all contiguous property **essential to the operation of the home regardless of value (M1130.100 B.2).**
4. “Life estate interest” is a limited type of ownership in real property. A life estate conveys to the individual to whom it is given certain property rights for the duration of his or her life, or someone else's life. In some cases, it may be conditional: e.g., for life or until remarriage. The owner of a life estate can sell the life estate interest but does not have title to the property and normally cannot sell the property or pass it on as an inheritance.
5. “Remainderman” is the term used when an individual has an ownership interest in the real property, but does not have the right to possess and use the property until termination of the life estate interest.

A. Procedure #1: Property Owned by One Owner

Step 1 - Determine the *whole* property’s assessed value, the assessed value of the excluded house and homesite, and determine the balance due on all liens against the property *if the Medicaid applicant is subject to the lien(s)*.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 2

Step 2 - Assessed value of excluded house and homesite

+ \$5,000 Exclusion

Excluded property value

Step 3 - *Whole* property assessed value

- Excluded property value

Contiguous property *assessed* value

Step 4 - Contiguous property *assessed* value

÷ *Whole* property assessed value

Portion of *whole* property value represented by the contiguous property

x Balance due on the lien(s) in *applicant's name*

Contiguous property lien amount

Step 5 - Contiguous property *assessed* value

- Contiguous property lien amount

Contiguous property equity value = *Contiguous property countable value*

Step 6 – If the contiguous property's countable value causes excess resources, determine if the contiguous property can be excluded for another reason, such as income-producing. Re-evaluate the home property applying the definition of the home used in the State Plan for Medical Assistance in Virginia in effect on January 1, 1972. At that time, a "home" meant the house and lot used as the principal residence and all contiguous property essential to the operation of the home regardless of value.

EXAMPLE #1 (one-owner property, not re-evaluated):

Example #1, Step 1:

Whole property assessed value = \$81,500

Assessed value of homesite (the excluded house, homesite, buildings, etc.) = \$64,000

Balance due on property's mortgage (*applicant is the only owner subject to the lien*) = \$72,000

Example #1, Step 2:

\$64,000 Assessed value of *house* & homesite

+ 5,000 Exclusion

69,000 Excluded property value

Example #1, Step 3:

\$81,500 *Whole* property assessed value

- 69,000 Excluded property value

\$12,500 Contiguous property *assessed* value

Example #1, Step 4:

\$ 12,500.00 Contiguous property *assessed* value

÷ 81,500.00 Total property assessed value

.1533 Portion of *whole* property value represented by the contiguous property

x 72,000.00 Balance due on lien

11,037.60 Contiguous property lien amount

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2018
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 3

Example #1, Step 5:

\$12,500.00 Contiguous property assessed value
- 11,037.60 Contiguous property lien amount
 \$ 1,462.40 Contiguous property equity value

Example #1, Step 6:

The property does not produce any income and is not used to produce goods or services that are essential to the operation of the home.

\$ 1,462.40 contiguous property countable value

B. Procedure #2: Joint Ownership, Undivided Estate or Unprobated Estate, one owner subject to lien

Step 1 - Determine the whole property's assessed value, the assessed value of the excluded house and homesite, and determine the balance due on all liens against the property if the Medicaid applicant is subject to the lien(s).

Step 2 - **When a partition suit is necessary to liquidate the property** because at least one owner does not agree to sell the contiguous property: Determine the shared partition costs for liquidating the property. Use the average cost of partitioning in the locality where the property is located, based on the **assessed** (not equity) value of the whole property. *Use the average cost of partitioning on property not yet partitioned, otherwise use the actual shared cost to partition.*

If a partition suit is NOT necessary to liquidate the property (all the owners agree to sell it), **do not** subtract any partition costs or attorneys' fees; insert zeros in the formula in place of partition costs and attorney's fees.

Step 3 - Assessed value homesite property
+ \$5,000 Exclusion
 Excluded property value

Step 4 - Whole property assessed value
- Shared partition costs
 Countable assessed value
- Excluded property value
 Contiguous property assessed value

Step 5 - Contiguous property assessed value
÷ Whole property assessed value
 Portion of whole property value represented by the contiguous property
x Balance due on the lien(s)
 Contiguous property lien amount
÷ Number of owner's subject to lien
 Applicant's share of contiguous property lien amount

Step 6 - Contiguous property assessed value
÷ Applicant's ownership share
 Applicant's share of contiguous property assessed value
- Applicant's share of contiguous property lien amount
 Applicant's share contiguous property equity value
- Applicant's attorney fees
 Contiguous property countable value

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 4

*Step 7 – If the contiguous property’s countable value causes excess resources, determine if the contiguous property can be excluded for another reason, such as income-producing. Re-evaluate the home property applying the definition of the home used in the State Plan for Medical Assistance in Virginia in effect on January 1, 1972. At that time, a “home” meant the house and lot used as the principal residence and all contiguous property **essential to the operation of the home regardless of value.***

EXAMPLE #2 (undivided joint ownership, one owner subject to lien, not re-evaluated):

An applicant owns a 1/3 interest in his home, lot, and 4 acres of contiguous property. There is a lien on this property with a balance due of \$10,000. *The applicant is the only owner subject to the lien.* The assessed value of the house and homesite lot is \$40,000 and the 4 acres of contiguous property has an assessed value of \$60,000 (\$100,000 is the whole property’s assessed value). *One owner, not the applicant, does not agree to sell the contiguous property.* The estimated shared cost of partitioning is \$2,000 and the applicant's attorney's fees will be \$1,000.

Example #2, Step 1:

Whole property’s assessed value = \$100,000

Assessed value of homesite (the excluded house, homesite, buildings, etc.) = \$40,000

Contiguous property (4 acres) = \$60,000

Balance due on whole property's mortgage = \$10,000

Example #2, Step 2:

Shared partition costs = \$2,000

Applicant's attorney's fees = \$1,000

Example #2, Step 3:

\$ 40,000	Assessed value of homesite
+ 5,000	<u>Exclusion</u>
45,000	Excluded property value

Example #2, Step 4:

\$100,000	Whole property assessed value
- 2,000	<u>Shared partition costs</u>
98,000	Countable assessed value
- 45,000	<u>Excluded property value</u>
53,000	Contiguous property assessed value

Example #2, Step 5:

\$ 53,000	Contiguous property assessed value
÷ 100,000	<u>Whole property assessed value</u>
.53	Portion of whole property value represented by the contiguous property
x 10,000	<u>Balance due on the lien(s)</u>
5,300	Contiguous property lien amount
÷ 1	<u>Number of owners subject to lien</u>
5,300	Applicant’s share of contiguous property lien amount

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2018
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 5

Example #2, Step 6:

\$ 53,000.00	Contiguous property assessed value
÷ 3	<u>Applicant's ownership share</u>
17,666.67	Applicant's share of contiguous property assessed value
- 5,300.00	<u>Applicant's share of contiguous property lien amount</u>
12,366.67	Applicant's share contiguous property equity value
- 1,000.00	<u>Applicant's attorney fees</u>
\$11,366.67	Contiguous property equity value

Example #2, Step 7:

The property does not produce any income and is not used to produce goods or services that are essential to the operation of the home.

\$11,366.67 contiguous property countable value

C. Procedure #3: Re-evaluated homesite, partition required, multiple owners subject to lien

Step 1 - Determine the whole property's assessed value, the assessed value of the excluded house and homesite, and determine the balance due on all liens against the property if the Medicaid applicant is subject to the lien(s). If another owner is subject to the lien, calculate the applicant's share of the lien balance by dividing the lien balance by the number of owner's subject to the lien. The formula will calculate the applicant's share of the lien balance that is against the contiguous property.

Step 2 - **When a partition suit is necessary to liquidate the property:** Determine the shared partition costs for liquidating the property. Use the average cost of partitioning in the locality where the property is located, based on the **assessed** (not equity) value of the whole property. *Use the average cost of partitioning on property not yet partitioned, otherwise use the actual shared cost to partition.*
If a partition suit is NOT necessary to liquidate the property (all the owners agree to sell it), do not subtract any partition costs or attorney's fees; insert zeros in the formula in place of partition costs and attorney's fees.

Step 3 - Assessed value house & homesite property
+ \$5,000 exclusion
Excluded property value

Step 4 - Total property assessed value
- Shared partition costs
Countable assessed value
- Excluded property value
Contiguous property assessed value

Step 5 - Contiguous property assessed value
÷ Whole property assessed value
Portion of whole property value represented by the contiguous property
x Balance due on the lien(s)
Contiguous property lien amount
÷ Number of owner's subject to lien
Applicant's share of contiguous property lien amount

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 6

Step 6 - Contiguous property *assessed* value

\div Applicant's ownership share

Applicant's share of contiguous property assessed value

- Applicant's share of contiguous property lien amount

Applicant's share contiguous property equity value

- Applicant's attorney fees

Contiguous property countable value

Step 7 – If the applicant's countable equity in the contiguous property causes excess resources, re-evaluate the *property using the 1972 definition of homesite* to determine if the use of the contiguous land would mean more property excluded as the homesite. The \$5,000 exclusion is *NOT applied* when the homesite is re-evaluated *using the 1972 definition of home and homesite*.

Determine how much of the contiguous property is actually used by the household as part of the homesite.

Step 8 - Assessed value of house and homesite

+ Value of additional contiguous property used for homesite

Excluded property value

Step 9 - *Whole* property assessed value

- Excluded property value

Contiguous property assessed value

Step 10 - Contiguous property *assessed* value

\div Whole property assessed value

Portion of whole property value represented by the contiguous property

\times Balance due on the lien(s)

Contiguous property lien amount

\div Number of owners subject to lien

Applicant's share of contiguous property lien amount

Step 11 – Contiguous property *assessed* value

\div Applicant's ownership share

Applicant's share of contiguous property assessed value

- Applicant's share of contiguous property lien amount

Applicant's share contiguous property equity value

- Applicant's attorney fees

Re-evaluated contiguous property countable value

Use the lesser of the Contiguous Property Countable Value and the Re-evaluated Contiguous Property Countable Value.

Step 12: If the individual still has excess resources, evaluate the contiguous property to determine if it can be excluded for another reason or a disregard applied, such as the exclusion or disregard applicable to income-producing property.

EXAMPLE #3 (re-evaluated homesite, partition required, multiple owners subject to lien):

Example #3, Step 1:

Applicant owns a 1/3 undivided share in his house, homesite and 10 contiguous acres; the *whole* property is *assessed* at \$100,000. A partition suit is necessary to liquidate the contiguous property *because one*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 7

owner does not agree to sell the property. The lien on the property is in the 3 owners' names, so the 3 owners are subject to the lien. The property does not produce any income to the applicant.

Assessed value of *whole* property = \$100,000

Assessed value of homesite (the excluded house, homesite, buildings, etc.) = \$40,000

Contiguous property assessed value = \$60,000

Balance due on entire property's mortgage = \$12,000

Example #3, Step 2:

Shared partition costs = \$2,000

Applicant's attorney's fees = \$1,000

Example #3, Step 3:

\$ 40,000	Assessed value of homesite
+ 5,000	Exclusion
<u>45,000</u>	Excluded property value

Example #3, Step 4:

\$100,000	Whole property assessed value
- 2,000	Shared partition costs
<u>98,000</u>	Countable assessed value
- 45,000	Excluded property value
<u>53,000</u>	Contiguous property assessed value

Example #3, Step 5:

\$ 53,000	Contiguous property assessed value
÷ 100,000	Whole property assessed value
<u>.53</u>	Portion of whole property value represented by the contiguous property
x 12,000	Balance due on the lien(s)
<u>\$ 6,360</u>	Contiguous property lien amount
÷ 3	Number of owners subject to lien
<u>2,120</u>	Applicant's share of contiguous property lien amount

Example #3, Step 6:

\$53,000.00	Contiguous property assessed value
÷ 1/3	Applicant's ownership share
<u>17,666.67</u>	Applicant's share of contiguous property assessed value
- 2,120.00	Applicant's share of contiguous property lien amount
<u>15,546.67</u>	Applicant's share contiguous property equity value
- 1,000.00	Applicant's attorney fees
<u>14,546.67</u>	Contiguous property countable value

\$14,546.67 causes the applicant to have excess resources, so the homesite is re-evaluated for actual use using the 1972 definition of homesite.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 8

Example #3, Step 7:

The applicant says that of the contiguous 10 acres, 1 is used for a garden to grow produce used by the household, 1 acre is used for the livestock raised for home consumption, ½ acre is used for the family cemetery, and 1 acre is used for the septic system; a total of 3.5 additional acres are used as the homesite. *The property does not produce any income.*

Assessed value of *whole* property = \$100,000

Assessed value of homesite (the excluded house, homesite, buildings, etc.) = \$40,000

Assessed value 10 contiguous acres = \$60,000 ÷ 10 = 6,000 per acre

\$6,000 value per acre x 3.5 acres = \$21,000 additional property value excluded *as homesite*

Example #3, Step 8:

\$ 40,000 Assessed value of homesite
+ 21,000 Value of additional property excluded as homesite
\$ 61,000 Excluded property value

Example #3, Step 9:

\$100,000 *Whole* property assessed value
- 2,000 Shared partition costs
98,000 Countable assessed value
- 61,000 Excluded property value
37,000 Contiguous property *assessed* value

Example #3, Step 10:

\$ 37,000.00 Contiguous property *assessed* value
÷ 100,000.00 Whole property assessed value
.37 Portion of property value represented by the contiguous property
x 12,000.00 Balance due on the lien(s)
\$ 4,440.00 Contiguous property lien amount
÷ 3 Number of owners subject to lien
1,480.00 *Applicant's share of contiguous property lien amount*

Example #3, Step 11:

\$ 37,000.00 Contiguous property *assessed* value
÷ 1/3 Applicant's ownership share
12,333.33 *Applicant's share of contiguous property assessed value*
- 1,480.00 Applicant's share of contiguous property lien amount
10,853.33 *Applicant's share contiguous property equity value*
- 1,000.00 Applicant's attorney fees
9,853.33 *Re-evaluated* contiguous property countable value

Because the \$9,853.33 *re-evaluated* value is less than the \$14,546.67 value first determined, the countable value of the applicant's contiguous property is \$9,853.33. The applicant has excess resources and is not eligible for ABD Medicaid.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 9

D. Procedure #4: One Owner (Remainderman), One Life Interest Owner, Lien

Step 1 – When the Medicaid applicant is a remainderman and lives on the property in which he owns a remainder interest, determine the age of the life interest owner, determine the whole property's assessed value, the assessed value of the excluded house and homesite, and determine the balance due on all liens against the property if the Medicaid applicant is subject to the lien(s). No estimated costs of selling the remainder interest are deducted from the countable value.

Step 2 – Calculate the assessed value of the contiguous property:

Assessed value of excluded house and homesite

+ \$5,000 Exclusion

Excluded property value

Whole property assessed value

- Excluded property value

Contiguous property assessed value

Step 3 – The applicant is the remainderman on this property – determine the value of the remainder interest in the contiguous property which will be countable EVEN IF the life interest holder does NOT agree to sell the life interest.

Contiguous property assessed value

X Remainder interest factor based on life interest owner's age (from table in M1140.120)

Remainder interest value

Step 4 – Calculate the contiguous property lien amount – the portion of the lien that is against the contiguous property:

Contiguous property assessed value

÷ Whole property assessed value

Portion of whole property value represented by the contiguous property

x Balance due on the lien(s) to which applicant is subject

Contiguous property lien amount

Step 5 – Calculate the countable value of the remainder interest in contiguous property:

Remainder interest value

- Contiguous property lien amount

Countable value of remainder interest in contiguous property

*Step 6 - If the contiguous property's countable value causes excess resources, determine if the contiguous property can be excluded for another reason, such as income-producing. Re-evaluate the home property applying the definition of the home used in the State Plan for Medical Assistance in Virginia in effect on January 1, 1972. At that time, a "home" meant the house and lot used as the principal residence and all contiguous property **essential to the operation of the home regardless of value.***

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 10

Example #4 - One Owner (Remainderman), One Life Estate Owner, Lien:

Example #4, Step 1:

Whole property assessed value = \$81,500
 Assessed value of homesite (the excluded house, homesite, buildings, etc.) = \$64,000
 Balance due on property's lien (applicant is the only owner subject to the lien) = \$10,000
 Life interest owner is 71 years old

Example #4, Step 2:

\$64,000 Assessed value of excluded house and homesite
 + 5,000 Exclusion
 \$69,000 Excluded property value
 \$81,500 Whole property assessed value
 - 69,000 Excluded property value
 \$12,500 Contiguous property assessed value

Example #4, Step 3:

The life interest owner is 71 years old.
 \$ 12,500.00 Contiguous property assessed value
 $\times .41086$ Remainder interest factor based on life interest owner's age (from table in M1140.120)
 \$ 5,135.75 Remainder interest value

Example #4, Step 4:

\$ 12,500 Contiguous property assessed value
 $\div 81,500$ Whole property assessed value
 .1534 Portion of whole property value represented by the contiguous property
 $\times 10,000$ Balance due on the lien(s)
 \$ 1,534 Contiguous property lien amount

Example #4, Step 5:

\$5,135.75 Remainder interest value
 - 1,534.00 Contiguous property lien amount
 \$3,601.75 Countable value of remainder interest in contiguous property

Example #4, Step 6:

The contiguous property's countable value of \$3,601.75 causes excess resources. The contiguous property does not produce any income. The home property is re-evaluated for actual use using the 1972 definition of home property.

The applicant says that of the contiguous 5 acres, 1 acre is used for a garden to grow produce used by the household and 1 acre is used for the septic system; a total of 2 additional acres are used as the homesite.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 11

Assessed value of whole property = \$81,500

Assessed value of homesite (the excluded house, homesite, buildings, etc.) = \$64,000

Assessed value 5 contiguous acres = \$17,500 ÷ 5 = \$3,500 per acre

\$3,500 value per acre x 2 acres = \$7,000 additional property value excluded as essential to homesite

\$64,000 Assessed value of home & homesite

+ 7,000 Value of additional property excluded as homesite

\$ 71,000 Excluded home property value

\$81,500 Assessed value of whole property

-71,000 Excluded home property value

10,500 Contiguous property assessed value

The life interest owner is 71 years old.

\$ 10,500.00 Contiguous property assessed value

X .41086 Remainder Interest Factor Based on Life Interest Owner's Age (from table in M1140.120)

\$4,314.03 Remainder interest value

\$ 10,500 Contiguous property assessed value

÷ 81,500 Whole property assessed value

.1288 Portion of whole property value represented by the contiguous property

X 10,000 Balance due on the lien(s)

\$ 1,288 Contiguous property lien amount

\$4,314.03 Remainder interest value

-1,288.00 Contiguous property lien amount

\$3,026.03 Re-evaluated countable value of remainder interest in contiguous property

Because \$3,026.03 is less than \$3,601.75, the re-evaluated countable value of the applicant's remainder interest in the contiguous property is used for the contiguous property countable value, and is added to all other resources to determine eligibility.

\$3,026.03 contiguous property countable value.

E. Procedure #5: Joint Owners (Remaindermen), One Life Estate Owner, Lien

*This is home and contiguous real property that is owned jointly (undivided estate) and is subject to a life interest owner; the Medicaid applicant is one of the owners (remaindermen). The Medicaid applicant lives on the property in which he owns a remainder interest. Because there is a life interest owner of this property and life estate property cannot be divided, **no** estimated partition costs & attorney's fees are deducted from the value of the Medicaid applicant's remainder share.*

Step 1 - Determine the total property assessed value, the assessed value of the excluded house and homesite, the balance due on all liens against the property if the applicant is subject to the lien, and the age of the life interest owner.

Step 2 – Calculate the assessed value of the contiguous property:

Assessed value of excluded house and homesite

+ \$5,000 Exclusion

Excluded property value

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 12

Whole property assessed value
- Excluded property value
Contiguous property assessed value

Step 3 – The applicant is one of the remaindermen owners of this property – determine the value of the remainder interest in the contiguous property which will be countable EVEN IF the life interest holder does NOT agree to sell the life interest.

Contiguous property assessed value
X Remainder interest factor based on life interest owner's age (from table in M1140.120)
Remainder interest value

Step 4 – Calculate the contiguous property lien amount – the portion of the lien that is against the contiguous property:

Contiguous property assessed value
÷ Whole property assessed value
Portion of whole property value represented by the contiguous property
x Balance due on the lien(s) to which the applicant is subject
Contiguous property lien amount

Step 5: Calculate the equity value of applicant's share of the remainder interest in contiguous property:

Remainder interest value
÷ Number of remaindermen (joint owners of property)
Applicant's share of remainder interest
- Contiguous property lien amount
Equity value of applicant's remainder interest = Countable value of contiguous property

Step 6 - If the countable value of the contiguous property causes excess resources, determine if the contiguous property can be excluded for another reason, such as income-producing. Re-evaluate the home property applying the definition of the home used in the State Plan for Medical Assistance in Virginia in effect on January 1, 1972. At that time, a "home" meant the house and lot used as the principal residence and all contiguous property essential to the operation of the home regardless of value.

Example #5 Joint Owners (Remaindermen), One Life Estate Owner, Lien

An applicant owns ½ remainder interest (2 owners) in non-home, non-business real property; there is one life interest owner, age 80. There is a lien on this property and the applicant is the only remainderman owner subject to the lien. The lien balance due is \$10,000. The assessed value of the property is \$181,500. The life interest owner agrees to sell, but the other remainderman owner does not agree to sell. No estimated costs of partitioning or selling the property are deducted.

Example #5, Step 1:

Whole property assessed value = \$181,500
Assessed value of homesite (the excluded house, homesite, buildings, etc.) = \$64,000
Balance due on property's lien (applicant is the only owner subject to the lien) = \$10,000

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 13

Example #5, Step 2: – Calculate the assessed value of the contiguous property:

\$64,000 Assessed value of excluded house and homesite

+ 5,000 Exclusion

\$69,000 Excluded property value

\$181,500 Whole property assessed value

- 69,000 Excluded property value

\$112,500 Contiguous property assessed value

Example #5, Step 3 –Determine the value of the remainder interest in the contiguous property; life interest owner is 80 years old.

\$112,500.00 Contiguous property assessed value

X .56341 Remainder interest factor based on life interest owner's age (from table in M1140.120)

\$63,383.63 Remainder interest value

Example #5, Step 4 – Calculate the contiguous property lien amount – the portion of the lien that is against the contiguous property:

\$112,500 Contiguous property assessed value

÷181,500 Whole property assessed value

.6198 Portion of whole property value represented by the contiguous property

x 10,000 Balance due on the lien(s)

\$ 6,198 Contiguous property lien amount

Example #5, Step 5: Calculate the equity value of applicant's share of the remainder interest in contiguous property:

\$63,383.63 Remainder interest value

÷ 2 Number of remaindermen (joint owners of property)

\$31,691.82 Applicant's share in remainder interest in contiguous property

- 6,198.00 Contiguous property lien amount

\$25,493.82 Equity value of applicant's remainder interest

\$25,493.82 countable value of contiguous property

Example #5, Step 6:

The \$25,493.82 countable value of the contiguous property causes excess resources. The contiguous property cannot be excluded because it does not produce income. The home property must be re-evaluated for actual use using the 1972 home property definition.

The applicant says that of the contiguous 5 acres, 1 acre is used for a garden to grow produce used by the household and 1 acre is used for the septic system; a total of 2 additional acres are used as the homesite. The property does not produce any income.

Assessed value of whole property = \$181,500

Assessed value of homesite (the excluded house, homesite, buildings, etc.) = \$64,000

Assessed value 5 contiguous acres = \$117,500 ÷ 5 = \$23,500 per acre

\$23,500 value per acre x 2 acres = \$47,000 additional property value excluded as essential to homesite

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 1	Page 14

$\$ 64,000$ Assessed value of home & homesite
 $+ 47,000$ Value of additional property excluded as homesite
 $\$111,000$ Excluded home property value

$\$181,500$ Assessed value of whole property
 $-111,000$ Excluded home property value
 $\$ 70,500$ Contiguous property assessed value

The life interest owner is 80 years old.

$\$ 70,500.00$ Contiguous property assessed value
 $\times .56341$ Remainder interest factor based on life interest owner's age (from table in M1140.120)
 $\$39,720.41$ Remainder interest value

$\$ 70,500$ Contiguous property assessed value
 $\div 181,500$ Whole property assessed value
 $.3884$ Portion of whole property value represented by the contiguous property
 $\times 10,000$ Balance due on the lien(s)
 $\$ 3,884$ Contiguous property lien amount

$\$39,720.41$ Remainder interest value
 $- 3,884.00$ Contiguous property lien amount
 $\$35,836.41$ Re-evaluated countable value of remainder interest in contiguous property

Because the \$35,836.41 re-evaluated countable value is less than \$39,720.41, the re-evaluated value of the applicant's remainder interest in the contiguous property, \$35,836.41, is used for the contiguous property countable value of the property and is added to all other resources to determine eligibility.

\$35,836.41 contiguous property countable value

DETERMINING THE COUNTABLE VALUE OF NON-HOME REAL PROPERTY

Definitions

1. "Assessed value" means the tax assessed value that the tax assessor's office places on the real property for tax purposes; the tax assessed value is the current fair market value (FMV) of the real property. In Virginia, all real property is assessed at 100% of its current FMV, so the assessed value of the real property is the current FMV of the property.
2. "Equity value" means the property's assessed value minus the balance due on the lien (a mortgage or a court-ordered judgment) against the property, **when the lien is in the Medicaid applicant's name, when the Medicaid applicant is one of the individuals listed on the lien, or when the Medicaid applicant is one of the owners subject to the lien, meaning responsible for paying the lien. If the Medicaid applicant is not subject to the lien, the balance due on the lien is not subtracted from the value of the property. If the Medicaid applicant is one of two or more individuals subject to the lien, then ONLY the Medicaid applicant's fractional share of the lien balance is deducted from the applicant's share of the property's value.**
3. "Life estate interest" is a limited type of ownership in real property. A life estate conveys to the individual to whom it is given certain property rights for the duration of his or her life, or someone else's life. In some cases, it may be conditional: e.g., for life or until remarriage. The owner of a life estate can sell the life estate interest but does not have title to the property and normally cannot sell the property or pass it on as an inheritance.
4. "Remainderman" is the term used when an individual has an ownership interest in the real property, but does not have the right to possess and use the property until termination of the life estate interest.

A. Procedure A: Non-business Real Property Owned by One Owner, Not Producing Income

Step 1 - Determine the total property assessed value and the balance due on all liens against the property that are in the applicant's name.

Step 2 - Property assessed value

- Lien amount balance (when Medicaid applicant is subject to the lien)
Equity value

Example A1 (one-owner non-business, non-income-producing property):

Example #A1, Step 1:

Total property assessed value = \$81,500

Balance due on property's mortgage (applicant is subject to the lien) = \$72,000

Example #A1, Step 2:

\$81,500 Total property assessed value
- 72,000 Lien balance
\$ 9,500 Equity value

\$9,500 is countable value

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 4	Page 2

B. Procedure B: Non-business Real Property Owned by One Owner, producing income

Step 1 - Determine the total property assessed value and the balance due on all liens against the property to which the Medicaid applicant is subject.

Step 2 - Property assessed value
- Lien amount balance (the applicant is subject to the lien)
 Equity value of property

Step 3 - The real property is not business property, so determine if the \$6,000 disregard applies to the property because the property is essential to self-support (S1130.502 and S1130.503):

Ask: Does property produce goods/services essential to the individual's daily activities?

If yes, subtract the \$6,000 disregard from the equity value, regardless of how much income the property produces – no rate of return is calculated.

If no, does the property produce net annual income (after all expenses are subtracted from the gross annual income produced by the property) that equals or exceeds 6% of the property's **excluded equity** value?

If yes, subtract the \$6,000 disregard from the equity value.

If no, do not subtract the \$6,000 disregard.

Example B1 (one-owner non-business, income-producing property, essential to daily living - M1130.502):

Example #B1, Step 1:

Total property assessed value = \$81,500

Balance due on property's mortgage (applicant is subject to the lien) = \$72,000

Example #B1, Step 2:

\$81,500 Total property assessed value
- 72,000 Lien balance
 \$ 9,500 Equity value

Example #B1, Step 3:

Does property produce goods/services essential to the individual's daily activities?

Yes – property is used as a garden for the individual's household's consumption – only any excess not used by the household is sold, and the individual receives only \$100 a year from selling the excess. Rate of return is not calculated because the property is used to produce goods essential to the individual's daily activities.

\$ 9,500 Equity value
- 6,000 Disregard
\$ 3,500 Countable value of property

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 4	Page 3

Example #B2 (one-owner non-business, income-producing property, NOT essential to daily living – M1130.503):

Example #B2, Step 1:

Total property assessed value = \$90,500

Balance due on property's mortgage (applicant is subject to the lien) = \$70,000

Example #B2, Step 2:

\$90,500 Total property assessed value

- 70,000 Lien balance

\$20,500 Equity value

Example #B2, Step 3:

Does property produce goods/services essential to the individual's daily activities? No.

Does the property produce net annual income (after all expenses are subtracted from the gross annual income produced by the property) that equals or exceeds 6% of the excluded equity value? Because the equity value is over \$6,000, the excluded equity value cannot exceed \$6,000; the rate of return is calculated on the maximum \$6,000 excluded equity value.

Calculate rate of return:

\$10,000 Gross annual income from property

- 2,000 Annual expenses to produce income

\$ 8,000 Net annual income from property

\$6,000 Excluded equity value of property

X .06 6%

\$ 360 6% of equity

Because \$8,000 net annual income from the property exceeds \$360 (6% of the excluded equity value), the property produces the required rate of return and the \$6,000 disregard is subtracted from the equity value to determine the countable value of the property:

\$ 20,500 Equity value

- 6,000 Disregard

\$ 14,500 Countable value of property

Example #B3 (one-owner non-business, income-producing, NOT essential, equity < \$6,000 – M1130.503):

Example #B3, Step 1:

Total property assessed value = \$12,500

Balance due on property's mortgage (applicant is subject to the lien) = \$7,000

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 4	Page 4

Example #B3, Step 2:

\$12,500 Total property assessed value
 - 7,000 Lien balance
 \$ 5,500 Equity value

Example #B3, Step 3:

Does property produce goods/services essential to the individual's daily activities? No.

Does the property produce net annual income (after all expenses are subtracted from the gross annual income produced by the property) that equals or exceeds 6% of the excluded equity value? Yes.

Calculate rate of return:

\$2,000 Gross annual income from property
 - 100 Annual expenses to produce income
 \$1,900 Net annual income from property

\$5,500 Equity value of property
 X .06 6%
 \$ 330 6% equity

Because the \$1,900 net annual income from the property exceeds \$330 (6% of the excluded equity value of \$5,500), the property produces the required rate of return and the \$6,000 disregard is applicable. Because the equity value of the property is less than \$6,000, the entire equity value is subtracted from the equity value to determine the countable value of the property:

\$ 5,500 Equity value
 -5,500 Disregard
 \$ 0 Countable value of property

C. Procedure C: Real Property Owned by One Owner (Remainderman) and One Life Interest Owner

Step 1 - Determine the age of the life interest owner, the property's assessed value and the balance due on the lien against the property when the applicant is subject to the lien. If there is more than one owner subject to the lien, determine the number of owners subject to the lien.

Step 2 - The applicant is the remainderman on this property – determine the value of the remainder interest in the property which will be countable EVEN IF the life interest holder does NOT agree to sell the life interest. No estimated costs of selling the remainder interest are deducted:

Assessed value of property
 X Remainder interest factor based on life interest owner's age (from table in M1140.120)
 Remainder interest value
 - Lien balance (or portion) if applicant is subject to the lien
 Countable value of remainder interest in property

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 4	Page 5

Example #C1 - Real Property Owned by One Owner (Remainderman) and One Life Interest Owner:

Example #C1, Step 1:

Total property assessed value = \$81,500

Balance due on property's mortgage; applicant is NOT subject to the lien = \$72,000

Example #C1, Step 2:

The life interest owner's age is 60 years old.

\$81,500.00 Assessed value

X .25509 Factor from table for life interest owner 60 years old

\$20,789.84 Remainder interest value

- 0 Lien balance (applicant is not subject to the lien)

\$20,789.84 Equity value of remainder interest

\$20,789.84 countable value of real property

D. Procedure D: Joint Ownership - Undivided Estate or Unprobated Estate

This is non-home real property that is owned jointly (undivided estate).

Step 1 - Determine the total property assessed value and the balance due on all liens against the property to which the applicant is subject. If there is more than one owner subject to the lien, determine the number of owners subject to the lien.

Step 2 - When a partition suit is necessary to liquidate the property: Determine the shared partition costs for liquidating the property. Use the average cost of partitioning in the locality where the property is located, based on the **assessed** (not equity) value of the TOTAL property.

If a partition suit is NOT necessary to liquidate the property (all the owners agree to sell it), do not subtract any partition costs or attorneys' fees; insert zeros in the formula in place of partition costs and attorneys fees.

Step 3 - Assessed value of property

- Shared partition costs

Assessed value less shared partition costs

Step 4 - Assessed value less shared partition costs

÷ Applicant's ownership share of property

Applicant's share

- Balance due on the lien(s) (or portion) when applicant is subject to the lien

- Applicant's attorney fees

Applicant's equity value

Step 5 – When the property produces income to the applicant, determine if the \$6,000 disregard can be subtracted from the Applicant's Equity Value (S1130.502 and S1130.503):

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 4	Page 6

Ask: Does property produce goods/services essential to the individual's daily activities?

If yes, subtract the \$6,000 from the Applicant's Equity Value, regardless of how much income the property produces to the applicant – no rate of return is calculated.

If no, does the property produce net annual income (after all expenses are subtracted from the gross annual income produced by the property) that equals or exceeds 6% of the property's **excluded equity** value (the excluded equity value cannot exceed \$6,000)? If yes, subtract the \$6,000 disregard from the Applicant's Equity Value. If no, do not subtract the \$6,000 disregard.

Example #D1 (undivided joint ownership, producing income):

Example #D1 - An applicant owns a 1/3 interest in non-home, non-business real property. There is a lien on this property; the applicant and another owner are subject to the lien that has a balance due of \$10,000. The assessed value of the property is \$100,000. A co-owner does not agree to sell, so a partition suit is required to sell the property. The estimated shared cost of partitioning is \$2,000 and the applicant's attorney's fees will be \$1,000. The property produces \$200 per year gross income to the applicant; there are no expenses to produce the income.

Example #D1, Step 1:

Assessed value of total property = \$100,000
 Balance due on entire property's mortgage = \$10,000
 Applicant's one-half share of lien balance = \$5,000

Example #D1, Step 2:

Shared partition costs = \$2,000
 Applicant's attorney's fees = \$1,000

Example #D1, Step 3:

\$100,000 Total property assessed value
 - 2,000 Shared partition costs
 98,000 Assessed value less shared partition costs

Example #D1, Step 4:

\$98,000 Assessed value less shared partition costs
 $\div 3$ Applicant's ownership share of property owners
 \$32,666.67 Applicant's share
 - 5,000.00 Applicant's share of balance due on the lien
 - 1,000.00 Applicant's attorney fees
\$26,666.67 Applicant's equity value

Example #D1, Step 5:

Does property produce goods/services essential to the individual's daily activities? No

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 4	Page 7

Does the property produce net annual income (after all expenses are subtracted from the gross annual income produced by the property) to the applicant that equals or exceeds 6% of the excluded equity value (\$6,000)? If yes, subtract the \$6,000 disregard from the Applicant's Equity Value. If no, do not subtract the \$6,000 disregard.

Calculate rate of return:

\$6,000 Excluded equity value of property

X .06 6%

\$ 360 6% Rate of Return

Since the annual net income received from the property is \$200, which is **less than** the required rate of return of \$360, the \$6,000 disregard is **not** subtracted when determining the countable value of the property:

\$26,666.67 Applicant's equity value

- 0 Disregard

\$26,666.67 Countable value of real property

E. Procedure E: Joint Owners (Remaindermen), One Life Interest Owner, produces income

This is non-home real property that is owned jointly (undivided estate), has one life interest owner, and the property produces income to the applicant who is one of the owners (remaindermen). No \$6,000 disregard is applicable to remainder interests in real property. No estimated partition costs & attorney's fees are deducted because the property is subject to a life estate interest.

Step 1 - Determine the total property assessed value and the balance due on all liens against the property to which the applicant is subject. When there is more than one owner subject to the lien, determine the number of owners subject to the lien to determine the Medicaid applicant's share of the lien balance. No estimated partition costs & attorney's fees are deducted.

Step 2 - Determine value of the remainder interest in the property (M1140.120) regardless of whether the life interest owner agrees to sell the life interest, using the age of the life interest owner:

Assessed value of property

X Remainder interest factor based on life interest owner's age (from table in M1140.120)

Remainder interest value

Step 3: Remainder interest value

÷ Applicant's ownership share of remaindermen (joint owners of property)

Applicant's share of remainder interest

- Lien balance (or portion) when applicant is subject to lien

Countable value of property

Example #E1 - Joint Owners (Remaindermen), 1 Life Interest Owner, produces income:

An applicant owns ½ remainder interest in non-home, non-business real property; there is one life interest owner, aged 80 years. There is a lien on this property; the applicant is the only owner who is subject to the lien. The balance due on the lien is \$10,000. The assessed value of the property is \$81,500. The life interest owner agrees to sell, but the other remainder owner does not agree to sell. No estimated costs of partitioning or selling the property are deducted. No \$6,000 disregard for income-producing property is allowed on a remainder interest.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1130.000 ABD RESOURCE EXCLUSIONS	Page ending with M1130, Appendix 4	Page 8

Example #E1, Step 1:

Total property assessed value = \$81,500

Balance due on property's mortgage (applicant is only owner subject to lien) = \$10,000

Example #E1, Step 2:

The life interest owner's age is 80 years old.

\$81,500.00 Total property assessed value

X .56341 Factor from table for life interest owner's Age (80 years old)

\$45,917.92 Value of remainder interest

Example #E1, Step 3:

\$45,917.92 Value of remainder interest

÷ $\frac{1}{2}$ Applicant's ownership share of remainder interest (joint owners of property)

\$22,958.96 Applicant's share of remainder interest

- 10,000.00 Lien balance (applicant is the only owner subject to lien)

\$12,958.96 Countable value of property

\$12,958.96 countable value of property

TYPES OF COUNTABLE RESOURCES

S1140.001 PURPOSE OF SUBCHAPTER

Introduction

This subchapter contains instructions for the development of resources whose value ordinarily will count toward the resource limit. Use these instructions only after you have made certain that the property at issue:

- is a resource, based on instructions in the S1110 and S1120 subchapters; and
- is not an excluded resource, based on instructions in the S1130 subchapter.

M1140.010 GENERAL VERIFICATION REQUIREMENTS -- INITIAL APPLICATIONS

A. Development and Documentation-- Any Resources

1. General Rule: Verify

Except as indicated in 2. and B. below, always verify the value of resources for any month for which you must determine eligibility.

If an applicant appeals a denial related to a particular resource, the evidence in the file must clearly establish the value of that resource. It must do so even if the issue under appeal is not the value itself (e.g., when the issue under appeal is ownership). This requirement ensures that at each level in the appeals process, the file contains complete documentation of the resource in question.

2. Exceptions to the General Rule

You do not have to verify the value of resources for a given month if:

- the resource is **totally** excluded, regardless of its value; or
- the individual is ineligible for that month for a nonfinancial reason.

3. Values That Apply to Resources

See S1140.042 and M1110.400 for detailed instructions on "current market value (CMV) and "equity value" (EV).

Develop the EV of a resource whenever:

- the CMV of all countable resources exceeds the applicable limit; and
- the individual alleges a debt against the resource.

You do **not** have to develop the EV for a resource if the CMV of all countable resources does not exceed the applicable limit.

See S1110.510 for developing the value of a resource when there is a **shared ownership**.

Manual Title	Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2013
Subchapter Subject M1140.000	TYPES OF COUNTABLE RESOURCES	Page ending with M1140.010	Page 2

B. Development and Documentation- Exceptions for Liquid Resources Only

1. Cash on Hand

Accept an allegation of cash on hand, regardless of amount. Never ask to see or count cash.

2. Government-Issued Debit Cards

Government-administered benefits may be issued via government-sponsored debit cards, such as the Direct Express Debit MasterCard used for Social Security, Supplemental Security Income, Railroad Retirement and other government benefits. If the debit card account is funded solely by deposits from a government program, the money in the debit card account, minus any income deposited to the account for the month, is considered cash on hand and is countable unless otherwise excluded. See subchapter S1130 for information about benefits that are excluded as resources.

Debit cards that are *not government-sponsored* (e.g. the Green Dot pre-paid Visa or MasterCard) are considered bank accounts *even if the individual's government benefits are deposited into the debit account*. See S1140.200.

C. Development and Documentation-- Photocopying Restrictions

U.S. Government Securities and Obligations

It is legal to photocopy checks issued by the Federal Government, U.S. Savings Bonds, Treasury notes, and other securities and obligations of the U.S. Government **only if** the photocopies are:

- in black and white; and
- of a size less than three-fourths or more than one and one-half, in linear dimension, of each part of the item illustrated.

Photocopying Not Legal

If equipment limitations or restrictions imposed by State or Federal law do not permit legal photocopying of a document, make a certification from the original document involved. If the document appears to have been altered in some way, certify it "as is" with a notation as to the apparent alteration.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.020	Page 3

S1140.020 GENERAL VERIFICATION REQUIREMENTS -- POSTELIGIBILITY

A. Development and Documentation-- Any Resources

Evaluation of continued eligibility is required for redetermination and changes. Different types of Medicaid coverage may require additional months to be evaluated, i.e., QMB and SLMB reevaluation may require retroactive and ongoing medically needy evaluation. The following instructions apply to any period of review.

1. Value During Past Months

a. Ineligibility for Entire Period

You do not have to verify the value of resources for a period of review, **if** for the **entire** period, the individual is ineligible because of a nonfinancial reason.

b. Eligibility for One or More Months

Verify the value of resources for any month being reviewed for which the individual is not ineligible based on a. above.

2. Value in Current Month

As at initial application, always verify the value of resources for any month for which you must determine eligibility.

You do not have to verify the current value of resources if the individual is ineligible for a nonfinancial reason.

3. Developing Value When An Appeal is Filed

See S1140.010A.1. if an individual appeals a termination of Medicaid coverage due to the value of particular resource.

B. Development and Documentation--Non- Liquid Resources

1. General Rule- Apply Current Value

Use the current value of a nonliquid resource in determining resources for any months evaluated due to redetermination or change unless:

- the specific instructions for developing that resource say not to; or
- evidence indicates that it would be inappropriate to do so, as may be the case with a resource that continually appreciates in value.

2. Exception Chart

If the resource is...	then see...	regarding
real property	S1140.100 D.2	use of the tax-assessed value.
foreign property	S1140.100 G.3	the retroactive application of current foreign exchange rates
an automobile	M1130.200 C.4	use of the current N.A.D.A Guide.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.030	Page 4

**C. Development and Documentation-
Liquid Resources**

- 1. General Rule--Verify** Verify the value of liquid resources for each month covered by an application unless 2 below applies.
- 2. Exception--Cash** As in initial, accept the individual's allegation.

D. Related Policy

- 1. Photo-copying Restrictions** See M1140.010 D. for photocopying restrictions imposed by Federal or State law.
- 2. Current Market Value/Equity Value** See M1110.400 for detailed instructions on CMV and EV.
See M1140.010 A.3. for what values to apply to resources.
- 3. Shared Ownership** See S1110.510 for developing the value of a resource when there is shared ownership.
- 4. Determining Equity Value** See S1140.042.

S1140.030 OWNERSHIP

**A. Operating Policy--
Liquid Resources**

- 1. Assumption** For presumably liquid resources (S1110.305), assume that the person whose name is shown as owner owns the entire resource. If more than one owner is shown, assume that each has equal ownership interest.
- 2. Exceptions: Checking/Savings Accounts and Time Deposits** See S1140.200 and S1140.205 for checking and savings accounts. See S1140.210 for time deposits.

**B. Operating Policy-
Nonliquid Resources**

For presumably nonliquid resources (S1110.310), assume, absent some indication to the contrary, that an individual's allegation of sole ownership is correct.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2001
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.044	Page 5

S1140.042 DETERMINING EQUITY VALUE

A. Operating Policy

Develop the equity value of a resource (liquid or nonliquid) when an individual alleges a debt against it and the difference between equity and CMV could mean the difference between eligibility and ineligibility.

B. Development and Documentation

1. Statement

If an individual alleges a debt against the resource in question, obtain his or her signed description of the debt.

2. Verification

a. **Verify**, at a minimum:

- the outstanding principal balance of any month for which a determination must be made; and
- **Obtain** a copy of the agreement or note that establishes the debt. If this does not provide all the information needed, you may use other records of the individual, the creditor, or both.

3. *Determining the Countable Value of Real Property*

The procedures for determining the countable value of real property are found in Appendix 1 to subchapter S1130.

C. Example-Equity Value Permits Eligibility for Limited Time

The Rounds, an aged couple, file for Medicaid in January 1994. Their countable liquid resources total \$1,500. They also own nonhome real property with a CMV of \$2,000, which would cause their total resources to exceed the \$3,00 limit.

However, there is a mortgage on the land with an outstanding principal balance of \$800. Thus, the property's equity value (\$1,200) currently permits eligibility.

Payments on the mortgage reduce the outstanding principal balance by \$80 a month. At that rate, the property's equity value will reach \$1,520 in May 1994, and resources will exceed the limit.

S1140.044 RESOURCES WITH ZERO VALUE

A. Policy Principal

Property that meets the definition of a resource (S1110.100 B.1.) is a resource even if it has no value to count; i.e., has a CMV of zero (S1110.100 B.2.).

B. Operating Policy

An unsuccessful attempt to sell property at its estimated CMV may suggest that the property has a lesser CMV than estimated, but does not necessarily mean that the property has no CMV at all.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2006
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.100	Page 6

C. Related Policies

1. **Reasonable Efforts to Sell** For the effect of reasonable but unsuccessful efforts to sell real property see M1130.140.
2. **Conversion of a Resource** Should property that has been determined to have no CMV be sold, the proceeds of the sale represent the conversion of a resource, not income (S1110.600 B.4.).

REAL PROPERTY

S1140.100 NON-HOME REAL PROPERTY

- A. **Definition** Non-home real property consists of land and buildings or immovable objects (including some mobile homes) that are attached permanently to the land and that do not meet the definition of a home (M1130.100).
- B. **Operating Policy-- Assumptions**
 1. **Sole Ownership** Absent evidence to the contrary, accept an individual's allegation of sole ownership of property.
 2. **Marketability** Absent evidence to the contrary, assume that an individual can sell the property at its estimated CMV.
- C. **Development and Documentation Shared Ownership**

Document an allegation of shared ownership with any of the following evidence:

 - a tax assessment notice or bill;
 - a current mortgage statement;
 - a deed;
 - a report of title search;
 - wills, court records, or other documentation of inheritance.

If the individual alleges owning other than an equal share of the property (e.g., alleges having a 25 percent ownership interest where there are only two owners), the evidence must support that allegation, as well.

Manual Title	Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2017
Subchapter Subject	M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.100	Page 7

**D. Development and Documentation
Current Market Value**

1. Tax Assessment Notice

a. When to Use

Obtain a copy of the most recently issued tax assessment notice for the property . Base the CMV on this assessment.

b. How to Use

To determine CMV based on a tax assessment notice, divide the assessed value by the assessment ratio. For example, an assessed value of \$2,000 divided by an assessment ratio of 50 percent equals a CMV of \$4,000.

2. Certified Real Property Assessment

a. When to Use

Effective 10/4/16, the certified value of real property as determined by an appraiser licensed in the state in which the real property is located, is accepted as the property's CMV.

b. How to Use

The use of an appraisal is applicable only to non-commercial real property. A certified appraisal documenting the value of the property must contain the name and license number of the individual conducting the appraisal. A copy of the appraisal must be scanned into the VaCMS case record or placed in the paper case record. See M0110.400.

3. Knowledge-able Source Estimate

a. When to Use

If an individual owns property which does not have a tax assessment, in order to establish CMV, have the individual obtain an estimate of the property's CMV from a knowledgeable source.

b. What The Estimate Must Show

The estimate must show, in addition to the estimate itself:

- the name of the person providing the estimate;
- the name, address and telephone number of the business or agency for whom the person providing the estimate works;
- the basis for the estimate, to include such things as a description of the property and its condition and, where appropriate, the value of similar property in the same area; and
- the period to which the estimate applies (which should correspond to the period for which it is being request).

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.100	Page 8

c. Knowledgeable Sources Knowledgeable sources include but **are** not limited to:

- real estate brokers;
- the local office of the Farmer's Home Administration (for rural land);
- banks, savings and loan associations, mortgage companies, and similar lending institutions;
- an official of the local property tax jurisdiction (be sure to obtain the individual's estimate rather than the office's assessment); and
- the County Agricultural Extension Service.

d. Assisting The Individual

If the individual is incapable of obtaining an estimate, lend assistance. If you obtain an estimate by phone, be sure to record all pertinent facts in file.

If you cannot obtain an estimate by phone, you can contact a knowledgeable source for an estimate by mail.

e. Obtaining More Than One Estimate

If you doubt the validity of an estimate furnished by the individual, obtain an estimate from an additional knowledgeable source.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2001
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.100	Page 9

E. Development and Documentation Equity Value

1. **When to Develop** See S1140.040 A.3.
2. **Evidence**
 - a. The allegation of an encumbrance (any legal debt, such as a mortgage, lien, loan, purchase contract, security interest, etc.) must be supported with evidence of:
 - the original amount owed;
 - the outstanding principal balance; and
 - the schedule and amount of payments due on the principal balance.
 - b. Have the individual submit a copy of the **note or agreement** establishing the encumbrance.
 - c. Verify with the creditor (by phone, if possible) any required information that the note or agreement does not show (normally, this will be the outstanding principal balance).
3. **Special Review** If, because of scheduled payments on the debt, the equity value of the property may cause the individual's resources to exceed the resource limit before the next scheduled redetermination, establish a special review.
4. **Exempt and Nonexempt Property with Single Encumbrance**

If there is an encumbrance on the property only the prorated share of the encumbrance on the countable assessed value will be used to determine the countable equity value.

Example: An applicant owns a home, lot and four acres of contiguous property. The contiguous property is assessed at \$15,000, but the equity is only \$3,000. \$5,000 of the assessed value of \$15,000, would be exempt as home property. The portion of the equity value of \$3,000 relating to the countable \$10,000 portion of the land would then be included as a countable resource.

The portion of the equity value, \$10,000 divided by \$15,000 is .666. Therefore, .666 of \$3,000 equity or \$1,998 is countable.
5. **Determine the Countable Value** *The procedures and an example for determining the countable value of real property with an encumbrance are found in Appendix 1 to subchapter S1130.*

F. Development and Documentation Foreign Property

1. **General** Foreign property is subject to the same rules as domestic property.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M11	July 1995
Subchapter Subject	Page ending with	Page
M1140.000 TYPES OF COUNTABLE RESOURCES	S1140.100	10

2. Obtaining Evidence of Legal Bars

a. General

Evidence of a legal bar to the sale of property, or to removing the proceeds of a sale from the country, makes CMV development unnecessary. If the individual alleges such a bar, try to verify it by phone before going through the development in 3. below. Document the information you obtain.

b. Acceptable Source of Information

Acceptable sources of information are a consulate, mission, or embassy of the country, or our own Department of State. The number of the General Information Desk at State is (202) 647-4000. Contact your regional office if you need help.

3. Obtaining Evidence General

If an individual does not have the documents necessary to support a determination of ownership and CMV or equity value, he or she may be able to write for them, directly or with the aid of a local nationality organization.

- a detailed description of the property, its location, and any other background information the individual can provide;
- the specific information needed, e.g., CMV, the details of any restrictions on removing the proceeds of a sale from the country, etc., and
- the source(s) of the necessary documents or information, to the extent known.

4. CMV Estimate in Foreign Currency

If the CMV estimate is in foreign currency, contact a local bank for the current exchange rate. Apply the current rate retroactively and prospectively unless the individual provides reliable evidence of a different rate.

5. Effect of Partial Restrictions

- If a legal restriction limits the **amount** an individual can remove from the country, that limit is the maximum value the property can have as a resource.
- If a legal restriction affects **when** the proceeds of a sale can be removed from the country (e.g., once a year), such proceeds are income when they can be removed, and are not resources before then.
- If the individual has already sold property and can remove a portion of the proceeds before the next scheduled redetermination:
 - document the appropriate amount as unearned income for the expected month of receipt; and
 - if, in your judgement, the amount to be received is likely to affect eligibility based on resources for the month after receipt, set a special review for the month after receipt to make a resource determination.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date May 2009
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.110	Page 11

M1140.110 OTHER PROPERTY RIGHTS

A. Introduction

- 1. Mineral Rights** Mineral rights represent ownership interest in natural resources such as coal, oil, or natural gas, which normally are extracted from the ground.
- 2. Timber Rights** Timber rights permit one party to cut and remove free standing trees from the property of another property.
- 3. Easements** An easement gives one party the right to use the land of another party for a special purpose.
- 4. Leaseholds** A leasehold gives one party control over certain property of another party for a specified period. In some States, a "lease for life" can create a life estate under common law. See M1140.110A.6 for life estates.
- 5. Water Rights** Water rights usually confer upon the owner for riverfront or storefront property the right to access and use the adjacent water.
- 6. Life Estates**

a. General

A life estate conveys to the individual to whom it is given certain property rights for the duration of his or her life, or someone else's life. In some cases, it may be conditional: e.g., for life or until remarriage.

The owner of a life estate can sell the life estate but does not have title to the property and thus normally cannot sell it or pass it on as an inheritance.

b. Life Estate Created Prior to August 28, 2008

The value of a life estate created prior to August 28, 2008 is not counted as a resource. Exception: The value of a life estate owned by a QDWI enrollee is countable, regardless of the date on which it was created.

c. Life Estate Created On or After August 28, 2008 *but Before February 24, 2009*

The value of a life estate created on or after August 28, 2008 *but before February 24, 2009* is a countable resource to the owner of the life estate unless the life estate is excluded under one of the real property exclusions contained in Chapter S11. Exception: The value of a life estate owned by a QDWI enrollee is countable, regardless of the date on which it was created.

The value of a life estate in real property on which the individual resides and considers to be his home is excluded. If the individual leaves the property but retains a life estate, and the property is not occupied by a spouse or dependent child, the value of the life estate becomes a countable resource unless it is excluded under one of the real property exclusions contained in Chapter S11.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.110	Page 12

d. Life Estate Created on or after February 24, 2009

The value of a life estate created on or after February 24, 2009 is not counted as a resource. Exception: The value of a life estate owned by a QDWI enrollee is countable, regardless of the date on which it was created.

7. Remainder Interests

When the owner of property gives it to one party in the form of a life estate, and designates a second party to inherit it upon the death of the life estate holder, the second party has a remainder interest in the property.

B. Development and Documentation

1. General

Treat the items in A. above as real property and develop ownership and value per S1140.100. See 4. below for additional instructions regarding life estates and remainder interests.

2. Mineral Rights

a. Ownership of Land and Mineral Rights

If the individual owns the land to which the mineral rights pertain, the CMV of the land can be assumed to include the value of the mineral rights. Additional development is unnecessary.

b. Ownership of Mineral Rights Only

If the individual does not own the land to which the mineral rights pertain, obtain a CMV estimate from a knowledgeable source. Such sources include, in addition to those listed in S1140.100 D.2.c.:

- the Bureau of Land Management;
- the U.S. Geological Survey;
- any mining company that holds leases.

3. Lease for Life

Refer any "lease for life" agreement and related information to the regional coordinator for a determination of whether it creates a life estate under State law.

4. Value of Life Estate

a. General

The value of a life estate created on or after August 28, 2008 but before February 24, 2009 is a countable resource to the owner of the life estate unless the life estate is excluded under one of the real property exclusions contained in Chapter S11.

b. Calculate Value of Life Estate

To determine the countable value of a life estate, use the table in S1140.120, *Life Estate and Remainder Interest Tables*. Multiply the CMV of the property by the "life estate" decimal that corresponds to the *applicant's or enrollee's* age. Record the result *in the case record*.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.110	Page 12a

If there is more than one life estate owner, divide the *CMV* of the real property by the number of people *owning* a life estate interest. Multiply the prorated *CMV* of the property by the life estate decimal that corresponds to the *applicant's or enrollee's* age. Record the result *in the case record*.

c. Life Estate Interest Owned by Another Person Affects Property Value

Any countable equity value of real property *is* affected if it is:

- subject to someone else having life estate interest, or
- the applicant/recipient transfers real property *and retains* a life estate interest, thus affecting the *real property* value *used to calculate the uncompensated value of the asset transfer*.

See S1140.120, Life Estate and Remainder Interest Tables to determine *the value of the life estate interest*.

**5. Value of
Remainder
Interest**

a. General

A “remainder” interest in real property is the term used when an individual has an ownership interest in the real property, but usually does not have the right to possess and use the property until termination of the life estate interest. The individual who owns a remainder interest in real property is called the “remainderman.” An individual’s ownership of a remainder interest in real property must be evaluated to determine the real property’s countable value.

b. Calculate Value of Remainder Interest – One Remainderman

*To determine the countable value of a remainder interest when only one individual owns the remainder interest, use the table in S1140.120, Life Estate and Remainder Interest Tables. Multiply the *CMV* of the real property by the “Remainder” decimal that corresponds to the **life estate owner’s age**. The result is the value of the remainder interest. Record the result in the case record.*

c. Calculate Value of Remainder Interest – Two or More Remaindermen

*To determine the countable value of a remainder interest when more than one individual owns a remainder interest in the property, divide the *CMV* of the real property by the number of remainder interests owned. Multiply the prorated *CMV* of the property by the “**Remainder**” decimal that corresponds to the **life estate owner’s age**. If a remainderman is subject to a lien against the property, subtract the remaining balance or portion of the balance from the *CMV* value. The result is the countable value of the remainder interest. Record the countable value calculation and result in the case record.*

**6. Examples in
S1130 Appendix 1
and Appendix 4**

See Appendix 1 and Appendix 4 to subchapter S1130 for instructions for, and examples of, determining the countable value of life estate and remainder interests in real property.

FINANCIAL INSTITUTION ACCOUNTS

M1140.150 QUALIFIED TUITION PROGRAMS (QTPS)

A. Operating Policies

Qualified Tuition Programs (QTPs), also referred to as Section 529 Plans, allow individuals to prepay or contribute to an account established for paying a designated beneficiary's education expenses at an eligible educational institution. QTPs can be established and maintained by states, agencies, instrumentalities of states, and eligible educational institutions. Individuals may contribute to a QTP regardless of the amount of their income.

There are two types of QTPs (529 Plans): savings plans and pre-paid plans.

Savings plans:

- are accounts that provide investment options such as mutual funds or money market funds (similar to a retirement account (e.g. 401K)).*
- are not guaranteed by the State and the value is subject to fluctuations in financial markets (e.g. the stock market).*
- can be established for a beneficiary of any age.*

Prepaid plans

- allow individuals to purchase units or credits at participating colleges and universities for tuition.*
- allow individuals to lock-in future tuition rates at current prices.*
- States may guarantee investments in plans that they sponsor.*
- Most plans must be established for a beneficiary by a certain age or grade.*

B. Definitions

1. Account Owner

An account owner, also referred to as a donor, is the individual who has ownership of the account and directs use of the funds. Most plans allow the account owner to reclaim the funds deposited into a QTP at any time.

2. Designated Beneficiary

A designated beneficiary is the individual (i.e. a student or future student) who is to receive the benefit of the funds in the account. The designated beneficiary can be changed to a member of the beneficiary's family.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M11	April 2022
Subchapter Subject	Page ending with	Page
M1140.000 TYPES OF COUNTABLE RESOURCES	M1140.150	16a

3. Beneficiary's Family

The beneficiary's family includes the beneficiary's spouse and the following other relatives of the beneficiary:

- *son, daughter, stepchild, foster child, adopted child, or a descendant of any of them;*
- *brother, sister, stepbrother, or stepsister;*
- *father, mother, or ancestor of either;*
- *stepfather or stepmother;*
- *son or daughter of a brother or sister;*
- *brother or sister of father or mother;*
- *son-in-law, daughter-in-law, father-in-law, mother-in-law, brother-in-law, or sister-in-law*
- *the spouse of any individual listed above; or*
- *first cousin.*

4. Eligible Educational Institutions

Eligible educational institutions include any college, university, or vocational school eligible to participate in a student aid program administered by the U.S. Department of Education. This includes virtually all accredited public, non-profit, and proprietary (i.e. privately owned profit making) institutions. It also includes certain educational institutions located outside the U.S.

Effective January 1, 2018, eligible educational institutions also include elementary or secondary public, private, or religious schools, but distributions are limited to \$10,000 towards tuition per beneficiary per year.

5. Withdrawals or Distributions

Withdrawals or distributions are the issuance of funds from the account. Distributions are payable to an eligible educational institution, the QTP account owner, the designated beneficiary or the estate of the beneficiary, as directed by the account owner. The account owner determines when distributions are made from the account and for what purpose.

6. Gift

Distributions from a QTP meet the definition of a gift provided:

- *they are not repayment for goods or services provided by the designated beneficiary;*
- *they are not given because of a legal obligation on the donor's part; and*
- *they are given irrevocably (i.e. the donor relinquishes all control). For additional information on gifts, see S0830.520.*

7. Rollover Contribution

A rollover contribution is any amount "rolled over" or transferred to another QTP for the benefit of the same beneficiary or a member of the beneficiary's family. Effective December 22, 2017, rollovers can also include transfers from a QTP to the beneficiary's or another family member's Achieving a Better Life Experience (ABLE) account. For more information about ABLE accounts, see M1130.740.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.150	Page 16b

8. Educational Expenses

Educational expenses are tuition, fees, and other necessary educational expenses at any educational institution. Examples of educational expenses include:

- *tuition and fees*
- *books*
- *laboratory fees*
- *student activity fees*
- *transportation*
- *stationary supplies*
- *technology fees*
- *impairment-related expenses necessary to attend school or perform schoolwork (e.g. special prosthetic devices necessary to operate school machines or equipment).*

NOTE: *Educational expenses do not include the cost of food and shelter.*

C. QTP as a Countable Resource

Funds in a QTP are a countable resource to the individual who owns the account (e.g. a parent or grandparent). Normally, the owner is the person who established the account. In most instances, the individual who establishes a QTP retains the ability to withdraw any or all of the funds in the account for his or her own benefit.

NOTE: *In most cases, the designated beneficiary (i.e. the student or future student) is not the owner of the account and does not have any rights to the funds in the account.*

1. Value of a QTP

The value of the QTP is the current market value minus any applicable penalties, but not minus taxes. In addition, any maintenance fees associated with the account, whether scheduled or collected, do not reduce its value.

2. Dividends and Interest Earned on a QTP

Dividends and interest are returns on capital investments such as stocks, bonds, or savings accounts. Exclude dividends and interest earned on QTPs from income.

3. Rule for Withdrawals or Distributions From a QTP

Withdrawals or distributions to the account owner are not income but a conversion of a resource (i.e. the resource in a different form). The distribution is a countable resource to the account owner.

Assume that any distribution the designated beneficiary receives from a QTP is a gift, unless there is evidence to the contrary (e.g. there is an allegation that the distribution must be repaid). Distributions, which meet the definition of a gift and are used for educational expenses of the designated beneficiary, are excluded as income in the month of receipt. If an excluded distribution is retained into the month following the month of receipt, it is an excluded resource of the designated beneficiary for 9 months beginning with the month after the month of receipt. For information on educational gifts, see M0830.520 and S1130.455.

If the designated beneficiary spends any portion of a QTP distribution for a purpose other than his or her educational expenses or no longer intends to

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.150	Page 16c

use the funds for his or her educational expenses, the funds are income at the earlier of two points:

- in the month the funds are spent; or*
- in the month the individual no longer intends to use the funds for educational expenses.*

If a countable distribution is retained into the month following the month of receipt, it is a countable resource.

4. Examples of QTP Distributions

EXAMPLE 1—Distributions excluded as income and resources

A disabled adult, age 19, is the designated beneficiary of a QTP. On January 10, the disabled adult receives \$3,000 from the QTP. The disabled adult spends \$2,800 for tuition and fees in January. As of February 1, \$200 of the distribution remains. The disabled adult tells the eligibility worker (EW) they will use the rest of the money for future educational expenses.

The EW determines:

- The disabled adult is not the owner of the QTP; therefore, it is not a resource to the individual.*
- The distribution meets the definition of a gift for educational purposes and is excluded from income in the month of January.*
- The remaining amount of \$200 is excluded from resources for the months of February through October. As of November 1, any portion that remains is a countable resource of the disabled adult.*

EXAMPLE 2—Distributions counted as income and resources

A disabled adult, age 21, is the designated beneficiary of a QTP. On August 5, the disabled adult receives \$1,500 from the QTP. During the month of August, the individual spends \$1,350 on books. The individual spends \$75 on groceries in August and saves \$75. The disabled adult tells the EW that they intends to add the rest of the money to their “emergency fund” that they have set aside for non-educational expenses.

The EW determines:

- The disabled adult is not the owner of the QTP; therefore, it is not a resource to the individual.*
- That \$1,350 of the distribution meets the definition of a gift for educational purposes and is excluded from income in the month of August.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.200	Page 16d

- *That \$150 of the distribution is countable income to the individual for the month of August because the disabled adult spent \$75 on non-educational expenses and intends to use \$75 for non-educational expenses. As of September 1, any portion of the \$75 that remains is a countable resource of the disabled adult.*

5. Rollover or Transfer of QTP Funds

Funds in a QTP may be transferred or “rolled over” to a member of the beneficiary’s family. A transfer or “rollover” of QTP funds from a beneficiary to a family member does not necessarily indicate a transfer of account ownership. When there is a valid transfer, the original account owner no longer owns the property.

M1140.200 CHECKING, SAVINGS AND DEBIT CARD ACCOUNTS

A. Operating Policies

1. Ownership

Assume that the person designated as owner in the account title owns all the funds in the account (see S1140.205 regarding joint accounts).

2. Right to Withdraw Funds

Absent evidence to the contrary, assume that the person shown as owner in the account title has the legal right to withdraw funds from the account.

3. Fiduciaries

A fiduciary's right to withdraw funds is the same as the owner's right to withdraw them.

4. Right to Withdraw - Examples of Evidence to the Contrary

a. Right to Withdraw Funds Restricted to a Specified Account Holder

An account is titled, "In trust for John Jones and Mary Smith, subject to sole order of John Jones, balance at death of either to belong to survivor." Since John alone has unrestricted access, none of the funds in the account could be considered Mary's resources unless John were her fiduciary or his resources were deemed available to her.

b. Withdrawals Require Authorization of Third Party

An account is titled, "George Dahey, restricted Individual Indian Money Account." Mr. Dahey cannot withdraw funds from the account without Bureau of Indian Affairs (BIA) authorization. Therefore, the account is not his resource.

c. “Blocked” Accounts

If State law specifically requires the funds be made available for the care and maintenance of an individual, assume, absent evidence to the contrary, that they are that individual's resource. This is true despite the fact that the individual or his/her agent is required to petition the court to withdraw funds for the individual's care. Refer to regional coordinator any questions regarding State law on "blocked accounts."

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2022
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.200	Page 16e

5. Right to Use for Support and Maintenance

Absent evidence to the contrary, assume that an individual who owns and has the legal right to withdraw funds from a bank account also has the legal right to use them for his or her own support and maintenance.

6. Right to Use - Examples of Evidence to the Contrary

a. Use Restricted by Court Order

Even with ownership interest and the legal ability to access property, a legal restriction against the property's use for the owner's own support and maintenance means the property is not the owner's resources (S1110.100).

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M11	January 2019
Subchapter Subject	Page ending with	Page
M1140.000 TYPES OF COUNTABLE RESOURCES	M1140.200	17

6. Examples of Evidence to the Contrary

a. Use Restricted by Court Order

Even with ownership interest and the legal ability to access property, a legal restriction against the property's use for the owner's own support and maintenance means the property is not the owner's resources (S1110.100).

EXAMPLE: An account is titled, "Aristotle Iris by Hester Pry, Representative Payee," where Ms. Pry is an officer of the institution in which Mr. Iris lives. A statewide court order prohibits such officers from using the funds of an institutionalized person for support and maintenance provided by the State. Therefore, the funds in the account are not a resource while Mr. Iris is in the institution.

b. Special Purpose Accounts

An account is titled, "Thomas Green, Kiwanis Club Fund for Heart Surgery." While Mr. Green has unrestricted access to funds, development shows that their use is restricted to the expenses of his surgery. Therefore, they are not a resource.

7. Debit Card Accounts

Debit cards that are not government-sponsored (e.g. the Green Dot pre-paid Visa or MasterCard) are considered bank accounts even if the individual's government benefits are deposited into the debit account. *Some debit card accounts may allow other monies to be deposited. In addition, joint owners may be able to access funds in the account.*

If the debit card is sponsored by a government program such as the Social Security Administration and the individual cannot deposit other money into the account, the money in the debit card account, minus any income deposited to the account for the month, is considered cash on hand and is verified by the client's statement of the balance in the account. See M1140.010.

B. Development and Documentation Initial Applications and Post-eligibility

1. Informing the Individual of Reporting Responsibilities

Be sure the individual understands that:

- he must report any bank account on which his or her name appears, regardless of any special purpose for which the account may have been established or whose money is in it;
- DSS may use other statements or forms to obtain information from any bank account or financial institution to verify the allegations.

2. Curtailing Development

Do not verify account balances under any of the following circumstances:

- a. the individual alleges that his name does not appear on any accounts, and there is no evidence to the contrary;
- b. the individual is ineligible for a non-financial reason.

3. Minimum Documentation - Account Balances Must Be Verified

Document, in addition to the balances themselves;

- the name and address of the financial institution;
- the account number(s); and
- the exact account designation.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2021
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.200	Page 18

4. **Verification**

Use the Asset Verification System whenever possible to verify the bank account. If the balance of the account when combined with other countable resources is within the resource limit for the individual's assistance unit size, no further development is necessary.

If the balance of the bank account places the individual's resources over the limit, any deposits for the month of the AVS results must be accounted for using the policy in M1140.200 B.6 below. Obtain deposit information from the individual.

5. **Requesting Information from Financial Institutions**

When it is necessary to request account information from a financial institution (FI), have the individual sign an authorization for release of the information.

If a financial institution refuses to provide the information needed for a determination, try to obtain its cooperation by explaining why assistance is required. If the institution still refuses to provide the information, inform the individual and ask him or her to try to get the information from the institution

a. Acceptable Forms of FI Records

1. FI original records that appear to be complete and unaltered;
2. FI records other than bank statements issued by the FI, when individual:
 - alleges that no transactions have occurred that the records do not show; or
 - alleges that such transactions have occurred and provides appropriate evidence of them; **and**
 - the records, the allegation regarding additional transactions, and the alleged current account balance (on the application or renewal form) reflect a complete and consistent picture of the account;
3. Records verified by telephone contact with the FI and documented in the case record.

b. Examples of Acceptable FI Records Other than Bank Statements

- passbooks,
- the individual's check register,
- bank statements or account activity information printed from the FI's website and submitted by the individual,
- account ledgers,
- ATM transaction receipts, and
- deposit or withdrawal slips.

Accept an FI document in the format in which it is provided by the FI or the individual if it meets the criteria in M1140.200 B.5 above.

6. **Determining the Value of a Bank Account**

There is no single method for determining the countable value of a bank account. The countable value is the lower of:

- the balance before income is added, or
- the ending balance minus any income added during the month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2021
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.205	Page 19

Funds cannot be both income and a resource in the same month. Income that has been added to a bank account during the month must be subtracted from the ending balance to ensure that the income is not also counted as a resource.

c. Balance Information

The financial institution may show the opening balance for the first day of a given month or the closing balance for the last business day of the previous month. Accept either, the amount will be the same. See M1110.001 for monthly determinations of resource eligibility.

C. Development and Documentation-- Posteligibility Only

If you discover a previously undeveloped checking or savings account after eligibility has been established, develop account balances and interest for the period that a determination can cover.

S1140.205 JOINT CHECKING AND SAVINGS ACCOUNTS

A. Introduction

The instructions in S1140.200, except for A.1. (ownership), apply to all checking and savings accounts. The instructions in this section, which apply to joint accounts only, supplement those in S1140.200.

B. Operating Policy-- Rebuttable Ownership Assumptions

1. Account Holders Include One Or More Applicants or Recipients and No Deemors

Assume that all the funds in the account belong to the applicant(s)/recipient(s), in equal shares if there is more than one applicant or recipient.

2. Account Holders Include One or More Deemors

Provided that none of the account holders is an applicant or recipient (in which case the assumption in 1. above would apply), assume that all the funds in the account belong to the deemor(s), in equal shares if there is more than one deemor.

C. Development and Documentation-- Initial Applications and Posteligibility

1. Informing the Individual

Inform the individual:

- of the applicable ownership assumption;
- of the corresponding income implications (S0810.130); and
- of his or her right to provide evidence rebutting the ownership assumption, if he or she disagrees with it.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date February 2009
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.210	Page 20

2. Individual Wishes to Rebut

a. Rebuttal Statement

If an individual wishes to rebut the applicable ownership assumption, obtain his or her statement, regarding:

- who owns the funds;
- why there is a joint account;
- who has made deposits to and withdrawals from the account; and
- how withdrawals have been spent.

b. Required Evidence

In addition, inform the individual that he or she must submit the following evidence:

- a corroborating statement from each other account holder (if the only other account holder is incompetent or a minor, have the individual submit a corroborating statement from anyone aware of the circumstances surrounding establishment of the account);
- account records showing deposits, withdrawals and interest in the months for which ownership is at issue;
- if the individual owns *none* of the funds, evidence showing that he or she can no longer withdraw funds from the account;
- if the individual owns only a portion of the funds, evidence showing removal from the account of such funds, or removal of the funds owned by the other account holder(s), and redesignation of the account.

c. Determination

Any funds that the evidence establishes were owned by the other account holder(s), and that the individual can no longer withdraw from the account, were not and are not the individual's resources. However, such funds can be deemed available to the individual if the account holder to whom they belong is a deemor. Document the determination in file.

NOTE: You must verify joint account balances if an individual rebuts ownership of any of the funds in an account.

S1140.210 TIME DEPOSITS

A. Introduction

1. Time Deposits

A time deposit is a contract between an individual and a financial institution whereby the individual agrees to leave funds on deposit for a specified period (six months, two years, five years, etc.) and the financial institution agrees to pay interest at a specified rate for that period. Certificates of deposit (C.D.s) and savings certificates are common forms of time deposits.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M11	August 1994
Subchapter Subject	Page ending with	Page
M1140.000 TYPES OF COUNTABLE RESOURCES	S1140.210	21

2. Penalties for Early Withdrawal

Withdrawal of a time deposit before the specified period expires incurs a penalty, which usually is imposed against the principal. This penalty does not prevent the time deposit from being a resource, but does reduce its value as a resource.

3. Early Withdrawal Prohibited

On rare occasions, the terms of a time deposit will prohibit early withdrawal altogether.

B. Operating Policy

1. Ownership

The assumptions regarding ownership of bank accounts (S1140.200 and S1140.205) apply to time deposits.

2. Early Withdrawal Prohibited

a. Principal

If the owner of a time deposit cannot under any circumstances withdraw it before it matures, it is not a resource. It becomes a resource (not income) on the date it matures, and may affect countable resources for the following month.

b. Interest

If the owner has no access to the interest before the deposit matures, accrued interest is not a resource and is income in the month the deposit matures (not before then).

3. Value as a Resource

The resource value of a time deposit at any given time is the amount the owner would receive upon withdrawing it at that time, excluding interest paid that month. Generally, this is:

- the amount originally deposited;
- plus accrued interest for all but the current month;
- minus any penalty specified on the certificate for early withdrawal.

C. Related Policy--Interest

See S0830.425 regarding the treatment of interest for income purposes.

D. Development and Documentation

Verify the original amount deposited, interest accrued, and what penalty applies for early withdrawal. If the individual alleges that the deposit cannot be withdrawn prior to maturity under any circumstances, verify that. Obtain this information from the individual's copies of account records to the extent possible. Contact the financial institution only to obtain information the individual's records do not provide.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.215	Page 21a

S1140.215 CONSERVATORSHIP ACCOUNTS

A. Definitions

1. Conservatorship Account

The term "conservatorship account" refers to a financial account in which a person or institution has been appointed by a court to manage and preserve the assets of an individual which are held in the account.

2. "Individual"

For Medicaid purposes the "individual" for whom a conservatorship account is held may be a applicant, recipient, or other person whose resources are deemed to the applicant or recipient.

B. Policy

The following policy does not apply to trusts, which are discussed in S1120.200.

1. Assumption of Availability for Support and Maintenance

If State law requires that funds in a conservatorship account be made available for the care and maintenance of an individual, we assume, absent evidence to the contrary, that funds in such an account are available for the individual's support and maintenance and are, therefore, that individual's resource.

A State statute may not specifically address the issue of whether funds in a conservatorship account must be made available for the care and maintenance of the individual. Other State statutes or case law may specifically prohibit the use of funds held in the conservatorship account for general support of the individual in certain circumstances. Eligibility Workers (EW) should follow regional instructions regarding availability presumptions that apply in those States.

2. Examples of "Evidence to the Contrary"

Examples of evidence of the contrary include (but are not limited to):

- restrictive language in the court order that established the account or in a subsequent court order;
- State or local procedural rules for the withdrawal of funds from the account; and
- local court practices regarding withdrawal of funds.

3. Requirement to Petition Court for Release of Funds

The fact that an individual or his/her agent must petition the court for withdrawal of funds does not mean that the funds may be assumed to be unavailable for the individual's support and maintenance (and, therefore, not a resource for Medicaid purposes).

Denial by the court of a request for withdrawal of funds does not necessarily mean that funds in the account are unavailable for the individual's support and maintenance. If the court approves requests to withdraw funds in order to provide support and maintenance, and only disapproves requests for non-essential items, the funds are considered available and a resource for Medicaid purposes. The EW should review the

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.215	Page 21b

history of petitions for (and approvals and denials of) withdrawal of funds. If a denial by the court appears to be an exception rather than the rule, the funds may be determined to be a resource for Medicaid purposes.

C. Procedure

1. Follow Regional Instructions

Refer to regional instructions regarding State law, State or local rules, or local court practices regarding the conditions under which funds held in conservatorship accounts may be withdrawn.

2. Obtain the Individual's Allegation

Obtain over the individual's signature an allegation regarding:

- who can withdrawn the funds;
- the method for withdrawing funds (e.g., petition the court or unlimited ability to withdraw by the individual or his/her agent);
- uses to which funds may or must be put; and
- any restrictions on availability or use of funds.

If the court has restricted use of funds in the account **at the individual's or his/her agent's request**, obtain the individual's allegation as to whether the restriction(s) can be removed by request or petition.

3. Obtain Evidence as Necessary

If you must verify the value of the funds (see S1140.010 or S1140.020 for general verification requirements) or if the individual's allegations suggest that funds in the conservatorship account are not a resource for Medicaid purposes, ask the individual to submit evidence regarding the account. Obtain evidence to document the issues which must be addressed. This evidence may include:

- the court order establishing the conservatorship and the account;
- any account records showing withdrawals, deposits, and balances;
- prior applications or petitions for withdrawal of funds (if applicable), including any correspondence or notices from the court responding to the applications or petitions; and
- any other documents or evidence in the individual's possession pertaining to the conservatorship account.

4. Make Resource Determination

Document in the case record your determination as to whether the funds in the account are a resource for Medicaid purposes. Refer to regional instructions, as applicable.

If the court has restricted use of funds in the account at the individual's or his/her agent's request and the registration(s) can be removed at the individual's or agent's request or petition, determine that the funds are a resource for Medicaid purposes.

If due to the complexity of the conservatorship account or the history of petitions for funds, you are unable to determine the status of the account for Medicaid resource purposes, refer to the case to the Regional Specialist.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 1995
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.215	Page 21c

D. Examples

The following examples illustrate policy and procedures for conservatorship accounts.

1. Funds Assumed to Be Available for Support and Maintenance

The claimant, a disabled 28-year-old individual, received a \$20,000 court-ordered personal injury award as a result of an accident on a city bus. The court order stipulates that the claimant's legal guardian must petition the court for withdrawal of funds as needed. The order does not place any restrictions on how the funds may be used on behalf of the claimant.

The EW consults the regional specialist on conservatorship or "blocked" accounts and determines that, under State law, the funds in an account such as this may be assumed to be available for the individual's support and maintenance. Therefore, the EW determines that the funds in the account are a resource for Medicaid purposes.

2. Funds Not Available for Support and Maintenance

Same situation as above. However, regional instructions indicate that State law restricts the use of personal injury funds held in conservatorship accounts to medical expenses only. Since the funds are not available for food, clothing, or shelter, the EW determines the funds are not a resource.

3. Petition for Withdrawal of Funds Denied

The Medicaid recipient, a 2-year-old child, has received a \$100,000 medical malpractice award. The court order requires that the child's parents petition the court for withdrawal of funds. The parent/payee alleged that a recent petition for withdrawal of funds was denied.

The EW asks the payee to submit evidence of the petition in question and all prior petitions. Examining the evidence, the EW concludes that all but one petition for withdrawal of funds were approved for the general support and maintenance of the child. The court denied one petition, citing the intended use of the funds. The court characterized the intended use as "nonessential for the child's care."

Since the one denied petition does not negate the presumption that the funds are available for the child's support and maintenance, the EW concluded that the funds are a resource for Medicaid purposes.

Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.220	Page 22

OTHER COMMON INVESTMENT VEHICLES

S1140.220 STOCKS

A. Introduction

Shares of stock represent ownership in a business corporation. Their value shifts with demand and may fluctuate widely. The following guidelines apply to all stocks, including preferred stocks, warrants and rights, and options to purchase stocks.

B. Operating Policy

1. Co-Ownership

Absent evidence to the contrary, assume that each owner owns an equal share of the value of the stock.

2. Salability

Absent evidence to the contrary, assume that the owner of shares of stock can sell them at will at current value.

3. Broker Fees

Broker fees do not reduce the value that stocks have as resources.

D. Development and Documentation

1. Ownership

Ask the individual to submit the stock certificate or most recent statement of account (including dividend account) from the firm that issued or is holding the stock. Document the file with a photocopy. If the individual does not have this documentation, have him or her obtain a statement from the firm. Provide assistance as needed.

2. Value--Publicly Traded Stocks

a. Which Value to Use

The CMV of a stock is its closing price on the previous business day. The values of over-the-counter stocks are shown on a "bid" and "asked" basis. For example, "18 bid, 19 asked." Use the bid price as the CMV.

The "par value" or "stated value" shown on some stock certificates is not the market value of the stock.

b. Sources of Information

The closing price of a stock on a given day can usually be found in the next day's regular or financial **newspaper**.

As a last resort, contact a local **securities firm**. Record the appropriate closing price and the source of the information.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.230	Page 23

**3. Value--Stock
That Is Not
Publicly Traded**

a. Traded

The stock of some corporations is held within close groups and traded very infrequently. The sale of such stock is often handled privately and subject to restrictions. As a rule, it cannot be converted to cash within 20 working days.

b. Evidence

The burden of proof for establishing the value of this kind of stock is on the individual. The preferred evidence is a letter or other written statement from the firm's accountants giving their best estimate of the stock's value and the basis for the estimate, e.g.:

- most recent sale,
- most recent offer from outsiders,
- CMV of assets less debts on them,
- cessation of activity and sale of assets,
- bankruptcy, etc.

Keep the statement or a photocopy of it in the file.

S1140.230 MUTUAL FUND SHARES

A. Introduction

A mutual fund is a company whose primary business is buying and selling securities and other investments. Shares in a mutual fund represent ownership in the investments held by the fund.

**B. Development and
Documentation**

The development guidelines for stocks in S1140.220, apply to mutual funds shares. Many newspapers contain a separate table showing the values of funds not traded on an exchange.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2011
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.240	Page 24

S1140.240 U.S. SAVINGS BONDS

A. Introduction

U.S. Savings Bonds are obligations of the Federal Government. Unlike other government bonds, they are not transferable; they can only be sold back to the Federal Government. U.S. Savings Bonds have a mandatory retention period:

- 6 months for Series E, EE and I bonds issued prior to 2/1/03,
- 12 months for Series EE and Series I bonds issued on or after 2/1/03, and
- 6 months for Series H and HH bonds.

U.S. Savings Bonds are resources the first month following the mandatory retention period.

NOTE: The mandatory retention period is the same for both paper and electronic Series EE and I bonds. Series E bonds have not been issued since June 1980.

B. Operating Policy

1. Sole Ownership

The individual in whose name a U.S. Savings Bond is registered owns it (the Social Security Number shown on the bond is not proof of ownership).

2. Co-Ownership

The co-owners own equal shares of the value of the bond.

3. Status as Resources

a. General

U.S. Savings Bonds are not resources during a mandatory retention period. They are resources (not income) as of the first day of the month following the mandatory retention period.

b. Co-ownership Without Access

A U.S. Savings Bond is not a resource to a co-owner if another co-owner has and will not relinquish physical possession of it.

C. Development and Documentation

1. Ownership

a. Paper Bonds

Have the individual submit any bonds that he or she has an ownership interest in. Use the name(s) shown on the bond to determine ownership per B.1. or B.2. above.

b. Electronic Bonds

When an individual alleges ownership of electronic savings bonds, document bond ownership by asking the individual to download a record of his bond holdings from the Treasury Department. (see C.3.b below).

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M11	October 2010
Subchapter Subject	Page ending with	Page
M1140.000 TYPES OF COUNTABLE RESOURCES	S1140.250	25

- 2. Status as Resources** If the individual alleges that he or she cannot submit a bond because a co-owner has and will not relinquish physical possession of it, obtain from the co-owner a signed statement verifying that the co-owner:
- has physical possession of the bond;
 - will not allow the individual to cash the bond; and
 - will not cash the bond and give the individual his or her share of its value.
- 3. Value**
- a. Series E, EE, and I paper bonds**
- **On-line Verification** at:
<http://www.publicdebt.treas.gov/sav/savcalc.htm>
 - Current copy of the Table of Redemption Values for US Savings Bonds
 - **Bank Verification** As a last alternative, obtain the value by telephone from a local bank and record it. The bank will need the series, denomination, date of purchase and/or date.
- b. Series E, EE, and I electronic bonds**
- Ask individual to obtain his “Current Holdings” list from the Treasury web site at: <http://www.savingsbonds.gov/>
 - Use Current Holding Summary to verify number of bonds, face value, issue dates, confirmation numbers and value.
- c. Series H and HH Bond After Maturity**
After maturity, the redemption value of a series H or HH bond is its face value. Verification of value per a. or b. above is unnecessary.
- 4. Photocopy** Document the file with a photocopy or certification of the bond(s). See **S1140.010 C.** on photocopying U.S. Government obligations.
- 5. Follow-up, if Appropriate** If an individual owns a U.S. Savings Bond which, upon maturity, may cause countable resources to exceed the limit, recontact the recipient shortly before the bond matures in order to redevelop the value of countable resources.

S1140.250 MUNICIPAL, CORPORATE, AND GOVERNMENT BONDS

A. Introduction

- 1. Bond** A bond is a written obligation to pay a sum of money at a specified future date. Bonds are negotiable and transferable.
- 2. Municipal Bond** A municipal bond is the obligation of a State or a locality (county, city, town, villages or special purpose authority such as a school district).
- 3. Corporate Bond** A corporate bond is the obligation of a private corporation.
- 4. Government Bond** A government bond, as distinct from a U.S. Savings Bond (see S1140.240), is a **transferable** obligation issued or backed by the Federal Government.

B. Operating Policy Municipal corporate, and government bonds are negotiable and transferable. Therefore, their value as a resource is their CMV. Their redemption value, available only at maturity, is immaterial.

C. Documentation Documentation instructions for stocks (S1140.220) also apply to bonds.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2021
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.260	Page 26

M1140.260 ANNUITIES

A. Introduction

An annuity is a sum paid yearly or at other specific times in return for the payment of a fixed sum. Annuities may be purchased by an individual or by an employer. For Medicaid purposes, an annuity means a contract or an agreement by which one receives fixed, non-variable payments on an investment for a lifetime or a specified number of years. An annuity must be issued by an insurance company, bank, or other registered or licensed entity approved to do business in the state in which the annuity was established.

B. Operating Policy

1. Revocable Annuity

An annuity that names revocable beneficiaries is considered to be an available resource because it can be surrendered, cashed in, assigned, transferred or have the beneficiary changed. Annuities are presumed to be revocable when the annuity contract does not state that it is irrevocable. The countable value of the revocable annuity is the amount of the funds in the annuity minus any fees required for surrender.

2. Annuities Purchased with Assets of a Third Party

Annuities purchased with the assets of a third party such as those received through a legal settlement are not considered to be countable resources.

3. Annuity Purchased Prior to February 8, 2006

An annuity purchased prior to February 8, 2006, is considered a countable resource if the annuity can be surrendered. The countable value of the annuity is the amount of the funds in the annuity minus any fees required for surrender.

4. Irrevocable Annuity Purchased on or after February 8, 2006

A non-employment related annuity purchased by or for an individual *using that individual's assets* on or after February 8, 2006, *is not* considered an available resource *if it is irrevocable*.

Prior to receiving long-term *services and supports (LTSS)* paid by Medicaid, all annuities purchased by the institutionalized individual or the community spouse on or after February 8, 2006, must name the Commonwealth of Virginia as the primary beneficiary for at least the total amount of medical assistance paid on behalf of the institutionalized individual. If there is a community spouse or minor or disabled child, the Commonwealth must be named as the remainder beneficiary behind the spouse or minor or disabled child.

For individuals applying for *LTSS*, annuities owned by either the applicant or the applicant's spouse must also be evaluated using the policy in M1450.200 to determine whether an uncompensated asset transfer has occurred.

S1140.300 PROMISSORY NOTES, LOANS, AND PROPERTY AGREEMENTS

A. Introduction

1. General

The context of the instruction in this section is the individual as the creditor (lender of money, seller of property) and, therefore, as the owner of the promissory note, loan, or property agreement.

For cash loans, see S1120.220.

2. Promissory Note

A promissory note is a written, unconditional agreement whereby one party promises to pay a specified sum of money at a specified time (or on demand) to another party. It may be given in return for goods, money loaned, or services rendered.

3. Loan

A loan is a transaction whereby one party advances money to or on behalf of another party, who promises to repay the lender in full, with or without interest. The loan agreement may be written or oral, and must be enforceable under State law. A written loan agreement is a form of promissory note.

4. Property Agreement

A property agreement is a pledge or security of particular property for the payment of a debt or the performance of some other obligation within a specified period. Property agreements on real estate generally are referred to as mortgages but also may be called land contracts, contracts for deed, deeds of trust, and so on. Personal property agreements—e.g., pledges of crops, fixtures, inventory, etc.—are commonly known as chattel mortgages.

B. Operating Policy

1. Real Estate Contracts Prior to Settlement

When an individual enters into a contract for the sale of real estate, he or she owns two items until the settlement of the sale is completed: the real estate and the contract. The real estate is not a resource because the individual cannot convert it to food or shelter. The contract is a property agreement whose status and value as a resource must be determined in accordance with this section.

2. Value as a Resource Assumption

Assume that the value of a promissory note, loan, or property agreement as a resource is its outstanding principal balance unless the individual furnishes reliable evidence that it has a CMV of less than the outstanding principal balance (or no CMV at all).

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2006
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.300	Page 26b

C. Development and Documentation – Written Agreement

1. **Copy of Agreement** Obtain a copy of the agreement for the file. Cease development if including the original balance in countable resources does not cause ineligibility.
2. **Principal Balance** If including the original balance in countable resources causes ineligibility and payments have been made, obtain evidence of the outstanding principal balance.

Cease development if including the outstanding principal balance in countable resources does not cause ineligibility.
3. **Rebuttal Rights** If including the outstanding principal balance in countable resources causes ineligibility, **inform the individual** that we will use the outstanding principal balance in determining resources unless he or she submits:
 - evidence of a legal bar to the sale of the agreement ; or
 - an estimate from a knowledgeable source, showing that the CMV of the agreement is less than its outstanding principal balance.
4. **Knowledgeable Sources** Knowledgeable sources include anyone regularly engaged in the business of making such evaluations: e.g., banks or other financial institutions, private investors or real estate brokers. The estimate must show the name, title, and address of the source.

D. Related Policy

1. **Loans and the Borrower** See S1120.220 on how to determine whether the proceeds of a loan are income or a resource to the borrower.
2. **Home Replacement Funds Exclusion** See S1130.110 when a contract is from the sale of an excluded home.
3. **Individuals Requesting Long-term Care** *For individuals requesting Medicaid payment for long-term care who have purchased promissory notes, loans, or mortgages on or after February 8, 2006, see M1450.540.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2006
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.305	Page 27

M1140.305 CONTINUING-CARE RETIREMENT COMMUNITY ENTRANCE FEES

A. Introduction

Continuing-care or life-care retirement communities generally provide guaranteed care for the life of the individual in return for a set entrance fee as well as monthly maintenance fees. If the applicant has entered into a continuing-care contract or agreement with a retirement community, the entrance fee paid by the individual to the retirement community must be evaluated.

B. Operating Policy

An individual's entrance fee paid to a continuing-care retirement or life-care retirement community that collects an entrance fee upon admission shall be considered an available resource if:

- the individual has the ability to use the entrance fee, or the contract provides that the entrance fee may be used, to pay for care should other resources or income of the individual be insufficient to pay for such care;*
- the individual is eligible for a refund of any remaining entrance fee when the individual dies or terminates the continuing-care or life-care contract and leaves the retirement community; and*
- the entrance fee does not confer an ownership interest in the continuing-care retirement community or life-care community.*

C. Development and Documentation

1. Copy of Contract/Agreement

Obtain a copy of the contract or agreement. If one or more of the conditions in B. above is not met in the terms of the contract, do not develop the contract further as a resource..

2. Countable Value of Entrance Fee

If all of the conditions in B. above are met in the terms of the contract or agreement, determine the countable value of the entrance fee. Contact the retirement community to determine:

- the amount of the entrance fee actually paid if the contract or agreement stipulates installment payments, and*
- whether any amount has been refunded to the applicant.*

Subtract any amount that the retirement community has refunded from the amount paid. Document the resulting balance in the case record as a countable resource.

Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.310	Page 28

M1140.310 LIFE INSURANCE

A. Introduction

This section provides broad policy principles concerning the treatment of life insurance policies for Medicaid purposes. Detailed instructions on the development and, where applicable, the exclusion of life insurance are contained in M1130.300.

B. Policy Principles

1. Countability Based on Total Face Value

If the combined face values of all the life insurance policies an individual, owns on a given insured age 21 or older, exceed \$1,500, the cash surrender value of any such policy is a resource to the individual.

2. Policies Whose Face Values Are Not Taken into Account

For purposes of determining whether the combined face values of all the life insurance policies an individual owns on a given insured age 21 or older, exceed \$1,500, the face values of the following are not taken into account:

- term insurance that does not have a cash surrender value; and
- burial insurance; i.e., insurance whose terms preclude the use of policy proceeds (proceeds include any cash surrender value) for any purpose other than payment of the insured's burial expenses.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.401	Page 29

TRUSTS

M1140.400 TRUSTS ESTABLISHED BY A WILL

A. Policy

If a Medicaid applicant or recipient is the named beneficiary in a trust established by a will, determine from the terms of the trusts, what income or principal is available to the applicant or recipient. If the trust is "discretionary" determine what part of the corpus or income the trustee is making available to the applicant or recipient. Any corpus or income which the trustee does not make available cannot be counted in determining Medicaid eligibility.

M1140.401 TRUSTS WHICH WERE NOT CREATED BY A WILL

A. Policy

This section deals with the countable value of trusts or similar legal devices which were not established by a will. The trust may be revocable or irrevocable. The date the trust was established will affect how the trust is evaluated for Medicaid eligibility.

For detailed instructions on Trust Property, see:

- M1120.200, Trust Property
- M1120.201, Trust Established on or After August 11, 1993
- M1120.202, Trust Established for Disabled Individual on or After August 11, 1993
- M1130.520, Trust Established Between July 1, 1993 and August 10, 1993
- M1140.402, Medicaid Qualifying Trust (Created Prior to August 11, 1993)
- M1140.403, Trust(s) Created After July 1, 1993 and Before August 11, 1993 With Corpus in Excess of \$25,000

Manual Title	Chapter	Page Revision Date

M1140.000 TYPES OF COUNTABLE RESOURCES	M1140.402	30

M1140.402 MEDICAID QUALIFYING TRUSTS (CREATED PRIOR TO AUGUST 11, 1993)

A. Introduction

A "Medicaid qualifying trust" is a trust, or similar legal device, established (other than by a will) by an individual or an individual's spouse prior to August 11, 1993. Under this trust the individual may be beneficiary to *all/or* part of the payments from the trust and the distribution of such payments is determined by one or more trustees who are permitted to exercise any discretion with respect to the distribution to the individual.

EXCEPTION: A trust or initial trust decree established **prior** to April 7, 1986, solely for the benefit of an *intellectually disabled* individual who resides in an intermediate care facility for the *intellectually disabled* is not "Medicaid Qualifying Trust."

B. Trust Restrictions Not Recognized

The requirements of this section shall apply without regard to:

- ☐ whether or not the Medicaid qualifying trust is irrevocable or
- ☐ is established for purposes other than to enable a grantor to qualify for Medicaid; or
- ☐ whether or not the trustee(s) exercises his discretion to distribute any payments to the individual.

C. Development

1. Countable Value

The **maximum** amount of payments permitted under the terms of a "Medicaid Qualifying Trust" to be distributed to the grantor, **if** the trustee exercised his discretion to the **fullest** extent possible, shall be considered available in determining the grantor's eligibility for Medicaid.

D. Exception

A trust or initial trust decree established prior to April 7, 1986, solely for the benefit of a mentally retarded individual who resides in an intermediate care facility for the mentally retarded is not a "Medicaid Qualifying Trust."

E. References

M1120.200, Trust Property
M1120.201, Trusts Established on or after August 11, 1993.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 1997
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.404	Page 31

M1140.403 TRUST(S) CREATED AFTER JULY 1, 1993 AND BEFORE AUGUST 11, 1993 WITH CORPUS IN EXCESS OF \$25,000

- A. Policy** Single or multiple trusts created after July 1, 1993 and before August 11, 1993, with corpus or corpora in excess of \$25,000, will have the excess over \$25,000 evaluated for countable resources for Medicaid eligibility.
- B. Trust Restrictions Not Recognized** The following will not affect the evaluation of the countable value, regardless of whether or not the trust:
- is irrevocable; or
 - established for purposes other than to make the individual eligible for Medicaid; or
 - the trustee exercises his discretion to distribute trust payments to the applicant/recipient.
- C. Development/ Documentation**
- 1. Countable Value**
- a. Verify the current value of the corpus or corpora of the trust(s).
 - b. Prorate \$25,000 by the number of trusts.
 - c. Subtract the amount in b. above from the corpus or corpora of the trust(s).
 - d. The remainder of the corpus or corpora of the trust(s)
 - that may be paid under the terms of the trust,
 - without any limits imposed by any void restrictive clauses within the trust
 is counted as an available resource.
 - e. The maximum amount of income payable from the trust according to its terms is considered available income whether or not it is actually paid to the applicant/recipient.
- D. References** Trusts Established Between July 1, 1993 and August 11, 1993, M1130.520

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2000
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.404	Page 32

M1140.404 TRUSTS ESTABLISHED ON OR AFTER AUGUST 11, 1993

A. Introduction

The enactment of OBRA 93 affects the treatment of trusts. For purposes of determining the countable value of a trust for an individual's eligibility for Medicaid, the rules specified in this section shall apply to a trust established by such individual on or after August 11, 1993.

For the purposes of determining an individual's eligibility for Medicaid, the rules specified below shall apply to a trust established by such individual.

EXCEPTION: Certain trusts established for disabled individuals
See M1120.202.

B. Policy

1. Who Establishes Trust

a. Individual Establishes Trust

An individual shall be considered to have established a trust if assets of the individual were used to form all or part of the corpus of the trust and if any of the following individuals established such trust other than by will:

- the individual,
- the individual's spouse,
- a person, including a court or administrative body (i.e., Power of Attorney, etc.), acting at the direction or upon the request of the individual or the individual's spouse.

b. Funeral Director Establishes Trust

A funeral home director who operates his business in Virginia can legally establish an irrevocable trust for an individual for the purpose of paying for funeral and burial expenses. Under a "two-step" process, funds transferred from the individual to the funeral home are deemed a compensated transfer for value when the amount of the funds transferred does not exceed the value of the goods and services purchased. The entire amount of the trust is exempt when placed in an irrevocable trust by the funeral director.

The "two step" process occurs when:

- 1) the individual signs a preneed contract with a funeral home director promising prepayment in return for specific funeral merchandise and services and pays the agreed upon amount in the form of a direct cash payment or purchase of a life insurance policy or annuity to the

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2000
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.404	Page 32a

funeral director;

- 2) then, the funeral home director in turn places the money, life insurance policy or annuity into a trust, established by a person other than the individual.

2. Treatment of Assets in Trust

In the case of a trust, the corpus of which includes assets of an individual and assets of any other person or persons, the provisions of this section shall apply to the portion of the trust attributable to the assets of the individual.

This section shall apply without regard to:

- the purpose for which a trust is established,
- **whether the trustee has or exercises any discretion under the trust,**
- any restrictions on when or whether distributions may be made from the trust, or
- any restriction on the use of distributions from the trust.

3. Revocable Trust

In the case of a revocable trust:

- a. the corpus of the trust shall be considered resources available to the individual.
- b. Payments from the trust to or for the benefit of the individual shall be considered income of the individual.
- c. Any other payments from the trust shall be considered assets disposed of by the individual.

4. Irrevocable Trust

a. Payment Can Be Made To Individual

When there are any circumstances under which payment from the trust corpus or income could be made to or for the benefit of the individual, the following rules apply:

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2007
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.404	Page 32b

- payments from the trust corpus or income which are made to or for the benefit of the individual shall be considered **income** to the individual;
- income from the trust corpus that could be paid to the individual is considered a **resource** to the individual;
- the portion of the trust corpus that could be paid to the individual is considered a **resource** to the individual;
- a payment from the trust that is NOT made to or for the benefit of the individual shall be considered a transfer of assets by the individual.

NOTE: An irrevocable trust for burial is a trust from which payment will be made for the benefit of the individual.

b. Payment CANNOT Be Made To Individual

- 1) When all or any portion of the corpus of the trust cannot be paid under any circumstances to the individual, all (or any such portion) of the trust corpus shall be considered a transfer of assets. The effective date of the transfer of assets is the date the trust was established.
 - 2) Any income earned by the corpus of the trust, from which no payment could be made (under any circumstances) to the individual, shall be considered a transfer of income.
- c.** Under the provisions of Section 55-19.5 of the Code of Virginia, clauses in a trust which foreclose or prohibit payments to an individual if he requires nursing home or medical care, or if he applies for Medicaid, are void. However, if a trust has been written in another state in which such clauses are legally enforceable, the date payment is foreclosed by such a clause is a transfer of assets that occurs on the date the payment is foreclosed.
- d.** In determining the value of the trust assets transferred, include all payments made from the trust after the date the trust was established or, if later, the date payment to the individual was foreclosed.

If the individual adds funds to the trust after these dates, the addition of those funds is considered to be a new transfer and effective on the date the funds are added.

Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.500	Page 33

M1140.500 WORKERS' COMPENSATION MEDICARE SET-ASIDE ARRANGEMENT ACCOUNTS

A. Introduction

A Workers' Compensation Medicare Set-aside Arrangement (WCMSA) is an arrangement which allocates a portion of a Workers' Compensation settlement for future medical expenses. The initial amounts of any set asides are determined on a case-by-case basis and are reviewed by the Centers for Medicare and Medicaid Services (CMS). Most WCMSAs will be placed in interest bearing accounts and are self-administered by applicants/enrollees, or by a competent administrator.

Funds authorized by a WCMSA are unearned income in the month of receipt, and any amount retained following the month of receipt is a countable resource. Section S0830.235 contains information on Workers' Compensation payments.

B. Operating Policy

1. Ownership

Assume that the person designated as owner in the account title owns all the funds in the account.

2. Right to Withdraw Funds

Absent evidence to the contrary, assume that the person shown as owner in the account title has the legal right to withdraw funds from the account.

3. Fiduciaries

A fiduciary's right to withdraw funds is the same as the owner's right to withdraw them.

4. Right to Use for Support and Maintenance

Although funds are intended for specific medical expenses, there are no legal restrictions as to how an individual uses the funds. Assume that an individual who owns and has the legal right to withdraw funds from a WCMSA also has the legal right to use them for his own support and maintenance.

C. Development and Documentation

The development and documentation instructions for checking and savings accounts contained in section S1140.200 apply to WCMSA accounts.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 1997

S1140.990 RESOURCES GUIDE -- OPTIONAL DESK AID

A. Introduction

This section provides:

- general information about various investment vehicles encountered; and
- serves as a guide to appropriate instructions which follow this table.

B. Description of Checking and Savings Accounts

1. Savings Accounts

Savings accounts pay interest unless the financial institution has a minimum balance requirement and the account does not meet this requirement. Account owners can make deposits and withdrawals at any time in any amount. Develop per S1140.200 - .205.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.990	Page 36

2. **Now and Super Now Accounts**
NOW (Negotiable Order of Withdrawal) accounts are interest-bearing checking accounts. Super NOW accounts are money market checking accounts. They have higher interest rates than NOW accounts. Develop per S1140.200 -.205.
3. **MMDA (Money Market Deposit Accounts)**
MMDA's allow banks to compete with mutual fund money markets. They are interest-bearing checking accounts. Develop per S1140.200 -.205.
4. **CD (Certificate of Deposit)**
A CD is a bank deposit that cannot be withdrawn for a certain period of time or that can be withdrawn early only with a penalty. Develop per S1140.210.

C. Description of Bonds

1. **Corporate Bonds**
Develop corporate bonds in accordance with the instructions in S1140.250.
 - a. General Type
Corporations sell corporate bonds to raise capital. There are two types:
 - **debentures**, which are backed by the issuer's full faith and credit and
 - **mortgage backed bonds**, which are backed by a lien on the company's assets.
 - b. Two Forms of Each Type
Corporate bonds are issued in two forms:
 - **registered**, which pay interest to their registered owner; and
 - **bearer or coupon** bonds, which pay it to whomever holds the bond.
 - c. Convertible Bonds
Convertible bonds are debentures that can be exchanged for a specified number of shares of a company's common stock.
 - d. Junk Bonds
High risk bonds are called junk bonds.
 - e. Interest
Corporate bonds usually pay a fixed rate of interest for a fixed period of time--annually, semi-annually, or quarterly.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M11	August 1994
Subchapter Subject	Page ending with	Page
M1140.000 TYPES OF COUNTABLE RESOURCES	S1140.990	37

2. **Municipal or Tax Exempt Bonds**
- Municipal bonds are to city, county and State governments and authorities what corporate bonds are to corporations. They are exempt from Federal taxes and often are exempt from State and local taxes as well. Most municipal bonds are one of two general types:
- general obligation bonds, which are backed by the full faith and credit of the issuing municipality and supported by the taxing power; and
 - revenue bonds, which are backed by the project being financed and the revenue or user fees it generates.

Other types of municipals are: limited-tax bonds, anticipation notes, industrial development bonds, and life-care bonds.

Develop municipal bonds in accordance with the instructions in S1140.250.

3. **UIT (Unit Investment Trust)**
- A UIT is a package of bonds in a portfolio. One can buy share of the package for \$1 to \$1,000 per share with a minimum investment of \$750 to \$5,000, depending on the trust. The interest rate usually is fixed at purchase and does not change. Units usually are sold or redeemed through the trust sponsor.
4. **Zero Coupon Bonds**
- Zero coupon bonds usually are issued by corporations. They do not pay current interest; accrued interest is paid at maturity. The U.S. Government does not issue zero coupon bonds directly. However, see TIGER and CATS.
5. **Buying and Selling Bonds**
- Bonds usually are bought and sold through brokers, securities dealers, or other investors. They may sell for more or less than their face value or purchase price, depending on a variety of factors.
6. **Reading Bond Quotations**
- The following is a typical bond quotation, showing from left to right:
- the name and the issuer (AT&T);
 - the bond's nominal or coupon rate (3 7/8 percent);
 - the last two digits of the year in which the bond matures (1990);
 - the current yield (5.6 percent);
 - the number of bonds traded during the year (54,000);
 - the highest, lowest, and last price of the bond for the period covered by the quotation (bond prices are quoted on a par of 100, so the last price of 69 1/4 equals \$692.50).
 - the net change in the bond price.

CURRENT		SALES				
ISSUE	YIELD	1000's	HIGH	LOW	CLOSE	CHANGE
AT&T	5.6	54	69 3/4	69 1/4	69 1/4	-3/8
3 7/8						

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.990	Page 38

D. Description of U.S. Government Securities

1. **Treasury Bills (T-Bills)** T-Bills are short-term obligations that require a minimum investment of \$10,000. Certificates are not issued for T-Bills; they are registered in book form at the Treasury Department and receipts are provided as proof of purchase. T-Bills can be sold before maturity. Develop in accordance with S1140.250.
2. **Treasury Notes and Bonds** Treasury notes and bonds are similar to T-Bills but have longer maturities and a lower minimum investment requirement. They have been registered in book entry form since July 1986 but were sometimes issued as bearer bonds before then. Develop per S1140.250.
3. **Tiger and Cats** These are Government securities issued with a zero coupon concept. The broker removes the interest coupons from the security and sells it at a big discount with a long maturity. Accrued interest is then paid at maturity. These bonds can be sold before maturity. Develop in accordance with S1140.250.
4. **Federal Agency Securities** Some of the Federal agencies with charters to issue securities are:
 - the Federal Home Loan Bank Board;
 - the Federal Home Loan Mortgage Corporation (FREDDIE MAC);
 - the Export-Import Bank; and
 - the Government National Mortgage Association (GINNIE MAE).

Minimum investment requirements range from \$1,000 to \$25,000. Develop per S1140.250.
5. **U.S. Savings Bonds** U.S. Savings Bonds are registered, nontransferable Treasury securities Develop per S1140.240.

E. Description of Mutual Funds

1. **General** "Mutual fund" is a term that encompasses a wide range of investments. Basically, it is a pool of assets (stocks, bonds, etc.) managed by an investment company. A mutual fund share represents ownership interest in this pool as opposed to a particular stock or bond. Develop mutual funds per S1140.230.
2. **Growth Funds** The primary objective of these funds, also known as performance funds and hedge funds, is aggressive long term growth of investment rather than current income. Dividends typically are low.
3. **Income Funds** The objective is current income through high dividends and interest, as opposed to capital gains.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.990	Page 39

- 4. Balanced Funds** The objective is a balance of growth and income.
- 5. Municipal Bond (Tax Exempt Fund)** The fund invests in tax-exempt bonds and the interest is passed along to holders on a tax-exempt basis.
- 6. Money Market Funds** The fund invests in conservative vehicles such as T-Bills and bank certificates. The minimum investment usually is \$1,000, but may be less. Income may fluctuate daily based on interest rates. Money market funds often have a check-writing feature.
- 7. Buying and Selling Mutual Funds** "Load" funds are sold through a broker who collects a commission. "No-load" funds usually are purchased directly from the fund (no commission) and often are advertised in newspapers and magazines.
- 8. Reading Mutual Fund Quotations** The format of the following table is typical of those shown in newspapers and financial publications, showing from left to right:
 - the names of the funds available for each management group (in this case, four funds managed by the Fund Founders Group);
 - the high and low values for the preceding 52-week period;
 - the most recent closing price;
 - the change over the previous week; and
 - the fund's income and capital gains totals for the previous 12 months.

Fund Founders Group	52 Weeks		Close	Week's Change	Income*	Capital Gains
	H	L				
Growth n.	8.77	6.28	6.37	-0.08	0.157	2.505
Income n.	15.18	13.72	13.87	+ 0.01	1.273	0.232
Mutual	11.56	9.74	9.98	- 0.07	0.426	0.706
Special n.	37.11	22.88	23.54	- 0.13	1.900	1.395

n = no-load
*= last 12 months

F. Description of Stocks

- 1. Common Stocks** Common stock usually is held in the form of a certificate registered in the owner's name. Dividends usually are paid quarterly and may vary with company earnings.
 - "Listed" stocks are those listed on the NYSE, AMEX, or on one of the regional exchanges such as Boston, Philadelphia, or Chicago.
 - Over-the-counter (OTC) stocks, which include "penny" stocks, are not listed on the major exchanges. They usually are reported in the National Association of Security Dealers Automated Quotations (NASDAQ) system.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date August 1994
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with S1140.990	Page 40

2. Preferred Stock

Preferred stock receives preference with respect to dividends and, in case of bankruptcy, the distribution of assets. Preferred stock dividends:

- are paid at a fixed rate;
- must be paid before common stock dividends can be paid; and
- must be made up later, when not paid timely, whereas common stock dividends may be skipped.

3. Reading Stock Quotations

Stock tables vary little from publication to publication. The following quote is typical, showing from left to right:

- the standard abbreviations of the name of the company (Philadelphia Electric in this case), followed by "pf" for preferred stock on the second line;
- the dividend amount;
- the price-to-earnings ratio;
- sales volume, in thousands;
- the day's high, low, and closing prices ($22 \frac{3}{4} = \$22.75$); and
- the change in price from the previous day.

NAME	DIV	PE	SALES	HIGH	LOW	LAST	CHG
Phi El	2.20	9	4323	$22 \frac{7}{8}$	$22 \frac{5}{8}$	$22 \frac{3}{4}$	- $\frac{1}{8}$
Phil E pf	4.30	-	50	$42 \frac{3}{4}$	$42 \frac{3}{4}$	$42 \frac{3}{4}$	-

G. Description of Options

An option is the right to sell or buy something at a specified price by a specified date. The "something" is usually stock, but there are options on interest rates, stock market indexes, commodity futures, and other items as well. An option to sell is called a "put." An option to buy is a "call." The value of an option depends on:

1. General

- the length of the contract (3, 6, or 9 months);
- the difference between the CMV of the item and the price at which the put permits it to be sold or the call permits it to be bought; and
- the volatility of the item (how much its CMV is expected to fluctuate).

2. Buying and Selling Options

Options can be sold through a broker. If the CMV of an item goes up in relation to a call price, the value of the option increases. If it goes down, the value of the option decreases. The reverse is true for a put.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M11	August 1994
Subchapter Subject	Page ending with	Page
M1140.000 TYPES OF COUNTABLE RESOURCES	S1140.990	41

3. Reading Option Quotations

There are several exchanges across the country that list option prices for about 300 stocks: the Chicago Board of options Exchanges (CBOE), AMEX, the Philadelphia Stock Exchange, and the Pacific Stock Exchange. Transactions on these exchanges are listed in financial publications and many newspapers.

Although a stock option contract controls 100 shares of stock, options are quoted on the price per share. If a contract sells for \$300, the cost per share is \$3. Options come due and are quoted for each January, April, July and October.

The following example is a typical options quotation and shows, from left to right:

- the name of the stock (Tandy), the expiration month (April) and per-share price of the option (\$30 for put option on line 2);
- the number of contracts sold (996 on line 2);
- the high, low, and closing prices for a contract (\$56.25, \$25, and \$37.50, respectively, on line 2); and
- the net change in the value of the contract (\$6.25).

Name, Expiration Date, and Price	Sales	High	Week's Low	Net Last	Change
Tandy Apr.30	1317	4 3/4	2 3/4	3 1/8	- 1/8
Apr. 30p	996	9/16	1/4	3/8	-1/16

H. Description of IRA (Individual Retirement Account) and Keogh Account

The terms IRA and Keogh account refer to retirement plans. They do not identify the underlying investment vehicle, which can be a bank account, CD, mutual fund, etc. Develop IRA's and Keogh accounts in accordance with the section(s) that deal with the underlying investment vehicle.

QDWI (QUALIFIED DISABLED AND WORKING INDIVIDUALS)

A. Introduction

This appendix contains the policy regarding resources that are treated differently for the QDWI covered group. The resource policy for QDWI individuals is identical to SSI resource policy. The policy in this appendix applies to QDWI evaluations only.

B. QDWI Resource Evaluation

Resource treatment and evaluations used in QDWI evaluations are listed in:

- S1110 Resources, General;
- S1120 Identifying Resources;
- S1130 Resource Exclusions; and
- S1140 Countable Resources.

C. Resources Treated Differently

The following types of resources are treated differently for QDWI individuals. The differences are:

- automobiles*
- burial fund exclusions - maximum amount of \$1,500
- burial plots - only one space per individual and immediate family members
- home property*
- household goods and personal effects*
- inheritances and unprobated estates*
- life estates*
- real property whose sale would cause undue hardship, due to loss of housing, to a co-owner*
- real property following reasonable but unsuccessful efforts to sell

The policy for counting resources marked with an asterisk is contained in this appendix.

D. References

Information on how to treat other types of resources of a QDWI individual is found within each of the following sections:

M1130.400 Burial Spaces
S1130.410 Burial Fund Exclusions
M1140.110 Countable Life Estate Interest

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001

DETERMINING *QDWI* ELIGIBILITY BASED ON RESOURCES

S1110.600 FIRST-OF-THE-MONTH (FOM) RULE FOR MAKING DETERMINATIONS

- A. Policy Principle -- the FOM Rule** We make all resources determinations as of the first moment of a calendar month.
- B. Policy Principle -- Significance of the FOM Rule**
- 1. Increase in Value of Resources** We consider any increase in the value of an individual's resources in the resources determination as of the first moment of the month following the month in which:
 - the value of an existing resource increases (e.g., the value of a share of stock goes up or installment payments increase a property's equity value);
 - an individual acquires an additional resource (e.g., inherits property); or
 - an individual replaces an excluded resource with one that is not excluded (e.g., sells an excluded automobile for nonexcluded cash).
 - 2. Decrease in Value of Resources** We consider any decrease in the value of an individual's resources in the resources determination as of the first moment of the month following the month in which:
 - the value of an existing resource decreases (e.g., the value of a share of stock goes down);
 - an individual spends a resource (e.g., withdraws \$150 from a savings account to pay bills); or
 - an individual replaces a countable resource with one that is not countable (e.g., trades a countable piece of real property for an excluded automobile).
 - 3. Treatment of Assets Under Income and Resources Counting Rules** When an individual receives something in cash or in kind during a month, we evaluate it under the appropriate income-counting rules in that month. If the individual retains the item into the month following that of receipt, we evaluate it under the resource-counting rules. Thus, we do not evaluate the same asset under two sets of counting rules for the same month.
 - 4. Receipts from the Sale, Exchange, or Replacement of a Resource** If an individual sells, exchanges, or replaces a resource, what he/she receives in return is not income. It is a different form of resource. This includes assets which have never been subject to resources counting because the owner sold, exchanged, or replaced them in the same month in which he/she received them.

The concept of such transactions not producing income does not apply to receipts from the sale of timber, minerals, or other like items which are part

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 3

of the land.

C. Example--Receipt of a Resource Considered as Income and Exchanged in Same Month

Miss Laramie, a disabled individual, received a \$350 unemployment insurance benefit on January 10 at which time it was unearned income. On January 18, she used the \$350 to purchase several shares of stock; i.e., she exchanged one resource (cash) for another resource (stock). We never counted the \$350 cash payment as a resource because Miss Laramie exchanged it for stock in the month of receipt. The stock is not income; it is a different form of resource. Since a resource is not countable until the first moment of the month following the receipt, we first count the stock in the resources determination made as of February 1.

S1120.215 INHERITANCES AND UNPROBATED ESTATES

A. Introduction

An ownership interest in an unprobated estate may be a resource if an individual:

- *is an heir or relative of the deceased; or*
- *receives any income from the property; or*
- *under State intestacy laws, has acquired rights in the property due to the death of the deceased.*

B. Operating Policy

1. When to Develop

We develop for this type of resource only if:

- *the property in question is not excludable under any of the provisions in S1110.210 B.; and*
- *counting the property's value would result in excess resources.*

2. Ownership Interest

There is an ownership interest in an unprobated estate if:

- *documents (e.g., a will or court records) indicate an individual is an heir to property of a deceased; or*
- *an individual has use of a deceased's property or receives income from it; or*
- *documents establish, or the individual alleges, a relationship between himself and the deceased which, under State intestacy laws, awards the individual a share in the distribution of the deceased's property; and*
- *the inheritance, use of income, and distribution are uncontested.*

3. When Unprobated Estate Can Be a Resource

We do not consider that an inheritance is a resource until the month following the month in which it meets the definition of income. See S0830.550 for the income rules on inheritances. Thereafter, if retained, we evaluate the property as a resource.

C. Development and Documentation

1. Ownership Interest

Document the file, as applicable, with a copy of:

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 4

- *an inheritance or relationship document (or a signed statement alleging a relationship);*
- *evidence of income from the property;*
- *individual's signed statement concerning his/her use of the property and whether there is contest of any factor; or*
- *other evidence showing that the situation meets the criteria in B.*

2. Sole vs. Shared

Follow S1110.510 and S1140.030 to determine and document whether there are other owners and, if so, whether the individual needs their consent to sell his/her share of the property.

3. Status as a Resource

- *If the individual is the sole owner or if other owners give needed consent to sell, the property is the individual's resource. Some States do not require the consent of other heirs in order for a co-owner to sell property.*
- *If other owners withhold consent and that consent is necessary to sell, the property is not a resource until the estate has been through probate. It is subject to the resource counting rules the month following the month it meets the definition of income.*

4. Value of Resource

- CMV - Develop the property's CMV (and EV, if appropriate) following guidelines in S1140 for the particular type of property involved.*
- Shared Ownership*
 - *For real property, and most personal property, see S1140.030 B.*
 - *For checking/savings accounts and time deposits, see S1140.205 and S1140.210.*

REAL PROPERTY

S1130.100 THE HOME

A. Policy Principles

1. Exclusion of the Home

An individual's home, regardless of value, is an excluded resource.

2. Definition of the Home

An individual's home is property in which he or she has an ownership interest and that serves as his or her principal place of residence. It can include:

- *the shelter in which he or she lives;*
- *the land on which the shelter is located; and*
- *related buildings on such land.*

3. Principal Place of Residence

An individual's principal place of residence is the dwelling the individual considers his or her established or principal home and to which, if absent, he or she intends to return. It can be real or personal property, fixed or mobile, and located on land or water.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 5

- 4. Individual Owns The Land** *For purposes of excluding "the land on which the shelter is located" (A.2. above), it is not necessary that the individual own the shelter itself.*
- EXAMPLE:** If an individual lives on his or her own land in someone else's trailer, the land meets the definition of home and is excluded.*
- 5. Extent of Property To Which The Exclusion Applies**
- a. Land**
The home exclusion applies not only to the plot of land on which the home is located, but to any land that adjoins it.
- Land adjoins the home plot if not completely separated from it by land in which neither the individual nor his or her spouse has an ownership interest.*
- Easements and public rights of way (utility lines, roads, etc.) do not separate other land from the home plot.*
- b. Buildings**
The home exclusion applies to all buildings on land excluded per a. above.
- 6. Property That No Longer Serves As The Principal Place of Residence**
- a. General Rule**
Property ceases to be the principal place of residence - and, therefore, to be excludable as the home - as of the date that the individual, having left it, does not intend to return to it.
- Such property, if not excluded under another provision, will be included in determining countable resources as of the first moment of the first day of the following month.*
- b. Exceptions to General Rule**
Even if the individual leaves the home without the intent to return, the property remains an excluded resource for as long as:
- *a spouse or dependent relative of the individual continues to live there while the individual is institutionalized; or*
 - *its sale would cause undue hardship, due to loss of housing, to a co-owner of the property.*
- 7. Dependent Relative Defined**
- a. Dependency** *may be of any kind (financial, medical, etc.).*
- b. Relative means:**
- *child, stepchild, or grandchild;*
 - *parent, stepparent, or grandparent;*
 - *aunt, uncle, niece, or nephew;*
 - *brother or sister, stepbrother or stepsister, half brother or half sister;*
 - *cousin; or*
 - *in-law.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2013
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 6

B. Development and Documentation - Initial Claims

1. Ownership

a. Use of Allegation

Accept an individual's allegation of home ownership unless the file raises a question about it (e.g., a life estate is involved, the individual is under age 18, does not live with a parent, and does not live with someone else). If there is a question, have the individual submit one of the items of evidence listed in b. - d., below.

b. Evidence of Real Property Ownership

- tax assessment notice;
- recent tax bill;
- current mortgage statement;
- deed;
- report of title search;
- evidence of heirship in an unprobated estate (e.g., receipt of income from the property, a will, or evidence of relationship recognizable under State intestate laws in cases where the home is unprobated property).

c. Evidence of Personal Property Ownership (e.q., a Mobile Home)

- **title;**
- **current registration.**

d. Evidence of Life Estate or Similar Property Rights

- deed;
- will;
- other legal document.

e. Equitable Ownership

Virginia does not recognize equitable ownership of real property.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 7

2. **Principal Place of Residence -- Operating Assumption**
*Absent ownership in more than one residence or evidence that raises a question about the matter, **assume** that the alleged home is the individual's principal place of residence.*

3. **Indication of More than One Residence**
*If an individual alleges or other evidence indicates ownership of more than one residence, **obtain** his or her signed statement concerning such points as:*
 - *how much time is spent at each residence;*
 - *where he or she is registered to vote;*
 - *which address he or she uses as a mailing address or for tax purposes.*

***Determine** the principal place of residence accordingly and document the determination in file.*

4. **Evidence Indicates Nonadjoining Property**
 - a. **Individual Agrees With Evidence**
If evidence indicates that land the individual owns does not adjoin the home plot, and the individual agrees that it does not:
 - ***obtain** his or her statement to that effect; and*
 - ***develop** the nonadjoining portion per S1140.100 (Nonhome Real Property) or S1130.500 (Property Essential to Self-Support), as applicable.*
 - b. **Individual Disagrees With Evidence**
If the individual maintains that all the land adjoins the home plot, document the file with:
 - *a sketch of the land showing the boundaries of the various plots and the location of the shelter used as the home; and*
 - *evidence of how the land is treated for tax assessment purposes.*

The sketch may be by the individual, from public records, or by the Eligibility Worker (from direct observation).

The tax assessment information may be in the form of a tax assessment notice or obtained from the appropriate tax jurisdiction and recorded in case record
 - c. **Combined or Single Holding for Tax Assessment**
Assume that the land is a single piece of property in which all the land adjoins the home plot if:
 - *it is recorded and treated as a single holding for tax assessment purposes; or*
 - *the original holding has been subdivided, but still is treated as a single holding for tax assessment purposes.*
 - d. **More Than Single Holding for Tax Assessment**
If the land is recorded and treated as two or more holdings for tax assessment purposes, use the sketch to determine whether other holdings adjoin the home plot.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 8

**5. Absences From
The Home**

a. Summary of Development

If the individual is in an institution, determine whether a spouse or dependent relative is living in the home (see b. below).

If no spouse or dependent relative is living the home, or if the absence is for a reason other than institutionalization, determine:

- *whether the individual intends to return to the home (see c. below); and*
- *if not, whether the sale of the home would cause undue hardship, due to loss of housing, to a co-owner (see D.1. below).*

NOTE: *If a previously undeveloped absence from the home has ended, assume that the individual always intend to return. The absence, regardless of duration, will not affect the home exclusion.*

b. Spouse or Dependent Relative Development

Obtain a signed statement from the individual as to:

- *whether anyone is living in the home while the individual is in the institution;*
- *if so, how that person is related to the individual, if at all; and*
- *if related (except for the individual's spouse), how that person is dependent on the individual, if at all.*

Absent evidence to the contrary, accept the allegations.

c. "Intent to Return" Development

If the individual has left his or her home but intends to return to it, see D. below for the necessary development.

NOTE: *"Intent to return" development applies only to the **continued** exclusion of property which met the definition of the individual's **home** prior to the time the individual left the property. See A.2. above for the definition of "home."*

**C. Procedure – Post-
eligibility**

If, after Medicaid eligibility is established, an individual receives real property - for example, as an inheritance or gift - which may be excludable as his/her home, apply the policy and procedures in A. and B. above to determine whether the home exclusion applies.

Redevelop the exclusion from resources of an individual's home only if something raises a question about the correctness of the original determination or indicates that the exclusion may no longer apply (e.g., a change of address).

If the individual has left his or her home but intends to return to it, see D. below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 9

**D. Procedure --
"Intent to Return
Home"
Development**

**1. Obtain
Statement**

Obtain a signed statement from the individual as to:

- *when and why he or she left the home;*
- *whether he or she intends to return; and*
- *if he or she does not intend to return, when that decision was made.*

NOTE: *If the individual has a representative payee, obtain the "intent" statement from the payee.*

This statement governs the "intent to return" determination unless the statement is self-contradictory (see 2. through 4. below).

**2. Self-
Contradictory
Statement**

Consider a statement to be self-contradictory if it contains conflicting or unclear expressions of intent.

Examples of self-contradictory statements:

"Sometimes I want to go home and sometimes I don't."

"I intend to go home but I also want to stay here."

"Yes, I want to go home, but I really don't know if I should."

**3. Factors Not to
Consider**

*Do not consider other factors, such as the individual's age, physical condition, or other circumstances when determining intent to return home. Assuming the individual is mentally competent, age, mental capacity, and physical condition are **not** factors in evaluating the individual's statement of intent.*

Example: *The recipient is 93 years old and in the intensive care unit of a hospital. She tells the Eligibility Worker that her doctor believes she may not be able to leave the hospital and return home. However, she states that she intends to return to her former residence as soon as she is well enough to leave the hospital. Based on her statement, "intent to return home" is established.*

Example: *The recipient's home was partially destroyed by fire. He does not know when the necessary repairs will be completed. In the meantime, he is living with his sister. He states he intends to return to the former residence as soon as possible. Based on his statement, "intent to return home" is established.*

**4. Obtaining More
Information If
Needed**

If the individual's statement of intent is self-contradictory, contact someone who knows the situation, such as a physician, family member, or close friend or relative, to clarify the situation.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 10

S1130.130 REAL PROPERTY WHOSE SALE WOULD CAUSE UNDUE HARDSHIP, DUE TO LOSS OF HOUSING, TO A CO-OWNER

A. Policy Principles

1. ***Exclusion*** *The value of an individual's ownership interest in jointly owned real property is an excluded resource **for as long as** sale of the property would cause undue hardship, due to loss of housing, to a co-owner.*
2. ***Undue Hardship*** *Undue hardship would result if such co-owner:*
 - *uses the property as his or her principal place of residence;*
 - *would have to move if the property were sold; and*
 - *has no other readily available housing.*

B. Development and Documentation-- Initial Applications and Post-Eligibility

1. ***Allegations of Loss of Housing for Co-Owner*** *If someone alleges that the sale of certain real property would force a co-owner living on it to move, obtain:*
 - *the individual's signed statement to that effect, and*
 - *evidence of joint ownership (see S1130.100 B.1.b.-d.).*

If co-ownership is not proven, skip to 3. below. Otherwise, obtain the statement in 2. below.
2. ***Required Statement from Resident Co-Owner*** *Obtain a statement from the co-owner regarding whether he or she:*
 - *uses the property as his or her principal place of residence;*
 - *would have to move if the property were sold; and*
 - *has other living quarters readily available.*

Apply the policy principle in A. above to determine whether, on the basis of the statements of the individual and the co-owner, the sale of the property would cause undue hardship to the co-owner.

Accept any reasonable allegation from the co-owner that there is no readily available housing (e.g., no other affordable housing available or no other housing with necessary physical modifications for a handicapped individual).
3. ***Determination-Not Undue Hardship*** *If the property cannot be excluded on the basis of undue hardship:*
 - *document the file to that effect;*
 - *issue appropriate notice.*
4. ***Determination-Undue Hardship*** *If the property can be excluded on the basis of undue hardship:*
 - *document the file to that effect;*
 - *issue appropriate notice.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 11

S1130.140 REAL PROPERTY FOLLOWING REASONABLE BUT UNSUCCESSFUL EFFORTS TO SELL

A. Policy Principles

Real property that an individual has made reasonable but unsuccessful efforts to sell will be excluded from resource evaluation for as long as:

- the individual continues to make reasonable efforts to sell it; and
- including the property as a countable resource would result in a determination of excess resources.

B. Policy Reasonable Efforts to Sell/Buy

1. Reasonable Efforts to Sell -

The individual must make reasonable efforts to sell excess nonliquid property by taking all necessary steps to sell it through media serving the geographic area in which the person lives or, if different, where the property is located.

2. Reasonable Efforts to Sell Real Property

a. The individual/couple agrees in writing to:

- sell excess nonliquid resources at their current market value (CMV); and

b. Within 30 days of signing an agreement, the owner must:

- list the property with an agent; or
- begin to advertise in at least one of the appropriate media; place a "For Sale" sign on the property (if permitted); begin to conduct open houses or otherwise show the property to interested parties on a continuing basis; or attempt any other appropriate methods of sale such as posting notices on community bulletin boards, distributing fliers, etc.

NOTE: Reasonable efforts must be evaluated in consideration of the individual's circumstances and must not be restricted to "traditional" sales methods such as employing a real estate agent.

- c. Except for gaps of no more than 1 week, the owner must maintain efforts of the type listed in a. above; and
- d. The owner must not reject any reasonable offer to buy the property and must accept the burden of demonstrating to DSS's satisfaction that he rejected an offer because it was not reasonable.

3. Reasonable Offer to Buy Real Property

We assume that an offer to buy real property is reasonable if it is at least two-thirds of the estimated CMV unless the owner proves otherwise.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 12

a. Definition

Good cause exists when circumstances beyond an individual's control prevent his/her taking the required actions to accomplish reasonable efforts to sell.

b. Significance of Good Cause

- Without good cause, failure to meet the criteria outlined in 1. or 2. above, as applicable, means that the individual is not making reasonable efforts to sell the property. Therefore, his/her countable resources include the value of the excess property.
- With good cause, failure to meet the criteria in 1. or 2. above means that the exclusion continues.

C. Examples - Good Cause

- 1. No Offer to Buy**
The individual makes good faith efforts to sell excess nonliquid resources (or is prevented from doing so by circumstances beyond his/her control) but receives no offer to buy them.
- 2. Reliance on an Offer That Does Not Result in a Sale**
A legitimate or apparently legitimate offer to buy an excess nonliquid resource halts further efforts to sell it for a prolonged period of time, and the prospective buyer subsequently cannot or will not complete the purchase.
- 3. Escrow Begins But Closing Does Not Take Place Within Disposal Period**
The individual accepts an offer to buy real property, and escrow begins, which precludes acceptance of another offer. Closing (at which full or partial payment and transfer of title are exchanged) does not take place within the disposal period.
- 4. Incapacitating Illness Or Injury**
The individual becomes homebound or hospitalized for a prolonged period, due to illness or injury, and cannot take the steps necessary to sell the resource or to arrange for someone to sell it on his/her behalf.
- 5. Part-Owner Dies**
A part-owner of a resource dies, and administration or probate of the estate delays efforts to sell the resource (assuming that the property continues to be a resource.)

PERSONAL PROPERTY

S1130.200 AUTOMOBILES

A. Policy Principles

- 1. Automobile Defined**
For Medicaid purposes, "automobiles" means any vehicle used for transportation. It thus can include, in addition to cars and trucks: boats, snowmobiles, animal-drawn vehicles, and even animals.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 13

2. **Current Market Value Defined**
The CMV of an automobile is the average price an automobile of that particular year, make, model and condition will sell for on the open market (to a private individual) in the particular geographic area involved.
3. **Exclusion Regardless of Value**
One automobile is excluded regardless of value if, for the individual or a member of the individual's household, it is:
 - necessary for employment;
 - necessary for the treatment of a specific or regular medical problem;
 - modified for operation by, or the transportation of, a handicapped person; or
 - necessary, because of climate, terrain, distance or similar factors, for the
4. **Alternate Exclusion--Up to \$4,500 Of CMV**
If **no** automobile is excluded per 3. above, up to \$4,500 of the **CMV** of **one** automobile is excluded. If the CMV exceeds \$4,500, the excess counts as a resource unless the automobile can be excluded under some other provision. Equity value is not a consideration for purposes of this exclusion.
5. **Other Automobiles**
Any automobile an individual owns in addition to the one wholly or partly excluded per 3. or 4., and which cannot be excluded under another provision is a resource in the amount of its equity value.

**B. Operating Policy--
More Than One
Automobile
Owned**

1. **General Rule**
The exclusion applies in the manner most advantageous to the individual.
2. **Example--One of Two Cars is Totally Excluded**
If one of two cars can be excluded as necessary for medical treatment, and the other will be a countable resource, the exclusion applies to the car with the greater equity value regardless of which car is used to obtain medical treatment.
3. **Example--Neither of Two Cars is Totally Excluded, One Is Excluded to \$4,500 of CMV**
Mr. Smith owns two cars. One has a CMV of \$8,000 and an equity value of \$500. The other, which has been paid off, has a CMV and equity value of \$2,500. Neither can be excluded based on use.

Applying the \$4,500 exclusion to the car with the \$8,000 CMV would leave \$3,500 of the CMV of that car as a countable resource. It also would leave the \$2,500 equity value of the other car as a countable resource.

Applying the \$4,500 exclusion to the car with the \$2,500 CMV excludes that car entirely, leaving only the \$500 equity value of the other car to be included among countable resources. Therefore, the exclusion applies to the car with the \$2,500 CMV.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 14

C. Development and Documentation-- Initial Applications

1. Status as Automobile

a. Use of Allegation

For the purpose of determining whether a vehicle is used for transportation (i.e., whether it is an automobile for Medicaid purposes), accept the individual's account of its use unless a question arises. If a vehicle is not being used for transportation, find out why.

b. Vehicle Not Used for Transportation

- A temporarily broken down vehicle normally used for transportation still qualifies as an automobile. One that has been junked or that is used only as a recreational vehicle (such as a boat used weekends on the lake) does not.

Vehicles that do not meet the definition of an automobile are personal property. The value they have as a resource is their equity value, and the personal effects exclusion does not apply to them.

2. Ownership

Absent evidence to the contrary, accept the individual's allegation as to sole or joint ownership and his or her proportionate share of joint ownership. Resolve any questions by examining the title, the current year's registration, or the bill of sale. Place in file a photocopy of the document examined or record the relevant facts in case record.

3. Exclusion Regardless of Value

Absent evidence to the contrary, accept the individual's allegation as to the presence of a factor that would qualify the automobile for exclusion regardless of value.

4. CMV Based On N.A.D.A. Guides

a. Description of Vehicle

When the value of an automobile must be developed, get a description complete enough to enable you to find it in one of the N.A.D.A. guides discussed below, e.g.: 1982 Chevrolet Caprice, V-6, 2-door.

b. N.A.D.A. Official Used Car Guide

This publication gives values for popular foreign and domestic cars and light trucks up to 8 years old. Use as the automobile's CMV the average **trade-in** value shown for it in the most recently published of these two issues, regardless of the period of time covered by the determination.

c. N.A.D.A. Older Car Guide

This publication gives values for popular cars and trucks from 8 to 18 years old. Use the average trade-in value shown in the most recently published January-April issue.

If the automobile is more than 18 but less than 25 years old, use the value shown for it at 18 years old.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 15

d. Other N.A.D.A. Guides

N.A.D.A. also publishes guides on mobile homes, recreational vehicles, boats, motorcycles, and mopeds.

**5. Rebuttal of
N.A.D.A. Value**

a. When Rebuttal Applies

If the N.A.D.A. guide value affects eligibility and the individual disagrees with it, give him or her the opportunity to rebut it.

b. Rebuttal Evidence

Rebuttal evidence can consist of N.A.D.A. guides and/or of a written appraisal of the automobile's CMV obtained by the individual at his or her own cost from a disinterested knowledgeable source, such as a used car or truck dealer or an automobile insurance company.

c. Determination

Document a rebuttal determination in case record.

**6. Exceptions To
Use of N.A.D.A.
Guide Values**

The following circumstances preclude use of the N.A.D.A. guides:

- The guides do not list the make and/or model of the vehicle.
- The guides list but do not show a value for the make and/or model of the vehicle.
- The vehicle is a car or truck 25 or more years old.
- The vehicle is any motorized vehicle other than a car or truck, or is a nonmotorized vehicle (e.g., an animal or animal-drawn vehicle).

**7. Knowledgeable
Source
Estimate**

When one of the exceptions in 6. above applies, or other circumstances make use of the N.A.D.A. guides inappropriate, get a CMV estimate from a disinterested knowledgeable source.

Provide the contact with a complete description of the vehicle, including year, make, model, number of doors, equipment, etc. Absent evidence to the contrary, such as that the vehicle is damaged or is in "mint" condition, assume it to be in average condition.

Inform the contact that the estimate should show what the vehicle would sell for on the open market in the geographic area covered by local media. If the estimate is obtained by telephone, document the file with all the pertinent facts.

**D. Development and
Documentation-
Posteligibility**

**1. Exclusion
Regardless Of
Value**

If an automobile has been excluded regardless of value, it is not necessary to redevelop the exclusion or the value.

**2. Exclusion To
\$4,500 of CMV**

a. General

It is not necessary to redevelop the CMV of a vehicle that has been excluded to \$4,500 of its CMV unless the CMV in excess of \$4,500 affects eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 16

b. Exception

Always redevelop the collector value of an antique or other collectible

E. Related Policy

If a vehicle cannot be excluded under this provision, consider the possibility of its exclusion as property essential to self-support (S1130.500), or as part of a plan for achieving self-support.

S1130.430 HOUSEHOLD GOODS AND PERSONAL EFFECTS

A. Policy Principles

1. Items Excluded Regardless Of Value

a. One wedding ring and one engagement ring per individual are excluded regardless of value.

b. Prosthetic devices, wheelchairs, hospital beds, dialysis machines and **other items required by a person's physical condition** are excluded regardless of value **if** they are not used extensively and primarily by other members of the household.

2. Exclusion Of Up To \$2,000 Equity Of Other Items

A general exclusion of up to \$2,000 applies to the total equity value of household goods and personal effects other than those excluded regardless of value. Any portion of the total equity in excess of \$2,000 is not excluded under this provision.

B. Definitions

1. Household Goods

Household goods are items of personal property customarily found in the home and used in connection with the maintenance, use, and occupancy of the premises as a home. They include, but are not limited to: furniture, appliances, televisions sets, carpets, cooking and eating utensils, dishes, etc.

2. Personal Effects

Personal effects are items of personal property that are worn or carried by an individual or that have an intimate relation to him or her. They include, but are not limited to: clothing, jewelry, personal care items, prosthetic devices, and educational or recreational items such as books, musical instruments, or hobby materials.

3. Items Of Unusual Value

An item of unusual value is one whose CMV exceeds \$500.

4. Durable Items

Durable household goods and personal effects include furniture, major appliances, expensive carpets and jewelry, and other items that retain a significant resale value over time.

Durable items do **not** include:

- anything treated as an item of unusual value;
- ordinary cooking and eating utensils;
- small appliances;
- linens;

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 17

- clothing; or
- household furnishings of little value.

C. Development and Documentation-- Initial Claims

1. Wedding And Engagement Rings

If only one wedding and/or engagement ring per individual is alleged, exclude it without further development. Treat additional such rings in accordance with the instructions below.

2. Allegation Of No Items Of Unusual Value, Or Of Only One Such Item With A CMV of \$1,000 Or Less

Absent evidence to the contrary, accept the allegation. Assume that the total equity value of all household goods and personal effects is \$2,000 or less. No further development is required.

3. Allegation Of Items Of Unusual Value Whose Total CMV Exceeds \$1,000

- a. Ask if the individual's physical condition requires any of the items. If the answer is "No," record it in the *case record* and skip to c. below for the additional development required.

If the answer is "Yes," record it in the case record with the following information:

- what the condition is;
- why the item is required for that condition (unless the reason is obvious);
- the extent to which the individual uses the item; and
- the extent to which any other member of the household uses the item.

- b. **Determine**, based on the allegations, whether any of these items is excluded per A.1.b. above.

If, after exclusion of appropriate items per A.1.b., the alleged total CMV of the remaining items of unusual value does not exceed \$1,000, **discontinue development**. Otherwise, proceed according to c. below.

- c. Have the individual list all durable items and the estimated value of each. If the sum of their alleged value and the alleged value of the nonexcluded items of unusual value does not exceed \$2,000, **cease development**. If it does exceed \$2,000, proceed according to d. below.
- d. **Verify** the CMV of any item of unusual value not excluded per A.1.b. Use any reliable evidence of CMV the individual can submit, such as a recent sales slip or appraisal, or insurance coverage, or obtain an estimate from a knowledgeable source, such as a local merchant.

NOTE: Insurance appraisals and amounts of insurance coverage often reflect replacement value (the amount it would cost to purchase a

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date February 2009
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 1	Page 18

similar item new) rather than CMV. Do not use replacement value in lieu of CMV.

If the verified CMV of all nonexcluded items of unusual value and the alleged CMV of all durable items totals \$2,000 or less, **cease development**. Otherwise, proceed according to e. below.

- e. **Determine** whether any of the durable items (i.e., that are not items of unusual value) can be excluded per A.1.b. above. If they can, and if the verified CMV of all nonexcluded items of unusual value and the alleged CMV of the remaining durable items then totals \$2,000 or less, **cease development**. Otherwise, proceed according to f. below.
- f. **Verify** the CMV of the nonexcluded durable items. If the verified total CMV of all nonexcluded items of unusual value and nonexcluded durable items is \$2,000 or less, **cease development**. Otherwise, proceed according to g. below.
- g. If the portion of the total CMV that exceeds \$2,000 affects eligibility, **determine** the equity value of any item on which the individual alleges there is an encumbrance. If total equity value then exceeds \$2,000, that portion of the equity in excess of \$2,000 cannot be excluded under this provision.

S1140.110 OTHER PROPERTY RIGHTS

A. Introduction

For resources other than a life estate, apply development and documentation located in S1140.110 to QDWI evaluations.

B. Life Estate

A life estate conveys to the individual to whom it is given certain property rights for the duration of his or her life, or someone else's life. In some cases, it may be conditional: e.g., for life or until remarriage. The owner of a life estate can sell the life estate but does not have title to the property and thus, normally cannot sell it or pass it on as an inheritance.

*For QDWI evaluations, a life estate in real property, other than the home property, is counted as a resource **regardless of when the life estate was established**. Follow the policy in M1140.110 for determining the countable value of a life estate.*

A life estate in home property does not need to be developed as the home is an excluded resource.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 2	Page 1

QMB, SLMB, QI AND ABD 80% FPL

A. Introduction

This section contains information regarding the resources that are treated differently for *QMB, SLMB, QI and ABD 80% FPL covered groups*. *The differences are:*

- home property,
- inheritances and unprobated estates, and
- real property whose sale would cause undue hardship, due to loss of housing, to a co-owner.

B. Resource Evaluation

Resource treatment and evaluation used *for QMB, SLMB, QI and ABD 80% FPL determinations are listed in:*

- S1110 Resources, General,
- S1120 Identifying Resources,
- S1130 Resource Exclusions and
- S1140 Countable Resources

C. Resource Policy Exceptions

Sections of policy that apply only to QMB, SLMB, QI and ABD 80% FPL evaluations are:

- S1120.215 Inheritances and Unprobated Estates
- S1130.100 The Home
- S1130.130 Real Property Whose Sale Would Cause Undue Hardship, Due to Loss of Housing to a Co-owner

The detailed information on these resources is below.

S1120.215 INHERITANCES AND UNPROBATED ESTATES

A. Introduction

An ownership interest in an unprobated estate may be a resource if an individual:

- is an heir or relative of the deceased; or
- receives any income from the property; or
- under State intestacy laws, has acquired rights in the property due to the death of the deceased.

B. Operating Policy

1. When to Develop

We develop for this type of resource only if:

- the property in question is not excludable under any of the provisions in S1110.210 B.; and
- counting the property's value would result in excess resources.

2. Ownership Interest

There is an ownership interest in an unprobated estate if:

- documents (e.g., a will or court records) indicate an individual is an heir to property of a deceased; or

Manual Title	Chapter	Page Revision Date
--------------	---------	--------------------

Virginia Medical Assistance Eligibility	M11	July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 2	Page 2

- an individual has use of a deceased's property or receives income from it; or
- documents establish, or the individual alleges, a relationship between himself and the deceased which, under State intestacy laws, awards the individual a share in the distribution of the deceased's property; and
- the inheritance, use of income, and distribution are uncontested.

**3. When
Unprobated
Estate Can Be
a Resource**

We do not consider that an inheritance is a resource until the month following the month in which it meets the definition of income. See *S0830.550* for the income rules on inheritances. Thereafter, if retained, we evaluate the property as a resource.

**C. Development and
Documentation**

**1. Ownership
Interest**

Document the file, as applicable, with a copy of:

- an inheritance or relationship document (or a signed statement alleging a relationship);
- evidence of income from the property;
- individual's signed statement concerning his/her use of the property and whether there is contest of any factor; or
- other evidence showing that the situation meets the criteria in B.

**2. Sole vs. Shared
Ownership**

Follow S1110.510 and S1140.030 to determine and document whether there are other owners and, if so, whether the individual needs their consent to sell his/her share of the property.

**3. Status as a
Resource**

- If the individual is the sole owner or if other owners give needed consent to sell, the property is the individual's resource. Some States do not require the consent of other heirs in order for a co-owner to sell property.
- If other owners withhold consent and that consent is necessary to sell, the property is not a resource until the estate has been through probate. It is subject to the resource counting rules the month following the month it meets the definition of income.

**4. Value of
Resource**

- CMV - Develop the property's CMV (and EV, if appropriate) following guidelines in S1140 for the particular type of property involved.
- Shared Ownership
 - For real property, and most personal property, see S1140.030 B.
 - For checking/savings accounts and time deposits, see S1140.205 and S1140.210.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 2	Page 3

REAL PROPERTY

S1130.100 THE HOME

A. Policy Principles

1. **Exclusion of the Home**

An individual's home, regardless of value, is an excluded resource.
2. **Definition of the Home**

An individual's home is property in which he or she has an ownership interest and that serves as his or her principal place of residence. It can include:

 - the shelter in which he or she lives;
 - the land on which the shelter is located; and
 - related buildings on such land.
3. **Principal Place of Residence**

An individual's principal place of residence is the dwelling the individual considers his or her established or principal home and to which, if absent, he or she intends to return. It can be real or personal property, fixed or mobile, and located on land or water.
4. **Individual Owns The Land But Not The Shelter**

For purposes of excluding "the land on which the shelter is located" (A.2. above), it is not necessary that the individual own the shelter itself.

EXAMPLE: If an individual lives on his or her own land in someone else's trailer, the land meets the definition of home and is excluded.
5. **Extent of Property To Which The Exclusion Applies**
 - a. **Land**

The home exclusion applies not only to the plot of land on which the home is located, but to any land that adjoins it.

Land adjoins the home plot if not completely separated from it by land in which neither the individual nor his or her spouse has an ownership interest.

Easements and public rights of way (utility lines, roads, etc.) do not separate other land from the home plot.
 - b. **Buildings**

The home exclusion applies to all buildings on land excluded per a. above.
6. **Property That No Longer Serves As The Principal Place of Residence**
 - a. **General Rule**

Property ceases to be the principal place of residence - and, therefore, to be excludable as the home - as of the date that the individual, having left it, does not intend to return to it.

Such property, if not excluded under another provision, will be included in determining countable resources as of the first moment of the first day of the following month..

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 2	Page 4

b. Exceptions to General Rule

Even if the individual leaves the home without the intent to return, the property remains an excluded resource for as long as:

- a spouse or dependent relative of the individual continues to live there while the individual is institutionalized; or
- its sale would cause undue hardship, due to loss of housing, to a co-owner of the property

7. Dependent Relative Defined

a. Dependency may be of any kind (financial, medical, etc.).

b. Relative means:

- child, stepchild, or grandchild;
- parent, stepparent, or grandparent;
- aunt, uncle, niece, or nephew;
- brother or sister, stepbrother or stepsister, half brother or half sister;
- cousin; or
- in-law.

B. Development and Documentation--Initial Claims

1. Ownership

a. Use of Allegation

Accept an individual's allegation of home ownership unless the file raises a question about it (e.g., a life estate is involved, the individual is under age 18, does not live with a parent, and does live with someone else). If there is a question, have the individual submit one of the items of evidence listed in b. - d. below.

b. Evidence of Real Property Ownership:

- tax assessment notice;
- recent tax bill;
- current mortgage statement;
- deed;
- report of title search;

evidence of heirship in an unprobated estate (e.g., receipt of income from the property, a will, or evidence of relationship recognizable under State intestate distribution laws in cases where the home is unprobated property).

c. Evidence of Personal Property Ownership (e.g., a Mobile Home):

- title;
- current registration.

d. Evidence of Life Estate or Similar Property Rights

- deed;
- will

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date April 2013
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 2	Page 5

- other legal document.

e. Equitable Ownership

Virginia does not recognize equitable ownership of real property.

2. Principal Place of Residence -- Operating Assumption

Absent ownership in more than one residence or evidence that raises a question about the matter, **assume** that the alleged home is the individual's principal place of residence.

3. Indication of More than One Residence

If an individual alleges or other evidence indicates ownership of more than one residence, **obtain** his or her signed statement concerning such points as:

- how much time is spent at each residence;
- where he or she is registered to vote;
- which address he or she uses as a mailing address or for tax purposes.

Determine the principal place of residence accordingly and document the determination in file.

4. Evidence Indicates Nonadjoining Property

a. Individuals Agrees With Evidence

If evidence indicates that land the individual owns does not adjoin the home plot, and the individual agrees that it does not;

- **obtain** his or her statement to that effect and
- **develop** the nonadjoining portion per S1140.100 (Nonhome Real Property) or S1130.500 (Property Essential to Self-Support), as applicable.

b. Individual Disagrees With Evidence

If the individual maintains that all the land adjoins the home plot, document the file with:

- a sketch of the land showing the boundaries of the various plots and the location of the shelter used as the home; and
- evidence of how the land is treated for tax assessment purposes.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 2	Page 6

The sketch may be by the individual, from public records, or by the Eligibility Worker (from direct observation).

The tax assessment information may be in the form of a tax assessment notice or obtained from the appropriate tax jurisdiction and recorded in the case record.

c. Combined or Single Holding for Tax Assessment

Assume that the land is a single piece of property in which all the land adjoins the home plot if:

- it is recorded and treated as a single holding for tax assessment purposes; or
- the original holding has been subdivided, but still is treated as a single holding for tax assessment purposes.

d. More Than Single Holding for Tax Assessment

If the land is recorded and treated as two or more holdings for tax assessment purposes, use the sketch to determine whether other holdings adjoin the home plot.

5. Absences From The Home

a. Summary of Development

If the individual is in an institution, determine whether a spouse or dependent relative is living in the home (see b. below).

If no spouse or dependent relative is living in the home, determine:

- whether the individual intends to return to the home (see c. below); and
- if not, whether the sale of the home would cause undue hardship, due to loss of housing, to a co-owner (see D.1. below).

NOTE: If a previously undeveloped absence from the home has ended, assume that the individual always intend to return. The absence, regardless of duration, will not affect the home exclusion.

b. Spouse or Dependent Relative Development

Obtain a signed statement from the individual as to:

- whether anyone is living in the home while the individual is in the institution;
- if so, how that person is related to the individual, if at all; and
- if related (except for the individual's spouse), how that person is dependent on the individual, if at all.

Absent evidence to the contrary, accept the allegations.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 2	Page 7

c. "Intent to Return" Development

If the individual has left his or her home but intends to return to it, see D. below for the necessary development.

NOTE: "Intent to return" development applies only to the **continued** exclusion of property which met the definition of the individual's **home** prior to the time the individual left the property. See A.2. above for the definition of "home."

C. Procedure – Post-eligibility

If, after Medicaid eligibility is established, an individual receives real property - for example, as an inheritance or gift - which may be excludable as his/her home, apply the policy and procedures in A. and B. above to determine whether the home exclusion applies.

Redevelop the exclusion from resources of an individual's home only if something raises a question about the correctness of the original determination or indicates that the exclusion may no longer apply (e.g., a change of address).

If the individual has left his or her home but intends to return to it, see D. below.

**D. Procedure --
"Intent to Return
Home"
Development**

**1. Obtain
Statement**

Obtain a signed statement from the individual as to:

- when and why he or she left the home;
- whether he or she intends to return; and
- if he or she does not intend to return, when that decision was made.

NOTE: If the individual has a representative payee, obtain the "intent" statement from the payee.

This statement governs the "intent to return" determination unless the statement is self-contradictory (see 2. through 4. below).

**2. Self-
Contradictory
Statement**

Consider a statement to be self-contradictory if it contains conflicting or unclear expressions of intent.

Examples of self-contradictory statements:

"Sometimes I want to go home and sometimes I don't."

"I intend to go home but I also want to stay here."

"Yes, I want to go home, but I really don't know if I should."

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 2	Page 8

3. Factors Not to Consider

Do not consider other factors, such as the individual's ages, physical condition, or other circumstances when determining intent to return home. Assuming the individual is mentally competent, age, mental capacity, and physical condition are **not** factors in evaluating the individual's statement of intent.

Example: The recipient is 93 years old and in the intensive care unit of a hospital. She tells the Eligibility Worker that her doctor believes she may not be able to leave the hospital and return home. However, she states that she intends to return to her former residence as soon as she is well enough to leave the hospital. Based on her statement, "intent to return home" is established.

Example: The recipient's home was partially destroyed by fire. He does not know when the necessary repairs will be completed. In the meantime, he is living with his sister. He states he intends to return to the former residence as soon as possible. Based on his statement, "intent to return home" is established.

4. Obtaining More Information If Needed

If the individual's statement of intent is self-contradictory, contact someone who knows the situation, such as a physician, family member, or close friend or relative, to clarify the situation.

S1130.130 REAL PROPERTY WHOSE SALE WOULD CAUSE UNDUE HARDSHIP, DUE TO LOSS OF HOUSING, TO A CO-OWNER

A. Policy Principles

1. Exclusion

The value of an individual's ownership interest in jointly owned real property is an excluded resource **for as long as** sale of the property would cause undue hardship, due to loss of housing, to a co-owner.

2. Undue Hardship

Undue hardship would result if such co-owner:

- uses the property as his or her principal place of residence;
- would have to move if the property were sold; and
- has no other readily available housing.

B. Development and Documentation-- Initial Applications and Post-Eligibility

1. Allegations of Loss of Housing for Co-Owner

If someone alleges that the sale of certain real property would force a co-owner living on it to move, obtain:

- the individual's signed statement to that effect, and
- evidence of joint ownership (see S1130.100 B.1.b.-d.).

If co-ownership is not proven, skip to 3. below. Otherwise, obtain the statement in 2. below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date July 2001
Subchapter Subject RESOURCE EXCEPTIONS FOR ABD MI	Page ending with Appendix 2	Page 9

2. Required Statement from Resident Co-Owner

Obtain a statement from the co-owner regarding whether he or she:

- uses the property as his or her principal place of residence;
- would have to move if the property were sold; and
- has other living quarters readily available.

Apply the policy principle in A. above to determine whether, on the basis of the statements of the individual and the co-owner, the sale of the property would cause undue hardship to the co-owner.

Accept any reasonable allegation from the co-owner that there is no readily available housing (e.g., no other affordable housing available or no other housing with necessary physical modifications for a handicapped individual).

3. Determination-Not Undue Hardship

If the property cannot be excluded on the basis of undue hardship:

- document the file to that effect;
- issue appropriate notice.

4. Determination-Undue Hardship

If the property can be excluded on the basis of undue hardship:

- document the file to that effect;
- issue appropriate notice.

M1310.000 SPENDDOWN GENERAL PRINCIPLES AND DEFINITIONS

M1310.100 GENERAL PRINCIPLES OF MEDICAID SPENDDOWN

A. Introduction

Individuals and families who otherwise meet the medically needy non-financial and resource eligibility requirements, but whose countable income exceeds the medically needy income limits, are not eligible for Medicaid unless:

- the excess income is insufficient to meet the cost of needed medical care, and
- the cost of incurred medical or remedial care recognized under state law has been deducted from excess income.

This section contains the policy and procedures for determining a family's or a non-institutionalized individual's medically needy income eligibility when their income exceeds the medically needy income limit.

B. Applicability

Spenddown applies only to the medically needy (MN) covered groups listed in M0320 and M0330. There are no MN covered groups for Low-income Families with Children (LIFC) parents, Modified Adjusted Gross Income (MAGI) Adults, or children between age 18 and 19 years who do not meet the definition of an Individual Under Age 21 in M0330.804.

Individuals and families who meet a MN covered group must meet the MN nonfinancial and resource requirements in order to be placed on a spenddown.

An individual or family is income eligible when countable income after deducting specified medical or remedial care expenses is equal to or less than the medically needy income limit (MNIL) for the budget period.

For a spenddown which involves an incarcerated person, see M1350.850.

C. Opportunity to Receive Full Medicaid Coverage

Individuals who are eligible for only a limited package of Medicaid services must be evaluated to determine if they could become eligible for full Medicaid coverage as medically needy (MN) by meeting a spenddown. To be evaluated for a spenddown, the individual must meet a MN covered group listed in M0330.001 and meet all of the requirements for the MN covered group.

1. Aged, Blind or Disabled (ABD) Medically Indigent (MI) Enrollees

Individuals in the following limited-benefit ABD covered groups also meet a MN covered group:

- Qualified Medicare Beneficiaries (QMBs),
- Special Low-income Medicare Beneficiaries (SLMBs),
- Qualified Individuals (QIs), and
- Qualified Disabled Working Individuals (QDWIs).

Information specific to processing spenddown for these individuals is contained in M1370.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date October 2018
Subchapter Subject M1310 SPENDDOWN GENERAL PRINCIPLES & DEFINITIONS	Page ending with M1310.300	Page 2

2. Plan First Enrollees

Individuals enrolled in Plan First do not necessarily meet a MN covered group. Plan First enrollees who meet a MN covered group and its requirements in M0330 are placed on two six-month spenddown budget periods within the 12 month renewal period. They may also be eligible for a retroactive MN spenddown determination.

3. MN Children Under Age 18 With \$0 Spenddown Liability

Due to differences in income counting methodology applicable to Categorically Needy (CN) and MN covered groups, a child under age 18 may be ineligible for coverage in a CN covered group but have countable income under the income limit for MN coverage. The child's spenddown liability is \$0.00 (zero dollars); therefore, his spenddown is met on the first day of the spenddown period. Enroll the child in two back-to-back six-month periods of coverage, without the need for a new application, and complete an annual renewal. Continue to enroll the child in two consecutive six-month periods of coverage per year as long as he continues to be eligible as MN at renewal. See M0330.803.

M1310.200 INSTITUTIONALIZED INDIVIDUALS IN MEDICAL FACILITIES OR RECEIVING MEDICAID CBC

A. General Principle

Do not use this subchapter for institutionalized Medically Needy individuals in long-term care [medical facilities or Medicaid Community-based Care (CBC)] who have income over the MNIL.

Go to subchapter M1460 when the individual is institutionalized in a medical facility or when the individual receives Medicaid Community-based Care (CBC) waiver services. Subchapter M1460 contains the policy and procedures for determining the eligibility and spenddown liability for individuals in long-term care.

M1310.300 SPENDDOWN DEFINITIONS

A. Introduction

This section contains the definitions of terms used in the spenddown chapter, Chapter M13.

B. Definitions

1. Applicable Exclusions

Applicable exclusions are the amounts that are deducted from income in determining an individual's income eligibility as identified under the July 16, 1996, AFDC State Plan for Families & Children covered groups, and under the SSI program for aged, blind or disabled individuals.

2. Assistance Unit

The Medicaid assistance unit is the individual or family who applies for Medicaid and whose financial eligibility is determined. The assistance unit for the Families & Children (F&C) covered groups is called the "family unit" or the "budget unit." The assistance unit for an ABD individual is just the individual, unless the individual is married, living with his/her spouse and the spouse is also ABD or the spouse is NABD and has deemable income. In this situation, the assistance unit is the married ABD couple.

3. Available Income

Available income means the earned and unearned income before exclusions used in determining the income eligibility of a medically needy individual.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M13	October 2018
Subchapter Subject	Page ending with	Page
M1310 SPENDDOWN GENERAL PRINCIPLES & DEFINITIONS	M1310.300	3

- 4. Break in Spenddown Eligibility**

A break in spenddown eligibility only occurs after an individual has, at least once, established eligibility by meeting a spenddown in a prior budget period. A break in spenddown eligibility occurs when:

 - there is a break between spenddown budget periods;
 - the individual establishes Medicaid eligibility in the ABD 80% FPL covered group or a CN F&C covered group; or
 - the individual does not meet the spenddown liability in a spenddown budget period.
- 5. Budget Period**

Budget period means a period of time during which an individual's income is calculated to determine Medicaid eligibility.
- 6. Carry-over Expenses**

Carry-over expenses are the balance due on medical, dental, and remedial care expenses incurred in the retroactive or prospective budget periods prior to the current budget period which were not used in establishing eligibility and which may be deducted in consecutive budget periods when there has been no break in spenddown eligibility.
- 7. Consecutive Budget Period**

A consecutive budget period is any spenddown budget period that immediately follows a spenddown budget period in which eligibility was established.
- 8. Countable Income**

Countable income means, for the medically needy, the amount of the individual's gross income after deducting allowable exclusions that is measured against the medically needy income limit (MNIL).
- 9. Covered Expenses**

Covered expenses means expenses for services that are included in the State Plan for Medical Assistance (Medicaid State Plan).
- 10. Current Payments**

Current payments are payments made in the current spenddown budget period on expenses incurred before the current spenddown budget period, which were not used in establishing eligibility in a previous spenddown budget period and when there has been a break in spenddown eligibility. The payment amount allowed is the actual payment amount paid to the provider and is deducted from the spenddown liability on the date the payment is actually made.
- 11. First Prospective Budget Period**

The first prospective budget period is the spenddown budget period that begins:

 - the first day of the month the individual first applied for Medicaid and is placed on spenddown, or
 - the first day of the month after the cancellation of Medicaid coverage due to excess income, or
 - when a new Medicaid application is filed after a break in spenddown eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2012
Subchapter Subject M1310 SPENDDOWN GENERAL PRINCIPLES & DEFINITIONS	Page ending with M1310.300	Page 4

12. Incurred Expenses

Incurred expenses means expenses for medical, dental, or remedial care services:

- which are recognized under state law;
- which are rendered to an individual, family, or legally responsible relative;
- which the individual is liable for in the current budget period or was liable for in the three-month retroactive period; and
- which are not subject to payment by any liable third party.

An expense for a medical or remedial service is an incurred expense from the date the liability arises until the end of the budget period in which the expense is fully used to meet a spenddown.

13. Initial Application

An initial application is the individual's first Medicaid MN spenddown application. There are two ways an individual can have an initial application:

- this is the individual's first application for Virginia Medicaid, or
- this is the first time the individual has been placed on a spenddown.

14. Legally Responsible Relative

A legally responsible relative is the individual's spouse and/or, when the individual is under age 21, a parent who is responsible by law to support the individual. The legally responsible relative's resources and income may be used in determining the individual's Medicaid eligibility.

15. Liable Third Party

Liable third party means any individual, entity or program that is or may be liable to pay all or part of the cost of medical or remedial treatment for injury, disease or disability of a Medicaid applicant or recipient.

16. Medical Expense Record Form

The "Medical Expense Record-Medicaid" (#032-03-023) is a form provided to the client for keeping a chronological record of his medical expenses. It is used by the eligibility worker to determine if the spenddown has been met.

17. Medically Needy Income Limit (MNIL)

MNIL means the medically needy income limit. This is the income standard established to determine the financial eligibility of medically needy individuals and families.

18. Noncovered Expenses

Noncovered expenses are expenses for necessary medical and remedial services recognized under state law but not covered under the Medicaid State Plan, including those that exceed the Medicaid limitation on amount, duration, or scope of the service covered under the State Plan.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date Jul 2012
Subchapter Subject M1310 SPENDDOWN GENERAL PRINCIPLES & DEFINITIONS	Page ending with M1310.300	Page 5

19. Old Bills

Old bills are unpaid medical, dental, or remedial care expenses which:

- were incurred prior to the Medicaid application's retroactive period or
- were incurred during the retroactive period if the individual either did not meet the retroactive spenddown or was not eligible for Medicaid in the retroactive period (for example, due to excess resources), and
- were not fully deducted from (counted in) any previous spenddown budget period where the spenddown was met, and
- remain a liability to the individual.

Old bills that are based on previous applications do not meet the definition of "old bills" when there has been a break in spenddown eligibility.

EXCEPTION: Bills paid by a state or local program are treated as old bills even though they are not the individual's liability.

20. Prospective Budget Period

A prospective budget period is the prospective period of time during which income is projected for the purpose of determining spenddown eligibility.

21. Re-application

Re-application means any Medicaid medically needy spenddown application which is filed after the initial application.

22. Retroactive Spenddown Budget Period

The retroactive spenddown budget period is the retroactive period in which the individual is on a spenddown. The retroactive spenddown budget period is the 3 months immediately prior to the application month, when none of the months overlap (was included in) a previous MN spenddown budget period in which spenddown eligibility was established.

When some of the months overlap a previous MN spenddown budget period in which spenddown eligibility was established, the retroactive spenddown budget period is shortened (prorated) to include only the month(s) which were not included in the previous MN spenddown budget period in which spenddown eligibility was established.

23. Spenddown

Spenddown is the process through which countable income is compared to the MNIL for the budget period and incurred expenses are deducted from excess countable income.

24. Spenddown Budget Period

A spenddown budget period is the budget period during which the individual's or family's countable income exceeds the MNIL for the budget period and during which the individual or family is placed on a spenddown.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2012
Subchapter Subject M1310 SPENDDOWN GENERAL PRINCIPLES & DEFINITIONS	Page ending with M1310.300	Page 6

- 25. Spenddown Eligibility** Spenddown eligibility means the individual established eligibility by meeting a spenddown within a spenddown budget period.
- 26. Spenddown Liability** The spenddown liability is the amount by which the individual's or family's countable income exceeds the MNIL for the budget period.
- 27. State or Territorial Public Program** A state or territorial public program is a public health program that is wholly or partially funded and administered by a state or territory, including a political subdivision thereof (i.e., SLH, GR, AG and CSB services).
- 28. State or Territorially-Financed Program** A state or territorially-financed program is a state or territorial public program whose funding, except for deductibles and coinsurance amounts required from program beneficiaries, is either:
- appropriated by the state or territory directly to the administering agency, or
 - transferred from another state or territorial public agency to the administering agency.

M1320.000 SPENDDOWN INFORMATION

M1320.100 INFORMING THE APPLICANT

A. Introduction

An individual applicant who meets all the medically needy Medicaid eligibility requirements except income, because his countable income exceeds the Medicaid income limits, must be told about spenddown and what he can do to become eligible for Medicaid coverage for a limited time period.

This section lists the items of which the EW must inform the applicant.

B. Allowable Expenses

The worker must inform the applicant about the incurred medical, dental, or remedial care expenses, either paid or unpaid, that can be deducted from the spenddown liability.

1. Covered By State or Local Public Program

Expenses for incurred medical services received on or after December 22, 1987, which were provided, covered, or paid for by a state or local government program can be deducted even though the applicant does not owe anything for the service.

Expenses covered by Medicare and Medicaid (which are federal programs) CANNOT be deducted.

2. Old Bills

Expenses incurred for medical services received prior to the initial application's retroactive period or *during the retroactive period if the individual either did not meet the retroactive spenddown or was not eligible for Medicaid in the retroactive period (for example, due to excess resources)* may be deducted if:

- the applicant is legally liable to pay the expense;
- the applicant still owes a balance to the medical service provider for the service;
- the expense was not deducted from (counted in) any previous spenddown budget period in which the spenddown was met, and
- a claim for the expense was submitted to the liable third party(ies), if any.

3. Third Party Payment

An allowable medical expense cannot be deducted until the individual's insurance or other third party, if applicable, has taken action on the claim and the applicant provides evidence documenting:

- the claim was denied, or
- the amount of the claim paid by the third party.

Only the amount not covered by the third party(ies) and which remains the liability of the individual may be deducted from the spenddown liability.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date October 2017
Subchapter Subject M1320 SPENDDOWN INFORMATION	Page ending with M1320.200	Page 2

- C. Incur Noncovered Expenses First** The worker must inform the applicant that it is to his advantage to use the spenddown liability (excess income) for medical and dental services not covered by the Medicaid program before he uses the spenddown liability for covered services. Medicaid will not pay for noncovered medical services even after the spenddown is met.
- D. Estimate When Spenddown Liability Will Be Met** The worker can help the applicant estimate the approximate time when the spenddown liability will be met if:
- the individual has already spent or owes for medical services received prior to, on, or after the first day of the month of application, and
 - the individual anticipates medical expenditures in the near future.
- E. Reapplying at the End of the Spenddown Period** The worker must inform the individual of the spenddown period and the need to file a reapplication if additional coverage is needed. If the individual is enrolled in the QMB, SLMB, or QDWI covered groups; is enrolled in Plan First and also meets a Medically Needy (MN) covered group; or is an MN Child Under Age 18 with \$0 spenddown liability (see M0330.803), the system-generated Medicaid/FAMIS Renewal form may be used to establish new spenddown budget periods.
- An individual on a spenddown who is living with Medicaid and/or FAMIS enrollees can use their Medicaid/FAMIS Renewal form to reapply; the reapplication is entered into VaCMS as a new application.*
- For all others, the Application for Health Insurance & Help Paying Costs is required to establish additional spenddown budget periods.

M1320.200 PROCESSING TIME STANDARDS

A. Applications

- 1. Processing Standards** The time standards for Medicaid eligibility determination must be met when determining spenddown. The processing time standards are:
- 90 days for applicants whose disability must be determined and
 - 45 days for all other applicants
- from the date the signed Medicaid application is received by the local agency.
- 2. Third Party Payment Verifications** The standards shall also apply to receipt of third party payment or verification of third party intent to pay in order to determine allowable expenses deductible from the spenddown liability. Efforts to determine the third party liability shall continue through the last day of the processing standard period of time. If information regarding third party liability for an incurred expense is not received by this date, eligibility must be determined without deducting the expense.

- B. Changes** The time standard for evaluating a reported change is 30 days from the date the worker receives notice of a change in circumstances or a medical or dental expense submitted by the individual.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date October 2019
Subchapter Subject M1320 SPENDDOWN INFORMATION	Page ending with M1320.400	Page 3

Efforts to determine the third party liability shall continue through the last day of the processing time standard. If information regarding third party liability for an incurred expense is not received by this date, eligibility must be determined without deducting the expense.

M1320.300 ACTION ON APPLICATIONS

- A. Case Action** When an applicant meets all the MN eligibility requirements except income, the application is denied and the applicant is placed on a spenddown.
- B. Retroactive Period** When an applicant has old bills, the worker will determine the retroactive budget period and retroactive spenddown liability. Determination of the retroactive budget period is necessary in order to correctly deduct the old bills from the spenddown liability in the first prospective and consecutive budget periods. If there is no Medicaid-covered service in the retroactive budget period, do not evaluate retroactive Medicaid eligibility.
- C. Notice to Applicant** A “Notice of Action on Medicaid...” (#032-03-008) is sent to the applicant. *Generate the notice from VaCMS, or print the form and* check the block in the third section, which states “Denied full coverage because income exceeds the income level”. Enter the spenddown liability and the spenddown budget period begin and end dates in the appropriate section. Send a copy of the “Medical Expense Record - Medicaid” (#032-03-023) to the applicant for recording his medical expenses. See Appendix 1 to subchapter M1340.

M1320.400 SPENDDOWN CASE REVIEW REQUIREMENTS

- A. Introduction** The individual must notify the worker when medical or dental expenses are incurred. The individual does NOT have to formally request a re-evaluation of his spenddown.
- The individual should submit the “Medical Expense Record - Medicaid” together with bills or receipts for medical services either paid or incurred. Evidence of third party payment or denial of payment must be provided, if applicable.
- B. Submission of Expenses** When the individual or a *third party* submits medical expenses for re-evaluating the spenddown, a new application form is NOT completed.
- Contact the individual and ask if his living situation, resources or income have changed since he signed the application form. If the individual reports any changes, request verification, evaluate accordingly, and record the changes in the case record.
- There is no time limit for an individual to submit medical expenses for a spenddown; however, the worker will follow the processing time frame when the first medical bill for a spenddown is received.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date October 2019
Subchapter Subject M1320 SPENDDOWN INFORMATION	Page ending with M1320.400	Page 4

**C. Eligibility Worker
Actions**

When verification of incurred expenses is received, the worker must record the expenses in the record, determine how much of the spenddown liability - evaluation at the end of the 30-day processing time frame for spenddown re-evaluations. The 30-day processing time frame begins the date the first medical bill for that spenddown is received in the agency.

**2. Send Notice of
Action**

After completing a re-evaluation of the individual's spenddown, A "Notice of Action on Medicaid..." (#032-03-008) is sent to the applicant. *Generate the notice from VaCMS, or print the form with the appropriate block checked. In the section marked "Other", tell the individual that he must complete a review or reapply in order to be evaluated for Medicaid after the spenddown period ends.*

M1330.000 SPENDDOWN BUDGET PERIODS

M1330.100 SPENDDOWN BUDGET PERIODS

A. Introduction

An individual's medically needy (MN) spenddown eligibility is determined based on the income received within a specified spenddown budget period. The spenddown budget period is based on the application month.

The spenddown budget periods are the:

- the retroactive budget period,
- first prospective budget period, and
- consecutive budget period.

B. Spenddown Budget Period Rules

1. Every Medicaid application has a retroactive period.
2. Budget periods are based on application months. Applications for non-institutionalized individuals create a 6-month prospective budget period. If another Medicaid application is in the month immediately after the end of the first prospective budget period in which spenddown eligibility was established, the new application has no retroactive period and the subsequent spenddown budget period is a consecutive 6 months.

If another application is not filed in the month immediately after the end of a spenddown budget period in which spenddown eligibility was established, the application has a retroactive budget period and a first prospective budget period. If the retroactive spenddown budget period abuts a prior spenddown budget period in which eligibility was established, the retroactive spenddown budget period is also a consecutive budget period.

3. When there is a 6-month prospective budget period in which spenddown eligibility is not established, part of that spenddown budget period may become a retroactive spenddown budget period based on a subsequent application.
4. Spenddown budget periods do not run consecutively when there is a break in spenddown eligibility.
5. The current budget period is the budget period for which spenddown eligibility is being determined.
6. The retroactive spenddown budget period is prorated when one or two of the months in the retroactive period were included in a medically needy spenddown budget period in which spenddown eligibility was established or in the case of death of the individual in the retroactive period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date April 2002
Subchapter Subject M1330 SPENDDOWN BUDGET PERIODS	Page ending with M1330.200	Page 2

7. A retroactive spenddown budget period is always followed by a first prospective budget period.
8. The prospective spenddown budget period is prorated (shortened) when the only MN individual in the assistance unit dies, becomes ineligible for a reason other than income, becomes institutionalized, or becomes eligible in another Medicaid classification.
9. Deduction of old bills in a spenddown budget period depends on whether the expense was fully deducted in a previous spenddown budget period during which spenddown eligibility was established. If the expense was fully deducted in a previous spenddown budget period during which spenddown eligibility was established, it CANNOT be deducted in another spenddown budget period. If the expense was not fully deducted, the remaining balance for which the individual is liable may be carried forward and used as a deduction in a following spenddown budget period(s) if there is no break in spenddown eligibility.
10. **Paid** and unpaid expenses incurred during the retroactive spenddown budget period are deducted in the first prospective budget period to the extent that they were not used to meet the retroactive spenddown and remain the liability of the individual.
11. A break in spenddown eligibility does not necessarily mean that there is a break between budget periods. A break between spenddown budget period always means that there is a break in spenddown eligibility.

M1330.200 RETROACTIVE SPENDDOWN BUDGET PERIOD

A. Policy

The retroactive spenddown budget period is the 3 months immediately prior to the application month if none of the months were included in a previous spenddown budget period in which spenddown eligibility was established.

Eligibility for retroactive Medicaid coverage must be determined in all cases if an individual received a Medicaid covered service during the three-month period prior to the month of application. This includes those applying for Auxiliary Grants or Medicaid. Eligibility for retroactive coverage is determined at the same time ongoing eligibility is determined, using the same application.

If an applicant states that a Medicaid covered service was received in any one of the 3 retroactive months, determine eligibility for all months included in the retroactive spenddown budget period. If the applicant states that a Medicaid covered service was not received in the retroactive months, do not determine retroactive eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1330 SPENDDOWN BUDGET PERIODS	Page ending with M1330.300	Page 3

**B. Months Included
In The Retroactive
Budget Period**

The retroactive spenddown budget period consists of all 3 months in the retroactive period when none of the months was included in a previous Medicaid medically needy spenddown budget period in which spenddown eligibility was established. The retroactive spenddown budget period is prorated when one or two of the months in the retroactive period was included in a previous Medicaid medically needy spenddown budget period in which spenddown eligibility was established, or in the case of death. If all 3 retroactive months were included in a medically needy spenddown budget period in which spenddown eligibility was established, there is no retroactive spenddown budget period. If a month in the retroactive period was included in a previous medically needy spenddown budget period in which spenddown eligibility was established, that month(s) CANNOT be included in the retroactive spenddown budget period.

C. Income Counted

Only the actual income, minus income exclusions, received in the retroactive spenddown budget period is counted in determining retroactive eligibility. The countable income is applied to the appropriate Medically Needy Income Limit (MNIL) for the number of months actually included in the retroactive spenddown budget period. When the individual's countable income in the retroactive spenddown budget period exceeds the MNIL for the period, he has a spenddown liability for the retroactive spenddown budget period.

EXAMPLE #1: An individual's spenddown budget period ended April 30. He files an application for Medicaid in July and has a Medicaid-covered service in May and June (the second and third months of the retroactive period). The retroactive spenddown budget period based on his July application is prorated and consists of May and June because April was in a prior spenddown budget period in which spenddown eligibility was established. His countable income received in May and June is compared to the monthly MNIL for one person in the locality, multiplied by 2 months in the retroactive spenddown budget period.

EXAMPLE #2: A legally emancipated child age 17, living alone, applies for Medicaid on June 15. He has never applied for Medicaid before this application. He has a Medicaid covered service expense in the first retroactive month, March. The retroactive period is March, April and May. He meets the MI covered group and income requirements in April only. His income exceed the MI limit in March and May. The retroactive spenddown budget period is 3 months – March, April and May. His countable income in the 3 months is determined and the MN income limit for 1 person for 3 months is subtracted. The remainder is the spenddown liability for the retroactive spenddown budget period.

M1330.300 FIRST PROSPECTIVE BUDGET PERIOD

A. Policy

A first prospective budget period is 6 months for non-institutionalized individuals; 1 month for institutionalized individuals.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1330 SPENDDOWN BUDGET PERIODS	Page ending with M1330.300	Page 4

The first prospective budget period is the period that begins:

- the first day of the month the individual first applied for Medicaid and is placed on a spenddown, or
- the first day of the month after the date Medicaid was canceled because of excess income, or
- when a new application is filed after a break in spenddown eligibility.

B. Income Counted

The gross income, minus applicable income exclusions, anticipated to be received by the applicant's assistance unit in the first prospective budget period is counted and compared to the MNIL. Countable income anticipated to be received in the application month is projected over the entire 6-month period, unless the first prospective budget period must be prorated. When the first prospective budget period is prorated, count the income received in the month(s) included in the prorated first prospective budget period and compare it to the MNIL for the same number of months. The difference is the spenddown liability.

C. Example – Individual's First Application For Medicaid

EXAMPLE #3: An individual first applies for Medicaid in July 1999 and has a Medicaid covered service in the retroactive period. He has never applied for Medicaid before. The retroactive period consists of April, May and June 1999. His countable income received for April 1999 through June 1999 is compared to the 3-months MNIL in the locality for one person. The first prospective budget period consists of July 1999 through December 1999. His countable income for July is projected for 6 months and compared to the semi-annual MNIL in the locality for one person.

D. Example – Medicaid Canceled Due To Excess Income

EXAMPLE #4: A Medicaid recipient's coverage is canceled because of excess income effective July 31, 1999. He is placed on a spenddown for the first prospective budget period of August 1, 1999 through January 31, 2000. His countable income for July is projected for 6 months. The semi-annual MNIL in the locality for one person is subtracted from his total countable income.

E. Example – Break In Spenddown Eligibility

EXAMPLE #5: A recipient's Medicaid spenddown eligibility is canceled because of excess resources effective May 31, 1999. He reapplies for Medicaid on October 13, 1999. He had a Medicaid covered medical expense in the retroactive period.

He is placed on a spenddown for the retroactive period of July – September 1999. His countable income received in July – September 1999 is compared to the 3-months MNIL in the locality for one person. The first prospective budget period is October 1, 1999 through March 31, 2000. His countable income for October is projected for 6 months. The semi-annual MNIL in the locality for one person is subtracted from his total countable income. For the 6-month spenddown budget period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1330 SPENDDOWN BUDGET PERIODS	Page ending with M1330.400	Page 5

M1330.400 CONSECUTIVE BUDGET PERIODS

A. Policy

Consecutive budget periods are any spenddown budget periods that occur when there is no interruption in spenddown eligibility. Consecutive budget periods can occur after there has been a break in spenddown eligibility IF spenddown eligibility has been re-established. A retroactive or prospective spenddown budget period is a consecutive budget period when it follows a spenddown budget period in which eligibility was established.

B. Income Counted

The gross income, minus applicable income exclusions, anticipated to be received by the applicant's assistance unit in a consecutive budget period is counted and compared to the MNIL. Countable income anticipated to be received in the application month is projected over the entire 6-month period, unless the consecutive budget period is prorated.

EXAMPLE #6: A non-institutionalized individual applies for Medicaid in July 1999 and has a Medicaid covered service in the retroactive period. The retroactive period consists of April, May and June 1999. The first prospective budget period consists of July 1999 through December 1999. He meets both spenddowns. On January 20, 2000, he files an application for Medicaid and is placed on a spenddown for the period January 2000 through June 2000. Because spenddown eligibility was established in the prior spenddown budget period, the January 2000 through June 2000 prospective budget period is a consecutive budget period. His countable income for January is projected and the total is compared to the semi-annual MNIL in the locality for one person. He meets the spenddown for the period January 2000 through June 2000.

He files an application in July 2000 and is placed on a spenddown for the period July 2000 through December 2000, which is considered a consecutive budget period. He does not meet the spenddown for this period. A break in spenddown eligibility has occurred.

He files an application in January 2001 and is placed on a spenddown for the period January 2001 through June 2001, which is not a consecutive budget period. He meets the spenddown on May 2, 2001. He files an application in June 2001 and is placed on a spenddown for the period July 2001 through December 2001, which is a consecutive budget period.

M1340.000 SPENDDOWN DEDUCTIONS

M1340.100 SPENDDOWN DEDUCTIONS

A. Introduction

Medical expenses incurred by the individual, family or a financially responsible relative that are not subject to payment by a third party are deducted from the individual's spenddown liability. An expense is incurred on the date liability for the expense arises. The agency must determine which incurred expenses can be deducted and must deduct those expenses in accordance with section M1340.200 below.

The policy and procedures for deducting old bills and incurred expenses are based on federal regulations which were developed to remove the incentive for individuals to not pay their old bills.

B. Policy

Only those medical, dental, or remedial care expenses incurred by the applicant, budget unit member(s) and the applicant's spouse and/or child in the household who is not included in the applicant's assistance unit, are considered as potential deductions from spenddown.

1. Legal Liability For Expense

Medical expenses, or portions of medical expenses, that are covered by Medicare or other health insurance are not legal obligations of the individual and cannot be deducted from spenddown. If the expense was covered by a state or local public program as defined in section M1340.1100, see that section.

If a legally responsible relative's income is deemed to the assistance unit, the legally responsible relative's incurred expenses are deducted from the unit's spenddown. When the legally responsible relative also has a spenddown liability that has not been met, the legally responsible relative must choose the spenddown from which the incurred expense is deducted. An incurred expense can be deducted from only one spenddown. If not totally used to meet the spenddown, the balance can be applied to another spenddown.

2. Projected Expenses

"Projected" expenses are for services that have not yet been rendered. Projected expenses for medical services cannot be deducted, except for nursing facility care. Expenses included in a prepaid package of services cannot be deducted prior to the date the service(s) is actually rendered. See subchapter M1460 or M1480 for nursing facility patients.

3. Chronological Deduction

Expenses are deducted in chronological order based on the date they are incurred. The date incurred is the date the service was received or, in the case of health insurance premiums *that are withheld from monthly benefit payments, the first day of the month the premium payment is due.*

4. Multiple Spenddown Periods

When an individual has established more than one spenddown period, medical expenses are first deducted from the spenddown period during which they were incurred. If not used to achieve eligibility, the bill can be evaluated for use in succeeding budget periods. Specific instructions for treatment of prior

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date October 2019
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.300	Page 2

incurred expenses can be found in sections M1340.600, M1340.700 and M1340.800.

M1340.200 KINDS OF ALLOWABLE DEDUCTIONS

- A. Policy** To determine the allowable incurred expenses that will be deducted from *the spenddown liability*, the agency must identify the kind of service.
- B. Kinds of Service** In determining allowable incurred expenses, the medical or remedial care expenses listed below may be deducted from the spenddown liability.
- 1. Health Insurance Expenses** Medicare and other health insurance premiums are allowable health insurance expenses. *See M1340.300*
 - 2. Noncovered Services Expenses** Noncovered services expenses are expenses incurred by the individual or family or financially responsible relative for necessary medical or remedial care services which are not covered by the Virginia Medicaid State Plan. Noncovered services include expenses for Medicaid-covered services that exceed the State Plan limits on the amount, duration and scope of services. Medicaid co-payments and deductibles on covered services are “noncovered services.” Section M1340.400 lists noncovered services.
 - 3. Covered Services Expenses** Covered services expenses are expenses incurred by the individual or family or financially responsible relative for necessary medical or remedial care services which are covered by the Virginia Medicaid State Plan.

M1340.300 HEALTH INSURANCE PREMIUMS, DEDUCTIBLES, COINSURANCE

- A. Policy** Incurred expenses for Medicare and other health insurance premiums, and deductibles or coinsurance charges, including deductibles and copayments imposed by Medicaid, are deducted from the spenddown liability.
- B. Health Insurance Premiums** Health insurance premium payments include:
- 1. Private Health Insurance** Payments made from the applicant’s own income for private medical insurance are allowed deductions. Income protection insurance (indemnity) policy premiums are not medical expenses and are not deducted from the spenddown liability.
 - 2. Medicare Premiums** Medicare Part A, Part B and/or *Part D* premium payments are allowed deductions when the premiums are paid from the applicant’s own income.
 - 3. Amount Deducted** The amount deducted is the amount of the premium paid.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date April 2006
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.400	Page 3

- 4. When Deducted** A health insurance premium is deducted from the spenddown liability when the monthly premium is due. The worker cannot deduct a pre-paid premium that is paid before the month the premium is due.

When a health insurance premium is withheld from the individual's monthly benefit check, the premium is deducted on the first day of the month. For example, the individual receives a Social Security benefit from which is deducted the Medicare Part B premium. The Social Security check is dated December 13. The Medicare Part B premium is deducted from the individual's spenddown liability on December 1.

- C. Deductibles, Coinsurance, and Copayments** Deductibles, coinsurance and co-payment amounts are those portions of a medical services expense which the health insurance policy designates as the individual's responsibility to pay. The health insurance policy will not pay these amounts.

- 1. Amount Deducted** The amount deducted is the amount of the deductible, coinsurance or co-payment owed for the service.

- 2. When Deducted** A deductible, coinsurance or co-payment amount is deducted from the spenddown liability on the date the service was received.

- D. Verification** Verification of health insurance premiums, deductibles, coinsurance and copayment amounts include:

- a copy of the insurance premium notice,
- the explanation of benefits paid by health insurance,
- *the statement, or a copy of the statement, from the Medicare Part D prescription drug plan (PDP),*
- Medicaid co-pays and deductibles as listed in chapter M18, or the Virginia Medicaid Handbook.

M1340.400 NONCOVERED SERVICES

- A. Policy** Noncovered services expenses are incurred expenses for necessary medical or remedial care services which are not covered by the Virginia Medicaid State Plan, including the amounts for covered services that exceed the State Plan limits on amount, duration and scope of services. Noncovered services must be ordered by a physician or dentist in order to be deducted.

Noncovered services expenses are deducted on the date the service was rendered. For medical supplies and equipment that are ordered, the date of service is the date the supply or equipment was delivered to the individual. Expenses included in a prepaid package of services cannot be deducted prior to the date the service(s) is actually rendered.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2021
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.500	Page 4

B. Noncovered Services

Noncovered services (not covered by Medicaid) include:

1. services of other licensed practitioners of the healing arts such as chiropractors, naturopaths or acupuncturists, unless the services are covered by Medicare and the individual has Medicare.
2. professional nursing services in an individual's home when prescribed by the individual's physician and the cost is not part of a home health program or a Medicaid CBC waiver.
3. medical services provided by non-participating providers (providers who do not participate in Virginia Medicaid) unless the services are covered by Medicare and the individual has Medicare.
4. over-the-counter medications and medical supplies when ordered by a physician and the cost is not covered by Medicaid or Medicare, if the individual has Medicare.

C. Not Medical/ Remedial Care Services

The following are examples of services that are NOT medical/remedial care services and CANNOT be deducted from a spenddown liability, even if ordered by a physician:

- air conditioners or humidifiers,
- refrigerators, whole house generators and other non-medical equipment,
- assisted living facility (ALF) room & board and services,
- personal comfort items, such as reclining chairs or special pillows,
- health club memberships and costs,
- animal expenses such as for seeing eye dogs,
- cosmetic procedures.

D. Verification

Verification of noncovered services expenses includes:

1. a copy of the provider's bill or the insurance company's explanation of benefits paid, that shows:
 - the amount still owed that is the patient's responsibility, and
 - the service provider's name, address, and profession.
2. a prescription, physician's referral, or statement from the patient's physician or dentist that the service was medically necessary.

M1340.500 COVERED SERVICES

A. Policy

Covered services expenses are incurred expenses for necessary medical or remedial care services which are covered by the Virginia Medicaid State Plan. Covered services expenses are deducted on the date the service was rendered. For medical supplies and equipment that are ordered, the date of service is the

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2021
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.500	Page 5

date the supply or equipment was delivered to the individual. Expenses included in a prepaid package of services cannot be deducted prior to the date the service(s) is actually rendered.

B. Covered Services

Some of the medical services covered by Medicaid, and the limits on these services, are described in chapter M18. Medicaid covered services include:

- inpatient and outpatient hospital care
- physicians' services
- *dental services*
- prescription drugs
- lab and x-ray services
- nursing facility care
- home health care
- rehabilitative services
- psychiatrists' and psychologists services
- licensed clinical social worker and licensed professional counselor services
- physical therapy services
- medical supplies and equipment
- transportation to secure medical care which is purchased, not provided in the individual's own vehicle.

C. Verification

Medical supplies and drugs must be prescribed or ordered by a physician or dentist.

Covered services expenses verification includes:

1. A copy of the provider's bill or the insurance company's explanation of benefits paid, that shows:
 - the amount still owed that is the patient's responsibility, and
 - the service provider's name, address, and profession.
2. Documentation that the service is or was medically necessary. Documentation can include a prescription, physician's referral, statement from the patient's physician or dentist, or authorization from a licensed mental health provider or other individual as specified by DMAS to authorize a Medicaid covered service.

D. Medicare Part D Prescription Drug Expenses

Because enrollment in Medicare Part D is voluntary, not all Medicare beneficiaries will be enrolled in a Medicare PDP. For those enrolled in a PDP, not all drugs will be covered. Each PDP may have a different combination of deductibles, co-pays and coverage gaps.

The PDP must issue a periodic (at least monthly) statement to the beneficiary explaining all benefits paid and denied, and any deductible and/or co-pays incurred by the beneficiary. Use the PDP statement to verify prescription drug costs that remain the beneficiary's responsibility.

To determine if drug costs incurred by Medicare beneficiaries are allowable under spenddown, apply the following rules:

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date March 2011
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.600	Page 6

1. **Beneficiary NOT In Medicare PDP on Date of Service**
If the Medicare beneficiary was not enrolled in a Medicare PDP on the date of the prescription drug service, allow the prescription drug cost that is the responsibility of the beneficiary as a spenddown deduction.
2. **Beneficiary in Medicare PDP on Date of Service**
If the Medicare beneficiary was enrolled in a Medicare PDP on the date of service, allow the prescription drug cost (deductible, co-pays and/or coverage gap) that is the responsibility of the beneficiary as a spenddown deduction.
3. **PDP Denies Drug Coverage**
If a Medicare PDP denies coverage of a prescription drug, the beneficiary has the right to request an exception for coverage of the drug. The beneficiary is notified in writing of the decision on any exception requested.
 - Do NOT allow the charge if the drug charge appears on the statement as a denial and no exception was requested.
 - Allow the charge if the drug charge appears on the statement as a denial, and an exception was requested and denied.

Medicare beneficiaries who are enrolled in a Medicare PDP should be advised to keep their statements and other related documentation for consideration under spenddown.

M1340.600 OLD BILLS

A. Policy

Old bills are any unpaid medical, dental and/or remedial care expenses incurred prior to the retroactive period based on an initial application. Unpaid medical, remedial, and dental care expenses incurred prior to a re-application and its retroactive period may also be deducted as old bills provided that:

- they were not incurred during a prior spenddown budget period, in which spenddown eligibility was established, *or*
- *they were incurred during the retroactive period if the individual either did not meet the retroactive spenddown or was not eligible for Medicaid in the retroactive period (for example, due to excess resources), and*
- they were not fully deducted from any previous spenddown that was met, and
- they remain the liability of the individual.

Old bills may include medical bills that were paid by a state or local program.

An unused portion of an old bill which is still the liability of the individual may be applied to a future consecutive spenddown budget period(s) only if there is no break in spenddown eligibility. If there is a break in spenddown eligibility, only current payments made on old bills based on a prior spenddown application can be deducted in the current budget period. The old bill from a prior application is no longer an “old bill” as defined in section M1310.300. Only the amount of any “current payment” made on that expense in the current budget period can be deducted. Go to section M1340.800 for current payments policy and procedures.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2018
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.600	Page 6a

B. Procedures

Decide whether an old bill is deducted using the following procedures:

1. Verification

Request the following verification from the individual or his representative:

- proof that the bill is still owed *to the medical provider*;
- *Use of a credit card: if the individual has used a credit card to pay an old bill and the provider is satisfied the bill as being paid, the individual has paid the provider. The amount is now owed to the credit card company and no longer considered an old bill.*
- *Unpaid bill in collections: The worker will need to determine the status of the unpaid bill in collections. If the provider is using a third party entity to collect an old bill and the amount is still owed directly to the provider, it would be counted as an old bill. If the provider has “written” or “charged” off an old bill, it would no longer be recognized as being owed, thus would not be counted as an old bill. If a collection agency has ‘purchased’ a charged off debt from the provider and is attempting to collect, the individual owes the collection agency, and not the provider. Though still an owed amount, it is not recognized as an old bill.*
- if applicable, the amount owed that was not covered by the patient's insurance or liable third party,
- the service provider's name, address, and profession
- proof the service was medically necessary (prescription, physician's referral, statement from the patient's physician or dentist).

2. Determine Amount of Deduction

Upon receipt of the requested documentation, determine the unpaid balance still owed on the old bill minus the amount used to meet a prior spenddown, if any.

3. Subtract The Old Bill

Subtract the old bill amount from the spenddown liability on the first day of the spenddown budget period according to policy in subsection A above.

C. Example-- Deduct Balance of Old Bill

EXAMPLE #1: The application month is October 1999. The individual never applied for Medicaid before October 1999. He did not receive a Medicaid-covered service in the retroactive period. The spenddown liability for the first prospective budget period October 1999 through March 2000 is \$560. The individual provides verification that he still owes \$100 for a medically necessary service received in May 1999 (prior to the retroactive period). The \$100 old bill is deducted from the first prospective budget period spenddown liability, leaving him a spenddown balance of \$460 on October 1, 1999.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.700	Page 7

M1340.700 CARRY-OVER EXPENSES

A. Policy

Carry-over expenses are unpaid medical or remedial care expenses that:

- were incurred within a retroactive or prospective budget period in which spenddown eligibility was established,
- remain the liability of the individual, and
- were not fully counted in any previous spenddown that was met.

Note: Old bills never become carry-over expenses because old bills, by definition, are incurred outside a spenddown budget period in which spenddown eligibility was established. Carry-over expenses are incurred during a spenddown budget period in which spenddown eligibility was established.

B. Procedures

Determine if the carry-over expenses are fully or partially deducted by using the following procedures:

1. Verification

Request the following verification from the individual or his representative:

- proof that the amount of the carry-over expense is still owed,
- if applicable, the amount owed that was not covered by the patient's insurance or liable third party;
- the service provider's name, address, and profession,
- proof that the service was medically necessary (prescription, physician's referral, or statement from the patient's physician or dentist).

2. Determine Amount of Deduction

Upon receipt of the requested documentation, determine the amount of the expense that can be deducted from the spenddown liability for the current spenddown budget period. Any amount of the expense that was deducted from a previous spenddown that was met CANNOT be deducted in the current spenddown budget period.

3. Subtract Carry-over Expense

Subtract the carry-over expense amount that was not used to meet a previous spenddown from the spenddown liability on the first day of the current spenddown budget period, after deducting old bills.

C. Remaining Balance

The remaining balance of carry-over expenses is applied to the spenddown liability of the next consecutive budget period. If that spenddown is met and there is still a balance remaining on the carry-over expenses, that remaining balance may be deducted in subsequent consecutive budget periods until there is a break in spenddown eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.800	Page 8

When a break in spenddown eligibility occurs, only the amount of “current payments” made on that expense in the current spenddown budget period can be deducted from the spenddown liability. See Current Payments on Expenses in section M1340.800 below.

D. Example--Carry-over Expenses

EXAMPLE #2: An individual has been on spenddowns consecutively during the two previous 6-month periods (April through September and October through March). He met both spenddowns. He reapplies for Medicaid on April 1. The spenddown liability for April through September is \$560. The individual provides verification that he still owes \$100 for a medically necessary noncovered service he received the prior November. The \$100 is a carry-over expense and is deducted from the current spenddown budget period's spenddown liability on the first day of the current spenddown budget period (April through September), leaving him a spenddown balance of \$460 on April 1.

M1340.800 CURRENT PAYMENTS ON EXPENSES

A. Policy

Current payments are payments made in the current spenddown budget period on unpaid balances of old bills or carry-over expenses incurred before the current spenddown budget period:

- which were not fully used in establishing eligibility in a previous spenddown budget period, and
- when there has been a break in spenddown eligibility.

B. Procedures

Decide whether a current payment is deducted using the following procedures:

1. Verification

Request the following verification from the individual or his representative:

- proof that the expense is still owed,
- if applicable, the amount owed that was not covered by the patient's insurance or liable third party,
- the service provider's name, address, and profession,
- proof that the service was medically necessary (prescription, physician's referral, or statement from the patient's physician or dentist), and
- the amount, frequency and dates of the payments made.

2. Determine Amount of Current Payment

Upon receipt of the requested documentation, determine if there is any remaining amount of the expense that was not used to meet a previous spenddown. If an amount remains, the amount of the current payment can be deducted.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.800	Page 9

**3. Subtract
Current
Payment**

Subtract the payment(s) made in the current spenddown budget period from the current spenddown liability, effective the date the payment is made to the provider.

C. Examples

**1. Current
Payment on
Unpaid
Balance of
Old Bill**

EXAMPLE #3: A request for Medicaid is filed on July 5, 1999. The individual had a prior spenddown application dated July 1996 for the period July 1996 through December 1996, which was met. She also had an application filed in January 1999, which was approved as CNNMP January 1, 1999 and closed March 31, 1999, due to excess countable resources. No medical, dental, or remedial services were received during the retroactive period based on the July 1999 application (April 1, 1999 through June 30, 1999).

The first prospective budget period based on her July 5, 1999 re-application is July 1, 1999 through December 31, 1999. The individual provides verification that she still owes \$100 for a medically necessary dental service she received back in March 1996, which is an old bill based on her July 1996 application and which was not used to meet the July 1996 through December 1996 spenddown. She pays the dentist \$10 per month on this old bill. Because there was a break in her spenddown eligibility, only the current payment she makes on the March 1996 dental bill can be deducted from her current spenddown. The \$10 current payment is deducted on July 8, 1999, the date she makes the payment.

**2. Current
Payment on
Carry-over
Expense**

EXAMPLE #4: The individual has been on spenddowns consecutively during the two previous 6-month periods which were July 1, 1998 through December 31, 1998 and January 1, 1999 through June 30, 1999. His spenddown liability for each spenddown budget period was \$600. He provided verification of a \$1,000 bill for a medically necessary noncovered service he received in February 1998. His first spenddown was met by deducting \$600 of the \$1,000 old bill from the spenddown liability. The remaining \$400 balance of the old bill was deducted from his second spenddown liability but eligibility was not established.

He reapplies for Medicaid in July 1999. Because he did not establish eligibility by meeting a spenddown in the spenddown budget period preceding the current spenddown budget period (July through December) only the current payments made on the February 1998 noncovered service can be deducted from his current spenddown liability. These payments are deducted on the date(s) they are actually made. He makes payments of \$10 per month on the expense. On July 5, 1999, he makes a \$10 payment. This payment is a current payment and is deducted from the current spenddown budget period's spenddown liability. Subsequent payments made in the current spenddown budget period will be deducted on the date made.

Virginia Medical Assistance Eligibility	M13	July 1999
Subchapter Subject	Page ending with	Page
M1340 SPENDDOWN DEDUCTIONS	M1340.900	10

M1340.900 WHEN TO DEDUCT INCURRED EXPENSES

A. Incurred Expenses When determining allowable incurred expenses, the agency must identify the following:

1. Retroactive Spenddown Budget Period a. The First Retroactive Spenddown Budget Period The first retroactive spenddown budget period is the retroactive spenddown budget period based on an individual’s initial Virginia Medicaid medically needy spenddown application. In the first retroactive spenddown budget period, deduct:

- old bills, and
- paid or unpaid expenses incurred during the retroactive spenddown period.

b. A Later Retroactive Spenddown Budget Period

1) Break in Spenddown Eligibility

a) Policy

In a later retroactive spenddown budget period based on a Virginia Medicaid re-application filed when there is a break in spenddown eligibility, deduct:

- old bills based on the re-application month,
- current payments made on all expenses incurred prior to the first day of the most recent break in spenddown eligibility, and
- paid or unpaid expenses incurred during the retroactive period based on the re-application month,

to the extent that the expenses have not been deducted previously in establishing spenddown eligibility.

In a later retroactive budget period when there has been a break in spenddown eligibility, balances on “old bills” based on previous applications are only deducted as current payments.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.900	Page 11

b) Procedures

Determine if the expense was incurred in a prior spenddown budget period. If the expense was incurred in a prior spenddown budget period that has already been met and the expense was incurred prior to the date the spenddown was met, recalculate the spenddown eligibility using this expense. If the spenddown is met on an earlier date, re-enroll the individual with an earlier eligibility begin date using "Type 4" eligibility.

If the expense was incurred in a prior spenddown budget period in which the spenddown was not met, determine if the expense meets the spenddown in that period. If the expense meets the spenddown, the individual establishes spenddown eligibility in that period, effective the date the spenddown is met. If the expense does not meet the spenddown, the expense may be an old bill based on a subsequent re-application.

A re-application's retroactive period may include months that were included in a previous spenddown budget period that was not met. See section M1330.200 for policy regarding the retroactive spenddown budget period.

Re-evaluate whether a break in spenddown eligibility has occurred. If a break in spenddown eligibility has occurred, then all expenses incurred prior to the re-application's retroactive period and subsequent to the last day of the last spenddown budget period that was met and which were not fully used to establish spenddown eligibility in any prior spenddown budget period that was met should be evaluated for deductions as old bills for the new application.

If a break in spenddown eligibility has not occurred, go to section 2. below for procedures to use when no break in spenddown eligibility has occurred.

EXAMPLE #5: Mr. Smith's initial application was filed July 1999. He was placed on a spenddown for the period July 1999 through December 1999. He met the spenddown on August 15, 1999. He reapplied for Medicaid on January 8, 2000. He was placed on a spenddown for the period January 2000 through June 2000. He did not meet the spenddown for that period (January 2000 through June 2000). He reapplies for Medicaid July 19, 2000. The retroactive period for the July 2000 re-application is April 2000 through June 2000. Because he did not establish spenddown eligibility in the January 2000 through June 2000 spenddown budget period, his July 2000 application has a retroactive spenddown budget period consisting of April, May and June 2000.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M13	July 1999
Subchapter Subject	Page ending with	Page
M1340 SPENDDOWN DEDUCTIONS	M1340.900	12

1999												2000											
7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12						
{ Spenddown met }						{ Spenddown not met }						{ }											
						{ Retro period }						{ First prospective }											
						For July 2000																	
						Application																	

He presents a bill for a medical expense he incurred on March 3, 2000. The worker determines that the expense was incurred in a previous spenddown budget period that was not met (January 2000 through June 2000). The worker recalculates Mr. Smith’s spenddown eligibility for that period by deducting the expense from the January 2000 through June 2000 spenddown liability. He does not meet the spenddown for the period January 2000 through June 2000. The worker next evaluates his eligibility for the retroactive spenddown budget period, April 2000 through June 2000. The March 2000 expense is an old bill based on the July 2000 re-application and is deducted on the first day of the retroactive spenddown budget period, April 2000.

EXAMPLE #6: Ms. Jones’ initial application was filed in July 1999. She was placed on a spenddown for the period of July 1999 through December 1999. She met the spenddown on September 2, 1999. She re-applied on January 10, 2000 and was placed on a spenddown for the period of January 2000 through June 2000. She did not meet the spenddown for that period (January 2000 through June 2000). She re-applies for Medicaid on July 5, 2000. The retroactive period for July 2000 re-application is April 2000 through June 2000. Because she did not establish spenddown eligibility in the January 2000 through June 2000 spenddown budget period, her July 2000 re-application has a retroactive spenddown budget period consisting of April, May and June.

1999												2000											
7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12						
{ Spenddown met }						{ Spenddown not met }						{ }											
						{ Retro period }						{ First prospective }											
						For July 2000																	
						Application																	

The worker calculates the spenddown liability for the retroactive spenddown budget period. The worker re-evaluates the bills in the case record which were submitted during the previous spenddown budget period (January 2000 through June 2000). The expenses incurred January 2000 through March 2000 are old bills if they remain the liability of Ms. Jones. The old bills are deducted on the first day of the retroactive spenddown budget period and the paid and unpaid expenses incurred during the spenddown budget period are deducted chronologically.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.900	Page 13

2) No Break in Spenddown Liability

A later retroactive spenddown budget period based on a Virginia Medicaid re-application filed when there is no break in spenddown eligibility is also a consecutive budget period. Go to section 3. below for “Consecutive Budget Period”.

2. First Prospective Budget Period

a. The First Prospective Budget Period

When the first prospective budget period is the prospective budget period based on an individual’s initial Virginia Medicaid medically needy spenddown application and there is a retroactive spenddown budget period, deduct:

- 1) unpaid balances on old bills carried forward from the retroactive spenddown budget period that were not used to meet the retroactive spenddown. The unpaid balance on an old bill is deducted from the first prospective budget period when:
 - there is no retroactive spenddown budget period, or
 - the individual was eligible without a spenddown in the retroactive period, or
 - the individual does not meet the retroactive spenddown, or
 - the individual meets the retroactive spenddown without using all of the balance of the old bill(s).
- 2) paid or unpaid expenses incurred during the retroactive spenddown budget period that were not used to meet the retroactive spenddown, including any co-pays, etc., incurred while the individual was eligible for Medicaid in the retroactive period.
- 3) paid or unpaid expenses incurred during the first prospective budget period.

b. A Later First Prospective Budget Period

A later first prospective budget period is a budget period based on a Virginia Medicaid re-application filed when there **has been** a break in spenddown eligibility. In this budget period, deduct:

- unpaid balances on old bills based on the re-application month **(balances on old bills based on previous applications cannot be deducted as old bills; they may be deducted as current payments)**, which are carried forward from the re-application’s spenddown retroactive budget period and were not used to meet the re-application’s retroactive spenddown.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.900	Page 14

- current payments made on all expenses (not used previously) incurred prior to the first day of the most recent break in spenddown eligibility;
- paid or unpaid expenses incurred during the retroactive spenddown budget period based on the re-application month, that were not used to meet the retroactive spenddown, including any co-pays, etc., incurred while the individual was eligible for Medicaid; and
- paid or unpaid expenses incurred during the first prospective budget period based on the re-application month,

to the extent that the expenses have not been deducted previously in establishing spenddown eligibility.

EXAMPLE #7: In Example #6 above, Ms. Jones established spenddown eligibility in the retroactive budget period on April 1 by deducting a portion of the old bills incurred in January, February and March 2000. The remaining balance of the old bills from January, February and March 2000 is deducted from her spenddown liability in the first prospective budget period that begins July 1, 2000 and ends December 31, 2000.

She verifies that she started making payments on July 1, 2000, on a noncovered medical expense she incurred in December 1999 which was prior to January 1, 2000, the first day of the most recent break in spenddown eligibility. The payment she made on July 1 is deducted on July 1 as a current payment. She submits a receipt for payment of a dental service she received on May 2, 2000. This expense is deducted from the spenddown liability on the first day of the later first prospective budget period (July 1, 2000). Any medical expenses she incurs during the later first prospective budget period are deducted on the date incurred.

3. Consecutive Budget Period

In a consecutive budget period, deduct:

- unpaid balances on old bills carried forward that were not used to meet a previous spenddown,
- carry-over expenses incurred during the retroactive spenddown budget period, the first prospective spenddown budget period, and/or a subsequent spenddown prospective budget period which were not deducted previously in establishing spenddown eligibility, IF:
 - the individual established eligibility in each spenddown budget period preceding the current spenddown budget period, AND

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.1000	Page 15

- the expenses are unpaid and remain the individual's liability, are allowable by kind of service and are carried over from the preceding spenddown budget period(s) because the individual met each preceding spenddown without deducting all such incurred unpaid expenses,

- c. paid or unpaid expenses incurred during the current spenddown budget period, and.
- d. current payments made on all expenses (not used previously) incurred prior to the first day of the most recent break in spenddown eligibility.

B. Order of Deduction

The agency must deduct allowable incurred expenses that are the liability of the individual (see section M1340.1100 for expenses paid by a state or local program). Expenses are deducted in chronological order (date of service) first, and then by kind of service if multiple kinds are received on the same date.

Expenses, including expenses in a prepaid package of services, cannot be deducted prior to the date the service(s) is actually rendered.

1. Chronological Order

- a. Unpaid balances on old bills and/or carry-over expenses are deducted first, on the first day of the spenddown budget period.
- b. Paid or unpaid expenses incurred within the current spenddown budget period are deducted in chronological order by date of service.
- c. Current payments are deducted in chronological order by the date of payment.

2. Kind of Service

If multiple service expenses are incurred on the same day, the expenses are deducted on that date in the following order:

- a. expenses for Medicare and other health insurance premiums, and deductibles or coinsurance charges, including enrollment fees, deductibles and copayments imposed by Medicaid.
- b. noncovered services - expenses for necessary medical or remedial care services which are not covered by the Virginia Medicaid State Plan, including those that exceed the plan's limits on amount, duration and scope of services.
- c. covered services - expenses for necessary medical or remedial care services which are covered by the Virginia Medicaid State Plan.

M1340.1000 THIRD PARTY PAYMENTS

A. Policy

A third party is any individual, entity, or program that is or may be liable to pay all or part of the individual's expenses for medical or remedial care

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date January 2020
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.1000	Page 16

services recognized under state law.

An incurred medical expense cannot be deducted from the spenddown liability until the third party has made a decision to either deny or make some payment on the expense. Only that portion of the expense which is the applicant's legal responsibility shall be deducted from excess income in determining spenddown eligibility, unless the expense was covered by a state or local public program. If the expense was covered by a state or local public program, see section M1340.1100 below.

The application processing time standards apply to the receipt of third party payment or verification of third party intent to pay. Efforts to determine the liability of a third party shall continue through the last day of the application processing time standard (90 days for disability determinations; 45 days for all other applicants). If information regarding third party liability is not received by this date, eligibility must be determined based on the information available, if any, about the actual amount of the third party's payment.

If the amount subject to payment by a third party cannot be determined based on information available, the bill in question to which the third party liability applies cannot be used in determining spenddown eligibility. However, if information becomes available at a later date, the spenddown eligibility shall be redetermined and the effective date of spenddown eligibility revised.

Exception: In the case of an individual covered by Medicare who receives a service from a Community Services Board (CSB), the service may be used as a spenddown deduction per M1340.1100 without requiring that Medicare first be billed for the service as long as the CSB provides a statement that the service is not covered by Medicare.

B. Determining The Amount of The Third Party Payment

Determine the balance of the expense for which the individual is legally liable to pay. Use the third party's explanation of benefits paid (EOB) or similar statement received by the individual which shows the date of service, type of service, service provider, amount charged, amount approved, and amount paid by the liable third party.

Use the EOB's statement of the individual's responsibility as the amount to deduct from the spenddown liability. If the EOB does not show this amount, calculate the individual's responsibility.

1. Service Provider Accepts Approved Charges

When the service provider accepts the third party's approved charges, subtract the amount of the third party's payment from the approved charges. The remainder is the individual's responsibility and is the amount deducted from the spenddown liability.

2. Service Provider Does Not Accept Charges

When the service provider does NOT accept the third party's approved charges, subtract the amount of the third party's payment from the provider's charges. The remainder is the individual's responsibility and is the amount deducted from the spenddown liability.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date January 2020
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.1100	Page 17

C. Procedures

1. Worker

a. Inform the applicant that:

- 1) an expense cannot be deducted until his/her insurance or other third party, if applicable, has taken action on the claim
- 2) the applicant must provide evidence documenting:
 - the claim was denied, or
 - the amount paid by the third party on the claim.
- 3) only the amount not covered by the third party(ies) and which remains the liability of the individual may be deducted from the spenddown (unless the expense was covered by a state or local public program as described in section M1340.1100 below).

b. The EW must take reasonable measures to determine the liability of a third party to pay for the incurred expense. However, because of the application processing time standards, do not delay a spenddown determination simply because the third party has not yet made payment or has not yet denied the expense. Complete the determination without deducting the expense. Note the medical expenses submitted but not deducted due to pending TPL on the Medical Expense Record. Notify the applicant of the decision and of which bills (expenses) were not used in the determination because documentation of the third party's action was not received.

2. Applicant

The applicant is responsible to submit:

- verification that a claim for the incurred expense was submitted, and
- evidence of the third party's denial or amount of payment.

M1340.1100 STATE OR LOCAL PUBLIC PROGRAMS

A. Policy

Expenses for incurred medical services received

- for which the applicant is or was legally liable, and
- which were or will be provided, covered, or paid for by a state or local (or territorial) public program

can be deducted from the spenddown even though the applicant does not owe anything for the service.

Expenses covered by federally-funded and/or administered programs such as Medicare and Medicaid cannot be deducted from spenddown. Local health department programs, although administered by the Virginia Department of Health, are not state or local public programs because the health departments receive some federal funds.

B. State or Local Public Programs

State or local public programs are state or local public health care programs which are wholly or partially funded and administered by local government,

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date January 2020
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.1200	Page 18

and which do not have any federal funding or administration. State or local public programs include, but are not limited to:

1. General Relief (GR)
2. Community Service Boards (CSB) services.
3. Department of Behavioral Health and Developmental Services (DBHDS) institutional services.
4. Virginia Commonwealth University (VCU) Health System and University of Virginia (UVA) Health System clinics, care centers, and hospitals
5. Crime victims compensation (Virginia Workers Compensation Commission)
6. Local “free” clinics funded and administered by local governments that do not charge any fee to any patient for any service.
7. Community Services or Neighborhood Assistance programs.

C. Procedures

1. Worker

- a. Inform the applicant that expenses for medical services for which the applicant was legally liable and which were provided, covered, or paid for by a state or local public program will be deducted from the spenddown even though the applicant does not owe anything for the service.
- b. The EW must take reasonable measures to determine the public program's payment or coverage of the medical or remedial care service. However, because of application processing time standards, do not delay a spenddown determination because the public program's payment is not verified. Complete the determination without deducting the expense, notify the applicant of the decision and that the public program expense(s) was not used in the determination because verification was not received

Exception: In the case of an individual covered by Medicare who receives a service from a CSB, the service may be used as a spenddown deduction without requiring that Medicare first be billed for the service as long as the CSB provides a statement that the service is not covered by Medicare.

2. Applicant

The applicant is responsible to submit:

- verification that the medical/remedial service was received and that a claim for the incurred expense was submitted, and
- evidence of the public program's amount of payment for the service.

M1340.1200 SPENDDOWN LIABILITY CALCULATION

A. Retroactive Spenddown Budget Period

The procedures for calculating a retroactive spenddown liability for a spenddown budget period follow:

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.1300	Page 19

1. Determine the total income for the assistance unit in each of the 3 retroactive months.
2. Subtract the appropriate ABD or F&C medically needy income exclusions from each month's total income. The remainder is the monthly countable income for each month.
3. Add each month's countable income together; the result is the countable income for the retroactive spenddown budget period.
4. Subtract the 3-months MNIL for the number of persons in the assistance unit in the locality group from the countable income for the retroactive spenddown budget period.
5. The remainder is the retroactive spenddown liability.

B. Prospective Budget Period

The procedures for calculating liability in a prospective budget period follow:

1. Determine total income anticipated to be received by the assistance unit in the application month.
2. Subtract the appropriate ABD or F&C medically needy income exclusions from the monthly income. The remainder is the monthly countable income.
3. Multiply the monthly countable income by 6 (6 months in the spenddown budget period). The result is the countable income for the spenddown budget period.

NOTE: This procedure is not applicable to long-term care.

4. Subtract the semi-annual (6 months) MNIL for the number of persons in the assistance unit in the locality group from the countable income.
5. The remainder is the spenddown liability.

M1340.1300 SPENDDOWN ENROLLMENT

A. Retroactive Spenddown Budget Period

Enrollment in Medicaid begins the date the retroactive spenddown was met - the date within the retroactive period that the spenddown liability amount, after deducting incurred expenses, reached zero. When the spenddown is not met, retroactive spenddown eligibility does not exist.

- When the retroactive spenddown is met entirely by old bills or carry-over expenses, eligibility begins the first day of the retroactive spenddown budget period.
- When the retroactive spenddown is met by current payments or expenses incurred during the retroactive spenddown budget period,

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date January 2018
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.1300	Page 20

eligibility begins the date the retroactive spenddown was met.

If the individual continues to meet the MN requirements, eligibility continues for the remainder of the retroactive spenddown budget period.

1. Begin Date The coverage begin date is the date the spenddown was met.

2. End Date The end date of Medicaid eligibility is the end date of the retroactive spenddown budget period, if the individual continued to meet the MN requirements throughout the period.

3. Coverage Type Enroll the individual in "Type 2" retroactive coverage. Coverage will automatically end after the coverage period end date.

4. Aid Category The *aid category* for the individual is the medically needy (MN) *aid category (AC)* of the individual's MN covered group.

5. Reference See Appendix 1 of this subchapter for further examples of retroactive spenddown budget periods.

B. Prospective Budget Period Enrollment in Medicaid begins the date the spenddown was met - the date within the prospective budget period that the spenddown liability amount, after deducting incurred expenses, reached zero. When the spenddown is not met, eligibility does not exist.

* When the spenddown is met entirely by old bills or carry-over expenses, eligibility begins the first day of the prospective budget period.

* When the spenddown is met by current payments or by expenses incurred during the prospective budget period, eligibility begins the date the spenddown was met.

If the individual continues to meet the MN requirements, eligibility continues for the remainder of the prospective budget period.

1. Begin Date The coverage begin date is the date the spenddown was met.

2. End Date The end date of coverage is the end date of the prospective budget period, if the individual continues to meet the MN requirements throughout the prospective budget period.

3. Coverage Type Enroll the individual in the appropriate coverage type.

4. Aid Category The *aid category* for the individual is the medically needy (MN) *aid category (AC)* of the individual's MN covered group.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M13	July 2001
Subchapter Subject	Page ending with	Page
M1340 SPENDDOWN DEDUCTIONS	M1340.1300	21

C. Example--First
Prospective
Budget Period

EXAMPLE #8: Mr. Not lives in Group III and applied for Medicaid on November 21, 1999, as disabled. The MDU determined that he is disabled. He had been on Medicaid once before after meeting a spenddown; his Medicaid was canceled at the end of the spenddown period on May 31, 1999.

He has an \$8,400 hospital bill and a \$1,500 physician's bill for July 10 to July 20, 1999 (total \$9,900) on which he still owes a total of \$9,000. He incurred a \$578 outpatient hospital bill on October 3, 1999, which he paid. He has no health insurance. His income is \$800 per month disability benefit from a private company. He is not eligible for retroactive Medicaid because he had excess resources throughout the retroactive period. His resources are within the Medicaid limit in November 1999 (application month).

The first prospective budget period is November 1, 1999 through April 30, 2000. The income limit is \$1,950. His spenddown liability is \$2,730:

\$ 800 disability benefit

- 20 general income exclusion

780 countable income

x 6 months

4,680 countable income for first prospective budget period

- 1,950 MNIL for first prospective budget period Group III

\$2,730 first prospective spenddown liability

His verified balances on the July 1999 services (incurred during the break in spenddown budget periods) are old bills. His eligibility is calculated:

\$ 2,730 spenddown liability

- 2,730 July hospital bill (old bill for November 21 application)

\$ 0 spenddown balance on November 1, 1999

Because the spenddown was met on November 1, 1999, Mr. Not is entitled to Medicaid for the period November 1, 1999 - April 30, 2000. The unpaid balance of old bills not used to meet the spenddown can be applied to the budget period beginning May 1, 2000, if another application is filed and he is placed on a spenddown.

D. Example--
Consecutive
Budget Period

EXAMPLE #9 (Using June 2000 figures): Ms. Sub lives in Group I and applied for Medicaid on June 6, as disabled. She had applied the previous December and was on a retroactive spenddown for the period September 1 through November 30, which she met on September 12. She met her December 1 through May 31 spenddown on January 2. She verifies that she has a \$1,300 noncovered dental bill for August 15 (an old bill based on the December initial application) and a \$1,500 balance on a nonparticipating physician's bill for September 10 to September 12 which was not used to meet a prior spenddown. She pays \$50 a month on each bill to each provider. She has no health insurance and is not eligible for Medicare.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M13	January 2018
Subchapter Subject	Page ending with	Page
M1340 SPENDDOWN DEDUCTIONS	M1340.1300	22

Her income is projected from her \$550 per month June SSA disability check. The budget period is June 1 through November 30; the income limit is \$1,300. Her spenddown liability is \$1,880.

\$ 550

- 20

530

x 6

3,180

- 1,300

\$ 1,880

SSA disability
general income exclusion
countable income
months
countable income for subsequent budget period
MNIL for subsequent budget period Group I (*using June 2000 figures*)
spenddown liability June 1 - November 30

The current budget period based on her re-application abuts her previous spenddown budget period. It is a consecutive budget period because she established eligibility in the preceding budget period and, therefore, the \$1,300 balance owed on the old bill and the carry-over September expenses are deducted from her current spenddown liability. She owes a total of \$2,800 on these expenses as of June 1. Her eligibility is calculated:

\$ 1,880

- 1,300

580

- 580

\$ 0

spenddown liability June 1 - November 30
old bill balance from August dental bill
spenddown liability after deducting dental bill
September carry-over expense; balance of \$920 remains
spenddown balance on June 1

NOTE: The non-covered dental expense and the physician’s bill meet the definition of an old bill. The remaining balance of the carry-over expense can be used in a consecutive budget period if still owed.

Because the spenddown was met on June 1, Ms. Sub is enrolled in Medicaid for the period June 1 through November 30, eligibility *Aid Category 058*.

E. Reference

See Appendix 1 to this subchapter for further examples of spenddown budget periods.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with M1340.1300	Page 23

MEDICAL EXPENSE RECORD – MEDICAID

FORM NUMBER - 032-03-023

PURPOSE OF FORM -

1. To inform the individual or family who is ineligible for Medicaid, due to excess income, of the amount which must be spent or incurred for medical services before eligibility can be established;
2. To provide space to keep a running record of medical expenses;
3. To enable the client to estimate with some degree of accuracy the appropriate time to submit expenses to the agency and request a re-evaluation of his spenddown; and
4. To provide the agency with a method of determining the specific date the spenddown was met.

USE OF FORM - Used by the individual or family with excess income to record all medical expenses for himself and/or others for whom he has requested Medicaid. At such time as he believes he has incurred expenses equal to his spenddown liability, the client should submit the form with his bills to the local agency where his spenddown will be re-evaluated. The "Agency Use Only" section will be completed by the agency when:

1. a client submits bills for medial expenses that have been paid or incurred or
2. the agency has knowledge that current medical expenses, such as hospitalization may result in a negative spenddown balance.

When an individual or family returns with the form and has medical bills, the worker must apply the bills to the spenddown liability in accordance with the procedures specified in chapter M13 in the Medicaid manual. In some instances the individual or family will not be able to keep a running record of medical expenses and the bills alone will provide sufficient information.

NUMBER OF COPIES - Original and one copy.

DISTRIBUTION OF COPIES - Original must be prepared for the client. A copy must be filed in the eligibility case file.

INSTRUCTION FOR PREPARATION OF FORM - Enter in the appropriate spaces:

1. the name of the county or city Department of Social Services.
2. the full name of the individual.
3. the Medicaid case number.
4. the dates identifying the spenddown budget period.
5. the amount of the spenddown liability.

Give the form to the client and place a copy in the eligibility case file.

When the form 032-03-023 showing medical expenses or medical bills paid or incurred in the spenddown period is returned by the client, the agency will determine if the spenddown has been met. In listing medical obligations, expenses for a period can be consolidated into a lump sum as long as there is a positive balance. As the balance approaches zero, the dates services were rendered must be listed chronologically (with amounts) in order to determine the specific date on which the spenddown was met. This evaluation can be done on either the client or the agency copy of Form 032-03-023. If the client's form is used, a copy of that evaluation must be placed in the agency record. Regardless of which form is used by the agency to evaluate the effect of the client's medical expenses on the spenddown, the client's copy of the Form 032-03-023 must be returned to him, showing the balance of the spenddown liability amount, or stating that the spenddown has been met.

Virginia Medical Assistance Eligibility	M13	July 1999
Subchapter Subject	Page ending with	Page
M1340 SPENDDOWN DEDUCTIONS	Appendix 1	1

COMMONWEALTH OF VIRGINIA DEPARTMENT OF SOCIAL SERVICES MEDICAL EXPENSE RECORD - MEDICAID	COUNTY/CITY
CASE NAME(S)	CASE NUMBER
BUDGET PERIOD (DATES)	SPENDDOWN LIABILITY FOR THE BUDGET PERIOD \$

You are not eligible for full Virginia Medicaid coverage at this time because your countable income exceeds the Medicaid income limit. If your medical and dental expenses equal your spenddown liability (the amount by which your income exceeds the income limit) at any time during the period shown above, you may be eligible for Medicaid at that time for the remainder of the period, provided all other eligibility requirements continue to be met. Also, your medical bills you still owe may be used to reduce the spenddown liability balance. Once those bills are used to reduce a spenddown and you become eligible, they cannot be used against any future spenddown liability.

You should keep a daily record of all medical expenses for yourself and/or others for whom you have requested Medicaid. This will help you to know when you have medical expenses totaling the spenddown liability amount shown above. The space below is for your guidance and use. Include medical costs paid by other state and local programs such as General Relief or State-Local Hospitalization. When you believe you have met the spenddown, contact your worker at the Social Services Department.

DETERMINING SPENDDOWN ELIGIBILITY CHARTS

EXAMPLE #1:

2000												2001											
1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12
{__Retro__}				{__1st Prospective__}				{__Consecutive__}				{__Consecutive__}											
SD was met				1st (Initial) application				2nd application				3rd application											
				SD was met				SD was met				SD was met											

First application (initial application) date: June 2000. A retroactive budget period of March 1, 2000 - May 31, 2000 and a first prospective budget period of June 1, 2000 - November 30, 2000 were established.

Second application date December 2000. Spenddown budget period is December 1, 2000 - May 31, 2001.

Third application date June 2001. Spenddown budget period is June 1, 2001 - November 30, 2001.

Old bills are any bills incurred before March 2000. They are used to meet the retroactive spenddown. The unused balance is used to meet the 1st prospective spenddown and the consecutive spenddowns (until no old bill balance remains) because there is no break in spenddown eligibility (each spenddown was met).

EXAMPLE #2:

2000												2001											
1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12
{__Retro__}				{__1st Prospective__}								{later Retro}				{__later 1st Prospective__}							
SD met				initial application												re-application							
				SD was met																			

The initial application was filed in June 2000. Retroactive budget period is March 1, 2000 - May 31, 2000 and first prospective budget period is June 1, 2000 - November 30, 2000. Old bills based on the initial application are any bills incurred prior to March 2000. Any bills incurred in March through May (the retroactive budget period), whether paid or unpaid, are carry-over expenses in the 1st prospective budget period.

There is a break between spenddown budget periods. The new Medicaid application was filed July 2001. This is a re-application with a later retroactive budget period and a later 1st prospective budget period. For the July 2001 application, old bills are those incurred after November 30, 2000 and on or before March 31, 2001. The balance of any old bills incurred before December 1, 2000 cannot be applied to a later retroactive or prospective budget period. Only the current payments made on those prior expenses can be deducted.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M13	July 1999
Subchapter Subject	Page ending with	Page
M1340 SPENDDOWN DEDUCTIONS	Appendix 2	2

EXAMPLE #3:

2000												2001											
1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12
{__Retro__}				{__1st Prospective__}							{R}	{__Consecutive__}											
				initial application								re-application											
SD was met				SD was met							SD was	SD was met											
												met											

First application date is June 2000. The re-application date is January 2001. Old bills are those that were incurred before March 1, 2000, the initial application’s retroactive budget period. Re-application is filed in January 2001, so the retroactive period based on the re-application is prorated to one month - December 1999. There is no break between spenddown budget periods and no break in spenddown eligibility; all these periods are consecutive.

EXAMPLE #4:

2000												2001											
1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12
{__Retro__}				{__1st Prospective__}							{ }	{__SSI Eligible__}					{__later 1st prospective__}						
				initial application							re-application		re-application										
SD was met				SD was met							SD was met												
												met											

Initial application dated June 2000: a retroactive (March 1, 2000 - May 31, 2000) and a 1st prospective (June 1, 2000 - November 30, 2000) spenddown budget periods are established.

Re-application dated December 2000. Prorated consecutive budget period established for December 2000 only, because SSI was approved effective January 1, 2001. Individual is eligible without spenddown effective January 1, 2001.

SSI ends May 2001 and creates a first prospective spenddown budget period for June 1, 2001 - November 30, 2001.

All expenses incurred prior to January 1, 2001 are deducted as current payments because there has been a break in spenddown eligibility (January - May 2001 is CN budget period). Expenses incurred January 1, 2001, through May 31, 2001, are deducted as old bills for the June 2001 re-application.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M13	July 1999
Subchapter Subject	Page ending with	Page
M1340 SPENDDOWN DEDUCTIONS	Appendix 2	3

EXAMPLE #5:

2000												2001											
1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12
{_Retro_}			{__1st Prospective__}				{__Consecutive__}					{later Retro}			{later 1st pro			→					
			initial application				re-application								re-application								
SD met			SD met				SD met																

Initial application date June 2000.

Old bills are any medical expenses incurred before March 2000 (the retroactive period based on the initial application). The retroactive budget period is March 2000 through May 2000. The first prospective budget period is June 2000 through November 2000. The retroactive and first prospective spenddowns were met.

A second application dated December 2000 is filed. The spenddown budget period is December 1, 2000, through May 31, 2001. Unpaid old bill balance, and unpaid balances of carry-over expenses incurred in retroactive & first prospective periods, are deducted on 1st day of consecutive budget period or December 1, 2000, because there was no break in spenddown eligibility.

Third application dated October 2001 is a re-application.

Old bills are only those incurred in June 2001 because there is a break in spenddown eligibility. Any unpaid balance on the old bills from the initial application is no longer deducted as an “old bill”. Only current payments made on the old bill balance(s) can be deducted. Current payments are deducted the date paid in the October 2001 re-application’s retroactive and/or first prospective budget periods.

EXAMPLE #6:

2000												2001											
1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12

			initial application				re-application					re-application											
SD met			SD met				SD not met					{later Retro}											
												based on											
												4/2001 app											

Initial application filed April 2000.

Old bills are any medical expenses incurred before January 2000 (the retroactive period based on the initial application). The retroactive budget period is January 2000 - March 2000. The first prospective budget period is April 2000 through September 2000. The retroactive and first prospective spenddowns were met.

Second application dated October 2000 is filed. The consecutive spenddown budget period is October 2000 - March 2001. Unpaid old bill balance, and unpaid balances of carry-over expenses incurred in retroactive & first prospective periods, are deducted on 1st day of consecutive budget period or October 1, 2000, because there was no break in spenddown eligibility. Expenses incurred during the consecutive

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1340 SPENDDOWN DEDUCTIONS	Page ending with Appendix 2	Page 4

budget period are deducted on the date incurred. The October 2000 - March 2001 spenddown was not met.

Third application dated April 2001 is filed. The retroactive budget period is January 2001 - March 2001. Old bills are those incurred after September 30, 2000, and prior to January 1, 2001, and are deducted on January 1, 2001. Paid and unpaid expenses incurred during the retroactive period (January 2001 through March 2001) are deducted on the date incurred. All expenses incurred prior to October 1, 2000, are deducted as current payments because there has been a break in spenddown eligibility. The later first prospective budget period is April 2001 - September 2001. Unpaid balances on old bills (incurred after September 30, 2000, and prior to January 1, 2001) not used to meet the retroactive spenddown are deducted on April 1, 2001. Paid and unpaid expenses incurred during the retroactive spenddown budget period that were not used to meet the spenddown are deducted on April 1, 2001. Paid or unpaid expenses incurred during the later first prospective period (April 2001 through September 2001) are deducted on the date incurred. All expenses incurred prior to the break in spenddown eligibility (October 1, 2000) are deducted as current payments.

M1350.000 CHANGES PRIOR TO MEETING SPENDDOWN

M1350.100 CHANGES PRIOR TO MEETING SPENDDOWN

A. Policy

When changes occur in the individual's or family's situation after applying for Medicaid, but before meeting the spenddown liability, the amount of countable income, the spenddown liability and the spenddown budget period may change.

1. Retroactive Spenddown Budget Period

The retroactive spenddown budget period is prorated (shortened) when:

- one or two of the months in the retroactive period were included in a prior Medicaid medically needy spenddown budget period in which eligibility was established, or
- the only medically needy individual in the assistance unit dies in the first or second month of the retroactive period.

2. Prospective Budget Period

The prospective spenddown budget period is prorated when:

- the only medically needy individual in the assistance unit dies,
- the only medically needy individual in the assistance unit becomes ineligible before the end of the spenddown budget period because of excess resources or nonfinancial reasons, or
- the individual's or assistance unit's covered group classification changes from medically needy to categorically needy or categorically needy non-money payment.

B. Case Transfer

When the MN assistance unit moves to a new locality, transfer the case according to procedures in section M1520.600.

It is the responsibility of the sending agency to:

1. inform the applicant of the receiving agency's name, address, and telephone number;
2. deduct all known spenddown items from the spenddown balance on the worksheet before sending the case record to the new locality;
3. note the spenddown period and balance on the case transfer form.

It is the responsibility of the receiving agency to review the spenddown to determine if a recalculation based on a different income limit is required.

C. References

Procedures for handling changes that occur during the spenddown budget period are in the following sections:

M1350.200 INCREASE IN ASSISTANCE UNIT SIZE

A. Policy

When the assistance unit size increases and Medicaid is requested for an additional family member(s) not already on a spenddown, the spenddown budget period remains the same but the spenddown liability amount must be recalculated.

There can be only one spenddown budget period per assistance unit. If the additional family member was already on his own spenddown when he joined the assistance unit, wait until after one of the spenddown budget periods has expired to recalculate the spenddown liability amount for the remaining budget period.

1. Step 1

For the months prior to the month in which the change occurred, calculate the family's income based on the number of members in the assistance unit at the time of application.

For the months during which the additional member was added to the assistance unit, calculate the family's income based on the increased number in the assistance unit.

2. Step 2

Total the family's income for the entire 6-month spenddown budget period. The result is the family's recalculated income for the spenddown budget period.

3. Step 3

Determine the income limit for the assistance unit size for the number of months before the change occurred. Determine the income limit for the assistance unit size for the number of months in which the additional member was included. Add together the income limits. The result is the recalculated income limit for the spenddown budget period.

4. Step 4

Subtract the recalculated income limit from the family's recalculated income. The result is the recalculated spenddown liability for the spenddown budget period.

If the recalculated income is within the recalculated income limit for the spenddown budget period, the assistance unit is eligible for the entire spenddown budget period. However, the additional assistance unit member(s) (who was not included during the entire period) is only eligible for the month(s) when he was included in the unit.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date April 2002
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.210	Page 3

**B. Example--Increase
In Assistance Unit
Size**

EXAMPLE #1 (Using June 2000 figures): Mr. D lives in Group II and applies for Medicaid on June 6 for himself and his family. He is temporarily disabled. He lives with his wife and 13 year old child. The assistance unit size is 3 persons when determining eligibility. The family's income totals \$3,000 per month worker's compensation- \$2,000 for Mr. D and \$1,000 for Mrs. D; the child has no income. Since the F&C countable income exceeds the MI limit and they are within the resource limit for a family of 3, a MN determination is done. The first prospective budget period is June 1 through November 30. The MN income limit for a family of 3 living in a Group II locality, is \$2,150. The spenddown liability is \$15,850.

\$ 3,000	total worker's compensation
x <u>6</u>	months
18,000	countable income for the spenddown budget period
- <u>2,150</u>	MNIL for 3 persons Group II for budget period
\$15,850	spenddown liability for spenddown budget period June - November

The family has not met the spenddown. On September 5, they report that their eldest son, age 16, returned to the home to live with them on September 2 and they want to apply for Medicaid for him, as well. He has no income. The assistance unit size for September through November (3 months) is 4 persons; the income limit is \$1,200. The family's income, income limit and spenddown liability are recalculated:

\$ 3,000	total worker's compensation
x <u>6</u>	months June - November
\$18,000	countable income for spenddown budget period June - November
1,075	MNIL for 3 persons Group II June - August
+ <u>1,200</u>	MNIL for 4 persons Group II September - November
2,275	MNIL for spenddown budget period June - November
\$18,000	countable income for spenddown budget period June - November
- <u>2,275</u>	MNIL for spenddown budget period
\$15,725	spenddown liability for spenddown budget period June - November

The family's spenddown liability for the June 1 through November 30 spenddown budget period is \$15,725.

M1350.210 DECREASE IN UNIT SIZE NOT DUE TO INSTITUTIONALIZATION

A. Policy

When the assistance unit size decreases (NOT due to institutionalization of an assistance unit member) and the decrease is reported by the applicant, the spenddown budget period remains the same but the spenddown liability must

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2019
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.210	Page 4

be recalculated. *Decrease in assistance unit size may include a change if an assistance unit member becomes incarcerated during a spenddown budget period.*

See section M1350.220 for procedures to follow when an assistance unit member is institutionalized.

1. Step 1

For the months prior to the month in which the change occurred, calculate the family's income based on the number in the assistance unit at the time of application.

For the months during which the assistance unit decreased, calculate the family's income based on the decreased number in the assistance unit.

2. Step 2

Total the family's income for the entire 6-month spenddown budget period. The result is the family's recalculated income for the spenddown budget period.

3. Step 3

Determine the income limit for the assistance unit size for the months prior to the change and for the month the change occurred. Determine the income limit for the assistance unit size for the number of months after the change occurred. Add together the income limits. The result is the recalculated income limit for the spenddown budget period.

4. Step 4

Subtract the recalculated income limit from the family's recalculated income. The result is the recalculated spenddown liability for the spenddown budget period.

If the recalculated spenddown liability is within the recalculated income limit for the six-month spenddown budget period, the assistance unit is eligible for the entire spenddown budget period. However, the assistance unit member(s) who left the unit is only eligible for the month(s) when he was included in the unit.

\$11,100	countable income for June through August
<u>+ 9,000</u>	countable income for September through November
20,100	countable income for spenddown budget period of June through September
<u>- 3,150</u>	MNIL for 5 persons Group III
\$16,950	spenddown liability for spenddown budget period June through November

The family's recalculated spenddown liability for the June 1 - November 30 spenddown budget period is \$16,950.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.300	Page 5

assistance unit size for September through November (3 months) is 4 persons; the income limit is \$1,450. The family's income, income limit and spenddown liability are recalculated:

\$ 3,500	total income per month
<u>x 6</u>	months June - November
\$21,000	countable for spenddown budget period June through November

1,575	5 persons MNIL Group III for June-August
<u>+1,450</u>	4 persons MNIL Group III for September-November
3,025	MNIL for budget period

\$21,000	income for spenddown budget period June through November
<u>- 3,025</u>	MNIL for spenddown budget period June through November
\$17,975	spenddown liability for spenddown budget period June through November

The family's spenddown liability for the June 1 through November 30 spenddown budget period is \$17,975

M1350.220 DECREASE IN UNIT SIZE DUE TO INSTITUTIONALIZATION

- A. Policy** An institutionalized individual becomes a separate assistance unit for the income eligibility determination purposes as of the first day of the month of institutionalization.
- B. Recalculate Family's Spenddown** When the individual was included in the assistance unit with a spouse and/or children, the spouse's and/or children's spenddown liability is recalculated to reflect a decrease in assistance unit size. The decreased assistance unit size begins the first day of the month in which the individual is institutionalized.
- Only those medical bills incurred by the institutionalized individual during the months in the spenddown budget period when he was in the assistance unit are deducted from the family's spenddown.
- C. Institutionalized Individual** Determine the institutionalized individual's eligibility separately beginning the first day of the month during which he becomes institutionalized. See subchapter M1460 for instructions on determining eligibility for institutionalized individuals.

M1350.300 INCOME CHANGES

- A. Policy** When an income change is reported, the spenddown liability must be recalculated based on the income actually received in the spenddown budget period. The spenddown budget period does not change. When the applicant reports an income change, request verification, take appropriate action and document the case record.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2001
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.300	Page 6

1. **Reported Before Spenddown Budget Period Ends**
If the change is reported before the end of the spenddown budget period, project the changed income for the remaining months in the spenddown budget period. Average any irregular income received and project the average for the remaining months in the spenddown budget period.
2. **Reported After Spenddown Budget Period Ends**
If the change is reported after the spenddown budget period ends, recalculate the spenddown liability using the actual income received during the spenddown budget period.

B. Example--Income Changes

EXAMPLE #3 (Using June 2000 figures): Mr. Green lives in Group III and applies for Medicaid on June 8 for himself and his family. He lives with his wife and their 3 children ages 6, 8, and 11. Neither Mr. nor Mrs. Green meet a Medicaid covered group. The assistance unit size is 5 persons when determining the children's eligibility (F&C). The family's income totals \$3,700 per month private company pension - \$3,000 for Mr. Green and \$700 for Mrs. Green; the children have no income. The first prospective budget period is June 1 through November 30, 1999; the income limit for 5 persons in Group III is \$3,150. The spenddown liability is calculated:

$$\begin{array}{rcl}
 \$ 3,700 & \text{total family income per month} & \\
 \times \underline{6} & \text{months} & \\
 \$22,200 & \text{countable income for the spenddown budget period June -} & \\
 & \text{November} & \\
 - \underline{3,150} & \text{MNIL for 5 persons Group III} & \\
 \$19,050 & \text{spenddown liability for spenddown budget period June} & \\
 & \text{through November} &
 \end{array}$$

The family has not met the spenddown. On September 5, they report that their income changed on September 1; Mrs. Green no longer receives a pension benefit and she has no other income. The assistance unit's monthly income for September through November (3 months) is \$3,000; their monthly income for June through - August (3 months) is \$3,700. The family's spenddown liability is recalculated:

$$\begin{array}{rcl}
 \$ 3,700 & \text{income per month} & \\
 \times \underline{3} & \text{months (June, July, and August)} & \\
 \$11,100 & \text{countable income for first 3 months} & \\
 \\
 \$ 3,000 & \text{total income per month} & \\
 \times \underline{3} & \text{months (September, October, and November)} & \\
 \$ 9,000 & \text{countable income for second 3 months} &
 \end{array}$$

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date October 2011
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.300	Page 7

\$11,100	countable income for June through August
+ 9,000	countable income for September through November
20,100	countable income for spenddown budget period of June through September
- 3,150	MNIL for 5 persons Group III
\$16,950	spenddown liability for spenddown budget period June through November

The family's recalculated spenddown liability for the June 1 - November 30 spenddown budget period is \$16,950.

M1350.400 INCOME LIMIT CHANGES

A. Policy

Recalculate the spenddown liability for the spenddown budget period when:

- the applicant moves to a different locality group at some point within the spenddown budget period; or
- the Medicaid income limit(s) changes at some point within the spenddown budget period. *Note that the effective date for changes in MN income limits is July 1.*

B. Procedure

- Use the “old” income limit for the month in which the applicant moved. Multiply the “old” monthly income limit by the number of months in the spenddown budget period during which it was effective.
- Multiply the “new” monthly income limit by the number of months in the spenddown budget period during which it was effective. Add both results together. The total is the recalculated income limit.
- Subtract the applicant's countable income for the spenddown budget period from the recalculated income limit. The result is the recalculated spenddown liability for the spenddown budget period.

C. Example--Income Limit Changes When Individual Moves

EXAMPLE #4 (Using July 2011 figures): Mr. E lives in Group III and applies for Medicaid on July 6 for himself. He is aged and lives alone. His income totals \$1,575 per month SSA benefit. The first prospective budget period is July 1 through December 31. The income limit for 1 person in Group III is \$2,567.56. His spenddown liability is \$6,762.44.

\$ 1,575.00	SSA per month
- 20.00	general income exclusion
1,555	countable monthly income
x 6	months
\$9,330.00	countable income for the spenddown budget period
- 2,567.56	1 person <i>semi-annual</i> MNIL Group III for spenddown budget period
\$6,762.44	spenddown liability for spenddown budget period July through December

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date October 2011
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.500	Page 8

On *September 23* he moves to a Group II locality and requests re-evaluation of his spenddown.

His spenddown liability is recalculated for the *July -December* spenddown budget period:

<i>\$1,283.76</i>	1 person MNIL Group III for 3 months <i>July - September</i>
<i>+ 987.51</i>	1 person MNIL Group II for 3 months <i>October - December</i>
<i>2,271.27</i>	MNIL for spenddown budget period
<i>\$ 9,330.00</i>	countable income for the spenddown budget period
<i>- 2,271.27</i>	MNIL for spenddown budget period
<i>\$7,058.73</i>	spenddown liability for the spenddown budget period
	<i>July 1 – December 31, 2011</i>

M1350.500 RESOURCE CHANGES

A. Policy

When determining if the spenddown is met, evaluate any change in resources owned or in the value of resources owned to determine if the assistance unit's resources are still within the Medicaid limit. When resources exceed the Medicaid limit in some months, the spenddown budget period and the spenddown liability must be recalculated. Prorate the spenddown budget period to include the month(s) before the first full month in which the excess resources create ineligibility.

If resources exceed the limit, send a written notice to the applicant informing him of his ineligibility for Medicaid spenddown for the month(s) in which the resources exceeded the limit during the entire month.

B. Notice Requirements

Send a written notice to the applicant that states:

- the reason for ineligibility for Medicaid (excess resources) for the months in which excess resources exist (specify the months), and
- the spenddown liability amount for the months during which resources were within the limit (specify the months). Include the explanation that if medical or dental bills equal or exceed the spenddown liability, he may be eligible for limited Medicaid eligibility for the month(s) during which his resources were within the Medicaid limit (specify the dates).

C. Example-- Resource Changes

EXAMPLE #5 (Using June 2000 figures): Mr. G lives in Group I and applies for Medicaid on June 6 for himself. He is disabled and lives alone. His income totals \$1,475 per month SSA benefit. The first prospective budget period is June 1 through November 30; the income limit for 1 person in Group I is \$1,300. His spenddown liability is \$7,430.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2001
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.600	Page 9

<u>\$1,475</u>	SSA per month
<u>- 20</u>	general income exclusion
<u>1,455</u>	monthly countable income
<u>x 6</u>	months
<u>8,730</u>	countable income for the spenddown budget period
<u>- 1,300</u>	1 person MNIL Group I for spenddown budget period
<u>\$7,430</u>	spenddown liability for spenddown budget period June 1 - November 30

His application is denied and he is placed on spenddown. When he requests re-evaluation of his spenddown on October 26, the worker finds that his resources exceed the Medicaid limit for the entire month of October, but were within the limit in June - September. The worker prorates the spenddown budget period to 4 months - June 1 through September 30. The worker recalculates the spenddown liability:

<u>\$1,455.00</u>	monthly countable income
<u>x 4</u>	months (June- September)
<u>5,820.00</u>	countable income for the spenddown budget period
<u>- 866.68</u>	1 person MNIL Group I for 4 months spenddown budget period
<u>\$4,953.32</u>	spenddown liability for spenddown budget period June 1 - September 30

The worker determines that verified incurred expenses totaling \$800 on August 18 and \$45 on September 4 do not meet the spenddown liability. A liability balance of \$4,108.32 remains for the prorated spenddown budget period.

The worker sends Mr. E a notice which states:

- You are not eligible for Medicaid for the months of June through September 30 because of excess income. Your spenddown liability is \$4,953.32. You have incurred \$845 in expenses, leaving a balance of \$4,108.32. You have not met the spenddown.
- You are not eligible for Medicaid for the month of October because of excess resources. If you want your Medicaid eligibility determined again, you must reapply for Medicaid.

M1350.600 NONFINANCIAL ELIGIBILITY REQUIREMENT NOT MET

A. Policy

When an individual fails to meet a nonfinancial Medicaid eligibility requirement (such as MN covered group not met), he cannot become eligible by meeting a spenddown. At the time a change is reported in the individual's or family's nonfinancial Medicaid eligibility, evaluate the change to determine if the individual or family continues to meet the nonfinancial Medicaid eligibility requirements.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2001
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.600	Page 10

If a nonfinancial eligibility requirement(s) is not met in any month in the spenddown budget period, send a written notice to the individual specifying the new denial reason (specify the nonfinancial requirement(s) that is not met).

If all nonfinancial requirements are not met in any of the months of the spenddown budget period, the spenddown liability and spenddown budget period will change. Prorate the spenddown budget period to include the month(s) before the first full month in which the nonfinancial requirement was not met.

B. Notice Requirements

Send a written notice to the applicant that states the new reason for denial:

- specify the nonfinancial requirement that is not met, and for which months the requirement is not met (specify the months), and
- the spenddown liability amount for the months during which the requirements were met (specify the months). Include the explanation that if medical or dental bills equal or exceed the spenddown liability by the end of the month for the new prorated spenddown budget period, the individual may be eligible for Medicaid coverage for the month(s) during which the Medicaid nonfinancial eligibility requirements were met.

C. Example-- Nonfinancial Eligibility Requirement Not Met

EXAMPLE #6 (Using June 2000 figures): Mr. H lives in Group I and applies for Medicaid on June 8 for himself. He is disabled (MDU determined) and lives alone. His income totals \$1,475 per month private disability benefit. The first prospective budget period is June 1 through November 30. The income limit for 1 person in Group I is \$1,300. His spenddown liability is \$7,430.

\$ 1,475	income per month
- <u>20</u>	general income exclusion
1,455	monthly countable income
x <u>6</u>	months
\$ 8,730	countable income for the spenddown budget period
 \$ 8,730	 countable income for spenddown budget period
- <u>1,300</u>	1 person MNIL Group I for spenddown budget period
\$ 7,430	spenddown liability for spenddown budget period June 1 - November 30

His application is denied and he is placed on spenddown. He requests re-evaluation of his spenddown on October 26. The worker finds he is no longer disabled as of September 30, per an MDU review. The worker prorates the spenddown budget period to 4 months - June 1 through September 30.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date January 2018
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.700	Page 11

The worker recalculates the spenddown liability:

\$1,455.00	monthly countable income
x 4	months
5,820.00	countable income for the spenddown budget period
- 866.68	1 person MNIL Group I for 4 months spenddown budget period
\$4953.32	spenddown liability for spenddown budget period June 1 - September 30

The worker verified \$500 incurred expenses on July 8 and \$245 on August 4. The spenddown liability was not met. A liability balance of \$4,208.32 remains for the prorated spenddown budget period.

The worker notifies Mr. H that he did not meet his spenddown for the spenddown budget period June 1 through September 30, of the MDU determination that he is no longer disabled and that he does not meet another Medicaid covered group. The notice states:

- You are not eligible for Medicaid for the months of June through September 30 because of excess income. Your spenddown liability is \$4,953.32. You have incurred \$745 in expenses, leaving a balance of \$4,208.32. You have not met the spenddown.
- You are not eligible for Medicaid for the month of October 1999 because the MDU determined that you are no longer disabled. You do not meet another Medicaid covered group as of October 1. Should your condition worsen, it is necessary for you to reapply if you want your Medicaid eligibility determined again.

M1350.700 CHANGE OF COVERED GROUP

A. Policy

An individual is entitled to Medicaid in a new classification effective the first day of the month in which he meets that new classification.

1. Assistance Unit of One

The spenddown budget period changes and the spenddown is recalculated when an individual who is an assistance unit of one person becomes eligible for Medicaid in a non-medically needy covered group.

The individual remains on a spenddown for the month(s) before the change in classification.

When an individual is institutionalized, his covered group classification changes to CN (*Categorically Needy*) if his gross income is within the 300% SSI income limit. If his gross income exceeds the 300% SSI limit, he remains medically needy and his classification does not change. However, his spenddown budget period and spenddown liability must be changed. See section M1350.800 below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date January 2018
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.700	Page 12

EXAMPLE #7 (Using June 2000 figures): A disabled, single man living in Group I receives worker's compensation of \$600 per month. He applies for Medicaid on June 10. The Medicaid Disability Unit determines him disabled. Disability onset was prior to March 1 of that year. His total monthly countable income was and is \$600. The MNIL is \$1,300. He did not incur any medical bills during the retroactive period. He does not have any old bills. The first prospective budget period is June through November. His spenddown liability is \$2,180.

\$ 600	income per month
- 20	general income exclusion
580	monthly countable income
x 6	months
3,480	countable income for the spenddown budget period
- 1,300	1 person MNIL Group I for spenddown budget period
\$2,180	spenddown liability for spenddown budget period June 1 - November 30

His application is denied. He is placed on a spenddown for the first prospective budget period. On September 20, he requests re-evaluation of his spenddown due to his receipt of \$512 per month SSI effective September. His worker's compensation income ended August 31. He incurred \$1,000 in medical bills during July. He is eligible for Medicaid as categorically needy beginning September 1.

His spenddown budget period is prorated to June - August (3 months). His spenddown liability for the prorated spenddown budget period is recalculated:

\$ 580	countable income for June - August
x 3	months
1,740	countable income for prorated spenddown budget period June - August
- 650	1 person MNIL Group I for 3 months
\$1,090	spenddown liability for spenddown budget period June 1 - August 31

He incurred \$1,100 worth of medical bills on July 15. He met his spenddown on that date. He is eligible effective July 15 - August 31 as medically needy, *Aid Category 058*. Effective September 1, he is eligible as categorically needy, *Aid Category 051*.

2. Assistance Unit of Two or More

When the entire assistance unit's classification changes, the spenddown budget period changes and the spenddown liability is recalculated. Eligible family members are entitled to Medicaid in the new classification effective the first day of the month in which they meet that new classification. They

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date April 2002
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.800	Page 13

remain on spenddown for the month(s) before the change in classification. When all children in the assistance unit become eligible as *MI*, the spenddown budget period changes and the spenddown liability is recalculated. The children are eligible as *MI* effective the first day of the month in which they meet the *MI* requirements. They remain on a spenddown for the months prior to *establishing MI* eligibility.

The assistance unit size decreases when an individual member of an assistance unit of two or more becomes eligible in another classification. The individual is no longer included in the original assistance unit. The spenddown liability is recalculated using the procedures in section M1350.210 above.

M1350.800 INDIVIDUAL BECOMES INSTITUTIONALIZED

A. Policy

When an individual becomes institutionalized and his gross income exceeds the 300% SSI limit, he remains medically needy. His classification does not change. However, his spenddown budget period must be changed. His spenddown liability is recalculated.

1. Prorate Spenddown Budget Period & Recalculate Spenddown Liability

Prorate the individual's spenddown budget period for the month(s) in which he was not institutionalized. Do not include the month in which he became institutionalized.

Total the monthly countable income he received in the prorated spenddown budget period. Subtract the MN income limit for the number of months in the prorated spenddown budget period. The remainder is the recalculated spenddown liability for the months during which he was not institutionalized.

2. Determine Institutionalized Spenddown

The MN budget period for an institutionalized individual is one month. Go to subchapter M1460 to determine the individual's spenddown as an institutionalized individual.

B. Example-- Individual Becomes Institutionalized

EXAMPLE #8 (Using June 2000 figures): A disabled, single man living in Group I receives worker's compensation of \$1,550 per month. He applies for Medicaid on June 6. This is his initial application. The Medicaid Disability Unit determines him disabled. Disability onset is February. His monthly countable income was and is \$1,550. The MNIL is \$1,300. He did not incur any medical bills during the retroactive period. He does not have any old bills. The first prospective budget period is June through November. His spenddown liability is calculated:

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2019
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.850	Page 14

\$1,550	income per month
- 20	general income exclusion
1,530	countable monthly income
x 6	months
9,180	countable income for the spenddown budget period June 1 – November 30
- 1,300	1 person MNIL Group I for spenddown budget period
\$7,880	spenddown liability for spenddown budget period June 1 – November 30

His application is denied. He is placed on spenddown for the first prospective budget period. On October 20, he becomes institutionalized when he is admitted to a nursing facility for permanent care. His worker's compensation income has not changed. He incurred \$5,000 in medical bills during September. His spenddown budget period is prorated to June - September (4 months). His spenddown liability for the prorated spenddown budget period is recalculated:

\$1,530.00	monthly countable income for June - September
x 4	months (June-September)
6,120.00	countable income prorated for spenddown budget period June - September
- 866.681	1 person MNIL Group I for 4 months
\$5,253.32	spenddown liability for spenddown budget period June 1 – September 30

He incurred \$5,000 in medical bills in September. He did not meet the prorated spenddown. The worker sends Mr. T a notice informing him that he did not meet his spenddown for the prorated spenddown budget period of June 1 through September 30. The \$5,000 in medical bills did not meet the prorated spenddown of \$5,253.32. He has a balance left of \$253.32. His spenddown eligibility as an institutionalized individual is determined according to policy in subchapter M1460.

M1350.850 INDIVIDUAL BECOMES INCARCERATED

A. Policy

If an individual becomes incarcerated during his spenddown budget period, the spenddown liability must be recalculated.

For other individuals in the offender's (pre-incarceration) assistance unit who may be on a spenddown, follow the appropriate policy. For assistance unit change - M1350.210; income change – M1350.300; and resource change – M1350.500.

1. Recalculate the Spenddown Liability

Recalculate the offender's spenddown liability and follow policies for income (see M1350.210) and resources (see M1350.500). The offender will be an assistance unit of one and would use the same pre-incarceration group and MNIL.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2019
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.850	Page 14a

2. **Conduct a Partial Review**

Determine if the offender is eligible in a CN covered group based upon the first day he became incarcerated. See (M0140.300.A.1).

If the offender is determined eligible for coverage, enroll as of the day the individual entered the correctional facility.

If offender does not meet a covered group, his spenddown budget period will remain in effect until it ends. The worker will not send the offender an application at the end of the spenddown period. The offender may reapply for coverage (see M0140.200)

B. Example (ABD)—Single Individual Becomes Incarcerated

EXAMPLE #9 (Using July 2018 figures): *A disabled single man living in Group I receives SSA payment of \$1,020 per month and also receiving Medicare. He applies for Medicaid in June and the MNIL is \$1904.55. He has not incurred any medical bills and has no old bills. The spenddown budget period is June through November. His spenddown liability is calculated:*

\$1,020	income per month
- 20	general income exclusion
1,000	countable monthly income
x 6	months
6,000	countable income for the SD budget period 6/1 – 11/30
-1,904.55	1 person MNIL Group I SD budget period liability semi-annual
\$4,095.45	SD liability for the budget period 6/1 – 11/30

On September 10 he is incarcerated, and SD amount is recalculated. SSA payments will suspend at the end of September, and he will have no income in October or November.

\$1,020	income per month
- 20	general income exclusion
1,000	countable monthly income
x 4	months (months of June, July, August, and September)
4,000	income for the period 6/1 – 9/30
+ -0-	No income for remaining two months 10/1 – 11/30
\$4,000	countable income for the SD budget period 6/1 – 11/30
- 1,904.55	1 person MNIL Group I SD budget period liability semi-annual
\$2,095.45	Recalculated SD liability for the budget period 6/1 – 11/30

Worker conducts a partial review. The offender is not eligible for QMB (due to incarceration), not eligible for MAGI (he receives Medicare), and over income for ABD 80% (income limit \$810). However, with zero income for October and ongoing, he qualifies for ABD coverage beginning 10/1.

C. Example (MAGI)-Single Individual Becomes Incarcerated

EXAMPLE #10 (Using July 2018 figures): *A 40 year old single man on Medicare, lives in Group II and has income from a trust fund in the amount of \$1,500 per month. He applied for Medicaid in February but was over the ABD (MSP) income limits. His MNIL is \$2,154.48. He has no medical bills or old bills. The spenddown budget period is February through July. His spenddown liability is calculated:*

Manual Title	Chapter	Page Revision Date

countable monthly income

months

countable income for the SD budget period 2/1 – 7/30

1 person MNIL Group I SD budget period liability semi-annual

SD liability for the budget period 2/1 – 7/30

On March 1 he is incarcerated. His SD liability would be recalculated. However, his trust income payments continue even though he is incarcerated, so the spenddown liability will not change and remains at \$6,752.52.

The worker conducts a partial review. The offender is not eligible for QMB (due to incarceration), not eligible for MAGI (he receives Medicare), and is still over the income limit for ABD 80% (income limit \$810). His spenddown liability continues for the remainder of the budget period.

M1350.900 CHANGES DUE TO DEATH

A. Policy

1. Individual Applicant

When an individual who meets an MN covered group, dies within the spenddown budget period, the spenddown budget period and the spenddown liability change. The spenddown liability and spenddown budget period are recalculated using actual income received.

2. Death of a Assistance Unit Member

When an individual member of an assistance unit dies, and at least one other assistance unit member meets a MN covered group, the family’s assistance unit size decreases. The policy and procedures in section M1350.210 above apply.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2001
Subchapter Subject M1350 CHANGES PRIOR TO MEETING SPENDDOWN	Page ending with M1350.900	Page 15

**B. Example--
Individual
Applicant Dies**

EXAMPLE #9 (Using June 2000 figures): Mr. T is an aged widower living in Group I. He receives an SSA benefit of \$620 per month. He applies for Medicaid on June 6. His monthly countable income was and is \$620. The MNIL is \$1,300. The spenddown budget period is June through November. His spenddown liability is \$2,300. He has Medicare Parts A & B. He did not incur any medical bills during the retroactive period. He does not have any old bills.

\$ 620	SSA income per month
- 20	general income exclusion
600	countable monthly income
x 6	months (June - November)
\$3,600	countable income for the spenddown budget period June - November
\$3,600	countable income for the spenddown budget period
-1,300	1 person MNIL Group I for spenddown budget period
\$2,300	spenddown liability for spenddown budget period June through November

His application is denied. He is placed on a spenddown for the first prospective budget period. On September 20, his daughter reports that Mr. T died on September 10. He incurred medical expenses in August and September. She requests re-evaluation of his spenddown. He incurred \$1,400 in Medicare hospital deductible and coinsurance charges on August 21. He incurred a \$25 per day Medicare coinsurance charge for physician's services for 10 days - August 30 through September 8. His spenddown budget period is prorated to June - September. His spenddown liability is recalculated:

\$ 600.00	monthly countable income
x 4	months
2,400.00	total countable income for June - September
- 866.68	MNIL for 1 person Group I for 4 months
1,533.32	spenddown liability for spenddown budget period June - September
- 45.50	Medicare premium June 3
1,487.82	spenddown liability balance June 3
- 45.50	Medicare premium July 3
1,442.32	spenddown liability balance on July 3
- 45.50	Medicare premium August 3
1,396.82	spenddown liability balance August 3
-1400.00	hospital deductible and coinsurance charges August 21
\$ 0	spenddown balance on August 21

The \$1,400.00 in medical expenses incurred on August 21, met his spenddown liability on that date. He is eligible for Medicaid effective August 21 through September 10 (date of death).

M1360.000 CHANGES AFTER SPENDDOWN IS MET

M1360.100 CHANGES AFTER SPENDDOWN IS MET

A. Policy Spenddown budget periods do not change when changes occur in an individual's or family's situation after meeting a spenddown liability within a spenddown budget period. The amount of countable income and the spenddown liability may change, but the spenddown budget period never changes.

B. Decrease in Assistance Unit Do not recalculate the spenddown liability when the assistance unit decreases. Cancel the Medicaid coverage of the deleted assistance unit member(s). The remaining unit members are eligible until the end of the spenddown budget period.

C. Increase in Assistance Unit When the assistance unit size increases, Medicaid may be requested for the additional member(s). Recalculate the spenddown liability based on the changes in the income limit and the family's income (if any) for the month(s) that the individual(s) is added to the unit and for subsequent month(s).

The additional family member's(s') medical bills (including old bills) can be deducted only for the months during which he is included in the assistance unit.

1. Spenddown Liability Decreases Re-enroll the family with an earlier coverage begin date if the spenddown liability decreases and is met earlier because of the decrease. Enroll the additional unit member(s) no earlier than the date he became a part of the unit.

EXAMPLE #1 (Using April 2000 figures): Mr. D lives in Group II and applies for Medicaid on April 6 for himself and his family. He is disabled and lives with his wife and 13 year old child. They have no health insurance. The assistance unit size is 3 persons when determining Mrs. D's and the child's eligibility (F&C); Mr. D's unit size is 1 person (ABD). The family's income totals \$2,800 per month. Mr. D receives a \$1,000 SSA and a \$1,000 private pension. Mrs. D receives \$800 worker's compensation. The first prospective budget period is April 1 through September 30. The income limit for the F & C MN determination is \$2,150. The spenddown liability is \$14,650.

\$ 2,800	total countable income per month
<u>x 6</u>	months
16,800	countable income for the spenddown budget period
<u>- 2,150</u>	MNIL for 3 persons Group II
\$14,650	spenddown liability for spenddown budget period April 1 - September 30

The family incurs \$14,650 in hospital and physicians' expenses as of May 28. The child is enrolled in Medicaid effective May 28, Type 3 eligibility

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2001
Subchapter Subject M1360 CHANGES AFTER SPENDDOWN IS MET	Page ending with M1360.100	Page 2

(which will be canceled effective September 30). On July 15, the family reports their eldest son, age 16, returned to the home to live with them on July 12. They want to apply for Medicaid for him, as well. He has no income. The assistance unit size for July through September (3 months) is 4 persons; the income limit is \$2,400.

The family's income limit and spenddown liability is recalculated:

1,075 MNIL for 3 persons Group II April - June
+ 1,200 MNIL for 4 persons Group II July - September
2,275 MNIL for spenddown budget period

\$16,800 countable income for the spenddown budget period
- 2,275 MNIL for spenddown budget period
\$14,525 spenddown liability for budget period

The family's recalculated spenddown liability for the April 1 through September 30 budget period is \$14,525. The worker redetermines the spenddown and determines that the family incurred \$14,525 in medical expenses on May 25. Because this date is earlier than the May 28 coverage begin date originally determined, the 13 year old child (but not the 16-year-old son) is re-enrolled in Medicaid beginning May 25 (ending September 30). The 16 year-old is enrolled in Type 3 eligibility beginning July 1, the first day of the month he came to live with the family, and ending September 30.

2. Liability Increases

When the spenddown liability increases, the spenddown budget period does not change. Cancel the family's coverage if the recalculated spenddown liability has not been met.

If the recalculated spenddown liability has been or is met, enroll the additional assistance unit member(s) no earlier than the date he became part of the unit.

EXAMPLE #2 (Using April 2000 figures): Ms. S lives in group III and applies for Medicaid on April 6 for herself and her family. She lives with her husband and 13 year old child. They have no health insurance. The assistance unit size is 3 persons when determining the child's eligibility (F&C MN child < 18). Their income exceeds the CNNMP limit. Mr. and Mrs. S do not meet an MN covered group.

The family's income totals \$2,400 per month SSA retirement - \$1,200 for Mr. S and \$1200 for Mrs. S; the child has no income. The first prospective budget period is April 1 through September 30. The income limit is \$2,650. The spenddown liability is calculated:

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 1999
Subchapter Subject M1360 CHANGES AFTER SPENDDOWN IS MET	Page ending with M1360.100	Page 3

\$ 2,400	total SSA retirement per month
<u>x 6</u>	months
14,400	countable income for the spenddown budget period
<u>- 2,650</u>	MNIL for 3 persons Group III
\$ 11,750	spenddown liability for spenddown budget period April 1 - September 30

The family incurs \$11,750 in hospital and physicians' expenses as of June 12. The child is enrolled in Medicaid beginning June 12 (ending September 30). On August 1, they report that their eldest son, age 16, returned to the home to live with them on July 1. They want to apply for Medicaid for him, as well. He has no income. However, Mr. S's income increased in July to \$1,400 per month. The assistance unit size for July through September (3 months) is 4 persons; the income limit is \$2,900. The family's income, income limit and spenddown liability are recalculated:

\$ 2,400	total family income per month
<u>x 3</u>	months April - June
\$ 7,200	total family income for April - June

\$ 2,600	total family income per month
<u>x 3</u>	months July - September
\$ 7,800	total family income for July - September
<u>+ 7,200</u>	total family income for April - June
\$15,000	total income for spenddown budget period April - September

1,325	MNIL for 3 persons Group III April - June
<u>+ 1,450</u>	MNIL for 4 persons Group III July - September
2,775	MNIL for spenddown budget period April - September

\$15,000	countable income for the spenddown budget period
<u>- 2,775</u>	MNIL for spenddown budget period
\$12,225	spenddown liability for spenddown budget period

The family's recalculated spenddown liability for the April 1 through September 30 budget period is \$12,225. The worker determines that the family has a spenddown liability balance of \$475 left on June 12. Because the spenddown liability has not been met, the family members' Medicaid coverage is canceled effective July 31 because of excess income; spenddown liability balance of \$475. The 16-year-old son is not eligible for Medicaid and is not enrolled.

D. Income Decreases

Recalculate the spenddown liability for the spenddown budget period based on the actual income received. If the recalculated spenddown liability is met earlier in the spenddown budget period, re-enroll the eligible members of the unit with the earlier eligibility begin date.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2019
Subchapter Subject M1360 CHANGES AFTER SPENDDOWN IS MET	Page ending with M1360.100	Page 4

E. Income Increases

Recalculate the spenddown liability for the spenddown budget period based on the actual income received. If the new spenddown liability has not been met, cancel eligibility. Notify the recipient of the new spenddown liability and the balance of the spenddown liability which must be met by the last day of the spenddown budget period.

NOTE: This subsection does not apply to medically needy pregnant women who apply for and are enrolled in Medicaid on or before the date the pregnancy terminates. Income increases are excluded for these MN pregnant women.

F. Resource Changes

Redetermine the assistance unit's eligibility based on a change in resources.

1. Resources Within Limit

When resources are within the Medicaid limit, the unit remains eligible as medically needy for the remainder of the spenddown budget period.

2. Resources Exceed Limit

When the resources exceed the limit, cancel the unit's Medicaid eligibility after the advance notice is sent if the effective date of cancellation is prior to the end of the spenddown budget period. Do not change the spenddown liability or the spenddown budget period.

3. Example--Resource Change

EXAMPLE #3: Mr. and Mrs. Jones applied for Medicaid on July 10. They were put on a spenddown for the spenddown budget period July - December, which they met on August 3. They were enrolled effective August 3 through December 31. On September 2, they reported that they inherited some real property worth \$20,000. It is not excluded since it is saleable. They are sent an advance notice on September 4 stating their Medicaid eligibility is canceled effective September 30 because of excess resources.

G. Change Due to Incarceration

A review must be conducted for all individuals in the assistance unit when a member of the assistance unit becomes incarcerated. See M1350.850 for changes due to incarceration prior to meeting a spenddown.

M1370.000 SPENDDOWN –LIMITED BENEFIT ENROLLEES

M1370.100 SPENDDOWN – LIMITED BENEFIT ENROLLEES

A. Introduction

This policy applies to individuals enrolled in one of the following limited benefit Medicaid covered groups:

- Qualified Medicare Beneficiaries (QMBs),
- Special Low-income Medicare Beneficiaries (SLMBs),
- Qualified Individuals (QIs),
- Qualified Disabled Working Individuals (QDWIs), and
- Plan First individuals *who meet a medically needy (MN) covered group*.

These enrollees are eligible for only a limited package of Medicaid services. They do not receive full Medicaid coverage, therefore they must be evaluated to determine if they could become eligible for full Medicaid coverage as medically needy (MN) by meeting a spenddown.

QMB, SLMB, QI, and QDWI individuals meet the ABD MN covered group. Individuals enrolled in the Plan First covered group do not necessarily meet an MN covered group. If a Plan First enrollee also meets a MN covered group listed in M0320 or M0330, he must be evaluated to determine if he could become eligible for full Medicaid coverage MN by meeting a spenddown.

This policy does not apply to individuals in full-benefit covered groups.

1. Placement on Spenddown

At application and redetermination, *limited benefit* enrollees who meet the MN covered group and resource requirements are placed on two six-month spenddown budget periods within the 12 month renewal certification period. They may also be eligible for retroactive MN spenddown eligibility.

When only one spouse of an aged, blind or disabled (ABD) couple is eligible for limited benefit Medicaid (i.e., one spouse has Medicare and the other does not), the couple is an assistance unit of two for spenddown purposes and placed on two six-month spenddowns.

2. Spenddown Not Met

If an individual who is enrolled in limited-benefit Medicaid coverage does not meet the spenddown, he continues to be eligible for limited benefits. He is subject to the eligibility review policies in M1520.

The spenddown budget period is based on the application date. At renewal, the new spenddown budget period begins the month following the end of the previous spenddown budget period if the renewal is filed in the last month of the spenddown budget period or the following month.

If the renewal is filed two or more months after the end of the last spenddown budget period, the new spenddown budget periods (retroactive or prospective) are based on the date the renewal form was received in the LDSS. Do not complete an early renewal on a spenddown case because the spenddown period must not be shortened by the completion of an early renewal.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2017
Subchapter Subject M1370 SPENDDOWN –LIMITED BENEFIT ENROLLEES	Page ending with M1370.200	Page 2

M1370.200 ENROLLMENT PROCEDURES FOR LIMITED-BENEFIT ENROLLEES WHO MEET A SPENDDOWN

A. Policy QMBs are eligible only for Medicaid coverage of their Medicare premiums, the Medicare deductible and coinsurance charges for Medicare covered services. Medicare does not cover all of the services that Medicaid covers. For example, Medicare does not cover non-emergency transportation.

SLMBs and QDWIs are eligible only for Medicaid coverage of certain Medicare premiums.

Plan First enrollees are eligible only for limited Medicaid coverage related to family planning services and transportation to access those services.

B. Entitlement After Meeting Spenddown When an enrolled QMB, SLMB, QDWI or Plan First enrollee meets a medically needy spenddown, he is eligible for Medicaid as medically needy beginning the date the spenddown was met and ending the last day of the spenddown budget period.

C. Enrollment Procedures The *enrollee's limited coverage* must be canceled and *full coverage* reinstated in *VaCMS* in order for the individual to receive the full scope of Medicaid services for the portion of the spenddown budget period in which he is eligible as medically needy. Take the following actions:

1. Cancel Limited Benefit Coverage **Cancel** the enrollee's current coverage line that has the limited-benefit aid category (AC).

a. Cancel date is the date **before** the date the spenddown was met.

b. Cancel reason is "024".

2. Reinstate MN Coverage Reinstate the enrollee in the appropriate medically needy aid category (AC).

- enter the eligibility begin date as the date the spenddown was met.
- enter the eligibility end date - the date the spenddown budget period ends.

Be sure that the application date is the first month in the spenddown budget period. Eligibility will be cancelled effective the end date entered.

Manual Title Virginia Medical Assistance Eligibility	Chapter M13	Page Revision Date July 2017
Subchapter Subject M1370 SPENDDOWN –LIMITED BENEFIT ENROLLEES	Page ending with M1370.200	Page 3

D. Continuing Eligibility and Enrollment After Spenddown Ends

When the spenddown budget period ends, reinstate the enrollee's Medicaid eligibility as medically indigent beginning the day after the MN spenddown budget period eligibility cancel date. Use the original Medicaid application date. Limited-benefit Medicaid eligibility resumes the first day of the month following the end of the spenddown budget period. The month in which the spenddown budget period ends is considered the month in which the agency determines the enrollee's limited benefit eligibility.

Use the procedures in section M1520.200 for completing the annual *renewal* and establishing new spenddown budget periods. Eligibility for each spenddown budget period is evaluated.

Note: Because Plan First enrollees do not have a resource test, it is necessary to obtain resource information for Plan First enrollees who meet an MN covered group *at the time of renewal*.

E. Example--QMB Meets Spenddown

EXAMPLE #1: Mr. B is 69 years old. He has Medicare Parts A & B. He applied for Medicaid on July 14, 2005. Resources are within the medically needy limit. His income exceeds the medically needy limit, but is less than the QMB limit. His eligibility is determined on August 1, 2005. He is enrolled in Medicaid QMB coverage effective September 1, 2005, the month following the month the agency determined his QMB eligibility. He is placed on two consecutive 6-month spenddown budget periods, July 1, 2005 through December 31, 2005 and January 1 through June 30, 2006. The agency enrolls him with an eligibility begin date of September 1, 2005, AC 023.

On September 15, 2005, he brings in prescription drug bills. He meets the spenddown on September 13, 2005. On September 25, 2005, the agency cancels his QMB coverage (AC.023) effective September 12, 2005. He is reinstated with MN Medicaid eligibility as AC 028 (dual-eligible medically needy aged) with a begin date of September 13, 2005, an application date of July 14, 2005, and an end date of December 31, 2005.

His spenddown eligibility ends December 31, 2005. On January 1, 2006, the agency worker reinstates his QMB-only Medicaid coverage with a begin date of January 1, 2006, AC 023, application date July 14, 2005. He remains on a spenddown for the spenddown budget period January 1, 2006 through June 30, 2006.

M1410.010 GENERAL--LONG-TERM CARE

A. Introduction

Chapter M1410 contains the rules that apply to individuals needing long-term services and support (LTSS). The rules are contained in the following subchapters:

- M1410 General Rules
- M1420 Pre-admission Screening
- M1430 Facility Care
- M1440 Community-based Care Waiver Services
- M1450 Transfer of Assets
- M1460 Financial Eligibility
- M1470 Patient Pay - Post-eligibility Treatment of Income
- M1480 Married Institutionalized Individuals' Financial Eligibility

The rules found within this Chapter apply to those individuals applying for or receiving Medicaid who meet the definition of institutionalization.

B. Definitions

The definitions found in this section are for terms used when policy is addressing types of long-term services and support (LTSS), institutionalization, and individuals who are receiving that care.

1. Authorized Representative

An **authorized representative** is a person who is authorized to conduct business for an individual. A competent individual must designate the authorized representative in a written statement, which is signed by the individual applicant. The authorized representative of an incompetent or incapacitated individual is the individual's

- spouse
- parent
- attorney-in fact (person who has the individual's power-of-attorney)
- legally appointed guardian
- legally appointed conservator (formerly known as the committee)
- trustee.

2. Institutionalization

Institutionalization means receipt of 30 consecutive days of

- care in a medical institution (such as a nursing facility), or
- Medicaid Home and Community-Based Services (HCBS), or
- a combination of the two.

The definition of institutionalization is also met when an individual has a signed hospice election that has been in effect for 30 consecutive days.

The 30 days begins with the day of admission to the medical institution or receipt of Medicaid HCBS. The date of discharge into the community (not in LTSS) or death is **NOT** included in the 30 days.

The institutionalization provisions may be applied when the individual is already in a medical facility at the time of the application, or the

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.010	Page 2

individual has been *authorized* to receive LTC or *Long-term Services and Supports (LTSS)* and it is anticipated that he is likely to receive the services for 30 or more consecutive days. If it is known at the time the application is processed that the individual did not or will not meet the 30 consecutive day requirement, the individual is not to be treated as an institutionalized individual.

The 30-consecutive-days requirement is expected to be met if the *authorization for LTSS is provided* verbally or in writing. This allows the agency to begin the evaluation of the applicant in the 300% SSI covered group for institutionalized individuals and to use the special rules for married institutionalized individuals who have a community spouse, if appropriate. However, prior to approval of the individual for Medicaid payment of *LTSS*, the worker must have received the DMAS-96 that was signed by the supervising physician (*or an electronic equivalent*) or the signed Waiver Level of Care form (*or an electronic equivalent*). Applicants must be evaluated as non-institutionalized individuals for the months prior to the month in which the completed form is dated.

The worker must verify that *LTSS* started within 30 days of the date on the Notice of Action on Medicaid. If services do not start within 30 days of the Notice of Action on Medicaid, the individual can no longer be considered an institutionalized individual and continued eligibility must be re-evaluated as a non-institutionalized individual.

CBC Waiver applicants cannot receive Medicaid payment of CBC services prior to the date the DMAS-96 was signed by the supervising physician. For applicants for whom a Waiver Level of Care form is the appropriate authorization document, Medicaid payment of CBC services cannot begin prior to the date the form has been signed.

For purposes of this definition, continuity is broken by 30 or more consecutive day's absence from a medical institution or by non-receipt of waiver services. For applicants in a nursing facility, if it is known at the time of application processing that the individual left the nursing facility and did not stay for 30 consecutive days, the individual is evaluated as a non-institutionalized individual. Medicaid recipients without a community spouse who request Medicaid payment of *LTSS*, except MN individuals, and are in the nursing facility for less than 30 consecutive days will have a patient pay determination (see M1470.320).

3. **Institution** An establishment that furnishes (in single or multiple facilities) food, shelter, and some treatment or services to four or more persons unrelated to the proprietor is an **institution**.
4. **In An Institution** "**In an institution**" refers to an individual who is admitted to live in an institution and receives treatment or services provided there that are appropriate to his requirements.
5. **Long-term Care** **Long-term care** is medical treatment and services directed by a licensed practitioner of the healing arts toward maintenance, improvement, or protection of health or lessening of illness, disability or pain which have been received, or are expected to be received, for longer than 30 consecutive days.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.010	Page 2a

6. Medical Institution (Facility)

A **medical institution** is an institution (facility) that:

- is organized to provide medical care, including nursing and convalescent care,
- has the necessary professional personnel, equipment, and facilities to manage the medical, nursing and other health needs of patients,
- is authorized under state law to provide medical care, and
- is staffed by professional personnel who are responsible to the institution for professional medical and nursing services.

An acute care hospital is a medical institution.

7. Patient

An individual who is receiving needed professional services that are directed by a licensed practitioner of the healing arts toward maintenance, improvement, or protection of health or lessening of illness, disability, or pain, is a **patient**.

8. Inpatient

An **inpatient** is a patient who has been admitted to a medical institution on the recommendation of a physician or dentist **and** who:

- receives room, board, and professional services in the institution for a 24-hour period or longer, **or**
- is expected by the institution to receive room, board, and professional services in the institution for a 24-hour period or longer even though it later develops that the patient dies, is discharged or is transferred to another facility, and does not actually stay in the institution for 24 hours.

9. Assisted Living Facility (ALF) / Memory Care Unit

An assisted living facility (ALF) or memory care unit are not long-term care facilities or a Medicaid medical institution. An ALF or memory care unit may be located within the same setting or campus such as a continuing care or a long-term care facility, however the level of care differs from that of a Medicaid medical institution.

10. Independent living facility

A senior living center/senior apartment/retirement community are independent living arrangements or residences and are not medical institutions.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date December 2003
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.030	Page 3

- is expected by the institution to receive room, board, and professional services in the institution for a 24-hour period or longer even though it later develops that the patient dies, is discharged or is transferred to another facility, and does not actually stay in the institution for 24 hours.

M1410.020 NON-FINANCIAL ELIGIBILITY REQUIREMENTS

- A. Introduction** To be eligible for Medicaid payment of long-term care, an individual must be eligible for Medicaid. The Medicaid non-financial eligibility requirements in chapter M02 apply to all Medicaid applicants and recipients, including those individuals in long-term care. The non-financial requirements and the location of the manual policy for each requirement are:
- B. Citizenship/
Alienage** The citizenship and alien status policy is found in M0220.
- C. Virginia Residency** The Virginia state resident policy for patients in medical institutions is found in subchapter M1430.101; the state resident policy for CBC patients is found in M0230.
- D. Social Security
Number** The social security number policy is found in M0240.
- E. Assignment of
Rights** The assignment of rights and support cooperation policy is found in M0250.
- F. Application for
Other Benefits** The application for other benefits policy is found in M0270.
- G. Institutional
Status** The institutional status policy for facility patients is in subchapter M1430.100. The institutional status policy for CBC waiver services patients is found in subchapter M1440.010.
- H. Covered Group
(Category)** The Medicaid covered groups eligible for long-term care services are listed in subchapter M1460. The category requirements for the covered groups are found in chapter M03.

M1410.030 FACILITY CARE

- A. Introduction** Medicaid covers care provided in a medical institution to persons whose physical or mental condition requires nursing supervision and assistance with activities of daily living. Some institutions have both medical and residential sections. An individual in the medical section of the institution is a patient in a medical facility; however, an individual in the residential portion of the institution is a resident of a residential facility NOT a patient in a medical facility.
- This section contains descriptions of the types of **facilities** (medical institutions) in which Medicaid provides payment for services received by eligible patients. See subchapter M1430 for specific policy and procedures which apply to patients in facilities.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.030	Page 4

- B. Ineligible Individuals** Individuals under age 65 who are patients in an institution for mental diseases (IMD) *are not eligible for Medicaid* unless they are under age 22 and receiving inpatient psychiatric services.
- C. Types of Medical Institutions** The following are types of medical institutions in which Medicaid will cover part of the cost of care for eligible individuals:
- 1. Chronic Disease Hospitals** Specially certified hospitals, also called "**long-stay hospitals**". There are two of these hospitals enrolled as Virginia Medicaid providers:
 - Hospital for Sick Children in Washington, D.C., and
 - Lake Taylor Hospital in Norfolk, Virginia.
 - 2. Hospitals and/or Training Centers for the Intellectually Disabled** Facilities (medical institutions) that specialize in the care of intellectually disabled individuals. Intermediate Care Facilities for the Intellectually Disabled (ICF/IDs) are certified by the Department of Health to provide care in a group home setting. Patients in these facilities may have income from participating in work programs.

NOTE: Medically needy (MN) individuals are not eligible for Medicaid payment of LTC services in an ICF/ID because ICF/ID services are not covered for the medically needy.
 - 3. Institutions for Mental Diseases (IMDs)** A hospital, nursing facility or other medical institution that is primarily engaged in providing diagnosis, treatment or care, including medical attention, nursing care and related services, of persons with mental diseases. An institution for the mentally retarded is not an IMD.

NOTE: Medically needy (MN) patients age 65 or older are not eligible for Medicaid payment of LTC in an IMD because these services are not covered for medically needy individuals age 65 or over.
 - 4. Intermediate Care Facility (ICF)** A medical institution licensed by the state to provide, on a regular basis, health-related services to patients who do not require hospital or skilled nursing facility care, but whose mental or physical condition requires services in addition to room and board which can be made available only in an institutional setting.
 - 5. Nursing Facility** A medical institution licensed by the state to provide, on a regular basis, health-related services to patients who do not require hospital care, but whose mental or physical condition requires services, such as nursing supervision and assistance with activities of daily living, in addition to room and board and such services can be made available only in an institutional setting. Nursing facilities provide either skilled nursing care services or intermediate care services, or both.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.040	Page 5

6. Rehabilitation Hospitals

A hospital certified as a rehabilitation hospital, or a unit of a hospital certified by the Department of Health as excluded from the Medicare prospective payment system, which provides inpatient rehabilitation services.

M1410.040 COMMUNITY-BASED CARE WAIVER SERVICES

A. Introduction

Medicaid covers long-term care in a community-based setting to individuals whose mental or physical condition requires nursing supervision and assistance with activities of daily living.

This section provides general information about the Community-based Care (CBC) Waiver Services covered by Medicaid. The detailed descriptions of the waivers and the policy and procedures specific to patients in CBC are contained in subchapter M1440.

B. Community-Based Care Waivered Services (CBC)

Community-Based Care Waiver Services or Home and Community-based Care or CBC are titles that are used interchangeably. These terms are used to mean a variety of in-home and community-based services reimbursed by the Department of Medical Assistance Services (DMAS) that are authorized under a Section 1915(c) waiver designed to offer individuals an alternative to institutionalization. Individuals may be preauthorized to receive one or more of these services either solely or in combination, based on the documented need for the service or services to avoid nursing facility placement.

C. Virginia's Waivers

Virginia has approved Section 1915(c) home and community-based *care* waivers. These waivers contain services that are otherwise not available to the general Medicaid population. The target population and service configuration for each waiver is outlined in subchapter M1440. An individual cannot receive services under two or more waivers simultaneously; the individual can receive services under only one waiver at a time.

1. Commonwealth Coordinated Care Plus Waiver

Effective July 1, 2017, the Elderly or Disabled with Consumer-Direction (EDCD) Waiver and the Technology Assisted (Tech) Waiver were combined and are known as the Commonwealth Coordinated Care Plus (CCC Plus) Waiver. The CCC Plus Waiver serves aged individuals and disabled individuals who would otherwise require institutionalization in a nursing facility. The waiver also serves "technology-assisted" individuals who are chronically ill or severely impaired and who need both a medical device to compensate for the loss of a vital body function, as well as substantial and ongoing skilled nursing care to avert death or further disability.

The individual may choose to receive agency-directed services, consumer-directed services or a combination of the two. Under consumer-directed services, supervision of the personal care aide is provided directly by the recipient and/or the person directing the care for the recipient. If an individual is incapable of directing his own care, a spouse, parent, adult child, or guardian may direct the care on behalf of the recipient. Services available through this waiver include:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2019
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.040	Page 6

- agency-directed and consumer-directed personal care
- adult day health care
- agency-directed respite care (including skilled respite) and consumer-directed respite care
- Personal Emergency Response System (PERS).

Services provided through CCC Plus Waiver for technology-assisted individuals are expected to prevent placement, or to shorten the length of stay, in a hospital or nursing facility and include:

- private duty nursing
- nutritional supplements
- medical supplies and equipment not otherwise available under the Medicaid State Plan.

2. Community Living Waiver (Formerly the Intellectual Disabilities Waiver)

As part of the My Life, My Community Developmental Disabilities Waiver Redesign, the Intellectual Disabilities (ID) Waiver was renamed the Community Living Waiver in 2016. The waiver is targeted to provide home and community-based services to individuals with developmental disabilities and individuals under the age of six years at developmental risk who have been determined to require the level of care provided in an ICF/ID, and to individuals with related conditions currently residing in nursing facilities who require specialized services. See M1440, Appendix 1 for a list of services available through this waiver.

5. Family and Individual Supports Waiver (Formerly the Individual and Family Developmental Disabilities Support Waiver)

As part of the My Life, My Community Waiver Developmental Disabilities Redesign, the Individual and Family Developmental Disabilities Support (DD) Waiver was renamed the Family and Individual Supports Waiver in 2016. The waiver provides home and community-based services to individuals with developmental disabilities. See M1440, Appendix 1 for a list of services available through this waiver.

6. Building Independence Waiver (Formerly the Day Support Waiver for Individuals with Intellectual Disabilities)

As part of the My Life, My Community Waiver Developmental Disabilities Redesign, the Day Support Waiver for Individuals with Intellectual Disabilities (DS Waiver) was renamed the Building Independence Waiver in 2016. The waiver is targeted to provide home and community-based services to individuals with intellectual disabilities who have been determined to require the level of care provided in an ICF/ID. See M1440, Appendix 1 for a list of services available through this waiver.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.050	Page 7

- nursing services for assessments and evaluations
- therapeutic social and recreational programming which provides daily activities for individuals with dementia.

**D. Children’s Mental Health Program—
Not Medicaid CBC**

Children’s Mental Health Program services are home and community-based services to children who have been discharged from psychiatric residential treatment facilities. **Children’s Mental Health Program services are NOT Medicaid CBC services.** See M1520.100 E. for additional information.

E. Program for All-Inclusive Care for the Elderly (PACE)

PACE is the State’s community model for the integration of acute and long-term care. Under the PACE model, Medicaid and Medicare coverage/funding are combined to pay for the individual’s care. PACE is centered around the adult day health care model and provides the entire spectrum of acute and long-term care services to enrollees without limitations on the duration of services or the dollars spent. Participation in PACE is in lieu of the EDCD Waiver and is voluntary. PACE serves individuals aged 55 and older who (1) meet the nursing facility level of care criteria and (2) reside in their own communities. PACE provides all of an individual’s health care and medical long-term care needs.

PACE is NOT a HCBS Waiver; however, the preadmission screening, financial eligibility and post eligibility requirements for individuals enrolled in PACE are the same as those for individuals enrolled in the CCC Plus (formerly EDCD) Waiver.

M1410.050 FINANCIAL ELIGIBILITY REQUIREMENTS

A. Introduction

An individual in LTSS must meet the financial eligibility requirements that are specific to institutionalized individuals; these requirements are contained in this chapter:

B. Asset Transfer

The asset transfer policy is found in subchapter M1450.

C. Resources

The resource eligibility policy for individuals in LTSS who do not have a community spouse and for MAGI Adults regardless of their marital status is found in subchapter M1460 of this chapter.

Only certain resource eligibility requirements are applicable to individuals in the Modified Adjusted Gross Income (MAGI) Adults covered group who are institutionalized.

The resource eligibility requirements for married individuals in LTSS who have a community spouse, other than MAGI Adults, are found in subchapter M1480 of this chapter. The policy in subchapter M1480 for married institutionalized individuals is NOT used to determine eligibility for MAGI Adults, regardless of their marital status

D. Income

The income eligibility policy for individuals in LTSS who do not have a community spouse is found in subchapter M1460 of this chapter. MAGI Adults in LTSS are evaluated using the MAGI income policy in Chapter M04.

The income eligibility policy for individuals in LTSS who have a community spouse is found in subchapter M1480.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.100	Page 8

M1410.060 POST-ELIGIBILITY TREATMENT OF INCOME (PATIENT PAY)

- A. Introduction** Most Medicaid-eligible individuals must pay a portion of their income to the LTSS provider; Medicaid pays the remainder of the cost of care. The portion of their income that must be paid to the provider is called “patient pay.” Patient pay policy does NOT apply to MAGI Adults.
- B. Patient Pay** The policies and procedures for patient pay determination are found in subchapter M1470 of this chapter for individuals who do not have community spouses and in subchapter M1480 for individuals who have community spouses.

M1410.100 LONG-TERM CARE APPLICATIONS

- A. Introduction** The general application requirements applicable to all Medicaid applicants/recipients found in chapter M01 also apply to applicants/recipients who need LTSS services. This section provides those additional or special application rules that apply only to persons who meet the institutionalization definition.
- B. Responsible Local Agency** The local social services department in the Virginia locality where the institutionalized individual (patient) last resided outside an institution retains responsibility for receiving and processing the application.
- If the patient did not reside in Virginia prior to admission to the institution, the local social services department in the county/city where the institution is located has responsibility for receiving and processing the application.
- Home and Community-Based Services (HCBS) applicants apply in their locality of residence.
- C. Procedures**
- 1. Application Completion** A signed application is received. A face-to-face interview with the applicant or the person authorized to conduct his business is not required, but is strongly recommended, in order to correctly determine eligibility.
 - 2. Pre-admission Screening** Notice from pre-admission screener is received by the local Department of Social Services (DSS).
- NOTE: Verbal communications by both the screener and the local DSS Eligibility Worker (EW) may occur prior to the completion of screening. Also, not all LTC cases require pre-admission screening; see M1420.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.200	Page 9

3. Processing

EW completes the application processing. Processing includes receipt of required verifications, completion of the non-financial and financial eligibility determinations, and necessary case record documentation. See chapter M15 for the processing procedures.

An individual's eligibility is determined as an institutionalized individual if he is in a medical facility or has been *authorized* for Medicaid LTSS. For any month in the retroactive period, an individual's eligibility can only be determined as an institutionalized individual if he met the definition of institutionalization in that month (i.e. he had been a patient in a medical institution—including nursing facility or an ICF-ID-- for at least 30 consecutive days).

If it is known at the time the application is processed that the individual did not or will not receive LTSS (i.e. the applicant has died since making the application) do not determine eligibility as an institutionalized individual.

If the individual's eligibility was determined as an institutionalized individual prior to the receipt of waiver services, the EW must verify that LTSS started within 30 days of the date of the Notice of Action on Medicaid. If LTSS did not start within 30 days of the date of the Notice of Action on Medicaid, the individual's continued eligibility must be re-evaluated as a non-institutionalized individual.

4. Notices

See section M1410.300 for the required notices.

M1410.200 INITIATING LONG-TERM CARE FOR CURRENT RECIPIENTS

A. Introduction

Individuals who currently receive Medicaid and enter LTSS must have their eligibility redetermined using the special rules that apply to LTSS.

For example, an enrollee may be ineligible for Medicaid payment of LTSS because he/she transferred assets without receiving adequate compensation. The asset transfer policy found in M1450 applies to individuals who receive any type of LTSS. Individuals who are ineligible for Medicaid payment of LTSS may remain eligible for other Medicaid-covered services.

B. Authorization for LTSS

An individual must have an assessment to determine that LTSS are appropriate, and LTSS must be authorized for Medicaid payment for LTSS. Subchapter M1420 contains the policies and procedures regarding LTSS authorization.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.300	Page 10

C. Recipient Enters LTC

A re-evaluation of eligibility must be done when the EW learns that a Medicaid recipient has started receiving LTSS services. An LTSS screening **is required.** :

If an annual renewal **has been** done within the past six months, a partial review to address factors pertinent to receipt of LTC, such as asset transfer, spousal resource assessment, etc., must be done. If an annual renewal **has not** been done within the past six months, a complete renewal must be done. A new application is not required. See subchapter M1520 for renewal procedures.

- For an SSI recipient who has no community spouse and owns no countable real property, verify continued receipt of SSI through SOLQ-I or SVES, obtain information regarding asset transfer from the enrollee or authorized representative, and document the case record. See section M1430.103 for additional information regarding an SSI recipient who enters a nursing facility.
- Rules for married institutionalized recipients, with the exception of MAGI Adults, who have a community spouse are found in subchapter M1480.

D. Notification

When the re-evaluation is done, the EW must complete and send all required notices. See section 1410.300 below. If it is known at the time of application processing that the individual did not or will not receive LTSS services, do not determine eligibility as an institutionalized individual.

M1410.300 NOTICE REQUIREMENTS

A. Introduction

A notice to an applicant or recipient provides formal notification of the intended action or action taken on his/her case, the reason for this action and the authority for proposing or taking the action. The individual needs to clearly understand when the action will take place, the action that will be taken, the rules which require the action, and his right for redress.

Proper notice provides protection of the client's appeal rights as required in 1902(a)(3) of the Social Security Act.

The Notice of Action on Medicaid provides an opportunity for a fair hearing if action is taken to deny, suspend, terminate, or reduce services.

The Medicaid Long-term Care Communication Form (DMAS-225) notifies the LTSS provider of changes to an enrollee's eligibility for Medicaid and for Medicaid payment of LTSS services.

The notice requirements found in this section are used for all LTSS cases.

Individuals in the AAL Waiver have Medicaid eligibility determined in the AG covered group (see M0320.202) and do not have Medicaid eligibility determined as institutionalized individuals. There are no post-eligibility requirements. The enrollment and notification procedures used with non-institutionalized Medicaid recipients are followed (see M0130.300).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.300	Page 11

B. Forms to Use

1. Notice of Action on Medicaid & FAMIS (#032-03-0008)

The EW must send the Notice of Action on Medicaid generated by VaCMS or the equivalent hard form, available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms> to the applicant/ recipient or his authorized representative to notify him of the agency's decision on the initial Medicaid application, and on a redetermination of eligibility when a recipient starts LTC services.

2. Notice of Patient Pay Responsibility (#032-03-0062)

The Notice of *Patient Pay Responsibility* is sent to the applicant/enrollee or the authorized representative to notify them of the amount of patient pay responsibility. The form is generated and sent by the Virginia Case Management System (VaCMS) on the day the case is authorized, or by the Medicaid enrollment system if a change is input directly into that system.

3. Medicaid LTC Communication Form (DMAS-225)

The Medicaid Long-term Care (LTC) Communication Form is available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>. The form is used by LTC providers and local departments of social services (LDSS) to exchange information, other than patient pay information, such as:

- a change in the LTC provider, including when an individual moves from CBC to a nursing facility or the reverse;
- the enrollee's physical residence, if different than the LDSS locality;
- changes in the patient's deductions (e.g. a medical expense allowance);
- admission, death or discharge to an institution or community-based care service;
- changes in eligibility status; and
- changes in third-party liability.

Do not use the DMAS-225 to relay the patient pay amount. Providers are able to access patient pay information through the Department of Medical Assistance Services (DMAS) provider verification systems.

a. When to Complete the DMAS-225

The EW completes the DMAS-225 at the time initial patient pay information is added to VaCMS, when there is a change in the enrollee's situation, including a change in the enrollee's LTC provider, or when a change affects an enrollee's Medicaid eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.300	Page 12

b. Where to Send the DMAS-225.

If the individual is enrolled in a Commonwealth Coordinated Care (CCC) Plus Managed Care Organization (MCO), send the DMAS-225 to the individual's MCO. If known, send it to the individual's care coordinator. Contact information for the CCC Plus MCOs is available at <https://cccplusva.com/contacts-and-links>.

If the individual is not in managed care, send the DMAS-225 as indicated below:

- 1) For hospice services patients, including hospice patients in a nursing facility or those who are also receiving CBC services, send the original form to the hospice provider.
- 2) For facility patients, send the original form to the nursing facility.
- 3) For PACE or adult day health care recipients, send the original form to the PACE or adult day health care provider.
- 4) For Medicaid CBC, send the original form to the following individuals
 - the case manager at the Community Services Board, for the Family and Individual Supports (formerly Developmental Disabilities) Waivers;
 - the case manager (support coordinator), for the FIS (DD) Waiver,
 - the personal care provider, for agency-directed *CCC Plus Waiver* personal care services and other services. If the patient receives both personal care and adult day health care, send the DMAS-225 to the personal care provider.
 - the service facilitator, for consumer-directed *CCC Plus Waiver* services,
 - the case manager, for any enrollee with case management services, and
 - the case manager at DMAS, for CCC Plus Waiver *Private Duty Nursing (PDN)* services), at the following address:
Office for Community Living
 600 E. Broad St,
 Richmond, VA 23219

Retain a copy of the completed DMAS-225 in the case record.

4. Advance Notices of Proposed Action

The recipient must be notified in advance of any adverse action that will be taken on his/her Medicaid eligibility or patient pay.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.300	Page 13

a. Advance Notice of Proposed Action

The system-generated Advance Notice of Proposed Action or hard equivalent (**#032-03-0018**), available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, must be used when:

- eligibility for Medicaid will be canceled,
- eligibility for full-benefit coverage Medicaid changes to QMB, SLMB, or QWDI limited coverage, or
- Medicaid payment for *LTSS* services will not be allowed for a period of time because of an asset transfer.

b. Notice of Patient Pay Responsibility

When a change in the patient pay amount is entered in VaCMS, a “Notice of Patient Pay Responsibility” will be generated and sent as the advanced notice to the recipient or the authorized representative.

Patient pay must be entered into VaCMS no later than close-of-business on the system cut-off date, to meet the advance notice requirement.

Do not send the “Advance Notice of Proposed Action” when patient pay increases.

**5. Administrative
Renewal Form**

A system-generated paper Administrative Renewal Form is used to redetermine Medicaid eligibility of an individual who is in long-term care. The individual or his authorized representative completes and signs the form where indicated. The EW completes and signs the eligibility evaluation sections on the form.

A renewal can also be completed online using CommonHelp or by telephone by calling the Cover Virginia Call Center. See M1520.200 for information regarding Medicaid renewals.

M1420.000 AUTHORIZATION FOR MEDICAID LTSS

M1420.100 MEDICAID LTSS AUTHORIZATION REQUIREMENTS

A. Introduction

Medicaid covers long-term services and supports (LTSS) in a medical facility or community-based setting for individuals whose mental or physical condition requires assistance with activities of daily living. For Medicaid to cover LTSS, the individual must:

- meet the definition of an institutionalized individual in subchapter M1410. The individual's eligibility as an institutionalized individual may be determined when the individual is already in a medical facility at the time of the application, or the individual has been authorized to receive LTSS and it is anticipated that they are likely to receive the services for 30 or more consecutive days. If it is known at the time the application is processed that the individual did not or will not meet the 30 consecutive day requirement, the individual is not to be treated as an institutionalized individual.
- meet all Medicaid non-financial eligibility requirements in Chapter M02;
- be financially eligible based on the policy and procedures in subchapter M1460 for unmarried individuals and married institutionalized individuals without a community spouse or subchapter M1480 for institutionalized individuals with a community spouse; and
- Meet the asset transfer policies in subchapter M1450.

This subchapter describes the LTSS authorization required for the types of LTSS, which are facility-based care, home-and-community-based (HCBS) services covered under a Section 1915(c) waiver, and the Program for All Inclusive Care for the Elderly (PACE).

B. Operating Policies

1. Payment Authorization

An LTSS authorization is needed for Medicaid payment of nursing facility (medical institution), HCBS waiver, and PACE services for Medicaid recipients. The authorization allows the local DSS to determine financial eligibility using the more liberal rules for institutionalized individuals, including the 300% SSI covered group and the special rules for married institutionalized individuals with a community spouse. The appropriate authorization document (form or screen print) must be maintained in the individual's case record

2. Required Authorization Documents

a. Nursing facility-based care, the Commonwealth Coordinated Care Plus Waiver, and PACE

The Medicaid LTSS Authorization Form, DMAS 96 or the equivalent information printed from the electronic Medicaid LTSS Screening system (eMLS) or the *Minimum Data Survey (MDS)* is used to authorize nursing facility-based care, the Commonwealth Coordinated Care (CCC) Plus Waiver, and PACE. The Authorization form certifies the type of LTSS service

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.200	Page 2

If documentation is not available when placement needs to be made, verbal assurance from a screener that the form approving LTSS will be mailed or *electronically available* is sufficient to determine Medicaid eligibility as an institutionalized individual. This information must be received prior to approval and enrollment in Medicaid as an institutionalized individual.

b. The Community Living Waiver, Building Independence Waiver, and Family and Individual Supports Waiver.

The Waiver Authorization System (WaMS) (see M1420, Appendix 3) or Intellectual Disability On-line System (IDOLS) are used to authorize services received under the Community Living (CL) Waiver, Building Independence (BI) Waiver, and Family and Individual Supports Waiver. Copies of the authorization screens are acceptable.

3. Authorization Not Received

If the appropriate documentation authorizing LTSS is not received, Medicaid eligibility for an individual who is living in the community must be determined as a non-institutionalized individual.

4. Continuing Authorization

Providers re-evaluate the individual's level of care periodically. The authorization for Medicaid payment of LTSS may be rescinded by the physician or by DMAS at any point that the individual is determined to no longer meet the required Medicaid level of care criteria via level of care review process.

When an individual is no longer eligible for a HCBS Waiver service, the EW must re-evaluate the individual's eligibility as a non-institutionalized individual.

When an individual leaves the PACE program and no longer receives LTSS services, the EW must re-evaluate the individual's eligibility as a non-institutionalized individual.

Facilities document the level of care using the Minimum Data Survey (MDS). For an individual in a nursing facility who no longer meets the level of care but continues to reside in the facility, **continue to use the eligibility rules for institutional individuals** even though the individual no longer meets the level of care criteria. Medicaid will not make a payment to the facility for LTSS.

M1420.200 RESPONSIBILITY FOR THE LTSS AUTHORIZATION

A. Introduction

The process for completing the required assessment and authorizing services depends on the type of LTSS.

B. Nursing Facility

In order to qualify for nursing facility care, an individual must be determined to meet functional criteria, have a medical or nursing need and be at risk of nursing facility or hospital placement within 30 days without services. An assessment known as the LTSS Screening is completed by a designated screener. *For individuals who apply for Medicaid after entering a nursing facility, medical staff at facilities document the level of care needed using the Minimum Data Survey (MDS). The Eligibility Worker does not need to see any screening authorization if the individual applying is already a resident of a nursing facility when the Medicaid application is filed.*

Virginia Medical Assistance Eligibility	M14	October 2022
Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.200	Page 3

The screener's approval for Medicaid LTSS for new admissions must be substantiated in the case record by a DMAS-96 or the equivalent information from the eMLS system, *WaMS printout or the Minimum Data Survey (MDS)*. Medicaid payment for LTSS cannot begin prior to the date the DMAS-96 is signed by the physician and prior authorization of services for the individual has been given to the provider by DMAS or the managed care plan.

An overview of the screening requirements when an individual needs nursing home care is listed below:

- For hospital patients who are currently enrolled in Medicaid and will be admitted to a nursing facility with Medicaid as the payment source, the screening is completed by hospital staff.
- Nursing facilities are permitted to admit individuals who are discharged directly from a hospital to a nursing facility for skilled services without an LTSS screening if the skilled services are not covered in whole or partially by Virginia Medicaid. Once the individual is admitted to the nursing facility, if the individual requests an LTSS screening or applies for Medicaid coverage for LTSS, nursing facility staff will conduct a LTSS screening. *The Eligibility Worker does not need to see the screening authorization if the individual applying is already a resident of a nursing facility when the Medicaid application is filed. DMAS will not pay for LTSS services unless the facility has documented that the applicant meets the nursing facility level of care.*
- For individuals who are not inpatients in a hospital or are incarcerated prior to nursing facility admission, the screening is completed by local community-based teams (CBT) composed of agencies contracting with the Department of Medical Assistance Services (DMAS). The community-based teams usually consist of the local health department physician, a local health department nurse, and a local social services department service worker. Incarcerated individuals will be screened by the community-based team in the locality in which the facility is located.

C. CCC Plus Waiver

Effective July 1, 2017, the Elderly or Disabled with Consumer-Direction (EDCD) Waiver and the Technology Assisted (Tech) Waiver were combined and are known as the Commonwealth Coordinated Care Plus (CCC Plus) Waiver. Community-based teams, hospital screening teams and nursing facility screening teams are authorized to screen individuals for the CCC Plus Waiver. See M1420.400 C for more information.

An individual screened and approved for the CCC Plus Waiver will have a DMAS-96 signed and dated by the screener and the physician (*or the nurse practitioner or the physician's assistant working with the physician*) or the equivalent information printed from the eMLS system.

Virginia Medical Assistance Eligibility	M14	October 2022
Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.200	Page 4

If the individual elects consumer-directed services, DMAS or its contractor must give final authorization. If services are not authorized, the service facilitator will notify the LDSS, and the EW must re-evaluate the individual's eligibility as a non-institutionalized individual.

For individuals who qualify for Private Duty Nursing (PDN) under the CCC Plus Waiver, a Medicaid LTSS Communication form (DMAS-225) and a Commonwealth Coordinated Care Plus Waiver PDN Level of Care Eligibility form (DMAS-108 for Adults or DMAS-109 for children) will be completed and sent to the LDSS.

D. Program for All Inclusive Care for the Elderly (PACE)

Community-based screening teams, hospital screening teams and nursing facility screening teams are authorized to screen individuals for PACE. If the individual is screened and approved for LTSS, the team will inform the individual about any PACE program that serves the individual's locality. Individuals approved for PACE will have a DMAS-96 signed and dated by the screener and the supervising physician (or the nurse practitioner or the physician's assistant working with the physician) or the equivalent information printed from the eMLS system.

E. Community Living Waiver

Local Community Services Boards (CSBs) are authorized to screen individuals for the Community Living Waiver. Final authorizations for waiver services are made by Department of Behavioral Health and Developmental Services (DBHDS) staff.

Individuals screened and approved for the Community Living Waiver will have a printout of the WaMS or Intellectual Disability On-line System (IDOLS) authorization screen completed by the DBHDS representative. The screen print will be accompanied by a completed DMAS-225 form identifying the client, the Community Services Board providing the service, and begin date of service.

F. Family and Individual Supports Waiver

CSBs are authorized to screen individuals for the Family and Individual Supports Waiver. Final authorizations for waiver services are made by DBHDS staff.

Individuals screened and approved for the Family and Individual Supports Waiver will have a printout of the WaMS or IDOLS authorization screen completed by the DBHDS representative. The screen print will be accompanied by a completed DMAS-225 form identifying the client, the Community Services Board providing the service, and begin date of service.

G. Building Independence Waiver

Local CSB and DBHDS case managers are authorized to screen individuals for the Building Independence Waiver. Final authorizations for waiver services are made by DBHDS staff.

Individuals screened and approved for the Building Independence Waiver will have a printout of the WaMS or IDOLS authorization screen completed by the DBHDS representative. The screen print will be accompanied by a completed DMAS-225 form identifying the client, the Community Services Board providing the service, and begin date of service.

Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.300	Page 5

M1420.300 COMMUNICATION PROCEDURES

- A. Introduction** To ensure that nursing facility, PACE placement or receipt of Medicaid HCBS services are arranged as quickly as possible, there must be prompt communication between screeners and eligibility staff.
- B. Procedures**
- 1. LDSS Contact** The LDSS should designate an appropriate staff member for screeners to contact. Local social services, hospital staff, CBTs and nursing facilities should be given the name and contact information for that person to facilitate timely communication between screeners and eligibility staff.
 - 2. Screeners** Screeners must inform the individual's eligibility worker when the screening process has been completed.
 - 3. Eligibility Worker (EW) Action** The EW must inform both the individual and the provider once eligibility for Medicaid payment of LTSS has been determined. If the individual is found eligible for Medicaid and written assurance of approval by the screening team, DMAS, or the managed care plan has been received (DMAS-96, WaMS printout or the *Minimum Data Survey [MDS]*), the eligibility worker must give the LTSS provider the enrollee's Medicaid identification number.

M1420.400 LTSS SCREENING EXCLUSIONS (*Special Circumstances*)

- A. Purpose** *The screening certification authorizes the local DSS to determine financial eligibility using the more liberal rules for institutionalized individuals, including the 300% SSI covered group and the special rules for married institutionalized individuals with a community spouse. The Eligibility Worker does not need to see any screening authorization if the individual applying is already a resident of a nursing facility when the Medicaid application is filed.*
- B. Screening Special Circumstances** *Screening for LTSS is NOT required when:*
- *the individual is a resident in a nursing facility, receiving CCC Plus Waiver services or in PACE at the time of application and was admitted to the service prior to July 1, 2019;*
 - *the individual resides out of state (either in a community, hospital or nursing facility setting) and seeks direct admission to a nursing facility;*
 - *the individual is an inpatient at an in-state owned/operated facility licensed by DBHDS, in-state or out of state Veterans hospital, military hospital or VA Medical Center, and seeks direct admission to a nursing facility;*
 - *the individual enters a nursing facility directly from the CCC Plus Waiver or PACE services;*
 - *the individual is being enrolled in Medicaid hospice.*

M1430.000 FACILITY CARE

- A. Introduction** Medicaid covers care provided in a facility to persons whose physical or mental condition requires nursing supervision and assistance with activities of daily living.

This subchapter (M1430) contains the specific policy and rules that apply to individuals needing or receiving long-term supports and services (LTSS), also referred to as long-term care (LTC) services in medical institutions (facilities).

- B. Definitions** Definitions for terms used when policy is addressing types of *LTSS*, institutionalization, and individuals who are receiving that care are found in Subchapter M1410.

M1430.010 TYPES OF FACILITIES & CARE

- A. Introduction** This section contains descriptions of the types of medical facilities in which Medicaid provides payment for services received by eligible patients. *Also refer to M1410.010.B for additional guidance.*

- B. Medical Facility Defined** A **medical facility** is an institution that:
- is organized to provide medical care, including nursing and convalescent care,
 - has the necessary professional personnel, equipment, and facilities to manage the medical, nursing and other health needs of patients,
 - is authorized under state law to provide medical care, and
 - is staffed by professional personnel who are responsible to the institution for professional medical and nursing services.

- C. Types of Medical Facilities** The following are types of medical facilities in which Medicaid will cover part of the cost of care:

- 1. Chronic Disease Hospitals** **Chronic disease hospitals** are specially certified hospitals, also called "long-stay hospitals". There are two of these hospitals enrolled as Virginia Medicaid providers:

- Hospital for Sick Children in Washington, D.C.;
- Lake Taylor Hospital in Norfolk, Virginia.

- 2. Intermediate Care Facilities for the Intellectually Disabled (ICF-ID)** An **ICF-ID** is an institution for the intellectually disabled or persons with related conditions is an institution or a distinct part of an institution that

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2021
Subchapter Subject M1430.000 FACILITY CARE	Page ending with M1430.010	Page 2

- is primarily for the diagnosis, treatment or rehabilitation of individuals with intellectual disabilities or related conditions, and
- provides, in a protected residential setting, ongoing evaluation, planning, 24-hour supervision, coordination and integration of health or rehabilitative services to help each individual function at his greatest ability.

Some community group homes are certified as Intermediate Care Facilities for the Intellectually Disabled (ICF-ID) by the Department of Health. Patients in these facilities may have income from participating in work programs.

NOTE: Medically needy (MN) individuals are not eligible for Medicaid payment of LTC services in an ICF-ID because ICF-ID services are not covered for the medically needy.

3. Institutions for Treatment of Mental Diseases (IMDs)

An **IMD** is a hospital, nursing facility or other institution with more than 16 beds that is primarily engaged in providing diagnosis, treatment or care, including medical attention, nursing care and related services, of persons with mental diseases. An institution for those intellectually disabled is NOT an IMD. For a list of state-operated IMDs in Virginia, see *M0280, Appendix 2*.

Federal regulations in 42 CFR 435.1008 prohibit federal financial participation (FFP) in most Medicaid services provided to individuals under age 65 years who are patients in an institution for the treatment of mental diseases (IMD), unless they are under age 22 and are receiving inpatient psychiatric services. However, an individual who is age 22 or over, but under age 65 and who is enrolled in Medicaid at the time of admission to an IMD may remain enrolled in Medicaid. The Department of Medical Assistance Services (DMAS) will coordinate with the Centers for Medicare and Medicaid Services (CMS) to ensure that no unauthorized FFP occurs.

Medically needy (MN) patients over 65 years of age are not eligible for Medicaid payment of LTSS services in an IMD because these services are not covered for medically needy individuals age 65 or over.

4. Nursing Facility

A **nursing facility** is a medical institution licensed by the state to provide, on a regular basis, health-related services to patients who do not require hospital care, but whose mental or physical condition requires services, such as nursing supervision and assistance with activities of daily living, in addition to room and board and such services can be made available only in an institutional setting. Nursing facilities provide either skilled nursing care services or intermediate care services, or both.

5. Rehabilitation Hospitals

A **rehabilitation hospital** is a hospital certified as a rehabilitation hospital, or a rehabilitation unit of a hospital certified by the Department of Health as excluded from the Medicare prospective payment system, which provides inpatient rehabilitation services.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1430.000 FACILITY CARE	Page ending with M1430.100	Page 3

M1430.100 BASIC ELIGIBILITY REQUIREMENTS

- A. Overview** To be eligible for Medicaid payment of long-term care, an individual must be eligible for Medicaid. The Medicaid non-financial eligibility requirements in Chapter M02 apply to all individuals in long-term care. The eligibility requirements and the location of the manual policy are listed below in this section.
- B. Citizenship/
Alienage** The citizenship and alien status policy is found in subchapter M220.
- C. Virginia Residency** The Virginia state resident policy specific to facility patient is found in subchapter M0230 and section M1430.101 below.
- D. Social Security
Number** The social security number policy is found in subchapter M0240.
- E. Assignment of
Rights** The assignment of rights is found in subchapter M0250.
- F. Application for
Other Benefits** The application for other benefits policy is found in subchapter M0270.
- G. Institutional
Status** The institutional status requirements specific to long-term care in a facility are in subchapter M0280.
- H. Covered Group
(Category)** The Medicaid covered groups eligible for LTC services, also called long-term services and supports (LTSS), are listed in M1460. The requirements for the covered groups are found in chapter M03.
- I. Financial
Eligibility** An individual who has been a patient in a medical institution (such as a nursing facility) for at least 30 consecutive days of care or who has been *authorized for LTSS* is treated as an institutionalized individual for the Medicaid eligibility determination. Financial eligibility for institutionalized individuals is determined as a one-person assistance unit separated from his/her legally responsible relative(s).
- The 30-consecutive-days requirement is expected to be met if *authorization for LTSS is provided verbally or in writing*. If the individual is treated as an institutionalized individual and eligibility is established prior to the begin date of services, the individual has 30 days from the date on the Notice of Action to begin services.
- For unmarried individuals, and for married individuals without community spouses other than MAGI Adults, the resource and income eligibility criteria in subchapter M1460 is applicable.
- MAGI Adults in LTC are evaluated using the resource policy in M1460 and the MAGI income policy in M04. Only certain resource eligibility requirements are applicable to individuals in the Modified Adjusted Gross Income (MAGI) Adult covered group who are institutionalized.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1430.000 FACILITY CARE	Page ending with M1430.101	Page 4

For married individuals with community spouses, *other than MAGI Adults*, the resource and income eligibility criteria in subchapter M1480 is applicable.

The asset transfer policy in M1450 applies to all facility patients, *including MAGI Adults*.

M1430.101 VIRGINIA RESIDENCE

A. Policy

An individual must be a resident of Virginia to be eligible for Virginia Medicaid while he/she is a patient in a medical facility. There is no durational requirement for residency. Additional Virginia residency requirements are in subchapter M0230.

B. Individual Age 21 or Older

An institutionalized individual age 21 years or older is a resident of Virginia if:

- the individual is in an institution in Virginia with the intent to remain permanently or for an indefinite period; or
- the individual became incapable of declaring his intention to reside in Virginia at or after becoming age 21 years, he/she is residing in Virginia and was not placed here by another state government agency.

1. Determining Incapacity to Declare Intent

An individual is incapable of declaring his/her intent to reside in Virginia if:

- he has an I.Q. of 49 or less or has a mental age of less than 7 years;
- he has been judged legally incompetent; or
- medical documentation by a physician, psychologist, or other medical professional licensed by Virginia in the field of *intellectual disabilities* supports a finding that the individual is incapable of declaring intent to reside in a specific state.

2. Became Incapable Before Age 21

An institutionalized individual age 21 years or older who became incapable of stating intent before age 21 is a resident of Virginia if:

- the individual's legal guardian or parent, if the parents reside in separate states, who applies for Medicaid for the individual resides in Virginia;
- the individual's legal guardian or parent was a Virginia resident at the time of the individual's institutional placement;
- the individual's legal guardian or parent who applies for Medicaid for the individual resides in Virginia and the individual is institutionalized in Virginia; or
- the individual's parent(s) has abandoned the individual, no legal guardian has been appointed, the individual is institutionalized in Virginia, and the person who files the individual's Medicaid application resides in Virginia.
- if a legal guardian has been appointed for the individual and parental rights have been terminated, the guardian's state of residence is used to determine residency instead of the parent's.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1430.000 FACILITY CARE	Page ending with M1430.102	Page 5

- C. Individual Under Age 21** An institutionalized individual under age 21 years who is not emancipated is a resident of Virginia if:
- the individual's legal guardian or parent was a Virginia resident at the time of the individual's institutional placement;
 - the individual's legal guardian or parent who applies for Medicaid for the individual resides in Virginia and the individual is institutionalized in Virginia; or
 - the individual's parent(s) has abandoned the individual, no legal guardian has been appointed, the individual is institutionalized in Virginia, and the person who files the individual's Medicaid application resides in Virginia.
 - if a legal guardian has been appointed for the individual and parental rights have been terminated, the guardian's state of residence is used to determine residency instead of the parent's.
- D. Placed by Another State's Government** When an individual is placed in a facility by another (not Virginia) state or local government agency, the placing state retains responsibility for the individual's Medicaid. Placement by a government agency is any action taken by the agency beyond providing general information to the individual and the individual's family to arrange the individual's admission to an institution. A government agency includes any entity recognized by State law as being under contract with the state government.
- E. Individual Placed Out-of-state by Virginia** An individual retains Virginia residency for Medicaid if he/she is placed by a Virginia government agency in an institution outside Virginia. Placement into an out-of-state LTC medical facility must be pre-authorized by DMAS.
- When a competent individual voluntarily leaves the facility in which Virginia placed him/her, he/she becomes a resident of the state where he/she is physically located.
- F. Disputed or Unclear Residency** If the individual's state residency is unclear or is disputed, contact your Regional *Consultant* for help. When two states cannot resolve the residency dispute, the state where the individual is physically located becomes his/her state of residency for Medicaid purposes.

M1430.102 ADVANCE PAYMENTS

- A. Introduction** There are instances when a family member, or other individual, makes an advance payment to the facility for a prospective Medicaid patient prior to or during the Medicaid application process. This assures the patient's admission to, and continued care in, the facility. The individual may have been promised by the facility that the advance payment will be refunded if the patient is found eligible for Medicaid.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date February 2009
Subchapter Subject M1430.000 FACILITY CARE	Page ending with M1430.103	Page 6

Advance payments which are expected to be reimbursed to an individual other than the Medicaid applicant once Medicaid is approved, and payments made to the facility to hold the bed while the patient is hospitalized, are not counted as income for either eligibility or patient pay determinations.

B. Reimbursement

Any monies contributed toward the cost of the patient's care pending Medicaid eligibility determination must be reimbursed to the contributing party by the facility when Medicaid eligibility is established. The only exception is when the payment is made from the patient's own funds which exceeded the resource limit.

M1430.103 SSI RECIPIENTS

A. Introduction

This section provides information about SSI recipients who are admitted to medical facilities.

B. Unmarried SSI Recipient

When an unmarried Medicaid-eligible SSI recipient enters a facility for LTC, review his/her Medicaid eligibility, especially institutional status, asset transfer and home property ownership.

1. Temporary Period

An SSI recipient who is admitted to a medical facility temporarily, for 3 months or less, retains his/her usual monthly SSI payment and remains eligible for Medicaid if resources are within Medicaid limits. This "temporary" SSI payment is not counted available for patient pay. See M1470.

2. Indefinite Period

If not admitted temporarily, or when the 3-month temporary period ends, the SSI income limit is reduced to \$30 per month. If the individual has no other countable income, his SSI payment will usually be \$30 per month. If he has countable income of \$30 or more, his SSI payment will terminate.

Review his income eligibility when the SSI payment terminates. See M1460.

C. Married SSI Recipient

When a married Medicaid-eligible SSI recipient enters a facility for LTC, review his/her Medicaid eligibility, especially institutional status, asset transfer and resources. Use the married institutionalized individuals' policy in M1480 to determine resource eligibility and patient pay.

1. Temporary Period

An SSI recipient who is admitted to a medical facility temporarily, for 3 months or less, usually retains his/her usual monthly SSI payment and remains eligible for Medicaid if resources are within Medicaid limits. This "temporary" SSI payment is not counted available for patient pay. See M1470.

2. Indefinite Period

If not admitted temporarily, or when the 3-month temporary period ends, the SSI income limit is reduced to \$30 per month. If the individual has no other countable income, his SSI payment will usually be \$30 per month. If he has countable income of \$30 or more, his SSI payment will terminate. Review his income eligibility when the SSI payment terminates. See M1460.

M1440.000 COMMUNITY-BASED CARE WAIVER SERVICES

M1440.001 GOVERNING LAWS

A. Introduction

This subchapter provides information about the Medicaid Community-Based Care (CBC) waivers, the individuals eligible for waiver services, and information about the services provided in the waivers.

B. Community-Based Care Waiver Services (CBC)

Community-Based Care Waiver Services or Home and Community-Based Care or CBC are titles that are used interchangeably. These terms are used to mean a variety of in-home and community-based services reimbursed by DMAS that are authorized under a Section 1915(c) waiver designed to offer individuals an alternative to institutionalization in a medical facility. Individuals may be preauthorized to receive one or more of these services either solely or in combination, based on the documented need for the service or services to avoid nursing facility placement.

C. Federal Law

Section 1915 of the Social Security Act has provisions which allow states to waive certain requirements of Title XIX as a cost saving measure. Virginia uses 1915(c) which allows the state to provide services not otherwise available under the State Plan to specifically targeted individuals. Individuals who may be targeted are those which it (the state) can show would require the level of care provided in a hospital or a nursing facility or intermediate care facility for the *intellectually disabled*, the cost of which would be reimbursed under the State plan.

Under a 1915(c) waiver, the state may waive the requirements of Section 1902 of Title XIX, related to state wideness and comparability of services, and may apply the institutional deeming income and resource rules for home and community-based recipients. This allows individuals with catastrophic medical needs to retain income for their maintenance in the home.

Any waiver granted under Section 1915(c) must satisfy requirements established by the Secretary regarding cost-effectiveness (the cost to Medicaid of home and community-based services for recipients must not exceed 100% of the cost to Medicaid for their institutional care), the necessary safeguards taken to protect the health and welfare of individuals, financial accountability, evaluations and periodic re-evaluations of the need for an institutional level of care, the impact of the waiver and recipient choice informing procedure.

D. Virginia's Waivers

Virginia has approved Section 1915(c) home and community-based waivers. These waivers contain services that are otherwise not available to the general Medicaid population. The target population and service configuration for each waiver is outlined in this subchapter.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.010	Page 2

M1440.010 BASIC ELIGIBILITY REQUIREMENTS

A. Introduction

Services provided through the Waivers can be covered by Medicaid when the applicant or recipient meets the Medicaid eligibility requirements in this section.

B. Waiver Requirements

The individual must meet the pre-admission screening criteria for CBC waiver services and the targeted population group requirement. Some of the targeted population groups are:

- individuals age 65 or older, blind or disabled
- individuals with *intellectual disabilities*
- individuals who need a medical device to compensate for loss of a vital bodily function
- individuals with developmental disabilities.

The eligibility worker does NOT make the determination of whether the individual meets the waiver requirements; this is determined by the pre-admission screener or by DMAS.

NOTE: The individual cannot be authorized to receive services under more than one waiver at a time.

C. Non-financial Eligibility

The individual must meet the Medicaid non-financial and financial eligibility requirements listed below:

1. Citizenship/ Alienage

The citizenship and alien status policy is found in subchapter M0220.

2. Virginia Residency

The Virginia state resident policy specific to CBC waiver services patients is found in subchapter M0230.

3. Social Security Number

The social security number policy is found in subchapter M0240.

4. Assignment of Rights/ Cooperation

The assignment of rights and support cooperation policy is found in subchapters M0250 and M0260.

5. Application for Other Benefits

The application for other benefits policy is found in subchapter M0270.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.100	Page 3

6. Institutional Status

To be eligible for Medicaid, an individual approved for CBC waiver services must meet the institutional status requirement. A CBC waiver services recipient usually is not in a medical institution; most CBC recipients live in a private residence in the community. However, an individual who resides in a residential facility such as an assisted living facility (ALF) may be eligible for some CBC waiver services. The institutional status requirements applicable to CBC waiver services recipients are in subchapter M0280.

7. Covered Group

The requirements for the covered groups are found in subchapters M0320 and M0330.

D. Financial Eligibility

An individual who has been screened and approved for CBC services is treated as an institutionalized individual for the Medicaid eligibility determination. Financial eligibility is determined as a one-person assistance unit separated from his legally responsible relative(s) with whom he lives.

If the individual is treated as an institutionalized individual and eligibility is established prior to the begin date of services, the individual has 30 days from the date on the Notice of Action to begin receiving CBC services.

For unmarried individuals, and for married individuals without community spouses *other than MAGI Adults*, the resource and income eligibility criteria in subchapter M1460 is applicable.

MAGI Adults in LTC are evaluated using the resource policy in M1460 the MAGI income policy in M04. Only certain resource eligibility requirements are applicable to individuals in the Modified Adjusted Gross Income (MAGI) Adult covered group who are institutionalized.

For married individuals with community spouses, *other than MAGI Adults*, the resource and income eligibility criteria in subchapter M1480 is applicable.

The asset transfer policy in M1450 applies to all CBC waiver services recipients.

M1440.100 CBC WAIVER DESCRIPTIONS

A. Introduction

This section provides a brief overview of the Medicaid CBC waivers. The overview is a synopsis of the target populations, basic eligibility rules, available services, and the assessment and service authorization procedure for each waiver.

The eligibility worker does not make the determination of whether the individual is eligible for the waiver services; this is determined by the pre-admission screener or by DMAS. The policy in the following sections is only for the eligibility worker's information to better understand the CBC waiver services.

B. Definitions

Term definitions used in this section are:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.101	Page 4

1. Developmental Disability

"Developmental disability," as defined in Virginia Code § 37.2-100, means a severe, chronic disability of an individual that (i) is attributable to a mental or physical impairment, or a combination of mental and physical impairments, other than a sole diagnosis of mental illness; (ii) is manifested before the individual reaches 22 years of age; (iii) is likely to continue indefinitely; (iv) results in substantial functional limitations in three or more of the following areas of major life activity: self-care, receptive and expressive language, learning, mobility, self-direction, capacity for independent living, or economic self-sufficiency; (v) reflects the individual's need for a combination and sequence of special interdisciplinary or generic services, individualized supports, or other forms of assistance that are of lifelong or extended duration and are individually planned and coordinated; and (vi) an individual from birth to age nine, inclusive, who has a substantial developmental delay or specific congenital or acquired condition, may be considered to have a developmental disability without meeting three or more of the criteria described in clauses (i) through (v), if the individual, without services and supports, has a high probability of meeting those criteria later in life.

2. Financial Eligibility Criteria

means the rules regarding asset transfers; what is a resource; when and how that resource counts; what is income; when and how that income is considered.

3. Non-financial Eligibility Criteria

means the Medicaid rules for non-financial eligibility. These are the rules for citizenship and alienage; state residence; social security number; assignment of rights and cooperation; application for other benefits; institutional status; cooperation DCSE; and covered group and category requirements.

4. Patient

an individual who has been approved by a pre-admission screener to receive Medicaid waiver services.

C. Developmental Disabilities Waivers

In 2016, as part of the My Life, My Community Waiver Redesign, the Intellectual Disabilities Waiver, Day Support Waiver and Individual and Family Developmental Disabilities Support Waiver (DD waiver) were renamed. They were renamed to the Community Living Waiver, Building Independence Waiver, and Family and Individual Supports Waivers, respectively. These waivers are referred to collectively as the Developmental Disabilities Waivers. The services offered under these waivers are contained in M1440, Appendix 1.

M1440.101 COMMONWEALTH COORDINATED CARE PLUS WAIVER (FORMERLY THE EDCD AND TECHNOLOGY ASSISTED WAIVERS)

A. General Description

Effective July 1, 2017, the Elderly or Disabled with Consumer-Direction (EDCD) Waiver and the Technology Assisted (Tech) Waiver were combined and are known as the Commonwealth Coordinated Care (CCC) Plus Waiver. The CCC Plus Waiver is targeted to provide home and community-based services to individuals *who are* age 65 or older or disabled, *or* who have been determined to require the level of care provided in a medical institution and are at risk of facility placement. The waiver also serves "technology-assisted"

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.101	Page 5

individuals who are chronically ill or severely impaired and who need both a medical device to compensate for the loss of a vital body function, as well as substantial and ongoing skilled nursing care to avert death or further disability.

Recipients may select agency-directed services, consumer-directed services, or a combination of the two. Under consumer-directed services, supervision of the personal care aide is provided directly by the recipient. Individuals who are incapable of directing their own care may have a spouse, parent, adult child, or guardian direct the care on behalf of the recipient. Consumer-directed services are monitored by a Service Facilitator.

B. Targeted Population

This waiver serves persons who are:

- a. age 65 and over, or
- b. disabled; disability may be established either by SSA, DDS, or a pre-admission screener (provided the individual meets a Medicaid covered group and another category).

Waiver services are provided to any individual who meets a Medicaid covered group and is determined to need an institutional level of care by a pre-admission screening. The individual does not have to meet the Medicaid disability definition.

Technology assisted services are provided to individuals who need both
1) a medical device to compensate for the loss of a vital body function and
2) substantial and ongoing skilled nursing care.

C. Eligibility Rules

All individuals receiving waiver services must meet the Medicaid non-financial and financial eligibility requirements for an eligible patient in a medical institution. The income limit used for this waiver is 300% of the current SSI payment standard for one person, or the medically needy income limit (spenddown).

The resource and income rules are applied to waiver-eligible patients as if the patients were in a medical institution.

NOTE: CCC Plus Waiver services shall not be offered to any patient who resides in a nursing facility, an intermediate care facility for the intellectually disabled (ICF/ID), a hospital, board and care facility, or an adult care residence licensed by DSS.

Individuals needing technology-assisted services must have a live-in primary care giver who accepts responsibility for the individual's health and welfare.

D. Services Available

LTC services available through this waiver include:

- adult day health care
- agency-directed and consumer-directed personal care
- agency-directed respite care (including skilled respite) and consumer-directed respite care
- Personal Emergency Response System (PERS).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.102	Page 6

- private duty nursing
- nutritional supplements
- medical supplies and equipment not otherwise available under the Medicaid State Plan.

- E. Assessment and Service Authorization** The nursing home pre-admission screeners assess and authorize CCC Plus Waiver services based on a determination that the individual is at risk of nursing facility placement.

M1440.102 COMMUNITY LIVING WAIVER

- A. General Description** The Community Living Waiver program, formerly the Intellectual Disabilities (ID) Waiver, is targeted to provide home and community-based services to individuals with developmental disabilities and individuals under the age of six years at developmental risk who have been determined to require the level of care provided in an ICF/ID.

- B. Eligibility Rules** All patients receiving waiver services must meet the non-financial and financial Medicaid eligibility criteria and be Medicaid-eligible in a medical institution. The resource and income rules are applied to waiver eligible individuals as if the individual were residing in a medical institution.

The income limit used for this waiver is 300% of the current SSI payment standard for one person. **Medically Needy individuals are not eligible for this waiver.** If the individual's income exceeds 300% SSI, the individual is not eligible for services under this waiver.

- C. Services Available** The services available under the Community Living Waiver are included in M1440, Appendix 1.

- D. Assessment and Service Authorization** The individual's need for CBC is determined by the Community Services Board (CSB), Behavioral Health Authority (BHA) or Department for Aging and Rehabilitative Services (DARS) case manager after completion of a comprehensive assessment.

All recommendations are submitted to Department of Behavioral Health and Developmental Services (DBHDS) or DMAS staff for final authorization.

- 1. CSB** The CSB/BHA support coordinator/case manager may only recommend waiver services if:

- the individual is found Medicaid eligible; and
- the individual is intellectually disabled, or is under age 6 and at developmental risk; and
- the individual is not an inpatient of a nursing facility or hospital.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.104	Page 7

2. DARS

The DARS case manager may only recommend waiver services if:

- the individual is found Medicaid eligible, and
- the individual is in a nursing facility and has a related condition such as defined in the federal Medicaid regulations.

M1440.103 BUILDING INDEPENDENCE WAIVER**A. General Description**

The Building Independence Waiver, formerly the Day Support (DS) Waiver, is targeted to provide home and community-based services to individuals with developmental disabilities who have been determined to require the level of care provided in an ICF/ID. These individuals may reside in an ICF/ID or may be in the community at the time of the assessment for Building Independence Waiver services.

B. Eligibility Rules

All patients receiving waiver services must meet the non-financial and financial Medicaid eligibility criteria and be Medicaid-eligible in a medical institution. The resource and income rules are applied to waiver eligible individuals as if the individual were residing in a medical institution.

The income limit used for this waiver is 300% of the current SSI payment standard for one person. **Medically needy individuals are not eligible for this waiver.** If the individual's income exceeds 300% SSI, the individual is not eligible for services under this waiver.

C. Services Available

The services available under the Building Independence Waiver are included in M1440, Appendix 1.

D. Assessment and Service Authorization

The individual's need for CBC is determined by the CSB, BHA or DBHDS support coordinator/case manager after completion of a comprehensive assessment. All recommendations are submitted to DBHDS staff for final authorization.

M1440.104 ALZHEIMER'S ASSISTED LIVING WAIVER**A. General Description**

The Alzheimer's Assisted Living (AAL) Waiver is available only to individuals who are Auxiliary Grants (AG) recipients. The AAL Waiver allows for the provision of services to individuals in approved assisted living facilities who, without the waiver, might require nursing home placement. **Individuals on this waiver do not have Medicaid eligibility determined as institutionalized individuals, and there are no post-eligibility requirements.**

The AAL waiver serves persons who are:

- Auxiliary Grants (AG) recipients,
- have a diagnosis of Alzheimer's or a related dementia and no diagnosis of mental illness or intellectual disability, and
- age 55 or older.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.105	Page 8

- B. Eligibility Rules** Individuals in the AAL Waiver have Medicaid eligibility determined in the AG covered group (see M0320.202) and do not have Medicaid eligibility determined as institutionalized individuals. There are no post-eligibility requirements.
- The enrollment and notification procedures used with non-institutionalized Medicaid recipients are followed (see M0130.300).
- C. Services Available** Services available under the AAL waiver are:
- assistance with activities of daily living
 - medication administration by licensed professionals
 - nursing services for assessments and evaluations
 - therapeutic social and recreational programming which provides daily activities for individuals with dementia.
- D. Assessment and Service Authorization** Local and hospital screening committees or teams are authorized to screen individuals for the AAL waiver; however, a copy of the pre-admission screening is not required for the Medicaid eligibility record.

M1440.105 FAMILY AND INDIVIDUAL SUPPORTS WAIVER

- A. General Description** The Family and Individual Supports Waiver, formerly the Individual and Family Developmental Disabilities Support Waiver (DD waiver), provides home and community-based services to individuals with developmental disabilities, who do not have a diagnosis of developmental disability. The objective of the waiver is to provide medically appropriate and cost-effective coverage of services necessary to maintain these individuals in the community and prevent placement in a medical institution.
- B. Eligibility Rules** All patients receiving waiver services must meet the non-financial and financial Medicaid eligibility criteria and be Medicaid eligible in a medical institution. The resource and income rules are applied to waiver eligible individuals as if the individuals were residing in a medical institution.
- The income limit used for this waiver is 300% of the SSI limit (see M0810.002 A. 3.). **Medically Needy individuals are not eligible for this waiver.** If the individual's income exceeds 300% SSI, the individual is not eligible for services under this waiver.
- C. Services Available** The services available under the Family and Individual Supports Waiver are included in M1440, Appendix 1.
- D. Assessment and Service Authorization** The individual's need for CBC is determined by the CSB, BHA or DBHDS support coordinator/case manager after completion of a comprehensive assessment. All recommendations are submitted to DBHDS staff for final authorization.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.106	Page 9

M1440.106 PROGRAM OF ALL-INCLUSIVE CARE FOR THE ELDERLY (PACE)

A. General Description

PACE is NOT a CBC Waiver, but rather is the State's community model for the integration of acute and long-term care. PACE combines Medicaid and Medicare funding. PACE provides the entire spectrum of acute and long-term care services to enrollees without limitations on the duration of services or the dollars spent and is centered on an adult day health care model.

B. Targeted Population

PACE serves individuals aged 55 and older who (1) meet the nursing facility level of care criteria and (2) reside in their own communities. PACE provides all of their health care and long-term care medical needs. Individuals who meet the criteria for the *CCC Plus* Waiver may be enrolled in PACE in lieu of the *CCC Plus* Waiver.

C. Eligibility Rules

For Medicaid to cover PACE services, the individual must meet the non-financial and financial Medicaid eligibility criteria and be Medicaid eligible in a medical institution. The resource and income rules are applied to PACE-eligible individuals as if the individuals were residing in a medical institution.

The income limit used for PACE is 300% of the SSI limit (see M0810.002 A. 3.) or the MN income limit and spenddown.

PACE is not available to individuals who reside in an assisted living facility (ALF) and receive Auxiliary Grant (AG) payments. Individuals who reside in an ALF may be enrolled in PACE if they meet the functional, medical/nursing, and financial requirements, but they will not be permitted to receive an AG payment.

D. Services Available

The following services are provided through PACE:

- adult day care that offers nursing, physical, occupational, speech and recreational therapies;
- meals and nutritional counseling; social services;
- medical care provided by a PACE physician; personal care and home health care;
- all necessary prescription drugs;
- access to medical specialists such as dentists, optometrists and podiatrists; respite care;
- hospital and nursing facility care when necessary; and
- transportation.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.201	Page 10

E. Assessment and Service Authorization

Participation in PACE is **voluntary**. The nursing home pre-admission screening team will advise the individual of the availability of PACE and will facilitate enrollment if the Medicaid enrollee chooses PACE. The PACE team is responsible for authorizing as well as providing the services.

Eligibility for PACE must begin on the first day of a month and end on the last day of a month.

M1440.200 COVERED SERVICES

A. Introduction

This section provides general information regarding the LTC services provided under the waivers. This is just for your information, understanding, and referral purposes. The information does not impact the Medicaid eligibility decision.

Note: Services covered under the Building Independence, Community Living and Family and Individual Supports Waivers are described separately in M1440, Appendix 3.

B. Waiver Services Information

Information about the services available under a waiver is contained in the following sections:

- M1440.201 Personal Care/Respite Care Services
- M1440.202 Adult Day Health Services
- M1440.203 Private Duty Nursing Services
- M1440.204 Nutritional Supplements
- M1440.205 Personal Emergency Response System (PERS)

M1440.201 PERSONAL CARE/RESPITE CARE SERVICES

A. What Are Personal Care Services

Personal Care services are defined as long term maintenance or support services which are necessary in order to enable the individual to remain at home rather than enter an institution. Personal Care services provide eligible individuals with aides who perform basic health-related services, such as helping with ambulation/exercises, assisting with normally self-administered medications, reporting changes in the recipient's conditions and needs, and providing household services essential to health in the home.

B. What are Respite Care Services

Respite Care services are defined as services specifically designed to provide temporary but periodic or routine relief to the primary caregiver of an individual who is incapacitated or dependent due to frailty or physical disability. To receive this service the individual must meet the same criteria as the individual who is authorized for Personal Care, but the focus in Respite Care is on the needs of the caregiver for temporary relief. This focus on the caregiver differentiates Respite Care from programs which focus on the dependent or disabled care receiver.

C. Relationship to Other Services

An individual may receive Personal Care or Respite Care in conjunction with Adult Day Health Care services as needed.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.203	Page 11

When an individual receives Hospice services, the hospice is required to provide the first 21 hours per week of personal care needed and a maximum of an additional 38.5 hours per week.

- D. Who May Receive the Service** An individual must meet the criteria of the *CCC Plus* Waiver to qualify for Personal/Respite Care services.

M1440.202 ADULT DAY HEALTH CARE SERVICES

- A. What Is Adult Day Health Care** Adult Day Health Care (ADHC) is a congregate service setting where individuals receive assistance with activities of daily living (e.g., ambulating, transfers, toileting, eating/feeding), oversight of medical conditions, administration of medications, a meal, care coordination including referrals to rehabilitation or other services if needed, and recreation/social activities. A person may attend half or whole days, and from one to seven days a week, depending on the patient's capability, preferences, and available support system.

- B. Relationship to Other Services** ADHC centers may provide transportation and individuals may receive this service, if needed, to enable their attendance at the center. An individual may receive ADHC services in conjunction with Personal Care or Respite Care services as needed.

- C. Who May Receive the Service** An individual must meet the criteria of the *CCC Plus* Waiver to qualify for ADHC services.

M1440.203 PRIVATE DUTY NURSING SERVICES

- A. What is Private Duty Nursing** Private Duty Nursing services are called "nursing services" in the ID/MR waiver. These services are offered to medically fragile patients who require substantial skilled nursing care. Patients receive nursing services from Registered Nurses or Licensed Practical Nurses. Services are offered as needed by the patient, but always exceed what is available through the Home Health program.

For example, in the CCC Plus Waiver, most technology-assisted patients receive 8 hours or more of continuous nursing services at least four times per week.

- B. Relationship to Other Services** There are no requirements that other waiver services be or not be received.

- C. Who May Receive the Service** An individual must meet the *CCC Plus* Waiver technology-assisted criteria for nursing services. A Medicaid recipient who qualifies under EPSDT (Early & Periodic Screening, Diagnosis & Treatment) to receive private duty nursing services may also receive private duty nursing.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with M1440.205	Page 12

M1440.204 NUTRITIONAL SUPPLEMENTS

Nutritional Supplements (enteral nutrition products) are provided through DME (durable medical equipment) providers for patients who have an identified nutritional risk. Nutritional supplements are ordered by the individual's physician to cover a six-month period and Medicaid payment is authorized by the pre-admission screener or DMAS.

M1440.205 PERSONAL EMERGENCY RESPONSE SYSTEM (PERS)

A. What is PERS

PERS is an electronic device that enables certain recipients who are at high risk of institutionalization to secure help in an emergency through the use of a two-way voice communication system that dials a 24-hour response or monitoring center upon activation and via the recipient's home telephone line. PERS may include medication monitoring to remind certain recipients at high risk of institutionalization to take their medications at the correct dosages and times.

B. Relationship to Other Services

An individual may receive PERS services in conjunction with agency-directed or consumer-directed Personal Care or Respite Care services.

C. Who May Receive the Service

PERS is available only to *CCC Plus* Waiver recipients who live alone or are alone for significant parts of the day, who have no regular caregiver for extended periods of time, and who would otherwise require extensive routine supervision.

Developmental Disabilities Waivers – Services and Support Options - Effective June 30, 2016

(BI = Building Independence Waiver; FI = Family & Individual Supports Waiver; CL = Community Living Waiver)

	BI	FI	CL	Description
Employment and Day Options				
Individual Supported Employment	✓	✓	✓	Individual Supported Employment services are provided one-on-one by a job coach to an individual in an integrated employment or self-employment situation at or above minimum wage in a job that meets personal and career goals.
Group Supported Employment	✓	✓	✓	Group Supported Employment services are continuous support provided in regular business, industry and community settings to groups of two to eight individuals with disabilities and involves interactions with the public and with co-workers without disabilities.
Workplace Assistance Services		✓	✓	Workplace Assistance services are provided to someone who has completed job development and completed or nearly completed job placement training but requires more than typical job coach services to maintain stabilization in their employment. Workplace Assistance services are supplementary to job coach services; the job coach still provides professional oversight and coaching.
Community Engagement	✓	✓	✓	Community Engagement Services are provided in groups of no more than one staff to three individuals. Community Engagement fosters the ability of the individual to acquire, retain, or improve skills necessary to build positive social behavior, interpersonal competence, greater independence, employability and personal choice necessary to access typical activities in community life such as those chosen by the general population. These may include community education or training, retirement, and volunteer activities.
Community Coaching	✓	✓	✓	Community Coaching is a service designed for individuals who need one to one support in order build a specific skill or set of skills to address a particular barrier(s) preventing a person from participating in activities of Community Engagement.
Group Day Services	✓	✓	✓	Group Day Services are provided in groups of no more than one staff to seven individuals. They provide opportunities for peer interactions, community integration, career planning and enhancement of social networks. Supports may also be provided to ensure an individual's health and safety.
Self-Directed Options (*can also be agency-directed)				
Consumer-Directed Services Facilitation		✓	✓	Services Facilitation assists the individual or the individual's family/caregiver, or Employer of Record (EOR), as appropriate, in arranging for, directing, and managing services provided through the consumer-directed model of service delivery.
CD Personal Assistance Services*		✓	✓	Personal assistance services include support with activities of daily living, instrumental activities of daily living, access to the community, monitoring of self-administered medications or other medical needs, monitoring of health status and physical condition, and work-related personal assistance.
CD Respite*		✓	✓	Respite services are specifically designed to provide temporary, substitute care for that which is normally provided by the family or other unpaid, primary caregiver of an individual. Services are provided on a short-term basis because of the emergency absence or need for routine or periodic relief of the primary caregiver.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with Appendix 1	Page 2

	BI	FI	CL	Description
CD Companion*		✓	✓	Companion services provide nonmedical care, socialization, or support to adults, ages 18 and older. This service is provided in an individual's home or at various locations in the community.
Residential Options				
Independent Living Supports	✓			Independent Living Supports are provided to adults (18 and older) that offers skill building and support to secure a self-sustaining, independent living situation in the community and/or may provide the support necessary to maintain those skills.
Shared Living	✓	✓	✓	Shared Living is Medicaid payment for a portion of the total cost of rent, food, and utilities that can be reasonably attributed to a person who has no legal responsibility to support the individual and resides in the same household as the individual. Parents and spouses are excluded.
Supported Living		✓	✓	Supported Living services take place in an apartment/house setting operated by a DBHDS licensed provider and provides 'round the clock availability of staff services performed by paid staff who have the ability to respond in a timely manner. These supports enable an individual to acquire, retain, or improve skills necessary to reside successfully in their home and community.
In-home Support Services		✓	✓	In-Home Support services are residential services that take place in the individual's home, family home, or community settings and typically supplement the primary care provided by the individual, family or other unpaid caregiver. Services are designed to ensure the health, safety and welfare of the individual.
Sponsored Residential			✓	Sponsored Residential Services take place in a licensed or DBHDS authorized sponsored residential home with no more than two individuals are supported. They consist of supports that enable an individual to acquire, retain, or improve the self-help, socialization, and adaptive skills necessary to reside successfully in their home and
Group Home Residential			✓	Group Home Residential services are provided across 24 hours primarily in a licensed or approved residence that enables an individual to acquire, retain, or improve the self-help, socialization, and adaptive skills necessary to reside successfully in their home and community.
Crisis Support Options				
Community-Based Crisis Supports	✓	✓	✓	Community-based crisis supports are supports to individuals who may have a history of multiple psychiatric hospitalizations; frequent medication changes; enhanced staffing required due to mental health or behavioral concerns; and/or frequent setting changes. Supports are provided in the individual's home and community setting. Crisis staff work directly with and assist the individual and their current support provider or family. These services provide temporary intensive supports that avert emergency psychiatric hospitalization or institutional placement or prevent other out-of-home placement.
Center-based Crisis Supports	✓	✓	✓	Center-based crisis supports provide long term crisis prevention and stabilization in a residential setting (Crisis Therapeutic Home) through utilization of assessments, close monitoring, and a therapeutic milieu. Services are provided through planned and emergency admissions. Planned admissions will be provided to individuals who are receiving ongoing crisis services and need temporary, therapeutic interventions outside of their home setting in order to maintain stability. Crisis stabilization admissions will be provided to individuals who are experiencing an identified behavioral health need and/or a behavioral challenge that is preventing them from experiencing stability within their home setting.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with Appendix 1	Page 3

	BI	FI	CL	Description
Crisis Support Services	✓	✓	✓	Crisis support services provide intensive supports by appropriately trained staff in the area of crisis prevention, crisis intervention, and crisis stabilization to an individual who may experience an episodic behavioral or psychiatric crisis in the community which has the potential to jeopardize their current community living situation. This service shall be designed to stabilize the individual and strengthen the current living situation so the individual can be supported in the community during and beyond the crisis period.
Medical and Behavioral Support Options				
Skilled Nursing		✓	✓	Skilled Nursing is part-time or intermittent care that may be provided concurrently with other services due to the medical nature of the supports provided. These medical services that are ordered by a physician, nurse practitioner or physician assistant and that are not otherwise available under the State Plan for Medical Assistance.
Private Duty Nursing		✓	✓	Private Duty Nursing is individual and continuous care (in contrast to part-time or intermittent care) for individuals with a medical condition and/or complex health care need, certified by a physician, nurse practitioner, or physician assistant as medically necessary to enable the individual to remain at home, rather than in a hospital, nursing facility or Intermediate Care Facility for Individuals with Intellectual Disability (ICF-ID).
Therapeutic Consultation		✓	✓	Therapeutic consultation services are designed to assist the individual and the individual's family/caregiver, as appropriate, with assessments, plan design, and teaching for the purpose of assisting the individual enrolled in the waiver. This service provides expertise, training, and technical assistance in any of the following specialty areas to assist family members, caregivers, and other service providers in supporting the individual. The specialty areas are: (i) psychology, (ii) behavioral consultation, (iii) therapeutic recreation, (iv) speech and language pathology, (v) occupational therapy, (vi) physical therapy, and (vii) rehabilitation engineering.
Personal Emergency Response System (PERS)	✓	✓	✓	PERS is a service that monitors individual's safety in their homes, and provides access to emergency assistance for medical or environmental emergencies through the provision of a two-way voice communication system that dials a 24-hour response or monitoring center upon activation and via the individuals' home telephone system. While medication- monitoring services are also available, medication-monitoring units must be physician ordered and are not a stand-alone service.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2018
Subchapter Subject M1440 COMMUNITY-BASED CARE WAIVER SERVICES	Page ending with Appendix 1	Page 4

	BI	FI	CL	Description
Additional Options				
Assistive Technology	✓	✓	✓	Assistive technology is specialized medical equipment, supplies, devices, controls, and appliances, not available under the State Plan for Medical Assistance, which enable individuals to increase their abilities to perform activities of daily living (ADLs), or to perceive, control, or communicate with the environment in which they live, or which are necessary for life support, including the ancillary supplies and equipment necessary to the proper functioning of such technology.
Electronic Home-Based Services	✓	✓	✓	Electronic Home-Based Services are goods and services based on Smart Home© technology. This includes purchases of electronic devices, software, services, and supplies not otherwise provided through this waiver or through the State Plan, that would allow individuals to access technology that can be used in the individual's residence to support greater independence and self-determination.).
Environmental Modifications	✓	✓	✓	Environmental modifications physical adaptations to the individual's primary home, primary vehicle, or work site that are necessary to ensure the health and welfare of the individual, or that enable the individual to function with greater independence.
Individual and Family/Caregiver Training		✓		Training and counseling to individuals, families and caregivers to improve supports or educate the individual to gain a better understanding of his/her disability or increase his/her self-determination/self-advocacy abilities.
Transition Services	✓	✓	✓	Transition services are nonrecurring set-up expenses for individuals who are transitioning from an institution or licensed or certified provider- operated living arrangement to a living arrangement in a private residence where the person is directly responsible for his or her own living expenses.

M1450.000 TRANSFER OF ASSETS

M1450.001 OVERVIEW

A. Introduction

Individuals who are eligible for Medicaid may NOT be eligible for Medicaid payment of long-term care (LTC) services, *also referred to as long-term services and supports (LTSS)*, for a specific period of time (penalty period) if they or their spouses have transferred assets for less than fair market value without receiving adequate compensation. The asset transfer policy applies to all individuals in all types of *LTSS: facility based and community based care (CBC)*, *also referred to as home and community based services (HCBS)*.

B. Policy

The EW must evaluate an asset transfer according to the instructions found in the sections below. The applicable policy rules depend on

- when the transfer occurred;
- who transferred the asset;
- to whom the asset was transferred;
- what was transferred.

Information must be obtained from all Medicaid applicants and recipients who require LTC services about transfers of both income and resources that occurred during the **five years** before the Medicaid application date. Whether the transfer will affect LTC services eligibility depends on:

- the date the transfer occurred,
- to whom the asset was transferred,
- the type of asset that was transferred,
- the reason for the transfer,
- the value of the transferred asset
- the amount of compensation received.

M1450.002 LEGAL BASE

A. Public Law 96-611

This federal law established a transfer of property eligibility rule for the SSI program and also permitted states to adopt a transfer eligibility rule for their Medicaid programs which could be, in certain respects, more restrictive than in SSI or the money payment programs. The rule adopted by Virginia was more restrictive than the SSI rule.

B. Public Law 100-360

Public law 100-360 (The Medicare Catastrophic Coverage Act), enacted on July 1, 1988, changed the federal Medicaid law relating to property transfers. Further revisions were made by the Family Support Act of 1988 (Welfare Reform) Public Law 100-485, enacted on October 13, 1988.

C. Public Law 103-66 (OBRA)

Section 13611 of this federal law, enacted on August 10, 1993, revised transfer provisions for the Medicaid Program. It amended section 1917 of the Social Security Act by incorporating in section 1917 new requirements for asset transfers and for trusts.

D. Public Law 109-171 (DRA)

The Deficit Reduction Act (DRA) of 2005, enacted on February 8, 2006, further revised asset transfer provisions for the Medicaid program.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.003	Page 2

E. The Code of Virginia

Virginia state law governing the Department of Medical Assistance Services (DMAS) and the Medicaid program in Virginia is contained in sections 32.1-323 through 32.1-330. It includes a definition of assets, and it states that an asset transfer includes a disclaimer of interest(s) in assets.

Section 20-88.01 empowers DMAS to request a court order requiring the transferees of property to reimburse Medicaid for expenses Medicaid paid on behalf of recipients who transferred property.

F. 2018 Appropriations Act

The 2018 Appropriations Act provided funding for New Health Coverage Options for Virginia Adults. Effective January 1, 2019, determination of eligibility for adults between the ages of 19-64 without Medicare will be evaluated using MAGI income methodology. Adults eligible under the expansion of coverage will be referred to as Modified Adjusted Gross Income (MAGI) Adults.

*Individuals in the MAGI Adults covered group are not subject to a resource test unless the individual requests Medicaid payment for LTC/LTSS. The resource and home equity requirements for MAGI Adults are contained in M1460. **The asset transfer policy contained in this subchapter IS fully applicable to the MAGI Adults who are seeking Medicaid payment of LTC services.***

M1450.003 DEFINITION OF TERMS

A. Adequate Compensation

For purposes of asset transfer, an individual is considered to have received “adequate compensation” for an asset when the fair market value of the asset or greater has been received.

B. Assets

For the purposes of asset transfer, assets are all income and resources of the individual and the individual’s spouse, including any income and resources to which the individual or the spouse is entitled but does not receive because of an action by:

- the individual or the spouse,
- any person, including a court or administrative body, with legal authority to act in the place of or on behalf of the individual or spouse, or
- a person, including a court or administrative body, acting at the direction or request of the individual or spouse.

The term “asset” may also include:

- life estate (life rights) in another individual’s home, and
- the funds used to purchase a promissory note, loan, or mortgage.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.003	Page 2a

C. Asset Transfer

An **asset transfer** is any action by an individual or other person that reduces or eliminates the individual's ownership or control of an asset(s). Transfers include:

- giving away or selling property
- disclaiming an inheritance or not asserting inheritance rights in court
- clauses in trusts that stop payments to the individual
- putting money in a trust
- payments from a trust for a purpose other than benefit of the individual
- irrevocably waiving pension income
- not accepting or accessing injury settlements
- giving away income during the month it is received
- refusing to take legal action to obtain a court-ordered payment that is not being paid, such as alimony or child support
- placement of lien or judgment against individual's property when not an "arm's length" transaction (see below)
- other similar actions.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2010
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.003	Page 3

When the placement of a lien or a judgment against an individual's asset is not an "arm's length" transaction, it is an uncompensated transfer of assets. An arm's length transaction, as defined by Black's Law Dictionary, is a transaction negotiated by **unrelated** parties, each acting in his or her own self interest. When an individual's relative has a lien or judgment against the individual's property, the lien or judgment is an asset transfer that must be evaluated.

D. Baseline Date

The **baseline date** is the first date as of which the individual was both

- an institutionalized individual (as defined below) AND
- a Virginia Medicaid applicant.

When an individual is already a Medicaid recipient and becomes institutionalized, the baseline date is the first day of institutionalization.

E. Fair Market Value

Fair market value (FMV) is an estimate of an asset's value if it were sold at the prevailing price at the time it was actually transferred. Value is based on criteria used in determining the value of assets for the purpose of determining Medicaid eligibility.

NOTE: For an asset to be considered transferred for fair market value, or to be considered to be transferred for valuable consideration, the compensation received for the asset must be in tangible form with intrinsic value. A transfer for love and affection is not considered a transfer for fair market value.

Also, while relatives and family members legitimately can be paid for care they provide to the individual, it is presumed that services provided for free at the time were intended to be provided without compensation. Thus, a transfer to a relative for care provided for free in the past is a transfer of assets for less than fair market value. However, an individual can rebut this presumption with tangible evidence that is acceptable. For example, the individual proves that a payback arrangement had been agreed to in writing at the time services were provided.

F. Income

Any monies received by an individual or the individual's spouse to meet the individual's basic needs for food or shelter, is **income**. See subchapter M1460 for items that are not income.

G. Institutionalized Individual

For the purposes of asset transfer, an **institutionalized individual** is:

- a person who is an inpatient in a nursing facility;
- a person who is an inpatient in a medical institution and for whom payment for care is based on a level of care provided in a nursing facility. Included are persons in long-stay hospitals (including rehabilitation hospitals and rehabilitation units of general hospitals) and patients in Virginia *Department of Behavioral Health and Developmental Services (DBHDS)* facilities who

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2018
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.003	Page 4

are housed in an area certified as a nursing facility or intermediate care facility for the *intellectually disabled*; or

- a Medicaid applicant/enrollee who has been screened and approved for or is receiving Medicaid community-based care (CBC) waiver services, services through the Program of All Inclusive Care for the Elderly (PACE) or hospice services.

H. Legally Binding Contract

Virginia law requires written contracts for the sale of goods (not services) valued over \$500, and for transactions involving real estate. Contracts for services may be oral.

To prove a contract is **legally binding**, the individual must show:

1. Parties Legally Competent

The parties to the contract were legally competent to enter into the contract. (Generally, this excludes (1) individuals declared to have mental incapacity or a diminished mental capacity and (2) children less than 18 years of age, who may not enter into a contract under Virginia law. The purpose here is to ensure that both parties knew what they were doing when they entered into the contract).

2. Valuable Consideration

“Valuable consideration” is received by each party when the “adequate compensation” requirement for the asset transfer rule is met.

3. Definite Contract Terms

Contract terms are sufficiently definite so that the contract is not void because of vagueness. Payments under contracts with immediate family members must be at reasonable rates. Those rates must be discernable from the terms of the contract. For example, it is not sufficient for a mother to agree to give her son all the stocks she owns upon her death in exchange for his agreeing to take care of her for an undefined period of time (such a contract might have to be written, depending on the value). The contract must set forth the per diem rate, specify a time period, or in some other manner establish definable and certain terms.

4. Mutual Assent

Contract terms were agreed to by mutual assent. Confirm that both parties understood and agreed upon the same specific terms of the contract when they entered into the contract.

I. Look-Back Date

The look-back date is the date that is 60 months before the first date the individual is both (a) an institutionalized individual and (b) has applied for Medicaid. The look-back date is the earliest date on which a penalty for transferring assets for less than fair market value can be imposed. Penalties can be imposed for transfers that take place on or after the look-back date. Penalties cannot be imposed for transfers that take place before the look-back date.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.003	Page 5

J. Look-back Period

The **look-back period** is the period of time that begins with the look-back date and ends with the baseline date. The look-back period is 60 months.

K. Other Person

Other person means:

- the individual's spouse or co-owner of an asset;
- a person, including a court or administrative body, with legal authority to act in place of or on behalf of the individual or the individual's spouse; and
- a person, including a court or administrative body, acting at the direction, or upon the request, of the individual or the individual's spouse.

**L. Payment
Foreclosed**

Payment to any individual from an irrevocable trust that is not for the benefit of the individual for whom the trust was created is an uncompensated transfer of assets. See M1140.404 B. 4. c. for information regarding when a trust is foreclosed.

M. Penalty Period

The **penalty period** is the period of time during which Medicaid payment for LTC services is denied because of a transfer of assets for less than market value. The length of the penalty period is based on the value of the uncompensated transfer of assets and the average cost of nursing facility care in Virginia.

**N. Property/
Resources**

“Property” and “resources” both refer to real and personal property legally available to the individual or the individual's spouse.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.004	Page 6

O. Uncompensated Value

The uncompensated value is the amount of an asset's fair market value that was not or will not be received as a result of the asset transfer.

The uncompensated value for **real property** at the time of transfer is:

- the difference between the asset's FMV and the Gross Amount Due to Seller, when the lien/other encumbrance against the asset is satisfied from the seller's proceeds, or
- the difference between the asset's equity value (FMV minus the lien) and the Gross Amount Due to Seller, when the lien is assumed by the buyer. Refer to examples in M1450.610 H.

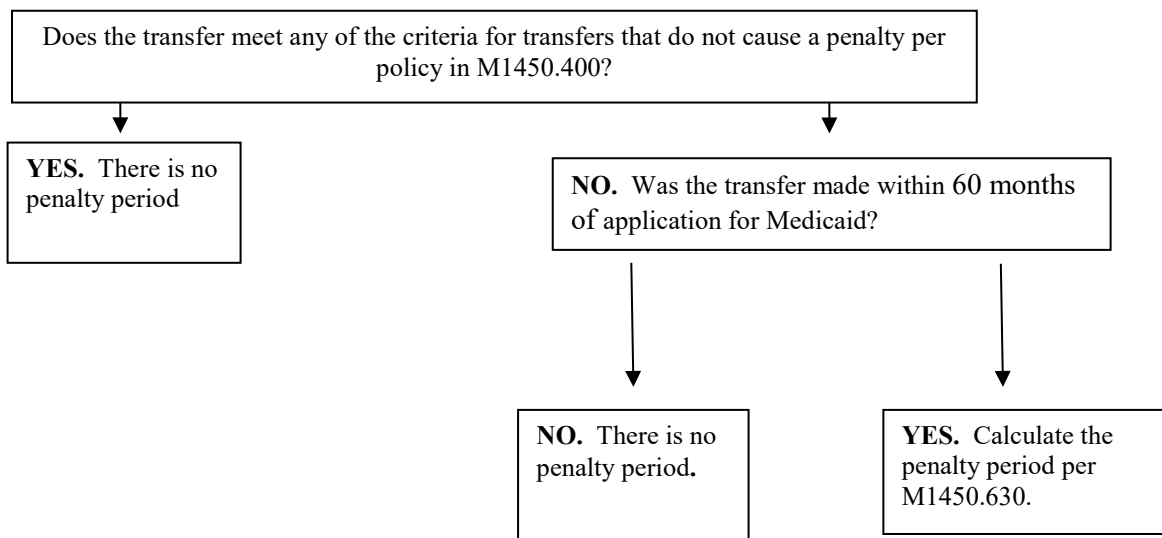

P. Undue Hardship

An undue hardship exists when the imposition of a penalty period would deprive the individual of medical care such that his health or his life would be endangered or be deprived of food, clothing, shelter, or other necessities of life.

M1450.004 TRANSFER OF ASSETS FLOW CHART

The flow chart below illustrates when an asset transfer penalty period is required.

Transfer of Assets Flow Chart

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2014
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.200	Page 7

M1450.100 RESERVED

M1450.200 POLICY PRINCIPLES

A. Policy

An institutionalized individual who transfers (or has transferred), or whose spouse transfers or has transferred, an asset in ways not allowed by policy is not eligible for Medicaid payment of long-term care services. The DRA established new policy for evaluating transfers made on or after February 8, 2006. The look-back period for all transfers is 60 months; there is no distinction between transfers involving trusts and other transfers.

B. Procedures

When a Medicaid enrollee is institutionalized, review the individual's eligibility to determine if an asset transfer occurred within the 60 months prior to institutionalization. When a Medicaid applicant reports an asset transfer, or the worker discovers a transfer, determine if the transfer occurred within 60 months prior to the month in which the individual is both institutionalized and a Medicaid applicant/enrollee.

1. All Transfers

Determine if any assets of the individual or the individual's spouse were transferred during the 60 months (the "look-back period") prior to the first date on which the individual was both an institutionalized individual and a Medicaid applicant/enrollee.

2. Determine Effect

If an asset was transferred during the look-back periods specified above, determine if the transfer affects eligibility for LTC services' payment, using sections *M1450.300* through *M1450.550* below.

If the transfer affects eligibility and was for less than market value, determine the uncompensated value (*M1450.610*) and establish a penalty period (period of ineligibility for Medicaid payment of LTC services, *M1450.630*).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.300	Page 8

M1450.300 ASSETS THAT ARE NOT RESOURCES FOR TRANSFER RULE

- A. Policy** The assets listed in this section are NOT resources for asset transfer purposes. Therefore, the transfer of any of the assets listed in this section does NOT affect eligibility for Medicaid payment of LTC services.
- B. Personal Effects and Household Items** A transfer of personal effects or household items does not affect eligibility.
- C. Certain Vehicles** The transfer of a vehicle that meets the following requirements does not affect Medicaid payment for LTC services:
- a vehicle used by the applicant/enrollee to obtain medical treatment.
 - a vehicle used by the applicant/enrollee for employment.
 - a vehicle especially equipped for a disabled applicant or enrollee.
 - a vehicle necessary because of climate, terrain, distance, or similar factors to provide necessary transportation to perform essential daily activities.

If the vehicle was not used as provided above at the time of transfer, \$4,500 of the trade-in value of the vehicle used for basic transportation is excluded. Any value in excess of \$4,500 must be evaluated as an asset transfer.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2007
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.300	Page 9

D. Property Essential to Self Support

The transfer of property essential to the institutionalized individual's self-support (tools, equipment, etc. used by the individual to produce income), including up to \$6,000 equity in income-producing real property(ies) owned by the applicant/recipient, does not affect eligibility for LTC services' payment.

To be income-producing, the property(ies) must usually have a net annual return that is:

- 6% of the equity, if the equity is \$6,000 or less or
- \$360 if the equity is more than \$6,000.

If an unusual circumstance caused a temporary reduction in the net annual return and the net annual return is expected to meet the requirements the following year, the property is still considered income-producing.

E. Resources Under PASS

Transfer of resources specifically designated for a disabled or blind SSI recipient's plan of self-support (PASS), as determined by SSI, does not affect eligibility for LTC services' payment.

F. Certain Life Insurance

Transfer of term or group insurance that has no cash value, or transfer of life insurance with a total face value of \$1,500 or less (total of all policies) on an individual, does not affect eligibility for LTC services' payment. Life insurance includes policies that presently do not have a cash value but will have a cash value in the future.

G. Certain Cash and In-kind Items

Transfer of cash or in-kind items received to replace/repair lost, damaged, or stolen exempted resources (see M1130.630) does not affect eligibility for LTC services' payment.

H. Burial Spaces or Plots

Transfer of burial spaces or plots held for the use of the individual, the individual's spouse, or the individual's immediate family does not affect eligibility for LTC services' payment.

I. Excluded Burial Funds

Transfer of up to \$1,500 in resources excluded under the burial fund exclusion policy does not affect eligibility for LTC services' payment.

J. Cash to Purchase Medical/Social Services

Transfer of cash received from a governmental or nongovernmental program to purchase medical care or social services does not affect eligibility for LTC services' payment IF the cash was transferred in the receipt month or the month following the receipt month.

K. Alaskan Natives' Stock

Transfer of certain shares of stock held by Alaskan natives does not affect eligibility for LTC services' payment.

L. Other Assets That Are Not Resources

The transfer of the following resources, **if they have been kept separate from other resources**, do not affect eligibility for LTC services' payment:

- Payments from the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2014
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.400	Page 10

- Payments from sections 25-239, 25-240, and 25-241 of the Code of Virginia for relocation assistance.
- Payments from sections 404(g) and 418 of the Domestic Volunteer Service Act of 1973.
- Retroactive Supplemental Security Income and/or retroactive Social Security payments for nine (9) months after the month of receipt of the payment(s).
- Retained disaster assistance.

M1450.400 TRANSFERS THAT DO NOT AFFECT ELIGIBILITY

A. Policy

An asset transfer does NOT affect eligibility for Medicaid payment of LTC services if the transfer meets the following criteria:

- the transfer(s) of assets was made for reasons exclusive of becoming or remaining eligible for Medicaid payment of LTC services (M1450.400 B),
- the individual received adequate compensation for the asset(s), or
- the asset transfer meets the criteria in either section B, C or D below.

If the transfer **does not** meet the criteria in this section, see section 1450.500 below to evaluate the asset transfer.

B. Reason Exclusive of Becoming or Remaining Medicaid Eligible

Assume that when an institutionalized individual or his community spouse has transferred assets for less than the CMV during the look back period, the transfer is subject to a penalty period. During this penalty period, Medicaid will not pay for LTC services. The institutionalized individual must be given the opportunity to rebut this assumption by showing satisfactorily that he intended to receive CMV or that the reason for the transfer of assets was exclusively for a purpose other than to qualify for Medicaid.

The individual must provide convincing and objective evidence showing that there was no reason to believe that Medicaid payment of LTC services might be needed. *The fact the individual had not yet applied for Medicaid, had not been admitted to an institution or was not aware of the asset transfer provisions does not meet the evidence requirement.* The sudden loss of income or assets, the sudden onset of a disabling condition or personal injury may provide convincing evidence.

The individual must provide evidence that other assets were available at the time of transfer to meet current and expected needs of that individual, including the cost of nursing home or other medical institutional care.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	July 2007
Subchapter Subject	Page ending with	Page
M1450.000 TRANSFER OF ASSETS	M1450.400	11

C. Home Property Transferred to Certain Individuals

Transfer of the individual's home, whether it was excluded or not excluded at the time of transfer, does NOT affect eligibility for LTC services' payment when the home property is transferred to one or more of the individuals listed below.

1. Spouse, Minor Child, Disabled/Blind Child

The transfer of the home property does not affect eligibility when transferred to the individual's

- spouse,
- child(ren) under age 21 years, or
- child(ren) of any age who is blind or disabled as defined by SSI or Medicaid.

2. Sibling

The transfer of the home property does not affect eligibility when transferred to the individual's sibling or half-sibling (not step-sibling) who:

- has an equity interest in the home, and
- who resided in the individual's home for at least one year immediately before the date the individual became an institutionalized individual.

3. Adult Child

The transfer of the home property does not affect eligibility when transferred to the individual's son or daughter (not including step-child) who resided in the home for at least two years immediately before the date the individual became an institutionalized individual, and all of the criteria listed in items a. through d. below are met.

a. Provided Care for 2 Years

The individual's son or daughter must have been providing care to the individual during the entire two-year period which permitted the individual to reside at home rather than in a medical institution or nursing facility.

b. Physician's Statement

The individual or his/her representative must provide a statement from his/her treating physician which states

- the individual's physical and/or mental condition during this two-year period,
- why the individual needed personal and/or home health care during this period, and
- the specific personal/home health care service needs of the individual.

c. Statement of Services Provided

The son or daughter must provide a statement showing:

- 1) the specific services and care he/she provided to the individual during the entire two years;
- 2) how many hours per day he/she provided the service or care;

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2007
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.400	Page 12

- 3) whether he/she worked outside the home or worked from the home during this period; how the individual's needs were taken care of while he/she worked; and
- 4) if the son or daughter paid someone to actually give the care to the individual, who was paid, the rate of pay, the specific services, and the length of time the services were provided.

d. Third Party Statement

The individual or his/her representative must provide an objective statement from a third party(ies) who had knowledge of the individual's condition and his/her living and care arrangements during this period which corroborates the son or daughter's statement. The statement must specify the care/services the son or daughter provided and who cared for the individual when the son or daughter was not at home.

D. Transfer to Certain Individuals or Trusts

Transfer of any asset

- to the individual's spouse or to another person for the sole benefit of the individual's spouse;
- to another individual by the spouse for the sole benefit of the spouse;
- to the individual's child under 21 or child of any age who is blind or disabled as defined by SSI or Medicaid;
- to a trust that is established solely for the benefit of the individual's
 - 1) child under age 21, or
 - 2) child of any age who is blind or disabled as defined by SSI or Medicaid when the trust meets the conditions in M1120.202;
- to a trust established solely for the benefit of an individual under 65 who is disabled as defined by SSI or Medicaid, when the trust meets the conditions in M1120.202;

does not affect eligibility for Medicaid payment of LTC services.

1. For the Sole Benefit of Spouse, Blind/disabled Child, or Disabled Individual

A transfer is for the sole benefit of a spouse, blind or disabled child or a disabled individual if the transfer is arranged in such a way that no individual or entity except the spouse, blind or disabled child or a disabled individual can benefit from the assets transferred in any way, whether at the time of transfer or at any time in the future. Similarly, a trust is established for the sole benefit of a spouse, blind or disabled child or a disabled individual if no one but the spouse, blind or disabled child or disabled individual can benefit from the assets in the trust, whether at the time of transfer or at any time in the future.

In order to be for the sole benefit of one of these individuals, the instrument or document must provide for the spending of the trust funds for the benefit of the individual that is actuarially sound based on the life expectancy of the individual involved. When the instrument or document does not so provide, any potential exemption from penalty or consideration for eligibility purposes is void. Exception: trusts established for disabled individuals, as described in M1120.202.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.400	Page 13

However, the trust may provide for reasonable compensation for a trustee(s) to manage the trust, as well as for reasonable costs associated with investing or otherwise managing the funds or property in the trust. In defining what is reasonable compensation, consider the amount of time and effort involved in managing a trust of the size involved, as well as the prevailing rate of compensation, if any, for managing a trust of similar size and complexity.

2. Not for the Sole Benefit of Spouse, Blind/disabled Child, or Disabled Individual

A transfer, transfer instrument, or trust that provides for funds or property to pass to a beneficiary who is NOT the spouse, a blind or disabled child or a disabled individual, is NOT considered established for the sole benefit of one of these individuals. Thus, the establishment of such a trust is a transfer of assets that affects eligibility for Medicaid payment of LTC services.

3. Trusts for Disabled Individuals Under Which the State Is Beneficiary

Trusts established for disabled individuals, as described in M1120.202, do not have to provide for an actuarially sound spending of the trust funds for the benefit of the individual involved. However, under these trusts, the trust instrument must provide that any funds remaining in the trust upon the death of the individual must go to the state, up to the amount of Medicaid benefits paid on the individual's behalf.

The trust does not have to provide for an actuarially sound spending of the trust funds for the benefit of the individual involved when:

- * the trust instrument designates the state as the recipient of funds from the trust, and
- * the trust requirements in M1120.202 require that the trust be for the sole benefit of an individual.

The trust may also provide for disbursement of funds to other beneficiaries provided that the trust does not permit such disbursements until the state's claim is satisfied. "Pooled" trusts may provide that the trust can retain a certain percentage of the funds in the trust account upon the death of the beneficiary.

4. Cross-reference

If the trust is not for the sole benefit of the individual's spouse, blind or disabled child or a disabled individual, and it does not meet the criteria in item M1450.400 D.3 above, go to M1450.550 to determine if the transfer of assets into the trust affects Medicaid payment for LTC services.

NOTE: Evaluate the trust to determine if it is a resource. See M1120.200, M1120.201 and M1120.202.

E. Other Asset Transfers

For asset transfers other than those described in sections M1450.400 B and C, the transfer does not affect eligibility for Medicaid payment of LTC services if the individual shows that he intended to receive or received adequate compensation for the asset. To show intent to receive adequate compensation, the individual must provide objective evidence according to items 1 through 3 below, and provide evidence that the transfer was made for reasons exclusive of becoming or remaining eligible for Medicaid payment of LTC services.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date June 2016
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.400	Page 14

1. **Evidence of Reasonable Effort to Sell** The individual must provide objective evidence for real property that he/she made an initial and continuing reasonable effort to sell the property. See M1130.140.
2. **Evidence of Legally Binding Contract** The individual must provide objective evidence that he/she made a legally binding contract (as defined in M1450.003 above) that provided for his/her receipt of adequate compensation in a specified form (goods, services, money, etc.) in exchange for the transferred asset.

If the goods received include term life insurance, see M1450.510 below.

3. **Irrevocable Burial Trust** The individual must provide objective evidence that the asset was transferred into an irrevocable burial trust. The trust is NOT compensation for the transferred money unless the individual provides objective evidence that all the funds in the trust will be used to pay for identifiable funeral services.

Objective evidence is the contract with the funeral home which lists funeral items and services and the price of each, when the total price of all items and services equals the amount of funds in the irrevocable burial trust.

NOTE: Evaluate the trust to determine if it is a resource. See M1120.200, M1120.201 and M1120.202.

- F. Post-Eligibility Transfers by the Community Spouse** Post-eligibility transfers of resources owned by the community spouse (institutionalized spouse has no ownership interest) do not affect the institutionalized spouse's continued eligibility for Medicaid payment of LTC services.

Exception: The purchase of annuity by the community spouse on or after February 8, 2006 may be treated as an uncompensated transfer. See G. below.

- G. Purchase of an Annuity by Community Spouse** For applications made on or after July 1, 2006, an annuity purchased by the community spouse on or after February 8, 2006, will be treated as an uncompensated transfer unless:
- * the state is named as the remainder beneficiary in the first position for at least the total amount of medical assistance paid on behalf of the annuitant; or
 - * the state is named the remainder beneficiary in the second position after the community spouse or minor or disabled child. If the spouse or the representative of a minor or disabled child disposes of any remainder for less than fair market value, the state must be named in the first position.

- H. Transfers Made on or After February 8, 2006 with Cumulative Value Less Than or Equal to \$4,000** **The policy in this subsection applies to actions taken on applications, renewals or changes on or after July 1, 2006 for transfers made on or after February 8, 2006.**
- Asset transfers made on or after February 8, 2006 that have a total cumulative value of less than or equal to \$1,000 per calendar year will not be considered a transfer for less than fair market value and no penalty period will be calculated.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date June 2016
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.500	Page 15

Assets transferred on or after February 8, 2006, that have a total cumulative value of more than \$1,000 but less than or equal to \$4,000 per calendar year may not be considered a transfer for less than fair market value if documentation is provided that such transfers follow a pattern that existed for at least three years prior to applying for Medicaid payment of LTC services. Christmas gifts, birthday gifts, graduation gifts, wedding gifts, etc. meet the criteria for following a pattern that existed prior to applying for Medicaid payment of LTC services.

- I. LTC Partnership Policy** The value of assets transferred that were disregarded as a result of an LTC Partnership Policy does not affect an individual's eligibility for Medicaid payment of LTC services. See M1460.160 for more information about LTC Partnership Policies.
- J. Return of Asset** The transfer of an asset for less than fair market value does not affect eligibility for Medicaid LTC services' payment if the asset has been returned to the individual.
- K. Home Foreclosure** The repossession and/or sale of a home by the mortgage lender for less than fair market value due to foreclosure is not evaluated as an uncompensated transfer. Documentation of the foreclosure must be retained in the case record.
- L. Court-ordered or Approved Sale** *When property is ordered to be sold at a judicial sale or when a court has approved the sale of property for less than FMV, the sale is considered a compensated transfer. The individual or guardian must provide documentation of the court order for the sale and any other documentation needed to verify the sale of the property.*
- M. Transfer of Income Tax Refund or Advance Payment Received After December 31, 2009 but Before January 1, 2013** Under Section 728 of the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (P.L. 111-312, the transfer of an income tax refund or advance payment received after December 31, 2009 but Before January 1, 2013, to another individual or to a trust does NOT affect eligibility for Medicaid payment of LTC services. If the funds are given away or placed in a trust, other than a trust established for a disabled individual (see M1120.202), after the end of the exempt period, the transfer is subject to a transfer penalty or being counted under the Medicaid trust provisions, as applicable.

M1450.500 TRANSFERS THAT AFFECT ELIGIBILITY

- A. Policy** If an asset transfer does not meet the criteria in sections M1450.300 or M1450.400, the transfer will be considered to have been completed for reasons of becoming or remaining eligible for Medicaid payment of LTC services, unless evidence has been provided to the contrary.

Asset transfers that affect eligibility for Medicaid LTC services payment include, but are not limited to, transfers of the following assets:

- cash, bank accounts, savings certificates,
- stocks or bonds,
- resources **over \$1,500** that are excluded under the burial fund exclusion policy,
- cash value of life insurance when the total face values of all policies owned on an individual exceed \$1,500
- interests in real property, including mineral rights,
- rights to inherited real or personal property or income.

- B. Procedures** Use the following sections to evaluate an asset transfer:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date June 2016
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.510	Page 16

- M1450.510 for a purchase of term life insurance.
- M1450.520 for a purchase of an annuity before February 8, 2006.
- M1450.530 for a purchase of an annuity on or after February 8, 2006.
- M1450.540 for promissory notes, loans, or mortgages.
- M1450.550 for a transfer of assets into or from a trust.
- M1450.560 for a transfer of income.

M1450.510 PURCHASE OF TERM LIFE INSURANCE

A. Policy

The purchase of any term life insurance after April 7, 1993, except term life insurance that funds a pre-need funeral under section 54.1-2820 of the Code of Virginia, is an uncompensated transfer for less than fair market value if the term insurance's benefit payable at death does not **equal or exceed twice the sum of all premiums paid for the policy.**

B. Procedures

1. Policy Funds Pre-need Funeral

Determine the purpose of the term insurance policy by reviewing the policy. If the policy language specifies that the death benefits shall be used to purchase burial space items or funeral services, then the purchase of the policy is a compensated transfer of funds and does not affect eligibility.

However, any benefits **paid** under such policy in excess of the actual funeral expenses are subject to recovery by the Department of Medical Assistance Services for Medicaid payments made on behalf of the deceased insured Medicaid enrollee.

2. Policy Funds Irrevocable Trust

Since **an irrevocable trust for burial is not a pre-need funeral**, the purchase of a term life insurance policy(ies) used to fund an irrevocable trust is an uncompensated transfer of assets for less than fair market value.

3. Determine If Transfer Is Uncompensated

When the term life insurance policy does not fund a pre-need funeral, determine if the purchase of the term insurance policy is an uncompensated transfer:

- Determine the benefit payable at death. The face value of the policy is the "benefit payable at death."
- From the insurance company, obtain the sum of all premium(s) paid on the policy; multiply this sum by 2. The result is "twice the premium."
- Compare the result to the term insurance policy's face value.
 - If the term insurance's face value equals or exceeds the result (twice the premium), the purchase of the policy is a transfer for fair market value and does not affect eligibility.
 - If the term insurance's face value is less than the result (twice the premium), the purchase of the policy is an uncompensated transfer for less than fair market value. Determine a penalty period per M1450.620 or M1450.630 below.

EXAMPLE #1: Mr. C. uses \$5,000 from his checking account to purchase a \$5,000 face value term life insurance policy on August 13, 1995. Since the policy was purchased after April 7, 1993, and \$5,000 (benefit payable on death) is not twice the \$5,000 premium, the purchase is an uncompensated transfer. The uncompensated value and the penalty period for Medicaid payment of long-term care services must be determined.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.520	Page 17

M1450.520 PURCHASE OF ANNUITY

A. Introduction

An annuity is a sum paid yearly or at other specific times in return for the payment of a fixed sum. Annuities may be purchased by an individual or by an employer. For Medicaid purposes, an annuity is a contract reflecting payment to an insurance company, bank or other registered or licensed entity by which one receives fixed, non variable payments on an investment for a lifetime or a specified number of years.

Although usually purchased to provide a source of income for retirement, annuities are sometimes used to shelter assets so that the individuals purchasing them can become eligible for Medicaid. To avoid penalizing individuals who validly purchased annuities as part of a retirement plan, determine the ultimate purpose of the annuity, i.e., whether the annuity purchase is a transfer of assets for less than fair market value.

B. Policy

All annuities purchased by an applicant/recipient or his spouse must be declared on the Medicaid application or renewal form. Annuities purchased by either the institutionalized individual or the community spouse must be evaluated even after initial eligibility as an LTC recipient has been established. In addition to determining if the annuity is a countable resource, the eligibility worker must evaluate the purchase of the annuity to determine if it is a compensated transfer.

The following rules apply to the purchase of an annuity:

1. ***Purchased by Institutionalized Individual or Community Spouse***

An annuity purchased by the institutionalized individual or the community spouse will be treated as an uncompensated transfer unless:

- * the state is named as the remainder beneficiary in the first position for at least the total amount of medical assistance paid on behalf of the institutionalized individual; or*
- * the state is named the remainder beneficiary in the second position after the community spouse or minor or disabled child. If the spouse or the representative of a minor or disabled child disposes of any remainder for less than fair market value, the state must be named in the first position.*

2. ***Purchased by Institutionalized Individual***

An annuity purchased by the institutionalized individual will be considered an uncompensated transfer unless:

- a. the annuity is described in one of the following subsections of section 408 of the Internal Revenue Service (IRS) Code:*
 - individual retirement account,*
 - accounts established by employers and certain associations of employees,*
 - simple retirement accounts; or*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.520	Page 18

- b. *the annuity is a simplified employee pension (within the meaning of section 408(k) of the IRS Code; or a Roth Individual Retirement Account (IRA); or*
- c. *the annuity is:*
- *irrevocable and non-assignable;*
 - *actuarially sound (see M1450.520 C); and*
 - *provides for equal payments with no deferral and no balloon payments.*

C. Procedures

1. Determine If Actuarially Sound

Determine if the annuity is actuarially sound. Use the Life Expectancy Table in M1450, Appendix 2:

- a. Find the individual's age at the time the annuity was purchased in the "Age" column for the individual's gender ("Male" or "Female").
- b. The corresponding number in the "Life Expectancy" column is the average number of years of expected life remaining for the individual.
- c. Compare the life expectancy number to the life of the annuity (the period of time over which the annuity benefits will be paid).
- d. When the average number of years of expected life remaining for the individual (the "life expectancy" number in the table) equals or exceeds the life of the annuity, the annuity is actuarially sound. When the annuity is actuarially sound, the purchase of the annuity is a compensated transfer for fair market value and does not affect eligibility.
- e. When the average number of years of expected life remaining for the individual (the "life expectancy" number in the table) is less than the life of the annuity, the annuity is NOT actuarially sound. The annuity purchase is a transfer for less than fair market value. The transfer occurred at the time the annuity was purchased.
- f. When the annuity is not actuarially sound, determine the uncompensated value and the penalty period (sections M1450.610 and M1450.620 below).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.540	Page 19

EXAMPLE #2:

A man at age 65 purchases a \$10,000 annuity to be paid over the course of 10 years. His life expectancy according to the table is 15.52 years. Thus, the annuity is actuarially sound; the purchase of the annuity is a compensated transfer for fair market value and does not affect eligibility for LTSS services payment.

EXAMPLE #3:

A man at age 80 purchases the same \$10,000 annuity to be paid over the course of 10 years. His life expectancy according to the table is only 7.16 years. The annuity is not actuarially sound. The purchase of the annuity is a transfer for less than fair market value.

3. Send Copy to DMAS

A copy of the annuity agreement must be sent to:

DMAS, Eligibility & Enrollment Services Division
600 East Broad Street, Suite 1300
Richmond, Virginia 23219

4. Maintain Copy of Annuity

The copy must be maintained by DMAS until the terms of the annuity have expired. A copy of the annuity must also be maintained in agency's case record.

M1450.530 RESERVED**M1450.540 PURCHASE OF A PROMISSORY NOTE, LOAN, OR MORTGAGE ON OR AFTER FEBRUARY 8, 2006****A. Introduction**

This policy applies to the purchase of a promissory note, loan, or mortgage on or after February 8, 2006. Subchapter S1140.300 contains explanations of promissory notes, loans, and mortgages.

B. Policy

Funds used to purchase a promissory note, loan, or mortgage on or after February 8, 2006, must be evaluated as an uncompensated transfer unless the note, loan, or mortgage:

- has a repayment term that is actuarially sound (see M1450.520),
- provides for payments to be made in equal amounts during the term of the loan with no deferral and no balloon payments, and
- prohibits the cancellation of the balance upon the death of the lender.

C. Uncompensated Amount

If the promissory note, loan, or mortgage does not meet the above criteria, the uncompensated amount is the outstanding balance as of the date of the individual's application for Medicaid.

Note: The countable value as a resource is the outstanding principal balance for the month in which a determination is being made.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2008
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.550	Page 20

M1450.545 TRANSFERS INVOLVING LIFE ESTATES

- A. Introduction** This policy applies to the purchase of a life estate on or after February 8, 2006.
- B. Policy** Funds used to purchase a life estate in another individual's home on or after February 8, 2006, must be evaluated as an uncompensated transfer unless the purchaser resides in the home for at least 12 consecutive months. If the purchaser resides in the home for less than 12 consecutive months, the entire purchase amount will be considered a transfer for less than fair market value.
- For Medicaid purposes, the purchase of a life estate is said to have occurred when an individual acquires or retains a life estate as a result of a single purchase transaction or a series of financial and real estate transactions.*

M1450.550 TRANSFERS INVOLVING TRUSTS

- A. Introduction** A transfer of assets into or from a trust may be a transfer of assets for less than market value. See M1120.200 for trust resource policy, definitions pertaining to trusts, and for instructions for determining if the trust is a resource.
- B. Revocable Trust**
- 1. Transfer Into Revocable Trust** A transfer of assets **into** a revocable trust does not affect eligibility because the entire principal of a revocable trust is an available resource to the individual.
 - 2. Payments From a Revocable Trust** Any payments from the revocable trust which are made to or for the benefit of the individual are counted as income to the individual and are not transfers for less than market value.

Any payments from the revocable trust's principal or income which are NOT made to or for the benefit of the individual are assets transferred for less than fair market value.
 - 3. Look-back Date** The look-back date is 60 months for assets transferred (payments made) **from** a revocable trust.

EXAMPLE #4: Mr. B established a revocable trust with a principal of \$100,000 on March 1, 1994. He enters a nursing facility on November 15, 1997, and applies for Medicaid on February 15, 1998. The trustee has complete discretion in disbursing funds from the trust. Each month, the trustee disburses \$100 to Mr. B and \$500 to a property management firm for the upkeep of Mr. B's home. On June 14, 1994, the trustee gave \$50,000 of the trust principal to Mr. B's brother.

The \$100 and \$500 payments are counted as income to Mr. B. Because the trust is revocable, the entire principal is a resource to Mr. B. Because the trustee gave \$50,000 away, the countable value of the trust is the remaining \$50,000. The transfer of the \$50,000 to Mr. B's brother is a transfer for less than fair market value. The look-back date is February 15, 1993, which is 60 months prior to February 15, 1998, the date Mr. B was both in an institution and applied for Medicaid. The transfer occurred on June 14, 1994 which is after the look-back date. The uncompensated value is \$50,000. The penalty

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2014
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.550	Page 21

date is June 1, 1994, the first day of the month in which the transfer occurred. The penalty period is 19 months beginning June 1, 1994.

C. Irrevocable Trust

A transfer of funds **into** an irrevocable trust and a transfer of funds **from** an irrevocable trust MAY be asset transfers for less than fair market value, depending on whether the terms of the trust

- * allow for payments to or for the benefit of the individual, OR
- * do not allow for payments to or for the benefit of the individual.

1. When Payment to Individual Is Allowed

When the trust allows for circumstances under which payment can be made to or for the benefit of the individual from all or a portion of the trust,

- 1) the portion of the trust principal that could be paid to or for the benefit of the individual is a resource available to the individual;
- 2) income (produced by the trust principal), which could be paid to or for the benefit of the individual, is a resource available to the individual;
- 3) payments from the trust income or principal, which are made to or for the benefit of the individual, are counted as income to the individual;
- 4) payments from income or from the trust principal which are NOT made to or for the benefit of the individual are assets transferred for less than fair market value.

a. Transfer Into Trust

A transfer of assets **into** an irrevocable trust that allows for payment to or for the benefit of the individual does NOT affect eligibility because the irrevocable trust is a resource to the individual.

b. Payments From Trust

Payments from income or from the trust principal which are made to or for the benefit of the individual are counted as income.

Payments from income or from the trust principal which are NOT made to or for the benefit of the individual are assets transferred for less than fair market value.

The date the transfer occurs is the date that the payment to the individual was foreclosed (the date the payment was paid to another person not for the benefit of the individual).

c. Look-back Date When Payment to Individual Is Allowed

The look-back date is **60 months** for assets transferred from an irrevocable trust under which some payment can be made to or for the benefit of the individual.

EXAMPLE #5: Mr. C established an irrevocable trust with a principal of \$100,000 on March 1, 1994. He enters a nursing facility on November 15, 1997, and applies for Medicaid on February 15, 1998. The trustee has discretion to disburse the entire principal of the trust and all income from the trust to anyone, including Mr. C, the grantor. Each month, the trustee

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2007
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.550	Page 22

disburses \$100 to Mr. C and \$500 to a property management firm for the upkeep of Mr. C's home. On June 14, 1994, the trustee gave \$50,000 of the trust principal to Mr. C's brother.

The \$100 and \$500 payments are counted as income to Mr. C. Because the trustee gave \$50,000 away, the value of the trust is the remaining \$50,000. The \$50,000 principal is a resource to Mr. C since the trust allows circumstances under which payment of all the trust principal could be made to Mr. C. The transfer of the \$50,000 to Mr. C's brother is a transfer for less than fair market value. The look-back date is February 15, 1995, which is 36 months prior to the baseline date February 15, 1998, the date Mr. C was both in an institution and applied for Medicaid. The transfer occurred on June 14, 1994 which is before the look-back date. No penalty due to this transfer can be imposed; the transfer does not affect eligibility for LTC services payment. Mr. C is not eligible for Medicaid because the \$50,000 available trust resource exceeds the Medicaid resource limit.

2. When Payment to Individual Is NOT Allowed

When the trust **DOES NOT allow payment to or for the benefit of the individual** from all or a portion of the trust principal (or income on the trust principal), treat the trust as a transfer of assets for less than fair market value.

a. Transfer Into Trust

A transfer of assets **into** an irrevocable trust that does NOT allow payment to or for the benefit of the individual is a transfer of assets for less than fair market value that affects eligibility.

The date the transfer occurred is

- * the date the trust was established.
- * the date payment to the individual was foreclosed (the date the exculpatory clause came into effect that made the trust funds no longer payable to the individual), if later.

A transfer of additional funds into an irrevocable trust is a new asset transfer and must be evaluated separately from the asset transfer that established the trust. The date the new transfer occurred is the date the additional funds were placed in the irrevocable trust.

b. Payments From Trust

Payments from the trust cannot be made to or for the benefit of the individual, so any payments from the trust do not affect the individual's eligibility.

c. Look-back Date When Payment to Individual Not Allowed

When the trust states that payment cannot be made to the individual, the look-back date is 60 months before the baseline date.

EXAMPLE #6: Mr. D established an irrevocable trust with a principal of \$100,000 on March 1, 1994. He enters a nursing facility on November 15, 1997, and applies for Medicaid on February 15, 1998. The trust does not allow the trustee to disburse any of the principal of the trust to or for the benefit of Mr. D. The trustee disburses \$100 to Mr. D and \$500 to a property management firm for the upkeep of Mr. D's home each month from the trust income. On June 14, 1994, the trustee gave \$50,000 of the trust principal to Mr. D's brother. On July 2, 1996, Mr. D placed another \$10,000 of his savings into the trust.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date February 2009
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.560	Page 23

The \$100 and \$500 payments are counted as income to Mr. D. Because none of the principal can be disbursed to Mr. D, the entire value of the trust at the time the trust was established (\$100,000 in 3-1-94) is a transfer of assets for less than fair market value. The look-back date is February 15, 1993, which is 60 months prior to the baseline date of February 15, 1998, the date Mr. D was both in an institution and applied for Medicaid. The transfer occurred on 3-1-94 which is after the look-back date. The uncompensated value is \$100,000.

The 7-2-96 transfer of \$10,000 into the trust is another asset transfer for less than fair market value that occurred on 7-2-96. The transfer occurred on 7-2-96 which is after the look-back date. The uncompensated value is \$10,000.

D. Pooled Trusts

A pooled trust is a trust that can be established for a disabled individual under the authority of Section 1917(d)(4)(C) of the Social Security Act (see M1120.202). The placement of an individual's funds into a pooled trust when the individual is age 65 years or older must be evaluated as an uncompensated transfer, if the trust is structured such that the individual irrevocably gives up ownership of funds placed in the trusts.

A trust established for a disabled individual under age 65 years is exempt from the transfer of assets provisions. However, any funds placed in the trust after the individual turns 65 must be evaluated as an asset transfer.

M1450.560 INCOME TRANSFERS

A. Policy

Income is an asset. When an individual's income is given or assigned in some manner to another person, such gift or assignment may be a transfer of an asset for less than market value.

B. Procedures

Determine whether the individual has transferred lump sum payments actually received in a month. Such payments are counted as income in the month received for eligibility purposes, and are counted as resources in the following month if retained. Disposal of a lump sum payment before it can be counted as a resource could be an uncompensated asset transfer.

Attempt to determine whether amounts of regularly scheduled income or lump sum payments, which the individual would otherwise have received, have been transferred. Normally, such a transfer takes the form of transferring the right to receive income. For example, a private pension may be diverted to a trust and no longer be paid to the individual. Question the individual concerning sources of income, income levels in the past versus the present, direct questions about giving away income or assigning the right to receive income, to someone else, etc.

In determining whether income has been transferred, do not attempt to ascertain in detail the individual's spending habits during the look-back period. Absent a reason to believe otherwise, assume that the individual's income was legitimately spent on the normal costs of daily living.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2018
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.570	Page 24

When income or the right to income has been transferred, and none of the criteria in M1450.300 or M1450.400 are met, determine the uncompensated value of the transferred income (M1450.610) and determine a penalty period (M1450.620 or 630).

M1450.570 SERVICES CONTRACTS

- A. Policy** Services contracts (i.e. personal care contract, care contracts, etc.) are typically entered into for the completion of tasks such as, but not limited to, grocery shopping, housekeeping, financial management and cooking, that individuals no longer can perform for themselves. For purposes of Medicaid payment of LTC services, payments made under these types of contracts may be considered an uncompensated transfer of assets.
- B. Procedures** When a services contract, sometimes referred to as a personal care contract, is presented as the basis for a transfer of assets, the eligibility worker must do the following:
- 1. Determine Institutionalization** Determine when the individual met the requirement for institutionalization.
 - 2. Verify Contract Terms and Value of Services** Obtain a copy of the written contract, or written statements verifying the terms of the agreement by all parties. Determine when the agreement was entered into/signed, who entered into/signed the contract, and if the contract is legally binding as defined by policy at M1450.003 H. The terms of the contract must include the types of services, hourly rate of payment and the number of hours for each service. The hourly rate for the services must be the fair market value for such services at the time the services were provided. The terms must be specific and verifiable. Verification of payments made and services provided must be obtained. Any payment for a service which does not have a fair market value is an uncompensated transfer.
 - 3. Contract Services** Once an individual begins receipt of Medicaid LTC services, the individual's personal *care* and medical needs are considered to be met by the LTC provider. Payment(s) to other individuals for services received after the individual enters LTC are considered an uncompensated transfer for Medicaid purposes.
 - 4. Physician Statement Required** A statement must be provided by the individual's physician that indicates the types of services that were to be provided under the contract, and that these services were necessary to prevent the individual's entrance into LTC.
 - 5. Contract Made By Individual or Authorized Representative** The contract must have been made by the applicant/recipient or his authorized representative.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.570	Page 24a

6. **Payments Prior To Contract Date** Any payment(s) made prior to the date the contract was signed (if contract is written) or date the contract was agreed upon (if contract is a legally binding oral contract) by all parties is considered an uncompensated transfer.
7. **Advance Lump Sum Payments Made To Contractor** Certain contracts for services provide an advance lump sum payment to the person who is to perform the duties outlined in the contract. Any payment of funds for services that have not been performed is considered an uncompensated transfer of assets. The Medicaid applicant/recipient has not received adequate compensation, as he has yet to receive valuable consideration.
8. **Determine Penalty Period** If it is determined that an uncompensated transfer of assets occurred, follow policy in this subchapter to determine the penalty period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.610	Page 25

M1450.600 *APPLYING A PENALTY PERIOD*

A. Introduction

When a transfer of assets was for less than fair market value, the individual is not eligible for Medicaid payment of LTC services for a specific period of time (penalty period) based on the uncompensated value of the transferred asset and the date the transfer occurred. However, if the individual meets all other Medicaid eligibility requirements, the individual is enrolled in Medicaid and is eligible for Medicaid payment of all other Medicaid-covered services.

The asset transfer precludes Medicaid payment for LTC services during the penalty period unless and until the individual receives adequate compensation in return for the transferred asset.

Penalty periods that are imposed cannot overlap or run concurrently. The total cumulative uncompensated value of the assets transferred is used to determine the length of the penalty period.

Once a penalty period begins it does not change or stop. The penalty period continues regardless of whether Medicaid eligibility continues, the institutionalized individual is discharged from LTC, or the individual changes from nursing facility care to community-based care. If the individual is re-admitted to LTC and the penalty period has not expired or ended, Medicaid payment for LTC services will continue to be denied for the remainder of the penalty period. **EXCEPTION:** The penalty period may be shortened if subsequent compensation is received (see M1450.640) or eliminated if an undue hardship is granted (see M1450.700).

B. Determination Procedures

Determine the uncompensated value using policy and procedures in M1450.610 below. Go to M1450.630 to determine the penalty period.

If the individual subsequently receives compensation in return for the transferred asset, re-evaluate the penalty period using policy and procedures in M1450.640 below.

M1450.610 UNCOMPENSATED VALUE

A. Policy

The uncompensated value is the amount of an asset's fair market value (FMV) that was not or will not be received as a result of the asset transfer. FMV is based on criteria used in determining the value of assets in determining Medicaid eligibility.

The uncompensated value for **real property** at the time of transfer:

- is the difference between the asset's FMV and the Gross Amount Due to Seller, when the lien/other encumbrance against the asset is satisfied from the seller's proceeds, or
- the difference between the asset's equity value (FMV minus the lien) and the Gross Amount Due to Seller, when the lien is assumed by the buyer.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.610	Page 26

See M1450.610 H for the procedures for determining the uncompensated value of transferred real property.

Determine the uncompensated value of the transferred asset in this section and go to M1450.630 to determine the penalty period.

B. Term Life Insurance Purchase On or Before April 7, 1993

For term life insurance policies purchased on or before April 7, 1993, the purchase is a compensated transfer of assets and the purchase does not affect eligibility.

C. Term Life Insurance Purchase After April 7, 1993

For term life insurance policies purchased after April 7, 1993, the purchase is a transfer of assets for less than fair market value if the term insurance's face value is less than twice the sum of all premium(s) paid on the policy. The uncompensated value is the total premium(s) paid on the policy.

If more than one premium was paid on the policy, and the premiums were paid in different months, each premium paid on the policy is a separate transfer of assets for less than fair market value. A transfer occurred in the month each premium was paid.

EXAMPLE #7: Mr. C applied for Medicaid on November 2, 1996. On August 13, 1995, Mr. C. used \$3,000 from his checking account to pay a \$3,000 premium on a \$5,000 face value term life insurance policy. On October 5, 1995, he used \$2,000 from his checking account to pay up premiums on the same \$5,000 face value term life insurance policy. Since the policy was purchased after April 7, 1993, and \$5,000 (benefit payable on death) is not twice the \$5,000 total premiums, the premium payments are transfers of assets for less than fair market value.

The uncompensated value of the first transfer on 8-13-95 is \$3,000. The uncompensated value of the second transfer on 10-5-95 is \$2,000. The penalty period for the first transfer is based on the \$3,000 uncompensated value and the transfer date of August 1995. The penalty period for the second transfer is based on the \$2,000 uncompensated value and the transfer date of October 1995.

D. Annuity Purchase

When the average number of years of expected life remaining for the individual (the "life expectancy" number in the table) is *less than* the life of the annuity, the annuity is NOT actuarially sound. The annuity purchase is a transfer for less than fair market value.

The transfer occurred at the time the annuity was purchased.

To determine the transferred asset's uncompensated value:

1. divide the face value of the annuity by the number of years in the life of the annuity.
2. the result is the yearly payout amount.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2007
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.610	Page 27

3. from the number of years in the life of the annuity, subtract the individual's life expectancy from table.
4. the result is the uncompensated payout years (number of the annuity's "payout" years that are uncompensated).
5. multiply the uncompensated payout years by the yearly payout amount.
6. the result is the uncompensated value of the assets transferred to purchase the annuity.

EXAMPLE #8: An 80-year old man uses \$9,000 from his savings account on May 6, 1996, to purchase a \$10,000 annuity to be paid over the course of 10 years. His life expectancy according to the table is only 6.98 years. The annuity is not actuarially sound. The purchase of the annuity is a transfer for less than fair market value.

The uncompensated value is determined:

$$\begin{array}{r}
 \$10,000 \text{ annuity value} \\
 \div \underline{10} \text{ years life of annuity} \\
 \$1,000 \text{ yearly payout} \\
 10 \text{ years life of annuity} \\
 - \underline{6.98} \text{ life expectancy} \\
 3.02 \text{ uncompensated payout years} \\
 \times \underline{\$1,000} \text{ yearly payout} \\
 \$3,020 \text{ uncompensated value}
 \end{array}$$

The penalty period is based on the \$3,020 uncompensated value and the transfer date of May 1996.

E. Funds From Revocable Trust

Any payments **from** a revocable trust's principal or income which are NOT made to or for the benefit of the individual are assets transferred for less than fair market value. The uncompensated value is the amount of the payment.

EXAMPLE #9: Mr. B established a revocable trust with a principal of \$100,000 on March 1, 1994. Each month, the trustee disburses \$100 to Mr. B and \$500 to a property management firm for the upkeep of Mr. B's home. On June 14, 1994, the trustee gave \$50,000 of the trust principal to Mr. B's brother.

The \$100 and \$500 payments are counted as income to Mr. B. The transfer of the \$50,000 to Mr. B's brother is a transfer for less than fair market value. The uncompensated value is \$50,000; the penalty period starts on June 1, 1994, the date the transfer occurred.

F. Irrevocable Trust

1. When Payment Is Allowed to Individual

When the irrevocable trust allows payments to the individual from all or a portion of the trust, any payments **from** the trust income or **from** the trust principal which are NOT made to or for the benefit of the individual are

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	July 2007
Subchapter Subject	Page ending with	Page
M1450.000 TRANSFER OF ASSETS	M1450.610	28

assets transferred for less than fair market value. The uncompensated value is the amount of the payment.

EXAMPLE #10: Mr. C established an irrevocable trust with a principal of \$100,000 on March 1, 1994. The trustee has discretion to disburse the entire principal of the trust and all income from the trust to anyone, including Mr. C, the grantor. All of the trust principal (\$100,000) could be disbursed to Mr. C under the terms of the trust. Each month, the trustee disburses \$100 to Mr. C and \$500 to a property management firm for the upkeep of Mr. C's home. On June 14, 1994, the trustee gave \$50,000 of the trust principal to Mr. C's brother.

The \$100 and \$500 payments are counted as income to Mr. C. The transfer of the \$50,000 to Mr. C's brother is a transfer for less than fair market value. The transfer occurred in June 1994. The uncompensated value is \$50,000.

2. When Payment Is Not Allowed to Individual

When the irrevocable trust does NOT allow payment to the individual from the trust, the transfer of funds into the trust is a transfer of assets for less than fair market value.

a. Trust Value

In determining the value of the trust which cannot be paid to the individual, do not subtract from the trust value any payments made for whatever purpose after the date the trust was established or, if later, the date payment to the individual was foreclosed. The value of the transferred amount is no less than its value on the date the trust is established or the date payment to the individual was foreclosed.

b. Uncompensated value

The uncompensated value is the amount of assets transferred into a trust which cannot be paid to the individual. If payment from the trust was foreclosed after the trust was established, the uncompensated value is the value of the trust as of the date payment was foreclosed.

c. Transfer Date

The date the transfer occurred is the date the trust was established, or, if later, the date payment to the individual was foreclosed.

d. Example #11

EXAMPLE #11: Mr. D established an irrevocable trust with a principal of \$100,000 on March 1, 1994. The trust allowed the trustee to disburse any of the principal of the trust to or for the benefit of Mr. D until Mr. D is admitted to a nursing facility. Mr. D was admitted to a nursing facility on May 30, 1996. Each month from the trust income, the trustee disburses \$100 to Mr. D and \$500 to a property management firm for the upkeep of Mr. D's home. On June 14, 1996, the trustee gave \$50,000 of the trust principal to Mr. D's brother. Mr. D applied for Medicaid on February 15, 1998.

The \$100 and \$500 payments are counted as income to Mr. D. Because none of the principal can be disbursed to Mr. D on or after the date he was admitted to the nursing facility, the value of the trust at the time payment was foreclosed (\$100,000 on 5-30-96) is a transfer of assets for less than fair market value. The date the transfer occurred is May 30, 1996, the date payment to Mr. D was foreclosed. The look-back period is 60 months. The look-back date is February 15, 1993, which is 60 months prior to the baseline date of February 15, 1998, the date Mr. D was both in an institution and applied for Medicaid.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2010
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.610	Page 29

The uncompensated value is \$100,000. The fact that \$50,000 was paid out of the trust to Mr. D's brother after payment to Mr. D was foreclosed does not alter the uncompensated amount upon which the penalty is based because the value of the transferred asset can be no less than its value on the date payment from the trust was foreclosed.

Mr. D placed an additional \$25,000 in the same trust on June 20, 1996. Under the terms of the trust, none of this \$25,000 can be disbursed to him. This is a new transfer of assets for less than fair market value. The uncompensated value is \$25,000; the transfer date is 6-20-96.

G. Income Transfers

1. Lump Sum Transfer

When a single lump sum, or single amounts of regularly paid income, is transferred for less than fair market value, the uncompensated value is the amount of the lump sum, less any compensation received. For example, an individual gives a \$2,000 stock dividend check that is paid once a year to the individual, to another person in the month in which the individual received the check. No compensation was received. The uncompensated value is \$2,000.

2. Stream of Income Transfer

When a stream of income (income received regularly) or the right to a stream of income is transferred, determine the total amount of income expected to be transferred during the individual's life, based on an actuarial projection of the individual's life expectancy. The uncompensated value is the amount of the projected income, less any compensation received. Use the Life Expectancy Table in M1450, Appendix 2.

3. Income Transfer Example

EXAMPLE #12: A man aged 65 years, assigns his right to a \$500 monthly annuity payment to his brother. He receives no compensation in return. Based on the life expectancy tables for males, the uncompensated value of the transferred income is \$93,120.

$$\begin{array}{r}
 \$ 500 \\
 \times 12 \text{ months} \\
 \$6,000 \text{ yearly income} \\
 \times 15.52 \text{ life expectancy from table} \\
 \$93,120 \text{ value} \\
 - 0 \text{ compensation} \\
 \$93,120 \text{ uncompensated value}
 \end{array}$$

H. Real Property Transfers

The uncompensated value of transferred real property is determined by evaluating the settlement document which outlines the monetary transactions between the individual who sells the property and the individual who buys the property. A copy of the Settlement Document is in **M1450, Appendix 3**.

The eligibility worker must obtain:

- documentation of the tax assessed value of the property at the time of the transfer; and
- a copy of the closing or settlement documents from the client or the financial institution.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.610	Page 30

1. Summary of Seller's Transactions

Review the summary of the seller's transactions:

- Determine the Gross Amount Due to Seller.
- Is the Gross Amount Due to Seller less than the **tax assessed or effective 10/4/16, the certified appraised value**?
 - If **no**, the seller received adequate compensation for the property and there is **no** uncompensated transfer.
 - If **yes**, determine the uncompensated value of the asset transfer.

2. Real Property Uncompensated Value Calculations

- a. When the lien is satisfied from the proceeds received by the seller, deduct the Gross Amount Due to Seller from the tax assessed *or certified appraised* value to determine the uncompensated amount of the asset transfer.
- b. When the lien is assumed by the buyer, deduct the lien amount from the tax assessed *or certified appraised* value of the property, to determine the equity value. From the equity value deduct the Gross Amount Due to Seller for the property to determine the uncompensated amount of the asset transfer.
- c. Determine the penalty period. The beginning of the penalty period depends upon whether the transfer took place prior to or on/after 2/08/2006.

Note: Any funds deducted from the Gross Amount Due to Seller that are paid to another individual, such as funds for repair of the property, are not considered usual and customary fees and must be evaluated as a separate asset transfer. If the transfer was uncompensated then the amount of this transfer may be added to any uncompensated value from the sale of property, as the transfer occurred at the same point in time.

Example #13a: Mrs. K. is receiving CBC services. The worker discovers that Mrs. K. has moved in with her daughter and has sold her home to her son. The tax assessed value of her home at the time of transfer was \$200,000. The closing documents indicate that she sold her home for \$125,000 (the gross amount due to seller). The closing costs were paid by Mrs. K. There was no lien against the property.

The uncompensated value of the transferred real property is calculated as follows:

\$200,000 tax assessed value
-125,000 Gross Amount Due to Seller
 \$ 75,000 uncompensated value

The penalty period is based on the uncompensated value of \$75,000.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.620	Page 31

Example #13b: On October 20, Mr. B. was admitted to a nursing facility. He transferred his home in July of the same year, which was within the look-back period. His home was assessed at \$100,000 in July. The mortgage against his home had a balance due of \$16,000 in July.

In reviewing the settlement statement for the sale of the property, it is noted that the sale price of the home was \$70,000 (gross amount due to seller), which was less than the tax assessed value of the home. The lien of \$16,000 was satisfied at closing from the \$70,000 sale price. The other fees deducted were usual and customary and were determined to have been paid by the buyer. Mr. B. received a \$54,000 net settlement for the sale of his home.

The uncompensated value of the transferred real property is calculated as follows:

\$100,000	tax assessed value
- 70,000	Gross Amount Due to Seller (includes the lien amount)
\$ 30,000	uncompensated value

The penalty period is based on the uncompensated transfer value of \$30,000. When the penalty period begins depends on whether the transfer took place prior to or after February 8, 2006.

Example #13c: The scenario is the same as in example 13b. However, the lien will be assumed by the purchaser rather than satisfied from the seller's gross settlement amount (Gross Amount Due to Seller). The equity value of the home is used to determine the uncompensated value in this case, because the seller was not responsible for satisfaction of the lien.

\$100,000	tax assessed value
-16,000	lien amount
\$ 84,000	equity value (EV)
 \$ 84,000	 EV
- 70,000	Gross Amount Due to Seller
\$ 14,000	uncompensated value

M1450.630 PENALTY PERIOD CALCULATION

A. Policy

When a transfer of assets affects eligibility, the penalty period begins when the individual would otherwise be eligible for Medicaid payment for *LTSS (long term services and support)* if not for the penalty period. The penalty period includes the fractional portion of the month, rounded down to a day. Penalty periods for multiple transfers cannot overlap.

As long as an individual in a penalty period meets a full or limited-benefit Medicaid covered group and all nonfinancial and financial requirements for that covered group, he is eligible for all services covered under that group EXCEPT the Medicaid payment of *LTSS*. Individuals in nursing and other medical facilities *or who have been screened and approved for HCBS (home and community based services)*, meet the 300% SSI covered group during a penalty period because they meet the definition of an institutionalized person.

An individual with a penalty period who does not meet the 300% SSI covered group may meet other covered groups. See M1450.630 B.5.

B. Penalty Begin Date

For individuals not receiving *LTSS* at the time of transfer, the penalty period begins the first day of the month in which the individual would otherwise be eligible for Medicaid payment for *LTSS*, except for the imposition of a penalty period. This includes the application retroactive period for nursing facility patients who have been in the facility during the retroactive period.

For individuals who are receiving Medicaid payment for *LTSS* at the time of transfer, the penalty period begins the month following the month of transfer.

1. Medicaid *LTSS* Not Received at Time of Transfer

If the individual is not receiving Medicaid-covered *LTSS* at the time of the asset transfer, the penalty period begins the first day of the month in which the individual would otherwise be eligible for Medicaid payment for *LTSS* but for the application of the penalty period, as long as the date does not fall into another period of ineligibility imposed for any reason.

2. Receiving Medicaid *LTSS* Services at Time of Transfer

If the individual is receiving Medicaid *LTSS* at the time of the asset transfer, the penalty period begins the first day of the month following the month in which the asset transfer occurred as long as the individual would otherwise be eligible for Medicaid payment for *LTSS* but for the application of the penalty period.

A referral to the DMAS Enrollee Audit Unit (RAU) must be made for the months in the penalty period during which the individual received Medicaid *LTSS* services. See Chapter M17 for instructions on RAU referrals.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.630	Page 36

**3. Penalty Periods
Cannot Overlap**

When multiple asset transfers result in multiple penalty periods, the penalty periods cannot overlap. One penalty period must be completed prior to the beginning of the next penalty period.

4. Nursing Facility

If the individual in a nursing facility meets all Medicaid eligibility requirements, he is eligible for Medicaid payment of all other covered services.

**5. HCBS, PACE,
Hospice**

a. Transfer Reported at Application

If the individual has been screened and approved for or is receiving Medicaid HCBS, PACE, or hospice services, he cannot be eligible for Medicaid in the 300% of SSI covered group or for the Medicaid payment of LTSS in any other covered group. The individual's Medicaid eligibility in other covered groups must be determined. His penalty period cannot be imposed unless and until he is (1) eligible for Medicaid in a full-benefit covered group other than the 300% of SSI covered group, (2) he meets a spenddown and would otherwise be eligible for the Medicaid payment of LTSS, or (3) he is admitted to a nursing facility.

An individual outside a medical facility (i.e. living in the community) does not meet the definition of an institutionalized person if he is not receiving Medicaid covered HCBS, PACE or hospice services. Therefore, an individual for whom a penalty period is imposed cannot be eligible for Medicaid unless the individual is eligible for Medicaid outside the 300% SSI covered group.

Any penalty periods imposed under the rules effective April 17, 2018 through October 1, 2022 are valid and continue until the penalty period is exhausted.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	July 2018
Subchapter Subject	Page ending with	Page
M1450.000 TRANSFER OF ASSETS	M1450.630	36a

b. Transfer Reported After Eligibility is Established

If it is reported or discovered that an individual receiving *HCBS* services in the 300% of SSI covered group made an uncompensated asset transfer prior to beginning *HCBS*, determine a penalty period. Evaluate for another covered group prior to cancelling. His penalty period cannot be imposed unless and until he is (1) eligible for Medicaid in a full-benefit covered group other than the 300% of SSI covered group, (2) he meets a spenddown and would otherwise be eligible for the Medicaid payment of *LTSS*, or (3) he is admitted to a nursing facility.

A referral to the DMAS Enrollee Audit Unit (RAU) must be made for the months in the penalty period during which the individual received Medicaid *LTSS* services. See Chapter M17 for instructions on RAU referrals.

6. Penalty Period imposed by another state

If the individual has completed an asset transfer penalty period in another state, a penalty period is not imposed by Virginia Medicaid for the same uncompensated transfer.

If an individual has relocated to Virginia and reports they have an active asset transfer penalty period in another state, he must complete the penalty period before being eligible for Medicaid payment of *LTSS* services. The eligibility worker must contact the previous state to find out the length of penalty period and time remaining. The remaining penalty period cannot be imposed unless and until the person is: 1) eligible for Medicaid in a full-benefit covered group other than the 300% of SSI covered group or; 2) meets a spenddown and would otherwise be eligible for the Medicaid payment of *LTSS* services or; 3) is admitted to a nursing facility. The individual's Medicaid eligibility in any other covered group(s) must be determined.

C. Penalty Period Calculation

The period is calculated by taking the uncompensated value of the assets transferred on or after the look-back date, divided by the average monthly cost of nursing facility services to a private-pay patient in his locality at the time of the application for Medicaid. The remainder is divided by the daily rate (the monthly rate divided by 31).

When the uncompensated value of an asset transfer is less than the monthly nursing facility rate, go to step #4 in E below to calculate the partial month penalty period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2018
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.630	Page 37

**D. Average Monthly
Nursing Facility
Cost (Figures

Virginia Health
Information)**

Average Monthly Private Nursing Facility Cost

<u>Application Date</u>	<u>Northern Virginia*</u>	<u>All Other Localities</u>
10-1-96 to 9-30-97	\$2,564	\$2,564
10-1-97 to 12-31-99	\$3,315	\$2,585
1-1-00 to 12-31-00	\$3,275	\$2,596
1-1-01 to 12-31-01	\$4,502	\$3,376
1-1-02 to 12-31-03	\$4,684	\$3,517
1-1-04 to 9-30-07	\$5,403	\$4,060
10-1-07 to 12-31-10	\$6,654	\$4,954
1-1-11 to 12-31-14	\$7,734	\$5,933
1-1-15 to 6-30-18	\$8,367	\$5,933 (no change)
7-1-18 and after	\$9,032	\$6,422

*The northern Virginia localities are: Alexandria, Arlington, Fairfax, Fairfax County, Falls Church, Loudoun County, Manassas, Manassas Park and Prince William County.

See M1450, Appendix 1 for amounts prior to October 1, 1996.

**E. Partial Month
Transfer**

The following example shows how to compute a penalty period for an uncompensated transfer that occurred on or after *July 1, 2018* and involves a partial month.

Example #19 (using July 2018 figures): An individual living outside Northern Virginia made an uncompensated asset transfer of \$48,294 in July 2018, the same month he applies for Medicaid. The uncompensated value of \$48,294 is divided by the average monthly rate of \$6,422 which equals 7.52 months. The full 7-month penalty period runs from July 2018, the month of the transfer, through January 2019, with a partial month penalty calculated for February 2019. The partial month penalty is calculated by dividing the partial month penalty amount (\$3,340.00) by the daily rate (\$207.16, which is the monthly rate of \$6,422 divided by 31). The calculations are as follows:

Step #1	\$48,294.00	uncompensated value of transferred asset
	$\div 6,422.00$	avg. monthly nursing facility rate at time of application
	= 7.52	penalty period (7 full months, plus a partial month)
Step #2	\$ 6,422.00	avg. monthly nursing facility rate at time of application
	$\times 7$	seven-month penalty period
	\$44,954.00	penalty amount for seven full months

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2018
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.640	Page 38

Step #3 \$48,294.00 uncompensated value
- 44,954.00 penalty amount for seven full months
\$ 3,340.00 partial month penalty amount

Step #4 \$3,340.00 partial penalty amount
÷ 207.16 daily rate (\$6,422 ÷ 31)
= 16.12 number of days for partial month penalty

For *February 2019*, the partial month penalty of 16 days would be added to the seven (7) month penalty period. *This* means Medicaid would authorize payment for *LTSS* services beginning *February 17, 2019*.

F. Penalty Period for a Couple When Both Are Eligible and Institutionalized

When an institutionalized individual is ineligible for Medicaid payment of long-term care services because of a transfer made by the spouse, and the spouse is or becomes institutionalized and eligible for Medicaid, the penalty period must be apportioned between the spouses. The couple may choose to either:

- have the penalty period, or the remaining time in the penalty period, divided between the spouses, or
- assign the penalty period or remaining penalty period to one of the two spouses.

When one spouse is no longer subject to the penalty, such as one spouse is no longer institutionalized or one spouse dies, the remaining penalty period applicable to **both** spouses must be applied to the remaining spouse.

EXAMPLE #18: Mr. A. enters a nursing facility and applies for Medicaid. Mrs. A. transfers an asset that results in a 36 month penalty period for Mr. A. 12 months into the penalty period, Mrs. A. enters a nursing facility and is eligible for Medicaid. The penalty period against Mr. A. still has 24 months to run. Because Mrs. A. is now in a nursing facility and a portion of the penalty period remains, the penalty period is reviewed. Mr. and Mrs. A. decide to have the penalty period divided between them. Therefore, both Mr. A. and Mrs. A. are ineligible for Medicaid payment of *LTSS* for 12 months beginning the first day of Mrs. A's Medicaid eligibility.

After 6 months, Mr. A. leaves the facility and is no longer institutionalized. Mrs. A. remains institutionalized. Because Mr. A is no longer subject to the penalty, the remaining total penalty period for the couple, 12 months (6 months for Mr. A. and 6 months for Mrs. A.), must be imposed on Mrs. A. If Mr. A. becomes institutionalized again before the end of the 12 months, the remaining penalty period is again reviewed and divided or applied to one spouse, depending on the couple's choice.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2012
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.640	Page 39

M1450.640 SUBSEQUENT RECEIPT OF COMPENSATION

A. Policy

When all assets transferred are returned to the individual, no penalty for transferring assets can be assessed. When a penalty has been assessed and payment for services has been denied, a return of the assets requires a retroactive evaluation, including erasure of the penalty, back to the beginning of the penalty period.

However, such an evaluation does not necessarily mean that Medicaid payment for LTC services must be paid on behalf of the individual. Return of the assets in question to the individual leaves the individual with assets which must be evaluated in determining eligibility during the retroactive period. Counting those assets as available may result in the individual being ineligible (because of excess income or resources) at the time of evaluation as well as for a period of time after the assets are returned.

NOTE: To void imposition of a penalty, all of the assets in question or their fair market equivalent must be returned. For example, if the asset was sold by the individual who received it, the full market value of the asset must be returned to the transferor.

When only part of an asset or its equivalent value is returned, a penalty period can be modified but not eliminated. For example, if only half of the value of the asset is returned, the penalty period can be reduced to one-half.

B. Example #20 Full Compensation Received

Example #20 Mr. G., who is in a nursing facility, applied for Medicaid on November 24, 2011. On October 10, 2011, he transferred his non-home real property worth \$46,404 to his son. The transfer did not meet any of the criteria in M1450.400, so a penalty period was imposed from October 1, 2011, through April 30, 2012.

On December 12, 2011, Mr. G.'s son paid *some outstanding* medical bills *that were not related to long-term care* for his father totaling \$47,000. The agency re-evaluated the transfer and determined a penalty period was no longer appropriate since full compensation was received. Mr. G.'s eligibility for Medicaid payment of long-term care services was re-evaluated, beginning with October 1, 2011.

C. Example #21 Partial Compensation Received

Example #21: Ms. H. applied for Medicaid on November 2, 2004, after entering a nursing facility on March 15, 2004. On October 10, 2004, she transferred her non-home real property worth \$40,000 to her son and received no compensation in return for the property. Ms. H.'s Medicaid application was approved, but she was ineligible for Medicaid payment of long-term care services for 9 months beginning October 1, 2004 and continuing through June 30, 2005.

On December 12, 2004, the agency verified that Ms. H.'s son paid her \$20,000 for the property on December 8, 2004. The agency re-evaluated the transfer and determined a remaining uncompensated value of \$20,000 and a penalty period of 4 months, beginning October 1, 2004, and continuing through January 31, 2005.

The \$20,000 payment must be evaluated as a resource in determining Ms. H.'s Medicaid eligibility for January 2005.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.700	Page 40

M1450.700 CLAIM OF UNDUE HARDSHIP

A. Policy

The opportunity to claim an undue hardship must be given when the imposition of a penalty period affects Medicaid payment for LTC services. *The opportunity to claim an undue hardship is in addition to the opportunity to appeal the transfer of assets decision itself.* An undue hardship may exist when the imposition of a transfer of assets penalty period would deprive the individual of medical care such that the individual's health or life would be endangered or he would be deprived of food, clothing, shelter, or other necessities of life. An undue hardship may be granted when documentation is provided that shows:

- that the assets transferred cannot be recovered, and
- that the immediate adverse impact of the denial of Medicaid coverage for payment of LTC services due to the uncompensated transfer would result in the individual being removed from the institution or becoming unable to receive life-sustaining medical care, food, clothing, shelter or other necessities of life.

Applicants, recipients, or authorized representatives may request an undue hardship evaluation. Additionally, the Deficit Reduction Act of 2005 authorized nursing facilities to act on behalf of their patients, when necessary, to submit a request for undue hardship. The nursing facility must have written authorization from the recipient or his authorized representative in order to submit the claim of undue hardship.

A claim of undue hardship:

- can be made for an individual who meets all Medicaid eligibility requirements and is subject to a penalty period,
- cannot be made on a denied or closed Medicaid case *or when the individual is deceased*,
- cannot be made when the penalty period has already expired, and
- cannot be used to dispute the value of a resource.

B. Procedures

If the individual chooses to make a claim of an undue hardship, documentation regarding the transfer and the individual's circumstances must be sent to the Department of Medical Assistance Services (DMAS) for an undue hardship determination **prior** to the eligibility worker taking action to impose a penalty period.

The individual has the burden of proof and must provide written evidence to clearly substantiate what was transferred, the circumstances surrounding the transfer, attempts to recover the asset or receive compensation, and the impact of the denial of Medicaid payment for LTC services.

1. Eligibility Worker

The eligibility worker must inform the individual of the undue hardship provisions and, if an undue hardship is claimed, send the claim and supporting documentation to DMAS for evaluation.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	October 2019
Subchapter Subject	Page ending with	Page
M1450.000 TRANSFER OF ASSETS	M1450.700	41

The eligibility worker must send a letter to the individual informing him of each asset transfer and the corresponding penalty period, as well as the right to claim an undue hardship. An Asset Transfer Undue Hardship Claim form, available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, must be included with the letter. The Asset Transfer Undue Hardship Claim Form serves as the request for an undue hardship evaluation.

a. Undue Hardship Claimed - Required Documentation

When requesting an undue hardship, the individual must provide the following documentation appropriate to the case situation:

- the reason(s) for the transfer;
- attempts made to recover the asset, including legal actions and the results of the attempts;
- notice of pending discharge from the facility, or discharge from PACE, hospice, or CBC services due to denial or cancellation of Medicaid payment for these services and include the actual date discharge will take place;
- physician's statement stating the inability to receive nursing facility or CBC services would result in the applicant/recipient's inability to obtain life-sustaining medical care;
- documentation that individual would not be able to obtain food, clothing, shelter, or other necessities of life;
- list of all assets owned and verification of their value at the time of the transfer if the individual claims he did not transfer resources to become Medicaid eligible; and
- documents such as deeds or wills if ownership of real property is an issue.

b. 10 Days to Return Undue Hardship Claim

The individual must be given at least 10 calendar days to return the completed form and documentation to the local agency. If the individual requests additional time to provide the form and documentation, the worker shall allow up to 30 calendar days from the date the checklist was sent. If the form and documentation are not returned within 30 calendar days, the penalty period must be imposed.

c. Documentation for DMAS

If an undue hardship is claimed, the eligibility worker must send to DMAS:

- a copy of the undue hardship claim form
- a description of each transfer:
 - what was transferred
 - parties involved and relationship
 - uncompensated amount
 - date of transfer

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.700	Page 42

- calculation and duration of the penalty period(s) being imposed;
- a brief summary of the applicant/recipient's current eligibility status and living arrangements (nursing facility or community); and
- other documentation provided by the applicant/recipient.

Send the documentation to DMAS at the following address:

DMAS, *Eligibility & Enrollment Services Division*
600 East Broad Street, Suite 1300
Richmond, Virginia 23219

A copy of all documentation submitted with the undue hardship claim must be retained in the case record.

d. When Applicant/Recipient Was Victim

If the applicant/recipient was a victim of an individual who is not the individual's attorney in fact, guardian, conservator or trustee and undue hardship is claimed, the **agency** must provide a statement documenting the facts and what actions were taken by the agency with regard to their findings. If the transfer was by a court-appointed guardian or conservator, documentation of any bond insurance that would cover the loss must be provided.

e. Undue Hardship Not Claimed or Not Granted by DMAS

If undue hardship is not claimed or if a penalty period must be imposed per DMAS, follow the procedures in M1450.800 through M1450.830 for notifying the individual and DMAS of the action. The individual must be informed that a denial of a claim for undue hardship may be appealed in accordance with the provisions of 12 VAC 30-110. If the individual meets all other eligibility requirements, he is eligible for Medicaid payment of all covered services other than LTC.

2. DMAS

DMAS will review the documentation provided with the undue hardship claim to determine if an undue hardship may be granted and send written notification to the eligibility worker. If additional information is needed to clarify the documentation received with the Undue Hardship claim, DMAS will notify the agency and provide a time frame for submitting the documentation. A copy of the decision must be retained in the individual's case record.

3. Subsequent Claims

If DMAS is unable to approve an undue hardship request because sufficient supporting documentation was not submitted, the claim must be denied and the penalty period must begin. Once a claim is denied, no further decision related to the same asset transfer will be made by DMAS unless the individual experiences a change in circumstances **while still in the penalty period**, such as receiving a discharge notice, that would result in the individual being removed from the institution or becoming unable to receive life-sustaining medical care, food, clothing, shelter or other necessities of life.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2018
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.810	Page 43

If the individual/authorized representative alleges a change in circumstances while still in the penalty period, *a claim of undue hardship can be requested and will follow the procedures as found in M1450.700 B.1. Once DMAS makes a decision on the claim, the worker will follow the policy as below.*

a. If a subsequent claim is received and penalty period has begun

If DMAS approves the subsequent claim of undue hardship, the penalty period ends effective with the date of the discharge notice or other documentation of undue hardship. The effective date is indicated in the approval letter from DMAS. Medicaid cannot pay for *LTSS* received prior to the end of the penalty period.

b. If a subsequent claim is received and penalty period has not begun

If the individual was screened and approved for Medicaid HCBS, PACE, or hospice services but his penalty period could not be imposed per M1450.630 B.5, and DMAS approves the subsequent claim of undue hardship, the penalty period is waived. However, Medicaid cannot pay for LTSS received prior to the date of the documentation of undue hardship, as designated by DMAS.

M1450.800 AGENCY ACTION

A. Policy

If an individual's asset transfer is not allowable by policy, the individual is not eligible for Medicaid payment of long-term care services. The individual, the service provider, and the Department of Medical Assistance Services (DMAS) must be notified of his/her ineligibility for the Medicaid payment of long-term care services, as well as his eligibility or ineligibility for Medicaid per M1450.810 below.

B. Procedures

The procedures used for notifying the recipient, the provider and DMAS are in sections M1450.810, 820, and 830 below.

M1450.810 APPLICANT/RECIPIENT NOTICE

A. Policy

Whenever an institutionalized individual is not eligible for Medicaid payment of long-term care services because of an asset transfer, the notice to the individual must contain the following:

1. Notice Includes Penalty Period

The form which notifies him/her of Medicaid eligibility must include the penalty period during which Medicaid will not cover *LTSS* for the individual.

2. Individual In Facility - Eligible

An individual in a nursing or other medical facility continues to meet the definition of an institutionalized person. If the individual meets all other Medicaid eligibility requirements, he is eligible for Medicaid in the 300% SSI covered group, except for payment for *LTSS*.

3. Individual Not in Facility - Not Eligible

An individual outside a medical facility (i.e. living in the community) **does not** meet the definition of an institutionalized person if he is not receiving Medicaid covered *HCBS*, *PACE* or hospice services. Therefore, an individual for whom a penalty period is imposed cannot be eligible for Medicaid unless the individual is eligible for Medicaid outside the 300% SSI covered group.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.810	Page 44

**4. Referral to
DMAS
Recipient Audit
Unit (RAU)**

If the individual already received Medicaid long-term care services during a penalty period or made a claim of an undue hardship for imposition of a penalty period and the claim was approved, a referral to the DMAS RAU must be made. The DMAS Eligibility Section will make the referral to RAU for approved claims of an asset transfer undue hardship. The LDSS must make all other referrals for recovery.

B. Notice Contents

The Notice of Action on Medicaid sent to the individual must specify that:

- Medicaid will not pay for nursing facility or CBC waiver services for the months (state the begin and end dates of the penalty period) because of the uncompensated asset transfer(s) that occurred on (date/dates);
- the penalty period may be shortened if compensation is received.

The notice must also specify that either:

- the individual is eligible for Medicaid coverage of services other than nursing facility or waiver services beginning (the appropriate date);
or
- the individual is ineligible for Medicaid in any covered group, citing M1450.810 A.3, above.

If an asset transfer undue hardship claim was approved and the amount of the uncompensated transfer was \$25,000 or more and was made within 30 months of the individual becoming eligible for or receiving Medicaid LTC services, the notice must also include the following statement:

“Section 20-88.02 of the Code of Virginia allows DMAS to seek recovery from the transferee (recipient of the transfer) when a Medicaid enrollee transfer assets with an uncompensated value of \$25,000 or more within 30 months of receiving or becoming eligible for Medicaid.”

C. Advance Notice

When an institutionalized Medicaid recipient is found no longer eligible for Medicaid payment of long-term care services because of an asset transfer, the Advance Notice of Proposed Action must be sent to the individual at least 10 days before cancelling coverage of LTC services, and must specify that either:

- The individual is eligible for Medicaid coverage of services other than nursing facility or waiver services beginning (the appropriate date), **or**
- The individual is ineligible for Medicaid in any covered group, citing M1450.810 A.3, above, **and**
- Medicaid will not pay for long-term care services for the months (state the penalty period begin and end dates) because of the asset transfer(s) that occurred (date/dates), **and**
- The penalty period may be shortened if compensation is received.

M1450.820 PROVIDER NOTICE

A. Introduction

Use the Medicaid *LTSS* Communication Form (DMAS-225) to notify the provider of the individual's Medicaid eligibility and ineligibility for Medicaid payment of long-term care services.

B. Medicaid LTC Communication Form (DMAS-225)

The DMAS-225 should include:

- the individual's full name, Medicaid and Social Security numbers;
- the individual's birth date;
- the patient's Medicaid coverage begin date; and
- that the patient is not eligible for Medicaid payment of nursing facility/CBC waiver services for the months (state the penalty period begin and end dates) because of an asset transfer(s).

If the individual reports a change in circumstances to the local DSS, he or his authorized representative must be offered the chance to submit an additional claim of undue hardship. Follow the procedures in M1450.700 B above.

If DMAS grants the claim of undue hardship, the portion of the asset transfer penalty remaining **as of the date of the undue hardship request** is nullified. **Medicaid cannot pay for long-term care services received during the penalty period prior to the undue hardship request.** Nursing facility charges incurred during a penalty period may be evaluated as a patient pay deduction using the policy and procedures in M1470.230.

Once the penalty period has expired, no additional claims of undue hardship may be made.

M1450.830 DMAS NOTICE

A. Introduction

The worker must notify DMAS that the recipient is not eligible for *LTSS* services payment because of an asset transfer. DMAS must input the code in the Virginia Case Management System (VaCMS) that will deny payment of *LTSS* services claims.

The worker notifies DMAS via a copy of the DMAS-225 sent to the provider.

B. Copy of DMAS-225

The copy of the DMAS-225 that is sent to DMAS must contain the following information, in addition to the information on the provider's copy of the DMAS-225:

- date(s) the asset transfer(s) occurred;
- the uncompensated value(s); and
- penalty period(s) (begin and end dates) and computation of that period(s).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2020
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.830	Page 46

C. Send DMAS Notice

The agency worker must send a copy of the DMAS-225 to:

Department of Medical Assistance Services
Eligibility and Enrollment Services Division
 600 E. Broad St., Suite 1300
 Richmond, VA 23219.

The copy of the DMAS-225 must be signed and dated by the worker, and must show the worker number and the local agency's FIPS code.

Any information the agency receives about the individual's subsequent receipt of compensation which shortens the penalty period must be sent to the Long-Term Care Unit at the above address.

Settlement Statement-

Form HUD-1 follows on pages 2 and 3 of this appendix. This form is frequently used as the settlement statement when closing a real estate transaction or transfer. Note that there is a specific section for the borrower and the seller. The Borrower is the individual(s) who is purchasing the property. The Seller is the owner of the property.

The Gross Amount Due to Seller for the property noted on line 420 of the first page of the statement represents the amount of funds being paid for purchase the property. This amount includes the funds which satisfy any outstanding liens against the property at the time of transfer, which are noted on lines 504 and 505 of the first page.

Usual and customary fees associated with real estate transactions are already indicated on the form, such as the lien amounts, any additional deductions must be added to the form. These types of deductions should be carefully examined by the eligibility worker, as they may represent a separate uncompensated transfer from the seller's portion of the proceeds from the sale of the property.

Any questions regarding this form and any deductions listed should be referred to the appropriate Medical Assistance Program Consultant.

Section 5 of the Real Estate Settlement Procedures Act (RESPA) requires the following: • HUD must develop a Special Information Booklet to help persons borrowing money to finance the purchase of residential real estate to better understand the nature and costs of real estate settlement services; • Each lender must provide the booklet to all applicants from whom it receives or for whom it prepares a written application to borrow money to finance the purchase of residential real estate; • Lenders must prepare and distribute with the Booklet a Good Faith Estimate of the settlement costs that the borrower is likely to incur in connection with the settlement. These disclosures are mandatory.

Section 4(a) of RESPA mandates that HUD develop and prescribe this standard form to be used at the time of loan settlement to provide full disclosure of all charges imposed upon the borrower and seller. These are third party disclosures that are designed to provide the borrower with pertinent information during the settlement process in order to be a better shopper.

The Public Reporting Burden for this collection of information is estimated to average one hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

This agency may not collect this information, and you are not required to complete this form, unless it displays a currently valid OMB control number. The information requested does not lend itself to confidentiality.

M1460.000 LTC FINANCIAL ELIGIBILITY

M1460.001 OVERVIEW

A. Introduction

This subchapter contains the Medicaid financial eligibility requirements for individuals receiving facility or Medicaid waiver long-term care (LTC) services, *also referred to as Long-term Supportive Services (LTSS)*, who are not married or who are married but do not have community spouses. **For married individuals other than Modified Adjusted Gross Income (MAGI) Adults with community spouses (when both are not in a medical facility), go to subchapter M1480 to determine financial eligibility and patient pay.**

All individuals whose Medicaid eligibility has been determined PRIOR to entering LTC must have their financial eligibility redetermined, including asset transfer evaluation, home ownership and other resource evaluation. First, determine if the individual meets the Medicaid non-financial requirements including covered group in M1410.020. Then determine financial eligibility. Financial eligibility requirements for an individual differ depending on the individual's covered group, marital status and type of long-term care.

This subchapter contains policy and procedures for resources and income eligibility determination for institutionalized individuals. Patient pay (post-eligibility treatment of income) policy and procedures for unmarried individuals or married individuals without community spouses are in subchapter M1470.

B. Related Policies

- *MAGI (MAGI) Adults income rules in Chapter M04*
- ABD resource rules in Chapter S11.
- ABD income rules in Chapter S08.
- Family and Children resource rules in Chapter M06.
- Family and Children Medically Needy (MN) income rules in Chapter M07.
- Married Institutionalized Individuals' Eligibility & Patient Pay rules in subchapter M1480.

M1460.100 DEFINITIONS

A. Purpose

This section provides definitions for terms used in this subchapter.

B. Definitions

1. 300% SSI Group

The 300% SSI group is the short name for the categorically needy (CN) covered groups of Aged, Blind & Disabled (ABD) and Families & Children (F&C) individuals who are institutionalized in medical facilities or Medicaid-covered waiver services, who have resources within the Medicaid resource limits and whose gross income is less than or equal to 300% of the Supplemental Security Income (SSI) income limit for one person.

2. Budget Period

The budget period is the period of time during which an individual's income is calculated to determine eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.100	Page 2

3. **Carry-over Expenses**
Carry-over expenses are the balance due on medical, dental, and remedial care expenses incurred in the retroactive or prospective budget period prior to the current budget period which were not used in establishing eligibility and which may be deducted in a consecutive budget period(s) when there has been no break in spenddown eligibility.
4. **Certification Period**
The certification period is the period of time over which an application or redetermination is valid.
5. **Current Payments**
Current payments are payments made in the current spenddown budget period on expenses incurred before the current spenddown budget period which were not used in establishing eligibility in a previous spenddown budget period and when there has been a break in spenddown eligibility. The payment amount allowed is the actual payment amount paid to the provider and is deducted from the spenddown liability on the date the payment is actually made.
6. **Income Determination Period**
The income determination period is the budget period; for all LTC cases, the budget period is one month.
7. **LTC Case**
A case in which the Medicaid applicant or recipient is an institutionalized individual receiving long-term care services is an LTC case.
8. **Lump Sum Payment**
Income received on a "non-recurring basis" and/or income that is received once a year is a lump sum payment. All lump sum payments are income in the month of receipt and a resource in the following month(s), if retained.

Different types of lump sum payments must be treated differently. Refer to the ABD Income chapter S08 (for both ABD and F&C individuals) for policy specific to the type of lump sum payment that is being evaluated.
9. **MAGI Adults**
Effective January 1, 2019, MAGI Adults is the CN covered group of individuals between the ages of 19 and 64 with household income at or below 138% of the Federal Poverty Level (FPL) and who are not entitled to or receiving Medicare.
10. **Medicaid Rate**
The Medicaid rate is a monthly rate which is calculated:
 - for a facility, by multiplying the individual's daily Resource Utilization Group (RUG) code amount by the number of days in the month. A patient's RUG code amount is based on his room and board and ancillary services. The RUG code amount may differ from facility to facility and from patient to patient within the same facility. Confirmation of the individual's RUG code amount must be obtained by contacting the facility;

NOTE: When projecting the facility's monthly Medicaid rate, the daily RUG code amount is multiplied by 31 days.
 - for Medicaid CBC waiver services, by multiplying the provider's Medicaid hourly rate by the number of hours of service received by the patient in the month. Confirm the provider's hourly Medicaid rate and number of service hours by contacting the provider.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2022
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.150	Page 3

11. Old Bills

Old bills are unpaid medical, dental, or remedial care expenses which:

- were incurred prior to the Medicaid application month and the application's retroactive period,
- were not fully deducted from (counted in) any previous spenddown budget period where the spenddown was met, and
- remain a liability to the individual.

EXCEPTION: Bills paid by a state or local program and which meet the definition of “old bills” are treated as old bills even though they are not the individual’s liability.

12. Projected Expenses

Expenses for services that have not yet been incurred but are reasonably expected to be incurred are projected expenses.

13. Spenddown Liability

The spenddown liability is the amount by which the individual’s countable income exceeds the MNIL for the budget period.

M1460.150 SUBSTANTIAL HOME EQUITY PRECLUDES ELIGIBILITY FOR LTSS

A. Applicability

The policy in this section applies to nursing facility and CBC/PACE patients, including MAGI Adults effective January 1, 2019, who meet the requirements for LTC services, now called long term services and supports (LTSS), on or after January 1, 2006. This includes individuals who filed reapplications after a break in Medicaid eligibility. It does **not apply** to Medicaid recipients who were approved for LTSS prior to January 1, 2006, and who maintain continuous Medicaid eligibility.

For Medicaid applicants or enrollees approved for LTSS on or after July 1, 2006, the amount of equity in the home at the time of the initial LTSS determination and at each renewal must be evaluated.

B. Policy

Individuals with equity value (tax assessed value minus encumbrances) in home property that exceeds the limit are NOT eligible for Medicaid payment of LTSS unless the home is occupied by

- a spouse,
- a dependent child under age 21 years, or
- a blind or disabled child of any age.

If substantial home equity exists, the individual is not evaluated for or eligible for the Medicaid payment of LTSS. Do not evaluate asset transfers.

An individual with excess home equity is not eligible in the 300% of SSI covered group, but may be eligible for Medicaid payment of covered services other than LTSS if he is eligible in another covered group. Evaluate eligibility for an individual with substantial home equity in other covered groups.

1. Home Equity Limit

The applicable home equity limit is based on the date of the application or request for LTC coverage. The home equity limit is:

- Effective January 1, 2020: \$595,000
- Effective January 1, 2021: \$603,000
- *Effective January 1, 2022: \$636,000.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.155	Page 4

1. Reverse Mortgages

Reverse mortgages **do not** reduce equity value until payments are being received from the reverse mortgage.

2. Home Equity Credit Lines

A home equity line of credit **does not** reduce the equity value until credit line has been used or payments from the credit line have been received.

C. Verification Required

Verification of the equity value of the home is required.

D. Notice Requirement

If an individual is ineligible for Medicaid payment of LTSS because of substantial home equity exceeding the limit, the Notice of Action must state why he is ineligible for Medicaid payment of LTSS. The notice must also indicate whether the applicant is eligible for other Medicaid covered services.

If the individual is in a nursing facility, send the facility a DMAS-225 indicating that the individual is not eligible for the Medicaid payment of LTSS.

E. References

See section M1120.225 for more information about reverse mortgages.

M1460.155 THIRD PARTY & LONG-TERM CARE INSURANCE PAYMENTS

A. Payments Made by Another Individual

Payment of an individual's bills (including Medicare supplementary medical insurance or other medical insurance premiums) by a third party directly to the supplier is not income.

Payments made directly to the service provider by another person for the individual's private room or "sitter" in a medical facility are NOT income to the individual. Refer all cases of Medicaid eligible enrollees in nursing facilities who have a "sitter" to DMAS, Division of *Aging and Disability Services*, for DMAS review to assure that DMAS is not paying the facility for services provided by the sitter.

B. LTC Insurance Policy Payments

The LTC insurance policy must be entered into the recipient's TPL file. The insurance policy type is "H" and the coverage type is "N." When entered in the Virginia Case Management System (VaCMS) on the TPL *screen*, Medicaid will not pay the nursing facility's claim unless the claim shows how much the policy paid.

If the patient receives the payment from the insurance company, it is **not** counted as income. The patient should assign it to the *provider*. If the patient cannot do this, or the policy prohibits assignment, the payment should be given directly to the *provider*. The *provider* should report the payment as a third party payment on its claim form.

If the patient received the payment and cannot give it to the *provider* for some reason, then the patient should send the insurance payment to:

DMAS Fiscal Division, *Cashiering Unit*
600 E. Broad Street, Suite 1300
Richmond, Virginia 23219

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date September 2012
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.160	Page 4a

M1460.160 LONG-TERM CARE PARTNERSHIP POLICIES

A. Introduction

A Long-term Care Partnership Policy (Partnership Policy) is a type of LTC insurance. Under section 6021(a)(1)(A) of the Deficit Reduction Act (DRA) of 2005 states were permitted to develop LTC partnerships. In addition to paying for assisted living or long-term care services, a Partnership Policy allows for additional assets to be disregarded in the Medicaid eligibility determination.

The value of assets disregarded in the Medicaid eligibility determination is equal to the dollar amount of benefits paid to or on behalf of the individual as of the month of application, even if additional benefits remain available under the terms of the policy.

The Partnership Policy disregard is not applicable to the resource assessment for married individuals with a community spouse. See M1480 for more information regarding resource assessments and Partnership Policies.

B. LTC Insurance Policy Issued Prior to 9/01/2007

LTC policies issued prior to 9/01/2007 are **not** Partnership Policies. See M1470.230 B.6, M1470.430 B.5 and M1470.820 D for more information regarding these types of insurance policies.

C. LTC Insurance Policy Issued on or After 9/01/2007

LTC policies issued on or after 9/01/2007 may or may not be Partnership Policies. For a policy to be considered a Partnership Policy, it must meet the following conditions:

- issued on or after 09/01/2007,
- contain a disclosure statement indicating that it meets the requirements under § 7702B(b) of the Internal Revenue Service Code of 1986, and
- provide inflation protection:
 - under 61 years of age, compound annual inflation protection,
 - 61 to 76 years of age, some level of inflation protection, or
 - 76 years or older, inflation protection may be offered, but is not required.

Obtain a copy of the Partnership Disclosure Notice and the LTC Partnership Certification Form (See M1460, Appendices 1 and 2) for verification of the requirements noted above. Also, verification of the amount of benefit paid to or on behalf of an individual as of the month of application must be obtained. This can be found on the Explanation of Benefits statement or by calling the insurance carrier.

Partnership Policies that are issued in other states may or may not meet Virginia's requirements. Please contact your Medicaid Consultant to verify reciprocity with Virginia.

Verifications and documentation regarding a Partnership Policy must be kept with other permanent verifications in the case record.

M1460.200 DETERMINATION OF COVERED GROUP

A. Overview

An individual in LTC who meets the Medicaid non-financial eligibility requirements in M1410.010 must also meet the requirements of at least one covered group in order to be eligible for Medicaid and Medicaid payment of LTC services.

1. Covered Groups Eligible for LTC Services

The covered groups whose benefit packages include long-term care services are the following groups:

All categorically needy (CN) full benefit covered groups for ABD and F&C:

- SSI Recipients; see M0320.101 and M1460.201
- “Protected” covered Groups; see M0320.200
- *MAGI Adults; see M04*
- ABD 80% FPL; see M0320 and M1460.210
- MEDICAID WORKS; see M0320.400
- 300% SSI; see M0320.500 , M0330.500, and M1460.220
- IV-E Foster Care and Adoption Assistance; see M0330.105
- Individuals Under Age 21; see M0330.107
- Special Medical Needs Adoption Assistance; see M0330.108
- *Former Foster Care Children Under Age 26 Years; see M0330.109*
- Low Income Families With Children (LIFC); see M0330.200
- Child Under Age 19 (FAMIS Plus); see M0330.300
- Pregnant Women and Newborn Children; see M0330.400
- Breast and Cervical Cancer Prevention Treatment Act (BCCPTA); see M0330.700

All medically needy (MN) covered groups

- ABD Individuals; see M0320.701
- December 1973 Eligibles; see M0320.702
- Pregnant Women; see M0330.801
- Newborn Children Under Age 1; see M0330.802
- Children Under Age 18; see M0330.803
- Individuals Under Age 21; see M0330.804
- Special Medical Needs Adoption Assistance; see M0330.805

Medicaid will not pay for the following for MN individuals:

- services in an intermediate care facility for the intellectually disabled (ICF-ID)
- services in an institution for the treatment of mental disease (IMD)
- Community Living Waiver (formerly Intellectual Disabilities Waiver) services, and
- Family and Individual Supports Waiver (formerly Individual and Family Development Disability Support (DD) Waiver) services.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2019
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.200	Page 5

**2. Applicants
Who Do Not
Receive Cash
Assistance**

a. Child Under Age 18

MAGI methodology is not applicable to F&C children needing LTC services. If the applicant is a child under age 18, determine the child's eligibility in the F&C 300% SSI group, using the covered group policy in subchapter M0330 and the financial eligibility policy and procedures in this subchapter. The resource requirement for the F&C 300% SSI covered group does **NOT** apply to children under age **18**.

If the child's income exceeds the limit for the F&C 300% SSI group, determine the child's eligibility in an MN covered group.

NOTE: A child who is age 18, 19 or 20 meets an MN covered group if he is blind, disabled, pregnant, in foster care, adoption assistance, or institutionalized in a nursing facility. An individual age 21 or older, must meet the pregnant, aged, blind or disabled definition in order to meet an MN covered group.

b. Individual Age 18 -19

If the individual is age 18 but under age 19, first determine the individual's eligibility in the F&C Child Under 19 or Pregnant Woman covered groups using MAGI income methodology in Chapter M04. If the individual's income exceeds the limits for F&C coverage, he must be determined disabled to meet the ABD 300% SSI covered group. Follow the procedures in M0310.112 for making a disability referral.

c. Individual Age 19 or Older

If the individual is age 19 or older, determine the individual's eligibility in an ABD or F&C covered group, depending on which definition the individual meets, using the financial eligibility policy and procedures in this subchapter.

For ABD individuals, determine the individual's eligibility in the ABD 80% FPL covered group. If not eligible in the ABD 80% FPL covered group, determine the individual's eligibility in the ABD 300% SSI covered group. If not eligible in the either of these covered groups, determine the individual's eligibility in all other groups for which he meets a definition.

For F&C individuals, first determine the individual's eligibility in the LIFC, Pregnant Woman, or MAGI Adult groups. If the individual's income exceeds the limits for the LIFC, Pregnant Woman, or MAGI Adult covered groups, determine the individual's eligibility in the F&C 300% SSI covered group.

To be eligible in the F&C 300% SSI covered group, the individual must be a child under age 18; under age 21 who meets the adoption assistance or foster care definition; under age 21 in an ICF or ICF- ID; a parent or caretaker-relative of a dependent child; or a pregnant woman as defined in M0310.

If the income exceeds the 300% SSI group limit and the individual meets a MN covered group, determine the individual's eligibility in an MN covered group (see M0330). There is no MN covered group for LIFC parents or MAGI Adults.

**B. Relation to Income
Limits**

Determination of the appropriate covered group must be made prior to determination of income because the income limits are determined by the covered group:

1. ABD 80% FPL

The ABD income policy in Chapter S08 is used to determine countable income for the ABD 80% FPL covered group. *However, the income items listed in Sections M1460.610 and M1460.611 are NOT counted as income in determining income eligibility for the ABD 80% FPL covered group.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.200	Page 6

1. **MAGI Adults** *The MAGI income policy in Chapter M04 is used to determine countable income for MAGI Adults. The income limit is 138% FPL (133% FPL plus a 5% FPL income disregard if needed).*

3. **300% SSI** The ABD income policy in Chapter S08 is used to determine income for all individuals (ABD and F&C) in the 300% SSI group. The items found in section M1460.611 ARE counted in determining income eligibility for long-term care. The income items listed in M1460.610 are not counted for the 300% SSI groups (ABD and F&C).

4. **ABD MN Groups** The ABD income policy in Chapter S08 is used to determine countable income for the ABD MN covered groups. However, the income items listed in "What Is Not Income", Section M1460.610 and in "Countable Income for the 300% SSI Group", Section M1460.611 are NOT counted as income in determining income eligibility for ABD MN groups.

5. **F&C MN Groups** The F&C income policy in Chapter M07 is used to determine countable income for individuals in F&C MN covered groups. However, the income items listed in "What Is Not Income", section M1460.610 and "Countable Income for the 300% SSI Group", Section M1460.611 are NOT counted when determining income eligibility for F&C MN groups.

C. Ongoing Recipient Enters LTC

1. **SSI Recipients** SSI recipients who are already enrolled in Medicaid when they enter Medicaid long-term care must have their eligibility reviewed. They already meet a covered group but they must also meet the asset transfer, resource and financial eligibility requirements in order for Medicaid to cover the cost of long-term care services.

2. **Other Recipients** Recipients who do not receive cash assistance but who are already enrolled in Medicaid when they enter long-term care in a medical facility **must have their eligibility redetermined**. They must meet a covered group and they must meet the asset transfer, resource, and financial eligibility requirements in order for Medicaid to cover the LTC services cost.

For a MAGI Adult, complete a review to evaluate substantial home equity and asset transfers, including transfers of assets into trusts or to purchase annuities.

Review the asset transfer policy in subchapter M1450 with the recipient if he has transferred assets. If the recipient is admitted to a nursing facility, or moves from his home to receive Medicaid CBC in another person's home, review asset transfer, home property and other resource requirements to determine if the individual remains eligible for Medicaid

A married recipient, *other than a MAGI Adult*, who enters LTC must have resource and income eligibility redetermined using the rules in subchapter M1480, if his spouse is a community spouse.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.201	Page 7

M1460.201 SSI RECIPIENTS

A. Introduction

An SSI recipient in a nursing facility, or who receives Medicaid CBC waiver services, must meet the Medicaid nonfinancial, asset transfer and resource eligibility requirements to be eligible for Medicaid payment of LTC services. The SSI recipient's resource eligibility must be determined if he owns a real property resource; the receipt of SSI meets the Medicaid income eligibility requirements. An SSI recipient is income-eligible for LTC as long as he is entitled to an SSI payment. *When the SSA record indicates a payment code of "C01" and no payment amount is shown, the individual is considered to be an SSI recipient for Medicaid purposes. If the SSA record indicates a code of "E01" or "E02" and no SSI payment has been received in more than twelve months, the individual's SSI status must be confirmed.* The covered group eligibility requirements for SSI recipients are in section M0320.101.

1. Medicaid CBC

An SSI recipient who receives Medicaid CBC waiver services in his community residence usually continues to receive SSI with no change. If a recipient moves to another person's home to receive Medicaid CBC, his SSI payment may be affected. When a Medicaid SSI recipient begins receiving Medicaid CBC waiver services, asset transfer and resource eligibility must be evaluated. As long as the individual receives SSI, he is categorically needy if he meets the Medicaid nonfinancial and resource eligibility rules.

2. Facility

SSI recipients in nursing facilities are subject to the reduced SSI benefit rate of \$30 for their personal needs. If they have other countable income that exceeds \$30, their SSI will be canceled. SSI recipients may continue to receive their regular monthly SSI benefit for 3 months if they are considered temporarily institutionalized. Individuals who receive SSI after admission to a facility are categorically needy if they meet the Medicaid nonfinancial and resource eligibility rules.

B. Policy

1. Nonfinancial

Evaluate the non-financial Medicaid eligibility rules in section M1410.020. An SSI recipient meets an ABD covered group.

2. Asset Transfer

Determine if the recipient meets the asset transfer policy in subchapter M1450.

3. Resources

a. Determine Countable Resources

Determine if the SSI recipient has the following real property resource(s):

- 1) equity in non-exempt property contiguous to his home which exceeds \$5,000 and none of the real property exclusions in sections M1130.100, M1130.140, S1130.150, or M1130.160 apply to the property;
- 2) interest in undivided heir property and the equity value of the individual's share that, when added to all other countable resources, exceeds the appropriate Medicaid resource limit. (The interest in the

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2006
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.201	Page 8

estate must be legally available. If a partition suit is necessary to sell the interest, costs of partition and attorneys' fees may be deducted as described in section M1120.215);

- 3) ownership (equity value) of *the individual's* former residence *when* the SSI recipient is in an institution for longer than 6 months. Determine if the former *residence* is excluded under policy in section M1130.100 D;
- 4) equity value in property owned jointly *by the SSI recipient and* another person *who is not the SSI recipient's spouse*, as tenants in common or joint tenants with the right of survivorship at common law. Determine if any of the real property exclusions in sections M1130.100, M1130.140, S1130.150, or M1130.160 apply to the property;
- 5) other real property; determine if any of the real property exclusions in sections M1130.100, M1130.140, S1130.150, or M1130.160 apply to the property.

When an SSI recipient has any of the real property listed in 1) through 5) *previously*, ALL of the recipient's resources must be verified, evaluated, and counted together to determine if the SSI recipient meets the Medicaid resource requirements. Calculate resources for an assistance unit of 1 person.

When an SSI recipient has no real property resource listed in 1) through 5) previously, do NOT evaluate the SSI recipient's resources. The SSI recipient meets the Medicaid resource requirements because he receives SSI and does not have a countable real property resource listed above.

b. Countable Resources Within Resource Limit

If countable resources are less than or equal to the \$2,000 resource limit, go to item 4 below for income eligibility.

c. Countable Resources Exceed the Resource Limit

If current resources exceed the \$2,000 resource limit, the individual is NOT eligible in the SSI recipient covered group, nor is he eligible in the 300% SSI group or the medically needy group. He may be eligible for limited Medicaid coverage as medically indigent (which has more liberal resource methods and standards), however, Medicaid will not pay for LTC services for an ABD medically indigent recipient.

4. Income

An SSI recipient in LTC is income-eligible for Medicaid as long as he receives an SSI payment. Verify receipt of the payment. If the SSI recipient meets the nonfinancial and resource eligibility rules for Medicaid, then he is eligible for Medicaid as categorically needy.

- a. When an SSI recipient who has no other income enters a nursing facility, the SSI check is usually reduced to \$30 for the month following the month of entry. The SSI payment is **NOT** counted as income when determining income eligibility or patient pay.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.205	Page 8a

- b. If the recipient is temporarily in the nursing facility, the SSI check is not reduced or canceled. Temporary institutionalization for SSI purposes means 90 days or less. The SSI payment is **NOT** counted as income when determining eligibility or patient pay.

C. Development

A partial review of the SSI recipient's Medicaid eligibility is required when the recipient is admitted to facility care or Medicaid CBC waiver services. The EW must determine that asset transfer and resource requirements are met, and that the recipient's SSI continues.

If eligible, determine patient pay; see subchapter M1470. If the individual is eligible but is in an asset transfer penalty period, follow the notification instructions in M1450. If not eligible, follow the eligibility notice requirements in M1410.300.

M1460.205 OTHER CATEGORICALLY NEEDY (CN) COVERED GROUPS

A. Description

Categorically needy (CN) individuals receive or are deemed to be receiving public assistance cash benefits.

B. ABD Groups

1. QSII (1619(b))

Qualified Severely Impaired Individuals (QSII) are former SSI recipients who are working but are still disabled, and are eligible under 1619(b) of the Social Security Act. To be eligible for Medicaid, they must have met the more restrictive resource requirements for Medicaid in the month before the month they qualified under 1619(b). See section M0320.105 for details about this covered group.

2. AG Recipients

An Auxiliary Grants (AG) recipient is eligible for Medicaid if he meets the assignment of rights to medical support and third party payments requirements and the asset transfer policy. See section M0320.202 for details about this covered group.

C. F&C Groups

1. Individuals Under 21

a. IV- E Foster Care Recipients

Children who are eligible for foster care payments under Title IV-E of the Social Security Act are eligible for Medicaid. See section M0320.305 for details about this covered group.

b. IV-E Adoption Assistance Recipients

Children who are eligible for adoption assistance under Title IV-E of the Social Security Act are eligible for Medicaid. See section M0320.305 for details about this covered group.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.207	Page 9

- b. If the recipient is temporarily in the nursing facility, the SSI check is not reduced or canceled. Temporary institutionalization for SSI purposes means 90 days or less. The SSI payment is **NOT** counted as income when determining eligibility or patient pay.

C. Development

A partial review of the SSI recipient's Medicaid eligibility is required when the recipient is admitted to facility care or Medicaid CBC waiver services. The EW must determine that asset transfer and resource requirements are met, and that the recipient's SSI continues.

If eligible, determine patient pay; see subchapter M1470. If the individual is eligible but is in an asset transfer penalty period, follow the notification instructions in M1450. If not eligible, follow the eligibility notice requirements in M1410.300.

M1460.207 MAGI ADULTS COVERED GROUP (EFFECTIVE JANUARY 1, 2019)

A. Description

The MAGI Adults covered group includes individuals between 19 and 64 years old who are not eligible for or receiving Medicare.

B. Policy

1. **Nonfinancial** *Evaluate the non-financial Medicaid eligibility rules in Chapter M02.*
2. **Asset Transfer** *Determine if the recipient meets the asset transfer policy in subchapter M1450.*
3. **Resources** *Although no resource test is applicable for MAGI Adults coverage, the worker must evaluate certain resources for any individuals seeking Medicaid payment for LTSS. These include asset transfers, trusts, annuities, and the home equity limit.*
4. **Income** *Income is determined using the policy in Chapter M04, and countable income must not exceed 138% FPL. Spenddown does not apply to this covered group.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2019
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.210	Page 10

M1460.210 ABD 80% FPL COVERED GROUP

A. Description

The ABD 80% FPL covered group includes aged, blind and disabled individuals who have income less than or equal to 80% FPL and countable resources that do not exceed the SSI resource limits. See M0320.300 for details about this covered group.

B. Policy

1. Nonfinancial

Evaluate the non-financial Medicaid eligibility rules in Chapter M02.

2. Asset Transfer

Determine if the recipient meets the asset transfer policy in subchapter M1450.

3. Resources

Determine countable resources using the policy in chapter S11 and Appendix 2 to chapter S11. The resource limit is \$2,000.

The home property resource exclusion for individuals in the ABD 80% FPL covered group includes the home and ALL contiguous property as long as the individual lives in the home or, if absent, intends to return to the home (see Appendix 2 to chapter S11). When the ABD 80% FPL individual leaves his home property, obtain a signed statement from the individual as to:

- when and why he left the home;
- whether he intends to return; and
- if he does not intend to return, when that decision was made.

The limited 6-month home property resource exclusion for institutionalized individuals does NOT apply to this covered group.

4. Income

The ABD income policy in Chapter S08 is used to determine countable income for the ABD 80% FPL covered group. However, the income items listed in Sections M1460.610 and M1460.611 are NOT counted as income in determining income eligibility for the ABD 80% FPL covered group.

Countable income must not exceed 80% FPL. Spenddown does not apply to this covered group.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.220	Page 11

M1460.220 300% of SSI PAYMENT LIMIT GROUP

A. Description

These are ABD or F&C individuals in medical facilities or who receive Medicaid CBC waiver services, who meet the appropriate CN resource requirements and resource limit and whose income is less than or equal to 300% of the SSI payment limit for an individual.

Individuals who have been *authorized* for Medicaid LTC or *Long-term Services and Supports (LTSS)* may be evaluated in this covered group. If the individual is treated as an institutionalized individual and eligibility is established prior to the begin date of services, the individual has 30 days from the date on the Notice of Action to begin services.

B. ABD Groups

Aged, blind or disabled individuals institutionalized in medical facilities, or who require institutionalization and are approved to receive Medicaid CBC waiver services are those who:

- meet the Medicaid ABD resource requirements; and
- have gross income, determined according to the ABD income requirements, that does not exceed 300% of the SSI individual payment limit.

See sections M0320.501 and M0320.502 for details about these covered groups.

C. F&C Groups

Individuals who meet an F&C definition (foster care or adoption assistance children under age 21, parents or caretaker-relatives of dependent children, and pregnant women) in medical facilities, or who require institutionalization and who are approved to receive Medicaid home and community-based care (CBC) waiver services, are those who:

- meet the F&C CN resource requirements if unmarried, (married individuals over age 18 must meet the ABD resource requirement); and
- have gross income, determined according to the ABD income requirements, that does not exceed 300% of the SSI individual payment limit.

Children under age 18 in the 300% of SSI covered group have no resource requirement.

See sections M0330.501 and M0330.502 for details about these covered groups.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2022
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.400	Page 12

M1460.300 ASSISTANCE UNIT

A. Policy

An institutionalized individual is an assistance unit of one person, considered living separately from his spouse and/or parent(s), beginning the month in which he meets the definition of *an institutionalized individual* in section M1410.010.

EXCEPTION: A pregnant woman's assistance unit includes the number of unborn children with which she is pregnant.

B. Financial Eligibility

The financial eligibility rules in this section apply to **both ABD and F&C individuals**.

1. Resources

The resources of an institutionalized child's parent(s) are **NOT** deemed available to the institutionalized child. The resources of an institutionalized individual's spouse are deemed available to the institutionalized individual in the initial eligibility determination (see subchapter M1480).

2. Income

The income of an institutionalized individual's spouse or parent(s) is **NOT** deemed available to the institutionalized individual.

For income eligibility, married institutionalized individuals are considered separated, not living together, and only that income which is voluntarily contributed to the institutionalized spouse by the separated spouse is considered available to the institutionalized spouse.

Institutionalized children are considered separated from, not living with, their parents and only that income which is voluntarily contributed to the child is considered available to the child.

M1460.400 STEPS FOR DETERMINING FINANCIAL ELIGIBILITY

A. Is person an SSI recipient?

Yes: Go to M1460.201 (determine ABD CN resources; if within limit, is eligible as SSI). If resources exceed the limit, does recipient also meet F&C CN covered group?

Yes: eligible as F&C CN; STOP. Go to section M1460.660 for enrollment and subchapter M1470 for patient pay. (Remember to review asset transfer to evaluate whether Medicaid payment may be made for LTC services).

No: ineligible for Medicaid; STOP. Go to section M1460.660 for notice procedures.

No: Does person receive IV-E cash assistance?

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.400	Page 13

Yes: eligible as CN; STOP. Go to section M1460.660 for enrollment and subchapter M1470 for patient pay. (Remember to review asset transfer to evaluate whether Medicaid payment may be made for LTC services).

No: Go to B below.

B. Covered Group

Is person already enrolled in Medicaid in a covered group eligible for LTC services?

Yes: Go to E “Resources” below, *unless the person is a MAGI Adult*.

No: Is person F&C *or an adult 19-64 years old and not receiving Medicare?*

Yes: Determine if he meets F&C *or MAGI Adult group* first (section M0330), go to D “Income” below.

No: Go to C below.

C. Is person ABD?

Yes: Go to D “Income” below.

No: Is person in Hospice?

Yes: Determine as Hospice; see section M0320.503.

No: ineligible for Medicaid, does not meet a covered group; STOP. Go to section M1460.660 for notice procedures.

D. Income (See M1460.600)

1. Person is F&C or MAGI Adult

Determine countable income using chapters *M04 and M07*.

Compare income to appropriate M04 income limit.

Is income within limit?

Yes: eligible as F&C/*MAGI Adult*, STOP. Go to section M1460.660 for enrollment and subchapter M1470 for patient pay *for F&C (MAGI Adults do not have a patent pay)*.

No: not eligible as F&C, go to item 2 below.

2. Person Is Not F&C

a. Is person ABD and does he meet the definition of institutionalization in M1410.010?

Yes: Determine if gross income is less than or equal to the 80% FPL income limit using chapter S08 and section M1460.600 below to determine gross income.

Is gross income less than or equal to 80% FPL income limit?

Yes: Go to section E “Resources” below.

No: Go to item 3 “Determine 300% SSI income” below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date September 2012
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.400	Page 14

No: Does person meet the F&C 300% SSI or Hospice covered group
(does person meet the definition of institutionalization in M1410.010)?

Yes: Go to item 3 “Determine 300% SSI income” *below*.

No: Go to section M1460.410 “Steps for Determining MN Eligibility.”

3. Determine if Gross Income is Less Than or Equal to 300% SSI

Determine if gross monthly income is less than or equal to the 300% SSI income limit using chapter S08 and section M1460.600 below for **ABD and F&C** individuals.

Is gross income less than or equal to 300% SSI income limit?

Yes: go to section E “Resources” below.

No: go to section M1460.410 “Steps for Determining MN Eligibility” below.

**E. Resources
(See M1460.500)**

1. Determine CN Resources

a. ABD groups

1) Unmarried Individual or Married Individual with no Community Spouse

a) ABD 80% FPL group: Using chapter S08 and M1460.600, determine if countable income is within the ABD 80% FPL income limit contained in M0810.002.A.5. If countable income is less than or equal to 80% FPL, determine countable resources using chapter S11 and Appendix 2 to chapter S11. **NOTE:** the 6-month home exclusion does not apply to this covered group.

Compare to ABD CN resource limit = \$2,000 for 1 person.

b) 300% SSI group: Determine ABD countable resources using chapter S11.

Compare to ABD CN resource limit = \$2,000 for 1 person. If the individual is not eligible due to excess resources, evaluate eligibility in the ABD 80% FPL covered group. See item b) below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.400	Page 15

2) Married Individual with Community Spouse

Determine ABD countable resources using chapter S11 and subchapter M1480.

Compare to ABD CN resource limit = \$2000 for 1 person

b. F&C groups

1) Unmarried Individual *age 18 or over* or Married Individual *age 18 or over* with no Community Spouse

- Determine F&C CN countable resources using chapter M06 for the unmarried institutionalized individual.
- Compare to F&C CN resource limit = \$1,000.

2) Married Individual *age 18 or over* with Community Spouse

- Determine ABD countable resources, Chapter S11, M1480.
- Compare to ABD CN resource limit = \$2000 for 1 person.

2. Are resources within CN limit?

Yes: eligible in the covered group whose income limit is met; STOP. Go to section M1460.660 for enrollment and subchapter M1470 for patient pay.

No: go to item 3 below.

3. Does person meet an MN covered group?

Yes: go to section M1460.410 “Steps for Determining MN Eligibility,” below.

No: person is not eligible for Medicaid because of excess resources; STOP. Go to section M1460.660 for notice procedures.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.410	Page 16

M1460.410 STEPS FOR DETERMINING MN ELIGIBILITY

- A. Does person meet an MN covered group?**
- Yes:** go to B below “Determine MN Resources.”
- No:** person is not eligible for Medicaid because his gross income exceeds 300% of SSI and he does not meet a medically needy covered group; STOP, unless he has Medicare Part A. If he has Medicare Part A, determine eligibility for ABD *MSP*. If he does not have Medicare Part A, go to section M1460.660 for notice procedures.
- B. Determine MN Resources**
- 1. ABD Groups** Determine ABD countable resources, Chapter S11.
- Compare to ABD MN resource limit = \$2,000 for 1 person.
- 2. F&C Groups**
- a. Unmarried Individual or Married Individual with No Community Spouse**
- Determine F&C MN countable resources, Chapter M06.
- Compare to F&C MN resource limit = \$2,000 for 1 person.
- b. Married Individual over age 18 with Community Spouse**
- Determine ABD countable resources, Chapter S11, M1480.
- Compare to ABD MN resource limit=\$2000
- 3. Are resources within MN limit?**
- Yes:** go to C “Determine MN Income” below.
- No:** person not eligible for Medicaid due to excess resources; STOP. Go to section M1460.660 for notice procedures.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date June 2016
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.410	Page 17

C. Determine MN Income

1. ABD groups

Determine ABD MN countable income, Chapter S08.

Compare to MN income limit for 1 person in individual's home locality - where the individual last resided in Virginia outside of an institution (use Group III MN limit if individual was admitted to Virginia facility from out-of-state).

2. F&C groups

Determine F&C MN income, Chapter M07.

Compare to MN income limit for 1 person in individual's home locality - where the individual last resided in Virginia outside of an institution (use Group III MN limit if individual was admitted to Virginia facility from out-of-state).

3. Is Income Less Than or Equal to MN Income Limit?

NOTE: A person who has gross income exceeding the 300% SSI limit will **always** have countable income that exceeds the MN limit.

Yes: eligible as MN; STOP. Go to section M1460.660 for enrollment and subchapter M1470 for patient pay.

No: Spenddown; excess amount is "spenddown liability." Go to 4. below for facility patients, 5. below for CBC recipients.

4. Spenddown--Facility Patients

The RUG code amount may differ from facility to facility and from patient to patient within the same facility. For MN patients, the nursing facility must be contacted to obtain the RUG code amount.

a. Spenddown Liability Less Than or Equal to the Individual's Medicaid Rate

If the spenddown liability is less than or equal to the individual's Medicaid rate, determine spenddown eligibility by projecting the facility's costs at the individual's Medicaid rate for the month. Spenddown balance after deducting projected costs at the individual's Medicaid rate should be zero or less.

The patient is eligible as MN for the whole month. Go to section M1460.660 for enrollment and subchapter M1470 for patient pay.

b. Spenddown Liability More Than the Individual's Medicaid Rate

When the spenddown liability is **more than** the individual's Medicaid rate, determine spenddown eligibility AFTER the month has passed, on a daily basis (do not project expenses) by chronologically deducting old bills and carry-over expenses, then deducting the facility daily cost at the **private** daily rate and other medical expenses as they were incurred.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.510	Page 17a

If the spenddown is met on any date within the month, the patient is eligible effective the first day of the month in which the spenddown was met. Eligibility ends the last day of the month.

Each month must be evaluated separately. These patients will always be enrolled after the month being evaluated has passed.

5. Spenddown-- CBC Patients

Do not project CBC waiver services costs. Eligibility is evaluated on a monthly basis. Determine spenddown eligibility AFTER the month has passed, by deducting old bills and carry-over expenses first, then (on a daily basis) chronologically deducting the daily CBC cost at the **private** daily rate and other medical expenses **as they are incurred**. If the spenddown balance is met on a date within the month, the patient is eligible effective the first day of the month in which the spenddown was met. Eligibility ends the last day of the month.

Each month must be evaluated separately. These patients will always be enrolled after the month being evaluated has passed.

M1460.500 RESOURCE DETERMINATION

A. Introduction

The following sections describe the resource eligibility rules that are applicable to individuals in long-term care.

B. Resource Limits

1. ABD Groups

ALL aged, blind and disabled (ABD) covered groups = \$2,000 per individual.

2. F&C Groups

F&C 300% SSI and Hospice groups = \$1,000 for individuals age 18 and over, regardless of the number of individuals in the assistance unit. Children under age 18 do not have a resource requirement.

There are no resource *limits* for any other F&C covered group. *All LTSS evaluations require evaluation of substantial home equity and asset transfers, including annuities and trusts.*

1. MN Groups

MN groups = \$2,000 for an individual and \$3,000 for 2 persons (pregnant woman with 1 unborn child; add \$100 for each additional unborn child).

C. Budget Period

The budget period for determining long-term care resource eligibility is always one month.

M1460.510 DETERMINING COUNTABLE RESOURCES

A. Married Individual

1. Married MAGI Adult

MAGI Adults do not have a resource assessment or resource limit. Evaluate substantial home equity and asset transfers, including annuities and trusts, made by the MAGI Adult and/or the spouse.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.510	Page 18

**2. With A
Community
Spouse**

See **subchapter M1480** for the rules to determine the **institutionalized individual's resource eligibility** when he is married and his spouse is a community spouse (the spouse is not in a medical institution or nursing facility).

a. Community Spouse Not Receiving Medicaid CBC Waiver Services

When both husband and wife have applied for Medicaid and one is institutionalized, and the community spouse does NOT receive Medicaid CBC waiver services, the community spouse's eligibility is processed as a noninstitutionalized individual.

NOTE: Follow resource determination rules found in chapter S11 for ABD covered groups, and in chapter M06 for F&C covered groups. The community spouse's resource eligibility is determined as a couple in the month the other spouse becomes institutionalized, and as an unmarried individual for the following months.

b. Community Spouse Receives Medicaid CBC Waiver Services

When both husband and wife have applied for Medicaid and one is institutionalized in a medical facility, and the community spouse receives Medicaid CBC waiver services, the community spouse's eligibility is processed as a married institutionalized Medicaid CBC recipient in the initial month of Medicaid CBC and afterwards, using the policy and procedures in subchapter M1480.

**2. Both Spouses
In A Medical
Facility (No
Community
Spouse)**

When the institutionalized individual's spouse is NOT a community spouse (the spouse is in a medical institution or nursing facility), the policy and procedures in subchapter M1460 that apply to an **unmarried individual** apply to the institutionalized individual effective the month of institutionalization and apply to the individual's spouse if the spouse also applies for Medicaid. Do not use subchapter M1480 because the individual is not an "institutionalized spouse" as defined in M1480.

When both husband and wife are institutionalized in a facility, the policy and procedures in subchapter M1460 that apply to **unmarried** individuals apply to each spouse in the initial month of institutionalization and afterwards.

**3. Both Spouses
Receive
Medicaid CBC**

When both spouses have applied for Medicaid and both receive Medicaid CBC waiver services, each spouse must be evaluated using policy and procedures in subchapter M1480.

**B. Unmarried
Individual**

**1. MAGI Adult
Group**

MAGI Adults do not have a resource assessment or resource limit. Evaluate substantial home equity and asset transfers, including annuities and trusts.

**2. ABD Covered
Groups**

An institutionalized individual is an assistance unit of 1 person, considered living separately from his family. No resources are deemed available from the individual's spouse. To determine the ABD resource eligibility of an unmarried individual, or married individual with no community spouse, use the ABD Resource policy and procedures found in chapter S11 and in section M1460.500.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.530	Page 18a

For the ABD 80% FPL covered group, use the ABD resource policy and procedures in chapter S11 and Appendix 2 to chapter S11.

The maximum allowable resource limit for an ABD individual is \$2,000.

NOTE: If the individual's resources exceed the resource limit, and the individual has Medicare Part A, evaluate for eligibility as QMB, SLMB, or QI (limited coverage) which have a higher resource limit.

3. F&C Covered Groups

An institutionalized individual is an assistance unit of 1 person, considered living separately from his family. No resources are deemed available from a child's parent(s).

NOTE: A pregnant woman's assistance unit includes the number of unborn children with which she is pregnant.

Use the resource policy and procedures in chapter M06 for the resource determination.

M1460.520 RETROACTIVE RESOURCE DETERMINATION

A. Policy

When an applicant reports that he received a medical service within the retroactive period, evaluate Medicaid eligibility for that period.

Evaluate resource eligibility for each month using resources available during that month.

B. Reduction of Resources

An individual cannot retroactively reduce resources. If countable resources exceeded the resource limit **throughout** a retroactive month, the individual is **not** eligible for that month. However, if an applicant reduces excess resources **within** a retroactive month, he may be eligible in the month in which the value of his resources is reduced to or below the Medicaid resource limit.

In order to reduce resources, liquid resources such as bank accounts and prepaid burial accounts must actually have been expended. Non-liquid resources must have been liquidated and the money expended.

M1460.530 HOME OWNERSHIP (NOT APPLICABLE TO ABD 80% FPL GROUP OR MAGI ADULTS)

A. Policy

The policy in this section does not apply to the ABD 80% FPL group. See Appendix 2 to chapter S11 for home ownership resource policy for the ABD 80% FPL group.

The policy in this section does not apply to MAGI Adults. However, the substantial home equity policy in M1460.160 DOES apply to MAGI Adults.

The institutionalized individual's former home in which he has an ownership interest, and which he occupied as his residence before becoming institutionalized, is not a countable resource for the first six months **following** admission to a medical facility or nursing facility. The former home is excluded indefinitely when it is occupied by a spouse, minor child, disabled adult child, or disabled parent.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.530	Page 19

B. Definitions for This Section

1. Dependent

A dependent child or parent is one who may be claimed as a dependent for tax purposes under the Internal Revenue Service's Code by either the institutionalized individual or his spouse.

2. Institutionalization

a. Definition

Institutionalization means receipt of 30 consecutive days of :

- care in a medical facility (such as a nursing facility), or
- Medicaid waiver services (such as community-based care); or
- a combination of the two.

The definition of institutionalization is also met when an individual has a signed hospice election that has been in effect for 30 consecutive days.

The 30 consecutive days requirement is expected to be met if the pre-admission screening committee provides verbal or written confirmation of its approval for the individual's receipt of long-term care (LTC) services (see M1410.010).

NOTE: For purposes of this definition, continuity is broken by 30 or more consecutive days of:

- absence from a medical institution, or
- non-receipt of Medicaid waiver services.

EXCEPTION: When an individual is readmitted in less than 30 days due to a different diagnosis or a change in condition unforeseen at the time of discharge, a new 6-month home exclusion will begin if it was medically documented that the discharge occurred because facility services were no longer required and a physician documents that the change in circumstances could not be anticipated.

b. When Institutionalization Begins

Institutionalization begins the date of admission to a nursing facility or Medicaid waiver services when the pre-admission screening committee provides verbal or written confirmation of its approval for the individual's receipt of long-term care (LTC) services, or when the individual has been in the nursing facility for at least 30 consecutive days.

Institutionalization begins the date of admission to a hospital (acute care) when the individual has actually been a patient in the hospital for 30 consecutive days or more. For example, an individual was admitted to the general hospital on March 5. He applied for Medicaid on March 6. On April 3, he was still a patient in the general hospital. He was in the hospital for 30 consecutive days on April 3; his institutionalization began on the date he was admitted to the hospital, March 5. His eligibility for March is determined as an institutionalized individual.

The date of discharge from a medical institution into the community (and not receiving CBC waiver services) or death is **NOT** included in the 30 days.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.530	Page 20

3. Home Property

The home property is defined based on the individual's covered group, except when the individual is married with as community spouse. When the individual is married with a community spouse, **go to subchapter M1480.**

a. ABD Groups

The home property definition in section M1130.100 applies to ABD covered groups. An individual's home is property that serves as his or her principal place of residence. A home shall mean the house and lot used as the principal residence and all contiguous property, as long as the value of the land, exclusive of the lot occupied by the house, does not exceed \$5,000. If the individual has property contiguous to his home, the value of the non-home contiguous property over \$5,000 is a countable resource, unless it can be excluded for another reason listed in subchapter S1130.

b. F&C Groups

The home property definition in section M0630.115 applies to F&C covered groups. Home property is the home used as the principal residence and all contiguous property. Contiguous property is the land, and improvements on that land, which adjoins the home and which is not separated by land owned by others.

4. Former Home

The patient's former home (including a mobile home) is his primary residence:

- which he owns, and
- which he occupied as his residence prior to admission to an LTC facility, or prior to moving out to receive Medicaid CBC waiver services in another person's home.

C. Exclude Former Home Indefinitely

The former home property can be excluded indefinitely when one of the following conditions is met:

1. Occupied By Spouse or Minor Child

The former home is occupied by the individual's spouse, minor dependent child under age 18, or dependent child under age 19 if attending school or vocational training.

2. Occupied By Disabled Adult Child or Disabled Parent

The former home is occupied by the individual's parent or adult child who:

- *has been determined to be* disabled according to the Medicaid disability definition;
- lived in the home with the recipient for at least one year prior to the recipient's institutionalization; and
- is dependent upon the recipient for his shelter needs.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.530	Page 21

**3. ABD Groups--
Home
Exclusion Does
Not Apply To
Contiguous
Property**

For unmarried individuals and married individuals with no community spouses, the home exclusion for ABD covered groups applies to the home (dwelling) and the plot of land on which the home is located, and to the property contiguous to the home that comes under the home exclusion by using one of the two different calculations in section M1130.100. The home exclusion DOES NOT apply to the property contiguous to the home that does **not** come under the home definition in section M1130.100 A.2.

If the ABD individual owns property contiguous to his home, the value of the non-home contiguous property is a countable resource, regardless of whether the home is occupied by a dependent relative, unless the contiguous property can be excluded for another reason listed in subchapter S1130.

**D. 6-Months Home
Exclusion**

The home is excluded as a primary residence during temporary absences for visits or to obtain medical treatment. The former home property is excluded as a resource for 6 months, beginning with the month **following** the month institutionalization begins.

**1. ABD Groups--
Exclusion Does
Not Apply To
Contiguous
Property**

The 6-month home exclusion for ABD covered groups applies to the home (dwelling) and the plot of land on which the home is located, and to the property contiguous to the home that comes under the home exclusion by using one of the two different calculations in section M1130.100. The 6-month home exclusion DOES NOT apply to the property contiguous to the home that does **not** come under the home definition in section M1130.100 A.2.

Therefore, if the ABD individual owns property contiguous to his home, the value of the non-home contiguous property is a countable resource, regardless of the individual's temporary absence, unless the contiguous property can be excluded for another reason in subchapter S1130.

**2. Facility
Admission**

The former home property is excluded for 6 full months beginning with the month **following** the month of institutionalization in a medical facility. The property is no longer "home property" after 6 months of absence due to institutionalization. An individual who has been receiving Medicaid CBC waiver services in his own home and who then enters a nursing facility receives the six months former home exclusion starting with the month following the month of admission to the facility.

Individuals re-admitted to a medical facility 30 days or more after discharge will have the six-months former home exclusion start over again.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 1999
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.530	Page 22

EXAMPLE #1: Mr. G is an unmarried aged individual who has been receiving Medicaid CBC waiver services in his home since February 2, 1997. He was admitted to a nursing facility on June 20, 1998. He owns his home, which has no contiguous property. His former home property is excluded for 6 months after admission, beginning July 1, 1998 and ending December 31, 1998

3. Medicaid CBC Waiver Services Admission

A Medicaid CBC waiver services recipient who is living away from the home established as his primary place of residence, in order to receive medical care, is entitled to the six months' home exclusion. The six months will start with the month **following** the month in which he left his home.

An individual who is discharged from a nursing facility to go home and receive Medicaid CBC waiver services is considered as living on the home property. The home property, as defined by the appropriate manual section, is excluded while the individual lives there.

EXAMPLE #2: Mr. B is an unmarried aged individual living in his home. He was admitted to Medicaid CBC waiver services on January 20, 1999, the day he moved into his daughter's home. He owns his home, which has no contiguous property. His former home property is excluded for 6 months after the month in which he moved to his daughter's home. The 6-months exclusion begins February 1, 1999 and ends July 31, 1999.

E. After Six Months

At the end of six months of continuous absence due to institutionalization, the former home property must be counted as an available resource if owned by the recipient, unless it can be excluded for another reason.

1. Exclude Indefinitely

The former home property (residence) can be excluded indefinitely when one of the conditions in section M1460.530 C. above is met.

2. Exclude Under Resource Rules

If the former residence is not excluded because it is not occupied by an individual who meets the requirements in section M1460.530 C. above, determine if it can be excluded under the resource rules applicable to the individual's covered group.

a. ABD Covered Groups

- 1) Reasonable but Unsuccessful Efforts to Sell (section M1130.140).
- 2) Indians' Interest in Trust or Restricted Lands (section S1130.150).
- 3) Other Real Property (section M1130.160).
- 4) Property Essential to Self-support (sections S1130.500 through S1130.510).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2022
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.530	Page 23

b. F&C Covered Groups

- 1) Excluded Resources (section M0630.100).
- 2) Reasonable Effort To Sell (CN) (section M0630.105).
- 3) Reasonable Effort To Sell For the Medically Needy (section M0630.110).

F. Home No Longer Excluded

If the individual's home property is no longer excluded and the individual has excess resources, cancel Medicaid because of excess resources when the individual does not have Medicare Part A. If the individual has Medicare Part A, evaluate the individual's eligibility as ABD Medicare Savings Program (MSP) which has more liberal resource requirements and limits (see M0320.600).

1. Individual Has Medicare Part A

When the individual has Medicare Part A:

- a. compare income with the ABD MSP limits; if the income is below one of the ABD MSP income limits, then
- b. evaluate the resources using ABD MSP policy as found in Chapter S11, Appendix 2.
- c. If eligible as ABD MSP only, Medicaid will not pay for nursing facility or CBC waiver services costs. Do the following:
 - prepare and send an Advance Notice of Proposed Action to the recipient;
 - cancel the recipient's coverage, then reinstate the recipient to ABD MSP limited coverage;
 - send a Medicaid LTC Communication Form (DMAS-225) to the provider, stating that the recipient is no longer eligible for full Medicaid coverage because of excess resources, but is eligible for limited ABD MSP coverage; beginning (specify the date following the cancel date of the recipient's full coverage), Medicaid will not pay for the individual's care.
- d. If NOT eligible as ABD MSP because of resources and/or income, cancel the recipient's Medicaid. Do the following:
 - prepare and send an "Advance Notice of Proposed Action" to the recipient;
 - cancel the recipient's Medicaid coverage because of excess resources or income;

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.540	Page 24

- send a DMAS-225 to the provider, stating that the recipient's Medicaid will be canceled because of excess resources (and/or income) and the effective date of cancellation.

2. Individual Does Not Have Medicare Part A

When the individual DOES NOT have Medicare Part A:

- cancel the recipient's Medicaid coverage because of excess resources;
- prepare and send an Advance Notice of Proposed Action to the recipient;
- send a DMAS-225 to the provider, stating that the recipient's Medicaid will be canceled because of excess resources, and the effective date of cancellation.

M1460.540 SUSPENSION PROCEDURES

A. Policy

This section applies ONLY to Medicaid recipients:

- who are enrolled in ongoing Medicaid coverage and
- whose patient pay exceeds the Medicaid rate.

B. Procedures

If a Medicaid recipient's patient pay exceeds the Medicaid rate and his resources go over the Medicaid resource limit, take the following actions:

1. For Recipients Who Have Medicare Part A

a. Resources Less Than or Equal to ABD MSP Resource Limit

If the recipient's resources are less than or equal to the higher ABD MSP resource limit, **determine** if the recipient's income is less than or equal to the QMB, SLMB, or QI income limit.

- When the recipient's income is less than or equal to the QMB, SLMB, or QI income limit:
 - prepare and send an advance notice to reduce the recipient's Medicaid coverage from full benefits to limited benefits (specify the appropriate QMB, SLMB, or QI coverage). Write a note on the notice telling the recipient that:
 - the limited (QMB, SLMB, or QI) benefits will NOT pay for long-term care services, and
 - if he verifies that his resources are less than or equal to the \$2,000 resource limit, he should request reinstatement of full Medicaid benefits.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.540	Page 25

- b) **cancel** the recipient's full coverage effective the last day of the month in which the 10-day advance notice period expires. Reinstatement of the recipient's coverage with the begin date as the first day of the month following the cancellation effective date, using the appropriate QMB, SLMB or QI AC.
- 2) When the recipient's income exceeds the QMB, SLMB and QI income limits, follow the procedures in 2 below (the procedures for recipients who do not have Medicare Part A).

b. Resources Exceed ABD MSP Resource Limit

If resources are greater than the ABD MSP resource limit, follow the procedures in item 2 below (the procedures for recipients who do not have Medicare Part A).

2. For Recipients Who Do NOT Have Medicare Part A

a. Prepare and Send Advance Notice

Prepare and send an advance notice to cancel the recipient's Medicaid eligibility. Specify the effective date, which is the last day of the month in which the 10-day advance notice period expires. Write a note on the notice telling the recipient that if he verifies that his resources are less than or equal to the \$2,000 resource limit before the specified date (specify the date which is 3 months from the cancel effective date), he should request reinstatement of Medicaid eligibility.

b. Cancel Medicaid Eligibility

Cancel the recipient's eligibility effective the last day of the month in which the 10-day advance notice period expires.

c. Suspend Case Administratively

Suspend the case administratively for a maximum of 3 months; do not close the case statistically. The suspension effective date is the effective date of the Medicaid cancellation in *VaCMS*. While suspended, the case remains open for a maximum of 3 months.

If, by the end of 3 months from the suspension effective date, the individual provides verification that his resources have been reduced to or below the resource limit, document the reduction in resources in the individual's *VaCMS* case record. Reinstatement of his Medicaid eligibility effective the first day of the month in which his resources are less than or equal to the resource limit.

If the individual does NOT provide verification within 3 months of the suspension effective date that his resources have been reduced to or below the resource limit, close the case administratively and statistically. Do not take any action on his enrollment in *VaCMS*, because his eligibility has already been canceled. The individual will have to file a new Medicaid application.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2019
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.600	Page 26

M1460.600 INCOME DETERMINATION

- A. Introduction** This section provides the income requirements specific to determinations of eligibility for Medicaid participation in payment of long-term care services.
- B. F&C CN** If an institutionalized individual meets an F&C CN covered group, determine if his income is within the appropriate F&C income limit. The institutionalized individual is an assistance unit of one person; no income is deemed from responsible relatives. Use the policy and procedures in chapters M04 and M07 to determine countable income.
- C. MAGI Adult Group** If an individual is between the ages of 19 and 64 and is not entitled to or receiving Medicare, determine if his MAGI household income is less than or equal to 138% of the Federal Poverty Level (FPL). Use the policy in Chapter M04 to determine countable income.
- D. ABD 80% FPL Group** If an individual is aged, blind or disabled, determine if his income is less than or equal to 80% of the FPL. See M0810.002 A.5 for the ABD 80% FPL income limits. The ABD income policy in Chapter S08 is used to determine countable income for the ABD 80% FPL covered group. *However, the income items listed in Sections M1460.610 and M1460.611 are NOT counted as income in determining income eligibility as an institutionalized individual for the ABD 80% FPL covered group.*
- E. 300% SSI Income Limit Group** For purposes of this section, we refer to the ABD covered group and the F&C covered group of “individuals in medical facilities who have income less than or equal to 300% of the SSI individual payment limit” and “individuals receiving Medicaid waiver services who have income less than or equal to 300% of the SSI individual payment limit” as one covered group. We refer to this one group as “institutionalized individuals who have income within 300% of SSI” or the “300% SSI group.”
- 1. Assistance Unit** The institutionalized individual is an assistance unit of one person; no income is deemed from responsible relatives.
- 2. Income Limit** The income limit for ABD and F&C individuals in the 300% SSI group is 300% of the SSI individual payment limit (see M0810.002 A. 3).
- 3. Countable Income** **Income sources listed in section M1460.610 are NOT considered income. Income sources listed in section M1460.611 ARE counted as income.**
All other income is counted. The individual’s gross income is counted; no exclusions are deducted.

To determine an income type or source and to determine how to count the income, use the policy and procedures in chapter S08 for all individuals (both ABD and F&C) in this covered group.

Income is projected for the month for which eligibility for LTC is being determined. This calculation is based upon the income received in the past month unless there is documentation that a change has occurred or can reasonably be expected to occur which will change the amount expected to be received.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.610	Page 27

**E. MN Income - All
MN Covered
Groups**

The medically needy (MN) individual income limits are listed in Appendix 5 to subchapter M0710 and in section M0810.002 A.4.

**1. ABD MN
Covered
Groups**

Evaluate MN resource and income eligibility for ABD individuals who have income over the 300% SSI income limit.

The income sources listed in sections M1460.610 “What is Not Income” and M1460.611 “Countable Income for the 300% SSI Group” are NOT counted. Countable income is determined by the income policy in chapter S08; applicable exclusions are deducted from gross income to calculate the individual’s countable income.

The income actually received in the retroactive period is considered for retroactive eligibility. The income expected to be received within the application month is considered when determining eligibility in that month. The income expected to be received within a month is counted in that month for ongoing eligibility.

**2. F&C MN
Covered
Groups**

Evaluate MN resource and income eligibility for F&C individuals who have income over the 300% SSI income limit.

Countable income is determined by the income policy in chapter M07, using a monthly budget period; applicable exclusions are deducted from gross income to calculate the individual’s countable income. In addition, the income sources listed in sections M1460.610 B and M1460.611 are NOT counted.

Anticipated income is projected for the month for which eligibility is being determined. This calculation is based upon the income received in the prior month unless there is documentation that a change has occurred or can reasonably be expected to occur which will change the amount to be received.

M1460.610 WHAT IS NOT INCOME

A. Introduction

This section contains a list of items that are not considered as income when determining income eligibility for institutionalized individuals in medical facilities or Medicaid CBC waiver services.

NOTE: The income items in C. below ARE COUNTED as income only when determining F&C medically needy eligibility.

**B. What Is Not
Income - All
Covered Groups**

Do not consider the types of items in this subsection as income **when determining eligibility or patient pay for all covered groups.**

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2010
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.610	Page 28

1. **Federal/State Government Payments & Programs** *Benefits provided under the following federal and state government program payments are not income:*
 - a. Supplemental Security Income (SSI) payments.
 - b. Auxiliary grants (AG) payments.
 - c. Temporary Assistance to Needy Families (TANF) payments.
 - d. *Supplemental Nutrition Assistance Program (SNAP) (formerly Food Stamps).*
 - e. Women, Infants and Children (WIC) coupons.
 - f. IV-E and Non IV-E Foster Care payments [ref. 1612(b)(10)].
 - g. IV-E and Non IV-E Adoption Assistance payments.
 - h. Food and Meal programs with government involvement:
 - school breakfasts,
 - school lunches,
 - milk programs.

2. **Medical or Social Services** (S0815.050) Cash or in-kind items received from governmental medical or social services programs, unless it is remuneration for work or activities performed as a participant in a sheltered workshop or an incentive payment to encourage individuals to use specific facilities or to participate in specific medical or social services programs, is not income. For example, Title XX, Title IV-B, Child Welfare Services, Title V, Maternal and Child Health Services, services under the Rehabilitation Act of 1973 are cash or in-kind medical or social services received from a government program and are NOT income.

NOTE: Education in public schools, vocational training and government income maintenance programs such as VA are NOT social services programs. The provision of food, shelter, laundry, or recreation is not a social service.

3. **Non-government Medical or Social Services** (S0815.050 F1) Cash received from **non-governmental** medical or social services programs, such as Red Cross or Salvation Army, for medical or social services already received by individuals and approved by the organizations is not income.

4. **Personal Services** (S0815.150) Personal services performed for an individual is not income, e.g., mowing the lawn, doing housecleaning, going to the grocery store, babysitting are not counted as income to the individual who receives the personal service.

5. **Conversion of a Resource** (S0815.200) Receipts from the sale, exchange, or replacement of a resource are not income; they are a conversion of a resource from one form of resource to another form of resource.

6. **Income Tax Refund** (S0815.270) Any amount refunded on income taxes already paid is not income.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.610	Page 29

7. Credit Life/Disability Payments (S0815.300) Payments made under a credit life or credit disability insurance policy on behalf of an individual are not income.

8. Loan Proceeds (S0815.350) Proceeds of a bona fide loan are not income to the borrower because of the borrower's obligation to repay.

9. Third Party Payments a. Payments made by another individual
(S0815.400) Payment of an individual's bills (including Medicare supplementary medical insurance or other medical insurance premiums) by a third party directly to the supplier is not income.

Payments made directly to the service provider by another person for the individual's private room or "sitter" in a medical facility are **not** income to the individual. Refer all cases of Medicaid eligible recipients who have a "sitter" to DMAS, Division of *Aging and Disability Services*, for DMAS review to assure that DMAS is not paying the facility for services provided by the sitter.

EXCEPTION: For F&C covered groups **except** the 300% SSI group: If the person paying the bill(s) is the child's absent father and the Division of Child Support Enforcement (DCSE) has not established an obligation for the absent parent, the amount(s) paid by the absent parent for the child is counted as income.

b. Long-term care (LTC) insurance payments

Institutionalized individuals who have LTC insurance coverage must have the LTC insurance coverage information entered into the recipient's TPL file in VaCMS. The insurance policy type is "H" and the coverage type is "N."

If the patient receives the payment from the insurance company, it is not counted as income. The patient should assign it to the provider. If the patient cannot do this, or the policy prohibits assignment, the payment should be given directly to the provider. The provider should report the payment as a third party payment on its claim form. If the patient received the payment and cannot give it to the provider for some reason, then the patient should send the insurance payment to the DMAS Fiscal Division, *Cashiering Unit*, 600 E. Broad Street, Suite 1300, Richmond, Virginia 23219.

10. Replacement Income (S0815.450) If an individual's income is lost, stolen, or destroyed and the individual receives a replacement, the replacement is not income if the original payment was counted in determining the individual's Medicaid eligibility.

11. Erroneous Payments (S0815.460) A payment is not income when the individual is aware that he is not due the money and returns the check uncashed or otherwise refunds all of the erroneously received money.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.610	Page 30

- 12. Weatheriza-tion Assistance** (S0815.500) Weatherization assistance (e.g., insulation, storm doors, and windows, etc.) is not income.
- 13. Certain Employer Payments** (S0815.600) The following payments by an employer are not income **UNLESS** the funds for them are deducted from the employee's salary:
- funds the employer uses to purchase qualified benefits under a "cafeteria" plan;
 - employer contribution to a health insurance or retirement plan;
 - the employer's share of FICA taxes or unemployment compensation taxes in all cases;
 - the employer's share of FICA taxes or unemployment compensation taxes paid by the employer on wages for domestic service in the private home of the employer or for agricultural labor only, to the extent that the employee does not reimburse the employer.
- 14. Payments to Victims of Nazi Persecution** Any payments made to individuals because of their status as victims of Nazi persecution are not income [P.L.103-286 and 1902(r)(1)].
- 15. Advance Payments That will Be Reimbursed** Advance payments made by a person other than the patient which are expected to be reimbursed once Medicaid is approved, and payments made by outside sources to hold the facility bed while the patient is hospitalized, are **not counted as income** in determining eligibility or patient pay.
- There are instances when the family of a prospective Medicaid patient, or other interested party(ies), makes an advance payment on the cost of facility care prior to or during the Medicaid application process to assure the Patient's admission and continued care. The individual may have been promised that the advance payment will be refunded if Medicaid eligibility is established. Any monies contributed toward the cost of patient care pending a Medicaid eligibility determination must be reimbursed to the patient or the contributing party by the facility once Medicaid eligibility is established.
- 16. Medical Expense Reimbursement** Medical expense reimbursement from either VA or an insurance policy is not income. Medical expense reimbursements are resources.

The income in items 17 through 23 below are not income by other federal statutes or law:

- 17. Energy Assistance** Energy Assistance through Block Grants (Virginia's Fuel Assistance payments) is excluded [P.L. 93-644].
- 18. Radiation Exposure Trust Fund** Radiation Exposure Compensation Trust Fund payments are excluded [P.L. 101-426].

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.610	Page 30a

19. Agent Orange

Agent Orange Payments are excluded [P. L. 101-239].

20. Native American Funds

The following funds for Native Americans are excluded *for all covered groups*:

- a. Alaska Native Claims Settlement Act (cash payments not to exceed \$2,000) [P.L. 100-241]
- b. Maine Claims Settlement Act [P.L. 96-420]
- c. Blackfeet and Gros Ventre [P.L. 92-254]
- d. Grand River Band of Ottawa [P.L. 94-540]
- e. Red Lake Band of Chippewa [P.L. 98-123]

For MAGI Adults, the following payments to American Indian/Alaska Natives are also not counted as income:

- a. *distributions received from the Alaska Native Corporations and Settlement Trusts (Public Law 100-241),*
- b. *distributions from any property held in trust, subject to Federal restrictions, located within the most recent boundaries of a prior Federal reservation, or otherwise under the Supervision of the Interior,*
- c. *distribution and payments from rents, leases, rights of way, royalties, usage rights, or natural resource extractions and harvest from:*
 - *rights of any lands held in trust located within the most recent boundaries of a prior Federal reservation or under the supervision of the Secretary of the Interior,*
 - *federally protected rights regarding off-reservation hunting, fishing, gathering or usage of natural resources,*
 - *distributions resulting from real property ownership interests related to natural resources and improvements,*
 - *located on or near a reservation of within the most recent boundaries of a prior Federal reservation, or*
 - *resulting from the exercise of federally-protected rights relating to such property ownership interests.*
- d. *payments resulting from ownership interests in or usage rights to items that have unique religious, spiritual, traditional, or cultural significance or right or rights that support subsistence or a traditional lifestyles according to applicable Tribal Law or custom.*
- e. *Student financial assistance provided under the Bureau of Indian Affairs Education Program.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2019
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.610	Page 31

**C. What Is NOT
Income For All
Covered Groups
EXCEPT F&C
MN**

The items below are NOT income when determining eligibility *as an institutionalized individual* for all covered groups EXCEPT for the F&C MN covered groups. Count these income sources in the F&C medically needy income determination, **but NOT in the patient pay calculation.**

**1. Specific VA
Payments**

The following VA payments are NOT income for all covered groups EXCEPT the F&C MN covered groups:

- a. Payments for Aid and Attendance or housebound allowances. Refer to section M1470.100 for counting Aid and Attendance payments as income in the patient pay calculation.

NOTE: This applies to all LTC recipients, including those patients who reside in state veterans' care centers.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.610	Page 32

- b. Payments for unusual medical expenses.
- c. Payments made as part of a VA program of vocational rehabilitation.
- d. VA clothing allowance.
- e. Any pension paid to a nursing facility patient who is
 - a veteran with no dependents,
 - a veteran's surviving spouse who has no child, or
 - *a veteran's dependent child.*

NOTE: Refer to section M1470.100 for counting VA pension payments as income for post-eligibility determinations. This applies to all LTC recipients, including those patients who reside in state veterans' care centers.

- f. Any portion of a VA educational benefit which is a withdrawal of the veteran's own contribution is a conversion of a resource and is not income.

**2. VA
Augmented
Benefits**

An absent dependent's portion of an augmented VA benefit received by the individual on or after 11-17-94 is NOT income to the individual when determining his eligibility in any covered group EXCEPT an F&C MN covered group.

VA Augmented benefits are COUNTED as income when determining eligibility in the F&C MN covered groups.

**3. Return of
Money**

(S0815.250) A rebate, refund, or other return of money that an individual has already paid is NOT income to the individual when determining his eligibility in any covered group EXCEPT an F&C MN covered group. The key idea is a return of the individual's own money. Some "rebates" do not fit this category, such as a cooperative operating as a jointly owned business pays a "rebate" as a return on a member's investment; this "rebate" is unearned income similar to a dividend.

4. Death Benefits

Death benefits **equal** to cost of last illness and burial are NOT income in all covered groups EXCEPT the F&C MN covered groups.

Any amount of the death benefit that **exceeds** the costs of last illness and burial **is counted as income** for eligibility and patient pay **in all covered groups**.

**5. Austrian
Social
Insurance**

Austrian Social Insurance payments that meet the requirements in S0830.715 are NOT income in all covered groups EXCEPT the F&C MN covered groups.

**6. Native
American
Funds**

- a. Seneca Nation Settlement Act [ref. P.L. 101-503]
- b. Yakima Indian Nation [ref. P.L. 99-433]
- c. Papago Tribe of Arizona [ref. P.L. 97-408]
- d. Shawnee Indians [ref. P.L. 97-372]

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 1999
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.611	Page 33

- e. Miami Tribe of Oklahoma and Indiana [ref. P.L. 97-376]
- f. Clallam Tribe [ref. P.L. 97-402]
- g. Pembina Chippewa [ref. P.L. 97-403]
- h. Confederated Tribes of Warm Springs Reservation [ref. P.L. 97-436].

M1460.611 COUNTABLE INCOME FOR THE 300% SSI GROUP

- A. Applicability** This section contains a list of income sources and amounts of income that are COUNTED when determining income eligibility for the 300% SSI group, but may be excluded when determining income eligibility for the other covered groups.
- B. Items Under 1612(b) and Footnote 57 (counted also as patient pay income)** **Count the following income sources in this subsection** when determining eligibility for the **300% SSI income limit group**.
- DO NOT COUNT the income sources** in this section when determining the income eligibility in **all other Medicaid covered groups**.
- 1. ACTION Program** Action Program. This is the federal domestic volunteer agency which provides programs such as the Special and Demonstration Volunteer Programs. This includes the following programs: [Refer to P.L. 93-113]
 - Retired Senior Volunteer Program (RSVP)
 - Foster Grandparent Program
 - Senior Companion Program
 - University Year for Action
 - VISTA
 - Special and Demonstration Volunteer Programs.
 - 2. BIA Student Assistance** Bureau of Indian Affairs Student Assistance [ref. P.L. 89-329].
 - 3. Disaster Assistance** Presidentially declared disaster assistance. This includes assistance from federal programs and agencies, joint federal and state programs, state or local government programs, and private organizations such as the Red Cross [1612(b) (11)].
 - 4. EITC** Earned income tax credit payments [1612(b) (19)].
 - 5. Federal Relocation** Federal Relocation Assistance [ref. P.L. 91-646].
 - 6. Infrequent or Irregular Income** Any infrequent/irregular income. See Chapter S08 for the ABD policy. See Chapter M07 for the F&C policy.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2000
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.611	Page 34

7. Native Americans' Funds

Funds for Native Americans, including funds from:

- Indian Tribal Judgment Funds Use or Distribution Act [ref. P.L. 93-134]
- Indian Tribes Submarginal Land Act [ref. P.L. 94-114].

8. Specific Restitution

Japanese-American and Aleutian Restitution payments [ref. P.L. 100-383].

9. Grants, Scholarships, Fellowships

Any portion of a grant, scholarship or fellowship that is for the cost of tuition and fees at any educational institution, including those for vocational or technical training [1612(b)(7)].

10. Student Loans & Grants

The following student loans or grants:

- a. National Defense Student Loans [ref. P.L. 89-329].
- b. Pell Grants [ref. P.L. 89-329].
- c. Supplemental Education Opportunity Grants (SEOG) [ref. P.L. 89-329].
- d. State Student Incentive Grants [ref. P.L. 89-329].

C. Count for 300% SSI Group; (counted as patient pay income)

Count the income sources in this subsection when determining eligibility and patient pay for the **300% SSI group AND all F&C covered groups**.

Do not count the income sources in this section when determining the Income eligibility of the **ABD MN** covered groups.

1. Interest on Disaster Assistance

Interest income on disaster assistance within first nine months of receipt of the payment [1612(b) (12)].

2. Tax Refund

Tax refund on food or real property.

3. Assistance Payments

State or local assistance payments that are based on need [1612(b) (6)].

4. Energy Assistance

Support or maintenance assistance which is based on need and which is furnished in kind by a nonprofit agency, or furnished by supplier of home heating oil or gas, by an entity providing home energy, or by a municipal utility providing home energy [1612(b)(13)]. Energy assistance that is provided by a source other than the "Block Grants" (Virginia's Fuel Program) [1612(b) (13)].

5. Housing Assistance

Housing assistance (including Farmer's Home Assistance payments) under the U.S. Housing Act of 1937, the National Housing Act, section 101 of the Housing and Urban Development Act of 1965, title V of the Housing Act of 1949, or section 202(h) of the Housing Act of 1959 [1612(b) (14)] *paid directly to the applicant/recipient. Do not count housing assistance payments that are not paid directly to the applicant/recipient.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2022
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.611	Page 35

- 6. Domestic Travel Tickets** Gifts of domestic travel tickets [1612(b)(15)].
- 7. Victim's Compensation** Victim's compensation provided by a state.
- 8. Tech-related Assistance** Tech-Related Assistance for Individuals with Disabilities [ref. P.L. 100-407].
- 9. \$20 General Exclusion** \$20 a month general income exclusion for the unit.
- EXCEPTION:** Certain veterans (VA) benefits are not subject to the \$20 income exclusion. Refer to subchapter S0830 for complete explanation of which VA payments are entitled to the \$20 general exclusion.
- 10. PASS Income** Any unearned income used to fulfill an SSI approved plan to achieve self-support (PASS). See item 12 below for earned income used to fulfill a PASS [1612(b) (4)(A) & (B)].
- 11. Earned Income Exclusions** The following earned income exclusions are not deducted for the 300% SSI group:
- a. For 2022, up to \$2,040 per month, but not more than \$8,230 in a calendar year, of the earned income of a blind or disabled student child.
 - For 2021, up to \$1,930 per month, but not more than \$7,770 in a calendar year, of the earned income of a blind or disabled student child.
 - b. Any portion of the \$20 monthly general income exclusion which has not been excluded from unearned income in that same month [1612(b) (2)(A)].
 - c. \$65 of earned income in a month [1612(b) (4)(C)].
 - d. IRWE - earned income of disabled individuals used to pay impairment-related work expenses [1612(b) (4)(B)].
 - e. One-half of remaining earned income in a month [1612(b) (4)(C)].
 - f. BWE - Earned income of blind individuals used to meet work expenses [1612(b) (4)(A)].
 - g. Earned income used to fulfill an SSI approved plan to achieve self-support (PASS) [1612(b) (4)(A) & (B)].
- 12. Child Support** Child support payments received from an absent parent for a blind or Disabled child [1612(b) (9)].

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2000
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.640	Page 36

13. Native American Funds

The following Native American funds (only exclude for ABD MN groups):

- a. Puyallup Tribe [ref. P.L. 101-41]
- b. White Earth Reservation Land Settlement [ref. P.L. 99-264]
- c. Chippewas of Mississippi [ref. P.L. 99-377]
- d. Saginaw Chippewas of Michigan [ref. P.L. 99-346]
- e. Shoalwater Bay Indian Tribe [ref. P.L. 98-432]
- f. Wyandotte Tribe [ref. P.L. 98-602]
- g. Chippewas of Lake Superior [ref. P.L. 99-146]
- h. Cow Creek Band of Umpqua [ref. P.L. 100-139]
- i. Coushatta Tribe of Louisiana [ref. P.L. 100-411]
- j. Wisconsin Band of Potawatomi [ref. P.L. 100-581]
- k. Seminole Indians [ref. P.L. 101-277]
- l. receipts from land distributed to:
 - Pueblo of Santa Ana [ref. P.L. 95-498]
 - Pueblo of Zia [ref. P.L. 95-499].

14. State/Local Relocation

State or local relocation assistance [1612(b) (18)].

15. USC Title 37 Section 310

Special pay received pursuant to section 310 of title 37, United States Code [1612(b)(20)].

NOTE: For additional F&C medically needy (MN) income exclusions, go to Chapter M07. For additional ABD medically needy (MN) income exclusions, go to Chapter S08.

M1460.620 RESERVED

M1460.640 INCOME DETERMINATION PROCESS FOR STAYS LESS THAN 30 DAYS

A. Policy - Individual in An Institution for Less Than 30 Days

This subsection is applicable ONLY if it is known that the time spent in the institution has been, or will be, less than 30 days. If the individual is institutionalized for less than 30 days, Medicaid eligibility is determined as a non-institutionalized individual because the definition of “institutionalization” is not met. If there is no break between a hospital stay and admission to a nursing facility or Medicaid CBC waiver services, the hospital days count toward the 30 days in the “institutionalization” definition.

B. Recipient

If a Medicaid recipient is admitted to a medical institution for less than 30 days, go to subchapter M1470 for patient pay policy and procedures.

C. Applicant

If the individual is NOT a Medicaid recipient and applies for Medicaid determine the individual’s income eligibility as a non-institutionalized individual. Go to Chapter M07 for F&C or S08 for ABD to determine the individual’s income eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.650	Page 37

M1460.650 RETROACTIVE INCOME DETERMINATION

A. Policy

The retroactive period is the three months immediately prior to the Application month. The three-month retroactive period cannot include a portion of a prior Medicaid medically needy spenddown budget period in which eligibility was established.

1. Institutionalized Individual

For the retroactive months in which the individual was institutionalized in a medical facility, determine income eligibility on a monthly basis using the policy and procedures in this subchapter (M1460). An individual who lived outside of a medical institution during the retroactive period must have retroactive Medicaid eligibility determined as a non-institutionalized individual.

A spenddown must be established for any month(s) during which excess income existed. Go to M1460.700 for spenddown policies and procedures for medically needy institutionalized individuals.

2. Individual Not Institutionalized

For the retroactive months in which the individual was NOT institutionalized, determine income eligibility for the ABD groups using the ABD policy and procedures in chapter S08. Determine income eligibility for the F&C groups using policy and procedures in chapters *M04* and *M07*. *Determine income eligibility for MAGI Adults using the policy and procedures in chapter M04.*

If the individual meets a MN covered group, a spenddown must be established for any month(s) during which excess income existed. See Chapter M13 for spenddown policies and procedures. There is no MN covered group for MAGI Adults.

3. Retroactive Entitlement

If an applicant meets all eligibility requirements, he is entitled to Medicaid coverage for the month(s) in which all eligibility factors were met.

B. Countable Income

Countable income is that income which was actually received in the retroactive month(s). Count the income received in the months in which the individual meets all other Medicaid eligibility requirements.

If the individual was CN in the retroactive month, the countable income is compared to the appropriate income limit for the retroactive month. **Medicaid income eligibility is determined on a monthly basis for the MN institutionalized individual.**

C. Entitlement

Retroactive coverage cannot begin earlier than the first day of the third month prior to the application month. When an applicant reports that he received a medical service within the retroactive period, entitlement for Medicaid will begin with the first day of the third month prior to the application month, provided all eligibility factors were met in all three months. If the institutionalized applicant had excess income in the retroactive period, entitlement may begin the first day of the month in which the retroactive spenddown was met.

For additional information, refer to section M1510.101.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.660	Page 38

**D. Retroactive
Income
Determination
Example**

EXAMPLE #3: A disabled institutionalized individual applies for Medicaid on June 5 and requests retroactive coverage for unpaid medical bills that he incurred in March, April, and May. His disability onset date was April 10. He was institutionalized on April 10.

The retroactive period is March, April and May. He is not eligible for March because he did not meet a covered group in March. The income he received in April and May is counted monthly because he was institutionalized in each month. He is resource eligible for all three months.

His April income is calculated and compared to the monthly 300% SSI income limit. It exceeds that limit. His May income is calculated and compared to the monthly 300% SSI income limit; it is within the limit. Therefore, he is placed on a one-month retroactive spenddown for April, and is enrolled in the 300% SSI covered group for May.

M1460.660 NOTICES & ENROLLMENT PROCEDURES FOR CATEGORICALLY NEEDY

**A. CN Eligible
Enrollment**

Enroll the recipient with the appropriate CN aid category (AC) as follows:

1. SSI

011 Aged
031 Blind
051 Disabled

**2. “Protected”
ABD Covered
Groups**

021 Aged
041 Blind
061 Disabled

3. MAGI Adults

100 Parent/Caretaker-relative; income at or below 100% FPL
101 Parent/Caretaker-relative; income greater than 100% FPL, but less than or equal to 138% FPL (133% + 5% disregard)
102 Childless Adult; income at or below 100% FPL (no disregard)
103 Childless Adult; income greater than 100% FPL, but less than or equal to 138% FPL (133% + 5% disregard)
106 Presumptive Eligible MAGI Adult; income at or below 138% FPL (133% + 5% disregard)

4. ABD 80% FPL

029 Aged
039 Blind
049 Disabled

**5. MEDICAID
WORKS**

059

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.660	Page 39

6. 300% SSI**a. ABD**

Not dually eligible as a Qualified Medicare Beneficiary (QMB) or Special Low Income Medicare Beneficiary (SLMB); individual does not have Medicare Part A and/or income equal to or greater than 120% FPL:

- 020** Aged
- 040** Blind
- 060** Disabled

Dually eligible; individual has Medicare Part A and income within 100% FPL

- 022** Aged also QMB
- 042** Blind also QMB
- 062** Disabled also QMB

Dually eligible; individual has Medicare Part A and income greater than 100% FPL but less than 120% FPL

- **025** aged individual also SLMB
- **045** blind or disabled also SLMB

b. F&C

060 F&C who does not meet “Individuals Under Age 21 in an ICF or ICR/MR covered group, not blind or disabled

082 Institutionalized child under age 21 in an ICF or ICF/MR, not blind or disabled

NOTE: Children who are eligible in the Child Under Age 19, FAMIS Plus, covered group should be enrolled in the appropriate AC for their age and income (see *M1460.660 A.10* below)

7. All Foster Care and Adoption Assistance

072 Adoption Assistance
076 Foster Care

8. Individuals Under age 21

075 child under supervision of Juvenile Justice Department
082 Child in an ICF or ICF/MR

9. LIFC

081 Parent/caretaker of a dependent child
083 Unemployed parent of a dependent child; 2 parent household

10. Child Under Age 19 FAMIS Plus

091 Child under age 6 w/income less than or equal to the **100% FPL**
090 Child under age 6, income greater than the **100% FPL** but less than or equal to the **133% FPL**
092 Child age 6 to 19 **insured or uninsured** w/income less than or equal to the **100% FPL**; or **insured** w/income greater than 100% and less than or equal to the **133% FPL**
094 **Uninsured** child age 6 to 19 w/income greater than 100% FPL and less than or equal to the **133% FPL**

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2018
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.700	Page 40

11. Pregnant Women 091

12. BCCPTA 066

- B. CN Eligible Complete & Send Notice** Complete a “Notice of Action on Medicaid and FAMIS to notify the individual of his Medicaid eligibility and coverage begin date. Go to subchapter M1470 to determine the individual’s patient pay.
- C. Income Exceeds CN Covered Groups Limits** If income exceeds the 300% SSI limit, evaluate as MN. If the individual meets an MN covered group, re-calculate countable income for MN.
- Subtract the income exclusions listed in sections M1460.610 and 611 that apply to the individual’s MN covered group. Go to section M1460.700 below.
- If the individual does NOT meet an MN covered group, he is not eligible for Medicaid; go to subsection D. below.
- D. Ineligible--Notice** Complete and send a “Notice of Action on Medicaid and FAMIS” to the individual notifying him that he is not eligible for Medicaid and of his appeal rights.

M1460.700 MEDICALLY NEEDY INCOME & SPENDDOWN

- A. Policy** Institutionalized individuals whose income exceeds the 300% SSI income limit must be placed on a monthly medically needy (MN) spenddown if they meet a MN covered group and have countable resources that are less than or equal to the MN resource limit. Countable income for the MN is different than countable income for the 300% SSI covered group. Recalculate income using medically needy income principles.
- For individuals who were within a spenddown budget period prior to the month in which they become institutionalized, prorate and shorten the spenddown budget period for the months prior to admission to long-term care services.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.710	Page 41

Income for all LTC recipients is determined on a monthly basis. Upon receipt of long term care services, the spenddown budget period is one month. A separate monthly spenddown budget period is established for each month of receipt of LTC services.

A spenddown case is considered denied; however, the application is valid for a certification period of 12 months from the last application or redetermination.

B. Spenddown Procedures

The spenddown procedures for facility patients differ from the spenddown procedures for CBC patients. The expected monthly cost of the facility care is projected at the beginning of the month. The cost of CBC is NOT projected and must be deducted daily as incurred. Specific instructions for determining MN income eligibility for facility and CBC patients are provided in the following sections:

- M1460.710 Spenddown For Facility Patients
- M1460.740 Spenddown For Patients Receiving CBC
- M1460.750 Medically Needy Spenddown Enrollment and Post-eligibility Procedures.

M1460.710 SPENDDOWN FOR FACILITY PATIENTS

A. Policy

Facility patients in the MN classification fall into two distinct subgroups for the purpose of spenddown eligibility determination. These subgroups are:

1. individuals with a spenddown liability less than or equal to the *individual's* Medicaid rate.
2. individuals with a spenddown liability greater than the *individual's* Medicaid rate.

The RUG code amount may differ from facility to facility and from patient to patient within the same facility. The nursing facility must be contacted to obtain the RUG code amount whenever a daily facility cost of care is needed to determine eligibility and patient pay for medically needy individuals.

Entitlement and enrollment procedures depend on whether the individual's spenddown liability is less than, equal to or greater than the Medicaid rate.

Applications for individuals who are placed on spenddown are valid for a 12 month period and the cases are subject to annual redetermination.

B. Determine the Spenddown Liability

Calculate the individual's monthly MN income:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2019
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.710	Page 42

1. **ABD MN Groups**
 - a. Start with the gross monthly income for the ABD MN income determination found in section M1460.410 C.
 - b. Subtract the applicable ABD MN income exclusions. The result is the MN countable income.
 - c. Subtract the monthly MN income limit for 1 person in the individual's home locality from the MN monthly countable income. The remainder is the ABD individual's spenddown liability.
2. **F&C MN Groups**
 - a. Start with the gross monthly income for the F&C MN income determination found in section M1460.410 C.
 - b. If the individual has earned income, subtract the F&C earned income exclusions in M0720.500 except for the 30 + 1/3 exclusion which is not applicable to this group.

If the individual has child support income, subtract the \$50 child support exclusion. See section M0730.400.
 - a. The remainder is the MN monthly countable income.
 - d. Subtract the monthly MN income limit appropriate to the individual's home locality from the MN monthly countable income. The remainder is the F&C individual's spenddown liability.
- C. **Determine the Individual's Projected Medicaid Rate**
The individual's projected monthly Medicaid rate is the daily RUG code amount at the time of the spenddown calculation multiplied by 31 days. **For the month of entry, use the actual number of days that care was received or is projected to be received in the facility.**
- D. **Compare**
Compare the individual's spenddown liability to the individual's Medicaid rate.
- E. **SD Liability Is Less Than or Equal To Medicaid Rate**
If the spenddown liability is less than or equal to the individual's Medicaid rate, the individual is income eligible as medically needy for the full month. Individuals with a spenddown liability less than or equal to the individual's Medicaid rate will meet their spenddown based on the Medicaid rate alone. The Medicaid rate is projected and compared to the spenddown liability. Because the spenddown liability is less than the individual's Medicaid rate, eligibility begins the first day of the month.

Go to section M1460.750 below for enrollment procedures.
- F. **SD Liability Is Greater Than Medicaid Rate**
If the spenddown liability is greater than the Medicaid rate, the individual is NOT income eligible as MN. The individual must incur medical expenses, including old bills, carry-over expenses and the facility's cost of care at the private rate, which equal or exceed the spenddown liability for the month. These determinations are made monthly, retrospectively, after the month has passed and the expenses have actually been incurred.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.710	Page 43

To determine spenddown eligibility for a medically needy individual whose spenddown liability is greater than the *individual's* Medicaid rate, go to G. below.

**G. Facility
Spenddown
Determination
Procedures**

To determine spenddown eligibility for a medically needy institutionalized individual whose spenddown liability is greater than the *individual's* Medicaid rate, take the following actions:

**1. Calculate
Private Cost
of Care**

Multiply the facility's **private** per diem rate by the number of days the individual was actually in the facility in the month. Do not count any days the individual was in a hospital during the month.

The result is the private cost of care for the month.

**2. Compare to
Spenddown
Liability**

Compare the private cost of care to the individual's spenddown liability for the month.

a. Private Cost of Care Greater Than or Equal To Spenddown Liability

If the private cost of care is **greater than or equal to** the individual's spenddown liability, the individual meets the spenddown in the month because of the private cost of care. He is entitled to **full-month coverage** for the month in which the spenddown was met.

Enroll the individual in Medicaid with the begin date of the first of the month, the end date the last day of the month. Go to section M1460.750 below for enrollment procedures. Determine patient pay according to subchapter M1470.

b. Private Cost of Care Less Than Spenddown Liability

If the private cost of care is less than the individual's spenddown liability, **determine spenddown on a day-by-day basis** in the month by deducting allowable incurred expenses from the spenddown liability.

From the spenddown liability, deduct old bills, carry-over expenses and incurred medical/remedial care expenses per subchapter M1340. When the monthly spenddown liability is reduced to \$0, eligibility is established. Eligibility can be established only AFTER the expenses are actually incurred.

If the spenddown is met any time during the month, the individual is eligible for full month coverage. Enroll the individual in Medicaid with the begin date of the first of the month, the end date the last day of the month. Go to section M1460.750 below for enrollment procedures.

Determine patient pay according to subchapter M1470.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.710	Page 44

**3. Example -
Spenddown
Liability
Greater than
Cost of Care,
(using July
2014 figures)**

EXAMPLE #4: Mr. Not lives in Group III and applied for Medicaid on April 21 *and was* determined disabled by *Disability Determination Services (DDS)*. He is in a nursing facility and was admitted on April 1. His income is \$2,800 per month disability benefit from a private company. He is not eligible for retroactive Medicaid because he had excess resources throughout the retroactive period. His resources are within the Medicaid limit in April (application month).

He is not eligible as CN because his \$2,800 gross income exceeds the 300% SSI income limit. The *individual's* Medicaid rate is \$100 per day. His MN income eligibility is calculated:

\$2,800.00	disability benefit
- <u>20.00</u>	general income exclusion
\$2,780.00	MN countable income
- <u>457.63</u>	MNIL for 1 month for 1 person in Group III
\$2,322.37	spenddown liability

The *individual's* Medicaid rate for the admission month is calculated as follows:

\$100.00	<i>daily RUG code amount</i>
x <u>30</u>	days
\$3,000.00	<i>individual's</i> projected Medicaid rate

The \$2,322.37 spenddown liability is *less* than the *individual's* Medicaid rate of \$3,000.00. Because his spenddown liability is *less* than the Medicaid rate, his application is *approved for ongoing coverage*.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.710	Page 45

4. Example - On Prior Spenddown, Spenddown Liability Greater Than Cost of Care (Using July 2014 Figures)

EXAMPLE #5: Ms. Was, *age 62*, lives in Group I and applied for Medicaid on May 6, 2015. She is in a nursing facility and was admitted on May 1. She had applied for Medicaid previously and was on a spenddown from December 1, 2013 through May 31, 2014, which she met on May 2, 2014. She did not re-apply until May 2015. She verifies that she has an unpaid \$2,300 hospital bill and a \$1,500 physician's bill for September 10 to September 12, 2014 (total = \$3,800) on which she pays \$50 a month. She also has a retroactive incurred expense - a \$678 outpatient hospital bill for services dated February 13, 2015. She has no health insurance and is not eligible for Medicare.

She was not institutionalized in the retroactive period. Her income in the retroactive spenddown budget period was \$1,600 per month Civil Service Annuity (CSA) disability. The retroactive spenddown budget period is February, March and April; the income limit is \$915.27.

Her retroactive spenddown liability is \$3,824.73.

\$1,600.00	CSA disability
- 20.00	general income exclusion
1,580.00	countable income
x 3	months
4,740.00	countable income for retroactive spenddown budget period
- 915.27	MNIL for retroactive spenddown budget period
\$3,824.73	retroactive spenddown liability

Her May 2015 application is a re-application. The September 2014 medical expenses are old bills based on her May 2015 re-application because they were incurred prior to the re-application's retroactive period, were not incurred during a prior spenddown budget period in which eligibility was established. These old bills, totaling \$3,800, are deducted from the retroactive spenddown liability. Her retroactive spenddown eligibility is calculated:

\$3,824.73	retroactive spenddown liability
- 3,800.00	September 2014 old bills (hospital & physician bills)
24.73	spenddown balance on February 1, 2015
- 678.00	February 13, 2015 outpatient expense
0	spenddown balance on February 13, 2015

The retroactive spenddown was met on February 13, 2015. Ms. Was is enrolled in retroactive Medicaid for the period February 13, 2015 through April 30, 2015.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.710	Page 46

Her income starting May 1, 2015 increased. Her Civil Service Annuity is \$1,620 per month and she began to receive Social Security of \$600 per month; total income is \$2,220 per month. Because this exceeds the 300% SSI income limit, her medically needy income eligibility is calculated as follows:

\$2,220.00	total monthly income
- 20.00	general income exclusion
2,200.00	countable income
- 305.09	MNIL for 1 month for 1 person in Group I
\$1,894.91	spenddown liability

Ms. Was' daily RUG code amount is \$45. The projected Medicaid rate for the month is calculated as follows:

\$ 45	daily RUG code amount
x 31	days
\$1,395	individual's projected Medicaid rate

The \$1,894.91 spenddown liability is greater than her Medicaid rate of \$1,395. Because her spenddown liability is greater than the Medicaid rate, her May application is denied and she is placed on a monthly spenddown for the certification period of May 1, 2015 through April 30, 2016.

On June 3, her authorized representative requests re-evaluation of her spenddown for May. She was in the facility for 31 days in May. The private cost of care for May is calculated:

\$ 53	private per diem cost
x 31	days in May
\$1,643	private cost of care

The private cost of care, \$1,643, is less than her spenddown liability of \$1,894.91. Therefore, her spenddown eligibility in May must be determined on a daily basis. The prospective budget period is May 1 through May 31, 2015. Since all of her old bills were used to meet her retroactive spenddown, they cannot be deducted from her current spenddown. The only incurred medical expenses which can be deducted are the medical expenses she incurred in May. In addition to the facility care, she incurred a doctor's expense on May 30 of \$400. Her spenddown eligibility for May is determined:

\$1,894.91	spenddown liability
- 1,590.00	30 days @ \$53 per day (5-1 through 5-30)
- 400.00	noncovered doctor's expense 5-30-2015
0	spenddown balance on 5-30-2015

Because the spenddown was met on May 30, Ms. Was is entitled to Medicaid coverage beginning May 1, 2015 and ending May 31, 2015.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.740	Page 47

M1460.740 SPENDDOWN FOR PATIENTS RECEIVING CBC

A. Policy

An individual meets the definition of "institutionalized" when he is *authorized* for Medicaid waiver services and the services are being provided. An individual who has been *authorized* for Medicaid waiver services and whose income exceeds the 300% SSI income limit is not eligible for Medicaid until he meets the monthly spenddown liability. These determinations are made monthly, retrospectively, after the month has passed and the expenses have actually been incurred. The private cost of his home-based medical care is deducted as a noncovered medical expense.

For an individual on spenddown **before** starting Medicaid CBC waiver services, the spenddown budget period and the spenddown liability are prorated and recalculated to include the months prior to the receipt of Medicaid CBC services. A separate monthly spenddown budget period is calculated for each month of receipt of Medicaid CBC services.

A MN CBC patient must incur medical expenses, including old bills, carry-over expenses and the cost of CBC at the private rate, which equal or exceed the spenddown liability for the month. From the spenddown liability, deduct old bills, carry-over expenses and incurred medical/remedial care expenses per section M1340.210. When the monthly spenddown liability is reduced to \$0, eligibility is established. Eligibility can be established only **AFTER** the expenses are actually incurred. Do not project CBC expenses. The eligibility begin date is the first day of the month in which the spenddown was met and the end date is the last day of the month.

B. CBC Spenddown Eligibility Procedures

To determine spenddown eligibility for a CBC institutionalized individual, take the following actions:

1. Calculate Private Cost of Care

Multiply the CBC provider's (or providers' if the individual has multiple CBC providers) **private** hourly rate by the number of hours of service the individual actually received from the provider in the month.

The result is the private cost of care for the month.

2. Compare to Spenddown Liability

Compare the private cost of care to the individual's spenddown liability for the month.

3. Spenddown Liability Less Than Private Cost of Care

If the individual's spenddown liability is less than or equal to the private cost of care, the individual meets the spenddown in the month because of the private cost of care. He is entitled to **full-month coverage** for the month in which the spenddown was met.

Enroll the individual in Medicaid with the begin date of the first of the month, the end date the last day of the month. Go to section M1460.750 below for enrollment procedures. Determine patient pay according to subchapter M1470.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.740	Page 48

4. Spenddown Liability Greater Than Private Cost of Care

If the individual's spenddown liability is greater than the private cost of care, **determine spenddown on a day-by-day basis** in the month by deducting allowable incurred expenses from the spenddown liability. Refer to section M1340.210 to determine allowable deductions from the individual's spenddown liability.

If the spenddown is met any time in the month, the individual is eligible for full-month Medicaid coverage beginning the first day of the month in which the spenddown was met and ending the last day of the month.

5. Example - No Prior Spenddown, Spenddown Liability Greater than Private Cost of Care (Using July 2014 Figures)

EXAMPLE #6: Mr. May lives in Group III and applied for Medicaid on April 21, 2015. He was *authorized* for the EDCD waiver on April 10, 2015. The DDS determined that he is disabled. He has no health insurance. His income is \$2,800 per month disability benefit from a private company. He is not eligible for retroactive Medicaid because he had excess resources throughout the retroactive period. His resources are within the Medicaid limit in April 2015 (application month).

He is not eligible as CN because his \$2,800 gross income exceeds the 300% SSI income limit. His MN income is calculated:

\$2,800.00	disability benefit
- 20.00	general income exclusion
\$2,780.00	MN countable income
- 457.63	MNIL for 1 month for 1 person in Group III
\$2,322.37	spenddown liability

His CBC costs cannot be projected. Eligibility can be established only after the expenses are actually incurred. He received 20 days of CBC services in April.

His April application is denied and he is placed on a monthly spenddown for the certification period of 4-1-2015 through 3-31-2016.

\$ 8	per hour private rate
x 6	hours per day
\$ 48	private per diem cost
x 20	days in April
\$ 960	private cost of care

Mr. May's spenddown liability of \$2,322.37 is greater than the private cost of care, \$960. His Medicaid eligibility was not established in April.

6. Example - On Prior Spenddown, Spenddown Liability Less Than Private Cost of Care (Using July 2014 Figures)

EXAMPLE #7: Ms. Gray lives in Group I and applied for Medicaid on May 6, 2015. She was *authorized* for Medicaid EDCD waiver services on May 2, 2015; the services started on May 4, 2015. She had applied for Medicaid previously and was on a spenddown from December 1, 2013 through May 31, 2014, which she met on May 2, 2014. She did not re-apply until May 2015. She verifies that she has an unpaid \$2,300 hospital bill and a \$1,500 physician's bill for September 10 to September 12, 2014 (total = \$3,800) on which she pays \$50 a month. She also has an incurred expense in the retroactive period - a \$678 outpatient hospital bill for services dated February 13, 2015. She has no health insurance and is not eligible for Medicare.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.740	Page 49

She was not institutionalized in the retroactive period. Her income in the retroactive spenddown budget period was \$1,600 per month CSA disability. The retroactive spenddown budget period is February, March and April, 2015; the income limit is \$915.27.

Mrs. Gray's retroactive spenddown liability is \$4,090:

\$1,600.00	CSA disability
- 20.00	general income exclusion
1,580.00	countable income
x 3	months
4,740.00	countable income for retroactive spenddown budget period
- 915.27	MNIL for retroactive spenddown budget period
\$3,824.73	retroactive spenddown liability

There was a break between spenddown budget periods (June, July, August, September, October, November and December 2014 and January 2015). The September 2014 medical expenses are old bills based on her May 2015 re-application because they were incurred prior to the re-application's retroactive period and were not incurred during a prior spenddown budget period in which eligibility was established. These old bills, totaling \$3,800, are deducted from the retroactive spenddown liability. Her retroactive spenddown eligibility is calculated:

\$3,824.73	retroactive spenddown liability
- 3,800.00	September 2014 old bills (hospital & physician bills)
24.73	spenddown balance on February 1, 2015
- 678.00	February 13, 2015 outpatient expense
0	spenddown balance on February 13, 2015
	(\$653.27 carry over balance)

A balance of \$653.27 (\$678-24.73) on the 2-13-2015 outpatient expense remains and can be used as a carry-over expense for the first prospective budget period.

The retroactive spenddown was met on 2-13-2015. Ms. Gray is enrolled in retroactive Medicaid for the period 2-13-2015 through 4-30-2015.

Her income starting May 1, 2015 increased. Her CSA is \$1,620 per month and she began to receive Social Security of \$630 per month; total income is \$2,250 per month. Because this exceeds the 300% SSI income limit, her medically needy income eligibility is calculated as follows:

\$2,250.00	total monthly income
- 20.00	general income exclusion
2,230.00	countable income
- 305.09	MNIL for 1 month for 1 person in Group I
\$1,924.91	spenddown liability
- 653.27	carry-over expense from retroactive period
\$1,271.64	spenddown liability balance

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.750	Page 50

Her May application is denied and she is placed on a monthly spenddown for the certification period of May 1, 2015 through April 30, 2016.

On June 3, she submits verification of expenses for May. In May, she received CBC services from one provider for 28 days, 6 hours per day, at the private hourly rate of \$10. The private cost of care for May is calculated:

\$ 10	per hour private rate
<u>x 6</u>	hours per day
\$ 60	private per diem cost
<u>x 28</u>	days received services in May
\$1,680	private cost of care

The spenddown liability of \$1,271.64 is less than the private cost of care, \$1,680. Therefore, she is eligible for the period 5-1-2015 through 5-31-2015.

M1460.750 MEDICALLY NEEDY ENROLLMENT AND POST-ELIGIBILITY PROCEDURES

A. AC

1. Use Appropriate MN AC

- Aged = **018**
- Blind = **038**
- Disabled = **058**
- Child Under 21 in ICF/ICF-MR = **098**
- Child Under 18 = **088**
- Juvenile Justice Child = **085**
- Foster Care/ Adoption Assistance Child = **086**
- Pregnant Woman = **097**

B. Patient Pay

Determine patient pay according to subchapter M1470.

C. MN Post-eligibility Requirements

1. Facility Patient with Spenddown Liability Less Than or Equal to Medicaid Rate

When the spenddown liability for *an individual who is in a facility* is less than or equal to the *individual's* Medicaid rate, the individual has ongoing eligibility for the 12-month certification period. The individual must file a redetermination after the 12-month certification period ends.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.750	Page 51

**2. All CBC
Patients and
Facility Patients
with
Spenddown
Liability
Greater Than
Medicaid Rate**

When an individual (1) receives CBC or (2) an individual in a facility has a spenddown liability that exceeds individual's Medicaid rate and meets a spenddown, the individual does NOT have ongoing eligibility. Therefore, the individual will need to submit monthly reports of actual expenses and changes in income and resources so that spenddown eligibility can be determined each month. This report, "Medical Expense Record - Medicaid" (form # 032-03-023) is found in subchapter M1330, Appendix 1. Instructions for use and completion are also in subchapter M1330, Appendix 1.

The notification to the applicant (and his representative) approving the application with spenddown must include a copy of the "Medical Expense Record - Medicaid" for the individual to use to provide verification of the expenses used to meet the spenddown.

a. When Spenddown Liability is Met

When expenses have been incurred, the individual must submit the "Medical Expense Record - Medicaid" with bills or receipts for medical services either paid or incurred, and evidence of third party payment or denial of payment if applicable. Entitlement begins the first day of the month in which the spenddown is met, and ends on the last day of the month.

Appropriate notice of action must be sent to the applicant every time spenddown eligibility is evaluated. After eligibility is established, the usual reporting and notification processes apply. The individual must provide verification of income and resources for any month for which bills are presented.

b. Certification Period

The certification period is 12 months; therefore, a new application is not required each month. However, the applicant must file a redetermination for Medicaid when the 12-month certification period ends. If the redetermination is not filed, the individual's Medicaid must be canceled, the case must be closed and the individual will have to file a new application.

Important Information Regarding Your Policy's [Certificate's] Long-Term Care Insurance Partnership Status

NOTE: Please keep this Notice with Your Long-Term Care Insurance Policy

Partnership Policy [Certificate] Status. Your long-term care insurance policy [certificate] is intended to qualify as a Partnership Policy [Certificate] under the Virginia Long-Term Care Partnership Program as of your Policy's [Certificate's] effective date.

The long-term care insurance policy [certificate] recently purchased and enclosed qualifies for the Virginia Long-Term Care Insurance Partnership Program. Insurance companies voluntarily agree to participate in the Partnership Program by offering long-term care insurance coverage that meets certain State and Federal requirements. Long-term care insurance policies [certificates] that qualify as Partnership Policies [Certificates] may protect your assets through a feature known as "Asset Disregard" under Virginia's Medicaid program.

Asset Disregard means that an amount of the policyholder's [certificateholder's] assets equal to the amount of long-term care insurance benefits received under a qualified Partnership Policy [Certificate] will be disregarded for the purpose of determining the insured's eligibility for Medicaid. This generally allows a person to keep assets equal to the insurance benefits received under a qualified Partnership Policy [Certificate] without affecting the person's eligibility for Medicaid. All other Medicaid eligibility criteria will apply and special rules may apply to persons whose home equity exceeds \$500,000. **In addition, the purchase of this Partnership Policy does not automatically qualify you for Medicaid.**

What Could Disqualify Your Policy [Certificate] as a Partnership Policy. If you make any changes to your policy [certificate], such changes could affect whether your policy [certificate] continues to be a Partnership Policy. ***Before you make any changes, you should consult with [carrier name] to determine the effect of a proposed change.*** In addition, if you move to a state that does not maintain a Partnership Program or does not recognize your policy [certificate] as a Partnership Policy [Certificate], you would not receive beneficial treatment of your policy [certificate] under the Medicaid program of that state. The information contained in this Notice is based on current Virginia and Federal laws. These laws may be subject to change. Any change in law could reduce or eliminate the beneficial treatment of your policy [certificate] under Virginia's Medicaid program.

Additional Information. If you have questions regarding your insurance policy [certificate], please contact [carrier name]. If you have questions regarding current laws governing Medicaid eligibility, you should contact the Virginia Department of Medical Assistance Services.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.001	Page 1

M1470.000 PATIENT PAY-POST-ELIGIBILITY TREATMENT OF INCOME

M1470.001 OVERVIEW

A. Introduction

“Patient pay” is the amount of the long-term care (LTC) patient’s income which must be paid as his share of the LTC services cost. This subchapter provides basic rules regarding the post-eligibility determination of the amount of the LTC patient's income which must be paid toward the cost of his care. **MAGI Adults have no responsibility for patient pay.** If an individual receiving LTC, also called long-term supports and services (LTSS), loses eligibility in the MAGI Adults covered group and is eligible in another full coverage group, patient pay policy will apply.

B. Policy

The state’s Medicaid program must reduce its payment to the LTC provider by the amount of the eligible patient's monthly income, after allowable deductions. Patient pay is calculated after an individual has been determined eligible for Medicaid and for Medicaid LTC services. A Medicaid recipient who is admitted to a nursing facility, facility for individuals with intellectual disability (ICF-ID) or Medicaid waiver services for less than 30 days must have a patient pay determined for the month(s) in which the recipient is in the facility or waiver services. The provider collects the patient pay from the patient or his authorized representative. Patient pay information is fed to the Automated Response System (ARS) and the MediCall Systems for provider verification of patient pay. These systems report the amount of patient pay and the date of service to the provider responsible for collecting patient pay.

C. VaCMS Patient Pay Process

The patient pay calculation is completed in VaCMS. Refer to the VaCMS Help feature for information regarding data entry. The patient pay must be updated in the system whenever the patient pay changes, but at least once every 12 months. If VaCMS is not able to process required transactions, a Patient Pay Correction form (DMAS 9PP), available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, should be submitted to patientpay@dmass.virginia.gov.

D. Patient Notification

The patient or the authorized representative is notified of the patient pay amount on the Notice of Patient Pay Responsibility. VaCMS will generate and send the Notice of Patient Pay Responsibility. M1470, Appendix 1 contains a sample Notice of Patient Pay Responsibility generated by VaCMS. DMAS will generate and mail a Notice of Patient Pay Responsibility for any changes input directly into the *Medicaid Enterprise System (MES, formerly MMIS)*.

The provider is the only entity with the authority to take action when residents do not pay their patient pay amount. If a resident, or his authorized representative is negligent in paying his patient pay amount to the provider, the provider will provide written documentation regarding the requirement to pay the patient pay amount to the resident or authorized representative and follow the provider’s collection procedures to collect the funds. The provider will report the resident’s negligence in paying the patient pay amount to the LDSS.

The provider's failure to collect the patient pay, or the patient's failure to pay the patient pay, does not itself affect the patient's Medicaid eligibility. However, the

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.100	Page 2

EW must review the patient's resources each month to determine if the resources are within the Medicaid limit.

If the individual resides in a nursing facility and the above attempts to collect the patient pay amount are unsuccessful, DMAS has advised that the facility may take one of the following options:

**1. Facility Option
#1**

The facility will notify the LDSS no later than 120 days from the due date of the payment. The facility will include in this notification a copy of the third collection statement, a written notification of the situation, documentation of contacts made with the resident or authorized representative, and the reasons why payment has not been made.

The LDSS will take the following steps:

- Upon receipt of the written notice from the facility, the local DSS will review the case to determine if the individual's resources are within Medicaid eligibility limits or if a transfer of assets has occurred.
- If the individual alleges that he does not receive sufficient income to pay his patient pay, the eligibility worker will review the patient pay amount and make any necessary adjustments.

**2. Facility Option
#2**

Discharge or transfer the resident, including transferring the resident within the facility, except as prohibited by the Virginia State Plan for Medical Assistance Services.

Prior to discharge or transfer, the facility must provide reasonable and appropriate notice of the required patient pay, and the resident or authorized representative must be given at least 30 days written notice prior to the discharge or transfer, which shall include appeal rights. If the resident or authorized representative does not agree with this action, he may submit an appeal request to DMAS. The individual will be allowed to continue residing in the facility during the appeal process.

M1470.100 AVAILABLE INCOME FOR PATIENT PAY

A. Gross Income

Gross monthly income is considered available for patient pay. Gross monthly income is the same income used to determine an individual's eligibility in the 300% SSI income group. It includes types and amounts of income which are excluded when determining medically needy eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2018
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.100	Page 2a

1. 300% SSI Group

If the individual is eligible in the 300% SSI group, to determine patient pay start with the gross monthly income calculated for eligibility. Then add and deduct any amounts that are listed in subsection C. below.

2. Groups Other Than 300% SSI Group

If the individual is eligible in a covered group other than the 300% SSI group, determine the individual's patient pay income using subsections B. and C. below.

B. Income Counted For Patient Pay

All countable sources of income for the 300% SSI group listed in section M1460.611 are considered income in determining patient pay. Any other income NOT specified in C. below is counted as income for patient pay.

1. Aid & Attendance and VA Pension Payments

Count the total VA Aid & Attendance payments and/or VA pension payments in excess of \$90.00 per month as income for patient pay when the patient is:

- a veteran who does not have a community spouse or dependent child,
- a deceased veteran's surviving spouse who does not have a dependent child, or
- *a veteran's dependent child.*

Do not count any VA Aid & Attendance payments and/or VA pension payments when the patient is:

- a veteran who has a community spouse or dependent child, or
- a deceased veteran's surviving spouse who has a dependent child.

NOTE: This applies to all LTC recipients, including patients who reside in a Veterans Care Center.

2. Non-Refundable Advance Payments To LTC Providers

Advance payments and pre-payments paid by a recipient to the LTC provider that will not be refunded are counted as income for patient pay. M1470.1100 contains instructions for calculating the patient pay when an advance payment has been made to reduce resources within a month.

C. Income Excluded For Patient Pay

Income from sources listed in subchapter M1460.610 "What is Not Income" is not counted when determining patient pay, **EXCEPT** for the VA Aid & Attendance and VA pension payments to veterans which are counted in the patient pay calculation (see B. above). Additional types of income excluded from patient pay are listed below.

1. SSI & AG Payments

All SSI and Auxiliary Grants (AG) payments are excluded from income when determining patient pay.

2. Certain Interest Income

- Interest or dividends accrued on excluded funds which are set aside for burial are not income for patient pay.
- Interest income when the total interest accrued on all interest-bearing accounts is less than or equal to \$10 monthly is not income for patient pay. Interest income that is not accrued monthly must be converted to a monthly amount to make the determination of whether it is excluded.

- Verify interest income at application and each scheduled redetermination.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.200	Page 3

- If average interest income per month exceeds \$10.00 and is received less often than monthly, it must be treated as a lump sum payment for patient pay purposes. Refer to Section M1470.1000 of this subchapter for procedures and instructions.

3. Repayments

Amounts withheld from monthly benefit payments to repay prior overpayments *are* income for patient pay *unless the exception in S0830.110 is met*. The patient or his representative should be advised to appeal the withholding *with the benefit source*.

4. CBC Additional Care

Additional care purchased outside of a CBC recipient's plan of care is not counted as income available for patient pay if it is purchased by someone other than the recipient. This additional care may be purchased from any source including the agency providing the CBC.

5. Refundable Payments to LTC Facilities

The family of a prospective Medicaid patient or other interested party may make an advance payment on the cost of facility care prior to or during the Medicaid application process to assure the patient's admission and continued care. The individual may have been promised that the advance payment will be refunded if Medicaid eligibility is established.

Advance payments made by a person other than the patient and which are expected to be reimbursed once Medicaid is approved, as well as payments made by outside sources to hold the facility bed while the patient is hospitalized, are **not counted as income** in determining eligibility or patient pay.

The facility must reimburse any payment contributed toward the cost of patient care pending a Medicaid eligibility determination once Medicaid eligibility is established.

6. Survivor's Benefit Plan Deductions from Military Pensions

Any portion of a military retiree's pension that is withheld as a contribution to participate in the Survivor's Benefit Plan (SBP) is not income for patient pay. To participate in SBP in conjunction with their retirement, military members must elect to receive reduced retirement pay for their lifetime so that a percentage of their retirement pay can continue to be paid to their survivors following their death. Once SBP is elected, retirees cannot discontinue the deductions from their pensions.

M1470.200 FACILITY PATIENTS - ALLOWABLE DEDUCTIONS FROM INCOME

A. Introduction

Sections M1470.210 through 240 are the only allowable deductions from a facility patient's gross monthly income when calculating patient pay in the month of entry and subsequent months when the patient does not have a community spouse.

If the individual is married and his spouse is in a nursing facility, then there is no community spouse and each spouse is treated as an unmarried individual for patient pay purposes. When the patient is an institutionalized spouse with a community spouse, as defined in subchapter M1480, go to subchapter M1480 to determine the institutionalized spouse's patient pay.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.200	Page 4

B. Order of Patient Pay Deductions

Deductions from gross monthly income are subtracted in the order presented below. Deductions are made only to the extent that income remains after a prior deduction has been subtracted. Therefore, if the patient has no income remaining after a deduction, no additional deductions can be made.

1. Personal Needs

See section M1470.210 "Facility Personal Needs Allowance."

2. Dependent Child Allowance

See section M1470.220 "Dependent Child Allowance."

3. Noncovered Medical Expenses

See section M1470.230 "Facility - Noncovered Medical Expenses."

4. Home Maintenance Deduction

See section M1470.240 "Facility - Home Maintenance Deduction."

C. Appeal Rights

The patient or his representative has the right to appeal the patient pay determination, the amounts used in the calculation and denial of any request for adjustment. If a recipient or his representative appeals the patient pay, the EW or Medicaid Technician who made the decision prepares the appeal summary and attends the hearing.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.210	Page 4a

M1470.210 FACILITY PERSONAL NEEDS ALLOWANCE

A. Policy

The personal needs allowance is calculated according to the instructions in this section for the month of entry and subsequent months. The amount of the personal needs allowance depends on whether or not:

- the patient has a guardian or conservator who charges a fee; or
- the patient has earnings from employment that is part of the treatment plan.

The personal needs allowance is the sum of the basic personal allowance plus the guardianship fee and/or special earnings allowance, if applicable.

1. Basic Personal Allowance

Deduct \$40 per individual.

2. Guardianship Fee

Deduct an amount up to 5% of the patient's gross monthly income (including amounts not counted as income and excluded income) for guardianship fees, if the patient has a legally appointed guardian or conservator AND the guardian or conservator charges a fee. The guardianship filing fees CANNOT be deducted from the individual's income. Document how it was determined that the guardian/conservator charges a fee and the amount of the fee.

No deduction is allowed if the patient's guardian receives a payment for providing guardianship services from a public agency or organization that receives funding for guardianship services.

No deduction is allowed for representative payee or "power of attorney" fees or expenses.

3. Special Earnings Allowance

Working patients are allowed a higher personal needs allowance if they meet the following criteria. These patients will be identified by the facility. The patient must regularly participate in vocational activity which is a planned habilitation program and is carried out as a therapeutic work program, such as:

- sheltered workshops
- vocational training
- pre-vocational training.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.220	Page 5

Deduct a special earnings allowance if the patient participates in a work program as part of treatment. The special earnings allowance is deducted from earned income only. Subtract:

- the first \$75 of gross monthly earnings, PLUS
- $\frac{1}{2}$ the remaining gross earnings,
- up to a maximum of \$190 per month.

The special earnings allowance cannot exceed \$190 per month.

4. Example - Calculation of Personal Needs Allowance

A patient in the nursing facility is employed as a telephone salesperson as part of his plan of care in the facility. He has a legally appointed guardian who charges a 2% fee. His only income is gross earnings of \$875 per month. *The patient receives deductions for the basic allowance, the guardianship fee, and the special earning allowance.*

His special earnings allowance is calculated first:

$$\begin{array}{rcl}
 \$875 & \text{gross earned income} & \\
 - \underline{75} & \text{first \$75 per month} & \\
 800 & \text{remainder} & \\
 \div \underline{2} & & \\
 400 & \frac{1}{2} \text{ remainder} & \\
 + \underline{75} & \text{first \$75 per month} & \\
 \$475 & \text{which is } > \$190 &
 \end{array}$$

His personal needs allowance is computed as follows:

$$\begin{array}{rcl}
 \$ 40.00 & \text{basic allowance} & \\
 +190.00 & \text{special earnings allowance} & \\
 + \underline{17.50} & \text{guardian fee (2\% of \$875)} & \\
 \$247.50 & \text{personal needs allowance} &
 \end{array}$$

M1470.220 DEPENDENT CHILD ALLOWANCE

A. Unmarried Individual or Married Individual With No Community Spouse

An unmarried individual, or married individual without a community spouse, who has a minor dependent child(ren) under age 21 in the community, can have a dependent child allowance. When the individual verifies that he/she has a dependent child(ren) in the community:

- Calculate the difference between the appropriate monthly medically needy income limit (MNIL) for the child's locality for the number of minor dependent children in the home, and the child(ren)'s gross monthly income. If the child lives outside of Virginia, use the Group III MNIL.
- The result is the dependent child allowance. If the result is greater than \$0, deduct it from the patient's monthly income as the dependent child allowance. If the result is \$0 or less, there is NO dependent child allowance.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.230	Page 6

The dependent child allowance cannot be given when the dependent child(ren)'s gross monthly income exceeds the monthly MNIL for the number of children in the child(ren)'s locality, if money is not made available or he does not accept the monthly income allowance.

Do NOT deduct any allowance for other family member(s).

1. Example--One Dependent Child (Based on July 2008 figures)

Mrs. K is a married individual who is now residing in a nursing facility. Her spouse is in another medical facility. Their dependent child lives with her sister in a Group II locality. The child receives a \$95.00 of Social Security income per month.

The allowance for the dependent child is calculated as follows:

$$\begin{array}{rcl}
 \$ 265.39 & \text{MN limit for 1 (Group II)} & \\
 - \underline{95.00} & \text{child's SSA income} & \\
 \$ 170.39 & \text{dependent child's allowance} &
 \end{array}$$

NOTE: If Mrs. K's institutionalized spouse is eligible for Medicaid, an allowance for their child may also be deducted from his income in determining his patient pay. However, the income the child receives from Mrs. K will be counted in the child's gross income when determining any allowance from Mr. K.

2. Example--Two Dependent Children (Based on July 2008 figures)

Mr. H is a single individual with gross monthly income of \$920, living in a nursing facility. He is divorced and has two children under age 21 who live with his ex-wife in Group I. His two children each receive \$75 of monthly Social Security income.

The allowance for the dependent children is calculated as follows:

$$\begin{array}{rcl}
 \$ 337.92 & \text{MN limit for 2 (Group I)} & \\
 - \underline{150.00} & \text{children's total monthly SSA income} & \\
 \$ 187.92 & \text{dependent children's allowance} &
 \end{array}$$

M1470.230 FACILITY - NONCOVERED MEDICAL EXPENSES

A. Policy

Amounts for incurred medical and dental expenses not covered by Medicaid or another third party are deducted from the patient's gross monthly income when determining patient pay.

B. Health Insurance Premiums

1. Private or Commercial Insurance

Payments for medical/health insurance, *including dental insurance*, which meet the definition of a health benefit plan are deducted from patient pay when:

- the premium amount is deducted from the patient's benefit check;
- the premium is paid from the patient's own funds; OR
- the premium is paid by a relative (other than a spouse or parent for minor child) when that relative receives a benefit payment (income) which includes a benefit amount for the patient.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2021
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.230	Page 7

The amount deducted is the amount of the **monthly** premium. If the patient pays the premium less often than monthly, such as quarterly, prorate the amount paid by the number of months covered by the payment to obtain the monthly amount to deduct in the patient pay calculation.

“Health benefit plan” means any accident and health insurance policy or certificate, health services plan contract, health maintenance organization subscriber contract, plan provided by a MEWA (Multiple Employer Welfare Arrangement) or plan provided by another benefit arrangement.

Health benefit plan does not mean accident only, credit, or disability insurance; long-term care insurance; vision only insurance; specified disease insurance; hospital confinement indemnity coverage; limited benefit health coverage; coverage issued as a supplement to liability insurance; insurance arising out of a workers’ compensation or similar law; automobile medical payment insurance; or insurance under which benefits are payable with or without regard to fault and that is statutorily required to be contained in any liability insurance policy or equivalent self-insurance (14VAC5-234-30).

Income protection insurance (indemnity) policy premiums are not medical expenses and are not deducted from the patient pay.

Membership fees for an organization that sponsors or provides the health insurance are not part of the premium and are not deductible.

2. Medicare Part A and/or B Premiums

Medicare Part B premiums and/or Medicare Part A premiums are paid by Medicaid for eligible individuals. The premiums are paid by Medicaid via the “buy-in” and are not usually deducted from patient pay. However, Medicaid does not start paying the premiums immediately for all eligible patients, so the Medicare premium(s) must be deducted from patient pay in those months for which Medicaid does not pay the premium.

*For Categorically Needy (CN) individuals enrolled in the 300% SSI covered group in Aid Categories (ACs) 020, 040, and 060 and Medically Needy (MN)-only individuals in ACs 018, 038, and 058, the Medicare buy-in is effective **2 months after the begin date** of Medicaid coverage. If the begin date of coverage is other than the first day of a month, the buy-in is effective the first of the month in which the 60th day occurs. Part B premiums (and Part A premiums if the recipient must pay the Part A premium) must be deducted from patient pay in the month(s) in which the buy-in is not effective.*

Deduct the Medicare premium(s) for the first two months of coverage for *individuals in the following ACs:*

- *CN 300% SSI and not dually eligible as a Qualified Medicare Beneficiary (QMB) or a Special Low-income Medicare Beneficiary (SLMB) Plus - ACs 020, 040, 060*
- *MN and not also QMB or SLMB - ACs 018, 038, 058.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2021
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.230	Page 8

For individuals *in other ACs*, the buy-in is effective with the begin date of Medicaid coverage. Therefore, do NOT deduct Medicare premiums in the patient pay determination for months in the retroactive and ongoing coverage periods.

The Medicaid Medicare buy-in does NOT pay for Medicare premiums in closed periods of coverage for LTC patients who are on spenddown and whose eligibility is for a closed period. Deduct the Medicare Part B premiums (and Part A premiums if the recipient must pay the Part A premium) from patient pay in the month(s) in which the buy-in is NOT effective.

The Medicaid Medicare buy-in pays for Medicare premiums in retroactive coverage and closed periods of coverage EXCEPT for LTC patients who are on spenddown. DO NOT deduct the Medicare Part B premiums (and Part A premiums if the recipient must pay the Part A premium) from the patient pay in the month(s) in which the buy-in is effective for LTC patients who are NOT on spenddowns.

3. Example--Dual Eligible QMB

Mrs. Q has Medicare coverage and SSA income of \$580 per month. Her Medicare premiums are deducted from her SSA check. She was admitted to the nursing facility on September 9. Her daughter filed a Medicaid application for her on September 10.

Mrs. Q is eligible in the CN 300% SSI group in September and is eligible as QMB. Her Medicare premiums are not deducted for September because they will be paid by Medicaid.

4. Example--Not Dual Eligible QMB

Mr. A was admitted to a nursing facility on March 5. He applied for Medicaid on June 2. His monthly income is \$1,295, and his Medicare Part B premium is deducted from his SSA check. He is determined to be eligible in the CN 300% SSI covered group effective March 1.

His patient pay for March (the month of entry) includes a deduction for the Medicare premium. Because he is not QMB eligible, the buy-in is effective in May, the second month following the month in which his ongoing Medicaid coverage began. The cost of his Medicare Part B premium is deducted from his patient pay for the months of March and April, as his buy-in will be in effect beginning with the month of May.

If the buy-in is delayed for any reason, the individual will be reimbursed by SSA for premiums deducted after the second month.

5. Medicare Advantage (Part C) Premiums

Medicare Advantage plans, also referred to as Medicare Part C, are voluntary managed-care Medicare plans. In addition to Medicare Part B premiums, some individuals may pay an extra Medicare Advantage premium. The Medicaid Medicare buy-in is initiated for individuals with Medicare Advantage ; however, the buy-in covers only the allowable Medicare Part A and/or B premiums. The individual is responsible for any additional Medicare Advantage monthly premium. The Medicare Advantage monthly premium remains the individual's responsibility and is an allowable deduction from patient pay.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.230	Page 9

6. Medicare Part D Premiums

An individual who is eligible for Medicare and Medicaid is entitled to enrollment in a basic Medicare Part D prescription drug plan (PDP) *at no cost*. However, the individual may elect enrollment in a plan with a premium.

When a full-benefit Medicaid enrollee is enrolled in a *Medicare Part D* PDP, *any* premium that is the individual's responsibility is an allowable deduction from patient pay.

7. LTC Insurance

a. Deduct LTC premium in admission month only

When an individual has an LTC insurance policy, the individual stops paying premiums beginning the month after he is admitted to LTC. The premium paid for the policy in the admission month can be deducted from the admission month's patient pay only. The LTC insurance premium is not deducted from patient pay for the months following the admission month.

b. LTC insurance benefits

LTC insurance benefits are treated as *Third Party Liability* (TPL). If the individual receives the payment from the insurance company, the payment is not income for patient pay or eligibility determinations. The individual should assign it to the nursing facility. If the individual cannot do this, or the policy prohibits assignment, the LTC insurance payment should be given directly to the nursing facility. The facility should report the payment as a third party payment on its claim form.

If the provider is unable to accept payment directly from the individual, the individual must send the insurance payment to:

DMAS Fiscal Division, Accounts Receivable
600 E. Broad Street, Suite 1300
Richmond, Virginia 23219

C. Non-covered Medical/Dental Services

Deductions for the cost of a patient's medically necessary medical or dental services not covered by Medicaid, other insurance (such as Medicare), or another person are subtracted from income to determine patient pay. Some deductions for noncovered services must be approved by DMAS before they can be subtracted from the patient's income.

Services that are covered by Medicaid in the facility's per diem rate cannot be deducted from patient pay as a noncovered service. See M1470.230 C.3 for examples of services that are included in the facility per diem rate.

1. Zero Patient Pay Procedures

If deductions from patient pay cannot be allowed because the recipient has no income remaining after deducting the personal needs allowance, dependent child allowance(s) and health insurance premiums, or the recipient has no income available for patient pay, deny the request.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2019
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.230	Page 10

Notify the patient or the patient' authorized representative of the denial of the request using the Notice of Action.

If a noncovered service is already being deducted, leaving no patient pay, and a new deduction for another noncovered service has been approved, notify the patient or his authorized representative that the deduction for the new noncovered service will be made after the first noncovered service deductions are completed.

2. Allowable Non-covered Expenses

When a patient has income available for patient pay, the following can be deducted as noncovered expenses:

a. Old Bills

“Old bills” are deducted from patient pay as noncovered expenses. “Old bills” are unpaid medical, dental, or remedial care expenses which:

- were incurred prior to the Medicaid application’s retroactive period, or during the retroactive period if the individual was not eligible for Medicaid in the retroactive period or the service was not a Medicaid-covered service;
- were not fully deducted from (counted in) any previous spenddown budget period where the spenddown was met; **and**
- remain a liability to the individual.
- **“Old bills” do not require approval from DMAS in order to be deducted in the patient pay calculation even when the amount of the “old bill” exceeds \$500.**

b. Medically Necessary Covered Services Provided By A Non-participating Provider

Medically necessary medical and dental services that are covered by Medicaid, but that the enrollee received from a provider who does not participate in Virginia Medicaid, are deducted from patient pay as non-covered services.

c. Covered Services Outside of Medicaid’s Scope

Medically necessary medical and dental services exceeding Medicaid’s amount, duration, or scope can be deducted from patient pay. *Scope includes benefits or services provided by the enrollee’s MCO (managed care organization).*

d. Other Allowable Noncovered Services

- 1) The following medically necessary medical and dental services that are NOT covered by Medicaid *or by benefits provided by the enrollee’s MCO* can be deducted from patient pay by the local department of social services without DMAS approval when the cost does NOT exceed \$500. **If the service is not identified in the list below and/or the cost of the service exceeds \$500, send the request**

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2021
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.230	Page 11

and the documentation to DMAS for approval (see M1470.230 C.5). DMAS will advise the eligibility worker if the adjustment is allowable and the amount that is to be allowed.

- dental services ***not covered by Medicaid***. *Effective July 1, 2021, Medicaid covers dental services for full-benefit adults, as well as children (see M1850.100.D).* **Pre-approval for dental services that exceed \$500 must be obtained from DMAS prior to receipt of the service;**
- routine eye exams, eyeglasses and eyeglass repair;
- hearing aids (when medically necessary), hearing aid batteries and hearing aid repair;
- batteries for power wheelchairs or other power mobility items owned by the recipient, not to exceed four batteries in a 12-month period;
- chiropractor services, except for Medicare recipients (Medicare covers chiropractor services and Medicaid covers the Medicare deductible and coinsurance amounts);
- dipyridamole (Persantine) and other prescription medications not covered by Medicaid but ordered by the recipient's physician;
- **transportation to medical, dental or remedial services not covered by Medicaid.**

- 2) Services received by a Medicaid enrollee during a period of limited Medicaid eligibility (e.g., LTC services not covered because of a property transfer) can be deducted in the patient pay calculation by the local agency without DMAS approval even when the amount of the service exceeds \$500.

e. Medicare Part D

Individuals who:

- qualify for Medicare Part D,
- are NOT enrolled in a Medicare Prescription Drug Plan (PDP), and
- are NOT Medicaid eligible at the time of admission to a nursing facility,

will be fully responsible for their drug costs until Medicaid eligibility is determined and the Medicare Part D PDP enrollment process is completed. The individual remains responsible for any drugs purchased prior to the effective date of the PDP enrollment; Medicaid cannot pay for these drugs. The cost of drugs purchased before the PDP begin date can be deducted from patient pay.

Medicaid-enrolled nursing facility patients who are enrolled in a Medicare Part D PDP are **not** responsible for the payment of deductibles or co-pays, nor will

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2016
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.230	Page 12

they be subject to a coverage gap in their Part D benefits. Do NOT deduct from patient pay any Medicare PDP deductibles, co-pays or coverage gap costs beyond the month of admission into the nursing facility.

If a full-benefit Medicaid/Medicare recipient was subject to PDP co-pays prior to his admission to a nursing facility, he may continue to be assessed co-pays until the PDP is notified of his admission to the nursing facility. Deduct PDP co-pays incurred during the month of admission to the nursing facility only.

If an individual is enrolled in Part D and is in a nursing facility but was not eligible for Medicaid at the time of admission to the nursing facility, he may continue to be charged co-pays or deductibles until the PDP is notified of his eligibility as a full-benefit Medicaid enrollee. Deduct PDP co-pays incurred during first month of Medicaid eligibility in the nursing facility only.

3. Services NOT Allowed

Types of services that CANNOT be deducted from patient pay include:

- a. medical supplies and equipment that are part of the routine facility care and are included in the Medicaid per diem, such as:
 - diabetic and blood/urine testing strips,
 - bandages and wound dressings,
 - standard wheelchairs,
 - air or egg-crate mattresses,
 - IV treatment,
 - splints,
 - certain prescription drugs (placebos).
- b. TED stockings (billed separately as durable medical supplies),
- c. acupuncture treatment,
- d. massage therapy,
- e. personal care items, such as special soaps and shampoos,
- f. ancillary services, such as physical therapy, speech therapy and occupational therapy provided by the facility or under arrangements made by the facility.
- i. *services that are NOT medical/remedial care services, even if ordered by a physician:*
 - *air conditioners or humidifiers,*
 - *refrigerators, whole house generators and other non-medical equipment,*
 - *assisted living facility (ALF) room & board and services,*
 - *personal comfort items, such as reclining chairs or special pillows,*
 - *health club memberships and costs,*
 - *animal expenses such as for seeing eye dogs,*
 - *cosmetic procedures.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2019
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.230	Page 12a

3a. Managed Care Organizations and CCC Plus (effective January 1, 2018)

As of January 1, 2018, the majority of Medicaid-eligible individuals who receive long-term service and support (LTSS) are covered under the CCC Plus program through one of six (6) managed care organizations (MCO). As part of the CCC Plus program, each health plan offers enhanced benefits, such as adult dental services or hearing aids, outside of the required contracted Medicaid services. Some of these enhanced benefits are frequently submitted to the LDSS as patient pay adjustment.

If there are other coverage sources available for these services or items, Medicaid policy requires the request for coverage first be submitted to those sources and exhausted there, before the LDSS/DMAS may consider or approve a patient pay adjustment.

A process is in development to develop a procedure for distinguishing MCO enhanced benefit services from allowable patient pay deductions. Until further notice, providers and nursing facilities will continue sending all patient pay adjustment requests to the patient's LDSS eligibility worker.

Eligibility workers will review and process patient pay adjustment requests without requiring submission of the request to the individual's CCC Plus plan.

4. Documentation Required

a. Requests For Adjustments From A Patient or Authorized Representative

Request the following documentation from the patient or his representative:

- a copy of the bill;
- if applicable, the amount owed that was not covered by the patient's insurance;
- proof that the service was medically necessary. Proof may be the prescription, doctor's referral, or a statement from the patient's doctor or dentist. Proof applies to a physician, doctor, or dentist's current, and not "standing", order(s).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2010
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.230	Page 13

The local agency can make the adjustment for services identified in subsection C. 2. b. through d.1), above providing the cost of the service does not exceed \$500. If the cost of the service is not identified in subsection C. 2. b. through d. 1), or exceeds \$500, send the documentation to DMAS to obtain approval and the allowable amount of the adjustment (reimbursement is limited to the prevailing Medicaid or Medicare rate).

b. Requests For Adjustments From LTC Providers

If the request for an adjustment to patient pay to deduct one of the above expenses is made by a nursing facility, ICF-MR, long-stay hospital, or *Department of Behavioral Health and Developmental Services (DBHDS)* facility, the request must be accompanied by:

- 1) the recipient's correct Medicaid ID number;
- 2) the current physician's order for the non-covered service (not required for replacement of hearing aid batteries or eyeglass frames or for repair of hearing aids or eyeglasses);
- 3) actual cost information;
- 4) documentation that the recipient continues to need the equipment for which repair, replacement, or battery is requested; and
- 5) a statement of denial or non-coverage by other insurance. The denial may be from the insurance carrier or may be a written statement from the facility that the insurance company was contacted and the item/service is not covered.

If the request from a facility does not include all the above documentation, return the request to the facility asking for the required documentation.

When the cost of the service cannot be authorized by the local department of social services and/or exceeds \$500, send the request and the documentation to DMAS to obtain approval for the adjustment and the allowable amount of the adjustment (reimbursement is limited to the prevailing Medicaid or Medicare rate). DMAS must be notified of the name and address of the recipient's spouse, POA or guardian so that proper notification of the decision can be given.

5. Procedures

a. DMAS Approval Required

Requests for adjustments to patient pay for services not included in subsection C.2. b. through d.1) above, or for any service which exceeds \$500, must be submitted by the provider to the DSS worker. The DSS worker sends the request and documentation to:

Health Care Compliance Program Analyst
Division of Program Operations, Customer Service Unit
Department of Medical Assistance Services
600 East Broad Street, Suite 1300
Richmond, Virginia 23219

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.240	Page 14

Do not send requests for adjustments to DMAS when the patient has no available income for patient pay. Refer to M1470.230 C.5.c for notification procedures to be followed by the local worker.

When a request for an adjustment is approved or denied by DMAS, the local DSS worker will receive a copy of the letter sent to the recipient by DMAS:

- 1) If approved, adjust the patient pay using the VaCMS Patient Pay process.
- 2) If the adjustment request is denied, DMAS prepares the notification.

b. DMAS Approval Not Required

Determine if the expense is deducted from patient pay using the following sequential steps:

- 1) Upon receipt of the requested documentation, determine the amount of the bill that is a valid deduction. Do not deduct more than the available income that remains after the personal needs, dependent child allowance(s), and health insurance premiums are deducted.

If a noncovered service is already being deducted leaving no patient pay, and a new deduction for another noncovered service is requested, deduct the new noncovered services after the first noncovered service deductions have been completed.

- 2) Subtract the deduction for the month following the month the change is reported. If the deduction exceeds the available income, the remaining balance can be carried over to the following month(s).

c. Notice Procedures

Upon the final decision to allow the deduction, use the VaCMS Patient Pay process to adjust the patient pay. VaCMS will generate and send the Notice of *Patient Pay Responsibility*.

6. Managed Care Organizations and CCC Plus (effective January 1, 2018)

As of January 1, 2018, the majority of Medicaid-eligible individuals who receive long-term care (LTC) services are covered under the CCC Plus program through one of six (6) managed care organizations (MCO). As part of the CCC Plus program, each health plan offers enhanced benefits, such as adult dental services or hearing aids, outside of the required contracted Medicaid services. Some of these enhanced benefits are frequently submitted to the LDSS as patient pay adjustment.

If there are other coverage sources available for these services or items, Medicaid policy requires the request for coverage first be submitted to those sources and exhausted there, before the LDSS/DMAS may consider or approve a patient pay adjustment.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.240	Page 14a

A process is in development to develop a process for distinguishing MCO enhanced benefit services from allowable patient pay deductions. Until further notice, providers and nursing facilities will continue sending all patient pay adjustment requests to the patient's LDSS eligibility worker.

Eligibility workers will review and process patient pay adjustment requests without requiring submission of the request to the individual's CCC Plus plan.

M1470.240 FACILITY - HOME MAINTENANCE DEDUCTION

A. Policy

A single institutionalized individual can be allowed a deduction for the cost of maintaining a home for not more than six months, if a physician has certified he or she is likely to return home within that period.

Home maintenance means that the individual has the responsibility to pay shelter costs on his former place of residence in Virginia, such as rent, mortgage, utilities, taxes, room and board, or assisted living facility (ALF) payments, and that the home, apartment, room or bed is being held for the individual's return to his former residence in Virginia. Individuals who have no responsibility to pay shelter costs are not permitted a home maintenance deduction. If responsibility for shelter costs is questionable, documentation must be requested and provided.

EXCEPTION: For an individual admitted to a nursing facility from an ALF, deduct a home maintenance allowance for the month of entry even if the admission to the nursing facility is not temporary.

Only one spouse of an institutionalized married couple (both spouses are in a medical facility) is allowed the deduction to maintain a home for up to six months, if a physician certifies that he is likely to return home within that period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.310	Page 15

B. Temporary Care

Temporary care is defined as not exceeding 6 months of institutionalization, beginning the **month** of admission to the medical facility. A physician's written statement *or a DMAS 225 from the individuals managed care plan indicating that the individual* is expected to return to his home within 6 months of admission is required to certify temporary care. If the individual is in the facility less than 6 months and returns to a community living arrangement, temporary care status is assumed and patient pay should be adjusted with the home maintenance allowance for the entire period of institutionalization. When the temporary care period ends, the home maintenance deduction must be discontinued.

The DMAS 96 no longer relays information about the expected length of stay. Assume that the stay is not temporary unless notified by the individual, authorized representative, or managed care plan. A written statement from a physician or a DMAS 225 notification from the managed care plan that the individual is expected to return home within 6 months is acceptable in lieu of a physician's statement.

C. Amount Deducted

The home maintenance deduction is the MNIL for one person in the individual's locality of residence. See Appendix 5 to subchapter M0710 or section M0810.002 A. 4 for the MN income limits.

M1470.300 FACILITY PATIENTS**A. Overview**

This section provides policy and procedures for calculating patient pay for the facility patient.

B. Policy and Procedures

Policy and procedures for determining patient pay in the most common admission situations are contained in the following sections:

- Facility Admission From A Community Living Arrangement (M1470.310)
- Medicaid CBC Recipient Entering A Facility (M1470.320)
- Facility Admission From Another Facility (M1470.340)

M1470.310 FACILITY ADMISSION FROM A COMMUNITY LIVING ARRANGEMENT**A. Policy**

The policy in this section describes the procedures for calculating patient pay for the month of admission and ongoing months for all persons admitted to an LTC facility except:

- persons who received Medicaid CBC in the community during the admission month;
- persons who were admitted from another facility;
- persons admitted to a facility from a state institution.

B. Procedures

To determine patient pay for the admission month, use the procedures in this subsection.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2013
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.320	Page 16

1. All Covered Groups Except MN Spenddown

For an individual admitted to a facility (except an individual who meets a spenddown), take the following steps in the order presented, to the extent that income remains:

- a. Count all income received in the admission month (M1470.100).
- b. Deduct a personal needs allowance:
 - \$40.00 basic personal needs;
 - additional amount for guardianship fees, if appropriate;
 - additional amount for special earnings allowance, if working.
- c. Deduct a dependent child allowance, if appropriate (M1470.220).
- d. Deduct the Medicare premium withheld if the applicant is a Medicare recipient and was not receiving Medicaid prior to admission (see M1470.230).
- e. Deduct other health insurance premiums, deductibles or co-insurance charges, if appropriate (M1470.230).
- f. Deduct other allowable noncovered medical expenses, if appropriate (M1470.230).
- g. Deduct the home maintenance (MNIL) deduction **if appropriate**, if a doctor has certified that the individual is likely to return home within a six-month period (see M1470.240). For recipients who are admitted for a stay that has been for less than 30 days, a physician certification of length of stay is NOT required.
- h. Any remainder is the patient pay for the month(s).

2. MN Spenddown Individual in Facility for Less than 30 Days

For a medically needy individual on a spenddown who is in a facility for less than 30 days, see section M1470.320 B. for procedures.

3. MN Spenddown Individual In Facility For More Than 30 Days

For an institutionalized medically needy individual, see Section M1470.600 for procedures.

M1470.320 PATIENT PAY FOR FACILITY STAY OF LESS THAN 30 DAYS

A. All Full Coverage Groups Except MN Spenddown

To determine patient pay for a non-institutionalized individual *with full Medicaid coverage* admitted to a facility for less than 30 days (except an individual who meets a spenddown), use the procedures in subsection M1470.310 B.1 for the admission month and for the subsequent month when the facility stay continues into the month after admission. *Individuals with limited-coverage Medicaid do not have a patient pay since facility care is not covered.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2021
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.320	Page 17

B. Non-Institutionalized Individuals on MN Spenddown

A non-institutionalized MN individual who is on a spenddown is not eligible for Medicaid until the spenddown is met. Non-institutionalized MN individuals are either on a three-month retroactive or six-month ongoing spenddown.

1. Individual Who Meets the Spenddown

For a non-institutionalized MN individual who meets the spenddown on a date that is within the dates of facility service, take the following steps to determine patient pay:

- a. Add together the number of days in the facility stay that are NOT covered by Medicaid. Multiply the result by the facility's private pay daily rate.
- b. Determine the remaining balance of the spenddown prior to applying the bill that caused the spenddown to be met.
- c. Add the amount in a. above to the figure obtained in b. above. The total is the individual's patient pay for the part of the facility stay that occurs in the spenddown coverage period.
- d. Enter patient pay *using* VaCMS.

2. Example – Spenddown Met

Mr. B, an unmarried 70 year-old individual living in a Group II locality, filed an initial application for Medicaid on October 5, 1999. He had excess income and was placed on a spenddown of \$2000 for the period October 1, 1999 through March 31, 2000. On October 8, 1999, he was admitted to a nursing facility for temporary care that is expected to be less than 30 days.

On November 10, 1999, his authorized representative asks for his spenddown to be re-evaluated due to his admission to the nursing facility. The representative also submits medical bills incurred before October 8, 1999, that the worker determines leave a spenddown balance of \$500 as of October 8, 1999. The nursing facility charges him \$120 per day; the Medicaid per diem is \$85. His spenddown is determined:

\$2000	spenddown liability October 1, 1999-March 31, 2000
- 1500	old bills incurred prior to October 1, 1999
500	spenddown balance on October 1, 1999
- 50	doctor's charge on October 5, 1999 (after TPL pays)
- 120	private pay rate on October 8, 1999
330	spenddown balance beginning October 9, 1999
- 120	private pay rate on October 9, 1999
210	spenddown balance beginning October 10, 1999
- 120	private pay rate on October 10, 1999
90	spenddown balance beginning October 11, 1999
- 120	private pay rate on October 11, 1999
\$ 0	spenddown met on October 11, 1999

Mr. B met his spenddown on October 11, 1999. Medicaid coverage begins on October 11, 1999 and ends on March 31, 2000, the end of the six month spenddown budget period.

He is discharged from the nursing facility to his home without CBC on November 1, 1999. He was in the nursing facility for less than 30 days. His patient pay for the October 8, 1999 through November 1, 1999 stay is determined:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.400	Page 18

- a) 3 number of days in the nursing facility that are NOT covered by the individual's Medicaid coverage period (October 8 through October 10)
- x 120 facility private pay daily rate
- \$ 360 amount of the spenddown liability for which the individual is responsible.

b) \$90 is the spenddown balance on the date the spenddown was met, therefore, the individual is responsible to pay the \$90 to the nursing facility. Medicaid will pay the remainder of the cost.

- c) \$360 amount of the spenddown liability for which the individual is responsible (October 8 - October 10)
- + 90 spenddown balance on October 11; begin date of coverage
- \$450 individual's patient pay for October 11 through October 31

If his dates in the nursing facility include part of a second month, his patient pay for the second month would be \$0.

3. Individual Who Does Not Meet Spenddown

An individual who meets the spenddown on a date after the date he left the facility has full responsibility for the days he was in the facility. Send the individual a Notice of Action showing the dates of Medicaid coverage and that the facility care was not covered by Medicaid. Send the provider a DMAS-225 regarding the individual's eligibility status.

M1470.400 MEDICAID CBC PATIENTS - ALLOWABLE DEDUCTIONS FROM INCOME

A. Introduction

Sections M1470.410 through 430 are the only *allowable* deductions from a Medicaid CBC patient's gross monthly income when calculating patient pay when the patient does not have a community spouse. *If* the patient has a community spouse, go to subchapter M1480 to determine patient pay.

Medicaid CBC patients are not allowed a home maintenance deduction because shelter costs are included in the personal maintenance allowance.

B. Procedure

Subtract the deduction(s) from gross monthly income in the order presented below:

1. Medicaid CBC Personal Maintenance Allowance (M1470.410)
2. Dependent Child Allowance (M1470.420)
3. Medicaid CBC - Incurred Medical Expenses (M1470.430)

C. Appeal Rights

The patient or his representative has the right to appeal the patient pay determination, the amounts used in the calculation and denial of any request for adjustment. If a recipient or his representative appeals the patient pay, the EW who made the decision prepares the appeal summary and attends the hearing.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.410	Page 19

M1470.410 MEDICAID CBC - PERSONAL MAINTENANCE ALLOWANCE

A. Individuals

For the month of entry and subsequent months, deduct from the patient's gross monthly countable income a personal maintenance allowance (PMA). The amount of the allowance depends upon under which Medicaid CBC waiver the patient receives LTC services.

The total amount of the PMA cannot exceed 300% SSI.

1. Basic Maintenance Allowance

Patients receiving Medicaid CBC under the following waivers are allowed a monthly basic PMA:

- Commonwealth Coordinated Care Plus (CCC Plus) Waiver (formerly the Elderly or Disabled with Consumer-Direction Waiver and the Technology-Assisted Individuals Waiver),
- Community Living (CL) Waiver (formerly Intellectual Disabilities Waiver),
- Family and Individual Supports (IS) Waiver (formerly Individual and Family Developmental Disabilities Support Waiver), and
- Building Independence (BI) Waiver (formerly Day Support Waiver).

Individuals enrolled in the Program for All Inclusive Care for the Elderly (PACE) are also allowed the basic PMA.

The PMA is:

- January 1, 2021 through December 31, 2021: \$1,311
- *January 1, 2022 through December 31, 2022: \$1,388.*

Contact a Medical Assistance Program Consultant for the PMA in effect for years prior to 2018.

2. Guardianship Fee

Deduct an amount up to 5% of the patient's gross monthly income (including amounts not counted as income and excluded income) for guardianship fees, if the patient has a legally appointed guardian or conservator AND the guardian or conservator charges a fee. The guardianship **filing** fees CANNOT be deducted from the individual's income. Document how it was determined that the guardian/conservator charges a fee and the amount of the fee.

No deduction is allowed if the patient's guardian receives a payment for providing guardianship services from a public agency or organization that receives funding for guardianship services.

No deduction is allowed for representative payee or "power of attorney" fees or expenses.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.420	Page 20

3. Special Earnings Allowance for Recipients in CCC Plus, CL, IS and BI Waivers

Deduct the following special earnings allowance if the patient is working (the work does NOT have to be part of treatment). The special earnings allowance is deducted from earned income only. Deduct:

- a. for individuals employed 20 hours or more per week, all earned income up to 300% of SSI (\$2,523 in 2022) per month.
- b. for individuals employed at least 8 but less than 20 hours per week, all earned income up to 200% of SSI (\$1,682 in 2022) per month.

4. Example – Special Earnings Allowance (Using January 2018 figures)

A working patient receiving CCC Plus Waiver services is employed 18 hours per week. His income is gross earnings of \$1228.80 per month and SSA of \$300 monthly. His special earnings allowance is calculated by comparing his gross earned income (\$1128.80) to the 200% of SSI maximum (\$1,500.00). His gross earned income is less than 200% of SSI; therefore, he is entitled to a special earnings allowance. His personal maintenance allowance is computed as follows:

\$ 1,238.00 CBC basic maintenance allowance
+ 1,128.80 special earnings allowance
\$ 2,360.80 PMA

Because the PMA may not exceed 300% of SSI, the PMA for the patient in this example must be reduced to \$2,250.00.

B. Couples

The Medicaid CBC waivers do not specify personal maintenance allowances for a married couple living together when both spouses receive Medicaid CBC because each spouse is considered an individual for patient pay purposes. The individual maintenance allowance in section M1470.410 applies to each spouse in a couple when each receives Medicaid CBC.

M1470.420 DEPENDENT CHILD ALLOWANCE

A. Unmarried Individual, or Married Individual With No Community Spouse

For an unmarried Medicaid CBC patient, or a married Medicaid CBC patient without a community spouse, who has a dependent child(ren) under age 21 years in the community:

- Calculate the difference between the appropriate MN income limit for the **child's** home locality for the number of children in the home and the child(ren)'s gross monthly income. If the children are living in different homes, the children's allowances are calculated separately using the MN income limit for the number of the patient's dependent children in each home.
- The result is the dependent child allowance. If the result is greater than \$0, deduct it from the patient's income as the dependent child allowance. If the result is \$0 or less, do not deduct a dependent child allowance.

Do not deduct an allowance if the child(ren)'s monthly income exceeds the MN income limit in the child's home locality for the number of dependent children in the home. Do not deduct an allowance for any other family member.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2019
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 21

**1. Example--Two
Dependent
Children In One
Home (Using
January 2009
Figures)**

Mr. H is a single individual with gross monthly income of \$920, living in the community in Group II and receiving Medicaid CBC. He is divorced and has two children under age 18 who live with his ex-wife in Group I. His two children each receive \$75 SSA.

The allowance for his dependent children is calculated as follows:

\$ 337.92	MN limit for 2 (Group I)
- 150.00	children's SSA income
\$ 187.92	dependent children's allowance

**2. Example--Three
Dependent
Children In Two
Homes (Using
January 2009
Figures)**

Mrs. K is a married individual who lives at home in a Group II locality and receives Medicaid CBC. Her spouse is in a medical facility and is not a community spouse. One of their three dependent children lives with Mrs. K. The other two children live with her sister in a Group III locality. The children each receive \$95.00 per month SSA.

The allowance for the dependent children is calculated as follows:

\$ 306.23	MN limit for 1 (Group II)
- <u>95.00</u>	child's SSA income
\$ 211.23	child's allowance
\$ 480.00	MN limit for 2 (Group III)
- <u>190.00</u>	children's SSA income
\$ 290.00	children's allowance
\$ 211.23	child's allowance
+ <u>290.00</u>	children's allowance
\$ 501.23	total dependent children's allowance

NOTE: If Mrs. K's institutionalized spouse is eligible for Medicaid, an allowance for their children may also be deducted from his income in determining his patient pay. However, the allowance the children receive from Mrs. K will be counted as part of their income when determining any allowance from Mr. K's income.

M1470.430 MEDICAID CBC - NONCOVERED MEDICAL EXPENSES

A. Policy

Amounts for incurred medical and dental expenses not covered by Medicaid or another third party, *including services or benefits provided as part of an enrollee's managed care organization*, are deducted from the patient's gross monthly income when determining patient pay.

**B. Health Insurance
Premiums**

Payments for medical/health insurance which meet the definition of a health benefit plan, *including dental insurance*, are deducted from patient pay when:

- the premium amount is deducted from the patient's benefit check;

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2021
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 22

- the premium is paid from the patient's own funds; OR
- the premium is paid by a relative (other than a spouse or parent for minor child) when that relative receives a benefit payment (income) which includes a benefit amount for the patient.

The amount deducted is the amount of the monthly premium. If the patient pays the premium less often than monthly, such as quarterly, prorate the amount paid by the number of months covered by the payment to obtain the monthly amount to deduct in the patient pay calculation.

“Health benefit plan” means any accident and health insurance policy or certificate, health services plan contract, health maintenance organization subscriber contract, plan provided by a MEWA (Multiple Employer Welfare Arrangement) or plan provided by another benefit arrangement.

Health benefit plan does not mean accident only, credit, or disability insurance; long-term care insurance; vision only insurance; specified disease insurance; hospital confinement indemnity coverage; limited benefit health coverage; coverage issued as a supplement to liability insurance; insurance arising out of a workers' compensation or similar law; automobile medical payment insurance; or insurance under which benefits are payable with or without regard to fault and that is statutorily required to be contained in any liability insurance policy or equivalent self-insurance (14VAC5-234-30).

Income protection insurance (indemnity) policy premiums are not medical expenses and are not deducted from the patient pay.

Membership fees for an organization that sponsors or provides the health insurance are not part of the premium and are not deductible.

1. Medicare Part A and/or Part B Premiums

Medicare Part B premiums and/or Medicare Part A premiums are paid by Medicaid for eligible individuals. The premiums are paid by Medicaid via the “buy-in” and are not usually deducted from patient pay. However, Medicaid does not start paying the premiums immediately for all eligible patients, so the Medicare premium(s) must be deducted from patient pay in those months for which Medicaid does not pay the premium.

*For CN individuals enrolled in the 300% SSI covered group in ACs 020, 040, and 060 and MN-only individuals in ACs 018, 038, and 058, the Medicare buy-in is effective **2 months after the begin date** of Medicaid coverage. If the begin date of coverage is other than the first day of a month, the buy-in is effective the first of the month in which the 60th day occurs. Part B premiums (and Part A premiums if the recipient must pay the Part A premium) must be deducted from patient pay in the month(s) in which the buy-in is not effective.*

Deduct the Medicare premium(s) for the first two months of coverage for individuals in the following ACs:

- *CN 300% SSI and not dually eligible as QMB or SLMB Plus - ACs 020, 040, 060*
- *MN and not also QMB or SLMB - ACs 018, 038, 058.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2021
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 23

For individuals *in other ACs*, the buy-in is effective with the begin date of Medicaid coverage. Therefore, do NOT deduct Medicare premiums in the patient pay determination for months in the retroactive and ongoing coverage periods.

The Medicaid Medicare buy-in does NOT pay for Medicare premiums in closed periods of coverage for LTC patients who are on spenddown and whose eligibility is for a closed period. Deduct the Medicare Part B premiums (and Part A premiums if the recipient must pay the Part A premium) from patient pay in the month(s) in which the buy-in is NOT effective.

The Medicaid Medicare buy-in pays for Medicare premiums in retroactive coverage and closed periods of coverage EXCEPT for LTC patients who are on spenddown. DO NOT deduct the Medicare Part B premiums (and Part A premiums if the recipient must pay the Part A premium) from the patient pay in the month(s) in which the buy-in is effective for LTC patients who are NOT on spenddowns.

**2. Example -
Medicare Buy-
in (Using
January 2009
Figures)**

Mr. A is 80 years old and started receiving CBC on February 15. He applied for Medicaid on February 2. His only income is \$1500 per month. He has no Medicare Part A premium. His Part B premium is withheld from his SSA benefit. Therefore, his gross SSA entitlement is actually \$1596.40. He is CN eligible, but he is not dually-eligible as QMB.

Mr. A submitted bills for January and met a retroactive spenddown in January. Ongoing Medicaid began in February because he began receiving Medicaid CBC in February and became CN. The Medicare Buy-in begins on April 1.

His Medicare Part B premium is deducted in February's and March's patient pay. April and subsequent months will not include a deduction for the Medicare premium.

**3. Medicare
Advantage
(Part C)
Premiums**

Medicare Advantage plans, also referred to as Medicare Part C, are voluntary managed-care Medicare plans. In addition to Medicare Part B premiums, some individuals may pay an extra Medicare Advantage premium. The Medicaid Medicare buy-in is initiated for individuals with Medicare Advantage; however, the buy-in covers only the allowable Medicare Part A and/or B premiums. The individual is responsible for any additional Medicare Advantage monthly premium. The Medicare Advantage monthly premium remains the individual's responsibility and is an allowable deduction from patient pay.

**4. Medicare Part
D Premiums**

An individual who is eligible for Medicare and Medicaid is entitled to enrollment in a basic Medicare Part D prescription drug plan (PDP) at no cost. However, the individual may elect enrollment in a plan with a premium.

When a full-benefit Medicaid enrollee is enrolled in a Medicare Part D PDP, *any* premium that is the individual's responsibility is an allowable deduction from patient pay.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2014
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 24

5. LTC Insurance

a. Deduct LTC premium in admission month only

When an individual has an LTC insurance policy that covers long-term care services received in the home, the individual stops paying premiums beginning the month after he is admitted to the home-based LTC. The premium paid for the policy in the LTC admission month can be deducted from the admission month's patient pay only. The LTC insurance premium is not deducted from patient pay for the months following the admission month.

b. LTC insurance benefits

LTC insurance benefits are treated as TPL. If the individual receives the payment from the insurance company, the payment is not income for patient pay or eligibility determinations. The individual should assign it to the waiver services provider. If the individual cannot do this, or the policy prohibits assignment, the LTC insurance payment should be given directly to the provider. The provider should report the payment as a third party payment on its claim form.

If the provider is unable to accept payment directly from the individual, the individual must send the insurance payment to:

DMAS Fiscal Division, Accounts Receivable
600 E. Broad Street, Suite 1300
Richmond, Virginia 23219

C. Noncovered Medical/Dental Services

Deductions for the cost of a patient's medically necessary medical or dental services not covered by Medicaid, other insurance (such as Medicare), or another person are subtracted from income to determine patient pay.

See M1470.430 B.3 for the procedures used to deduct Medicare Part D prescription drug co-pays for patients who have Medicare.

DMAS approval **is not** required for deductions of noncovered services from patient pay when the individual receives CBC services, regardless of the amount of the deduction.

1. Zero Patient Pay Procedures

If deductions from patient pay cannot be allowed because the recipient has no income remaining after deducting the personal maintenance allowance, dependent child allowance(s) and health insurance premiums, or the recipient has no income available for patient pay, deny the request.

Notify the patient or the patient's representative using the Notice of Action.

If a noncovered service is already being deducted leaving no patient pay, and a new deduction for another noncovered service has been approved, notify the patient or his authorized representative that the deduction for the new non-covered service will be made after the first noncovered service deductions are completed.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 25

2. Allowable Non-covered Expenses

When a patient has income available for patient pay, the following can be deducted as noncovered expenses:

a. Old Bills

Old bills are deducted from patient pay as non-covered expenses. Old Bills are unpaid medical, dental or remedial care expenses which:

- were incurred prior to the Medicaid application's retroactive period, or during the retroactive period if the individual was not eligible for Medicaid in the retroactive period or the service was not a Medicaid-covered service;
- were not fully deducted from (counted in) any previous spenddown budget period where the spenddown was met, and
- remain a liability to the individual.

b. Medically Necessary Covered Services Provided By A Non-participating Provider

Medically necessary medical and dental services that are covered by Medicaid, but that the recipient received from a provider who does not participate in Virginia Medicaid, are deducted from patient pay as non-covered services.

c. Covered Services Outside of Medicaid's Scope

Medically necessary medical and dental services that can be deducted from patient pay are:

- services exceeding Medicaid's amount, duration, or scope;
- services rendered during a prior period of Medicaid eligibility (i.e., LTC services not covered because of a property transfer).

d. Other Allowable Non-covered Services

Medically necessary medical and dental services that are NOT covered by Medicaid and can be deducted from patient pay include:

- 1) medical supplies, such as antiseptic solutions, incontinent supplies (adult diapers, pads, etc.), dressings, EXCEPT for patients under the Technology-assisted Individuals Waiver (Medicaid covers these services for Technology-assisted Individuals Waiver patients). For Medicaid CBC recipients who have Medicare Part B, do not deduct the cost of supplies/equipment obtained from a Medicare/Medicaid supplier since the supplier receives direct payment from Medicare and Medicaid.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2021
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 26

- 2) dental services **not covered by Medicaid**. *Effective July 1, 2021, Medicaid covers dental services for full-benefit adults, as well as children (see M1850.100.D);*
- 3) routine eye exams, eyeglasses and eyeglass repair;
- 4) hearing aids (when medically necessary), hearing aid batteries and hearing aid repair;
- 5) batteries for power wheelchairs or other power mobility items owned by the recipient, not to exceed four batteries in a 12-month period;
- 6) chiropractor services, except for Medicare recipients (Medicare covers chiropractor services and Medicaid covers the Medicare deductible and coinsurance amounts);
- 7) dipyridamole (Persantine) and other prescription medications not covered by Medicaid but ordered by the recipient's physician;
- 8) copayments for prescription drugs obtained under Medicare Part D.

e. Medicare Part D copays

Individuals who:

- qualify for Medicare Part D,
- are NOT enrolled in a Medicare PDP, and
- are NOT Medicaid eligible at the time of admission to CBC

will be fully responsible for their drug costs until Medicaid eligibility is determined and the Medicare Part D PDP enrollment process is completed. The individual remains responsible for any drugs purchased prior to the effective date of the PDP enrollment; Medicaid cannot pay for these drugs. The cost of drugs purchased before the PDP begin date can be deducted from patient pay.

Full benefit Medicaid enrollees who have Medicare, are receiving Medicaid CBC services, and are enrolled in a Medicare Part D PDP were responsible for the payment of co-pays for prescriptions filled prior to January 1, 2012. Effective January 1, 2012, individuals receiving Medicaid CBC services are not responsible for co-pays for prescriptions covered under their Medicare Part D PDP. CBC recipients are not subject to payment of deductibles or a coverage gap in their Part D benefits.

1) Monthly Statements

PDPs must issue a periodic (at least monthly) statement to the beneficiary explaining all benefits paid and denied. Part D drugs that are not covered by the PDP may not be covered by Medicaid and, absent other drug coverage, remain the responsibility of the individual. When a PDP denies coverage of a prescription, the beneficiary has the right to request an exception for coverage of the drug. The beneficiary is notified in writing of the decision on any exception requested.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2016
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 27

2) *Verifying Allowable Co-pays*

To determine whether or not prescription expenses can be deducted from patient pay, apply the following rules:

- *If the drug expense appears on the statement as a denial, and no exception was requested, **do not** allow the expense.*
- *If the drug expense appears on the statement as a denial, and an exception was requested and denied, allow the expense.*

Enrollees should be advised to maintain these monthly statements if they wish to request patient pay adjustments for Medicare Part D co-pays and for drugs for which the PDP denied coverage.

3. **Services NOT Allowed**

- a. medical supplies covered by Medicaid, or Medicare when the recipient has Medicare, such as:
 - diabetic and blood/urine testing strips,
 - bandages and wound dressings,
 - standard wheelchairs,
 - air or egg-crate mattresses,
 - IV treatment,
 - splints,
 - certain prescription drugs (placebos).
- b. TED stockings (billed separately as durable medical supplies),
- c. acupuncture treatment,
- d. massage therapy,
- e. personal care items, such as special soaps and shampoos,
- f. physical therapy,
- g. speech therapy,
- h. occupational therapy.
- ii. *services that are NOT medical/remedial care services, even if ordered by a physician:*
 - *air conditioners or humidifiers,*
 - *refrigerators, whole house generators and other non-medical equipment,*
 - *assisted living facility (ALF) room & board and services,*
 - *personal comfort items, such as reclining chairs or special pillows,*
 - *health club memberships and costs,*
 - *animal expenses such as for seeing eye dogs,*
 - *cosmetic procedures.*
- j. *personal care or other waiver services in excess of the number of hours authorized by DMAS (i.e. private pay).*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2018
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 28

4. Document- ation Required

a. Requests For Adjustments From A Patient or An Authorized Representative

Request the following documentation from the patient or his representative:

- a copy of the bill;
- the amount still owed by the patient;
- if applicable, the amount owed that was not covered by the patient's insurance;
- proof that the service was medically necessary. Proof may be the prescription, doctor's referral or a statement from the patient's doctor or dentist. *Proof applies to a physician, doctor, or dentist's current, and not "standing", order(s).*

b. Requests For Adjustments From CBC Providers

If the request for an adjustment to patient pay to deduct a noncovered expense is made by a Medicaid CBC waiver service provider or case manager, the request must be accompanied by:

- 1) the recipient's correct Medicaid ID number;
- 2) the current physician's order for the non-covered service (not required for replacement of hearing aid batteries or eyeglass frames or for repair of hearing aids or eyeglasses);
- 3) actual cost information;
- 4) documentation that the recipient continues to need the equipment for which repair, replacement, or battery is requested; and
- 5) a statement of denial or non-coverage by other insurance. The denial may be from the insurance carrier or may be a written statement from the facility that the insurance company was contacted and the item/service is not covered.

If the request from a provider or case manager does not include all the above documentation, return the request to the provider or case manager asking for the required documentation.

5. Procedures

a. Determine Deduction

When the individual receives CBC services, DMAS approval **is not required** for deductions of noncovered services from patient pay, regardless of the amount of the deduction.

Determine if the expense is deducted from patient pay using the following sequential steps:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 28a

- 1) Upon receipt of the requested documentation, determine the amount of the bill that is a valid deduction. Do not deduct more than the available income that remains after the personal needs, dependent child allowance(s), and health insurance premiums are deducted.

If a noncovered service is already being deducted leaving no patient pay, and a new deduction for another noncovered service is requested, deduct the new noncovered services after the first noncovered service deductions have been completed.

- 2) Subtract the deduction for the current month. If the deduction exceeds the available income, the remaining balance can be carried over to the following month(s).

b. Notice Procedures

Upon the final decision to allow the deduction, use the VaCMS Patient Pay process to adjust the patient pay. VaCMS will generate and send the Notice of Patient Pay Responsibility. If VaCMS is not able to process required transactions, a Patient Pay Correction form (DMAS 9PP), available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, should be submitted to patientpay@dmass.virginia.gov. DMAS will generate and mail a Notice of Patient Pay Responsibility for any changes input directly into *MES*.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2019
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.430	Page 28b

**6. Managed Care
Organizations and
CCC Plus (effective
January. 1, 2018)**

As of January 1, 2018, the majority of Medicaid-eligible individuals who receive long-term care (LTC) services are covered under the CCC Plus program through one of six (6) managed care organizations (MCO). As part of the CCC Plus program, each health plan offers enhanced benefits, such as adult dental services or hearing aids, outside of the required contracted Medicaid services. Some of these enhanced benefits are frequently submitted to the LDSS as patient pay adjustment.

If there are other coverage sources available for these services or items, Medicaid policy requires the request for coverage first be submitted to those sources and exhausted there, before the LDSS/DMAS may consider or approve a patient pay adjustment.

A process is in development to develop a process for distinguishing MCO enhanced benefit services from allowable patient pay deductions. Until further notice, providers and nursing facilities will continue sending all patient pay adjustment requests to the patient's LDSS eligibility worker.

Eligibility workers will review and process patient pay adjustment requests without requiring submission of the request to the individual's CCC Plus plan.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.500	Page 29

**D. Example--CBC
Deduction of
Noncovered
Services (Using
January 2009
Figures)**

An aged, single individual, with no dependent child and no guardian or conservator, who lives in Group II, applied for Medicaid for the first time in June. He is approved by the screener for long-term care under the *EDCD* waiver. His gross income is \$950 Civil Service Annuity (CSA) and \$500 SSA. His resources are within the Medicaid limit. He has Medicare and federal employee's health insurance (Medicare is withheld from his SSA check at the rate of \$96.40 per month and \$80 is withheld from his CSA for the Health Insurance). Because his income is less than 300% of the SSI income limit, he meets the 300% SSI group.

He is denied retroactive eligibility because he had no Medicaid covered service in the retroactive period. He owes \$1,500 on a hospital bill he incurred the prior September *and is making payments*. His patient pay for June is determined in the following steps:

Step 1. gross income:

\$ 950	CSA
+ 500	SSA
\$1,450	total gross income

Step 2. deduct the correct personal maintenance allowance:

\$ 1,450	total gross income
- 1,112	personal maintenance allowance
\$ 338	remaining income

Step 3. deduct the appropriate medical expense deductions in the correct sequential order:

\$ 338.00	remaining income
- 176.40	96.40 Medicare + 80.00 health insurance premium
161.60	remaining income
- 161.60	non-covered medical expenses (\$1,500-161.60=\$1,338.40)
\$ 0	patient pay for June

The \$1,338.40 balance remaining from the \$1,500 hospital bill that was not deducted from the June patient pay can be deducted in subsequent month(s) as long as it remains a liability.

M1470.500 MEDICAID CBC PATIENTS

A. Overview

This section is only for unmarried individuals and or married individuals who have no community spouse. For married patients who have a community spouse, go to subchapter M1480 for patient pay determination.

This section provides policy and procedures for calculating Medicaid CBC recipients' patient pay.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.510	Page 30

B. Policy and Procedures

Policy and procedures for determining Medicaid CBC admission month patient pay in the most common admission situations are contained in the following sections:

- Community Living Arrangement Admission to Medicaid CBC (M1470.510)
- *PACE* (M1470.520)

M1470.510 COMMUNITY LIVING ARRANGEMENT ADMISSION TO MEDICAID CBC WAIVER SERVICES

A. Policy

The policy in this section describes the procedures for calculating patient pay for the month of admission and ongoing months for **all** persons residing in the community who are screened and approved for Medicaid CBC waiver services.

B. Procedures

1. All Covered Groups Except MN Spenddown

For an individual admitted to Medicaid CBC waiver services (EXCEPT an individual who meets a spenddown), use these procedures:

- a. Count all income received in the admission month (M1470.100).
- b. Deduct a personal needs allowance (M1470.410):
 - basic maintenance allowance based on the waiver;
 - guardianship fees, if *any*;
 - special earnings allowance, if *any*.
- c. Deduct a dependent child allowance, if *any* (M1470.420).
- d. Deduct the Medicare premium withheld if the individual is a Medicare recipient and was not receiving Medicaid prior to admission, if *any* (see M1470.430).
- e. Deduct other health insurance premiums, deductibles or co-insurance charges, if *any* (M1470.430).
- f. Deduct other allowable noncovered medical expenses, if *any* (M1470.430).
- g. Any remainder is the patient pay for the month(s).

2. MN Individual Who Meets Spenddown

An MN individual who is on a spenddown is not eligible for Medicaid until the spenddown is met. If an individual is screened and approved for Medicaid waiver services, he is considered “institutionalized” and his eligibility for Medicaid is determined as an institutionalized individual. If the individual’s income exceeds the 300% SSI income limit, he must meet an MN institutionalized individual monthly spenddown.

Go to section M1470.600 below to determine patient pay for a CBC patient who is on a spenddown.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.520	Page 31

M1470.520 PACE

A. Policy

The Program of All-inclusive Care for the Elderly (PACE) serves individuals aged 55 and older who (1) meet the nursing facility level of care criteria and (2) reside in their own communities. PACE provides all of an individual's health care and long-term care medical needs. PACE is not a CBC Waiver; individuals who meet the criteria for the EDCD Waiver may be enrolled in PACE in lieu of the EDCD Waiver. Individuals who are enrolled in Medicaid as *AG* recipients (Aid Categories 012, 032, and 052) are not eligible for PACE. See M1440.108 for additional information about PACE.

Individuals enrolled in PACE have a patient pay obligation.

B. Procedures

The patient pay for an individual enrolled in PACE who is not Medically Needy is calculated using the procedures in M1470.400 through M1470.520 for an individual in CBC, with the exceptions listed below.

1. Medicare Part D Premiums

PACE recipients are not responsible for Medicare Part D premiums because their prescriptions are provided through PACE and they are eligible for the full Medicare Part D subsidy. Therefore, the cost of the Medicare Part D premium is not allowable as a deduction from patient pay.

2. Covered Medical Expenses

Because PACE includes most medically-necessary services the individual needs, the allowable medical expense deductions differ from the allowable medical expense deductions for CBC.

The following services are provided through PACE:

- adult day care that offers nursing, physical, occupational, speech and recreational therapies;
- meals and nutritional counseling; social services;
- medical care provided by a PACE physician; personal care and home health care;
- all necessary prescription drugs;
- access to medical specialists such as dentists, optometrists and podiatrists;
- respite care;
- hospital and nursing facility care when necessary; and
- transportation.

Any medical expenses incurred by the individual for the services listed above are not allowable patient pay deductions. With the exception of the services listed above, the noncovered expenses listed in M1470.430 C.2 are allowable for PACE recipients. DMAS approval **is not required** for deductions of noncovered services from patient pay for PACE recipients, regardless of the amount of the deduction.

3. PACE Recipient Enters a Nursing Facility

Because PACE is a program of all-inclusive care, nursing facility services are part of the benefit package for PACE recipients who can no longer reside in the community. *PACE recipients may be placed in a nursing facility while still enrolled in PACE.* When a PACE recipient *is placed in* a nursing facility, the PACE provider has 60 days from the date of *placement* to notify the eligibility worker of the individual's placement in the nursing facility and the need for a recalculation of the patient pay.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.600	Page 32

Do not change the personal needs allowance to the facility amount unless notification is received from PACE. After notification from PACE of the individual's placement in a nursing facility, the eligibility worker will take action to recalculate the individual's patient pay prospectively for the month following the month the 10 day advance notice period ends. There is NO retroactive calculation of patient pay back to the date the individual entered the facility. Do not refer to the Recipient Audit Unit. When the change is made, the individual is entitled to a personal needs allowance of \$40 per month.

M1470.600 MN PATIENTS - SPENDDOWN LIABILITY

A. Policy

This section is for unmarried individuals or married individuals who have no community spouse. **DO NOT USE this section** for a married individual with a community spouse, go to subchapter M1480.

MN individuals have a spenddown liability that must be met before they are eligible for Medicaid because their monthly income exceeds 300% of SSI, which exceeds the MN income limits. When an MN individual meets the spenddown, he is eligible for Medicaid (see section M1460.700 for spenddown determination policy and procedures). Patient pay for **each** month in which the individual meets the spenddown must be determined.

A patient under 22 years of age receiving inpatient psychiatric services in an IMD (Institution for Treatment of Mental Diseases) whose income exceeds 300% of SSI may be eligible for Medicaid as MN if he meets the spenddown liability.

Coverage in an IMD is not part of the Medicaid benefit package for any other MN individuals who are eligible for Medicaid while in an IMD, including individuals age 65 years or older. Individuals under age 22 years who are not receiving inpatient psychiatric services and all individuals over age 22 years but under age 64 years are not eligible for Medicaid while in an IMD (see M0280.201).

B. Definitions

The following definitions are used in this section and subsequent sections of this subchapter:

1. Medicaid Rate

The Medicaid rate for facility patients is the patient's daily Resource Utilization Group (RUG) code amount multiplied by the number of days in the month. A patient's RUG code amount is based on his room and board and ancillary services. The RUG code amount may differ from facility to facility and from patient to patient within the same facility. Confirmation of the individual's RUG code amount must be obtained by contacting the facility. For the month of entry, use the actual number of days that care was received or is projected to be received. For ongoing months, multiply the daily RUG code amount by 31 days.

The Medicaid rate for CBC patients is the number of hours per month actually provided by the CBC provider multiplied by the Medicaid hourly rate.

PACE has a capitated monthly rate that is due and payable on the first day of the month. The monthly PACE rate is available from the PACE provider.

2. Remaining Income

Remaining income is the amount of the patient's total monthly countable income for patient pay minus all allowable patient pay deductions.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.610	Page 33

3. Spenddown Liability

The spenddown liability is the amount by which the individual's countable income exceeds the medically needy income limit.

C. Procedures

The subsections identified below contain the procedures for determining patient pay when an LTC patient meets a spenddown liability and is determined eligible for Medicaid.

1. Facility Patients

Patient pay determination procedures are different for medically needy facility patients, depending on whether the spenddown liability is less than or equal to or greater than the Medicaid rate. To determine patient pay for MN facility patients:

- Determine the individual's spenddown liability using the policy and procedures in subchapter M1460.
- Compare the spenddown liability to the Medicaid rate.
- If the spenddown liability is less than or equal to the Medicaid rate, go to section M1470.610 below to determine patient pay.
- If the spenddown liability is greater than the Medicaid rate, go to section M1470.620 to determine patient pay.

2. Medicaid CBC Patients

Medicaid CBC patient pay determination procedures are different from facility procedures. For CBC patients with a spenddown liability, go to section M1470.630.

3. PACE Recipients

For PACE recipients with a spenddown liability, go to section M1470.640.

M1470.610 FACILITY PATIENTS--SPENDDOWN LIABILITY LESS THAN OR EQUAL TO MEDICAID RATE

A. Policy

This section is applicable ONLY to an unmarried individual, or a married individual without a community spouse. **DO NOT USE this section** for a married individual with a community spouse; go to subchapter M1480.

An MN facility patient whose spenddown liability is less than or equal to the Medicaid rate is eligible for Medicaid effective the first day of the month, based on the projected Medicaid rate for the month.

Medicaid must NOT pay any of the recipient's spenddown liability to the provider. In order to prevent any Medicaid payment of the spenddown liability, the spenddown liability is added to available income for patient pay.

B. Procedures

Determine patient pay for the month using the procedures below.

1. Patient Pay Gross Monthly Income

Determine the recipient's patient pay gross monthly income according to M1470.100 (including any amounts excluded in determining MN countable income and the spenddown liability).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.610	Page 34

2. **Subtract Spenddown Liability** From the individual's gross monthly income for the month, subtract the spenddown liability. The result is the remaining income.
3. **Subtract Allowable Deductions** Deduct the following from the remaining income:
 - a. a personal needs allowance (M1470.210),
 - b. a dependent child allowance, if appropriate (M1470.220),
 - c. any allowable noncovered medical expenses (M1470.230), not including the facility cost of care,
 - d. a home maintenance deduction, if appropriate (M1470.240).

The result is the **remaining income**.
4. **Add Spenddown Liability** Add the spenddown liability to the remaining income (**because the individual is responsible to pay his spenddown liability to the facility**). The result is the **contributable income** for patient pay.
5. **Patient Pay** Compare the contributable income to the Medicaid rate for the month. The patient pay is the lesser of the two amounts.

C. Examples

1. **Facility--MN And Patient Pay Income Are The Same (Using April 2000 Figures)** Mr. Cay first applied for Medicaid in April. He was admitted to the facility a year earlier. He has a monthly Civil Service Annuity (CSA) benefit of \$1,600. He last lived outside the facility in a Group III locality. His income exceeds the CNNMP 300% SSI income limit. He has no old bills, but he has a health insurance premium of \$50 monthly plus a \$25 noncovered medical expense he incurred on April 2, and a guardian who charges a guardian fee of 5% of Mr. Cay's income. His MN eligibility is being determined for April. The MN determination results in a spenddown liability of \$1,255:

$$\begin{array}{r}
 \$1,600 \text{ monthly MN income} \\
 - \underline{\quad 20 \text{ exclusion} \quad} \\
 1,580 \text{ countable MN income} \\
 - \underline{\quad 325 \text{ MN limit for 1 (Group III)} \quad} \\
 \$1,255 \text{ spenddown liability for month}
 \end{array}$$

The Medicaid rate is \$45 per day, or \$1,395 for a projected 31-day month. By projecting the month's cost of facility care, he meets his spenddown because his spenddown liability is less than the Medicaid rate. He is eligible effective the first day of the month and for the whole month of April. Because his spenddown liability is less than the Medicaid rate, Mr. Cay will have ongoing Medicaid eligibility. His patient pay for April is determined:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.610	Page 35

\$1,600 total patient pay gross income
 - 1,255 spenddown liability
 345
 - 110 personal needs allowance (basic plus guardian fee)
 - 50 health insurance premium
 - 25 noncovered medical expense incurred April 2
 160 remaining income
 + 1,255 spenddown liability (his responsibility to pay)
 \$1,415 contributable income for patient pay (April)

Compare the contributable income for patient pay (\$1,415) to the facility's Medicaid rate for April, \$1,395. The facility can collect no more than the Medicaid rate. Because the Medicaid rate is less than the contributable income for patient pay, Mr. Cay's patient pay for April is the Medicaid rate of \$1,395. Any income retained by Mr. Cay is a resource in May.

**2. Facility--MN
And Patient
Pay Income
Are Different
(Using July
1999 Figures)**

Mr. Day is a disabled individual who applied for Medicaid in July 1999. He was admitted to the facility in November 1998. He has a monthly CSA benefit of \$1,500 and a monthly Seminole Indian payment of \$235. He last lived outside the facility in a Group III locality. His income of \$1,735 exceeds the CNNMP 300% of SSI income limit. He is not eligible for retroactive Medicaid because he had excess resources throughout the retroactive period. His MN eligibility is determined for July 1999. The MN determination results in a spenddown liability of \$1,155:

\$1,500 monthly MN income (Seminole Indian payment excluded)
 - 20 exclusion
 1,480 countable MN income
 - 325 MN limit for 1 (Group III)
 \$1,155 spenddown liability for month

He has an old bill of \$250 incurred in December 1998, which was not used to meet a spenddown, and a health insurance premium of \$50 monthly plus a noncovered medical expense of \$25 that he incurred on July 2. The facility's Medicaid rate is \$40 per day, or \$1,240 for a projected 31-day month. By projecting the month's cost of facility care, he meets his spenddown because his spenddown liability is less than the Medicaid rate. He is eligible for full month's coverage. His patient pay for July is determined:

\$1,500 CSA
 + 235 Seminole Indian payment (not excluded for patient pay)
 1,735 patient pay gross income
 - 1,155 spenddown liability
 580
 - 30 personal needs allowance
 - 50 health insurance
 - 250 old bill from December 1998
 - 25 non-covered medical expense incurred July 2
 \$ 225 remaining income
 + 1,155 spenddown liability (his responsibility to pay)
 \$1,380 contributable income for patient pay (July)

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.610	Page 36

Compare the contributable income for patient pay to the facility's Medicaid rate for July. The facility can collect no more than the Medicaid rate. Because the Medicaid rate is less than the contributable income for patient pay for July, Mr. Day's patient pay for July is the Medicaid rate of \$1,240. Any income that is retained becomes a resource the following month.

3. Facility-Not Eligible in Admission Month, Eligible in Following Month (Using April 2000 Figures)

Mr. C first applied for Medicaid on April 25. He was admitted to the facility on April 22. He last lived outside the facility in a Group III locality. He is a 40-year-old disabled individual with one dependent child age 10 years; the child lives with his sister in a Group II locality. He has a monthly CSA benefit of \$1,700; the child has a CSA benefit of \$150 per month. Mr. C has a guardian who charges a 5% guardian fee. He is not eligible for retroactive Medicaid because he had excess resources throughout the retroactive period.

Mr. C's income exceeds the CNNMP 300% of SSI income limit, so he is not eligible as CNNMP. He has a carry-over expense of \$200 incurred in the retroactive period. He has a monthly health insurance premium of \$50 paid on the 15th of the month plus a \$25 noncovered medical expense he incurred on April 2. His MN eligibility is determined for April. The MN determination results in a spenddown liability of \$1,355:

\$1,700	monthly MN income
- 20	exclusion
1,680	countable MN income
- 325	MN limit for 1 (Group III)
\$1,355	spenddown liability for month

The facility's Medicaid rate is \$45 per day, or \$405 for April 22 - 30 (9 days), the admission month. He does not meet his spenddown by projecting the cost of care at the Medicaid rate for the admission month because his spenddown liability (\$1,355) exceeds the Medicaid rate of \$405 for the admission month. Therefore, his spenddown cannot be met by projecting the nursing facility costs at the Medicaid rate. His spenddown eligibility must be determined retrospectively using the private pay rate for the number of days of facility care to reduce his spenddown liability. The private pay rate is \$50 per day, or \$450 for the days April 22 - 30. After subtracting all allowable expenses, he does not meet his spenddown in April and is not eligible for Medicaid in April.

His eligibility for May is determined. His April facility expenses are not deducted because he paid them in April. His \$200 January bill is not deducted as a carry-over expense, but any current payments on that bill can be deducted. He incurred a noncovered medical expense on May 2, and paid \$65 on his January medical bill.

The facility's Medicaid rate is \$45 per day, or \$1,395 for a projected 31-day month. By projecting the cost of care at the Medicaid rate, he meets his spenddown on the first of the month (May) because his spenddown liability of \$1,355 is less than the Medicaid rate (\$1,395). His patient pay for May is determined:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.620	Page 37

\$1,700 total patient pay gross income
 - 1,355 spenddown liability
 345
 - 105 personal needs allowance (basic plus guardian fee)
 - 100 dependent child allowance (\$250-150=100)
 - 50 health insurance premium
 - 25 noncovered medical expense incurred May 2
 65
 - 65 current payment on January medical bill
 0 remaining income
 + 1,355 spenddown liability (his responsibility)
 \$1,355 contributable income for patient pay (May)

Compare the contributable income for patient pay to the facility's Medicaid rate for May. The facility can collect no more than the Medicaid rate. Because the contributable income for patient pay is less than the Medicaid rate, Mr. C's patient pay for May is his contributable income of \$1,355.

M1470.620 FACILITY PATIENTS--SPENDDOWN LIABILITY GREATER THAN THE MEDICAID RATE

A. Policy

This section is applicable **ONLY** to an unmarried individual, or a married individual without a community spouse. **DO NOT USE this section** for a married individual with a community spouse; go to subchapter M1480.

1. Retrospective Determination

An MN facility patient whose spenddown liability exceeds the Medicaid rate is not eligible for Medicaid until he actually incurs medical expenses that meet the spenddown liability within the month. ALL of these determinations are made monthly, retrospectively, **after** the month has passed and the expenses have actually been incurred. The individual's resources and income must be verified each month before determining if the spenddown has been met.

2. Full Month's Coverage If Spenddown Met

When incurred expenses equal or exceed the spenddown liability, the individual is eligible for the full month of Medicaid coverage beginning the first day of the month in which the spenddown was met, and ending the last day of the month in which the spenddown was met. See subchapter M1460 for procedures to determine spenddown eligibility for these individuals. Patient pay for the month in which the spenddown was met is calculated after determining that the spenddown was met.

3. Patient Pay

Medicaid must not pay any of the recipient's spenddown liability to the provider. Because the spenddown determination is completed after the month and expenses are not projected, the spenddown liability is **NOT** added to remaining income for patient pay. Use the following procedures to calculate the patient pay for the month in which the spenddown was met.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.620	Page 38

B. Patient Pay Procedures

1. **Patient Pay Gross Monthly Income** Determine the recipient's patient pay gross monthly income according to section M1470.100 (including any amounts excluded in determining MN countable income and the spenddown liability).
2. **Calculate Remaining Income For Patient Pay** Calculate remaining income for patient pay by deducting the following from gross patient pay income:
 - a. a personal needs allowance (M1470.210),
 - b. a dependent child allowance, if appropriate (M1470.220),
 - c. any allowable noncovered medical expenses (M1470.230) **NOT** including the facility cost of care, and
 - d. a home maintenance deduction, if appropriate (M1470.240).

The result is individual's **remaining income**.

4. **Patient Pay** Compare the remaining income to the facility's Medicaid rate for the month. The patient pay is the lesser of the two amounts.

- C. **Example—In a Facility, Spenddown Liability Exceeds Medicaid Rate; No Dependent (Using July 1999 Figures)** Ms. Day is an institutionalized individual with no dependents who filed an initial application for Medicaid on November 13, 1999. She was admitted to the facility on November 12, 1999. She has a monthly CSA benefit of \$1,700 and a monthly payment of \$225 from the Seminole Indians Land Trust. She has a \$75 old bill incurred in July 1998, and she has a health insurance premium payment of \$50 per month paid on the 20th of the month. She does not have Medicare. She last lived outside the facility in a Group II locality. Her income exceeds the 300% SSI income limit. Her MN eligibility is determined for November 1999. The MN determination results in a spenddown liability:

$$\begin{array}{r}
 \$1,700 \text{ monthly MN income (Seminole Indians payment excluded)} \\
 - \underline{20} \text{ exclusion} \\
 1,680 \text{ countable MN income} \\
 - \underline{250} \text{ MN limit for 1 (Group II)} \\
 \$1,430 \text{ spenddown liability for November}
 \end{array}$$

The facility's Medicaid rate is \$40 per day, or \$760 for the 19 days in November, the admission month. Because her spenddown liability of \$1,430 exceeds the \$760 Medicaid rate for the admission month of November, Ms. Day is not eligible until she actually incurs medical expenses, including the private facility rate, on or before November 30 that equal or exceed the spenddown liability of \$1,430. The private rate is \$65 per day. The old bill of \$75 is deducted on November 1. She incurs \$1,235 for 19 days of care and the \$50 insurance premium on November 21; she incurs no other expenses. She does not meet the spenddown in the admission month of November. She paid her all of her November medical expenses in November.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.630	Page 39

Her eligibility for December (the month following the admission month) is determined. The Medicaid rate of \$40 per diem is projected for a 31-day month and equals \$1,240. The spenddown liability for the month is compared to the Medicaid rate before deducting any incurred medical expenses. Because the monthly spenddown liability of \$1,430 exceeds the Medicaid rate, eligibility must be determined, retrospectively, after the actual facility care costs have been incurred.

In January, to determine if the spenddown was met in December, the worker compares the spenddown liability to the private cost of care for December. The private daily rate of \$65 per day is multiplied by 31 days in December to determine the private monthly cost of care. Because the monthly spenddown liability of \$1,430 is less than the private monthly cost of care of \$2,015, Ms. Day met her spenddown in December and is eligible for the full month of December. She is enrolled for a closed period of eligibility, beginning 12-01-99 and ending 12-31-99. On December 3, she made a payment of \$75 on her July 1998 medical expense. Her patient pay for December is calculated as follows:

\$1,700	CSA
<u>+ 225</u>	Seminole Indians payment (not excluded for patient pay)
1,925	gross income for patient pay
- 30	personal needs allowance
- 75	12/3/99 current payment on medical bill from July 1998
<u>- 50</u>	health insurance premium paid on the 21st
\$1,770	remaining income for patient pay (December)

The eligibility worker compares the remaining income to the Medicaid rate (\$1,240) for December. The facility can collect no more than the Medicaid rate. Because the Medicaid rate is less than the remaining income for patient pay, Ms. Day's patient pay for December is the Medicaid rate of \$1,240. Since she paid the nursing facility the private rate of \$2,015 for December, the facility will reimburse her after receiving the Medicaid payment for December. If she retains this money, it becomes a resource to her in the month in which she receives the reimbursement (January at the earliest). Her countable resources must be verified for January before determining if her January spenddown was met.

M1470.630 CBC PATIENTS WITH SPENDDOWN LIABILITY

A. Policy

This section is applicable ONLY to an unmarried individual, or a married individual without a community spouse. **DO NOT USE this section** for a married individual with a community spouse; go to subchapter M1480.

1. Retrospective Determination

Community Based Care (CBC) patients who have income over the 300% of SSI income limit are placed on a monthly spenddown as institutionalized individuals because they have been screened and approved for waiver services. The monthly CBC expenses are determined retrospectively; they cannot be projected for the spenddown budget period.

Retrospective spenddown eligibility determinations are made monthly after the month has passed and the expenses have actually been incurred. The CBC expenses, along with other allowable medical and dental expenses, are deducted

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2014
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.630	Page 40

daily and chronologically as the expenses are incurred. The individual's resources and income must be verified each month before determining if the spenddown has been met.

2. Full Month's Coverage If Spenddown Met

When incurred medical expenses equal or exceed the monthly spenddown liability, the individual is eligible for the full month of Medicaid coverage beginning the first day of the month, and ending the last day of the month.

Patient pay for the month in which the spenddown was met is calculated after determining that the spenddown was met.

3. Patient Pay

Because the spenddown is completed after the month and expenses are not projected, the spenddown liability is NOT added to the available income for patient pay. Use the following procedures to calculate the patient pay for the month in which the spenddown was met.

B. Patient Pay Procedures

1. Patient Pay Gross Monthly Income

Determine the CBC recipient's patient pay gross monthly income according to section M1470.100 (including any amounts excluded in determining MN countable income and the spenddown liability).

2. Calculate Remaining Income for Patient Pay

Calculate remaining income for patient pay by deducting the following from gross patient pay income:

- a. a personal needs allowance (M1470.410),
- b. a dependent child allowance, if appropriate (M1470.420),
- c. any allowable noncovered medical expenses (M1470.430) including any old bills, carry-over expenses and other noncovered expenses that were used to meet the spenddown, but NOT including the cost of CBC care.

The result is the individual's **remaining income** for patient pay.

3. Patient Pay

Compare the remaining income to the Medicaid rate (hours of CBC waiver services multiplied by the Medicaid hourly rate) for the month. The patient pay is the lesser of the two amounts.

4. Example--CBC Spenddown Met (Using January 2000 Figures)

Ms. G. lives in Group III and filed an initial application for Medicaid in January. She is approved by the screener for the EDCD Waiver in January. She has no community spouse or dependent child. Her monthly income of \$1800 SSA and a \$200 private pension and exceeds the CNNMP 300% SSI limit. Her monthly spenddown liability is determined:

\$1,800 SSA
 + 200 private pension
 \$2,000 total monthly income
 - 20 exclusion
 \$1,980 countable income
 - 325 MNIL for Group III
 \$1,655 monthly spenddown liability

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.630	Page 41

Her January application is denied and she is placed on a monthly spenddown during the 12-month certification period of January through December.

In February she submits bills to determine if her January spenddown has been met. Her spenddown eligibility is evaluated first by comparing the private cost of care to her spenddown liability. The private cost of care is \$15 per hour, 4 hours per day, or \$60 per day. She received care on 20 days in January at the private rate of \$60 per day. The private cost of care for January was \$1,200. Because the private cost of care was less than her spenddown liability, her spenddown eligibility must be determined on a daily basis. She has old bills of \$600 incurred prior to the retroactive period, a health insurance premium of \$100 paid on the first of the month, and prescription costs of \$500 incurred January 2. Her spenddown eligibility is determined:

\$1,655	spenddown liability
- 600	old medical bills incurred prior to retroactive period
- 100	medical insurance premium paid January 1
- 60	cost of care incurred January 1
895	balance beginning January 2
- 500	prescription costs incurred January 2
- 60	cost of care incurred January 2
335	balance beginning January 3
- 300	cost of care incurred January 3 -7 (5 days)
35	spenddown liability balance at beginning of January 8
- 60	cost of care incurred on January 8
\$ 0	spenddown met on January 8

Because she met the spenddown on January 8, she is eligible for *full* Medicaid coverage beginning January 1 and ending January 31. Her patient pay for January is calculated as follows:

\$1,800	SSA
+ 200	private pension
- 512	personal maintenance allowance
- 600	old bill incurred prior to retroactive period
- 100	medical insurance premium paid January 1
\$ 788	remaining income for patient pay (January)

The worker compares the remaining income for patient pay to the Medicaid rate for Medicaid CBC waiver services. The Medicaid hourly rate of \$10.50 is multiplied by the 80 hours of CBC waiver services received in January. Because her remaining income (\$788) is less than the Medicaid rate (\$840), Ms. G's patient pay for January is the remaining income of \$788.

The following month, Mrs. G submits bills to determine if and when her February spenddown was met. Her February spenddown eligibility is evaluated as follows:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.640	Page 42

\$1,655 spenddown liability
 - 100 medical insurance premium paid February 1
 - 60 cost of care incurred on February 1
 1,495 spenddown balance beginning February 2
 -1,140 cost of care for remainder of February (19 days)
 \$ 355 spenddown balance on February 29

Mrs. G does not meet her spenddown for the month of February, so she is not eligible for February and no patient pay is calculated. In March and subsequent months, Mrs. G might have additional medical expenses which could enable her to meet her spenddown liability and establish eligibility.

M1470.640 PACE RECIPIENTS WITH SPENDDOWN LIABILITY

A. Policy

This section is applicable ONLY to an unmarried individual, or a married individual without a community spouse. **DO NOT USE this section** for a married individual with a community spouse; go to subchapter M1480.

1. Monthly Spenddown Determination

PACE recipients who have income over the CNNMP 300% of SSI income limit are placed on a monthly spenddown as institutionalized individuals because they have been screened and approved for LTC services.

Unlike CBC, PACE has a capitated monthly rate that is due and payable on the first day of the month. The monthly PACE rate is available from the PACE provider. When an MN individual is in PACE, the amount of allowed PACE expenses is the rate that is due as of the first day of each month.

PACE recipients are not responsible for Medicare Part D premiums, which are included in the monthly PACE rate. **Therefore, the cost of the Medicare Part D premium cannot be used to meet a spenddown and must be subtracted from the monthly PACE rate when determining if the spenddown has been met.**

The individual's spenddown liability and the PACE monthly rate (minus the Medicare Part D premium) establish whether the spenddown eligibility determination can be projected or must be determined retrospectively.

2. Projected Spenddown Determination

If the MN individual's spenddown liability is less than or equal to the monthly PACE rate (minus the Medicare Part D premium), the individual is eligible for Medicaid. As long as the individual's spenddown liability and the PACE monthly rate do not change, the individual is enrolled in ongoing coverage effective the first day of the month in which the spenddown is initially met.

3. Retrospective Spenddown Determination

If the MN individual's spenddown liability exceeds the monthly PACE rate (minus the Medicare Part D premium), he is not eligible for Medicaid until he actually incurs medical expenses that meet the spenddown liability within the month. The monthly medical expenses are determined retrospectively; they cannot be projected for the spenddown budget period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.800	Page 43

Retrospective spenddown eligibility determinations are made monthly after the month has passed and the expenses have actually been incurred. The PACE rate (minus the Medicare Part D premium) along with other allowable medical and dental expenses are deducted daily and chronologically as the expenses are incurred. The individual's income and resources must be verified each month before determining if the spenddown has been met. See M1470.520 for allowable medical deductions.

When incurred medical expenses equal or exceed the monthly spenddown liability, the individual is eligible for the full month of Medicaid coverage beginning the first day of the month and ending the last day of the month.

4. Patient Pay

a. Projected Spenddown Eligibility Determinations

Medicaid must assure that enough of the individual's income is allowed so that he can have a personal maintenance allowance. Therefore, the spenddown liability is NOT subtracted from his gross income nor added to the available income for patient pay.

Subtract the allowances listed in M1470.400 from gross monthly income, as applicable. Compare the remaining income for patient pay to the monthly PACE rate (minus the Medicare Part D premium) for the month. The patient pay is the lesser of the two amounts.

b. Retrospective Spenddown Eligibility Determinations

Because the spenddown eligibility determination is completed after the month in which the PACE services were received and expenses are not projected, the spenddown liability is NOT added to the available income for patient pay. Follow the instructions in M1470.630 for calculating the spenddown and patient pay when the spenddown liability exceeds the monthly PACE rate (minus the Medicare Part D premium).

M1470.800 COMMUNICATION BETWEEN LOCAL DSS AND LTC PROVIDER

A. Introduction

Certain information related to the individual's eligibility for and receipt of Medicaid LTC services must be communicated between the local agency and the LTC provider. The Medicaid LTC Communication Form (form DMAS-225) is used by both the local agency & LTC providers to exchange information.

B. Purpose

Eligibility workers should generate the DMAS-225 through VaCMS. The DMAS-225 form is also available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>.

The form is used to:

- notify the LTC provider of a patient's Medicaid eligibility status;
- notify a new provider that the patient pay is available through the verification systems;
- reflect changes in the patient's deductions, such as a medical expense allowance;
- document death of an individual;

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.900	Page 44

- document admission or discharge of a patient to an institution or community-based care services;
- provide information on health insurance, LTC insurance or VA contract coverage, and
- provide other information unknown to the provider that might cause a change in eligibility status or patient pay amount.

Do not use the DMAS-225 to relay the patient pay amount. Providers are responsible for obtaining patient pay information from the ARS/MediCall verification systems.

C. When to Complete the DMAS-225

Complete the DMAS-225 at the time of eligibility determination and/or the recipient's entry into LTC. Complete a new DMAS-225 when the recipient's eligibility status changes, such as when the recipient's Medicaid coverage is canceled or changed to limited QMB or SLMB coverage, or when the LTC provider changes.

Additionally, complete a DMAS-225 for an ongoing enrollee whose patient pay has been initially transitioned into *MES* to notify the provider that the patient pay information is available through ARS/MediCall.

D. Where to Send the DMAS-225

Refer to M1410.300 B.3.b to determine where to send the form. The worker must complete, send, and return the form timely.

M1470.900 ADJUSTMENTS AND CHANGES

A. Policy

The Medicaid recipient or his authorized representative is responsible to report any changes in his or her situation within 10 days of the day the change is known. In situations where the patient pay amount is less than the Medicaid rate the patient pay must be adjusted within 30 days of notification or discovery of the change. This section contains the procedures for when and how to adjust patient pay.

There are situations when the EW **cannot increase** the patient pay, such as when the current patient pay amount equals the Medicaid rate for the month. In this situation, an adjustment that results in an increase in patient pay cannot be made and a referral to the DMAS Recipient Audit Unit (RAU) must be completed following the procedures in M1470.900 D.3.c.1) below.

B. Action When A Change Is Reported

Upon receipt of notice that a change in an enrollee's income or deductions has occurred, the EW must evaluate continued income eligibility (see subchapter M1460). If eligibility no longer exists, follow the procedures for LTC medically needy income and spenddown (see M1460.700). If eligibility continues to exist, the EW must:

1. Recalculate the patient pay.
2. If the patient pay remains the same, send written notification to the person handling the patient's income that the patient pay is unchanged.
3. If the patient pay decreases, follow the instructions found in Item C. below. If the patient pay increases, follow the instructions found in Item D. below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.900	Page 45

C. Patient Pay Decreases

1. When to Adjust

Reflect a patient pay decrease using the *VaCMS* Patient Pay process effective the month following the month in which the change was reported when:

- the patient's income decreases;
- an allowable deduction is added or increased;
- the patient did not receive, or no longer receives, some or all of his income.

Adjust the patient pay for the month following the month in which the change was reported. DO NOT adjust patient pay retroactively, unless the patient meets a condition specified in section M1470.910 below.

2. Procedures

Using the *VaCMS* Patient Pay process, take the following steps to reflect a decrease in patient pay:

- a. Verify the decrease.
- b. Once the decrease is verified, *enter the correct information into VaCMS along with the correct effective begin dates. VaCMS will calculate the new patient pay based on the change(s).*
- c. Subtract the “new” patient pay from the “old” patient pay amount; the result is the reduced amount.
- d. Multiply the reduced amount by the number of months in which the reduced amount should have been effective; the result is the total reduction.
- e. Subtract the total reduction from the next month’s (the month following the month in which the worker is taking this action) patient pay. If the total reduction exceeds the patient pay, the patient pay amount will be zero until the total reduction has been subtracted from the patient pay.

3. Example-Patient Pay Decrease

Mr. F is an institutionalized individual who had been receiving a SSA payment of \$1,000 and a workman’s compensation payment of \$400 each month. On June 30, he reported he received his final worker’s compensation payment on June 15. The EW requested verification of the termination of the worker’s compensation and received the verification on August 22. His patient pay had been \$1,370 per month. His new patient pay is calculated to be \$960 per month. The “new” patient pay of \$960 is subtracted from the “old” patient pay of \$1,370. The monthly amount is reduced by \$410. Since Mr. F reported the change in June, the patient pay must be adjusted for July and subsequent months. The reduction of \$410 is multiplied by 2 months (July and August) and totals \$820. The EW adjusts Mr. F's September patient pay to reflect the decreased monthly income for July and August. *VaCMS* shows a September patient pay of \$140 and also shows a patient pay of \$960 for October and subsequent months.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.900	Page 46

D. Patient Pay Increases

Using the *VaCMS* Patient Pay process, reflect a patient pay increase effective the month following the month in which the 10-day advance notice period ends when the patient's income increases or an allowable deduction stops or decreases. *When the underpayment is more than \$1,500, VaCMS will not make an adjustment to the patient pay. Follow the instructions in M1700.300 for making a referral to the DMAS Recipient Audit Unit.*

1. Prospective Month(s)

Calculate the new patient pay based on the current income and make the change effective the month following the month in which the 10-day advance notice period ends. This will be the new ongoing patient pay.

2. Current and Past Month(s)

Determine the amount of the recipient underpayment when:

- the income counted was less than the income actually received; or
- an allowable deduction stopped or decreased.

Do not revise the patient pay retroactively for the current and past month(s) unless the requirements in section M1470.910 below are met.

3. Procedures

a. Determine the amount of the underpayment(s):

- 1) Calculate the new monthly patient pay based on the change(s), beginning with the month in which the change occurred.
- 2) Subtract the "old" monthly patient pay from the "new" monthly patient pay amount. The result is the amount of the recipient's underpayment for that month.
- 3) Add the monthly underpayment(s) together to determine the total amount of the recipient's underpayment. If the underpayment is less than \$1,500, follow the procedures in "b" below. If the underpayment is \$1,500 or more, follow the procedures in "c" below.

b. Total underpayment of less than \$1,500

To adjust the patient pay obligation for the month following the month in which the 10-day advance notice period ends, take the following steps:

- 1) Add the total underpayment to the new ongoing patient pay. This is the total patient pay obligation.
- 2) Compare the total patient pay obligation to the provider's Medicaid rate.
 - a) If the total patient pay obligation is less than the provider's Medicaid rate, the total amount of the patient's underpayment can be collected in one month. The total patient pay obligation is the patient pay for the month following the month in which the 10-day advance notice period ends.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.900	Page 47

- b) If the total patient pay obligation exceeds the provider's Medicaid rate, determine the difference between the ongoing patient pay and the provider's Medicaid rate. The difference is the amount of the underpayment that can be collected the first month. The patient pay for the first month (current patient pay and a portion of the underpayment) will equal the Medicaid rate. The balance of the underpayment must be collected in subsequent months. Repeat these procedures for subsequent months until the total amount of the underpayment has been reduced to zero.

c. Total underpayment of \$1,500 or more

- 1) Underpayment amounts totaling \$1,500 or more must be referred to the DMAS Recipient Audit Unit for collection.
 - a) Complete and send a Notice of Recipient Fraud/Non-Fraud (see M17, Appendix 2) to:

Recipient Audit Unit
Department of Medical Assistance Services
600 East Broad Street, Suite 1300
Richmond, Virginia 23219
 - b) Send a Notice of Action, available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, informing the patient of the referral to DMAS for collection of the underpayment.

2) Prospective months' patient pay

VaCMS will automatically generate and send a Notice of *Patient Pay Responsibility* to the patient or the patient's representative for the month following the month in which the 10-day advance notice period ends.

Virginia Medical Assistance Eligibility	M14	July 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.920	Page 48

**5. Example--
Patient Pay
Increase -Total
Underpayment
\$1,500 or More**

Mr. M is an institutionalized individual. On February 25, he reports his pension increased \$600 per month in February. On March 22 the EW recalculated the patient pay based on the current income. His new monthly patient pay is \$1,800. His "old" monthly patient pay was \$1200.

Because of the 10-day advance notice requirement the change could not be made for April and must be made for May 1. His "old" patient pay is subtracted from his "new" patient pay for February, March and April to determine his underpayment for those months. The \$600 underpayment for three months totals \$1,800. Since the total underpayment exceeds \$1,500, a patient pay adjustment cannot be made. A referral must be made to the DMAS Recipient Audit Unit for collection and the recipient must be notified of the referral (see M1470.900 D. 3. c).

M1470.910 RETROACTIVE ADJUSTMENTS FOR PRIOR MONTHS

**A. Retroactive
Adjustment**

If a change was reported timely and the patient pay for prior months is incorrect, adjust the patient pay for the prior months only in the following situations:

1. a deceased individual had health insurance premiums or noncovered medical expenses that should have reduced patient pay; or
2. a community spouse is owed money for a spousal allowance and the institutionalized spouse is deceased or no longer in long-term care. However, if the community spouse had decreased income and did not report the change in a timely manner, do not adjust the patient pay.
3. If an individual has moved from NF to CBC, adjust the patient pay effective the month after the change.

In these situations, adjust the patient pay retroactively using the VaCMS Patient Pay process for the prior months in which the patient pay was incorrect. **In all other situations when a change is reported timely, do not adjust the patient pay retroactively.** If VaCMS is not able to process required transactions, submit a Patient Pay Correction form (DMAS 9PP), available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, to patientpay@dmass.virginia.gov.

**B. Notification
Requirements**

VaCMS automatically generates and sends the Notice of Patient Pay Responsibility. DMAS will generate and mail a Notice of Patient Pay Responsibility for any changes input directly into *MES*.

M1470.920 LTC PROVIDER CHANGE WITHIN A MONTH

A. Policy

A change in LTC providers requires a review of the type of provider and living arrangements to determine the correct personal needs allowance and new patient pay, if applicable.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.920	Page 49

B. Procedures

DMAS has implemented changes effective for dates of service on or after April 1, 2017, to simplify responsibility for collecting patient pay in the transition month. For any month that an individual is enrolled in a nursing facility on the DMAS eligibility file, patient pay will be deducted only from nursing facility claims and not from agency personal care, respite care, and/or adult day health care claims.

For patients in the CCC Plus Waiver with a patient pay, *MES* will deduct patient pay from the claims submitted by waiver providers for services following the transition month. It may take a short period of time for the local department of social services to revise the patient pay (reflecting a change in status from nursing facility to CCC Plus). This will result in *MES* initially using a higher patient pay that will be adjusted by DMAS after the patient pay is revised. During this time, waiver or nursing facility providers will still be responsible for collection of identified patient pay amounts owed and should work together to collect the appropriate patient pay.

Eligibility staff will continue to calculate monthly patient pay. **There is no need to divide or apportion the patient pay when a patient changes providers or moves from one type of provider/care to another (e.g. CBC to a nursing facility) nor any a need to inform the provider via a DMAS-225.** Changes in patient pay will be made prospectively, based on advance notice requirements. Changes not requiring advance notice can be processed up to the last day of the month. If an individual has moved from NF to CBC, adjust the patient pay effective the month after the change. Patient Pay underpayment corrections should follow the procedures contained in M1470.900.

C. PACE

Enrollment in PACE begins on the first day of a month and ends on the last day of a month. Patient pay for PACE participants is not adjusted due to provider changes within a month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.1010	Page 50

M1470.930 DEATH OR DISCHARGE FROM LTC

- A. Policy** The LTC provider may not collect an amount of patient pay that is more than the Medicaid rate for the month. When a patient dies or is discharged from LTC to another living arrangement that does not include LTC services, do not recalculate patient pay for the month in which the patient died or was discharged. The provider is responsible for collecting an amount of patient pay for the month of death or discharge that does not exceed the Medicaid rate for the month.
- B. Procedure** Refer to the VaCMS Help feature for procedures regarding death or discharge from LTC. Send a DMAS-225 to the provider regarding the eligibility status of the patient. Send a notice to the patient or the patient's representative that reflects the reduction or termination of services. If VaCMS is not able to process required transactions or additional correction is needed, submit a Patient Pay Correction form (DMAS 9PP), available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, to patientpay@dmass.virginia.gov. DMAS will generate and mail a Notice of Patient Pay Responsibility for any changes input directly into MES.

M1470.1000 LUMP SUM PAYMENTS

- A. Policy** Lump sum payments of income or accumulated benefits are counted as income in the month they are received. Patient pay must be adjusted to reflect this income change for the month following the month in which the 10-day advance notice period expires. Any amount retained becomes a resource in the following month.
- B. Lump Sum Defined** Income such as interest, trust payments, royalties, etc., which is received regularly but is received less often than quarterly (i.e., once every four months or three times a year, once every five months, once every six months or twice a year, or once a year) is treated as a lump sum for patient pay purposes.
- EXCEPTION:** Income that has previously been identified as available for patient pay, but which was not actually received because the payment source was holding the payment(s) for some reason or had terminated the payment(s) by mistake, is **NOT** counted again when the corrective payment is received.
- See section M1470.1030 below for instructions for determining patient pay when a lump sum is received.

M1470.1010 LUMP SUM REPORTED IN RECEIPT MONTH

- A. Lump Sum Available** Lump sum payments reported in the month the payment was received are counted available for patient pay effective the first of the month following the month in which the 10-day advance notice period expires.
- If the individual is no longer in the facility and is not receiving Medicaid CBC, adjust the patient pay for the lump sum receipt month if the money is still available.
- B. Lump Sum Not Available** If the money is not available, complete and send a Notice of Recipient Fraud/Non-Fraud to the DMAS Recipient Audit Unit.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2019
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.1030	Page 51

M1470.1020 LUMP SUM NOT REPORTED TIMELY

- A. Effective Date** Lump sum payments reported AFTER the month in which the payment was received are not reported timely. Evaluate total resources including the lump sum. If the resources are within the limit, determine availability for patient pay. See B. & C. below. If they exceed the resource limit, go to section M1470.1100 below.
- B. Lump Sum Not Available** If the money is not available, complete and send a Notice of Recipient Fraud/Non-Fraud to the DMAS Recipient Audit Unit.
- C. Lump Sum Available**
1. If the money is still available and the individual is no longer in the facility and is not receiving Medicaid CBC, complete and send a Notice of Recipient Fraud/Non-Fraud to the DMAS Recipient Audit Unit.
 2. If the money is still available and the individual is still in the facility or is still receiving Medicaid CBC, adjust the patient pay according to procedures in section M1470.1030 below.

M1470.1030 PATIENT PAY DETERMINATION FOR LUMP SUMS

- A. Policy** When a lump sum payment is received, the patient pay for the month *following the month* in which the 10-day advance notice period expires must be adjusted using the procedures in this section. ***The patient pay cannot be increased retroactively.***
- B. CN Procedures**
- 1. Total Income** Add the lump sum to the patient's regular monthly income; the result is total income for the month.
 - 2. Less Than Or Equal To 300% of SSI** If the total gross income (including the lump sum) is equal to or less than the 300% of SSI income limit, adjust the patient pay. None of the lump sum remains to be evaluated.
 - 3. Greater Than 300% of SSI** If the total gross income (including the lump sum) exceeds the 300% of SSI income limit, adjust the patient pay. Compare the income available for patient pay to the Medicaid rate for the month.

If the income available for patient pay is less than or equal to the Medicaid rate, the available income is the patient pay. If the income available for patient pay exceeds the Medicaid rate, adjust the patient pay to equal the Medicaid rate for the month.

Evaluate the difference between the Medicaid rate and the available income as a resource for the next month. If the patient's total countable resources exceeds the resource limit, take appropriate action to cancel the patient's Medicaid.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.1030	Page 52

C. MN Procedures

1. Facility Patients-- Spenddown Liability Less Than or Equal To Medicaid Rate

For facility patients who have a spenddown liability that is less than or equal to the facility Medicaid rate and who are enrolled in ongoing Medicaid coverage:

- a. add the lump sum to the patient's regular monthly income; the result is total gross income for the month;
- b. subtract the correct personal needs/maintenance allowance and any other allowable deductions; the remainder is the income available for patient pay for the month
- c. compare the spenddown liability to the Medicaid rate for the month:
 - if the available income for patient pay is less than or equal to the Medicaid rate, the available income is the patient pay.
 - if the available income for patient pay is **greater than** the Medicaid rate, adjust the patient pay to the Medicaid rate for the month. Evaluate the difference between the Medicaid rate and the available income as a resource for the next month. If the patient's total countable resources, including the remainder of the available income, exceed the resource limit, take appropriate action to cancel the patient's Medicaid.

2. Facility Patients With Spenddown Liability Greater Than Medicaid Rate, & All Medicaid CBC Patients

For facility patients who have a spenddown liability that is greater than the facility Medicaid rate, and for ALL Medicaid CBC patients whose eligibility and patient pay are determined retrospectively:

a. Spenddown Eligibility & Patient Pay Previously Determined

If the individual's spenddown eligibility for the month has been determined without including the lump sum amount and the individual was enrolled for the month:

- 1) add the lump sum to the patient's regular monthly income in the month the lump sum was received; the result is total gross income for the month;
- 2) subtract the correct personal needs/maintenance allowance and any other allowable deductions; the remainder is the revised patient pay for the month;
- 3) compare the revised patient pay to the patient pay that was previously determined and sent to the provider:
 - if the revised patient pay is **greater than** the previously determined patient pay, adjust the patient pay to the revised patient pay amount or the Medicaid rate, whichever is less. If the Medicaid rate is less, evaluate the difference between the Medicaid rate and the revised amount as a resource for the next month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2017
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.1100	Page 53

- * if the revised patient pay is **less than or equal to** the previously determined patient pay, DO NOT adjust the patient pay.

Note: If the patient's total countable resources, including the remainder of the available income, exceed the resource limit, take appropriate action to cancel Medicaid eligibility the next month because of excess resources.

b. Spenddown Eligibility & Patient Pay NOT Previously Determined

If the individual's spenddown eligibility for the month has not yet been determined:

- 1) Recalculate the individual's spenddown liability by adding the lump sum to the patient's regular monthly income in the month the lump sum was received; determine spenddown eligibility by policy and procedures in section M1460.700.
- 2) If the individual meets the revised spenddown, determine patient pay by using the policy and procedures in section M1470.620 or M1460. 630.

M1470.1100 REDUCTION OF EXCESS RESOURCES

A. Policy

Medicaid policy allows for a full month of eligibility if the resource limit is met at any time during the month. LTC patients whose patient pay is less than the Medicaid rate can choose to reduce excess resources by expending the excess for the cost of LTC services. *This policy does not apply to individuals whose Medicaid application is pending.*

B. Resource Reduction Defined

A decrease in property value, such as an official reassessment or a lien placed against property, is not a reduction of resources. It is a decrease in the value of the resource.

In order to reduce resources, a resource must be transferred out of the patient's possession. Liquid resources such as bank accounts and prepaid burial accounts must actually be expended or encumbered. Non-liquid resources must be liquidated and the money expended.

A reduction of resources is an asset transfer and must be evaluated under asset transfer policy in subchapter M1450.

C. Procedures

1. Required Contact

When a Medicaid-enrolled LTC recipient is found to have excess resources, evaluate whether an adjustment to patient pay by using the excess toward the cost of care will allow continued eligibility in the month in which the 10-day advance notice period expires. Do not assume that the recipient or the recipient's representative will agree to use the excess resources to pay an increased patient pay.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date June 2016
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.1100	Page 54

Prior to initiating the following procedures, contact the individual or his authorized representative and tell him of the alternatives available. In the case record, document the conversation and the decision made. If unable to make contact by phone, send the Advance Notice of Proposed Action for cancellation due to excess resources.

2. Reduce Excess Resources

When the patient agrees to use the excess resources toward the cost of care, take the following steps for the month in which the 10-day advance notice period expires:

Step 1

Determine amount of excess resources (total resources minus the resource limit).

Step 2

Determine the monthly Medicaid rate:

- * for a facility patient, the monthly rate is the *patient's daily RUG* rate multiplied by 31 days.
- for a CBC patient, the monthly rate is each CBC service provider's hourly rate multiplied by the number of hours of services provided to the patient in the month.

Step 3

Add the amount of excess resources to the current patient pay.

Step 4

If the result of Step 3 is less than the monthly Medicaid rate obtained in Step 2, adjust the patient pay for one month to allow the excess resources to be reduced.

Step 5

If the result of Step 3 is more than the monthly Medicaid rate obtained in Step 2, the patient is ineligible due to excess resources. Send an "Advance Notice of Proposed Action" to cancel Medicaid coverage due to excess resources.

D. Example-- Recipient Reduces Resources

An institutionalized Medicaid recipient's resources accumulate to \$2,200 in February. His monthly income is \$500 from Social Security (SS) and \$100 VA Compensation. His patient pay of \$560 is less than the Medicaid rate. He pays the amount of his excess resources (\$200) to the nursing facility as part of his March patient pay, so he remains eligible.

\$ 500	SS
<u>+ 100</u>	VA Compensation
\$ 600	total gross income
<u>- 40</u>	personal needs allowance
\$ 560	current patient pay (prior to adding excess resources)

\$ 560	current patient pay
<u>+ 200</u>	excess resources
\$760	patient pay for March only

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.1210	Page 55

His patient pay for April and subsequent months is calculated:

\$ 500 SS
 + 100 VA Compensation
 \$ 600 total gross income
 - 40 personal needs allowance
 \$ 560 patient pay for April and subsequent months

M1470.1200 INCORRECT PAYMENTS TO PROVIDER

A. Introduction There may be instances when the amount of patient pay collected by an LTC provider is less than the amount *determined* available for payment. This situation is most likely to occur when some other person is the payee for the patient's benefits.

B. Procedures This section provides policy and procedures used to determine patient pay when the provider collects less than the patient pay *amount*. Patient pay can be adjusted *according to whether* certain criteria, specified in sections *M1470.1210 and M1470.1220* below, are met.

M1470.1210 ADJUSTMENTS NOT ALLOWED

A. Policy The facility or CBC provider is responsible to collect the patient pay from the patient or the person handling the patient's funds. When the provider is not successful in collecting the patient pay, the EW **cannot** adjust the patient pay.

B. Do Not Adjust Patient Pay The patient pay *reported in ARS/MediCall* is considered available by Medicaid. Do not adjust the patient pay when:

1. the patient directly receives his benefits and is considered to be competent but does not meet his patient pay responsibility; or
2. the amount of patient pay in question is from the patient's own funds which have been withheld by a payee or other individual receiving the patient's funds and have not been paid toward the cost of the patient's care, as specified by policy in this chapter and by the "Notice of Obligation for LTC Costs" sent to the individual.

Should the situation indicate that a change in payee is necessary, contact the program which is the source of the benefit payment and recommend a change. *Additionally*, be alert to situations that may require a referral to Adult Protective Services for an evaluation of exploitation.

C. Entitlement Benefits Adjustment For an ongoing case, if benefits from entitlement programs (such as Social Security) are not received because the program is holding the check(s) for some reason, but the benefits will be paid some time in the future in a lump sum, do not adjust the patient pay for the months the benefits are not received.

When the lump sum payment is received, do **not** count the lump sum payment and do **not** follow instructions for lump sum payments as found in this subchapter because the patient must use the lump sum to pay the previous months' remaining patient pay amounts the patient still owes to the provider.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.1220	Page 56

M1470.1220 ADJUSTMENTS ALLOWED

A. Adjust Patient Pay

Adjust the patient pay when:

- * the income counted in the patient pay calculation was not actually received because the source did not pay; *and*
- * the income will not be paid some time in the future; and
- * documentation of the change in income is received by the worker.

See section M1470.900 for instructions on adjusting patient pay.

B. Adjustment Allowed Due To Income Changes

Some examples of when income is not received and will not be paid in the future are:

1. Rental Income

Rental income is no longer received because the property was not rented for a period of time, or the renter did not pay. Be aware that if property no longer produces income, the resource exclusion may be affected. Evaluate *the individual's* continued eligibility.

2. Contribution Not Received

A contribution from a responsible relative or other source is not received. Advise the responsible relative of his legal responsibility. If there is a legal responsibility to support the individual, advise the responsible relative that continued failure to meet that responsibility may result in a non-support petition being filed with the appropriate court.

3. Income Source Exhausted

Interest income is not received because the source of income was exhausted or is no longer available.

4. Trust Income

Income from a trust fund is not received because the trustee did not make it available and/or will no longer make it available.

5. Policy/Benefits Ran Out

Payment from an insurance company or organization is not paid because the policy is no longer in force, benefits ran out, the organization refuses to or cannot pay, etc.

Sample Notice of *Patient Pay Responsibility* from VaCMS

COMMONWEALTH OF VIRGINIA
DEPARTMENT OF MEDICAL ASSISTANCE SERVICES

NOTICE OF PATIENT PAY RESPONSIBILITY

TO:

Recipient Name:

Recipient ID:

This form serves as your notice of patient pay, which is the amount of your income that must be paid to the provider every month for the cost of long-term care services you receive. The long-term care provider who is responsible for collection of any portion of your patient pay will directly bill you or your representative. A portion of patient pay may be paid to more than one provider when services are received from multiple providers. If you currently receive Medicaid long-term care services, this will serve as the 10-day advance notice when your patient pay amount is increased. Please contact your local worker if you have questions.

COMMONWEALTH OF VIRGINIA
DEPARTMENT OF MEDICAL ASSISTANCE SERVICES

Patient pay may be the lesser of the SDL amount, contributable income amount (income remaining after deductions plus the SDL), remaining income or the Medicaid Rate, whichever is applicable to the individual's circumstances.

Patient pay will not exceed the Medicaid Rate.

You must report any changes in income or resources to the local agency. Failing to report changes or providing false or misleading information may result in your prosecution for fraud.

If you have Medicare Part A coverage, and were admitted to a nursing facility under "Skilled Care", the patient pay amount you owe for the first 100 days may be less than the amount shown on this notice. The nursing facility will determine how many days are covered by Medicare and will send you a bill. Once Medicare stops paying, you will be responsible for the full patient pay amount shown on this notice.

Appeal Information

If you disagree with this action, you have the right to file an appeal. You or your authorized representative must send a written appeal request within 30 days of receipt of this notification. If you file an appeal before the effective date of this action, the patient pay will remain unchanged during the appeal process. However, if the Appeals Division upholds this action, you may be required to reimburse the Medicaid Program for the excess cost of services paid on your behalf during the appeal period.

You may write a letter or complete an Appeal Request Form. Forms are available on the internet at www.dmas.virginia.gov, at your local department of social services, or by calling (804) 371-8488.

Please include a copy of this notification. Sign the appeal request and mail it to:

Department of Medical Assistance Services, Appeals Division
600 E Broad Street, Richmond,
Virginia 23219

Appeal requests may also be faxed to (804) 452-5454

M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS' ELIGIBILITY & PATIENT PAY

M1480.000 GENERAL

A. Introduction

Section 1924 of the Social Security Act contains special eligibility rules that apply **ONLY** to married institutionalized individuals whose first continuous period of institutionalization began on or after September 30, 1989. These rules are intended to prevent the impoverishment of a spouse living in the community when the other spouse enters long-term care. **For resource assessment and eligibility determination, the resource value is its value as of the first moment of the first day of a calendar month.**

Section 1924 supersedes all other sections of Medicaid law when determining countable resources and income of a married institutionalized individual who has a community spouse. Therefore, the usual Medicaid eligibility rules do not apply to an institutionalized individual with a community spouse whenever the usual Medicaid rules conflict with the law in section 1924.

An institutionalized spouse is an individual who is in a medical institution, who is receiving Medicaid waiver services or who has elected hospice services, and who is married to a spouse who is not in a medical institution or nursing facility. The term "community spouse" means the spouse of an institutionalized spouse. The community spouse can be living outside an institution or in a residential institution such as an adult care residence.

B. Applicability

1. MAGI Adult

DO NOT use this subchapter to determine the individual's financial eligibility for Medicaid if the individual is eligible in the MAGI Adult covered group. *If an individual who has been determined eligible for LTSS in the MAGI Adult covered group subsequently marries and is no longer financially eligible in the MAGI Adults covered group, use the policy in M1480 to determine continuing financial eligibility for LTSS. The resource assessment is completed based on resources owned by the couple as of the first moment of the first day of the month in which the marriage took place (see M1480.220).*

2. Admitted Before 9-30-89

DO NOT use this subchapter to determine the individual's financial eligibility for Medicaid when the married institutionalized individual was admitted to long-term care **prior to** September 30, 1989 and has been continuously institutionalized since admission. Use subchapters M1410 - M1460 to determine the individual's financial eligibility for Medicaid.

3. Admitted On/ After 9-30-89

Use this subchapter in determining Medicaid eligibility for an institutionalized spouse who

- was admitted to long-term care **on or after** September 30, 1989 and has been continuously institutionalized since admission, and
- has a community spouse.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2020
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.010	Page 2

Do NOT use this subchapter to determine the eligibility of a married institutionalized individual whose spouse is NOT a "community spouse" as defined in this subchapter. Use subchapters M1410 - M1470 to determine the individual's eligibility and patient pay.

The rules in this subchapter apply only to the institutionalized spouse's financial eligibility. If the community spouse applies for Medicaid, use the financial eligibility rules for non-institutionalized persons in the community spouse's covered group to determine the community spouse's Medicaid eligibility.

M1480.010 DEFINITIONS

A. Introduction

This section provides definitions for those words and terms used in this subchapter.

B. Definitions

1. Beginning of a Continuous Period of Institutionalization

means the first calendar month of a continuous period of institutionalization (in a medical institution or receipt of a Medicaid Community-based Care (CBC) waiver service). See section M1410.010 for definition of a medical institution.

2. Community Spouse

means a person who:

- is married to an institutionalized spouse and
- is not an inpatient in a medical institution or nursing facility.

The community spouse can be living in the home with the institutionalized spouse who is a Medicaid CBC patient, can be living in a residential institution such as an assisted living facility (ALF), or can be living in the institutionalized spouse's former home.

If the community spouse is incarcerated, verification of resources and income are still required to be obtained from the couple.

NOTE: A spouse living in the couple's home who is also receiving Medicaid CBC waiver services is a community spouse. The community spouse monthly income allowance policy applies.

3. Community Spouse Monthly Income Allowance

means an amount by which the minimum monthly maintenance needs allowance (MMMNA) exceeds the amount of monthly income otherwise available to the community spouse. [Section 1924(d)(2) of the Social Security Act].

The community spouse monthly income allowance is the maximum amount of the institutionalized spouse's income which is allowed to supplement the community spouse's income, up to the minimum monthly maintenance needs allowance (MMMNA).

4. Community Spouse Resource Allowance (CSRA)

means the amount (if any) by which the greatest of

- the spousal share;
- the spousal resource standard;

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	September 2012
Subchapter Subject	Page ending with	Page
M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	M1480.010	3

- an amount designated by a DMAS Hearing Officer, or
- an amount *actually* transferred to the community spouse by the institutionalized spouse *following* a court spousal support order *issued as the result of an appeal of a DMAS Hearing Officer's decision*

exceeds the amount of resources otherwise available to the community spouse.

5. **Continuous Period of Institutionalization** means 30 consecutive days of institutional care in a medical institution, or 30 consecutive days of receipt of Medicaid waiver services (CBC), or 30 consecutive days of a combination of institutional and waiver services. Continuity is broken only by 30 or more days absence from a medical institution or 30 or more days of non-receipt of waiver services.
6. **Couple's Countable Resources** means all of the couple's non-excluded resources, regardless of state laws relating to community property or division of marital property. For purposes of determining the combined and separate resources of the institutionalized and community spouses when determining the institutionalized spouse's eligibility, the couple's home, contiguous property, household goods, and one automobile are excluded.
7. **Dependent Child** **means a child 21 years old or older**, of either spouse, who lives with the community spouse and who may be claimed as a dependent by either member of the couple for tax purposes pursuant to the Internal Revenue Code. Tax dependency is verified by a verbal or a written statement of either spouse.
8. **Dependent Family Member** means a dependent parent, minor child, dependent child, or dependent sibling (including half brothers/sisters and adopted siblings) of either member of a couple who resides with the community spouse and who may be claimed as a dependent by either member of the couple for tax purposes under the Internal Revenue Code. Tax dependency is verified by a verbal or a written statement of either spouse.
9. **Excess Shelter Allowance** means the actual monthly expense of maintaining the community spouse's residence that exceeds the excess shelter standard (30% of the monthly maintenance needs standard). Actual monthly expenses are the total of:
 - rent or mortgage including interest and principal;
 - taxes and insurance;
 - any maintenance charge for a condominium or cooperative; and
 - the utility standard deduction under the Supplemental Nutrition Assistance Program (SNAP) (formerly Food Stamps) that would be appropriate to the number of persons living in the community spouse's household, if utilities are not included in the rent or maintenance charge [Section 1924(d)(4) of the Social Security Act].

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 1999
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.010	Page 4

- 10. Excess Shelter Standard** means 30% of the monthly maintenance needs standard. See section M1480.410 below for the current excess shelter standard.
- 11. Family Member's Income Allowance** means an allowance for each dependent family member residing with the community spouse. The family member's income allowance is equal to 1/3 of the amount by which the monthly maintenance needs standard exceeds the family member's income. The family member's income allowance is deducted from the institutionalized spouse's income for the family member's needs.

Family member allowance = (monthly maintenance needs standard - family member income) ÷ 3

EXAMPLE #1:

$$\begin{array}{rcl}
 \$1,383 & \text{monthly maintenance needs standard} & \\
 - \quad 300 & \text{family member's income} & \\
 \hline
 1,083 & \text{amount by which monthly maintenance needs standard} & \\
 & \text{exceeds the family member's income} & \\
 \div \quad 3 & & \\
 \hline
 \$ \quad 361 & \text{family member's monthly income allowance.} &
 \end{array}$$

- 12. First Continuous Period of Institutionalization** means the first day of the month of the first continuous period of institutionalization which began on or after September 30, 1989. For example, a person was institutionalized from September 8, 1989 through March 12, 1991, then readmitted on May 28, 1991. His first continuous period of institutionalization that began on/after September 30, 1989 began on May 1, 1991.

- 13. Initial Eligibility Determination** means:
- An eligibility determination made in conjunction with a Medicaid application filed during an individual's most recent continuous period of institutionalization; or
 - The initial redetermination of eligibility for a Medicaid-eligible institutionalized spouse after being admitted to a medical institution or Medicaid CBC waiver services.

The initial eligibility determination period includes the application month and any subsequent month(s) up to the date on which the agency takes action to approve the application.

- 14. Initial Redetermination** means the first redetermination of eligibility for a Medicaid-eligible institutionalized spouse which is regularly scheduled or which is made necessary by a change in the individual's circumstances.

Manual Title	Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2008
Subchapter Subject	M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.010	Page 5

**15. Institutional-
ized Spouse**

means an individual who:

- is in a medical institution, or who is receiving Medicaid waiver services, or who has elected hospice services;
- is likely to remain in the facility, or to receive waiver or hospice services for at least 30 consecutive days; and
- who is married to a spouse who is NOT in a medical institution or nursing facility.

NOTE: An institutionalized spouse receiving Medicaid CBC Waiver services can also be a community spouse if his spouse is in a medical facility or is receiving Medicaid CBC Waiver services.

**16. Likely to
Remain in an
Institution**

means a reasonable expectation based on acceptable medical evidence that an individual will receive *LTC services* for 30 consecutive days, *unless it is known prior to processing the application that the 30-day requirement has not been met or will not be met. If it is known at the time the application is processed that the individual did not or will not meet the 30 consecutive day requirement, the individual is not to be treated as an institutionalized individual.*

**17. Maximum
Spousal
Resource
Standard**

means the maximum amount of the couple's combined countable resources established for a community spouse to maintain himself in the community (\$60,000 in 1989). This amount increases annually by the same percentage as the percentage increase in the Consumer Price Index (CPI) for all urban consumers between September 1988 and the September before the calendar year involved. [1924(f)(2)(A)(ii)].

See section M1480.231 for the current maximum spousal resource standard.

**18. Minimum
Monthly
Maintenance
Needs
Allowance
(MMMNA)**

The minimum monthly maintenance needs allowance [1924(d)(3)(A)] is the monthly maintenance needs standard, plus an excess shelter allowance if applicable, up to a maximum [1924(d)(3)(C)]. The minimum monthly maintenance needs allowance is the amount to which a community spouse's income is compared in order to determine the community spouse's monthly income allowance.

The monthly maintenance needs standard and monthly maintenance needs allowance maximum change each year. See section M1480.410 below for the current standard and maximum.

19. Minor Child

means a child under age 21 years, of either spouse, who lives with the community spouse and who may be claimed as a dependent by either member of the couple for tax purposes pursuant to the Internal Revenue Service Tax Code. Tax dependency is verified by a verbal or written statement from either spouse.

Manual Title	Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date September 2012
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS		Page ending with M1480.010	Page 6

- 20. Monthly Maintenance Needs Standard** The monthly maintenance needs standard is 150% of 1/12 of the federal poverty level for a family of two in effect on July 1 of each year [Section 1924(d)(3)(A)(i)].
- See section M1480.410 below for the current monthly maintenance needs standard.
- 21. Otherwise Available Income or Resources** means income and resources which are legally available to the community spouse and to which the community spouse has access and control.
- 22. Promptly Assess Resources** means within 45 days of the request for resource assessment, unless the delay due to non-receipt of documentation or verification, if required, from the applicant or from a third party.
- 23. Protected Period** means a period of time, not to exceed 90 days after an initial determination of Medicaid eligibility. During the protected period, the amount of the community spouse resource allowance (CSRA) will be excluded from the institutionalized spouse's countable resources IF the institutionalized spouse expressly indicates his intention to transfer resources to the community spouse.
- 24. Resource Assessment** means a calculation, completed by request or upon Medicaid application, of a couple's combined countable resources at the beginning of the **first** continuous period of institutionalization of the institutionalized spouse beginning on or after September 30, 1989.
- 25. Spousal Protected Resource Amount (PRA)** means at the time of Medicaid application as an institutionalized spouse, the greater of:
- the spousal resource standard in effect at the time of application;
 - the spousal share, not to exceed the maximum spousal resource standard in effect at the time of application;
 - the amount of resources designated by a DMAS Hearing Officer, or
 - an amount *actually* transferred to the community spouse by the institutionalized spouse pursuant to a court spousal support order *issued as the result of an appeal of the DMAS Hearing Officer's decision*.
- 26. Spousal Resource Standard** means the minimum amount of the couple's combined countable resources (\$12,000 in 1989) necessary for a community spouse to maintain himself in the community. This amount increases each calendar year after 1989 by the same percentage increase as in the Consumer Price Index (CPI). [1924(f)(2)(A)(i)].
- See section M1480.231 for the current spousal resource standard.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.015	Page 7

- 27. Spousal Share** means ½ of the couple's combined countable resources at the beginning of the **first** continuous period of institutionalization, as determined by a resource assessment.
- 28. Spouse** means a person who is legally married to another person under Virginia law.
- 29. Waiver Services** means Medicaid-reimbursed home or community-based services covered under a 1915(c) waiver approved by the Secretary of the United States Department of Health and Human Services.

M1480.015 SUBSTANTIAL HOME EQUITY PRECLUDES ELIGIBILITY FOR LONG-TERM CARE

- A. Applicability** The policy in this section applies to nursing facility and CBC/PACE patients, who meet the requirements for LTC services, now called long term services and supports (LTSS), on or after January 1, 2006. This includes individuals who filed reapplications after a break in Medicaid eligibility. It does **not** **apply** to Medicaid recipients who were approved for LTSS prior to January 1, 2006, and who maintain continuous Medicaid eligibility.

For Medicaid applicants or enrollees approved for LTSS on or after July 1, 2006, the amount of equity in the home at the time of the initial LTC determination and at each renewal must be evaluated. For the purposes of the home equity evaluation, the definition of the home in M1130.100 A.2 is used; the home means the house and lot used as the principal residence and all contiguous property, as long as the value of the land, exclusive of the lot occupied by the house, does not exceed \$5,000.

- B. Policy** Individuals with equity value (tax assessed value minus encumbrances) in home property that exceeds the limit are NOT eligible for Medicaid payment of long-term care services unless the home is occupied by:

- a spouse,
- a dependent child under age 21 years, or
- a blind or disabled child of any age.

If substantial home equity exists, the individual is not evaluated for or eligible for the Medicaid payment of LTSS. Do not evaluate asset transfers.

An individual with excess home equity is not eligible in the 300% of SSI covered group, but may be eligible for Medicaid payment of covered services other than LTSS if he is eligible in another covered group. Evaluate eligibility for an individual with substantial home equity in other covered groups.

- 1. Home Equity Limit** The applicable home equity limit is based on the date of the application or request for LTSS coverage. Effective January 1, 2011, the home equity limit is subject to change annually. The home equity limit is:
- Effective January 1, 2021: \$603,000
 - *Effective January 1, 2022: \$636,000.*
- 2. Reverse Mortgages** Reverse mortgages **do not** reduce equity value until the individual begins receiving the reverse mortgage payments from the lender.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2018
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.015	Page 8

**3. Home Equity
Lines of Credit**

A home equity line of credit **does not** reduce the equity value until credit line has been used or payments from the credit line have been received

**B. Verification
Required**

Do not assume that the community spouse is living in the home. Obtain a statement from the applicant indicating who lives in the home. If there is no spouse, dependent child under age 21, or blind or disabled child living in the home, verification of the equity value of the home is required.

**C. Notice
Requirement**

If an individual is ineligible for Medicaid payment of *LTSS* because of substantial home equity exceeding the limit, the Notice of Action must state why he is ineligible for Medicaid payment of *LTSS*. The notice must also indicate whether the applicant is eligible for other Medicaid covered services.

If the individual is in a nursing facility, send the facility a DMAS-225 indicating that the individual is not eligible for the Medicaid payment of LTSS.

D. References

See section M1120.225 for more information about reverse mortgages.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.010	Page 8a

M1480.200 RESOURCE ASSESSMENT RULES

A. Introduction

A resource assessment must be completed when an institutionalized spouse with a community spouse applies for Medicaid coverage of long term care services and may be requested without a Medicaid application.

A resource assessment is strictly a:

- compilation of a couple's reported resources that exist(ed) at the first moment of the first day of the month in which the first continuous period of institutionalization began on or after September 30, 1989.
- calculation of the couple's total countable resources at that point, and
- calculation of the spousal share of those total countable resources.

A resource assessment does not determine resource eligibility but is the first step in a multi-step process. A resource assessment determines the spousal share of the couple's combined countable resources.

B. Policy Principles

1. Applicability

The resource assessment and resource eligibility rules apply to individuals who began a continuous period of institutionalization on or after September 30, 1989 and who are likely to remain in the medical institution for a continuous period of at least 30 consecutive days, or have been *authorized* for Medicaid CBC waiver services, or have elected hospice services.

The resource assessment and resource eligibility rules do **NOT** apply to individuals who were institutionalized before September 30, 1989, **unless** they leave the institution (or Medicaid CBC waiver services) for at least 30 consecutive days and are then re-institutionalized for a new continuous period that began on or after September 30, 1989.

Resource Assessment policy does not apply to individuals eligible in the MAGI Adult covered group. However, a resource assessment may be needed when a married individual FORMERLY received LTSS as a MAGI Adult, and needs to be re-evaluated for LTSS in a non-MAGI group. If the individual is currently married but was not married on the first day of the first continuous period of institutionalization, no resource assessment is needed.

2. Who Can Request

A resource assessment without a Medicaid application can be requested by the institutionalized individual in a medical institution, his community spouse, or an authorized representative. See section M1410.100.

3. When to Do A Resource Assessment

a. Without A Medicaid Application

A resource assessment without a Medicaid application may be requested when a spouse is admitted to a **medical institution**. Do not do a resource assessment **without** a Medicaid application unless the individual is in a medical institution.

b. With A Medicaid Application

The spousal share is used in determining the institutionalized individual's resource eligibility. A resource assessment must be completed when a married institutionalized individual with a community spouse who

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.200	Page 8b

- is in a nursing facility, or
is *authorized* to receive nursing facility or Medicaid CBC waiver services, or
- has elected hospice services

applies for Medicaid. The resource assessment is completed when the applicant is *authorized* to receive nursing facility or Medicaid CBC services or within the month of application for Medicaid, whichever is later.

NOTE: Once an institutionalized spouse has established Medicaid eligibility as a Non-MAGI institutionalized spouse, count only the institutionalized spouse's resources when redetermining the institutionalized spouse's Medicaid eligibility. Do not count or deem the community spouse's resources available to the institutionalized spouse.

If an institutionalized spouse's Medicaid coverage was cancelled and he reapplies as an institutionalized individual, use only the resources in his name (including his share of jointly owned resources) for the eligibility determination.

The following table contains examples that indicate when an individual is treated as an institutionalized individual for the purposes of the resource assessment:

<i>LTSS Authorized in:</i>	In a Facility?	Application Month	Resource Assessment Month	Processing Month	Month of Application/ ongoing as Institutionalized	Retroactive Determination as Institutionalized (in a medical facility)
January	no	January	January	January	yes	no
January	no	February	February	February	yes	no
N/A	yes	January	first continuous period of institution-alization	February	yes	yes
January	no	March	March	April	yes	no
April	no	March	April	Whenever	no, but yes for April	no

c. Both Spouses Request Medicaid CBC

When both spouses request Medicaid CBC, one resource assessment is completed. The \$2,000 Medicaid resource limit applies to each spouse.

C. Responsible Local Agency

The local department of social services (DSS) in the Virginia locality where the individual last resided outside of an institution (including an ACR) is responsible for processing a request for a resource assessment without a Medicaid application, and for processing the individual's Medicaid application. If the individual never resided in Virginia outside of an institution, the local DSS responsible for processing the request or application is the local DSS serving the Virginia locality in which the institution is located.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.210	Page 9

M1480.210 RESOURCE ASSESSMENT WITHOUT A MEDICAID APPLICATION

A. Introduction

This section applies only to married individuals with community spouses who are inpatients in medical institutions or nursing facilities and who have NOT applied for Medicaid.

B. Policy

1. Resource Evaluation

For the purposes of the resource assessment and spousal share calculation, countable and excluded resources are determined for all covered groups using the ABD resource policy found in Chapter S11 **regardless of the individual's covered group and regardless of community property laws or division of marital property laws**, except for the following resources which are excluded as indicated below when completing the resource assessment and spousal share [1924(c)(5)]:

- the home and all contiguous property;
- one automobile, regardless of value;
- Disaster Relief funds for 9 months;
- retroactive SS & SSI payments received on or after 11/01/05 for nine (9) calendar months following the month in which the individual receives the benefits; and
- up to **\$1,500** of burial funds for each spouse (NOT \$3,500), if there are designated burial funds.

Resources owned in the name of one or both spouses are considered available regardless of whether either spouse agrees to sell or liquidate the resource and regardless of whether either spouse refuses to make the resource available.

If either or both spouses own more than one home, the home in which the institutionalized spouse last resided prior to institutionalization is excluded. Any other home(s) owned by either or both spouse is counted.

The resource assessment is not affected by the amount disregarded in the eligibility determination as a result of an LTC Partnership Policy (Partnership Policy).

2. No Appeal Rights

When a resource assessment is requested and completed **without** a concurrent Medicaid application, it cannot be appealed pursuant to the existing Virginia Client Appeals regulations (VR 460-04-8.7). The spousal share determination may be appealed when a Medicaid application is filed.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.210	Page 10

C. Procedures

The Medicaid Resource Assessment Request form (#032-03-815) is completed by the person requesting the resource assessment when the assessment is not part of a Medicaid application.

Nursing facilities are required to advise new admissions and their families that Medicaid resource assessments are available for married individuals from their local department of social services.

1. Case Record Number

If the institutionalized individual does not already have a case record, assign a case number and establish a case record in the institutionalized individual's name. If there is an existing case record for the institutionalized individual, use the established case number and record for the resource assessment.

2. Determining the First Continuous Period of Institutionalization

The resource assessment is based on the couple's resources owned **on the first moment of the first day of the first month** of the first continuous period of institutionalization that began on or after September 30, 1989. This may be different from the current period of institutionalization. Use the information below to determine exactly when the individual's first continuous period of institutionalization began.

Inquire if the individual was ever institutionalized prior to the current institutionalization but not earlier than September 30, 1989. If yes, ascertain the first date on or after September 30, 1989, on which the individual was admitted to a medical institution.

Ask the following:

- From where was he admitted?

If admitted from a home in the community that is not an institution as defined in section M1410.010, determine if Medicaid CBC waiver services were received and covered by Medicaid while the individual was in the home. If so, the days of Medicaid CBC receipt are “institutionalization” days.

If admitted from another institution, ascertain the admission and discharge dates, institution's name and type of institution. The days he was in a medical institution are institutionalization days if there was less than a 30-day break between institutionalizations.

- What was the last date the individual resided outside a medical institution (in the community, at home, or in a non-medical institution)?

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date June 2016
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.210	Page 11

3. Verification

The EW must advise the requesting party of the verification necessary to complete the assessment. Ownership interest and value of resources held **on the first moment of the first day of** the first month of the first continuous period of institutionalization must be verified.

Verify all non-excluded resources. Acceptable verification, for example, is a copy of the couple's bank statement(s) for the period. Do not send bank clearances; the requesting party is responsible to obtain verification of resources.

The EW is not required to assist the requesting party in obtaining any required verification for the resource assessment.

4. Failure To Provide Verification

If the applicant refuses to or fails to provide requested verification of resources held at the beginning of the first continuous period of institutionalization and does not notify the EW of difficulty in securing the requested data, the worker is unable to complete the resource assessment and is unable to determine the spousal share of resources. Go to item 8 below, "Notification Requirements."

5. Processing Time Standard

A resource assessment must be processed within 45 days of the date on which the agency receives the written and signed Medicaid Resource Assessment Request form.

If the requestor fails to provide requested verification within 45 days of receipt of notification, notify the applicant that the assessment cannot be completed, and of the reason(s) why. Use the Notice of Medicaid Resource Assessment (#032-03-817).

6. Completing the Medicaid Resource Assessment

When verification is provided, completion of the resource assessment establishes the spousal share which is equal to $\frac{1}{2}$ of a couple's total countable resources as of **the first moment of the first day of** the first month of the first continuous period of institutionalization that began on or after September 30, 1989.

a. Compile the Couple's Resources

The value of non-excluded resources must be verified *and entered into VaCMS*. Enter all resources in which the couple has an ownership interest, including resources in their joint names, those in the institutionalized spouse's name and those in the community spouse's name, including those resources owned jointly with others. List each resource separately.

VaCMS will calculate the spousal share. The process used to calculate the spousal share is found in M1480.210 6.b below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.210	Page 12

b. Calculate the Spousal Share

Calculate the total value of the couple's countable resources. Divide this total by 2 to obtain the spousal share. The spousal share is $\frac{1}{2}$ of the couple's combined countable resources as of **the first moment of the first day of the first month** of the first continuous period of institutionalization that began on or after September 30, 1989.

Calculate the spousal share only once; it remains a constant amount for any Medicaid application filed after the resource assessment.

EXAMPLE #2: A Medicaid Resource Assessment Request is received on October 20, 1996 for Mrs. H who was admitted to the nursing facility on October 18, 1996. Her first continuous period of institutionalization began on December 21, 1995, and ended with her discharge on May 30, 1996. Mr. H provides verification which proves that the couple's total countable resources as of December 1, 1995 (the first day of the first month of the first continuous period of institutionalization) were \$131,000. The spousal share is $\frac{1}{2}$ of \$131,000, or \$65,500.

On the Medicaid Resource Assessment form the worker lists the couple's resources as of December 1, 1995 as follows:

<u>Resource</u>	<u>Owner</u>	<u>Countable</u>	<u>Countable Value</u>
Home	Mr & Mrs	No	0
Savings	Mr & Mrs	Yes	\$100,000
CD	Mr	Yes	\$ 31,000
<u>\$131,000</u>	Total Value of Couple's Countable Resources		
<u>\$ 65,500</u>	Spousal Share		

If in the future, Mrs. H applies for Medicaid and she is still married to Mr. H, the worker must use the spousal share of \$65,500 determined by the October 1996 resource assessment.

7. Send Loans and/or Judgments to DMAS

When the resource assessment identifies a loan or a judgment against resources, send the documents pertaining to the loan and/or judgment to DMAS for review before taking action on the resource assessment. Send the documents, along with case identifying information (institutionalized spouse's and community spouse's names, address, SSN, case number) to:

DMAS, *Eligibility & Enrollment Services Division*
600 E. Broad Street, Suite 1300
Richmond, Virginia 23219

8. Notification Requirements

a. When the Assessment Is Not Completed

Both spouses and the guardian, conservator or authorized representative must be notified in writing that the assessment was not completed; note the specific reason on the form. Use the form Notice of Medicaid Resource Assessment (#032-03-817).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.220	Page 13

b. When the Assessment Is Completed

Both spouses and the guardian, conservator, or authorized representative must be notified in writing of the assessment results and the spousal share calculated. Use the form Notice of Medicaid Resource Assessment (#032-03-817). Attach a copy of the Medicaid Resource Assessment form (#032-03-816) to each Notice. A copy of all forms and documents used must be kept in the agency's case record.

M1480.220 RESOURCE ASSESSMENT WITH MEDICAID APPLICATION

A. Introduction

This section applies to married individuals with community spouses who are inpatients in medical institutions or nursing facilities, who have been *authorized* to receive Medicaid CBC waiver services, or who have elected hospice services. If a married individual with a community spouse is receiving private-pay home-based services, he **cannot** have a resource assessment done without also filing a concurrent Medicaid application.

B. Policy

1. Resource Assessment

If a resource assessment was **not completed** before the Medicaid application was filed, the spousal share of the couple's total countable resources that existed **on the first moment of the first day of** the first month of the first continuous period of institutionalization that began on or after September 30, 1989, is calculated when processing a Medicaid application for a married institutionalized individual with a community spouse.

If a resource assessment was completed before the Medicaid application was filed, use the spousal share calculated at that time in determining the institutionalized spouse's eligibility.

2. Use ABD Resource Policy

For the purposes of the resource assessment and spousal share calculation, countable and excluded resources are determined for all covered groups using the ABD resource policy in Chapter S11, **regardless of the individual's covered group and regardless of community property laws or division of marital property laws**, except for the following resources which are excluded as indicated below when completing the resource assessment and spousal share:

- the home and **all** contiguous property;
- one automobile, regardless of value;
- Disaster Relief funds for 9 months;
- retroactive SS & SSI payments for nine (9) calendar months following the month in which the individual receives the benefits; and
- up to **\$1,500** of burial funds for each spouse (NOT \$3,500), if there are designated burial funds.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.220	Page 14

Resources owned in the name of one or both spouses are considered available regardless of whether either spouse agrees to sell or liquidate the resource, and regardless of whether either spouse refuses to make the resource available.

If either or both spouses own more than one home, the home in which the institutionalized spouse resides or last resided prior to institutionalization is excluded. Any other home(s) owned by either or both spouse are counted.

The resource assessment is not affected by the amount disregarded in the eligibility determination as a result of a Partnership Policy.

C. Appeal Rights

When the resource assessment is completed as part of a Medicaid application and eligibility determination, the spousal share calculation can be appealed pursuant to the existing Client Appeals regulations (VR 460-04-8.7).

D. Eligibility Worker Responsibility

Each application for Medicaid for a person receiving *LTSS* services who has a community spouse requires the completion of a resource assessment to determine the spousal share used in determining eligibility.

The EW must provide the applicant with a written request for verification of:

- all reported countable resources owned by the couple **on the first moment of the first day of the first month (FOM)** of the first continuous period of institutionalization. Request this information using the Medicaid Resource Assessment form (#032-03-816) when the FOM is prior to the application's retroactive period.
- all reported countable resources owned by the couple on the first moment of the first day of the month of application, and
- all reported countable resources owned by the couple as of the first moment of the first day of each retroactive month for which eligibility is being determined.

To expedite the application processing, the EW may include a copy of the "Intent to Transfer Assets to A Community Spouse" form, available on *the VDSS intranet* with the request for verifications.

The same verification requirements as for all Medicaid applications apply to the resource assessment.

If the applicant reports to the EW that he cannot obtain certain verifications, the EW must determine why he cannot obtain them and what the EW can do to assist the applicant.

E. Procedures

The resource assessment is only a part of the eligibility determination process. The spousal share is calculated as a result of the resource assessment. The spousal share is used in the calculation of the spousal protected resource amount (PRA) and the institutionalized spouse's countable resources.

1. Forms

The applicant or his representative does not complete a Medicaid Resource Assessment Request form. The Medicaid application is the resource assessment request. The resource assessment will be calculated in VaCMS as part of the eligibility determination process.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.220	Page 15

2. Send Judgments to DMAS

When the resource assessment or eligibility determination identifies a judgment against resources, send the documents pertaining to the judgment to DMAS for review and how it relates to the resource before taking action on the application. Send the documents, along with case identifying information (institutionalized spouse's and community spouse's names, address, SSN, case number) to:

DMAS, Eligibility & Enrollment Services Division
600 E. Broad Street, Suite 1300
Richmond, Virginia 23219

3. Determining the First Continuous Period of Institutionalization

The spousal share is based on the couple's resources owned **on the first moment of the first day of** the first month of the first continuous period of institutionalization which occurred on or after September 30, 1989. This may be different from the current period of institutionalization. Use the information below to determine exactly when the individual's first continuous period of institutionalization began.

Inquire if the individual was ever institutionalized prior to current institutionalization but not earlier than September 30, 1989. If yes, ascertain the first date on or after September 30, 1989, on which the individual was admitted to a medical institution or the first date Medicaid CBC waiver services began.

Ask the following:

- From where was he admitted?

If admitted from a home in the community which is not an institution as defined in section M1410.010, determine if Medicaid CBC waiver services were received and covered by Medicaid while the individual was in the home. If so, the days of Medicaid CBC receipt are "institutionalization" days.

If admitted from another institution, ascertain the admission and discharge dates, institution's name and type of institution. The days he was in a medical institution are institutionalization days if there was less than a 30-day break between institutionalizations.

- What was the last date the individual resided outside a medical institution (in the community, at home, or in a non-medical institution)?

4. Failure to Provide Verification

a. Applicant Does Not Notify Agency of Difficulty Securing Verifications

If the applicant fails to provide requested verification of the value of the couple's resources held at the beginning of the first continuous period of institutionalization and does not notify the EW of difficulty in securing the

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.220	Page 16

requested data, the worker is unable to complete the resource assessment and eligibility as a married institutionalized individual cannot be determined. The application must be processed using rules for non-institutionalized individuals and payment for LTC services must be denied for failure to verify resources held at the beginning of institutionalization.

b. Applicant Notifies Agency of Difficulty Securing Verifications

If the applicant is unable to provide verification of the value of the couple's resources held at the beginning of the first continuous period of institutionalization and notifies the EW of difficulty in securing the requested data, the applicant may claim undue hardship.

Undue hardship can be claimed when both spouses have exhausted all avenues to verify the value of the resources owned on the first day of the first month of the first continuous period of institutionalization. When undue hardship is claimed, the applicant must provide documentation of the attempts made to obtain the verification. **Claims of undue hardship must be evaluated and can only be granted by DMAS.** The EW must send a summary of the needed verifications and documentation of the attempts to secure the verifications, along with the applicant's name and case number to:

DMAS, Eligibility & Enrollment Services Division
600 E. Broad Street, Suite 1300
Richmond, Virginia 23219

If DMAS determines undue hardship does not exist, the resource assessment cannot be completed and the application must be denied due to failure to verify resources held at the beginning of institutionalization. If DMAS determines undue hardship exists, the completion of a resource assessment is waived, and the spousal resource standard is to be substituted for the spousal share in determining the individual's resource eligibility. Go to section M1480.230 below.

5. Completing the Medicaid Resource Assessment

When verification is provided, completion of the resource assessment establishes the spousal share which is equal to $\frac{1}{2}$ of a couple's total countable resources as of **the first moment of the first day of** the first month of the first continuous period of institutionalization that began on or after September 30, 1989. The spousal share is one factor in determining the spousal protected resource amount (PRA) in section M1480.230 below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2007
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.220	Page 16a

a. Compile the Couple's Resources

The value of countable resources must be verified and recorded on the Medicaid Resource Assessment form (#032-03-816). Excluded resources must be listed separately on the form, but their value does not need to be noted or verified.

On the assessment form, list all resources in which the couple has an ownership interest - resources in their joint names, those in the institutionalized spouse's name and those in the community spouse's name, including those resources owned jointly with others. List each resource separately.

b. Calculate the Spousal Share

Calculate the total value of the couple's countable resources. Divide this total by 2 to obtain the spousal share. The spousal share is $\frac{1}{2}$ of the couple's total countable resources as of the first moment of the first day of the first month of the first continuous period of institutionalization that began on or after September 30, 1989.

Calculate the spousal share only once; it remains a constant amount for the current Medicaid application and all subsequent Medicaid applications filed.

EXAMPLE #3: A Medicaid application is received on October 20, 1996 for Mrs. H who was admitted to the nursing facility on October 18, 1996. Her first continuous period of institutionalization began on December 21, 1995, and ended with her discharge on May 30, 1996. Neither she nor her spouse requested a resource assessment before applying for Medicaid.

To determine Mrs. H's eligibility and the amount of the couple's current resources that can be "protected" for Mr. H, Mr. H provides verification which proves that the couple's total countable resources as of December 1, 1995 (the first day of the beginning of the first continuous period of institutionalization) were \$131,000. The spousal share is $\frac{1}{2}$ of \$131,000, or \$65,500.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.225	Page 17

On the Medicaid Resource Assessment form the worker lists the couple's resources as of December 1, 1995 as follows:

<u>Resource</u>	<u>Owner</u>	<u>Countable</u>	<u>Countable Value</u>
Home	Mr & Mrs	No	0
Savings	Mr & Mrs	Yes	\$100,000
CD	Mr	Yes	\$31,000

\$131,000 Total Value of Couple's Countable Resources

\$ 65,500 Spousal Share

In the eligibility evaluation, the worker uses the spousal share amount (\$65,500) as one factor to determine the spousal protected resource amount (PRA) that is subtracted from the couple's current resources to determine the institutionalized spouse's resource eligibility.

F. Notice Requirements

Do not send the Notice of Medicaid Resource Assessment when a resource assessment is completed as a part of a Medicaid application.

Include a copy of the Medicaid Resource Assessment form with the Notice of Action on Medicaid that is sent when the eligibility determination is completed.

M1480.225 INABILITY TO COMPLETE THE RESOURCE ASSESSMENT-UNDUE HARDSHIP

A. Policy

Federal law states that a resource assessment must be completed on all Medicaid applications for institutionalized individuals who have a community spouse. On occasion, however, it is difficult to comply with this requirement because the applicant is unable to establish his marital status or locate a separated spouse, or the community spouse refuses or fails to provide information necessary to complete the resource assessment. In situations where the applicant is unable to provide information necessary to complete the resource assessment, undue hardship can be claimed if each of the following criteria is met:

1. The applicant establishes by affidavit specific facts sufficient to demonstrate (a) that he has taken all steps reasonable under the circumstances to locate the spouse, to obtain relevant information about the resources of the spouse, and to obtain financial support from the spouse; and (b) that he has been unsuccessful in doing so;

Absent extraordinary circumstances, determined by DMAS, the requirements of A.1 (a) cannot be met unless the applicant and spouse have lived separate and apart without cohabitation and without interruption for at least 36 months.

2. Upon such investigation as DMAS may undertake, no *relevant* facts are revealed that refute the statement contained in the applicant's affidavit, as required by paragraph A.1.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.225	Page 18

3. The applicant has assigned to DMAS, to the full extent allowed by law, all claims he or she may have to financial support from the spouse; and
4. The applicant cooperates with DMAS in any effort undertaken or requested by DMAS to locate the spouse, to obtain information about the spouse's resources and/or to obtain financial support from the spouse.

B. Procedures

1. Assisting the Applicant

The EW must advise the applicant of the information needed to complete the resource assessment and assist the applicant in contacting the separated spouse to obtain resource and income information.

If the applicant cannot locate the separated spouse, document the VaCMS case record. Refer to M1480.225 B.2.b below.

If the applicant locates the separated spouse, the EW must contact the separated spouse to explain the resource assessment requirements for the determination of spousal eligibility for long-term care services.

If the separated spouse refuses to cooperate in providing information necessary to complete the resource assessment, document the VaCMS case record. Refer to M1480.225 B.2.b below.

EXCEPTION: If the separated spouse is institutionalized and is a Medicaid applicant/recipient, the definition of "community spouse" is not met, and a resource assessment is not needed.

2. Undue Hardship

If the applicant is unable to provide the necessary information to complete the resource assessment, he/she must be advised of the hardship policy and the right to claim undue hardship.

a. Undue hardship not claimed

If the applicant does not wish to claim undue hardship, the EW must document the VaCMS case record, and the application must be processed using rules for non-institutionalized individuals. Payment for LTC services must be denied for failure to verify resources held at the beginning of institutionalization.

b. Undue hardship claimed

If the applicant claims an undue hardship, he must provide a written statement requesting an undue hardship evaluation. A Resource Assessment Undue Hardship Request Form, including affidavit and assignment forms, may be given to the applicant to be used instead of an original statement but is **not required**. The forms are available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2018
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.225	Page 18a

1) Applicant or Authorized Representative

The applicant or his authorized representative must provide a letter *or the Resource Assessment Undue Hardship Request Form – DMAS-E10* indicating the following:

- The applicant is requesting an undue hardship evaluation;
- The name of the applicant's attorney-in-fact (i.e. who has the power of attorney) or authorized representative (*if applicable*);
- The length of time the couple has been separated;
- The name of the estranged spouse and his
 - Last known address,
 - Last known employer,
 - The types (i.e. telephone, in-person visit) and number of attempts made to contact the spouse:
 - Who made the attempt
 - Date(s) the attempt(s) were made,
 - The name of the individual contacted and relationship to estranged spouse; and
- Any legal proceeding initiated, protective orders in effect, etc.

If not included with the request, the applicant or authorized representative may also be asked to provide:

- *A completed, signed, and notarized Affidavit Form (DMAS-E11);*
- *A signed and dated Assignment Form (DMAS-E12)*

*A completed Resource Assessment Undue Hardship Request Form (including the affidavit and assignment forms) may be used instead of a letter from the worker but is **not required**.*

2) Eligibility Worker

A cover sheet is to be prepared that includes the following information:

- The applicant's name and case number;
- Documentation of any actions the EW took to locate or contact the estranged spouse; *and*
- *Include any documentation provided by the applicant or authorized representative.*

The cover sheet and all information supporting the claim must be sent to:

Eligibility and Enrollment Services Division – Policy Unit
 DMAS
 600 East Broad Street, Suite 1300
 Richmond, Virginia 23219

If DMAS determines that undue hardship does not exist, and the resource assessment cannot be completed, the EW must deny the application due to failure to verify resources held at the beginning of institutionalization.

If DMAS determines an undue hardship does exist, the EW will be sent instructions for continued processing of the case.

Virginia Medical Assistance Eligibility	M14	January 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.230	Page 18b

M1480.230 RESOURCE ELIGIBILITY OF INSTITUTIONALIZED SPOUSE

A. Introduction

This section contains the resource rules that apply to the institutionalized spouse's eligibility.

If the community spouse applies for Medicaid, do not use the rules in this subchapter to determine the community spouse's eligibility. Use the financial eligibility rules for a non institutionalized person in the community spouse's covered group.

B. Policy

An institutionalized spouse meets the resource eligibility requirements for Medicaid if the difference between the couple's total countable resources owned as of the first moment of the first day of the month for which eligibility is being determined and the spousal protected resource amount (PRA) is equal to or less than \$2,000.

In initial eligibility determinations for the institutionalized spouse, the spousal share of resources owned by the couple **at the first moment of the first day of the first month of the first continuous period of institutionalization** that began on or after September 30, 1989, remains a constant factor in determining the spousal PRA.

For the purposes of determining eligibility of an institutionalized spouse with excess resources, an institutionalized spouse **cannot** establish resource eligibility by reducing resources within the month. The institutionalized spouse may become eligible for Medicaid payment of LTC services when the institutionalized spouse's resources are equal to or below the \$2,000 resource limit as of the first moment of the first day of a calendar month.

1. Use ABD Resource Policy

For the purposes of eligibility determination, countable and excluded resources are determined for all covered groups using the ABD resource policy in Chapter S11, **regardless of the individual's covered group and regardless of community property laws or division of marital property laws**, except for the following resources which are excluded as indicated below when determining eligibility of the institutionalized spouse:

- the home and all contiguous property;
- one automobile, regardless of value;
- Disaster Relief funds for 9 months;
- retroactive SS & SSI payments received on or after 11/01/05 for nine (9) calendar months following the month in which the individual receives the benefits; and
- up to \$3,500 of burial funds for each spouse.

Resources owned in the name of one or both spouses are considered available in the initial month for which eligibility is being determined regardless of whether either spouse agrees to sell or liquidate the resource, and regardless of whether either spouse refuses to make the resource available.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.232	Page 18c

**2. After
Eligibility is
Established**

Once an institutionalized spouse has established Medicaid eligibility as an institutionalized spouse, count only the institutionalized spouse's resources when determining the institutionalized spouse's Medicaid eligibility. Do not count or deem the community spouse's resources available to the institutionalized spouse.

If an institutionalized spouse's Medicaid coverage was cancelled and he reapplies as an institutionalized individual, use only the resources of the institutionalized spouse for his eligibility determination.

M1480.231 SPOUSAL RESOURCE STANDARDS

A. Introduction

This section provides the amounts and the effective dates of the standards used to determine an institutionalized spouse's initial and ongoing resource eligibility. Use the standard in effect on the date of the institutionalized spouse's Medicaid application. Definitions of the terms are found in section M1480.010.

**B. Spousal Resource
Standard**

\$27,480 1-1-22

\$26,076 1-1-21

**C. Maximum Spousal
Resource
Standard**

\$137,400 1-1-22

\$130,380 1-1-21

M1480.232 INITIAL ELIGIBILITY DETERMINATION PERIOD

A. Policy

The initial eligibility determination period begins with the month of application. If the institutionalized spouse is eligible for the month of application, the initial eligibility determination period will both begin and end with that month.

Manual Title	Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date February 2009
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS		Page ending with M1480.232	Page 19

If the applicant is not eligible in the month of application, the initial eligibility determination period continues until the first month in which the institutionalized spouse is eligible. NOTE: Established application processing procedures and timeframes apply.

An institutionalized spouse meets the resource eligibility requirements for Medicaid if the difference between the couple's total countable resources owned as of the first moment of the first day of the month for which eligibility is being determined, the community spouse's protected resource amount (PRA) and the institutionalized spouse's partnership policy disregard amount (see M1460.160) is equal to or less than \$2,000.

1. First Application

Use the procedures in item B below for the initial resource eligibility determination for an institutionalized spouse's first application for Medicaid in a continuous period of institutionalization that began on or after 9-30-89.

2. Subsequent Applications

a. Medicaid Eligibility For LTC Services Achieved Previously

If an individual achieved Medicaid eligibility as an institutionalized spouse during a period of institutionalization that began on/after 9-30-89, regardless of whether the period of institutionalization is the same continuous period covered by the previous application(s), **do not consider the couple's resources. Use only the institutionalized spouse's resources.** Use the policy and procedures in section M1480.230 B.2 to determine the institutionalized individual's financial eligibility.

b. Medicaid Eligibility For LTC Services Not Previously Achieved

If an individual has never achieved Medicaid eligibility as an institutionalized spouse, **treat the application** as an "initial eligibility" determination.

- Determine countable resources for the application month (see item B below);
- Deduct the spousal PRA from the couple's total countable resources owned as of the first moment of the first day of the month for which eligibility is being determined.
- Deduct a dollar amount equal to the Partnership Policy disregard, if any.

B. Procedures

Use the following criteria to determine Medicaid eligibility for any month in the initial eligibility determination period.

NOTE: The initial eligibility determination period begins with the month of application. If the institutionalized spouse is not eligible in that month, the initial eligibility determination period continues until the first month in which the institutionalized spouse is eligible.

1. Couple's Total Resources

Verify the amount of the couple's total countable resources owned as of the first moment of the first day of the month for which eligibility is being determined.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.232	Page 20

NOTE: When a loan or a judgment against resources is identified, send the documents pertaining to the loan and/or judgment to DMAS for review before taking action on the application. Send the documents, along with case identifying information (institutionalized spouse's and community spouse's names, address, SSN, case number) to:

DMAS, *Eligibility & Enrollment Services Division*
600 E. Broad Street, Suite 1300
Richmond, Virginia 23219

**2. Deduct
Spousal
Protected
Resource
Amount (PRA)**

Deduct the spousal protected resource amount (PRA) from the couple's total countable resources owned as of the first moment of the first day of the month for which eligibility is being determined.

If no spousal share was determined because the couple failed to verify resources held at the beginning of the first continuous period of institutionalization, the application must be processed using rules for non-institutionalized individuals and payment for LTC services must be denied for failure to verify resources held at the beginning of institutionalization.

The PRA is the greatest of the following:

- the **spousal share** of resources as determined by the resource assessment, provided it does not exceed the maximum spousal resource standard in effect at the time of application. **If the spousal share exceeds the maximum spousal resource standard, use the maximum spousal resource standard.** The spousal share does not change; if a spousal share was previously established and verified as correct, use it;
- the **spousal resource standard** in effect at the time of application;
- an amount designated by a DMAS Hearing Officer;
- an amount **actually transferred** to the community spouse from the institutionalized spouse under a **court spousal support order** issued as the result of an appeal of the DMAS Hearing Officer's decision.

The EW cannot accept a court order for a greater PRA unless the individual has exhausted the Medicaid administrative appeals process, the individual appealed the DMAS Hearing Officer's decision to the circuit court and the circuit court ordered a higher amount.

If the individual does not agree with the PRA, see subsection F. below.

Once the PRA is determined, it remains a constant amount for the current Medicaid application (including retroactive months). If the application is denied and the individual reapplies, the spousal share remains the same but a new PRA must be determined.

**3. Deduct
Partnership
Policy
Disregard
Amount**

When the institutionalized spouse is entitled to a Partnership Policy disregard, deduct a dollar amount equal to the benefits paid as of the month of application.

Virginia Medical Assistance Eligibility	M14	October 2019
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.232	Page 21

4. Compare Remainder

Compare the remaining amount of the couple's resources to the appropriate Medicaid resource limit for one person.

a. Remainder Exceeds Limit

When the remaining resources exceed the limit and the institutionalized spouse does not have Medicare Part A, the institutionalized spouse is not eligible for Medicaid coverage because of excess resources.

If the institutionalized spouse has Medicare Part A, he may be eligible for limited coverage QMB, SLMB or QI Medicaid (which will not cover the cost of the LTC services) because the resource requirements and limits are different. **The resource policies in subchapter M1480 do not apply to limited-coverage Medicaid eligibility determinations.** Follow the procedures for determining resource eligibility for an individual in Chapter S11. More information about the QMB, SLMB, and QI covered groups is contained in subchapter M0320.

Note: The institutionalized spouse cannot be eligible for QDWI Medicaid.

b. Remainder Less Than or Equal to Limit

When the remaining resources are equal to or less than the Medicaid limit, the institutionalized spouse is resource eligible in the month for which eligibility is being determined:

- determine the community spouse resource allowance (CSRA). To calculate the CSRA, see sections M1480.240 and 241 below;
- determine a protected period of eligibility for the institutionalized spouse, if the institutionalized spouse expressly states his intent to transfer resources that are in his name to the community spouse; see section M1480.240 below.

C. Example-- Calculating the PRA

EXAMPLE #4:

Mr. A is married to a community spouse. He applied for Medicaid on December 2, 1997. The beginning of his first continuous period of institutionalization which began on or after 9-30-89 was October 12, 1993, when he was admitted to a nursing facility. He was discharged from the facility on February 5, 1995, then readmitted to the nursing facility on December 5, 1997 and remains there to date. Eligibility is being determined for December 1997.

Step 1:

The couple's total countable resources on October 1, 1993 (the first moment of the first day of the first continuous period of institutionalization) were \$130,000.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date September 2012
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.232	Page 22

Step 2: \$130,000 ÷ 2 = 65,000. The spousal share is \$65,000.

Step 3: The couple's total countable resources as of December 1, 1997 (the first moment of the first day of the month for which eligibility is being determined), are \$67,000.

Step 4: Determine the spousal protected resource amount (PRA). The spousal PRA is the greatest of:

- \$65,000 (the spousal share, which is less than the maximum spousal resource standard of \$79,020 in December 1997, the time of application).
- \$15,804 (the spousal resource standard in December 1997, the time of the application).
- \$0 (DMAS hearing decision amount or court-ordered spousal support resource amount;(there is neither in this case).

Since \$65,000 is the greatest, \$65,000 is the PRA.

Step 5: Deduct the PRA from the couple's combined countable resources as of December 1, 1997 (the first moment of the first day of the month for which eligibility is being determined).

\$67,000	Step 3 couple's total resources owned as of first moment of the first day of the month for which eligibility is being determined (December 1, 1997)
- 65,000	Step 4 PRA
\$2,000	countable resources in month for which eligibility is being determined (December 1, 1997).

The remaining \$2,000 is the countable resource *amount* available to the institutionalized spouse on December 1, 1997 (the first moment of the first month for which eligibility is being determined).

Step 6: Compare the \$2,000 countable resources to the resource limit of \$2,000. The countable resources of the institutionalized spouse are equal to the limit and he is resource eligible in December (the month for which eligibility is being determined). A CSRA and protected period of eligibility are determined in section M1480.240 and 241 below.

**D. Example--DMAS
Hearing Officer
Revised PRA**

EXAMPLE #5: Mr. C applied for Medicaid on November 21, 1996. He was admitted to a nursing facility on December 20, 1994. This is his first application for Medicaid as an institutionalized spouse. He is married to Mrs. C who lives in their community home. The first moment of the first day of the first month of the first continuous period of institutionalization is December 1, 1994. Mr. C is not resource eligible in the retroactive period. Eligibility is being determined for November 1996. The couple's total countable resources as of December 1, 1994 (the first moment of the first day of the first continuous period of institutionalization) were \$150,000.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date September 2012
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.232	Page 23

Step 2: $\$150,000 \div 2 = \$75,000$. The spousal share is \$75,000.

Step 3: The couple's total countable resources on November 1, 1996 (first moment of the first day of the month for which eligibility is being determined) are \$80,000.

Step 4: Determine the spousal protected resource amount (PRA). The spousal PRA is the greatest of:

\$75,000 (the spousal share, which is less than the maximum spousal resource standard of \$76,740 in November 1996);

\$16,152 (*the spousal resource standard at the time of the application*);

\$0 *DMAS hearing decision amount (there is none in this case).*

\$0 *amount actually transferred to community spouse pursuant to court-ordered spousal support (there is none in case).*

Since \$75,000 is the greatest, \$75,000 is the PRA.

Step 5: Deduct the PRA from the couple's combined countable resources as of November 1, 1996 (the first moment of the first day of the month for which eligibility is being determined).

\$80,000	Step 3 couple's total resources owned as of first moment of the first day of the month for which eligibility is being determined
- 75,000	Step 4 PRA
\$ 5,000	countable resources in month for which eligibility is being determined.

\$5,000 is the countable resources available to the institutionalized spouse in the month for which eligibility is being determined.

Steps 6 & 7: Compare the \$5,000 countable resources to the resource limit of \$2,000. The countable resources of the institutionalized spouse exceed the limit, so he is not eligible for *full-benefit* Medicaid in November 1996 (the month for which eligibility is being determined).

Mrs. C appealed the denial because she believes that she needs more resources protected so that her income will be sufficient to meet her needs. After a hearing in March 1997, and evidence gathered of Mrs. C's extraordinary shelter and medical expenses, the DMAS Hearing Officer decided that more of the couple's resources should be protected in order to raise Mrs. C's income to the minimum monthly maintenance needs allowance (MMMNA). The Hearing Officer decided that the spousal resource maximum of \$76,740 should be the PRA. Mr. C's eligibility was recalculated using the \$76,740 PRA.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date September 2012
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.232	Page 24

Step 5 again:

The revised PRA was deducted from the couple's total combined countable resources in November 1996 (the initial month for which eligibility is being determined):

\$80,000	Step 3 couple's total resources owned as of first moment of the first day of the month for which eligibility is being determined
- 76,740	Step 4 PRA
\$3,260	countable resources in month for which eligibility is being determined.

\$3,260 is the countable resources available to Mr. C in November 1996 (the month for which eligibility is being determined). He is not eligible for full-benefit Medicaid and the denial was sustained.

E. Example--PRA Is Amount Transferred Per Court-Ordered Spousal Support

EXAMPLE #6: Mrs. C in Example #5 above is not satisfied with the Hearing Officer's decision to increase the PRA to \$76,740 and files an appeal in circuit court. The hearing is held and the court orders Mr. C to transfer \$79,000 of his resources to Mrs. C. He immediately completes the transfers, provides the documentation to his eligibility worker, and requests his eligibility be re-evaluated.

Step 1:

The couple's total countable resources as of December 1, 1994 (the first moment of the first day of the first continuous period of institutionalization) were \$150,000..

Step 2:

$\$150,000 \div 2 = \$75,000$. The spousal share is \$75,000.

Step 3:

The couple's total countable resources as of November 1, 1996 (the first moment of the first day of the month for which eligibility is being determined) are \$80,000.

Step 4:

Determine the spousal protected resource amount (PRA). The spousal PRA is the greatest of:

- \$75,000 (the spousal share, which is less than the maximum spousal resource standard of \$80,760 in the application month);
- \$16,152 (the spousal resource standard at the time of the application);
- \$76,740 DMAS hearing decision amount
- \$79,000 amount actually transferred to community spouse pursuant to court-ordered spousal support.

Since \$79,000 is the greatest, \$79,000 is the PRA.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date September 2012
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.232	Page 25

**F. PRA Revisions
Policy**

Revisions to the community spouse's calculated protected resource amount (PRA) can be made when:

1. A DMAS Hearing Officer determines that the income generated from the resources is inadequate to raise the community spouse's income to the minimum monthly maintenance needs allowance (MMMNA). Substitute the amount the DMAS Hearing Officer determines for the PRA calculated in section M1480.232 above.
2. A DMAS Hearing Officer confirms that the initial PRA determination was incorrect.
3. A court orders spousal support in an amount that is greater than the PRA established in subsection B above *after the applicant completes the administrative appeals process.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date February 2009
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.233	Page 26

M1480.233 INITIAL ELIGIBILITY - RETROACTIVE MONTHS

A. First Application

Use the procedures for the initial resource eligibility determination (section M1480.232 above) for each of the three (3) months preceding an institutionalized spouse's first application for Medicaid in a continuous period of institutionalization that began on or after 9-30-89.

To determine the institutionalized spouse's countable resources in each retroactive month, subtract the spousal PRA from the couple's total countable resources held **on the first moment of the first day of each retroactive month**. Use the procedures in C below.

B. Subsequent Applications

1. Medicaid Eligibility Established Previously

If an individual established Medicaid eligibility as an institutionalized spouse during a period of institutionalization that began on/after 9-30-89, regardless of whether the period of institutionalization is the same continuous period covered by the previous application(s), **do not consider the couple's resources**. Use only the institutionalized spouse's resources. Use the policy and procedures in section M1480.230 B.2 to determine the institutionalized individual's financial eligibility.

For the application's retroactive month(s), determine resources using only the institutionalized spouse's resources in each retroactive month. If the institutionalized spouse's countable resources exceed the Medicaid resource limit in a retroactive month, the institutionalized spouse is NOT eligible for that month.

2. Medicaid Eligibility Not Previously Established

If an individual has never established Medicaid eligibility as an institutionalized spouse, **treat the application** as an "initial eligibility" determination (section M1480.232 above).

- Determine countable resources for the application month (see section M1480.232 above).
- Deduct the spousal PRA from the couple's total countable resources held **on the first moment of the first day of each retroactive month**.
- Deduct a dollar amount equal to the Partnership Policy disregard as of **the month of application** (Note: this amount is also used when determining eligibility for a retroactive month).

For the application's retroactive month(s), determine resources using the procedures in subsection C below.

C. Procedures

The procedures in this subsection are used for the retroactive determination based on a

- first application; or
- subsequent application when Medicaid eligibility as an institutionalized spouse was NOT previously established.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.233	Page 27

1. **Couple's Resources** Determine the couple's total countable resources as of the **first moment of the first day of each retroactive month**.
 2. **Subtract PRA** Subtract the spousal PRA (M1480.232 above) from the couple's total resources in each retroactive month. Each result is the countable resources available to the institutionalized spouse in each retroactive month.
 3. **Subtract Partnership Policy Disregard** *When the institutionalized spouse is entitled to a Partnership Policy disregard, deduct the dollar amount equal to the benefits paid as of the month of application.*
 4. **Countable Resources Within Limit** If the countable resources in a *retroactive* month are less than or equal to the resource limit, the institutionalized spouse is eligible in that month.
 5. **Countable Resources Exceed Limit** If the countable resources exceed the Medicaid resource limit in a retroactive month, the institutionalized spouse is NOT eligible for that month.
- D. Retroactive Example** **EXAMPLE #8:** Mr B's first continuous period of institutionalization began on 9-20-92. He **first applied for Medicaid on February 3, 1998** and requested retroactive coverage for December 1997 and January 1998. Mrs. B is his community spouse.

Retroactive Month

December 1997

Step 1:

The couple's total resources as of September 1, 1992 (the first moment of the first day of the first continuous period of institutionalization) were \$200,000.

Step 2:

$\$200,000 \div 2 = \$100,000$. The spousal share is \$100,000.

Step 3:

The couple's total countable resources as of December 1, 1997 (the retroactive month for which eligibility is being determined) are \$96,000.

Step 4:

Determine the spousal protected resource amount (PRA). The spousal PRA is the greatest of:

- \$80,760(the maximum spousal resource standard in effect at the time of application (February 20, 1998) is less than the spousal share of \$100,000);
- \$16,152(the spousal resource standard in effect at the time of application (February 20, 1998),
- \$0(no amount designated by DMAS Hearing Officer),
- \$0(no amount transferred pursuant to court support order).

The PRA is \$80,760 (the lesser of the maximum resource standard and the spousal resource standard, because there was no amount designated by DMAS Hearing Officer or transferred per court order).

NOTE: Once the PRA is determined, it remains the same for all retroactive months and for months in the initial eligibility determination period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2006
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.233	Page 28

Step 5: *Deduct the PRA from the couple's combined countable resources on as of December 1, 1997 (the first moment of the first day of the month for which eligibility is being determined)*

\$96,000	Step 3 couple's total resources owned as of first moment of the first day of the month for which eligibility is being determined
- 80,760	Step 4 PRA
\$15,240	countable resources in month for which eligibility is being determined.

\$15,240 countable to Mr. B.

Step 6: Since \$15,240 exceeds the \$2,000 limit, Mr. B is not eligible for Medicaid for December 1997 (the retroactive month for which eligibility is being determined).

Complete a retroactive determination for January 1998.

Retroactive Month *January 1998*

Step 1: *The couple's total resources as of September 1, 1992 (the first moment of the first day of the first continuous period of institutionalization) were \$200,000.*

Step 2: *$\$200,000 \div 2 = \$100,000$. The spousal share is \$100,000.*

Step 3: *The couple's total countable resources as of January 1, 1998 (the retroactive month for which eligibility is being determined) are \$93,000.*

Step 4: *Determine the PRA: Once the PRA is determined, it remains the same for all retroactive months and for months in the initial eligibility determination period.*

The PRA is \$80,760 (See Step 4 in the retroactive determination for December 1997 above).

Step 5: *Deduct the PRA from the couple's combined countable resources as of January 1, 1998 (the first moment of the first day of the month for which eligibility is being determined):*

\$93,000	Step 3 couple's total resources owned as of first moment of the first day of the month for which eligibility is being determined
- 80,760	Step 4 PRA
\$12,240	countable resources in month for which eligibility is being determined.

\$12,240 countable resources for Mr. B.

Step 6: *Since \$12,240 exceeds the \$2,000 limit, Mr. B is not eligible for Medicaid in for January 1998 (the retroactive month for which eligibility is being determined. Proceed to determine eligibility for the initial eligibility determination period that begins with February 1998 (month of application).*

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	July 2008
Subchapter Subject	Page ending with	Page
M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	M1480.240	29

Initial Eligibility
Determination *Month*

February 1998

Step 1: The couple’s total resources as of September 1, 1992 (the first moment of the first day of the first continuous period of institutionalization) were \$200,000.

Step 2: \$200,000 x 2 = \$100,000. The spousal share is \$100,000.

Step 3: The couple’s total countable resources as of February 1, 1998 (the month for which eligibility is being determined) are \$90,000.

Step 4: Determine the PRA: Once the PRA is determined, it remains the same for all retroactive months and for months in the initial eligibility determination period.

The PRA is \$80,760 (See Step 4 in the retroactive determine for December 1997 above).

Step 5: Deduct the PRA from the couple’s combined countable resources on February 1, 1998 (the first moment of the first day of the month for which eligibility is being determined):

\$90,000Step 3 couple's total resources owned as of first moment of the first day of the month for which eligibility is being determined
- 80,760 Step 4 PRA
\$9,240 countable resources in month for which eligibility is being determined.

\$ 9,240 countable resources for Mr. B.

Step 6: Since \$9,240 exceeds the \$2,000 limit, Mr. B is not eligible for Medicaid in February 1998 (the month for which eligibility is being determined).

Note: The initial eligibility determination period continues until the individual is found eligible. If Mr. B reapplies, he will still be in the initial eligibility determination period.

M1480.240 *INTENT TO TRANSFER - PROTECTED PERIOD*

A. Policy *After the initial eligibility determination, an institutionalized spouse who has resources in his name which exceed the Medicaid resource limit may have his Medicaid resource eligibility "protected" for a period of time if all of the following criteria are met:*

- resources in the community spouse’s name are less than the PRA at the time of application,

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.240	Page 30

- the amount of resources that may be transferred to bring the community spouse up to the PRA will reduce the resources in the institutionalized spouse's name to no more than \$2,000, and
- the institutionalized spouse has expressly indicated in writing his intent to transfer resources to the community spouse.

The protected period is designed to allow the institutionalized spouse time to legally transfer some or all of his resources to the community spouse. Resources in the institutionalized spouse's name are excluded only for one 90-day period.

If the institutionalized spouse does not transfer resources to the community spouse within the 90-day period, all of the institutionalized spouse's resources will be counted available to the institutionalized spouse when the protected period ends. If the institutionalized spouse loses eligibility after the 90-day protected period is over, and then reappplies for Medicaid, he CANNOT have resource eligibility protected again and a PRA is NOT subtracted from his resources.

B. Protected Period Is Not Applicable

A protected period of eligibility is not applicable to an institutionalized spouse when:

- the institutionalized spouse is not eligible for Medicaid;
- the institutionalized spouse previously established Medicaid eligibility as an institutionalized spouse, had a protected period of eligibility, became ineligible, and reappplies for Medicaid; or
- at the time of application, a community spouse has title to resources equal to or exceeding the PRA.

C. Intent to Transfer Resources To Community Spouse

The institutionalized spouse or authorized representative must expressly indicate in writing his intention to transfer resources to the community spouse. If not previously obtained, send an "Intent to Transfer Assets to A Community Spouse" form, available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, to the institutionalized spouse or authorized representative, allowing 10 days from the date of mailing for return of the form.

If the completed Intent to Transfer Assets form is not returned by the time the application is processed, no protected period of eligibility may be established. All resources in the institutionalized spouse's name must be counted in his eligibility determination beginning with the month following the initial eligibility determination period. If eligible, enroll the institutionalized spouse for a closed period of coverage beginning with the retroactive period and ending with the last day of the month of the initial eligibility period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.241	Page 31

If the institutionalized spouse submits a new application for Medicaid payment of long-term care services, the process starts again and a new Intent to Transfer form must be mailed.

When the community spouse is a Medicaid recipient, the eligibility worker must inform the couple that the transfer of resources to the community spouse could impact the community spouse's Medicaid eligibility.

D. How to Determine the Protected Period

The 90-day protected period begins with the date the local agency takes action to approve the institutionalized spouse's initial eligibility for Medicaid LTC services, if the institutionalized spouse or his authorized representative *has signed the Intent to Transfer Assets form*.

E. Protected Period Ends

Set a special review for the month in which the 90-day period ends. When the protected period of eligibility is over, all resources owned in the institutionalized spouse's name are counted available to the institutionalized spouse. Extension of the protected period is NOT allowed.

F. Institutionalized Spouse Acquires Resources During the Protected Period of Eligibility

If the institutionalized spouse obtains additional resources during the protected period of eligibility, the additional resources shall be excluded during the protected period if:

- the new resources combined with other resources that the institutionalized spouse intends to retain do not exceed the appropriate Medicaid resource limit for one person, OR
- the institutionalized spouse intends to transfer the new resources to the community spouse during the protected period of eligibility and the total resources to be transferred do not exceed the balance remaining (if any) of the *PRA*.

NOTE: Some assets, such as inheritances, are income in the month of receipt. Be careful to count only those assets that are resources in the month of receipt, and to count assets that are income as a resource if retained in the month following receipt.

***M1480.241* COMMUNITY SPOUSE RESOURCE ALLOWANCE (CSRA)**

A. Policy

When the Intent to Transfer form has been completed, the institutionalized spouse's eligibility is protected for 90 days to allow time for resources in the institutionalized spouse's name to be transferred to the community spouse for the community spouse's support.

The community spouse resource allowance (CSRA) is the amount of the resources in the institutionalized spouse's name (including his share of jointly owned resources) which can be transferred to the community spouse to bring the resources in the community spouse's name up to the PRA. This amount is disregarded in the institutionalized spouse's Medicaid eligibility determination during the protected period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2019
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.241	Page 32

B. CSRA Calculation Procedures

Use the following procedures for calculating the CSRA. The “Institutionalized Spouse Resource Eligibility Worksheet,” available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, should be used to determine countable resources and the CSRA.

1. Determine Community Spouse's Resources

Determine the amounts of the couple's total resources which are in the community spouse's name only and the community spouse's share of jointly owned resources owned as of the first moment of the first day of the initial month for which eligibility was established.

2. Determine Institutionalized Spouse's Resources

Determine the amounts of the couple's total resources which are in the institutionalized spouse's name only and the institutionalized spouse's share of jointly owned resources owned as of the first moment of the first day of the initial month for which eligibility was established. If the institutionalized spouse's resources changed during initial month (after the first moment of the first day of the initial month which eligibility was established) verify the institutionalized spouse's resources owned as of the first moment of the first day of the month following the initial month.

3. Calculate CSRA

To calculate the Community Spouse Resource Allowance (CSRA):

a. Determine PRA

Find the spousal PRA (determined in section M1480.232 above).

b. Subtract CS Resources from the PRA

Subtract from the PRA an amount equal to the resources in the community spouse's name only and the community spouse's share of jointly owned resources as of the first moment of the first day of the initial month in which eligibility was established.

c. Remainder

The remainder, if greater than zero, is the CSRA and the amount to be disregarded in the institutionalized spouse's Medicaid eligibility determination during the protected period. This is the amount to be transferred to the community spouse during the protected period.

If the remainder is \$0 or a negative number, the CSRA = \$0. The community spouse does not have a CSRA.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.241	Page 33

**C. Example
CSRA Calculation**

EXAMPLE #9: (Using January 2008 figures)

Mrs. Tea applied for Medicaid on *May 21, 2008*. She was admitted to the nursing facility on *January 20, 2008*. She is married to Mr. Tea who lives in their community home. This is her first application for Medicaid as an institutionalized spouse. The first day of the first month of the first continuous period of institutionalization is *January 1, 2008*. Eligibility is being determined for May 2008. *Mrs. Tea signs the Intent to Transfer from June 1, 2008.*

Step 1:

Determine the PRA

The couple's total countable resources as of *January 1, 2008* (the first moment of the first day of the first continuous period of institutionalization) were \$50,000.

\$25,000 spousal share ($\$50,000 \div 2$), *not to exceed the maximum spousal resource standard of \$104,400, eff. 01-01-2008*

\$20,880 spousal resource standard in effect on January 1, 2008

\$0 (amount actually transferred as court-ordered spousal support); or
\$0 (DMAS hearing decision amount).

Since \$25,000 is the greatest of the above, \$25,000 is the PRA.

Steps 2. and 3:

Subtract CS Resources from the PRA to Determine CSRA

The couple's total resources owned as of first moment of the first day of the month for which eligibility is being determined are \$26,500. The community spouse has \$7,000 in his name. The institutionalized spouse has \$19,500 in her name. From the PRA of \$25,000, deduct the community spouse resource amount of \$7,000. The remaining \$18,000 is the CSRA that can be transferred to the community spouse and disregarded in the institutionalized spouse's Medicaid eligibility determination during the protected period.

\$25,000	PRA
<u>- 7,000</u>	Resources in the CS name
\$18,000	CSRA (amount that can be transferred to CS)

**D. Community Spouse
Acquires Additional
Resources During
Protected Period**

If the **community spouse** obtains additional resources during the protected period of eligibility, the institutionalized spouse's eligibility is NOT affected. The community spouse's new resources are not counted when determining the institutionalized spouse's eligibility during or after the protected period of eligibility. **Do NOT recalculate the CSRA.**

**E. Reviewing Resource
Eligibility**

When reviewing the institutionalized spouse's resource eligibility at the end of the protected period and at scheduled redeterminations, the community spouse's resources are NOT counted available.

F. Asset Transfers

Instructions for treatment of asset transfers are found in subchapter M1450.

M1480.260 SUSPENSION PROCEDURES

A. Policy

This section applies to institutionalized individuals who:

are enrolled in ongoing Medicaid coverage,
have Medicare Part A,
have a patient pay that exceeds the Medicaid rate, and
have resources between \$2,000 and \$4,000.

B. Procedures

If the conditions above are met, take the following actions:

1. Prepare and Send Advance Notice

Prepare and send an advance notice to reduce the recipient's full Medicaid coverage to the appropriate ABD covered group. Specify the effective date, which is the last day of the month in which the 10-day advance notice period expires. Write a note on the notice telling the recipient that if he verifies that his resources are less than or equal to the \$2,000 resource limit before the specified date (specify the date which is 3 months from the cancel effective date), he should request reinstatement of Medicaid coverage.

2. Suspend Case Administratively

Suspend the case administratively for a maximum of 3 months; do not close the case statistically. The suspension effective date is the effective date of the Medicaid cancellation in the *Virginia Case Management System (VaCMS)*. The case is counted as a "case under care" while suspended. While suspended, the case remains open for a maximum of 3 months.

If, by the end of 3 months from the suspension effective date, the individual provides verification that his resources have been reduced to or below the resource limit, update the latest application or redetermination form in the individual's case record. Reinstatement his Medicaid coverage effective the first day of the month in which his resources are less than or equal to the resource limit.

If the individual does NOT provide verification within 3 months of the suspension effective date that his resources have been reduced to or below the resource limit, close the case administratively and statistically. Do not take any action on his enrollment in the *VaCMS* because his coverage has already been canceled. The individual will have to file a new Medicaid application.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.300	Page 48

M1480.300 INCOME ELIGIBILITY OF INSTITUTIONALIZED SPOUSE

A. Introduction

The income rules in this section apply only to the institutionalized spouse's eligibility.

The rules in this section supersede all other manual chapters and sections wherever those chapters or sections conflict with these rules. The ABD income policy rules in Virginia DSS Volume XIII, Chapter S08 are used to determine income eligibility for married institutionalized individuals.

1. When Applicable

The income rules apply to an institutionalized spouse regardless of when the continuous period of institutionalization began.

2. When Not Applicable

If the institutionalized spouse no longer meets the definition of an institutionalized spouse in section M1480.010, the income rules in this subchapter do not apply effective the first day of the first full calendar month following the month in which he no longer meets the definition of an institutionalized spouse.

Manual Title	Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2006
Subchapter Subject	M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.300	Page 49

These rules NEVER apply when determining the eligibility of the community spouse. The income rules applicable to non-institutionalized individuals, found in other sections and chapters of the manual, apply to the community spouse.

B. Policy

An institutionalized spouse's income shall be determined as follows without regard to state laws governing community property or division of marital property:

1. Income From Non-trust Property

Unless a DMAS Hearing Officer determines that the institutionalized spouse has proven to the contrary (by a preponderance of the evidence):

- a. income paid to one spouse belongs to that spouse;
- b. each spouse owns one-half of all income paid to both spouses jointly;
- c. each spouse owns one-half of any income which has no instrument establishing ownership [1924(b)(2)(C)];
- d. income paid in the name of either spouse, or both spouses and at least one other party, shall be considered available to each spouse in proportion to the spouse's interest. When income is paid to both spouses and each spouse's individual interest is not specified, consider one-half of their joint interest in the income as available to each spouse.

2. Income From Trust Property

Ownership of income from trust property shall be determined pursuant to regular income policy, except as follows:

- a. Income is considered available to each spouse as provided in the trust.
- b. If a trust instrument is not specific as to the ownership interest in the trust income, ownership shall be determined as follows:
 - 1) Income paid to one spouse belongs to that spouse.
 - 2) One-half income paid to both spouses shall be considered available to each spouse.
 - 3) Income from a trust paid in the name of either spouse or both spouses, and at least one other party, shall be considered available to each spouse in proportion to the spouse's interest in the trust principal. When income from a trust is paid to both spouses and each spouse's individual interest in the trust principal is not specified, consider one-half of their joint interest in the income as available to each spouse.

3. Income Deeming

Do not deem a community spouse's income available to an institutionalized spouse for purposes of determining the institutionalized spouse's Medicaid eligibility for any month of institutionalization (including partial months). For the month of entry into institutionalization and subsequent months, only the institutionalized individual's income is counted for eligibility and patient pay purposes.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.310	Page 50

The community spouse's income is used only to determine the community spouse monthly income allowance, if any.

4. Income Determination

For purposes of the income eligibility determination of a married institutionalized spouse, regardless of the individual's covered group, income is determined using the income eligibility instructions in section M1480.310 below and chapter S08.

For individuals who are within a spenddown budget period prior to the month in which they become institutionalized, prorate and shorten the spenddown budget period to include months **prior to admission** to long-term care services. A separate monthly budget period is established for each month of receipt of long-term care services.

5. Post-eligibility Treatment of Income

After an institutionalized spouse is determined eligible for Medicaid, his or her patient pay must be determined. See the married institutionalized individuals' patient pay policy and procedures in section M1480.400 below.

M1480.310 ABD 80% FPL AND 300% SSI AND INCOME ELIGIBILITY DETERMINATION

A. Introduction

This section provides those income requirements specific to determinations of eligibility for Medicaid participation in payment of long-term care services.

For ABD individuals, first determine the individual's eligibility in the ABD 80% FPL covered group. If the individual is ineligible in the ABD 80% FPL covered group, determine the individual's eligibility in the 300% SSI covered group.

For purposes of this section, we refer to the ABD and F&C covered groups of "individuals in medical facilities who have income less than or equal to 300% of the SSI individual payment limit" and *the ABD and F&C covered groups of* individuals receiving Medicaid waiver services who have income less than or equal to 300% of the SSI individual payment limit" as one *comprehensive* covered group. We refer to this comprehensive group as "institutionalized individuals who have income within 300% of SSI" or the "300% SSI group."

B. 300% SSI Group

The income limit for ABD and F&C individuals in the 300% SSI group is 300% of the SSI individual payment limit (see M0810.002.A.3).

1. Gross Income

Income sources listed in section M1460.610 are not considered as income.

Income sources listed in section M1460.611 ARE counted as income.

All other income is counted. The institutionalized spouse's gross income is counted; no exclusions are subtracted.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.310	Page 50a

To determine an income type or source and to determine how to count the income, use the policy and procedures in chapter S08 for all individuals (ABD and F&C) in the 300% SSI group.

Income is projected for the month for which eligibility for LTC is being determined. This calculation is based upon the income received in the past month unless there is documentation that a change has occurred or can reasonably be expected to occur which will change the amount expected to be received.

2. **Income Less Than or Equal to 300% SSI Limit**

If the individual's gross income is less than or equal to the 300% SSI income limit, enroll the individual in the appropriate CN *aid category (AC)* and determine patient pay according to the policy and procedures found in section M1480.400.

a. **Individual Has Medicare Part A**

If the individual has Medicare Part A, determine if his income is within the QMB income limit. Calculate the individual's countable income for QMB according to chapter S08, and compare to the QMB limit. If the individual's gross income is less than or equal to the QMB limit, enroll the recipient with the appropriate dual-eligible QMB AC:

- Aged = 022
- Blind = 042
- Disabled = 062

If the income is over the QMB limit, enroll the recipient with the appropriate CN non-QMB AC:

- Aged = 020
- Blind = 040
- Disabled = 060

b. **Individual Does Not Have Medicare Part A**

If the individual does NOT have Medicare Part A, enroll the ABD recipient with the appropriate CN AC:

- Aged = 020
- Blind = 040
- Disabled = 060

Enroll the F&C recipient with the appropriate CN AC:

- Institutionalized child under age 21 = 082
- Institutionalized F&C individual age 21 or older = 060.

3. **Income Exceeds 300% SSI Limit**

If income exceeds the 300% SSI limit, evaluate the institutionalized spouse as MN. Go to section M1480.330 below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.310	Page 50b

C. ABD 80% FPL

The income limit for the ABD 80% FPL covered group is 80% of the federal poverty level (see M0810.002.A.5). See section M0320.210 for details about this covered group.

The ABD income policy in chapter S08 is used to determine countable income for the ABD 80% FPL covered group. Income is projected for the month for which eligibility for LTC is being determined. This calculation is based upon the income received in the past month unless there is documentation that a change has occurred or can reasonably be expected to occur which will change the amount expected to be received.

If the individual's countable income is less than or equal to the 80% FPL income limit, enroll the individual with the appropriate ABD 80% FPL Aid Category (AC) and determine patient pay according to the policy and procedures found in section M1480.400. The ABD 80% FPL ACs are:

- Aged = 029
- Blind = 039
- Disabled = 049

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.315	Page 51

M1480.315 THIRD PARTY & LONG-TERM CARE INSURANCE PAYMENTS

A. Payments Made by Another Individual

Payment of an individual's bills (including Medicare supplementary medical insurance or other medical insurance premiums) by a third party directly to the supplier is not income.

Payments made directly to the service provider by another person for the individual's private room or "sitter" in a medical facility are NOT income to the individual. Refer all cases of Medicaid eligible enrollees in nursing facilities who have a "sitter" to DMAS, Division of Aging and Disability Services, for DMAS review to assure that DMAS is not paying the facility for services provided by the sitter.

B. LTC Insurance Policy Payments

The LTC insurance policy must be entered into the recipient's TPL file. The insurance policy type is "H" and the coverage type is "N." *Medicaid* will not pay the nursing facility's claim unless the claim shows how much the policy paid.

If the patient receives the payment from the insurance company, it is **not** counted as income. The patient should assign it to the provider. If the patient cannot do this, or the policy prohibits assignment, the payment should be given directly to the provider. The provider should report the payment as a third party payment on its claim form.

If the patient received the payment and cannot give it to the facility for some reason, then the patient should send the insurance payment to:

DMAS Fiscal Division, Accounts Receivable
600 E. Broad Street, Suite 1300
Richmond, Virginia 23219

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.320	Page 52

M1480.320 RETROACTIVE MN INCOME DETERMINATION

A. Policy

The retroactive spenddown budget period is the three months immediately prior to the application month, when none of the months overlap (was included in) a previous MN spenddown budget period in which spenddown eligibility was established. When some of the months overlap a previous MN spenddown budget period in which spenddown eligibility was established, the retroactive spenddown budget period is shortened (prorated) to include only the month (s) which were not included in the previous MN spenddown budget period.

1. Institutional-ized

For the retroactive months in which the individual was institutionalized, determine income eligibility on a **monthly basis** using the policy and procedures in this subchapter. A spenddown must be established for a month during which excess income existed.

2. Individual Not Institutional-ized

For the retroactive months in which the individual was NOT institutionalized, determine income eligibility for ABD groups using the ABD policy and procedures in chapter S08. Determine income eligibility for F&C groups using policy and procedures in chapter M07. A spenddown must be established for a month(s) during which excess income existed.

3. Retroactive Entitlement

If the applicant meets all eligibility requirements, he is entitled to Medicaid coverage for the month(s) in which all eligibility factors were met.

B. Countable Income

Countable income is that which was actually received in the retroactive month(s). Count the income received in the months in which the individual meets all other Medicaid eligibility requirements.

The countable income is compared to the appropriate income limit for the retroactive month, if the individual was CN in the month. **For the institutionalized MN individual, Medicaid income eligibility is determined monthly.**

C. Entitlement

Retroactive coverage cannot begin earlier than the first day of the third month prior to the application month. When an applicant reports that he received a medical service within the retroactive period, entitlement for Medicaid will begin with the first day of the third month prior to the application month, provided all eligibility factors were met in all three months. If the applicant had excess income in the retroactive period and met his spenddown, he is enrolled beginning the first day of the month in which his retroactive spenddown was met. For additional information refer to section M1510.101.

D. Retroactive Example

EXAMPLE #15: A disabled institutionalized spouse applies for Medicaid on June 5 and requests retroactive coverage for unpaid medical bills that he incurred in March, April, and May. His disability onset date was April 10. He was institutionalized on April 10. The retroactive period is March, April and May. He is not eligible for March because he did not meet a covered group in March. His countable resources are less than \$2,000 in April, May and June. The income he received in April and May is counted monthly because he was institutionalized in each month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.330	Page 52a

His April income is calculated and compared to the monthly 300% SSI income limit. It exceeds that limit. His May income is calculated and compared to the monthly 300% SSI income limit; it is within the limit. Therefore, he is placed on a one-month retroactive spenddown for April, and is enrolled in retroactive Medicaid in the 300% SSI covered group for May.

M1480.330 MEDICALLY NEEDY INCOME & SPENDDOWN

A. Policy

An institutionalized spouse whose income exceeds the 300% SSI income limit must be placed on a monthly MN spenddown if he meets a medically needy MN covered group and has countable resources that are less than or equal to the MN resource limit. His income is over the MN income limit because 300% of SSI is higher than the highest MN income limit for one person for one month.

MN countable income must be calculated to exclude income and portions of income that were counted in the 300% SSI income limit group calculation. Income is determined on a monthly basis and an institutionalized individual's spenddown budget period is one month. The certification period for all long term care cases is 12 months from the last application or redetermination month. This includes MN cases placed on spenddown.

B. Recalculate Income

Evaluate income eligibility for an institutionalized spouse who has income over the 300% SSI income limit using a one-month budget period and the following procedures:

1. ABD MN Covered Groups

The income sources listed in both sections M1460.610 "What is Not Income" and M1460.611 "Countable Income for 300% SSI Group" are NOT counted when determining income eligibility for the ABD MN covered groups. Countable income is determined by the income policy in chapter S08; applicable exclusions are deducted from gross income to calculate the individual's countable income.

The income actually received in the retroactive period is considered for retroactive eligibility. The income expected to be received within the application month is considered when determining eligibility in that month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2001
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.330	Page 53

The income expected to be received within a month is counted in that month for ongoing eligibility.

- a. Start with the gross monthly income figure countable for the ABD MN income determination.
- b. Subtract the \$20 general income exclusion. If the institutionalized spouse has earned income, subtract the ABD earned income exclusions found in section S0820.500. Subtract any appropriate unearned income exclusions in subchapter S0830.
- c. The remainder is the monthly countable ABD MN income.

2. F&C MN Covered Groups

The income sources listed in both sections M1460.610 “What is Not Income” and M1460.611 “Countable Income for 300% SSI Group” are NOT counted when determining income eligibility for the F&C MN covered groups. Countable income is determined by the income policy in chapter M07; applicable exclusions are deducted from gross income to calculate the individual’s countable income

Anticipated income is projected for the month for which eligibility is being determined. This calculation is based upon the income received in the prior month unless there is documentation that a change has occurred or can reasonably be expected to occur which will change the amount to be received

- a. Start with the gross monthly income figure countable for the F&C MN income determination.
- b. If the unit has earned income, subtract the F&C earned income exclusions in section M0720.500 **except** for the \$30 + 1/3 exclusion which is not applicable to MN F&C covered groups.
- c. If the Unit has child support income, subtract the \$50 child support exclusion. See section M0730.400.
- d. The remainder is the monthly countable F&C MN income.

D. MN Income Limits

The monthly medically needy (MN) individual income limits are *listed in Appendix 5 to subchapter M0710 and in section M0810.002 A. 4.*

E. Determine Spenddown Liability

Compare monthly countable income to the **monthly** MN individual income limit in the institutionalized spouse’s locality.

The amount by which the institutionalized spouse’s countable MN income exceeds the MN income limit is the **spenddown liability**.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 1999
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.330	Page 54

F. Spenddown Eligibility Procedures

To be eligible for Medicaid coverage, the institutionalized spouse must incur medical expenses in the month in an amount that equals or exceeds the spenddown liability. The policy and procedures for determining if an institutionalized spouse has met the spenddown are the “spenddown eligibility” policy and procedures.

The spenddown eligibility procedures for facility patients differ from the spenddown procedures for Medicaid CBC waiver patients. The expected monthly cost of the facility care (at the Medicaid rate) is projected at the beginning of the month. The cost of CBC is NOT projected.

1. Facility Patients

Facility patients in the MN classification fall into two distinct subgroups for the purpose of spenddown eligibility determination. These subgroups are:

- * individuals with a spenddown liability less than or equal to the monthly Medicaid rate for the facility; and
- * individuals with a spenddown liability greater than the monthly Medicaid rate for the facility.

a. Determine the Facility's Medicaid Rate

The facility's projected Medicaid rate is the Medicaid per diem multiplied by 31 days.

b. Compare Spenddown Liability

Compare the individual's spenddown liability to the facility's projected Medicaid rate.

c. SD Liability Is Less Than or Equal To Medicaid Rate

If the spenddown liability is **less than or equal to** the facility's projected Medicaid rate, the institutionalized spouse is income eligible as medically needy because he meets the spenddown based on the projected Medicaid rate alone.

- 1) Medicaid eligibility begins the first day of the month. Enroll as eligibility Type 1.
- 2) The institutionalized spouse has ongoing eligibility for the 12-month application certification period. The individual must file a redetermination after the 12-month certification period ends.
- 3) If the institutionalized spouse does **NOT** have Medicare Part A, enroll with the appropriate MN PD that follows:
 - * Aged = **18**
 - Blind = **38**

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.330	Page 55

- Disabled = **058**
- Child Under 21 in ICF/ICF-MR = **098**
- Child Under Age 18 = **088**
- Juvenile Justice Child = **085**
- Foster Care/Adoption Assistance Child = **086**
- Pregnant Woman = **097**.

4) If the institutionalized spouse has Medicare Part A, compare the individual's monthly MN countable income to the QMB monthly income limit for 1 person (see section M0810.002 for the current QMB limit):

a) When income is less than or equal to the QMB limit, enroll using the appropriate AC that follows:

- Aged = **028**
- Blind = **048**
- Disabled = **068**

b) When income is greater than the QMB limit, enroll using the appropriate AC that follows:

- Aged = **018**
- Blind = **038**
- Disabled = **058**

5) Patient Pay: Determine patient pay according to section M1480.400 below.

d. SD Liability Is Greater Than Medicaid Rate

If the spenddown liability is **greater than** the facility's Medicaid rate, the institutionalized spouse is NOT eligible unless he incurs medical expenses which meet the spenddown liability in the month. To determine if the spenddown is met, go to section M1480.335 below.

2. Medicaid CBC Waiver Patients

The institutionalized spouse meets the definition of "institutionalized" when he is *authorized* for Medicaid waiver services and the services are being provided. An institutionalized spouse who has been *authorized* for Medicaid waiver services and whose income exceeds the 300% SSI income limit is not eligible for Medicaid until he meets the monthly spenddown liability.

To determine if the spenddown is met, go to section M1480.335 below.

3. PACE Recipients

The individual's spenddown liability and the PACE monthly rate (minus the Medicare Part D premium) establish whether the spenddown eligibility determination can be projected or must be determined retrospectively.

To determine if the spenddown is met, go to section M1480.340 below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.335	Page 56

M1480.335 FACILITY PATIENTS WITH SPENDDOWN LIABILITY GREATER THAN MEDICAID RATE & ALL MN CBC PATIENTS

A. Facility Patients – SD Liability Is Greater Than Medicaid Rate

An MN institutionalized spouse whose spenddown liability is greater than the facility's Medicaid rate is not eligible for Medicaid until he incurs medical expenses that meet the spenddown liability within the month. These determinations are made monthly, retrospectively, after the month has passed and the expenses have actually been incurred. The institutionalized spouse's resources and income must be verified each month before determining if the spenddown was met.

To determine if the institutionalized spouse met the spenddown, use the following procedures:

1. Calculate Private Cost of Care

Multiply the facility's **private** per diem rate by the number of days the institutionalized spouse was actually in the facility in the month. Do not count any days the institutionalized spouse was in a hospital during the month.

The result is the private cost of care for the month.

2. Compare to Spenddown Liability

Compare the private cost of care to the institutionalized spouse's spenddown liability for the month.

3. Cost of Care Greater Than Spenddown Liability

When the private cost of care is **greater than** the institutionalized spouse's spenddown liability, the institutionalized spouse meets the spenddown in the month because of the private cost of care. He is entitled to **full-month coverage** for the month in which the spenddown was met.

Enroll the institutionalized spouse in Medicaid with the begin date of the first of the month, the end date the last day of the month. Go to section M1480.350 below for enrollment procedures. Determine patient pay according to section M1480.440 below.

4. Cost of Care Less Than or Equal To Spenddown Liability

When the private cost of care is less than or equal to the institutionalized spouse's spenddown liability, **determine spenddown on a day-by-day basis** in the month by deducting allowable incurred expenses from the spenddown liability.

To determine spenddown eligibility:

- Go to section M1480.341 below if the institutionalized spouse was NOT previously on a spenddown.
- Go to section M1480.342 below if the institutionalized spouse was previously on a spenddown.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.340	Page 57

B. All MN CBC Patients

An MN institutionalized spouse who has been *authorized* for Medicaid CBC waiver services is not eligible for Medicaid until he actually incurs medical expenses that meet the spenddown liability within the month. These determinations are made monthly, retrospectively, **after** the month has passed and the expenses have actually been incurred. The private cost of his home-based medical care is deducted on a day-by-day basis as a noncovered medical expense, along with any other incurred medical expenses.

The institutionalized spouse's resources and income must be verified each month before determining if the spenddown was met. To determine if the institutionalized spouse met the spenddown:

- * Go to section M1480.341 below if the institutionalized spouse was NOT previously on a spenddown.
- * Go to section M1480.342 below if the institutionalized spouse was previously on a spenddown.

M1480.340 MN PACE RECIPIENTS

A. Policy

1. Monthly Spenddown Determination

PACE recipients who have income over the 300% of SSI income limit are placed on a monthly spenddown as institutionalized individuals because they have been *authorized* for LTC services.

Unlike CBC, PACE has a capitated monthly rate that is due and payable on the first day of the month. The monthly PACE rate is available from the PACE provider. When a MN individual is in PACE, the amount of allowed PACE expenses is the rate that is due as of the first day of each month.

PACE recipients are not responsible for Medicare Part D premiums, which are included in the monthly PACE rate. **Therefore, the cost of the Medicare Part D premium cannot be used to meet a spenddown and must be subtracted from the monthly PACE rate when determining if the spenddown has been met.**

The individual's spenddown liability and the PACE monthly rate (minus the Medicare Part D premium) establish whether the spenddown eligibility determination can be projected or must be determined retrospectively.

2. Projected Spenddown Determination

If the MN individual's spenddown liability is less than or equal to the monthly PACE rate (minus the Medicare Part D premium), the individual is eligible for Medicaid effective the first day of the month in which the spenddown is met. As long as the individual's spenddown liability and the PACE monthly rate do not change, the individual is enrolled in ongoing coverage.

3. Retrospective Spenddown Determination

If the MN individual's spenddown liability exceeds the monthly PACE rate (minus the Medicare Part D premium), he is not eligible for Medicaid until he actually incurs medical expenses that meet the spenddown liability within the month. The monthly medical expenses are determined retrospectively; they cannot be projected for the spenddown budget period.

Retrospective spenddown eligibility determinations are made monthly after the month has passed and the expenses have actually been incurred. The PACE

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.341	Page 58

rate(minus the Medicare Part D premium) along with other allowable medical and dental expenses are deducted daily and chronologically as the expenses are incurred. The individual's income and resources must be verified each month before determining if the spenddown has been met. See M1470.530 for allowable medical deductions.

When incurred medical expenses equal or exceed the monthly spenddown liability, the individual is eligible for the full month of Medicaid coverage beginning the first day of the month and ending the last day of the month.

M1480.341 NOT PREVIOUSLY ON SPENDDOWN

A. Procedure

To determine eligibility in the one-month budget period for an institutionalized spouse who has NOT previously been on a spenddown, take the following actions:

- * deduct old bills,
- * deduct carryover expenses from the retroactive period,
- * deduct medical/remedial care expenses incurred within the budget period (month).

Use the "Medical Expense Record-Medicaid" found in Appendix 1 to subchapter M1340 to document expenses and file it in the case record.

If the institutionalized spouse was on a spenddown in the retroactive period, whether or not the retroactive spenddown was met, go to section M1480.342 below.

B. Old Bills

Old bills for medical, dental, or remedial care services received prior to the retroactive period based on the initial application that can be deducted are:

1. Paid by Public Program

Expenses for medical services for which the applicant was legally liable received on or after December 22, 1987, which were provided, covered, or paid for by a public state or local government program, can be deducted. The amount deducted is the amount that the applicant would have been liable for if the service had not been covered by a public program, up to the spenddown liability amount.

2. Legally Liable

Expenses incurred for medical services that the applicant is legally liable to pay are deducted. For the expense to be deducted:

- * the applicant must still owe the service provider a specific amount for the service and present current verification of the debt;
- * the expense (or remainder of the expense) must not have been forgiven or written-off by the provider; and

a claim for the expense must have been submitted to the liable third party and the applicant must provide evidence of the third party's payment denial or the amount paid for the expense.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.341	Page 58a

- 3. Amount Deducted** The amount deducted is the balance of the old bills owed by the applicant as of the first day of the first prospective budget period, less any portion of the amount that was used to meet the retroactive spenddown.
- 4. When Deducted** Allowable old bills are deducted on the first day of the budget period.
- C. Carry-over Expenses from Retroactive Period** Paid or unpaid expenses incurred during the retroactive period of an initial application can be deducted IF:
- * the individual established eligibility in the retroactive budget period **without having to meet a spenddown**, AND
 - * the expenses are allowable by kind of service.
- 1. Amount Deducted** The amount deducted is the amount of the expense owed as of the beginning of the budget period, up to the spenddown liability amount.
- 2. When Deducted** Allowable expenses carried over from the retroactive period are deducted on the first day of the one-month budget period.
- D. Expenses Incurred Within the Budget Period** Allowable expenses incurred on or after the beginning of the one-month budget period that can be deducted are:
- 1. Paid By Public Program** Allowable incurred expenses for medical or remedial care which the applicant received after the beginning of the budget period which were provided, covered, or paid for by a public state or local government program can be deducted. The incurred expense amount that can be deducted is the amount that the applicant would have been liable for if the service had not been covered by a public program, up to the spenddown liability amount.
- 2. Legally Liable** Allowable expenses (paid or unpaid) incurred during the budget period for which the applicant is legally liable are deducted. To be deducted, the claim for the expense must have been submitted to the liable third party. The applicant must provide evidence of the third party's payment denial or the February spenddown eligibility evaluated.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.341	Page 59

amount paid for the expense.

3. Amount Deducted

The amount that is deducted is the amount that was not or will not be paid by a third party, up to the spenddown liability amount. When determining the amount of long-term care expense incurred, use the daily private rate.

4. When Deducted

The incurred expenses are deducted in chronological order on the date the expense is incurred. The incurred expenses are deducted even if they have been paid.

EXAMPLE #16: Mr. Not lives in Group III and applied for Medicaid on November 21, 1999, as a disabled institutionalized spouse. He is in a nursing facility and was admitted on November 1, 1999. The MDU determined that he is disabled. He has not been on spenddown before. He has a \$8,400 hospital bill and a \$1,500 physician's bill for July 10 to July 20, 1998 (total \$9,900) on which he still owes a total of \$9,000. He has a \$578 outpatient hospital bill for October 3, 1998. He has no health insurance. His income is \$1,800 per month disability benefit from a private company. He is not eligible for retroactive Medicaid because he had excess resources throughout the retroactive period. His resources are within the Medicaid limit in November 1999 (application month).

He is not eligible as CN because his \$1,800 gross income exceeds the 300% SSI income limit. The facility's Medicaid rate is \$45 per day. His MN income eligibility is calculated:

\$1,800	disability benefit
- 20	general income exclusion
1,780	MN countable income.
- 325	MNIL for 1 month for 1 person in Group III
\$1,455	spenddown liability

The facility rate for the admission month is calculated as follows:

\$ 45	Medicaid per diem
x 30	days
\$1,350	facility Medicaid rate admission month

The \$1,455 spenddown liability is greater than the Medicaid rate of \$1,350.

Because he was not previously on spenddown, his verified old bills for July 1999 are deducted first from the spenddown liability. He owes the hospital \$8,000 and the physician \$1,000, total \$9,000, as of November 1, 1999 (the first day of the budget period). His eligibility is calculated:

\$1,455	spenddown liability
- 9,000	old bills owed 11-01-99
\$ 0	spenddown balance on 11-1-99

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 1999
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.342	Page 60

Because the spenddown was met on November 1, Mr. Not is entitled to medically needy Medicaid for the budget period 11-1-99 through 11-30-99.

The old bills balance, or \$7,545 (\$9,000- 1,455 = \$7,545) not used to achieve eligibility can be deducted in the subsequent month(s) from the subsequent spenddown liability if he continues to establish spenddown eligibility.

M1480.342 PREVIOUSLY ON SPENDDOWN

- A. Procedure** To determine spenddown eligibility for the budget period for an institutionalized spouse who has previously been on spenddown, take the following actions:
- B. Prorate Spenddown Prior To Institutionalization** If the institutionalized spouse is in a spenddown budget period when he becomes institutionalized, prorate the spenddown period and recalculate the spenddown liability for the months prior to the month in which he became institutionalized.
- C. Old Bills** Deduct the remaining balance on old bills incurred prior to the retroactive period if there has been no break between spenddown budget periods and no break in spenddown eligibility (each spenddown was met in all prior budget periods). Only the amount NOT deducted in a previous spenddown, and which remains the liability of the individual, can be deducted.
- D. Current Payments on Bills Incurred Prior to Retroactive Period** Deduct only the amount of the current payment(s) actually made on expenses incurred prior to the retroactive period, and which were not used previously to achieve eligibility, when there has been a break between spenddown budget periods or a break in spenddown eligibility (spenddown eligibility was NOT established in a prior spenddown budget period).
- 1. Legally Liable** Current payments for expenses that the applicant is legally liable to pay are deducted. For the expense to be deducted:
- * the applicant must still owe the service provider a specific amount for the service and present current verification of the payment amount and date(s) paid.
 - * a claim for the expense must have been submitted to the liable third party and the applicant must provide evidence of the third party's payment denial or the amount paid for the expense.
- 2. Amount Deducted** The amount deducted is the amount of the payment.
- 3. When Deducted** Allowable current payments are deducted on the date the payments are made.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 1999
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.342	Page 61

**E. Expenses from
Retroactive
Spendedown
Budget Period**

Expenses from the retroactive spenddown budget period that were not used to achieve eligibility can be deducted from the spenddown liability balance.

**1. Retroactive
Spendedown
Eligibility
Achieved**

Deduct expenses incurred during the retroactive period which were not previously used to establish eligibility, IF:

- a. the individual established eligibility in the retroactive spenddown budget period AND
- b. the expenses are:
 - * paid or unpaid;
 - * allowable by kind of service; and
 - * carried over from the retroactive spenddown budget period because the individual had a spenddown liability in the retroactive period that was met without deducting all such paid or unpaid expenses incurred in the retroactive spenddown budget period.
- c. The amount deducted is the amount of the expense owed to the provider as of the beginning of the spenddown budget period, less the amount used to meet the retroactive spenddown, up to the spenddown liability amount.
- d. Allowable expenses from the retroactive spenddown budget period are deducted on the first day of the prospective spenddown budget period.

**2. Retroactive
Spendedown
Eligibility
NOT Achieved**

Deduct only **current payments** made on expenses incurred during the retroactive spenddown budget period. When there has been a break in spenddown eligibility, only current payments made on old bills based on a prior Medicaid application can be deducted from the current spenddown liability. For the current payment to be deducted:

- a. the applicant must still owe the service provider a specific amount for the service and present current verification of the payment amount and date(s) paid,
- b. a claim for the expense must have been submitted to the liable third party and the applicant must provide evidence of the third party's payment denial or the amount paid for the expense.

The amount deducted is the amount of the current payment made.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 1999
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.342	Page 62

Current payments on expenses from the retroactive spenddown budget period are deducted on the date the payment is made.

F. Expenses Incurred Within Spenddown Budget Period

Allowable expenses incurred within the spenddown budget period that can be deducted are:

1. Paid By Public Program

Allowable incurred expenses for medical or remedial care which the applicant received after the beginning of the spenddown budget period which were provided, covered, or paid for by a public state or local government program.

The incurred expense amount that can be deducted is the amount that the applicant would have been liable for if the service had not been covered by a public program, up to the spenddown liability amount.

2. Legally Liable

Allowable expenses (paid or unpaid) incurred after the beginning of the spenddown budget period for which the applicant is legally liable are deducted. See subsection M1340.100 B.1. for a description of legal liability. To be deducted, the claim for the expense must have been submitted to any liable third party. The applicant must provide evidence of the third party's payment denial or the amount paid for the expense.

3. Amount Deducted

The amount that is deducted is the amount that was not or will not be paid by a third party, up to the spenddown liability amount.

4. When Deducted

The incurred expenses are deducted in chronological order on the date the expense is incurred. The incurred expenses are deducted even if they have been paid.

G. When Spenddown Is Met

When the institutionalized spouse incurs medical expenses which meet the spenddown on any day in the month, he is entitled to **full-month coverage** for the month in which the spenddown was met.

Enroll the institutionalized spouse in Medicaid with the begin date of the first of the month, the end date the last day of the month, eligibility Type 4. Go to section M1480.350 below for enrollment procedures. Determine patient pay according to section M1480.440 below.

H. Example--Retroactive Spenddown, Institutionalized Spenddown In Admission Month

EXAMPLE #17: Ms. Was lives in Group I and applied for Medicaid on January 6, 2000, as disabled. She is in a nursing facility and was admitted on January 5, 2000. Mr. Was is her community spouse; he lives in their Group I locality home. Her countable resources are less than the Medicaid resource limit in January, and were less than the Medicaid resource limit in all months in the retroactive period. She applied for Medicaid in December 1998 and was on a spenddown from December 1, 1998 through May 31, 1999, which she met on December 1, 1998.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.342	Page 63

She verifies that she has unpaid balances of \$2,300 on a hospital bill and \$1,500 on a physician's bill (total = \$3,800) for services received August 10 to August 12, 1998 (prior to the retroactive period based on the December 1998 application) on which she pays \$50 a month. These balances were not used to meet her December 1998 through May 1999 spenddown. She also has a \$678 outpatient hospital bill for services dated November 13, 1999, in the retroactive period. She has no health insurance and is not eligible for Medicare. She has no old bills based on her January 2000 re-application (no unpaid medical expenses incurred in June, July, August or September 1999).

She was not institutionalized in the retroactive period. Her income in the retroactive budget period was \$400 per month SSA disability. The retroactive budget period based on her January 2000 re-application is October, November and December 1999; the income limit is \$650.

Her retroactive spenddown liability is \$490.

\$400	SSA disability
- <u>20</u>	general income exclusion
380	countable income
<u>x 3</u>	months
\$1,140	countable income for retroactive budget period
- <u>650</u>	MNIL for retroactive budget period Group I
\$ 490	retroactive spenddown liability

Since there was a break in her spenddown eligibility (the period June, July, August and September 1999 were not covered by a Medicaid application), only the current payments she is making on the August 1998 bills can be deducted from her retroactive spenddown liability. She paid the hospital and the physician \$50 each (\$100 total) on October 5, November 4 and December 5, 1999. Her retroactive eligibility is calculated:

\$ 490	retroactive spenddown liability
- <u>100</u>	current payment 10-5-99 (Aug.1998 hospital & physician bills)
390	spenddown balance on 10-5-99
- <u>100</u>	current payment 11-4-99 (Aug.1998 hospital & physician bills)
290	spenddown balance on 11-3-99
- <u>678</u>	outpatient expense 11-13-99 (\$388 of expense carried over)
\$ 0	spenddown balance on 11-13-99

The retroactive spenddown was met on November 13, 1999. Ms. Was' retroactive Medicaid entitlement was November 13, 1999 through December 31, 1999.

Her income starting January 1, 2000 increased. Her SSA is \$620 per month and she began receiving a Civil Service Annuity of \$1,300 per month; total income is \$1,920 per month. Because this exceeds the 300% SSI income limit, her medically needy income eligibility is calculated as follows:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date September 2010
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.342	Page 64

\$1,920.00 total monthly income
 - 20.00 general income exclusion
 1,900.00 countable income
 - 216.67 MNIL for 1 month for 1 person in Group I
 \$1,683.33 spenddown liability

The facility's private rate is \$58 per day; the Medicaid rate is \$45 per day.
 The facility Medicaid rate for the admission month is calculated as follows:

\$ 45 Medicaid per diem
x 27 days
 \$1,215 Medicaid rate admission month

Her spenddown liability of \$1,683.33 is greater than the Medicaid rate of \$1,215. Therefore, she is not eligible until she has actually incurred medical bills that equal or exceed her spenddown liability in January. The worker is processing the application on February 2. Mrs. Was was in the facility from January 5 through January 31. The facility's private cost is calculated:

\$ 58 private per diem
x 27 days in facility in January
 \$1,566 private cost of care in January

The private cost of care for January, \$1,566, is less than Mrs. Was's spenddown liability of \$1,683.33. Therefore, her spenddown eligibility for January must be determined on a daily basis. The prospective budget period is January 1 through January 31, 2000. Since she had a break in spenddown eligibility, only the current payments she is making on the August 1998 bills can be deducted from her spenddown liability. She paid the hospital \$50 and the physician \$50 each (\$100 total) on January 5, 2000. Her spenddown eligibility is determined:

\$1,683.33 prospective spenddown liability
 - 388.00 carry-over expense (balance of 11-13-99 outpatient expense)
 - 100.00 current payment Aug, 1998 hospital & physician bills 1-1-00
 1,195.33 spenddown balance on 1-1-00
 - 812.00 14 days private rate @ \$58 per day (1-5 through 1-18)
 383.33 spenddown balance on 1-19-00
 - 348.00 6 days private rate @ \$58 per day (1-19 through 1-23)
 35.33 spenddown balance on 1-23-00
 - 58.00 private cost of care for 1-24-00
 \$ 0 spenddown balance on 1-24-00

Mrs. Was met her spenddown on January 24, 2000. On February 3, the worker enrolls Mrs. Was in Medicaid as medically needy with eligibility begin date 1-1-2000 and end date 1-31-2000. The worker sends her a "Notice of Action on Medicaid" stating her Medicaid coverage dates and asking her to bring or send in her medical bills for February if she wants her *February spenddown eligibility evaluated*.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2015
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.350	Page 65

M1480.350 SPENDDOWN ENTITLEMENT

A. Entitlement After Spenddown Met

When an institutionalized spouse meets a spenddown within a month, the begin date of eligibility will be the first day of the month in which the spenddown was met. Eligibility will end on the last day of the month in which the spenddown was met.

B. Procedures

1. Coverage Dates

Coverage begin date is the first day of the month; the coverage end date is the last day of the month.

2. AC

Enroll the institutionalized spouse in one of the following ACs:

- Aged = 018
- Blind = 038
- Disabled = 058
- Child Under 21 in ICF/ICF-MR = 098
- Child Under Age 18 = 088
- Juvenile Justice Child = 085
- Foster Care/Adoption Assistance Child = 086
- Pregnant Woman = 097

3. Patient Pay

Determine patient pay according to section M1480.400 below.

4. Notices & Re-applications

The institutionalized spouse on a spenddown must have his eligibility re-evaluated monthly, unless he is in a facility and the spenddown liability is less than or equal to the Medicaid rate. The institutionalized spouse must complete an annual redetermination.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.420	Page 66

After eligibility is established, the usual reporting and notification processes apply. Send written notice for the month(s) during which the individual establishes Medicaid eligibility. VaCMS will generate the “Notice of Patient Pay Responsibility” and it will be sent to the individual or his authorized representative.

M1480.400 PATIENT PAY

- A. Introduction** This section contains the policy and procedures for determining an institutionalized spouse’s (as defined in section M1480.010 above) patient pay in all covered groups.
- B. Married With Institutionalized Spouse in a Facility** For a married long-term services and support (LTSS) patient with an institutionalized spouse in a facility, **NO** amount of the patient’s income is deducted for the spouse’s needs in the patient pay calculation.

M1480.410 MAINTENANCE STANDARDS & ALLOWANCES

- Introduction** This subsection contains the standards and their effective dates that are used to determine the community spouse’s and other family members’ income allowances. The income allowances are deducted from the institutionalized spouse’s gross monthly income when determining the monthly patient pay amount. Definitions of these terms are in section M1480.010 above.
- | | | | |
|---|------------|-----------------------------|---------|
| B. Monthly Maintenance Needs Allowance | \$2,177.50 | 7-1-21 | |
| | \$2,288.75 | 7-1-22 | |
| C. Maximum Monthly Maintenance Needs Allowance | \$3,259.50 | 1-1-21 | |
| | \$3,435.00 | 1-1-22 | |
| D. Excess Shelter Standard | \$653.25 | 7-1-21 | |
| | \$686.63 | 7-1-22 | |
| E. Utility Standard Deduction (SNAP) | \$322.00 | 1 - 3 household members | 10-1-21 |
| | \$402.00 | 4 or more household members | 10-1-21 |
| | \$374.00 | 1 - 3 household members | 10-1-22 |
| | \$473.00 | 4 or more household members | 10-1-22 |

M1480.420 PATIENT PAY FOR ABD 80% FPL AND 300% SSI INSTITUTIONALIZED SPOUSE

- A. Policy** After a 300% SSI or ABD 80% FPL institutionalized spouse has been found eligible for Medicaid, determine his patient pay (post-eligibility treatment of income).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 67

B. What Is Patient Pay

The institutionalized spouse's gross monthly income, less all appropriate deductions according to this section, constitutes the patient pay - the amount of income the institutionalized spouse will be responsible to pay to the LTC facility or waiver services provider. The community spouse's and family member's monthly income allowances rules for patient pay apply to all institutionalized spouses with community spouses, regardless of when institutionalization began.

C. Dependent Allowances

A major difference in the institutionalized spouse patient pay policy is the allowance for a dependent child and for a dependent family member. If the institutionalized spouse has a dependent child, but the dependent child does NOT live with the community spouse, then **NO** allowance is deducted for the child. Additionally, an allowance may be deducted for other dependent family members living with the community spouse.

D. Home Maintenance Deduction

A major difference in the institutionalized spouse patient pay policy is the home maintenance deduction policy. A married institutionalized individual with a community spouse living in the home is **NOT allowed** the home maintenance deduction because the community spouse allowance provides for the home maintenance, **UNLESS**:

- the community spouse is not living in the home (e.g., the community spouse is in an ACR), and
- the institutionalized spouse still needs to maintain their former home.

E. VaCMS Patient Pay Process

The patient pay is calculated in *VaCMS*. The patient pay must be updated in *in the system* whenever the patient pay changes, but at least once every 12 months. Refer to the *VaCMS Help feature* for information regarding data entry.

The Automated Response System (ARS) and the MediCall System convey the necessary patient pay information to the provider.

M1480.430 ABD 80% FPL and 300% SSI PATIENT PAY CALCULATION

A. Patient Pay Gross Monthly Income

Determine the institutionalized spouse's patient pay gross monthly income for patient pay. Use the gross income policy in section M1480.310 B.1 for both covered groups.

B. Subtract Allowable Deductions

If the patient has no patient pay income, he has no patient pay deductions.

When the patient has patient pay income, **deduct the following amounts in the following order** from the institutionalized spouse's gross monthly patient pay income. Subtract each subsequent deduction as long as the individual has income remaining for patient pay. If the individual has no remaining income, do not subtract further deductions.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date April 2012
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 68

- personal needs or maintenance allowance,
- community spouse monthly income allowance,
- family member's income allowance,
- non-covered medical expenses,
- home maintenance deduction, if applicable.

C. Personal Needs or Maintenance Allowance

The personal needs allowance for an institutionalized spouse in a facility is different from the personal maintenance allowance of an institutionalized spouse in a Medicaid CBC waiver or PACE. The amount of the personal needs or maintenance allowance also depends on whether or not the patient has a guardian or conservator who charges a fee, and whether or not the patient has earnings from employment that is part of the treatment plan.

1. Facility Care

a. Basic Allowance

Deduct the \$40 basic allowance, effective July 1, 2007. For prior months, the personal needs allowance is \$30.

b. Guardian Fee

Deduct the actual fee a guardian or conservator charges, up to a maximum of 5% of the patient's actual gross income (including amounts not counted as income and excluded income) for guardianship fees, IF:

- * the patient has a legally appointed guardian and/or conservator AND
- * the guardian or conservator charges a fee.

Document how you determined that the guardian/conservator charges a fee and the amount of the fee.

NOTES: *No deduction is allowed for representative payee or "power of attorney" fees or expenses. No deduction is allowed if the patient's guardian receives a payment for providing guardianship services from a public agency or organization that receives funding for guardianship services. The guardianship filing fees CANNOT be deducted from the individual's income.*

. Special Earnings Allowance

Deduct a special earnings allowance if the patient participates in a work program as part of treatment. The special earnings allowance is deducted from earned income only. Deduct:

- * the first \$75 of gross monthly earnings, PLUS
- * ½ the remaining gross earnings,
- * up to a maximum of \$190 per month.

The special earnings allowance cannot exceed \$190 per month.

d. Example - Facility Care Personal Needs Allowance

EXAMPLE #18: A patient in the nursing facility is employed as a telephone salesperson as part of his plan of care in the facility. He has a legally appointed conservator who charges a 2% fee. His only income is gross earnings of \$875 per month. His special earnings allowance is calculated first:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 69

\$875 gross earned income
 - 75 first \$75 per month
 800 remainder
 ÷ 2
 400 ½ remainder
 + 75 first \$75 per month
 \$475 which is > \$190

His personal needs allowance is calculated as follows:

\$ 40.00 basic personal needs allowance
 +190.00 special earnings allowance
 + 17.50 guardianship fee (2% of \$875)
 \$247.50 personal needs allowance

2. Medicaid CBC Waiver Services and PACE

a. Basic Maintenance Allowance

For the Commonwealth Coordinated Care Plus (CC Plus) Waiver (formerly the Elderly or Disabled with Consumer Direction Waiver and the Technology-Assisted Individuals Waiver), Community Living (CL) Waiver (formerly Intellectual Disabilities Waiver), Family and Individual Supports (IS) Waiver (formerly Individual and Family Developmental Disabilities Support Waiver), Building Independence (BI) Waiver (formerly Day Support Waiver), or PACE, deduct the appropriate maintenance allowance for one person as follows:

- January 1, 2021 through December 31, 2021: \$1,311
- *January 1, 2022 through December 31, 2022: \$1,388.*

Contact a Medical Assistance Program Consultant for the amount in effect for years prior to 2017.

b. Guardian Fee

Deduct the actual fee a guardian or conservator charges, up to a maximum of 5% of the patient's actual gross income (including amounts not counted as income and excluded amounts) for guardianship fees, IF:

- * the patient has a legally appointed guardian or conservator AND
- * the guardian or conservator charges a fee.

Document how you determined that the guardian/conservator charges a fee and the amount of the fee.

NOTES: No deduction is allowed for representative payee or "power of attorney" fees or expenses. No deduction is allowed if the patient's guardian receives a payment for providing guardianship services from a public agency or organization that receives funding for guardianship services. The guardianship filing fees CANNOT be deducted from the individual's income.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 70

c. Special Earnings Allowance For CCC Plus, CL, IS, and BI Waivers

[EXAMPLE #19 was deleted]

For the CCC Plus, CL, IS, and BI waivers, deduct the following special earnings allowance if the patient is working (the work does NOT have to be part of treatment). The special earnings allowance is deducted from earned income only. Deduct:

- for individuals employed 20 hours or more per week, all earned income up to 300% of SSI (\$2,523 in 2022) per month.
- for individuals employed at least 4 but less than 20 hours per week, all earned income up to 200% of SSI (\$1,682 in 2022) per month.

The total of the basic maintenance allowance, the guardianship fee and the special earnings allowance cannot exceed 300% SSI.

EXAMPLE #20: (Using January 2000 figures)

A working patient in the CL Waiver is employed 18 hours per week. He has gross earnings of \$928.80 per month and SS of \$300 monthly. His special earnings allowance is calculated first:

\$ 928.80	gross earned income
- <u>1,024.00</u>	200% SSI maximum
\$ 0	remainder

\$928.80 = special earnings allowance

His personal maintenance allowance is calculated as follows:

\$ 512.00	maintenance allowance
+ <u>928.80</u>	special earnings allowance
\$1,440.80	personal maintenance allowance

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2011
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 71

**D. Community Spouse
Monthly Income
Allowance**

The community spouse monthly income allowance is the difference between the community spouse's gross monthly income and the minimum monthly maintenance needs allowance determined below.

**1. Determine
Minimum
Monthly
Maintenance
Needs
Allowance
(MMMNA)**

Calculate the minimum monthly maintenance needs allowance using the following procedures (**do NOT round any cents to a dollar**):

- a. the monthly maintenance needs standard, plus
- b. an excess shelter allowance for the community spouse's principal place of residence, if applicable. The excess shelter allowance is the amount by which the total of verified allowable expenses in 1) through 5) below **exceeds** the excess shelter standard.

Allowable expenses are:

- 1) rent,
- 2) mortgage (including interest and principal),
- 3) taxes and insurance,
- 4) any maintenance charge for a condominium or cooperative, and
- 5) the utility standard deduction, unless utilities are included in the community spouse's rent or maintenance charges.

The utility standard deduction for a household of 1-3 members is different than the deduction for households of 4 or more members.

**2. Maximum
Allowance**

The minimum monthly maintenance needs allowance calculated above cannot exceed the maximum.

**3. DMAS Hearing
Officer or
Court Ordered
Amount**

The Eligibility Worker has no flexibility to calculate a minimum monthly maintenance needs allowance greater than the one calculated using the steps listed above. If the individual states there is a need for a greater amount, he has the right to file an appeal using the procedures in chapter M16. A Hearing Officer may increase the community spouse income allowance if it is determined that exceptional circumstances resulting in extreme financial duress exist. If the individual disagrees with the outcome of the appeal, he may then appeal the decision through his local circuit court.

The EW cannot accept a court order for a greater community spouse allowance unless the individual has exhausted the Medicaid administrative appeals process.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2016
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 72

**4. Calculate
Community
Spouse
Monthly
Income
Allowance**

If no court order or DMAS Hearing Officer determination of the monthly maintenance needs allowance exists, use the following procedures to calculate the community spouse monthly income allowance:

a. Determine Gross Monthly Income

Determine the community spouse's gross monthly income using the income policy in section M1480.310. Do not count any payment that is made to the community spouse by the institutionalized spouse, such as the community spouse's portion of an augmented VA benefit which is included in the institutionalized spouse's VA check. This amount will be counted in the institutionalized spouse's income.

b. Subtract From MMMNA

Subtract the community spouse's gross income from the minimum monthly maintenance needs allowance from D.1. above. **Do NOT round any cents to a dollar.** The remainder is the community spouse monthly income allowance (a negative number equals \$0).

c. Remainder Greater Than \$0

If the remainder is greater than \$0, the remainder is the amount of the community spouse monthly income allowance that is deducted from the institutionalized spouse's patient pay.

d. Remainder Less Than or Equal To \$0

If the remainder is \$0 or less, the community spouse monthly income allowance is \$0.

**5. Deduct From
Patient Pay**

Deduct the community spouse monthly income allowance determined above from the institutionalized spouse's patient pay income UNLESS the institutionalized spouse or his authorized representative does not actually make it available to the community spouse or to another person for the benefit of the community spouse. *Should the community spouse opt to take a lesser amount than the amount to which the community spouse is entitled; deduct only the amount that the community spouse actually takes as an allowance. If the community spouse is a Medicaid applicant or enrollee, the income allowance is countable income to the community spouse.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2007
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 73

**6. Example--
Allowance Not
Deducted**

EXAMPLE #21: (Using January 2000 figures)

A community spouse has \$800 per month gross income; \$600 from Civil Service and \$200 VA pension. The community spouse's shelter expenses are: mortgage, taxes, and insurance of \$439 per month, plus the standard utility allowance of \$168 for a household of one person, totaling \$607. Total shelter costs of \$607 exceed the excess shelter standard of \$415 by \$192. The excess shelter allowance is \$192.

The minimum monthly maintenance needs allowance (MMMNA) is determined as follows:

\$1,383.00	monthly maintenance needs standard
+ 192.00	excess shelter allowance
\$ 1,575.00	MMMNA (less than maximum)

The community spouse monthly income allowance is calculated:

\$1,575.00	MMMNA
- 800.00	community spouse's monthly gross income
\$ 775.00	community spouse monthly income allowance

The institutionalized spouse has monthly income of \$1,100. However, he refuses to give the monthly income allowance to his spouse at home; therefore, the community spouse monthly income allowance cannot be deducted. His patient pay is calculated:

\$1,100	gross income
- 30	personal needs allowance
\$1,070	patient pay

**7. Example--
Allowance
Deducted**

EXAMPLE #22: (Using January 2000 figures)

A community spouse has \$900 per month gross income from Social Security. The community spouse's shelter expenses are: mortgage, taxes, and insurance of \$502 per month, plus the standard utility allowance of \$168 for a household of one person, totaling \$670. Total shelter costs of \$670 exceed \$415 by \$255. The excess shelter allowance is \$255.

The minimum monthly maintenance needs allowance (MMMNA) is determined as follows:

\$1,383	monthly maintenance needs standard
+ 255	excess shelter allowance
\$1,638	MMMNA

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2000
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 74

The community spouse monthly income allowance is calculated:

\$1,638	MMMNA
- 900	community spouse's gross income
\$ 738	community spouse monthly income allowance

The institutionalized spouse has monthly income of \$700. He agrees to give the monthly income allowance to his spouse at home; therefore, the community spouse monthly income allowance is deducted. His patient pay is calculated:

\$700	gross patient pay income
- 30	personal needs allowance
\$670	remainder
- 670	community spouse income allowance
\$ 0	patient pay

NOTE: The community spouse monthly income allowance of \$738 is greater than the income remaining after the personal needs allowance is deducted, so only \$670 is deducted from patient pay for the community spouse monthly income allowance.

E. Family Member's Income Allowance

To be eligible for a family member's income allowance, the family member (as defined in section M1480.010) must live with the community spouse.

1. Minor Child NOT Living With Community Spouse

If an institutionalized spouse has a minor child who is **not** living with the community spouse, **no allowance** is calculated for that child and no deduction from the institutionalized spouse's income is made for that child.

2. Family Member Income Allowance Deductions

The family member income allowance is an amount equal to 1/3 of the amount by which the monthly maintenance needs standard exceeds the amount of the family member's gross monthly income: (maintenance needs standard - family member's income) ÷ 3 = family member's income allowance.

First, deduct the allowance(s) for minor child(ren) living with the community spouse in the home. Deduct other family members' allowances from patient pay after deducting the minor child(ren)'s allowance(s).

3. Calculate Family Member's Allowance

Calculate each family member's allowance as follows:

- Subtract the family member's gross monthly income from the monthly maintenance needs standard. If the remainder is \$0 or less, STOP. The family member is not entitled to an allowance.
- Divide the remainder by 3.
- The result is the family member's monthly income allowance. Do NOT round any cents to a dollar.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2008
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 75

4. Deduct Family Member's Allowance

Deduct the family member(s)' monthly income allowance(s) from the institutionalized spouse's patient pay income. Do NOT deduct the family member's allowance if the family member does not accept the allowance.

5. Example-- Family Member's Allowance

EXAMPLE #23: (Using July 2000 figures)

The couple's minor child lives with the community spouse. The child has no income. The child's family member maintenance allowance is 1/3 of \$1,406.25 which is \$468.75.

The community spouse's father lives with the community spouse and receives \$300 per month SSA, which is his only income. The monthly family member allowance for the father is calculated as follows:

\$1,406.25	monthly maintenance needs standard
- 300.00	father's income
\$1,106.25	remainder
÷ 3	(divide by 3)
\$ 368.75	family member maintenance allowance for father

The institutionalized spouse's income is \$1,200. The community spouse has no community spouse monthly income allowance in this example, so the institutionalized spouse's patient pay is calculated as follows:

\$1,200.00	institutionalized spouse's patient pay income
- 30.00	personal needs allowance
1,170.00	
- 468.75	child's family member's income allowance
701.25	
- 368.75	father's family member's income allowance
\$ 332.50	patient pay

F. Noncovered Medical Expenses

Incurred medical and remedial care expenses recognized under State law, but not covered under the Medicaid State Plan and not subject to third party payment are deducted from patient pay after all allowances are deducted.

See section M1470.230 for facility patients, section M1470.430 for Medicaid CBC waiver patients *or section M1470.530 for PACE recipients* for specific instructions in determining allowable noncovered medical expense deductions from patient pay.

G. Home Maintenance Deduction

A married institutionalized individual with a community spouse living in the home is **NOT allowed** the home maintenance deduction, because the community spouse allowance provides for the home maintenance, **UNLESS**:

- the community spouse is not living in the home (e.g., the community spouse is in an ACR), AND
- the institutionalized spouse still needs to maintain their former home.

H. Patient Pay

Compare the **remaining income** (patient pay gross monthly income minus allowable deductions) to the Medicaid rate for the month. The patient pay is the lesser of the two amounts.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 76

**I. Example--300%
SSI Group Patient
Pay**

EXAMPLE #25: (Using July 2000 figures)

Mrs. Bay is a disabled institutionalized spouse who first applied for Medicaid for long term care services in July. She was admitted to the facility in June, but she is not eligible for Medicaid in the retroactive months because of excess resources. She has a monthly SSA benefit of \$1,000 and a monthly private pension payment of \$400. She has Medicare Parts A & B and private Medicare supplement health insurance which costs \$75 per month. Her spouse, Mr. Bay, still lives in their Group II home with their dependent son, age 19 years. Mr. Bay has income of \$1,500 per month from CSA. Their son has no income. Mrs. Bay's income is less than the 300% SSI income limit, so she is eligible for ongoing Medicaid coverage beginning July 1. She is enrolled in Medicaid in AC 060.

Her patient pay for July and subsequent months is determined. The community spouse monthly income allowance is calculated first:

\$1,406.25	monthly maintenance needs standard
+ 200.00	excess shelter allowance
1,606.25	MMMNA (minimum monthly maintenance needs allowance)
-1,500.00	community spouse's gross income
\$ 106.25	community spouse monthly income allowance

The family member monthly income allowance for their son is calculated:

\$1,406.25	monthly maintenance needs standard
- 0	son's income
1,406.25	amount by which the standard exceeds the son's income
÷ 3	
\$ 468.75	family member's monthly income allowance

Mrs. Bay has old bills totaling \$200, dated the prior January. She has no noncovered expenses from the retroactive period because she paid the nursing facility in full through June. She is eligible in the 300% SSI group and is not a QMB; therefore, her Medicare premium is deducted from her patient pay for the first two months of Medicaid coverage (July and August). Her patient pay for July is calculated as follows:

\$1,000.00	SSA
+ 400.00	private pension
1,400.00	total gross income
1,400.00	total gross income
- 30.00	PNA (personal needs allowance)
-106.25	community spouse monthly income allowance
-468.75	family member's monthly income allowance
795.00	
-120.50	Medicare premium & health insurance premium
-200.00	old bills
\$474.50	remaining income for patient pay (July)

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2020
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.440	Page 77

Her patient pay for August is calculated as follows:

\$1,000.00	SS
+ <u>400.00</u>	private pension
1,400.00	total gross income
- 30.00	PNA (personal needs allowance)
- 106.25	community spouse monthly income allowance
- <u>468.75</u>	family member's monthly income allowance
795.00	
- <u>120.50</u>	Medicare premium & health insurance premium
\$ 674.50	remaining income for patient pay (August)

Mrs. Bay's patient pay for September is calculated as follows:

\$1,000.00	SS
+ <u>400.00</u>	private pension
1,400.00	total gross income
- 30.00	PNA (personal needs allowance)
- 106.25	community spouse monthly income allowance
- <u>468.75</u>	family member's monthly income allowance
795.00	
- <u>75.00</u>	health insurance premium
\$ 720.00	remaining income for patient pay (September)

The worker completes the VaCMS Patient Pay process for July, August and September. VaCMS generates and sends a "Notice of *Patient Pay Responsibility*" to Mr. Bay showing Mrs. Bay's patient pay for July, August and September and each month's patient pay calculation.

M1480.440 MEDICALLY NEEDY PATIENT PAY

A. Policy

When an institutionalized spouse has income exceeding 300% of the SSI payment level for one person, he is classified as medically needy (MN) for income eligibility determination. Because the 300% SSI income limit is higher than the MN income limits, an institutionalized spouse whose income exceeds the 300% SSI limit will be on a spenddown. He must meet the spenddown liability to be eligible for Medicaid as MN. See sections M1480.330, 340 and 350 above to determine countable income, the spenddown liability, and to determine when an institutionalized spouse's spenddown is met.

Section 1924 (d) of the Social Security Act contains rules which protect portions of an institutionalized spouse's income from being used to pay for the cost of institutional care. Protection of this income is intended to avoid the impoverishment of a community spouse. In order to insure that an institutionalized spouse will have enough income for his personal needs or maintenance allowance, the community spouse income allowance and the family members' income allowance, an institutionalized spouse who meets a spenddown is granted a full month's eligibility. The spenddown

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.450	Page 78

determinations are made monthly, retrospectively, after the month has passed and the expenses have actually been incurred. An institutionalized spouse's resources and income must be verified each month before determining if the spenddown has been met. When the spenddown is met, an institutionalized spouse's patient pay for the month is calculated.

1. Patient Pay Deductions

Medicaid must assure that enough of an institutionalized spouse's income is "protected" for his personal needs, the community spouse and family member's income allowances, and noncovered medical expenses, NOT including the facility, CBC or PACE cost of care.

2. When Patient Pay Is Not Required

Intermediate Care Facility for the Mentally Retarded (ICF-MR) and Institution for Mental Diseases (IMD) services are not covered for medically needy (MN) eligible recipients. Therefore, a patient pay determination is not required when a MN enrolled recipient resides in an IMD or ICF-MR.

B. Patient Pay Procedures

Determine an MN institutionalized spouse's patient pay using the policy and procedures in the sections below:

- * Facility Patient Pay - Spenddown Liability Less Than or Equal to Medicaid Rate (section M1480.450)
- * Facility Patient Pay - Spenddown Liability Greater Than Medicaid Rate (section M1480.460)
- CBC - MN Institutionalized Spouse Patient Pay (section M1480.470)
- PACE - MN Institutionalized Spouse Patient Pay (section M1480.480).

M1480.450 FACILITY PATIENT PAY - SPENDDOWN LIABILITY LESS THAN OR EQUAL TO MEDICAID RATE

A. Policy

An MN institutionalized spouse in a facility whose spenddown liability is less than or equal to the Medicaid rate is eligible for a full month's Medicaid coverage effective the first day of the month, based on the projected Medicaid rate for the month. Medicaid must assure that enough of the institutionalized spouse's income is allowed so that the recipient can pay his community spouse and family member allowances, and his personal needs and noncovered expenses not used to meet the spenddown. Therefore, Medicaid may pay some of the institutionalized spouse's spenddown liability to the provider.

B. Procedures

Determine patient pay for the month in which the spenddown is met using the procedures below.

1. Patient Pay Gross Monthly Income

Determine the institutionalized spouse's patient pay gross monthly income according to section M1480.330 (including any amounts excluded in determining MN countable income and the spenddown liability).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.450	Page 79

**2. Subtract
Patient Pay
Deductions**

Subtract the following from the patient pay gross monthly income in the following order as long as the individual has income remaining for patient pay. If the individual has no remaining income, do not subtract further deductions.

- a. a personal needs allowance (per section M1480.430 C.),
- b. a community spouse monthly income allowance, if appropriate (per section M1480.430 D.),
- c. a family member's income allowance, if appropriate (per section M1480.430 E.),
- d. any allowable noncovered medical expenses (per section M1470.230) **including** any old bills and carry-over expenses,
- e. a home maintenance deduction, if appropriate (per section M1480.430 G.).

The result is the **remaining income** for patient pay.

3. Patient Pay

Compare the remaining income for patient pay to the Medicaid rate for the month. The patient pay is the lesser of the two amounts.

**C. Example—Facility
Spendedown
Liability Less
Than Medicaid
Rate, Community
Spouse Allowance**

EXAMPLE #24: (Using July 2000 figures)

Mr. Hay is an institutionalized spouse who applied for Medicaid in July. He was admitted to the facility the prior November. He has a monthly CSA benefit of \$1,700 and a monthly Seminole Indian payment of \$235. He has Medicare Parts A & B and Federal Employees Health Insurance which costs \$75 per month. He last lived outside the facility in a Group III locality. His wife, Mrs. Hay, still lives in their home; she has income of \$500 per month from CSA. They have no dependent family members living with Mrs. Hay. Mr. Hay's total income exceeds the 300% of SSI income limit. His MN eligibility is determined for July. The MN determination results in a monthly spenddown liability of \$1,355:

\$1,700	monthly MN income (Seminole Indian payment excluded)
- <u>20</u>	exclusion
1,680	countable MN income
- <u>325</u>	MN limit for 1 (Group III)
\$1,355	spenddown liability for month

The facility's Medicaid rate is \$45 per day, or \$1,395 for a 31-day month. By projecting the month's cost of facility care, Mr. Hay meets his spenddown effective the first day of the month and is eligible for Medicaid effective July 1. He is enrolled in Medicaid effective July 1 in AC 018.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	October 2017
Subchapter Subject	Page ending with	Page
M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	M1480.450	80

The community spouse monthly income allowance is calculated:

\$1,406.25	monthly maintenance needs standard
+ <u>0</u>	no excess shelter allowance
1,406.25	MMMNA (minimum monthly maintenance needs allowance)
- <u>500.00</u>	community spouse's gross income
\$ 906.25	community spouse monthly income allowance

His patient pay is calculated as follows:

\$1,700.00	CSA
+ <u>235.00</u>	Seminole Indian payment (counted for patient pay)
1,935.00	total patient pay gross income
- <u>30.00</u>	PNA (personal needs allowance)
- <u>906.25</u>	community spouse monthly income allowance
998.75	
- <u>45.50</u>	Medicare premium (not paid by Medicaid)
- <u>75.00</u>	health insurance premium
\$ 878.25	remaining income for patient pay (July)

The facility's Medicaid rate for July is \$1,395. Because Mr. Hay's remaining income for patient pay is less than the Medicaid rate for July, his patient pay for July is \$878.25. From his July income of \$1,935, Mr. Hay must pay \$878.25 patient pay to the facility, leaving him \$1,056.75 from which he can pay the community spouse income allowance of \$906.25, his personal needs allowance of \$30 and his Medicare and health insurance premiums of \$120.50 (total of \$1,056.75). Medicaid will pay \$476.75 of his spenddown liability (\$1,355 spenddown liability - 878.25 patient pay = \$476.75). **This is allowed under section 1924 of the Social Security Act (Special Treatment For Married Institutionalized Spouses).**

**D. Example-Facility
Spenddown
Liability Less
Than Facility
Rate, Community
Spouse & Family
Member
Allowance**

EXAMPLE #25: (Using July 2000 figures)
Mrs. Zee is a disabled institutionalized spouse who applied for Medicaid for long term care services in July. She was admitted to the facility in June, but she is not eligible for Medicaid in the retroactive month because of excess resources. She has a monthly SSA benefit of \$1,200 and a monthly private pension payment of \$600. She has Medicare Parts A & B and private Medicare supplement health insurance which costs \$75 per month. Her spouse, Mr. Zee, still lives in their Group II home with their dependent son, age 19 years. Mr. Zee has income of \$1,500 per month from CSA. Their son has no income. Mrs. Zee's income exceeds the 300% SSI income limit. Her MN eligibility is determined for July. She has old bills totaling \$300 dated the prior January. The MN determination results in a spenddown liability of \$1,530:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.450	Page 81

\$1,200.00	SSA
<u>+ 600.00</u>	monthly private pension
1,800.00	total monthly income
<u>- 20.00</u>	exclusion
1,780.00	countable MN income
<u>- 250.00</u>	MN limit for 1 (Group II)
\$1,530.00	spenddown liability for July

The facility's Medicaid rate is \$55 per day, or \$1,705 for the month. By projecting the month's cost of facility care, she meets the spenddown effective the first day of the month. Mrs. Zee is eligible for Medicaid, effective July 1. She is enrolled in Medicaid in AC 058.

The community spouse monthly income allowance is calculated:

\$1,406.25	monthly maintenance needs standard
<u>+ 200.00</u>	excess shelter allowance
1,606.25	MMMNA (minimum monthly maintenance needs allowance)
<u>- 1,500.00</u>	community spouse's gross income
106.25	community spouse monthly income allowance

The family member monthly income allowance for their son is calculated:

\$1,406.25	monthly maintenance needs standard
<u>- 0</u>	son's income
1,406.25	amount by which the standard exceeds the son's income
<u>÷ 3</u>	
468.75	family member's monthly income allowance

Her patient pay for July is calculated as follows:

\$1,200.00	SSA
<u>+ 600.00</u>	private pension
1,800.00	total gross income
<u>- 30.00</u>	PNA (personal needs allowance)
<u>- 106.25</u>	community spouse monthly income allowance
<u>- 468.75</u>	family member's monthly income allowance
1,195.00	
<u>- 120.50</u>	Medicare premium & health insurance premium
<u>- 300.00</u>	old bills
\$ 774.50	remaining income for patient pay (July)

The facility's Medicaid rate for July is \$1,705. Because Mrs. Zee's remaining income for patient pay is less than the Medicaid rate, her patient pay for July is \$774.50. From her July income of \$1,800, she must pay \$774.50 to the facility, leaving her \$1,025.50 left to pay her personal needs, community spouse and family member's monthly income allowances, the old

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.460	Page 82

bills and her medical insurance premiums, totaling \$1025.50. Medicaid will pay \$755.50 of her spenddown liability (\$1,530 spenddown liability - 774.50 patient pay = \$755.50). This is allowed under section 1924 of the Social Security Act (Special Treatment For Married Institutionalized Spouses).

M1480.460 FACILITY PATIENT PAY - SPENDDOWN LIABILITY GREATER THAN MEDICAID RATE

A. Policy

An MN facility institutionalized spouse whose spenddown liability is greater than the Medicaid rate is not eligible for Medicaid unless he incurs additional medical expenses that meet the spenddown liability within the month. If he meets the spenddown liability, his Medicaid coverage begins the first day of the month in which the spenddown is met, and ends on the last day of that month. A patient pay for the month is calculated.

Medicaid must assure that enough of the institutionalized spouse's income is allowed so that the recipient can pay his personal needs, community spouse and family member allowances, and noncovered expenses. Therefore, Medicaid may pay some of the institutionalized spouse's spenddown liability. Payment of part or all of the spenddown liability is permitted under Section 1924 (d) of the Social Security Act.

B. Procedures

The institutionalized spouse's spenddown eligibility was determined in section M1480.340 above. Because he met the spenddown in the month, he is enrolled in a closed period of coverage for the full month. His patient pay for the month must be determined using the procedures below.

1. Calculate Remaining Income for Patient Pay

a. Determine Gross Monthly Patient Pay Income

Determine the institutionalized spouse's patient pay gross monthly income according to section M1480.330 (including any amounts excluded in determining MN countable income and the spenddown liability).

b. Subtract Allowable Deductions

Deduct the following from the patient pay gross monthly income, in the following order as long as the individual has income remaining for patient pay. If the individual has no remaining income, do not subtract further deductions.

- 1) a personal needs allowance (per section M1480.430 C.),
- 2) a community spouse monthly income allowance, if appropriate (per section M1480.430 D.),
- 3) a family member's monthly income allowance, if appropriate (per section M1480.430 E.),

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.460	Page 83

- 4) allowable noncovered medical expenses (per section M1470.230) including any old bills, carry-over expenses and other noncovered expenses that were used to meet the spenddown, but NOT including the cost of the facility care, and
- 5) a home maintenance deduction, if appropriate (per section M1480.430 G.).

The result is the **remaining income** for patient pay.

2. Patient Pay

Compare the remaining income for patient pay to the Medicaid rate for the month. The patient pay is the lesser of the two amounts.

C. Example--Facility Spenddown Liability Greater Than Medicaid Rate, Less Than Private Cost of Care

EXAMPLE #26: (Using July 2000 figures)

Mr. L is an institutionalized spouse who applied for Medicaid in July. He was admitted to the facility the prior December. He has a monthly CSA benefit of \$1,900 and a monthly Seminole Indian payment of \$200. He has Medicare Parts A & B and Federal Employees Health Insurance which costs him \$75 per month. He last lived outside the facility in a Group III locality.

His wife, Mrs. L, still lives in their home with their dependent child age 20 years. Mrs. L has income of \$500 per month from CSA. Their child has no income. Mr. L's income exceeds the CNNMP 300% SSI income limit. His MN eligibility is determined for July. The MN determination results in a spenddown liability of \$1,555:

\$1,900	monthly MN income (Seminole Indian payment excluded)
- 20	exclusion
1,880	countable MN income
- 325	MN limit for 1 (Group III)
\$1,555	spenddown liability for month

The facility's Medicaid rate is \$45 per day, or \$1,395 for a month. The private pay rate is \$80 per day. By projecting the month's Medicaid rate, he does not meet his spenddown in July. He has no old bills. He is placed on a monthly spenddown of \$1,555 for each month in the 12-month certification period beginning July 1.

On July 31, he submits expenses for July. The worker verifies that his resources were below the limit in July. His spenddown liability of \$1,555 is compared to \$2,480, the private rate for July (\$80 per diem x 31 days). Because the private cost of care for July is greater than his spenddown liability for July, he met his spenddown in July. He is eligible for the full month of July. On August 1, the worker enrolls him in Medicaid with coverage beginning July 1 and ending July 31.

His patient pay is determined. The community spouse and family member allowances are calculated first:

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2017
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.460	Page 84

\$1,406.25	monthly maintenance needs standard
+ 0	no excess shelter allowance
1,406.25	MMMNA (minimum monthly maintenance needs allowance)
- 500.00	community spouse's gross income
\$ 906.25	community spouse monthly income allowance
\$1,406.25	monthly maintenance needs standard
- 0	child's income
1,406.25	amount by which standard exceeds child's income
÷ 3	
\$ 468.75	child's family member monthly income allowance
\$1,900.00	CSA income
+ 200.00	Seminole Indian payment (not excluded for patient pay)
2,100.00	total patient pay gross income
- 30.00	personal needs allowance
- 906.25	community spouse monthly income allowance
- 468.75	family member allowance
695.00	
- 45.50	noncovered Medicare Part B premium
- 75.00	noncovered health insurance premium
\$ 574.50	remaining income (July)

The facility's Medicaid rate for July is \$1,395. Because Mr. L's remaining income for patient pay is less than the Medicaid rate for July, his patient pay for July is \$574.50.

From his July income of \$2,100, he must pay the patient pay of \$574.50. He has \$1,525.50 left with which to meet his personal needs (\$30), pay the community spouse and family member allowances, and pay his Medicare and health insurance premiums, a total of \$1,525.50. In accordance with Section 1924 of the Social Security Act, Medicaid will assume responsibility for \$980.50 of his spenddown liability (\$1,555 - 574.50 patient pay = \$980.50).

D. Example—Facility Spenddown Liability Greater Than Medicaid Rate and Private Cost of Care

EXAMPLE #27: (Using July 2000 figures)

Mrs. Bee is an institutionalized individual who files an initial application for Medicaid on July 6. She has a monthly SSA benefit of \$2,000 and a monthly private pension payment of \$500. She has Medicare Parts A & B and private Medicare supplement health insurance which costs her \$100 per month. Mrs. Bee last resided outside the facility in a Group II locality. Her spouse, Mr. Bee, still lives in their home. He has income of \$1,800 per month from CSA. Mrs. Bee's income exceeds the 300% SSI income limit.

Her MN eligibility is determined for July. The MN determination results in a spenddown liability of \$2,230:

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	May 2009
Subchapter Subject	Page ending with	Page
M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	M1480.460	85

\$2,000.00	SSA
+ 500.00	monthly private pension
2,500.00	total monthly income
- 20.00	exclusion
2,480.00	countable MN income
- 250.00	MN limit for 1 (Group II)
\$2,230.00	spenddown liability for month

The facility's Medicaid rate is \$55 per day, or \$1,705 for a month. By projecting the month's Medicaid rate, she does not meet her spenddown. She is placed on a monthly spenddown for each month in the 12-month certification period beginning July 1. On August 2, she submits expenses for July. The private facility rate is \$70 per day, or \$2,170 for July (31 days). The private cost of care, \$2,170, is less than her spenddown liability of \$2,230. Therefore, the worker must complete a day by day calculation to determine Mrs. Bee's spenddown eligibility for July:

\$2,230.00	spenddown liability 7-1
- 140.00	private pay rate for 7-1 & 7-2 @ \$70 per day.
2,090.00	spenddown balance on 7-3
- 145.50	45.50 Medicare + 100.00 health ins. premium paid 7-3
- 1,890.00	private pay for 27 days @ \$70 per day 7-3 through 7-29
54.50	spenddown liability balance at beginning of 7-30
- 70.00	private pay for 7-30
\$ 0	spenddown met on 7-30

Mrs. Bee met her spenddown on July 30. On August 3, the worker enrolls her in Medicaid with a begin date of July 1 and end date of July 31. To determine her patient pay, the community spouse monthly income allowance is calculated:

\$1,406.25	monthly maintenance needs standard
+ 525.00	excess shelter allowance
1,931.25	MMMNA (minimum monthly maintenance needs allowance)
- 1,800.00	community spouse's gross income
\$ 131.25	community spouse allowance

Mrs. Bee's patient pay for July is calculated as follows:

\$2,000.00	SSA
+ 500.00	private pension
2,500.00	gross patient pay income
- 30.00	personal needs allowance
- 131.25	community spouse allowance
2,338.75	
- 145.50	noncovered Medicare & health ins. premium
\$2,193.25	remaining income (July)

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.470	Page 86

Mrs. Bee's remaining income for patient pay in July is \$2,193.25, which is greater than the Medicaid rate for of July \$1,705. The facility can only collect the Medicaid rate; therefore, her patient pay for July is the Medicaid rate of \$1,705.

From her July income of \$2,500, she must pay the Medicaid rate of \$1,705. Medicaid will not pay for any of her facility care in July because she is responsible for the whole Medicaid rate; Medicaid will cover all other medical services except her Medicare & health insurance premiums. She has \$795 left with which to meet her personal needs (\$30), pay the community spouse allowance, and pay her Medicare and health insurance premiums, a total of \$306.75. She has \$488.25 left from her July income. Medicaid will assume responsibility for \$525 of her spenddown liability (\$2,230 - 1,705 Medicaid rate = \$525).

Since Mrs. Bee paid the private rate of \$2,170 to the facility in July, the facility is responsible to reimburse her for the difference between the private rate and the Medicaid rate (\$465). On August 25, she requests evaluation of her spenddown for August. She was reimbursed \$465 on August 20, which was deposited into her patient fund account. The worker verifies that her resources exceed the Medicaid resource limit in August. The worker sends her a notice denying Medicaid for August because of excess resources, and stating that she must reapply for Medicaid if she reduces her resources and wants to be placed on spenddown again.

M1480.470 CBC - MN INSTITUTIONALIZED SPOUSE PATIENT PAY

A. Policy

When the Medicaid community-based care (CBC) institutionalized spouse has been *authorized* for waiver services and has **income less than or equal to 300% of the SSI income limit** for one person, he is eligible for Medicaid as CNNMP and entitled to Medicaid for full-month, ongoing Medicaid coverage.

An institutionalized spouse who is *authorized* for waiver services, and whose income **exceeds the 300% SSI income limit**, is placed on a monthly spenddown. **The monthly CBC costs cannot be projected** for the spenddown budget period. The CBC costs, along with any other spenddown deductions, are deducted daily and chronologically as the costs are incurred. If the spenddown is met any day in the month, Medicaid coverage begins the first day of the month in which the spenddown is met, and ends on the last day of that month. A patient pay for the month is calculated.

Medicaid must assure that enough of the institutionalized spouse's income is allowed so that the recipient can pay his personal needs, community spouse and family member allowances, and noncovered expenses. Therefore, Medicaid may pay some of the institutionalized spouse's spenddown liability. Payment of part or all of the spenddown liability is permitted under Section 1924 (d) of the Social Security Act.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	July 2022
Subchapter Subject	Page ending with	Page
M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	M1480.470	87

B. Procedures

The institutionalized spouse's spenddown eligibility was determined in section M1480.340 above. Because he met the spenddown in the month, he is enrolled in a closed period of coverage for the full month. His patient pay for the month must be determined for the month using the procedures below.

1. Calculate Available Income for Patient Pay

a. Determine Gross Monthly Patient Pay Income

Determine the institutionalized spouse's patient pay gross monthly income according to section M1480.330 (including any amounts excluded in determining MN countable income and the spenddown liability).

b. Subtract Allowable Deductions

Deduct the following from the patient pay gross monthly income, in the following order as long as the individual has income remaining for patient pay. If the individual has no remaining income, do not subtract further deductions.

- 1) a personal maintenance allowance (per section M1480.430 C.),
- 2) a community spouse monthly income allowance, if any (per section M1480.430 D.),
- 3) a family member's monthly income allowance, if any (per section M1480.430 E.),
- 4) any allowable noncovered medical expenses (per section M1470.430) including any old bills, carry-over expenses and other noncovered expenses that were used to meet the spenddown, but NOT including the cost of the community-based care.
- 5) a home maintenance deduction, if any (per section M1480.430 G.).

The result is the **remaining income** for patient pay.

2. Patient Pay

Compare the remaining income for patient pay to the Medicaid rate for the month. The patient pay is the lesser of the two amounts.

C. Example--CBC Institutionalized Spouse on Spenddown

EXAMPLE #28: (Using July 2000 figures)

Mr. T is an institutionalized spouse who applied for Medicaid in July. He was *authorized* for Medicaid E & D waiver services on July 1, and began receiving those services on that date. He has a monthly CSA benefit of \$1,900 and a monthly Japanese-American Restitution payment of \$200. He has Medicare Parts A & B and Federal Employees Health Insurance which costs him \$75 per month. He last lived outside the facility in a Group III locality.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date May 2009
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.470	Page 88

His wife, Mrs. T, lives in their home with Mr. T and their dependent child age 18 years. Mrs. T has income of \$500 per month from CSA. Their child has no income. Mr. T's income exceeds the 300% of SSI income limit. His MN eligibility is determined for July. The MN determination results in a spenddown liability of \$1,555:

\$1,900	monthly MN income (Japanese-American Restitution payment excluded)
- 20	exclusion
1,880	countable MN income
- 325	MN limit for 1 (Group III)
\$ 1,555	spenddown liability for month

He has no old bills. He is placed on a monthly spenddown of \$1,555 for each month in the 12-month certification period beginning July 1.

On July 31, he submits expenses for July. The worker verifies that his resources were below the limit in July. His spenddown liability of \$1,555 is compared to \$2,400, the total private rate for July (\$16 per hour private rate x 5 hours per day x 31 days = \$2,480). Because the private cost of CBC care for July is greater than his spenddown liability for July, he met his spenddown in July. He is eligible for the full month of July. On August 1, the worker enrolls him in Medicaid beginning July 1 and ending July 31.

His patient pay is then calculated. The community spouse and family member allowances are calculated first:

\$1,406.25	monthly maintenance needs standard
+ 0	no excess shelter allowance
1,406.25	MMMNA (minimum monthly maintenance needs allowance)
- 500.00	community spouse's gross income
906.25	community spouse monthly income allowance
\$1,406.25	monthly maintenance needs standard
- 0	child's income
1,406.25	amount by which standard exceeds child's income
÷ 3	
\$ 468.75	family member monthly income allowance
\$1,900.00	CSA income
+ 200.00	Japanese-American Restitution payment (not excluded for patient pay)
2,100.00	total patient pay gross income
- 512.00	personal maintenance allowance
- 906.25	community spouse monthly income allowance
- 468.75	family member allowance
213.00	
- 45.50	noncovered Medicare Part B premium
- 75.00	noncovered health insurance premium
\$ 92.50	remaining income for patient pay

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.470	Page 89

The CBC provider's Medicaid rate is \$9.50 per hour, 5 hours per day or \$47.50 per day, a total of \$1,472.50 for July (31 days). Because Mr. T's remaining income is less than the Medicaid rate, his patient pay for July is \$92.50.

From his July income of \$2,100, Mr. T must pay the patient pay of \$92.50. He has \$2,007.50 left with which to meet his maintenance needs (\$512), pay the community spouse and family member allowances, and pay his Medicare and health insurance premiums, a total of \$2,007.50. In accordance with Section 1924 of the Social Security Act, Medicaid will assume responsibility for \$1,462.50 of his spenddown liability (\$1,555 - 92.50 patient pay = \$1,462.50). Because he paid all of his income to the CBC provider in July, his resources are within the limit in August.

**D. Example-CBC
Institutionalized
Spouse on
Spenddown**

EXAMPLE #29: (Using July 2000 figures)

Mrs. Bly is an aged individual who files an initial application for Medicaid on July 1. She was *authorized* for Medicaid E & D waiver services on July 1, and began receiving those services on July 1. She has a monthly SSA benefit of \$2,000 and a monthly private pension payment of \$500. She has Medicare Parts A & B and private Medicare supplement health insurance which costs her \$100 per month. Mrs. Bly resides in a Group II locality. Her spouse, Mr. Bly, lives with her in their home. He has income of \$1,800 per month from CSA. Mrs. Bly's income exceeds the 300% of SSI income limit.

Her MN eligibility is determined for July. The MN determination results in a spenddown liability of \$2,230:

\$2,000.00	SSA
+ 500.00	monthly private pension
2,500.00	total monthly income
- 20.00	exclusion
2,480.00	countable MN income
- 250.00	MN limit for 1 (Group II)
\$2,230.00	spenddown liability for month

She is placed on a monthly spenddown for each month in the 12-month certification period beginning July 1. On August 2, she submits expenses for July. The private CBC rate is \$14 per hour, 5 hours per day or \$70 per day, for a total of \$2,170 for July (31 days). The private cost of care, \$2,170, is less than her spenddown liability of \$2,230. Therefore, the worker must complete a day-by-day calculation to determine Mrs. Bly's eligibility for July:

\$2,230.00	spenddown liability 7-1
- 140.00	CBC private pay rate for 7-1 & 7-2 @ \$70 per day.
2,090.00	spenddown balance on 7-3
- 145.50	45.50 Medicare + 100.00 health ins. premium paid 7-3
- 1,890.00	private pay for 27 days @ \$70 per day 7-3 through 7-29
54.50	spenddown balance at beginning of 7-30
- 70.00	CBC private pay for 7-30
\$ 0	spenddown met on 7-30

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M14	May 2009
Subchapter Subject	Page ending with	Page
M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	M1480.470	90

Mrs. Bly met her spenddown on July 30. On August 3, the worker enrolls her in Medicaid with the begin date of July 1 and end date July 31, application date July 1. To determine her patient pay, the community spouse monthly income allowance is calculated:

\$1,406.25	monthly maintenance needs standard
+ 525.00	excess shelter allowance
<u>1,931.25</u>	MMMNA (minimum monthly maintenance needs allowance)
- 1,800.00	community spouse's gross income
<u>\$ 131.25</u>	community spouse allowance

Mrs. Bly's patient pay for July is calculated as follows:

\$2,000.00	SSA
+ 500.00	private pension
<u>2,500.00</u>	gross patient pay income
- 512.00	maintenance allowance
- <u>131.25</u>	community spouse allowance
<u>1,856.75</u>	
- <u>145.50</u>	noncovered 45.50 Medicare + 100.00 health ins. premium
<u>\$1,711.25</u>	remaining income

Mrs. Bly's remaining income of \$1,711.25 is greater than the Medicaid rate for July of \$1,705, so her patient pay for July is the Medicaid rate of \$1,705.

From her July income of \$2,500, Mrs. Bly must pay the Medicaid rate of \$1,705 to the CBC provider. Medicaid will not pay for any of her CBC care in July because she is responsible for the whole Medicaid rate; Medicaid will cover all other medical services except her Medicare & health insurance premiums. She has \$795 left with which to meet her maintenance needs (\$512), pay the community spouse allowance, and pay her Medicare and health insurance premiums, a total of \$788.75. She has \$6.25 left from her July income. Medicaid will assume responsibility for \$525 of her spenddown liability (\$2,230 - 1,705 patient pay = \$525).

On August 25, she requests evaluation of her spenddown for August. She was reimbursed \$465 on August 22 by the CBC provider, which was deposited into her bank account. The worker verifies that her resources exceed the Medicaid resource limit in August. The worker sends her a notice denying Medicaid for August because of excess resources, and stating that she must reapply for Medicaid if she reduces her resources and wants to be placed on spenddown again.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date July 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.480	Page 91

M1480.480 PACE – MN INSTITUTIONALIZED SPOUSE PATIENT PAY

A. Policy

An institutionalized spouse who is *authorized* for PACE services, and whose income exceeds the 300% SSI income limit, is placed on a monthly spenddown. The individual's spenddown liability and the PACE monthly rate (minus the Medicare Part D premium) establish whether the spenddown eligibility determination can be projected or must be determined retrospectively. The instructions for determining spenddown eligibility for MN institutionalized spouse PACE recipients are in M1480.340.

If the spenddown is met, Medicaid coverage begins the first day of the month in which the spenddown is met and a patient pay for the month is calculated. If spenddown eligibility is projected, the patient pay is not calculated monthly as long as the monthly PACE rate (minus the Medicare Part D premium), income and allowances remain the same. If spenddown eligibility is determined retrospectively, the patient pay is calculated month-by-month.

Medicaid must assure that enough of the institutionalized spouse's income is allowed so that the recipient can pay his personal needs, community spouse and family member allowances, and noncovered expenses. Therefore, Medicaid may pay some of the institutionalized spouse's spenddown liability. Payment of part or all of the spenddown liability is permitted under Section 1924 (d) of the Social Security Act.

B. Procedures

The institutionalized spouse's spenddown eligibility was determined in section M1480.340 above. His patient pay must be determined using the procedures below.

1. Calculate Available Income for Patient Pay

a. Determine Gross Monthly Patient Pay Income

Determine the institutionalized spouse's patient pay gross monthly income according to section M1480.330 (including any amounts excluded in determining MN countable income and the spenddown liability).

b. Subtract Allowable Deductions

Deduct the following from the patient pay gross monthly income, in the following order as long as the individual has income remaining for patient pay. If the individual has no remaining income, do not subtract further deductions.

- 1) a personal maintenance allowance (per section M1480.430 C.),
- 2) a community spouse monthly income allowance, if any (per section M1480.430 D.),
- 3) a family member's monthly income allowance, if *any* (per section M1480.430 E.),

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2021
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.510	Page 92

4) any allowable noncovered medical expenses (per section M1470.530) including any old bills, carry-over expenses and other noncovered expenses that were used to meet the spenddown, but NOT including the cost of the community-based care.

5) a home maintenance deduction, if any (per section M1480.430 G.).

The result is the remaining income for patient pay.

2. Patient Pay

Compare the remaining income for patient pay to the monthly PACE rate (minus the Medicare Part D premium) for the month. The patient pay is the lesser of the two amounts.

M1480.500 NOTICES AND APPEALS

M1480.510 NOTIFICATION

A. Notification

Send written notices to the institutionalized spouse, the authorized representative and the community spouse advising them of:

- the action taken on the institutionalized spouse's Medicaid application and the reason(s) for the action;
- the resource determination, the income eligibility determination, and the patient pay income, spousal and family member allowances and other deductions used to calculate patient pay;
- the right to appeal the actions taken and the amounts calculated.

B. Forms to Use

1. Notice of Action on Medicaid

The EW must send the "Notice of Action on Medicaid (Title XIX) and Children's Medical Security Insurance Plan (Title XXI Program)" or system-generated equivalent to the applicant/recipient and the person who is authorized to conduct business for the applicant to notify him of the Agency's decision on the initial Medicaid application, and on a redetermination of eligibility when a recipient starts Medicaid-covered LTSS services.

2. Notice of Patient Pay Responsibility

The "Notice of Patient Pay Responsibility" notifies the patient of the amount of patient pay responsibility. The form is generated and sent by the enrollment system when the patient pay is used entered or changed.

3. Medicaid LTSS Communication Form (DMAS-225)

The Medicaid Long-term Services and Supports (LTSS) Communication Form (DMAS-225) is used to facilitate communication between the local agency and the LTSS services provider. The form may be initiated by the local agency or the provider. The form is available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date June 2016
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.520	Page 93

The DMAS-225:

- notifies the LTC provider of a patient's Medicaid eligibility status;
- reflects changes in the patient's level of care or LTC provider;
- documents admission or discharge of a patient to an institution or community-based care services, or death of a patient;
- provides other information known to the provider that might cause a change in eligibility status or patient pay amount.

Do not use the DMAS-225 to relay the patient pay amount. Providers will be able to access the patient pay amount via the verification systems available to providers.

a. When to Complete the DMAS-225

Complete the DMAS-225 at the time of eligibility determination and/or the recipient's entry into LTC. Complete a new DMAS-225 when the enrollee's eligibility status changes, such as when the recipient's Medicaid coverage is canceled or changed to limited coverage (e.g. QMB coverage).

When a change in LTC providers occurs, complete a new DMAS-225 advising the new provider of the enrollee's eligibility status and that patient pay information is available through the verification systems.

b. Where To Send the DMAS-225

Refer to M1410.300 B.3.b to determine where the form is to be sent.

4. Resource Assessment Forms

The forms used for a resource assessment when no Medicaid application is filed are described in section M1480.210 (above). The resource assessment form that is used with a Medicaid application is described in section M1480.220. *The forms are generated by VaCMS when the resource assessment is completed in VaCMS.* Copies of the forms are included in Appendix 1 and Appendix 2 to this subchapter.

M1480.520 APPEALS

A. Client Appeals

The institutionalized spouse, the community spouse, or the authorized representative for either, has the right to appeal any action taken on a Medicaid application. The Medicaid client appeals process applies.

B. Appealable Issues

Any action taken on the individual's Medicaid **application** and receipt of Medicaid services may be appealed, including:

- spousal share determination,
- initial resource eligibility determination,
- spousal protected resource amount (PRA),
- resource redetermination,
- community spouse resource allowance (CSRA),
- income eligibility determination,
- patient pay and/or allowances calculations.

MEDICAID RESOURCE ASSESSMENT REQUEST

FORM NUMBER - 032-03-815

PURPOSE OF FORM - To provide information on resources that will enable the department of social services to assess the countable resources of a couple and to determine the spousal share.

USE OF FORM - To be completed when an assessment of resources available to an institutionalized spouse (spousal share) is requested, and a Medicaid application is not filed or requested.

NUMBER OF COPIES - Three.

DISPOSITION OF FORMS - The original is filed in the case record with the Medicaid Resource Evaluation and the Notice of Medicaid Resource Assessment. The first copy is sent to the community spouse with the Notice of Medicaid Resource Assessment. The second copy is sent to the institutionalized spouse with the Notice of Medicaid Resource Assessment. If an individual other than one of the spouses requested the assessment, a photocopy of the request is sent to the individual making the request along with a photocopy of the Notice of Medicaid Resource Assessment.

INSTRUCTIONS FOR PREPARATION OF FORM - The information in the right-hand corner will be completed by the worker when the form is received in the agency. The remainder of the form will be completed by the couple making the request or by the authorized representative acting on their behalf.

MEDICAID RESOURCE ASSESSMENT

FORM NUMBER - 032-03-816

PURPOSE OF FORM - To document the resources owned by a couple, to specify which resources are exempted, which resources are counted and their countable values, and to determine the spousal share of resources.

USE OF FORM - To be completed by the local agency eligibility worker when a Medicaid Resource Assessment Request is received by the local department of social services, or when a Medicaid application is filed by an institutionalized individual who has a community spouse.

NUMBER OF COPIES - Three.

DISPOSITION OF FORM - The original is filed in the case record with the Medicaid Resource Assessment and the Notice of Medicaid Resource Assessment for assessments that are not parts of applications. The first copy is sent to the community spouse with the Notice of Medicaid Resource Assessment. The second copy is sent to the institutionalized spouse with the Notice of Medicaid Resource Assessment. If an individual other than one of the spouses requested the assessment, a photocopy of the evaluation is sent to the individual making the request, along with a photocopy of the Notice of Medicaid Resource Assessment.

For assessments that are part of Medicaid applications, the evaluation form is filed in the case record with the application evaluation. A copy of the Resource Evaluation is sent to the institutionalized spouse, the community spouse, and the individual making the request if applicable, along with the Notice of Medicaid Resource Assessment and the Notification of Action on Medicaid.

INSTRUCTIONS FOR PREPARATION OF FORM - Complete the identifying information in the upper right-hand corner of the form.

A. RESOURCES

From the resources identified on the Medicaid Resource Assessment Request, list the excluded resources first; the countable value(s) can be "N/A". Provide a description of the resource, list the owner(s), check whether the resource is countable, enter the countable value when it is a countable resource, and provide appropriate documentation information. If information was not provided, and owners or countable value, etc., cannot be documented, enter "not provided" in the appropriate columns.

B. COMPUTATION OF SPOUSAL SHARE

Check the appropriate box to indicate whether documentation was or was not supplied. If documentation was supplied, enter in the first line the value of countable resources, divide that figure by two and enter on the second line the spousal share.

C. The worker must sign the form and enter the date the form was completed.

NOTICE OF MEDICAID RESOURCE ASSESSMENT

FORM NUMBER - 032-03-817

PURPOSE OF FORM - To provide notice that a resource assessment of a couple's countable resources, and the spousal share, was or was not completed.

USE OF FORM - To be prepared when the resource assessment is denied, evaluation is completed, or evaluation could not be completed.

NUMBER OF COPIES - Three.

DISPOSITION OF FORM - The original is filed in the case record with the original Medicaid Resource Assessment Request and the original Medicaid Resource Evaluation. The first copy is sent to the community spouse with the first copy of the Medicaid Resource Assessment and the first copy of the Medicaid Resource Evaluation. The second copy is sent to the institutionalized spouse with the second copy of the Medicaid Resource Assessment and the second copy of the Medicaid Resource Evaluation.

If an individual other than one of the spouses requested the assessment, a photocopy of the notice is sent to the individual making the request along with a photocopy of the Medicaid Resource Assessment.

INSTRUCTIONS FOR PREPARATION OF THE FORM - Complete the identifying information in the upper right-hand corner. Enter the name and mailing address of the individual who will receive the form.

Check the appropriate box to show if the assessment was not completed because institutionalization began before 9-30-89, or if it was not completed because documentation was not provided, or if documentation of resources was provided and the assessment was completed. If documentation was provided, enter the spousal share of the countable resources.

Enter the worker's name, address, and the date the notice is or will be mailed.

M1510.000 ENTITLEMENT POLICY & PROCEDURES

M1510.100 MEDICAID ENTITLEMENT

A. Policy

An individual's entitlement to Medicaid coverage is based on the individual meeting all nonfinancial and financial eligibility requirements for the individual's covered group during a month covered by the application, as well as any additional entitlement policies that are applicable to the covered group.

1. Spenddown Met

If the applicant had excess income and met the spenddown within the month, he remains responsible for his spenddown liability and his coverage begin date cannot be any earlier than the date he met the spenddown.

2. Individual is Deceased

If an application is filed on behalf of a deceased individual or the applicant dies during the application process, his eligibility is determined only for the days he was alive. He must have been eligible for Medicaid while he was alive in order to be entitled to enrollment in Medicaid. Any changes in the individual's resources or income after his death do not affect the eligibility determination.

Example: An individual applies on July 23 for retroactive and ongoing Medicaid. The worker determines that the individual had excess resources (cash value of life insurance) throughout the retroactive period and the application month. The individual dies on August 5. The family asserts that he no longer owned the life insurance policies on August 5 and meets the resource requirements for the month of August. The worker determines that the individual owned the policies on the date of his death, the countable value exceeded the resource limit and he was not eligible for medical assistance on or before the date of his death.

3. Applicant Has Open MA Coverage in Another State

If an applicant indicates that he has been receiving Medical Assistance (MA--Medicaid or Children's Health Insurance Program) coverage in another state prior to moving to Virginia, instruct him to contact his eligibility worker there and request that his coverage be cancelled, if he has not already done so. He is no longer considered a resident of the other state once he has moved and intends to reside in Virginia, and he is *no longer* entitled to receive services paid for by the other state's MA program. His enrollment may begin with the month of application or the earliest month in the application's retroactive period that he met the residency requirement per M0230.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2018
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.100	Page 2

4. PARIS Match Data

The Public Assistance Reporting Information System (PARIS) is a Federal computer matching initiative that the Virginia Department of Social Services (VDSS) participates in quarterly. VDSS participates in the data exchange with all active Medicaid enrollees and they are matched for the receipt of Veterans benefits and enrollment in multiple states' Medicaid programs. Each public assistance report is matched by social security number.

If a PARIS match is found, the worker will receive an alert in the Virginia Case Management System (VaCMS). The worker must evaluate all matches for current and ongoing eligibility and take appropriate case action within 30 days. Multiple matches must be assessed as a whole for the entire case. Workers must document findings in VaCMS under Case Comments. Procedures for researching and reporting PARIS matched individuals are found in the PARIS User Guide *available on the VDSS intranet*.

Once the evaluation of the match is completed and the case comments are documented, complete and send the Notice of Recipient Fraud/Non-Fraud Recovery (form #DMAS 751R), *located on the VDSS intranet*, to

Department of Medical Assistance Services
Recipient Audit Unit,
600 E. Broad Street, Suite 1300,
Richmond, Virginia 23219

The form may be faxed to 804-452-5472 or emailed to recipientfraud@dmass.virginia.gov.

The DMAS Program Integrity Division will conduct steps to complete the match and Benefit Impact Screen (BIS).

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date October 2017
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.101	Page 2a

**B. SSI Entitlement
Date Effect on
Medicaid**

SSI payments for eligible individuals are effective the first day of the month following the month in which the SSI application was filed. Medicaid coverage for eligible individuals is effective the first day of the month in which the Medicaid application is filed. When the Medicaid application is filed in the same month as the SSI application, the applicant is not eligible for Medicaid as an SSI recipient until the month in which his SSI entitlement began - the month following the application month. His eligibility for Medicaid in the application month must be determined in another covered group.

C. Procedures

The procedures for determining an eligible individual's Medicaid coverage entitlement are contained in the following sections:

- M1510.101 Retroactive Eligibility & Entitlement
- M1510.102 Ongoing Entitlement
- M1510.103 Hospital Presumptive Eligibility
- M1510.104 Disability Denials
- M1451.105 Foster Care Children
- M1510.106 Delayed Claims

M1510.101 RETROACTIVE ELIGIBILITY & ENTITLEMENT

A. Definitions

**1. Retroactive
Period**

The retroactive period is the three months immediately prior to the application month. Within this retroactive period, the individual may be Categorically Needy (CN) in one or two months and Medically Needy (MN) in the third month, or any other combination of classifications.

Retroactive Medicaid eligibility must be determined when an applicant for medical assistance indicates on the application that he, or anyone for whom he requests assistance, received a covered medical service within the retroactive period. The covered service may be listed by the applicant as an actual medical service on the application, or information on the application may indicate that a service was received, such as the birth of a child or Medicare coverage during the retroactive period.

**2. Retroactive
Budget Period**

The "budget period" is the period of time during which an individual's income is calculated to determine income eligibility. The retroactive budget period depends on the individual's covered group.

B. Policy

An application for Medicaid or Auxiliary Grants (AG) is also an application for retroactive Medicaid coverage whenever the applicant reports that he/she received a Medicaid-covered service or had Medicare coverage in retroactive period. Eligibility for retroactive coverage is determined at the same time as the ongoing eligibility is determined, using the same application.

When an applicant reports that he/she, or anyone for whom he/she is applying, received a Medicaid covered service in any one of the three retroactive months, determine the applicant's eligibility for all three retroactive months, regardless of the service date. Determine nonfinancial, resource and income eligibility for each month in the retroactive period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date January 2021
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.101	Page 2b

C. Budget Periods By Classification

1. CN

The retroactive budget period for CN covered groups (categories) is one month. CN eligibility is determined for each month in the retroactive period, including a month(s) that is in a prior spenddown that was not met. Do not determine eligibility for a retroactive month that was included in a previous Medicaid coverage period; the applicant has already received Medicaid for that month.

NOTE: There is never any retroactive eligibility or entitlement as a Qualified Medicare Beneficiary (QMB) only. An individual who is eligible as Special Low-income Medicare Beneficiary (SLMB) or Qualified Disabled & Working (QDWI) can have retroactive coverage as an SLMB or QDWI.

2. MN

For the retroactive period, the **MN budget period is always all three months**. Unlike the retroactive CN period, the retroactive MN budget period may include a portion of a prior Medicaid coverage or spenddown period, and may also include months in which he is eligible as CN.

D. Verification

The applicant must verify all eligibility requirements in a retroactive month in order to be eligible for Medicaid coverage in that month.

Income verification from available electronic sources is acceptable for retroactive eligibility determinations provided that reasonable compatibility is met (see M0420.100 B.9). For all case actions effective October 26, 2019, if the income attested to by the applicant is within 10% of the income information obtained from electronic sources OR both sources are below the applicable income limit, *no additional verification is required*.

*If the attested income is under the income limit and the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return. If the applicant meets a Medically Needy (MN) covered group, verification of income **is required** to determine spenddown liability.*

If the attested income is over the income limit and the individual does not meet a Medically Needy (MN) covered group, deny the application.

An applicant with a resource test must provide verification of resources held in the retroactive period.

An individual who provides proof of application for an SSN, after he applies for medical assistance, meets the application for SSN requirement in the three months retroactive to his medical assistance application.

If the applicant fails to verify any required eligibility factor for a retroactive month, coverage **for that month** must be denied because of failure to verify eligibility. If he verifies all eligibility factors for the other months in the retroactive period, he may be eligible for CN retroactive coverage for those months.

EXAMPLE #1: Ms. A applied for Medicaid for herself and her children on July 8. She reported receiving a Medicaid covered service in each retroactive month. The retroactive period is April 1 through June 30. She currently receives Unemployment Compensation as she lost her job in May. She provided all required verification for May and June, but did not provide income verification for April. Their application was approved for CN Medicaid coverage beginning May 1; April coverage was denied because of failure to verify income for April.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2013
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.101	Page 3

**1. Excess Income
In One or More
Retroactive
Months**

When an applicant has excess income in one or more of the retroactive months, he must verify that he met the nonfinancial and resource requirements in the month(s). He must verify the income he received in **all 3** retroactive months in order to determine his MN income or spenddown eligibility in the retroactive month(s).

If he fails to verify income in all three months, he CANNOT be eligible as MN in the retroactive period. His application for the retroactive months in which excess income existed must be denied because of failure to provide income verification for that month(s). However, coverage for the retroactive month(s) in which he was eligible as CN must be approved.

EXAMPLE #2: (Using July 2006 figures)

A parent of a child under age 19 applies for Medicaid in April. She requests retroactive coverage for the child's medical bills incurred in January, February and March, including a hospital stay in February. She also has unpaid medical bills (old bills) from December. The retroactive period is January - March.

The eligibility worker determines that the child met all the Medicaid nonfinancial requirements in the retroactive period, and that the countable income of \$3,250 per month in January and February exceeded the F&C, *CN* and the MN income limits. The income of \$800 starting March 1 is within the F&C *CN* income limit. The parent verifies that the resources in January, February were within the MN resource limit, but does not verify the March resources because the income is within the *CN* income limits.

The application is approved for retroactive coverage as *CN* beginning March 1 and for ongoing coverage beginning April 1. The child's spenddown liability is calculated for January and February. The eligibility worker deducts the old bills and the incurred medical expenses, and a spenddown liability remains. The retroactive Medicaid coverage is denied for January and February because the spenddown was not met.

**2. Excess Income
In All 3
Retroactive
Months**

When excess income existed in all classifications in all 3 retroactive months, the applicant must verify that he met all eligibility requirements in all 3 months. If he fails to verify nonfinancial, resource or income eligibility in any of the retroactive months, the retroactive period cannot be shortened and he CANNOT be placed on a retroactive spenddown. His application for retroactive coverage must be denied because of excess income and failure to provide eligibility verification for the retroactive period.

EXAMPLE #3: (Using July 2006 figures)

A parent of a child under age 19 applies for Medicaid in April. She requests retroactive coverage for the child's medical bills incurred in January, February and March, including a hospital stay in March. The retroactive period is January – March.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date October 2019
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.101	Page 4

The worker verifies that the child met all the Medicaid nonfinancial requirements in the retroactive period, and that their countable income of \$3,250 in January, February and March exceeded the F&C CN and the MN income limits. The worker verifies that their resources in January and February were within the MN resource limits, but is unable to verify the resources for March.

The application is denied for retroactive coverage as CN Medicaid because of excess income and denied for MN spenddown because of failure to provide resource verification for all months in the retroactive period.

E. Disabled Applicants

If the applicant was not eligible for SS or SSI disability benefits during the retroactive period and the recipient alleges he/she was disabled during the retroactive period, follow the procedures in M0310.112 for obtaining an earlier disability onset date.

F. Excess Resources in Retroactive Period

If the applicant had excess resources during part of the retroactive period, retroactive resource eligibility exists only in the month(s) during which the resources were at or below the limit at any time within the month. The applicant's eligibility must be denied for the month(s) during which excess resources existed during the entire month.

EXAMPLE #4: (Using July 2006 figures)

Mr. A applied for Medicaid for himself on July 8. He reported receiving a Medicaid covered service in each retroactive month; no hospital service was received. The retroactive period is April 1 through June 30. He currently receives SS disability benefits of \$1500 per month and received SS disability of \$1500 monthly during the retroactive period. He is not eligible for Medicare Part A. His verified resources exceeded the MN limit in April and part of May; the resources were reduced to below the MN limit on May 20. He met the retroactive spenddown on April 5. His application was approved for retroactive MN coverage beginning May 1, and April coverage was denied because of excess resources.

G. Income Determination

Countable income for the applicant's unit is that income which was actually received *or determined reasonably compatible* in the three months prior to the application month.

1. Monthly Determination for CN

When an individual in the family unit meets a CN covered group, compare each month's countable income to the appropriate CN income limit for the month. When the countable income is within the CN income limit in the month, the CN individual meets the income eligibility requirement for that retroactive month. Enroll the eligible CN unit member(s) **for that month(s) only**, using the appropriate CN covered group program designation.

2. MN

When the family unit's *verified* countable income exceeds the CN income limit in one or more of the retroactive months, and all other

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2020
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.102	Page 5

Medicaid medically needy eligibility factors are met in that month(s), determine if the unit meets the MN income limit for the **3-month** retroactive budget period.

When the unit's countable income exceeds the MN limit for 3 months, place the unit on a spenddown for the month(s) in which excess income existed. See subchapter M1330 for retroactive spenddown eligibility determination policy and procedures.

H. Retroactive Entitlement

Retroactive coverage can begin the first day of the third month prior to application month if all eligibility requirements are met. An exception is eligibility for a newborn; coverage will be effective on the child's date of birth.

QMB-only coverage for new applicants or individuals with closed coverage who reapply outside a renewal reconsideration period cannot be retroactive.

The applicant is entitled to Medicaid coverage for only the month(s) in which all eligibility factors were met. If all factors except income were met in all the retroactive months, then the applicant is placed on spenddown for the retroactive period. **See subchapter M1330 to determine retroactive spenddown eligibility.**

1. Retroactive Coverage Begin Date

If the applicant is eligible for retroactive coverage, he is enrolled effective the first day of the month in which he met all eligibility factors. When excess income existed in a retroactive month(s), entitlement begins the date the retroactive spenddown was met.

2. Retroactive Coverage End Date

The Medicaid recipient's retroactive Medicaid coverage expires after the last day of the retroactive month(s) in which he was entitled to Medicaid.

3. Example

EXAMPLE #5: Mr. B applied for Medicaid for himself on July 8. He reported receiving a Medicaid covered service in each retroactive month. The retroactive period is April 1 through June 30. He met all eligibility requirements in the retroactive period. He is entitled to retroactive Medicaid coverage beginning April 1 and ending June 30.

M1510.102 ONGOING ENTITLEMENT

A. Coverage Begin Date

Ongoing Medicaid entitlement for all covered groups except the QMB group begins the first day of the application month when all eligibility factors are met at any time in the month of application. Exceptions:

- when an applicant has excess income;
- when the applicant is eligible only as a QMB;
- when the applicant is age 21-64 years and is admitted to an institution for mental diseases (IMD);
- when the individual is incarcerated (see M0140.200.C.1 and M0140.300.D);
- for a newborn, coverage will begin on the child's date of birth.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2021
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.102	Page 6

1. **Applicant Has Excess Income**
When all eligibility requirements are met except for income, entitlement begins the date the spenddown is met. Only medically needy applicants can be eligible after meeting a spenddown. See subchapter M1330 to determine retroactive spenddown eligibility.
2. **QMB Applicant**
Entitlement to Medicaid for QMB coverage begins the first day of the month **following** the month in which the individual's QMB eligibility is determined and approved, **not** the month of application. QMB-only coverage for new applicants or individuals with closed coverage who reapply outside a renewal reconsideration period cannot be retroactive.

EXAMPLE #6: Ms. C is 55 years old and is disabled. She applied for Medicaid on May 8, 2019, and requested retroactive coverage. She began receiving Medicare in May 2019. She is approved for QMB coverage on June 9; therefore, her QMB coverage will begin on July 1. She is eligible to receive coverage in the MAGI Adults covered group for the retroactive months of February, March, and April. However, she is not eligible for MAGI Adults coverage in May or June due to her Medicare enrollment. QMB eligibility cannot extend to the retroactive period (see M1510.101.H). If she did not opt out of Plan First, she should be enrolled in Plan First coverage for May and June, 2019.
3. **SLMB and QDWI**
Ongoing entitlement for the Special Low Income Medicare Beneficiary (SLMB) and the Qualified Disabled and Working Individuals (QDWI) covered groups is the first day of the application month when all eligibility factors are met at any time in the month of application.
4. **Applicant Age 22 or Over, But Under Age 65 Is Admitted To An IMD and Discharged From the IMD While the Application is Pending**
If an **applicant** *who is age 22 or over, but under age 65 is admitted to an IMD and discharged from the IMD while the application is pending, Medicaid entitlement begins the first day of the application month (or retroactive month, if applicable) as long as he meets all other Medicaid eligibility requirements.*

EXAMPLE #6a: Mr. A is a 50 year old man who applies for Medicaid at his local agency on October 1, 2020. He was admitted to an IMD on October 20, 2020, and was discharged from the IMD on November 2, 2020, back to his home locality. The agency completes the Medicaid determination on November 5 and finds that he is eligible for Medicaid in October 2020. The worker enrolls him in Medicaid beginning October 1, 2020.
5. **Applications From Current IMD Patients Age 22 or Over, But Under Age 65**
An **applicant** *who is who is age 22 or over, but under age 65 and who is currently in an IMD is not eligible for Medicaid while in the IMD. Process the application within the established time frames in M0130.100. Eligibility will be determined based on the type of living arrangement to which the patient will be discharged. If eligible, do not enroll the patient until the date the patient is discharged from the IMD.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date October 2019
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.102	Page 7

If the patient is discharged from the facility and the patient meets all eligibility factors, the agency will enroll the patient effective the date of discharge.

EXAMPLE #6b: Mr. A is a 50 year old patient at Central State Hospital (an IMD). He receives Social Security disability benefits. The CSB sends his local agency a Medicaid application which is received on August 18. The facility's statement notes that he will be discharged on September 17 to ABC Nursing Home, a nursing facility. The agency completes the determination on August 27 and finds that he will be eligible once he is discharged to the nursing facility.

The agency does not enroll Mr. A until the discharge is confirmed. The CSB case manager calls the agency on September 21 and informs the agency that the patient was discharged to the ABC Nursing Home on September 18. The patient is enrolled in Medicaid with a begin date of September 18.

**6. Offenders
(Incarcerated
Individuals)**

Individuals who meet all Medicaid eligibility requirements, including eligibility in a **full benefit** CN covered group, are eligible for Medicaid coverage limited to inpatient hospitalization while incarcerated. Enroll eligible MAGI Adults in aid category AC 108 and all other offenders in aid category AC 109 regardless of their covered group.

See M0140.000 regarding incarcerated individuals *and M1520.102 for ongoing entitlement.*

**7. MAGI Adult
Turns 65 or
Eligible for
Medicare**

When an individual enrolled in the Modified Adjusted Gross Income MAGI Adults covered group turns 65 years old, begins to receive Medicare or is eligible to receive Medicare, he is no longer eligible in the MAGI Adults covered group. Evaluate the individual for eligibility in an Aged, Blind or Disabled covered group. If the individual is not eligible in any other covered group, cancel his coverage following the policy in M1510.102 B below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2022
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.102	Page 8

B. Coverage End Date

Medicaid entitlement ends the last day of the month in which the recipient fails to meet all of the Medicaid eligibility requirements, unless the recipient is a CN pregnant woman or is age 22 or over, but under age 65 and was admitted to an IMD.

Medicaid coverage is canceled on the last day of the month in which the agency determines that the recipient no longer meets the eligibility requirements IF the agency can send an advance notice to the recipient at least 11 days before the last day of the month. If the agency cannot send the notice at least 11 days before the end of the month, coverage is canceled effective the last day of the next month.

1. CN Pregnant Woman

After eligibility is established, a pregnant woman in any CN covered group continues to be eligible for Medicaid during the remainder of her pregnancy and *for 12 months following the end of the month in which her pregnancy ends*, regardless of any changes in family income, as long she continues to meet all non-financial criteria. *If the woman becomes pregnant while she is in the 12 month coverage period, she is entitled to an additional 12 months of coverage following the end of the second pregnancy.*

2. Individual Admitted to Ineligible Institution Other than an IMD

Cancel coverage as soon as possible after learning of the enrollee's admission to an ineligible institution. **DO NOT cancel coverage retroactively.** Cancel coverage effective the current date (date the worker enters the cancel transaction in the system).” **An Advance Notice of Proposed Action is not required.** Send a Notice of Action to the enrollee or his authorized representative informing him of the cancel date and the reason.

Note: An individual of any age who is **enrolled in Medicaid** at the time of admission to an **IMD** may remain enrolled in Medicaid. **Do not cancel coverage.** The Department of Medical Assistance Services (DMAS) will coordinate with the Centers for Medicare and Medicaid Services (CMS) to ensure that no unauthorized FFP occurs for individuals age 22 years or over but under age 65 years.

3. Spenddown Enrollees

Medicaid entitlement ends on the last day of the last month in the spenddown budget period, unless the individual's or family's circumstances change before that date.

C. Ongoing Entitlement After Resources Are Reduced

When an applicant has excess resources throughout the application month, he is not eligible for Medicaid for the month of application. An applicant who reduces excess resources during the month of application or a subsequent month before action is taken on the application may become eligible in the month in which the value of his resources is reduced to, or below, the Medicaid resource limit. In order to reduce resources, the resources must actually be expended and the expenditure documented. (For example: a receipt, a canceled check, or a bank statement).

Reduction of resources is an asset transfer and must be evaluated under asset transfer policy (subchapter M1450). When excess resources are reduced, entitlement to ongoing Medicaid may begin no earlier than the first day of the month in which the resources were reduced to the Medicaid limit. When retroactive coverage is requested, policy in M1510.101 above must be followed.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date January 2022
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.103	Page 8a

M1510.103 HOSPITAL PRESUMPTIVE ELIGIBILITY

A. Policy

Individuals enrolled on the basis of Hospital Presumptive Eligibility (HPE) are covered by Medicaid beginning with the date of the HPE determination through the last day of the following month or the date MA eligibility is determined by an LDSS, whichever comes first. For their coverage to continue beyond the HPE enrollment period, they must submit a full MA application. If the individual does not submit an MA application, no further action is necessary on the part of the LDSS. See M0120.500 C.

B. Procedures

When an HPE enrollee submits a full MA application and it is pended in VaCMS, the individual's coverage in the HPE AC is extended by the eligibility worker, as necessary, while the application is processed.

Applications submitted by pregnant women enrolled on the basis of HPE must be processed within 7 calendar days of the agency's receipt of the signed application. Breast and Cervical Cancer Prevention and Treatment Act (BCCPTA) applications submitted by individuals enrolled on the basis of HPE must be processed within 10 work days of the agency's receipt of the signed application.

1. Enrollment

When an individual is determined eligible for MA coverage, his MA coverage under the appropriate MA AC includes any days to which he is entitled that are not already covered by HPE. If the individual submitted the MA application in the same month HPE coverage began and HPE began on any day other than the first day of the month, his MA coverage begins the first day of that month and the eligibility worker enrolls him in a closed period of coverage in the appropriate MA AC beginning with the first day of the month and ending the day before the HPE begin date. The worker is to enroll the eligible individual in ongoing coverage in the appropriate MA AC beginning the first day of the month after the effective date of the HPE coverage cancellation. See M0120.500 C.2

2. Individuals Enrolled in HPE as Pregnant Women or in Plan First

If an individual who was enrolled in HPE with partial coverage as a pregnant woman or in Plan First is determined eligible for full MA coverage in the period covered by HPE, cancel HPE coverage retroactively and reinstate in full coverage for the retroactive months and ongoing, if eligible. See M0120.500 C.2d

3. Retroactive Entitlement

An individual's eligibility for retroactive coverage for the three months prior to the month of the MA application is determined when the individual had a medical service within the three months prior to the month of the full MA application. If the individual had full coverage while enrolled as HPE, only enroll him for the portion of the retroactive period that he was not enrolled as HPE. See M0120.500 C.2e

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date October 2018
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.104	Page 8b

4. HPE Enrollee Not Eligible for Ongoing Coverage

If the applicant is determined to not be eligible for ongoing MA coverage, his entitlement to HPE coverage ends. Cancel the HPE coverage effective the current date (i.e. day of the eligibility determination). See *M0120.500 C.2f*

Send a Notice of Action indicating that the individual's MA application was denied and that his HPE coverage was cancelled with the effective date. The individual receives notice of the HPE coverage period from the hospital at the time of the HPE enrollment; advance notice of the HPE cancellation is not required. There are no appeal rights for HPE.

M1510.104 DISABILITY DENIALS

A. Policy

When an individual concurrently applies for SSI or SS and Medicaid as disabled, and either the DDS or the Social Security Administration (SSA) denies disability, the local social services department must deny the Medicaid application because the disability requirement is not met.

When an individual applies for Medicaid as disabled or concurrently applies for SS/SSI and Medicaid as disabled, and DDS denies disability, the local social services department must deny the Medicaid application because the disability requirement is not met.

B. Procedures

1. Subsequent SSA/SSI Disability Decisions

The SSA disability decision takes precedence over a DDS decision (DDS will make a decision before SSA if SSA does not take action within the 90-day Medicaid application processing time). If SSA denies disability and the decision is appealed and subsequently reversed, reopen and re-evaluate the denied Medicaid application as long as the disability onset month is prior to the month of application or is no later than 90 days after the month of application.

2. Use Original Application

The original application is used as long as the application was denied because the individual was not disabled and the subsequent disability onset month is no later than 90 days from the month of application.

3. Entitlement

If the re-evaluation determines that the individual is eligible, the individual's Medicaid entitlement is based on the Medicaid application date including the retroactive period if *available documentation verifies that* all eligibility requirements were met during the retroactive period. However, eligibility as a disabled individual cannot begin prior to the disability onset date when the disability onset date falls after the application date.

4. Renewal

If, based upon the re-evaluation, the individual is determined to be eligible and more than 12 months have passed since the application was filed, complete a *renewal* to determine whether or not the individual remains eligible.

5. Original Application Was Purged

Closed cases may be purged after at least three years from the application date have passed (see M0130.400). If the case record was purged, in the absence of agency knowledge regarding the original application date (e.g. an application log), accept the individual's attestation of the application date.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date October 2018
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.104	Page 8c

Send the individual two application forms. Instruct the individual to complete one application according to his circumstances at the time of the attested original application date and the other application according to his current circumstances. Request verifications for the attested original application month and retroactive period, as well as the current application according to the renewal policy in M1520.200 A, in order to evaluate ongoing eligibility

If verifications from the attested application month and retroactive period cannot be obtained, eligibility cannot begin until the earliest month that the individual was both disabled and his eligibility can be verified.

6. Spenddown

If, based upon the re-evaluation, the individual is determined not eligible but met the requirements in Chapter M13 for placement on a spenddown, a first prospective and additional 6 month spenddown budget period(s) are established to cover the period of time between the date of application and the date action is taken on his case.

A new application is not required for each 6 month spenddown budget period leading up to the date of processing; however, verification of all income and resources for those time periods must be obtained.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date January 2021
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.106	Page 9

M1510.105 FOSTER CARE CHILDREN

A. Policy Entitlement begins the first day of the month of commitment or entrustment IF a Medicaid application is filed within 4 months of the commitment or entrustment date.

If the Medicaid application is filed more than 4 months after entrustment or commitment, entitlement begins the first day of the application month if retroactive coverage is NOT requested.

B. Retroactive Entitlement If the Medicaid application is filed within 4 months of entrustment or commitment, retroactive eligibility exists only if the child met another covered group and all other Medicaid eligibility requirements in the retroactive period. If the Medicaid application is filed more than 4 months after entrustment or commitment, retroactive entitlement as a foster care child exists in the 3 months prior to Medicaid application. Entitlement cannot go back more than 3 months prior to the Medicaid application month.

M1510.106 DELAYED CLAIMS

A. When Applicable Medicaid will not pay claims from providers that are filed more than 12 months after the date the service was provided, unless the reason for the delayed filing was a delay in the enrollee's eligibility determination and enrollment. If the applicant is eligible for Medicaid and the coverage begin date is 12 months or more prior to the month during which the enrollee is enrolled on the Medicaid computer, the agency must write a letter for the applicant to give to all medical providers who will bill Medicaid for services provided over 1 year ago.

B. Eligibility Delay Letter Requirements The letter must:

- * be on the agency's letterhead stationery and include the date completed.
- * be addressed to the "Department of Medical Assistance Services, Claims Processing Unit."
- * state the enrollee's name and Medicaid recipient I.D. number.
- * state that "the claim for the service was delayed for more than one year because eligibility determination and enrollment was delayed."

C. Procedures The "eligibility delay" letter and a sufficient number of copies must be given to the enrollee to give to each provider who provided a covered medical service to the recipient over one year ago. The provider must attach the letter to the claim invoice in order to receive Medicaid payment for the service. If the date the letter was prepared by the agency is not included on the letter, the claim will be denied. If the individual was enrolled in a closed period of coverage, include the dates of coverage in the letter. A sample eligibility delay letter is available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2022
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.107	Page 9a

M1510.107 Enrollment Changes

D. Enrollment Changes

VaCMS is the MA eligibility system of record, however some enrollment functions can only be handled by the DMAS Eligibility and Enrollment Unit. The VaCMS and *MES (Medicaid Enterprise System (formerly MMIS))* systems **must** reflect correct coverage. Appropriate change requests include:

- Retroactive coverage that cannot be approved through VaCMS
- Duplicate linking
- Erroneous death cancellations
- Spenddown end-dates (if open-ended coverage was sent to *MES*)
- Missing newborn coverage
- Approved non-labor and delivery Emergency Services coverage
- Same day void
- Coverage corrections unable to be handled through VaCMS.

There may be instances when VaCMS should be able to successfully update the enrollment system but does not. When this occurs, the eligibility worker must follow the steps as listed below:

- First attempt to make the correction in VaCMS with the help of supervisors or other agency resources. If not successful;
- Contact the VDSS Regional Practice Consultant (RC) for assistance. The RC will help the local worker make the correction in VaCMS. If not successful;
- If either the agency resources or RC is unable to correct the enrollment in VaCMS, they can instruct the worker to submit a coverage correction to DMAS.
- The worker will complete a Coverage Correction Request Form (DMAS-09-1111-eng). The form can be found on the VDSS intranet. Follow the instructions as provided on the form.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2017
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.200	Page 10

M1510.200 NOTICE REQUIREMENTS

A. Policy

Federal regulations in 42 CFR 431.206 through 431.214 require the agency to inform every applicant or enrollee in writing

- * of his right to a hearing;
- * of the method by which he may obtain a hearing; and
- * that he may represent himself or use legal counsel, a relative, a friend or other spokesperson.

The agency must provide the information required above at the time of any action affecting his claim for Medicaid benefits.

B. Notice of Action on Medicaid and Family Access to Medical Insurance Security Plan (FAMIS) Programs

A system-generated Notice of Action or the "Notice of Action on Medicaid and Family Access to Medical Insurance Security Plan (FAMIS) Programs" (Form 032-03-008) must be used to notify the applicant:

- * that his application has been approved and the effective date(s) of his Medicaid coverage.
- * that retroactive Medicaid coverage was approved and the effective dates.
- * that his application has been denied including the specific reason(s) for denial.
- * that retroactive Medicaid coverage was denied, including the specific reason(s) for denial.
- * of the reason for delay in processing his application.
- * of the status of his request for reevaluation of his application in spenddown status.

When additional information is necessary to clearly explain the case action, suppress the system-generated notice and send a manual notice containing the necessary information.

When the application was filed by the applicant's authorized representative, a copy of the notification must be mailed to the applicant's authorized representative.

1. CN Children or Pregnant Women

When the application of a medically indigent child or pregnant woman is denied because of excess income, the denial notice must state the reason for denial. The notice must also include the resource question pages from an MA application form and must advise the applicant of the following:

- a. that he/she may complete and return the enclosed form for a Medicaid spenddown to be evaluated, and
- b. if the information is returned within 10 days of this notice, the medically indigent application date will be used as the Medicaid spenddown application date.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date January 2014
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.200	Page 11

**2. Qualified
Medicare
Beneficiaries**

a. Excess resources

When a Qualified Medicare Beneficiary's (QMB's) application for full benefit Medicaid coverage is denied because of excess resources, the denial notice must state that the applicant is not eligible for full Medicaid coverage because of excess resources.

b. Excess income

- 1) If the QMB's resources are within the Medicare Savings Program (MSP) limit but are over the MN limit, and the income exceeds the limit for full Medicaid coverage, the notice must state that the applicant is not eligible for QMB Medicaid because of excess income, and is not eligible for MN spenddown because of excess resources. The notice must specify the dollar amount of the appropriate MN resource limit.
- 2) If the QMB's resources are within the MN income limit, and income exceeds the limit for full Medicaid coverage, the notice must state that the applicant is not eligible for full-benefit Medicaid because of excess income, but that the applicant can become eligible by incurring medical or dental expenses that equal or exceed his excess income. The notice must specify the spenddown amount, the spenddown period begin and end dates, and include a copy of the Spenddown Fact Sheet.

**3. Retroactive
Entitlement
Only or Limited
Period of
Entitlement**

There are instances when an applicant is not eligible for ongoing Medicaid coverage but is eligible for retroactive benefits, or when a change in the applicant's situation during the application process results in the applicant being eligible for only a limited period of time. Only one written notice is sent to the applicant covering both actions. The begin and end dates of Medicaid coverage and the reason(s) for ineligibility must be included on this notice.

**4. Example #7
Limited Period
of Entitlement**

A Medicaid application was filed on December 30. The client inherited real property on January 30. The agency processed the application on February 5 and determined the client was eligible for Medicaid for the months of December and January, but was ineligible for additional coverage beginning February because the countable value of the inheritance caused excess resources. One notice is sent to the applicant stating that his Medicaid application was approved beginning December 1 and ending January 31, and that he was denied coverage after January 31 because of excess resources (real property).

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2022
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.301	Page 12

M1510.300 FOLLOW-UP RESPONSIBILITIES

M1510.301 THIRD PARTY LIABILITY (TPL)

A. Introduction

Medicaid is a “last pay” program and cannot pay any claim for service until the service provider has filed a claim with the recipient’s liable third parties such as health insurance companies or legally liable person. The procedures depend on the type of third party liability (TPL) the recipient has.

B. Private Health Insurance

Information on an eligible individual’s private health insurance coverage must be obtained and recorded in the case record and in VaCMS. This must include the company name (code number for the TPL file), the policy number, and the begin date of coverage. This information does NOT require verification.

Health insurance policy or coverage changes must be updated in VaCMS.

1. Verification Required - Policy or Coverage Termination

Verification of the date the health insurance policy and/or a coverage type terminated is required. The verification of the termination date can be a written letter from, or verbal statement by, the insurance company that states the termination date. If verification is obtained, the worker is to **end-date** the TPL coverage in VaCMS (note: do not delete the TPL from VaCMS).

Absent receipt of documentation showing that the TPL coverage has ended, it must be left open in VaCMS and *MES* and cannot be ended by the worker. If the worker is unable to obtain verification of the coverage termination date from the insurance company or the enrollee/authorized representative, the worker is to notify DMAS that the enrollee’s TPL coverage was terminated, but verification cannot be obtained. The notification should be sent via e-mail to: tplunit@dmass.virginia.gov. If it is determined that TPL coverage no longer exists, the coverage will be closed in *MES* by DMAS staff. The worker must then close the coverage in VaCMS.

2. Health Insurance Premium Payment (HIPP)Program

If an applicant or enrollee reports that he or a family member is employed more than 30 hours each week and is eligible for health insurance coverage under an employer’s group health plan, he or she must be given a HIPP Fact Sheet which provides a brief description of the program and the contact information for the HIPP Unit at DMAS. The HIPP Fact Sheet is available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/References>.

If the enrollee opts to enroll in HIPP, update **VaCMS** with the TPL information when it is provided by the enrollee. Call the HIPP Unit at 1-800-432-5924 when an enrollee reports changes to the TPL information so that *MES* can be updated.

C. Medicare

Individuals are required to apply for coverage under Medicare A, B or D, or any combination of Medicaid A, B, and D, if it is likely that the individual would meet the eligibility criteria for any or all of those programs. The state agrees to pay any applicable premiums and cost-sharing (except those applicable under Part D) for individuals required to apply for Medicare.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2022
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.301	Page 13

Application for Medicare is a condition of eligibility unless the state does not pay the Medicare premiums, deductibles or co-insurance (except those applicable under Part D) for persons covered by the Medicaid eligibility group under which the individual is applying.

For persons age 65 or over, for persons under age 65 who have received SSA or Railroad Retirement benefits because of disability for 24 consecutive months, and for persons with chronic end-stage renal disease, the Department of Medical Assistance Services has a buy-in agreement with Medicare to provide to those eligible individuals who are also eligible for Medicare the medical services available under Medicare, Part B (Title XVIII of the Social Security Act) through payment of the Part B premium.

When the recipient has to pay a Medicare Part A premium, Medicaid will pay the Part A premium for

- all QMBs; the “dually-eligible” (those who are eligible in a CN or MN covered group and also are QMB), and the QMB-only (those QMBs who are not eligible for Medicaid in another covered group);
- Qualified Disabled and Working Individuals (QDWI).

1. Buy-In Procedure

The Centers for Medicare and Medicaid Services (CMS) maintains a current list of individuals for whom the State is paying the Part B premiums. The list is updated on a monthly basis by adding newly enrolled individuals and deleting those no longer eligible. Before CMS will admit an individual to the buy-in list for Part B coverage, the individual must have established his eligibility for Medicare. His name and claim number, if one has been assigned, must be identical to the information in the SSA files. A difference between the name and number in *MES* and in the SSA files results in a mismatch and rejection of Part B premium coverage.

2. Medicare Claim Numbers

Only two types of claim numbers correctly identify an individual's entitlement to Medicare coverage: a Social Security claim number or a Railroad Retirement claim number.

- SSA claim numbers consist of a nine-digit number followed by a letter, or a letter and numerical symbol. The most common symbols are T, M, A, B, J1, K1, D, W, and E.
- RR annuity-claim numbers have a letter (alpha) prefix followed by a six or nine digit number. The most common prefixes are A, M, H, WCD, NCA, CA, WD, WCH, and PD.
- Certain letters following nine digit numbers identify an individual as an SSI recipient and are not acceptable as a Medicare claim number. These claim symbols are AI, AS, BC, BI, BS, DC, DI, and DS.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2022
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.301	Page 14

3. Procedures for Obtaining Claim Numbers

a. Requesting Medicare Card

Each Medicaid applicant who appears to qualify for Medicare must be asked if he has applied for Medicare. Those that have applied and are eligible have received a white card with a red and a blue stripe at the top, with his name as it appears in the SSA files and the assigned claim number on the card. The name as it appears and the claim number must be included in the TPL section of the *MES* eligibility file maintained by *DMAS*.

b. Applicants Who Cannot Produce a Claim Number

In the event the applicant either does not have a Medicare card or does not know his claim number, inquire SSA via the SVES (State Verification Exchange System) using the applicant's own SSN.

If the applicant has never applied for Medicare, complete the Referral to Social Security Administration Form DSS/SSA-1 (form #032-03-099) and write in, "Buy-In" on the upper margin. Mail the form to the Social Security Office serving the locality in which the applicant resides. The SSA office will provide the correct claim number if the individual is on their records. Should the (local/area) SSA office have no record of an application for Medicare, a representative will contact the applicant to secure an application.

4. Buy-in Begin Date

Some individuals have a delay in Buy-in coverage:

Classifications	Buy-in Begin Date
SSI and AG recipients (includes dually-eligible)	1st month of eligibility
CN and MN with Medicare Part A who are dually-eligible as either Qualified Medicare Beneficiaries (QMB) or Special Low Income Medicare Beneficiaries (SLMB Plus)	1st month of eligibility
CN and MN with no Medicare Part A or who are not dually-eligible as either QMB or SLMB Plus	3 rd month of eligibility

If the medically needy coverage begin date is other than the first day of a month, Buy-in is effective the first day of the month in which the 60th day after the begin date occurs.

D. Other Third Party Liability

When the agency identifies another third party which has responsibility to pay for a recipient's medical bill, the agency must report the third party to:

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2020
Subchapter Subject M1510 MEDICAID ENTITLEMENT	Page ending with M1510.303	Page 15

Department of Medical Assistance Services
Third Party Liability Section
600 East Broad Street, Suite 1300
Richmond, Virginia 23219

Examples of other third parties include liability insurance settlements, trust funds established for the recipient's medical care, awards resulting from liability lawsuits, and persons ordered by the court to pay for the recipient's medical care.

E. Pursuing Third Party Liability and Medical Support

In order to continue to be eligible for Medicaid, an individual who is required to assign rights to, and cooperate in, pursuing medical support and third party liability must continue to cooperate with the local agency and DMAS. See subchapter M0250 for details.

M1510.302 SOCIAL SECURITY NUMBERS

A. Policy

Applicants must provide the Social Security number (SSN) of any person for whom they request Medicaid, or must apply for a Social Security number if he/she does not have one.

Exceptions – the SSN requirement does not apply to:

- an alien who is eligible only for Medicaid payment of emergency services, as defined in subchapter M0220, or
- a non-citizen who is only eligible to receive an SSN for a valid non-work reason, or
- a child under age one born to a Medicaid-eligible or FAMIS-covered mother (see M0330.301 B. 2 and M2220.100).

An individual who is applying only for others and is not applying for himself is not required to provide an SSN for himself.

When an individual has applied for an SSN and is determined eligible for medical assistance, the worker must take follow-up action to obtain the individual's SSN.

B. Procedures

See subchapter M0240 for the SSN application follow-up procedures required after enrolling an eligible individual who has applied for an SSN.

M1510.303 PATIENT PAY INFORMATION

A. Policy

After an individual in long-term care is found eligible for Medicaid, the recipient's patient pay must be determined. When the patient pay amount is initially established or when it is changed, the worker enters the information in VaCMS. VaCMS sends the Notice of *Patient Pay Responsibility* to the enrollee or the enrollee's authorized representative.

B. Procedure

When patient pay increases, the Notice of *Patient Pay Responsibility* is sent in advance of the date the new amount is effective.

M1520.000 MEDICAL ASSISTANCE ELIGIBILITY REVIEW

M1520.001 GENERAL PRINCIPLE

- A. Policy** A MA recipient's eligibility must be partially reviewed whenever the agency becomes aware of any change in the enrollee's circumstances that might affect the enrollee's continued eligibility. The timeframe for acting on a change is 30 calendar days from the date the change is reported or the agency becomes aware of the change.

Exception: Children meeting the definition of a newborn in M0330.802 or M2240.100.F are to be enrolled as soon as possible upon report of the birth.

An annual review of all of the enrollee's eligibility requirements is called a "redetermination" or "renewal." A renewal of the enrollee's eligibility must be completed at least once every 12 months. The renewal can be initiated in the 10th month to ensure timely completion of the renewal.

When an enrollee no longer meets the requirements for his current covered group, prior to cancelling his coverage, evaluate the enrollee in all covered groups for which he may meet the definition. If the enrollee is not eligible for full benefit Medicaid coverage and is not eligible in any other limited-benefit covered group (i.e. the Medicare Savings Programs), evaluate the enrollee for Plan First, unless he has declined that coverage.

1. Public Health Emergency

Effective January 31, 2020, a public health emergency (PHE) was declared by the U.S. Department of Health and Human Services as a result of the continued consequences of the Coronavirus Disease 2019 (COVID-19) pandemic. Under the direction of the Centers for Medicare and Medicaid Services (CMS), state Medicaid agencies have not taken action to cancel or reduce medical assistance coverage for enrolled individuals, regardless of eligibility changes, unless the individual dies, moves out of the state, or requests cancelation of coverage. When the PHE is declared over, normal policies and procedures regarding reviews, renewals and cancelations will resume.

2. Negative Action Requires Notice

When a change is reported that impacts eligibility or a renewal is completed and the enrollee is no longer eligible, the Advance Notice of Proposed Action must be sent to the enrollee, before the enrollee's benefits can be reduced or his eligibility can be terminated (see M1520.301). Send the notice to the authorized representative if one has been designated.

Adequate notice using the Notice of Action must be provided when an enrollee dies, enters an ineligible institution, is incarcerated and no longer meets a covered group, moves out of Virginia, requests termination of his coverage, or is unable to be located by the local agency.

3. Renewal Approval Requires Notice

When a change is reported and eligibility continues, no notice is necessary. When a renewal is completed and eligibility continues, a Notice of Action must be sent to enrollee or authorized representative, if one has been designated, informing him of continued eligibility and the next scheduled renewal.

4. Voter Registration

If the individual reports a change of address, voter registration application services must be provided (see M0110.300 A.3).

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.100	Page 2

B. Procedures For Partial Review and Renewals

The policy and procedures in this subchapter are contained in the following sections:

- Partial reviews – M1520.100;
- Renewals – M1520.200;
- Canceling coverage or Reducing the level of benefits – M1520.300;
- Extended Medicaid coverage – M1520.400;
- Transferring cases within Virginia – M1520.500.

M1520.100 PARTIAL REVIEW

A. Enrollee's Responsibility

Enrollees must report changes in circumstances that may affect eligibility and/or patient pay within 10 days from the day the change is known. For enrollees participating in the Health Insurance Premium Payment (HIPP) Program, changes that may affect participation in HIPP must be reported to the DMAS HIPP Unit within the 10-day timeframe.

B. Eligibility Worker's Responsibility

The eligibility worker is responsible for keeping a record of changes that may be anticipated or scheduled and for taking appropriate action on those changes.

Appropriate agency action on a reported change must be taken within 30 days of the report. If the enrollee reports any changes requiring verifications, such as changes in income or resources, or an asset transfer for enrollees receiving long-term services and supports (LTSS), if possible, use available online systems information to verify the reported change. If the online-information is compatible with the reported change, determine eligibility based upon the information available.

If verifications must be obtained from the enrollee, send a verification checklist, and allow at least 10 calendar days for the information to be returned. If information is not provided by the deadline and continued eligibility cannot be determined, send advance notice to the enrollee/ authorized representative stating the cancellation date and the reason. Document the information and evaluation in the VaCMS case record. If requested verifications are received after the deadline due to circumstances beyond the individual's control (e.g. a postal system delay), reopen the case, and complete processing of the change.

1. Changes That Require Partial Review of Eligibility

When an enrollee reports a change or the agency receives information indicating a change in the enrollee's circumstances (i.e. Supplemental Security Income [SSI] purge list, reported transfer of assets), the worker must take action to partially review the enrollee's continued eligibility.

The following changes must be verified:

- A decrease in income or termination of employment that causes the individual to move from limited Medicaid coverage to full Medicaid coverage,
- An increase in income that causes the individual to move from Medicaid to FAMIS, or to need a Medically Needy spenddown calculation.

If a reported change is not compatible with information obtained from online system searches, obtain verification from enrollee or authorized representative.

The agency may not deny an increase in benefits, terminate coverage, or reduce benefits for any individual unless the agency has sought additional information from the individual and provided proper notification.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2021
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.100	Page 2a

**2. Changes That
Do Not Require
Partial Review**

Document changes in an enrollee's situation, such as the receipt of the enrollee's Social Security number (SSN), that do not require a partial review in the case record and take action any necessary action on the enrollee's coverage.

Example: An MA enrollee who did not have an SSN, but applied for one when he applied for MA, reports by calling the worker that he received his SSN. The worker records the telephone call and the enrollee's newly assigned SSN in the case record, verifies the SSN via SPIDeR and enters the enrollee's verified SSN in the eligibility determination/enrollment systems.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.100	Page 3

3. HIPP

The eligibility worker must provide the enrollee with a copy of the HIPP FACT Sheet when it is reported that he or a family member is employed more than 30 hours per week and is eligible for coverage under an employer's group health plan. The HIPP Fact Sheet is available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/References>.

The eligibility worker must report to the HIPP Unit at DMAS any changes in an enrollee's situation that may affect the premium payment. The worker may report changes by e-mail to hipp@dmass.virginia.gov. This e-mail address is for use by the local agency staff only. See M0130.200 G for additional information about HIPP requirements.

3. Program Integrity

The MA eligibility of enrollees is subject to periodic review through the program integrity process (such as Medicaid Quality Control and the DMAS Recipient Audit Unit). It may be necessary for program integrity staff to request information, such as income verification, from the enrollee. The enrollee will be notified in writing and given a reasonable amount of time, as determined by the program integrity staff, to provide the information.

Should the enrollee not provide the requested information to the program integrity staff within the specified time, program integrity staff will notify the eligibility worker, and the worker must take action to follow up by requesting the appropriate verifications and/or sending advance notice, if necessary, to cancel coverage due to the inability to determine continued eligibility. An individual's failure to provide information to program integrity staff does not affect any future Medicaid applications.

C. Covered Group and Aid Category Changes

1. Enrollee's Situation Changes

When a change in an enrollee's situation results in a potential change in covered group, his eligibility in all other covered groups must be evaluated. Examples of such changes include when:

- a pregnant woman reaches the end of her 12th month of post-partum coverage,
- an infant who has been enrolled as a Newborn Child reaches age one year,
- a Families & Children (F&C) enrollee becomes entitled to SSI,
- an SSI Medicaid enrollee becomes a Qualified Severely Impaired Individual (QSII) (1619(b)),
- an individual enrolled in a Modified Adjusted Gross Income (MAGI) Adults aid category turns 65 years old, or becomes entitled for/begins receiving Medicare.

2. Change in Level of Benefits

When an individual who has been enrolled in limited coverage, such as Plan First, experiences a change, such as pregnancy or entitlement to Medicare, that results in eligibility for full coverage or a Medicare Savings Program, the individual's entitlement to the new level of coverage begins the month the individual is first eligible for the new level of coverage, regardless of when or how the agency learns of the change. If change in income is reported, the agency must utilize online systems information verifications that are available to the agency without requiring verifications from the individual or family.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date January 2021
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.100	Page 4

D. Child Moves From Parental Home

When an enrolled child moves out of the parental home but is still living in Virginia, do not cancel MA coverage solely on the basis of the move, and do not require a new application. Complete a partial review to determine the child's continuing eligibility if any changes in income, such as the child becoming employed, are reported.

1. Case Management

The necessary case management actions depend on the child's age and whether or not the child has moved to an arrangement in which an authorized representative is necessary.

a. Child Age 18 years or Under 18 and Living with a Relative

If the child is age 18, he may be placed in his own MA case if he was previously on a case with other enrollees. If the child is under age 18 and moved in with an adult relative, the child may be placed on a case with the relative and the relative authorized to conduct MA business on behalf of the child.

b. Child Under Age 18 years Living with Non-relative

When a child under age 18 moves to the home of a non-relative adult without legal custody, the non-relative adult does not have to be an authorized representative to report changes in the child's situation. However, the worker cannot discuss the case or send the non-relative adult a copy of the child's MA card unless the person is authorized to handle the MA business for the child. Follow the procedures in M1520.100 D.2 through D.4 below.

2. Enrollment

a. Case Number

The child's member ID number does not change, but the child's Member ID number must be moved to a case number in the child's name as case head, if the person with whom the child is living does NOT have authority to act on the child's behalf.

b. Demographics Comment Screen

In VaCMS, enter a comment that will inform staff that information from the case cannot be shared with (the name of the person with whom the child lives) because he/she is NOT authorized to receive the information.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date January 2021
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.100	Page 4a

c. Renewal Date

If establishing a new case for the child, enter the child's existing renewal date from his former case. If moving the child to the adult relative's already established case, the child's renewal date will be the adult relative's case renewal date only if this action does not extend the child's renewal date past one year.

d. Medicaid Card

A new ID card is only generated when the enrollee's name, SSN or gender changes, or when a worker requests a replacement ID card. Changing the child's address or case number does not generate a new card. The worker must request a replacement card if one is needed. The existing card will be voided when the replacement is issued.

3. Obtain Authorization from Parent Prior to Renewal

Prior to the next scheduled renewal, the agency should try to obtain an authorization from the parent to allow the agency to communicate with the adult. However, as long as the parent has not formally lost custody of the child, the parent is still the responsible party and can transact the Medicaid business if he is capable and willing, or until there is a guardian/custodian established. If the parent cannot or will not designate an authorized representative, refer the case to the agency's Family Services Unit so that guardianship can be established per M0120.200 C.

4. Renewal

Follow the rules in M0120.200, which apply to both applications and renewals. If the adult is a relative, the adult can complete the renewal for the child. If the adult is a non-relative and not an authorized representative, then the adult cannot complete the child's renewal. If the child's parent cannot or will not complete the renewal, a referral to the agency's Family Services Unit is needed to pursue guardianship.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2021
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 5

E. Recipient Enters LTC

An evaluation of continued eligibility must be completed using the rules in chapter M14 when a Medicaid enrollee begins receiving Medicaid-covered LTC services or has been screened and approved for LTC services. Rules for determining Medicaid eligibility for married institutionalized recipients who have a community spouse are found in subchapter M1480.

If an annual renewal has been done within the past 6 months, a partial review to address factors pertinent to receipt of LTC, such as asset transfer, spousal resource assessment, etc., must be completed. If an annual renewal has not been done within the past 6 months, a complete renewal must be completed (see M1520.200). When the re-evaluation is completed, send all required notices to the enrollee/authorized representative, and send a DMAS-225 to the provider (see M1410.300).

If the individual is already enrolled in a full benefit Medicaid covered group, do not change the AC. If the individual is enrolled in a limited-benefit covered group, the individual must be evaluated for eligibility in one of the covered groups for institutionalized individuals (i.e. income \leq 300% of SSI) (see M1460).

For an SSI recipient who has no community spouse and owns no countable real property, verify continued receipt of SSI through SOLQ-I or SVES, obtain information regarding asset transfer from the enrollee or authorized representative, and document the case record. As long as the individual continues to receive SSI, do not change the AC. If the individual loses SSI, evaluate his Medicaid eligibility in other covered groups. See M1430.103 for additional information regarding an SSI recipient who enters a nursing facility.

When an individual on a spenddown enters LTC, his Medicaid eligibility must be determined using the procedures in subchapter M1460. An individual on a spenddown in an assistance unit with a spouse and/or children becomes a separate assistance unit when he enters LTC. The spouse's and/or children's spenddown liability is recalculated to reflect a decrease in assistance unit size. See M1350.220 for additional information.

F. Woman Enrolled in FAMIS Prenatal Coverage Delivers Her Infant

For women enrolled in AC 110 under a fee for service (FFS) arrangement, labor and delivery services are paid as emergency services, and the newborn is considered a deemed-eligible newborn. When the birth of the child born to a woman enrolled in FAMIS Prenatal Coverage is reported, review the available systems to determine if the mother is enrolled in AC110 under FFS. If so, the child is enrolled as a deemed newborn in AC 093. See M0330.400.

An infant born to a woman enrolled in AC 111 and/or enrolled in managed care must be evaluated for ongoing coverage. The enrollment is treated as a change in circumstances. The infant is not considered a deemed-eligible newborn but has rather been enrolled prenatally through the mother's enrollment in FAMIS Prenatal Coverage. The infant's birth is treated as an "add a person" case change in the enrollment system and enrolled using the procedures in M1520.200 F 1-F.2 below.

Note: The infant is not required to provide an SSN or proof of application for an SSN in order to be enrolled. Follow the procedures in M0240.200 B.3 90 days following the infant's enrollment to determine if an SSN has been assigned. If the SSN number has not yet been issued at 90 days, obtain the SSN or proof of application for an SSN at the first renewal of the infant's coverage.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date October 2021
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 6

1. Required Information

To enroll the infant, the worker must have the information below. Use existing case data if possible. If additional information is needed, send a request for verification.

- Name, date of birth, sex (gender)
- Information about the infant's MAGI household and income.

Unless the agency has information about the infant's father living in the home (i.e. for another program), use only the mother's reported income to enroll the infant. Do not request information about the father or the father's income unless the agency has information about the father living in the home and his income.

2. Enrollment and Aid Category

Update the case with the new infant's information, enrolling the child as a Medicaid child under 19 or in FAMIS, as appropriate based on the mother's countable income at the time of application. Use the appropriate AC below to enroll the infant:

- Medicaid AC 090 for income $> 109\%$ FPL $\leq 143\%$ FPL
- Medicaid AC 091 for income $\leq 109\%$ FPL
- FAMIS AC 006 for income $> 150\%$ FPL and $\leq 200\%$ FPL
- FAMIS AC 008 for income $> 143\%$ FPL and $\leq 150\%$ FPL

The infant's first renewal is due 12 months from the month of the infant's enrollment.

M1520.200 RENEWAL REQUIREMENTS

A. Policy

The agency must evaluate the eligibility of all MA enrollees, with respect to circumstances that may change, at least every 12 months. Each renewal must be authorized by an eligibility worker or supervisor, although administrative staff may assist in the gathering of information.

The scope of renewals is limited to information that is necessary to determine ongoing eligibility and that relates to circumstances that are subject to change, such as income and resources. Verification of information that is not subject to change, such as date of birth and SSN, is not required at renewal, unless it has not been verified previously.

If an annual renewal has been done within the past 6 months, a partial review to address factors pertinent to receipt of LTC, such as asset transfer, spousal resource assessment, etc., must be completed. If an annual renewal has not been done within the past 6 months, a complete renewal must be completed (see M1520.200). When the re-evaluation is completed, send all required notices to the enrollee/authorized representative, and send a DMAS-225 to the provider (see M1410.300).

If the individual is already enrolled in a full benefit Medicaid covered group, do not change the AC. If the individual is enrolled in a limited-benefit covered group, the individual must be evaluated for eligibility in one of the covered groups for institutionalized individuals (i.e. income $\leq 300\%$ of SSI) (see M1460).

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2021
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 6a

For an SSI recipient who has no community spouse and owns no countable real property, verify continued receipt of SSI through SOLQ-I or SVES, obtain information regarding asset transfer from the enrollee or authorized representative, and document the case record. As long as the individual continues to receive SSI, do not change the AC (*see M0320.101.C*). If the individual loses SSI, evaluate his Medicaid eligibility in other covered groups. See M1430.103 for additional information regarding an SSI recipient who enters a nursing facility.

When an individual on a spenddown enters LTC, his Medicaid eligibility must be determined using the procedures in subchapter M1460. An individual on a spenddown in an assistance unit with a spouse and/or children becomes a separate assistance unit when he enters LTC. The spouse's and/or children's spenddown liability is recalculated to reflect a decrease in assistance unit size. See M1350.220 for additional information.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2020
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 7

B. Renewal Procedures Renewals may be completed in one of the following ways:

- ex parte,
- using a paper form,
- online,
- telephonically by calling the Cover Virginia Call Center.

1. Ex Parte Renewals

An ex parte renewal is an internal review of eligibility based on information available to the agency. Conduct renewals of ongoing Medicaid eligibility through the ex parte renewal process when:

- the local agency has access to on-line systems information for verifications necessary to determine ongoing eligibility and/or income verifications obtained for other benefit programs, and
- the enrollee's covered group is not subject to a resource test.

a. MAGI-based Cases

For cases subject to Modified Adjusted Gross Income (MAGI) methodology, an ex parte renewal should be completed when income verification is available through the federal Hub. An individual may authorize the use of Internal Revenue Services (IRS) data for up to five years on the application form and at each renewal. In order for the federal Hub to be used for income, there must be a valid authorization in the electronic or paper case record.

The agency must utilize online systems information verifications that are available to the agency without requiring verifications from the individual or family, and must make efforts to align renewal dates for all programs. The agency has ready access to Supplemental Nutrition Assistance Program (SNAP) and TANF records, some wage and payment information, information from SSA through SVES or SOLQ-I and information from child support and child care files. Verification of income from available sources, including the VEC, may be used if it is dated within the previous 12 months. See M0130.001.B.3.

The eligibility worker is to take every opportunity to renew Medicaid eligibility when information is reported/verified that will allow a renewal of eligibility to be completed. For example, when an ongoing Medicaid enrollee applies for SNAP or TANF or reports a change in income, use the income information obtained to complete an early ex parte Medicaid renewal and extend the Medicaid renewal for another 12 months.

The agency must include in each applicant's case record facts to support the agency's decision on the case. The eligibility worker must document the date and method used to obtain the verification information (viewed pay stub dated xx/xx/xxxx, telephone call on xx/xx/xxxx date, etc.), the type of verification, the source and a description of the information. If the renewal is not processed and documented electronically, the documentation must be placed *and maintained* in the case record.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date January 2020
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 8

**b. SSI
Medicaid
Enrollees**

An ex parte renewal for an SSI recipient (including an LTC recipient with no community spouse) who has reported no ownership interest in countable real property can be completed by verifying the individual's continued receipt of SSI through SVES or SOLQ-I and documenting the case record. For a 1619(b) individual, check the Medicaid Test Indicator field in SVES or SOLQ-I to verify there is a code of A, B or F.

If the individual is no longer an SSI recipient or no longer has 1619(b) status and the information needed to determine continued eligibility is not known to the agency, a contact-based renewal must be completed and necessary verifications obtained to evaluate the individual's eligibility in all other covered groups prior to canceling his Medicaid coverage.

The ex parte renewal process cannot be used for an SSI Medicaid enrollee who owns non-excluded real property because the individual is subject to a resource evaluation.

**c. Continuing
Eligibility
Not
Established
Through Ex
Parte
Process**

If the ex parte renewal results in the individual no longer being eligible for coverage, the individual must be given the opportunity to submit current income information and verifications. Follow the steps in M1520.200 B.2 below for completing a paper-based renewal.

2. Paper Renewals

When an ex parte renewal cannot be completed and the enrollee has not completed a renewal telephonically or online, send the enrollee a pre-filled paper Administrative Renewal form to sign and return. If an authorized representative has been designated, the renewal form is sent to the authorized representative.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date January 2020
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 8a

The form needs to be sent to the enrollee in time to allow for the return and processing periods prior to the system cut-off in the 12th month of eligibility. The enrollee must be allowed 30 days to return the renewal form and any necessary verifications; Administrative Renewal forms are pre-filled with the return date. The specific information requested and the deadline for receipt of the verification must be documented in the case record.

If the enrollee submits a completed application form, accept it as a renewal form and obtain any additional information needed to complete the renewal.

New or revised information provided by the enrollee must be entered into the system. The enrollee is responsible for reporting any changes. If the enrollee does not check either “yes” or “no” in response to a particular question, there is considered to be no change with regard to that question.

Verifications must be copied or scanned into VaCMS using the Document Management Imaging System (DMIS) and preserved for the record. Notes by the eligibility worker that the verifications were viewed are not sufficient.

Renewals must be completed prior to cut-off in the 12th month of eligibility or within 30 calendar days from the receipt of the renewal, whichever is later.

When an individual does not return the renewal form and action is taken to cancel coverage, a three-month reconsideration period applies (see M1520.200 C.4).

Note: Follow Auxiliary Grants (AG) policy regarding the appropriate renewal form to use for AG/Medicaid enrollees.

3. Online and Telephonic Renewals

Enrollees may opt to complete a renewal online using CommonHelp or by telephone through the Cover Virginia Call Center.

Renewals completed through CommonHelp are electronically signed by the enrollee or authorized representative. For cases in VaCMS, renewals completed through CommonHelp will automatically be entered into VaCMS for the worker to complete processing. For non-VaCMS cases, the renewal must be completed manually. It is not necessary to print a renewal completed through CommonHelp for the case record because it will be maintained electronically; however, the evaluation of eligibility and verifications must be documented in the VaCMS case record. If the enrollee reports having no income (\$0 income), follow the procedures in M1520.200 B.1.b).

Telephonic renewals may be taken only by the Cover Virginia Call Center. Telephonic renewals cannot be taken directly by the local agency because a telephonic signature is required.

C. Disposition of Renewal

The enrollee must be informed in writing of the findings of the renewal and the action taken using the Notice of Action when continued eligibility exists. Advance written notice must be used when there is a reduction of benefits or termination of eligibility (see M1520.300).

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2020
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 9

1. **Renewal Completed**
Notify the enrollee in writing of the findings of the renewal and the action taken. When eligibility continues, use the Notice of Action, and include the month and year of the next scheduled renewal. When the individual is no longer eligible, use the Advance Notice of Proposed Action and include spenddown information, if applicable. When there is a reduction of benefits, use the Advance Notice of Proposed Action and include the month and year of the next scheduled renewal.
2. **Renewal Not Completed**
If information necessary to redetermine eligibility is not available through online information systems that are available to the agency and the enrollee has been asked but has failed to provide the information, the renewal must be denied and the coverage cancelled due to the inability to determine continued eligibility. Action cannot be taken to cancel coverage until after the deadline for the receipt of verifications has passed, except for situations when the deadline falls on a weekend or holiday.
3. **Referral to Health Insurance Marketplace (HIM)**
Unless the individual has Medicare, a referral to the HIM—also known as the Federally Facilitated Marketplace (FFM)—must be made when an individual's coverage is cancelled so that the individual's eligibility for the Advance Premium Tax Credit (APTC) in conjunction with a Qualified Health Plan (QHP) can be determined. If the individual's renewal was not processed in VaCMS, his case must be entered in VaCMS in order for the HIM referral to be made.
4. **Renewal Filed During the Three-month Reconsideration Period**
If the individual's coverage is cancelled because the individual did not return the renewal form (or complete an online or telephonic renewal) or requested verifications, the Affordable Care Act (ACA) requires a reconsideration period of 90 days be allowed for an individual to file a renewal or submit verifications. For MA purposes, the 90 days is counted as three calendar months. The individual must be given the entire reconsideration period to submit the renewal form and any required documentation. When the renewal or verifications are provided within the 90 day reconsideration period, process the renewal as soon as possible but at least within 30 calendar days from receipt.

The reconsideration period applies to renewals for all covered groups.

If the individual files a renewal or returns verifications at any time during the reconsideration period and is determined to be eligible, reinstate the individual's coverage back to the date of cancellation.

For individuals who were enrolled as Qualified Medicare Beneficiaries (QMB) at the time of cancellation, reinstate coverage back to the date of cancellation.

If an individual began receiving Medicare during the reconsideration period and is eligible as QMB, the QMB coverage is effective the month ***in which Medicare began***. Evaluate eligibility for the other months of the reconsideration period in other possible covered groups, including Medically Needy.

Send a Notice of Action informing him of the reinstatement, his continued coverage and the next renewal month and year. See M1520, Appendix 1 for the Renewal Process Reference Guide.

If the individual is not eligible, send a Notice of Action indicating the correct reason for the cancellation (e.g. countable income exceeds the limit). Renewal forms filed after the end of the reconsideration period are treated as reapplications. Accept the form and request any additional information needed to determine the individual's eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 10

D. Special Requirements for Certain Covered Groups

1. Pregnant Woman

Do not initiate a renewal of eligibility of a pregnant woman in other covered group during her pregnancy. Eligibility ends effective the last day of the 12th month following the month in which her pregnancy ends.

The renewal for a woman who has been enrolled in post-partum coverage will be due the 12th month following the month in which the pregnancy ended. The partial review “batch process” will attempt to re-evaluate the coverage at the end of the 12 month of postpartum coverage.

If the woman does not meet the definition and/or the income requirements for another full-benefit covered group, determine her eligibility in the limited benefit Plan First covered group using the eligibility requirements in M0320.302.

2. Newborn Child Turns Age 1

A renewal must be completed for a child enrolled as a Newborn Child Under Age 1 before Medicaid Enterprise System (MES—formerly the Medicaid Management Information System [MMIS]) cut-off in the last month in which the child meets the Newborn Child Under Age 1 covered group and must include:

- SSN or proof of application
- verification of income
- verification of resources for the MN child.

The ex parte process may be used if appropriate.

3. Child Under Age 19—Income Exceeds FAMIS Plus Limit

When an enrolled FAMIS Plus child no longer meets the FAMIS Plus income limits and there is not an LIFC parent on the case, evaluate the child for the FAMIS, using the eligibility requirements in chapter M21. If the child is eligible for FAMIS, send the family an Advance Notice of Proposed Action that Medicaid will be cancelled effective the last day of the month in which the 10-day advance notice expires and the FAMIS coverage will begin the first day of the month following the Medicaid cancellation. Use cancel reason “042” when the child loses eligibility in Medicaid and is reinstated in FAMIS and there is no break in coverage.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date October 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 10a

- 4. Child Receiving LTC Services Turns 18**

A child enrolled in the F&C 300% of SSI covered group no longer meets the covered group upon turning 18, unless he meets another F&C definition (e.g. pregnant woman or parent of a dependent child). A referral to Disability Determination Services (DDS) must be made at least 90 calendar days prior to the child's 18th birthday to allow the disability determination to be made prior to the child's 18th birthday.
- 5. FAMIS Plus Child Turns Age 19**

When a FAMIS Plus child turns age 19, redetermine the child's continuing Medicaid eligibility in other covered groups.

If information in the case record indicates that the child is disabled or may be disabled, verify the child's SSI benefits through SVES or SOLQ-I. If the child does not receive SSI, complete a referral to DDS following the procedures in M0310.112. The referral to DDS must be made at least 90 calendar days prior to the child's 19th birthday to allow the disability determination to be made prior to the child's 19th birthday.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 11

Do not use change transactions to move a child between Medicaid and FAMIS. If the child is not eligible for FAMIS, the worker must provide an opportunity for the child to be evaluated as medically needy (MN) **prior** to sending an advance notice and canceling the child's Medicaid coverage

If the child does not meet the definition for another covered group, determine the child's eligibility in Plan First using the eligibility requirements in M0320.302. If the child is eligible for Plan First, reinstate coverage in Plan First and send the Advance Notice of Proposed Action indicating that he has been enrolled in Plan First. On the notice, state that if he does not wish to remain covered by Plan First, to contact the eligibility worker and request that the coverage be cancelled. Include a Plan First Fact Sheet, available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/References>, with the Advance Notice of Proposed Action.

6. **IV-E FC & AA Children and AA Children With Special Needs for Medical or Rehabilitative Care**
The renewal of Medicaid coverage for Title IV-E foster care or adoption assistance children and non-IV-E adoption assistance children with special needs for medical or rehabilitative care requires only the following information:
 - verification of continued IV-E eligibility status or non-IV-E special needs for medical or rehabilitative care status,
 - the current address, and
 - any changes regarding third-party liability (TPL).
7. **Child Under 21 Turns Age 21**
When an individual who is enrolled in the Child Under Age 21 covered group turns 21, redetermine his continuing Medicaid eligibility in other covered groups, including Plan First.

This information can be obtained from agency records, the parent or the Interstate Compact office from another state, when the child's foster care or adoption assistance agreement is held by another state. A renewal form is not required. The information must be documented in the case record.
8. **Foster Care Child in an Independent Living Arrangement Turns Age 18**
A foster care child who is in an Independent Living arrangement with a local department of social services (LDSS) no longer meets the definition of a foster care child when he turns 18. Determine the child's eligibility in the Former Foster Care Children Under Age 26 Years covered group.
9. **Breast and Cervical Cancer Prevention and Treatment Act (BCCPTA)**
The BCCPTA Redetermination Form (#032-03-653) is used to redetermine eligibility for the BCCPTA covered group. The form is available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>. The enrollee must provide a statement from his or her medical provider on the renewal form or else a separate written statement verifying continued treatment for breast or cervical cancer. There are no Medicaid financial requirements for the BCCPTA covered group.
10. **Hospice Covered Group**
At the annual renewal for an individual enrolled in the Hospice covered group (AC 054), the worker must verify the enrollee's continued election and receipt of hospice services, in addition to determining continued Medicaid eligibility.
11. **Qualified Individuals**
Funding for the QI covered group became permanent in 2015; the QI covered group is subject to the same policies regarding renewals as other ABD covered groups.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.200	Page 12

**12. FAMIS Renewal
Period Extension
For Declared
Disaster Areas**

Effective January 1, 2017, if the Governor or the Federal Emergency Management Agency (FEMA) declares Virginia or any area in Virginia to be a disaster area, children enrolled in FAMIS who reside in the declared disaster area may be granted a 90-day extension of the continuous coverage period before their next renewal is due. The next 12-month continuous eligibility period begins the month after the renewal completion date.

The extension of the renewal period applies only to children in a declared disaster area (1) for whom an ex parte renewal cannot be completed and (2) who do not return a renewal form or complete an online or telephonic renewal prior to the renewal due date. The three-month reconsideration period outlined in M1520.200 C.4 also applies to these children if their coverage is cancelled upon not completing a renewal at the end of the 90-day extension period.

E. LTC

The ex parte renewal process is used for institutionalized individuals who receive SSI and have no countable real property. It can also be used for F&C enrollees subject to MAGI methodology when the local agency has access to on-line information for verifications necessary to determine ongoing eligibility and/or income verifications obtained for other benefit programs.

ABD, as well as F&C individuals over age 18, in the 300% of SSI covered group LTC must complete a contact-based renewal due to the resource requirement.

The patient pay must be updated at least every 12 months, even if there is no change in patient pay. Send the provider a DMAS-225 when there has been a change in circumstances resulting in a change in eligibility. If there has been no change in circumstances, do not send a DMAS-225 to the provider.

**F. Incarcerated
Individuals**

Incarcerated individuals who have active Medicaid are subject to annual renewals. Renewals for individuals in Department of Corrections and Department of Juvenile Justice facilities will be handled with assistance through the designated facility staff liaison.

- For individuals incarcerated in DOC facilities, send the renewal form and related correspondence to the DOC Health Services Reimbursement Unit, 6900 Atmore Drive, Richmond, Virginia 23225.
- For individuals in DJJ facilities, send the renewal form and related correspondence to the DJJ Re-entry Services Unit, 600 E. Main Street, Richmond VA 23219.
- For individuals in regional or local jails, send the renewal form and related correspondence to the individual or his authorized representative.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date October 2017
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.300	Page 12a

Although benefits administered by the Social Security Administration are suspended while an individual is incarcerated, a disabled individual continues to meet the definition of a disabled individual while incarcerated.

M1520.300 MA CANCELLATION OR SERVICES REDUCTION

A. Policy

At the time of any action affecting an individual's MA coverage, federal regulations in 42 CFR 431.206 through 431.214 require the agency to inform every applicant or enrollee in writing

- of his right to a hearing;
- of the method by which he may obtain a hearing; and
- that he may represent himself or use legal counsel, a relative, a friend or other spokesperson.

Send any notices and other correspondence to the authorized representative, if one has been designated.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.300	Page 13

B. Procedures

1. Change Results in Adverse Action

Following a determination that eligibility no longer exists or that the enrollee's Medicaid services must be reduced, the Advance Notice of Proposed Action, available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, or system-generated advance notice must be sent to the enrollee at least 10 days plus one day for mail, before action is taken to cancel or reduce Medicaid coverage.

If the action to cancel or reduce benefits cannot be taken in the current month due to *MES* cut-off, then the action must be taken by *MES* cut-off in the following month. The Advance Notice of Proposed Action must inform the enrollee of the last day of Medicaid coverage.

Unless the individual has Medicare, a referral to the HIM must be made when coverage is cancelled. The notice must state that the individual has been referred to the HIM for determination of eligibility for the APTC.

2. Enrollee Appeals Action

If the enrollee requests an appeal hearing before the effective date of the action, subject to approval by the DMAS Appeals Division, the enrollee may choose to have eligibility continued at the current level of services until a decision is reached after a hearing. The DMAS Appeals Division will notify the local agency that the enrollee's coverage must be reinstated during the appeal process. **Do not reinstate coverage until directed to do so by the Department of Medical Assistance Services (DMAS) Appeals Division.**

If the decision is adverse to the recipient, the amount Medicaid paid on the services being appealed that were received by the recipient during the continuation is subject to recovery by DMAS.

Medicaid coverage at the prior level is not continued when a request for appeal is filed on or after the effective date of the action.

When notification is received from DMAS that the agency's proposed adverse action was sustained, the recipient's eligibility must be terminated effective the date of the receipt of that letter. No further advance notice to the recipient is necessary since he/she is also informed of DMAS' decision.

3. Death of Enrollee

The eligibility worker must take the following action when it is determined that an enrollee is deceased:

If the enrollee has an SSN, the worker must verify the date of death. A match with Social Security Administration data occurs when the individual's information is sent through the Hub in VaCMS.

Alternatively, the worker can run a SVES or SOLQ-I request to verify the date of death. SVES will display an "X" and the date of death in the "SSN VERIFICATION CODE" field on Screen 1.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date January 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.300	Page 14

If the recipient does not have an SSN, or if the Hub, SOLQ-I, or SVES does not return information showing that the recipient is deceased, contact the parent/caretaker relative or authorized representative to obtain the date of death. Information from a medical professional/facility is also acceptable.

The worker must document the VaCMS case record. Send adequate notice of cancellation to the estate of the enrollee at the enrollee's last known address and to any authorized representative(s) using the Notice of Action on Medicaid.

Cancel the enrollee's coverage, using the date of death as the effective date of cancellation.

4. Enrollee Enters an IMD

*When an enrollee enters an institution for the treatment of mental diseases (IMD), **do not** cancel coverage. DMAS will coordinate with the Centers for Medicare and Medicaid Services (CMS) to ensure that no unauthorized FFP occurs*

If an enrollee becomes incarcerated, a partial review must be completed to determine if he continues to meet the requirements for coverage in a full-benefit CN covered group. If he continues to be eligible, cancel the existing coverage and reinstate in AC 109 for ongoing coverage the date of incarceration. If the individual no longer meets the requirements for a full benefit CN covered group, cancel the coverage, effective the day prior to entering incarceration. See M0140.000.

5. End of Spenddown Period

When eligibility terminates at the end of a six-month spenddown period, advance notice is not required. The individual is notified of the limited period of spenddown eligibility on the Notice of Action sent at the time the spenddown application is approved. Explanation of this limitation and information relative to re-application is provided at the time of the spenddown eligibility determination and enrollment.

6. Reason "012" Cancellations

Cancellations by DMAS staff due to returned mail are reported in the monthly System Cancellation Report (RS-O-112) available in the Data Warehouse Medicaid Management Reports. The report is issued between the 21st and 25th day of each month and is to be monitored so that appropriate follow up may be made.

When information is received from DMAS that a case is canceled for cancel reason "012", the local social services department must determine if the cancellation is valid. When cancellation is not valid, the case must be re-enrolled immediately.

When the cancellation is valid, the local department must mail the individual adequate notice of cancellation using the Notice of Action. Adequate notice consists of specifying the date the cancel action took place, which is the date the notice is mailed, in the section marked "Other" on the notification form.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.400	Page 15

7. Enrollee Requests Cancellation

An enrollee may request cancellation of his and/or his children's medical assistance coverage at any time. The request can be verbal or written. A written withdrawal request must be placed in the case record. A verbal request for withdrawal can be accepted only from the enrollee or case head, or his authorized representative. A verbal request must be documented in the case record with the date and time the withdrawal request was received, the name of the person who made the withdrawal request, and the signature and title of the agency staff person who took the call.

When the enrollee requests cancellation of Medicaid, the local department must send adequate notice using the Notice of Action to the enrollee no later than the effective date of cancellation.

On the notice:

- check the "other" block and list the reason as "Medicaid coverage cancelled at the enrollee's request,"
- include the effective date of cancellation and instruct the enrollee to discontinue using the card after that date, and
- instruct the enrollee to retain the Medicaid card for future use in case coverage is reinstated within the next 12 months (the system will generate a new card after 12 months).

M1520.400 EXTENSIONS OF MEDICAID COVERAGE

A. Policy

Medicaid families may be eligible for an extended period of Medicaid coverage when the family meets all the requirements for the Low Income Families with Children (LIFC) covered group except income.

LIFC families who received Medicaid in three of the last six months and who became ineligible for Medicaid due to increased income from spousal support may be eligible for a four-month extension.

LIFC families who received Medicaid in three of the last six months and who became ineligible for Medicaid due to an increase in earnings may be eligible for a twelve-month extension. Earnings could increase because of a new job, a raise in the rate of pay or more hours are being worked.

Prior to evaluating a child for the Medicaid extensions, review the child's eligibility in the Child Under Age 19 (FAMIS Plus) covered group. If he is eligible, update his renewal date. If the child is ineligible as a Child Under Age 19, evaluate his eligibility for the Medicaid extensions.

MAGI methodology for the formation of households does not apply to individuals in Extended Medicaid. The family unit policies in M0520 apply to Extended Medicaid.

If ineligible for the Medicaid extensions, *individuals must be evaluated for eligibility other covered groups or for FAMIS, if applicable. If a child under 18 is ineligible for FAMIS, the child must be*

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.401	Page 16

given an opportunity for a medically needy determination prior to the worker taking action to cancel the Medicaid coverage and unless the child has Medicare, a referral to the HIM must be made.

B. Procedure

The policy and procedures for the four-month extension are in section M1520.401 below.

The policy and procedures for the twelve-month extension are in section M1520.402 below.

M1520.401 FOUR-MONTH EXTENSION

A. Policy

An LIFC Medicaid family is entitled to four additional months of Medicaid coverage after the family loses Medicaid LIFC eligibility when the following conditions are met:

- The parent or caretaker-relative received Medicaid as LIFC in at least three of the six months immediately preceding the month in which they became ineligible for LIFC;
- The parent or caretaker-relative lost eligibility solely or partly due to receipt of or increased **countable** spousal support income; and
- All other Medicaid eligibility factors except income are met.

Effective January 1, 2019, alimony or spousal support is not countable as income. Alimony received prior to January 1, 2019 is countable.

An individual whose divorce decree was finalized prior to January 1, 2019, has the option with the IRS to adopt the new rule by modifying the divorce agreement. A copy of the modified divorce agreement must be provided to the eligibility worker; otherwise, the alimony or spousal support continues to be countable.

B. Procedures

1. Received in Error

For purposes of this subsection, "received Medicaid as LIFC" does not include received Medicaid erroneously. Therefore, a family who received Medicaid erroneously during three or more of the six months before the month of ineligibility does **not** qualify for the Medicaid extension *and must be evaluated for eligibility in other covered groups.*

2. New Family Member

A new member of the family, other than a newborn, is eligible for Medicaid under this provision if he/she was a member of the family in the month the unit became ineligible for LIFC Medicaid. A newborn born to an eligible member of the family at any time during the 4-month extension is eligible under this provision because the baby meets the CN newborn child under age 1 covered group.

3. Moves Out of State

Eligibility does not continue for any member of the family who moves to another state.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.402	Page 17

4. Coverage Period and AC

Medicaid coverage will continue for a period of four months beginning with the month in which the family became ineligible for LIFC Medicaid because of the receipt of or increase in spousal support. The AC for the enrollees in the family receiving the four-month extension is "081" for an LIFC family with one parent or caretaker-relative or "083" for a two-parent family.

5. Case Handling

Prior to the end of the fourth month of the extension, evaluate the individuals in the family for continuing Medicaid eligibility. Cancel coverage for any individuals in the family who are no longer eligible and send advance notice of the cancellation. Individuals who meet a MN covered group must be given an opportunity for an MN determination prior to the worker taking action to cancel the Medicaid coverage and unless the individual has Medicare, a referral to the HIM must be made so that the individual's eligibility for the APTC in conjunction with a QHP can be determined.

M1520.402 TWELVE-MONTHS EXTENSION

A. Policy

An LIFC Medicaid family is entitled to six additional months, with possible extension to twelve months, of Medicaid coverage after they lose Medicaid LIFC eligibility when the following conditions are met:

- The parent or caretaker-relative received Medicaid as LIFC in at least three of the six months immediately preceding the month in which they became ineligible for LIFC;
- The parent or caretaker-relative lost eligibility solely or partly due to receipt of or increased income from earnings; and
- All other Medicaid eligibility factors except income are met.

The family consists of those individuals included in *the non-MAGI F&C family unit* as defined in M0520.100 at the time that the LIFC Medicaid eligibility terminated. *It includes non-married parents with a child in common. Because non-married parents have different MAGI LIFC households, it is possible that one parent will remain eligible in the LIFC covered group even though the other is no longer eligible as LIFC and must be evaluated for Extended Medicaid. The LIFC parent's income is counted in the Extended Medicaid family unit per M0520.100.*

The family unit also includes individuals born, adopted into, or returning to the family after extended benefits begin who would have been considered a member of the family at the time the LIFC Medicaid eligibility terminated.

The earned income received by a member of the family unit added after the loss of LIFC eligibility must be counted in determining the family's gross income.

B. Eligibility Conditions

The following conditions must be met:

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.402	Page 18

1. **Received LIFC Medicaid in Three of Six Months**
The family received LIFC Medicaid in at least three of the six months immediately before the month in which the family became ineligible for LIFC. A family who received Medicaid erroneously during three or more of the six months before the month of ineligibility **does not** qualify for the Medicaid extension. Months during which the family received Extended Medicaid are not considered months in which the family received LIFC Medicaid, *and the family must be evaluated for eligibility in other covered groups.*
 2. **Cancel Reason**
LIFC Medicaid was canceled solely because of:
 - the parent's or caretaker/relative's new employment,
 - the parent's or caretaker/relative's increased hours of employment, or the parent's or caretaker/relative's increased wages of employment.
 3. **Has A Child Living in Home**
There continues to be at least one child under age 18 or if in school, a child who is expected to graduate before or in the month he turns 19, living in the home with the parent or caretaker/relative.
 4. **No Fraud**
The family has not been determined to be ineligible for LIFC Medicaid at any time during the last six months in which the family received LIFC Medicaid because of fraud.
- C. Entitlement & Enrollment**
- The AC for enrollees in the family receiving the twelve-month extension is "081" for an LIFC family with one parent or caretaker-relative or "083" for a two-parent family.
- Entitlement does not continue for any member of the family who moves to another state.
1. **Determining Extension Period**
 - a. **Establishing Initial Month of Eligibility**

Medicaid coverage will continue for six months beginning with the first month following the month in which the family is no longer eligible for LIFC Medicaid because of excess income due to the increased earnings of the parent or caretaker/relative.

If the new/increased earnings are not reported timely, or the agency does not take action timely, the extension period still begins the same month it would have begun had the new/increased earnings been reported or acted on timely.
Extension for an additional six-month period is possible if the reporting and financial requirements below are met.

For example, if the increased earnings were received in April, but were not reported or discovered until a review of eligibility in June, the 12-month extension period still begins with May. The screening period to determine if the family received LIFC Medicaid in at least three of the six months immediately preceding the month in which the family became ineligible for LIFC Medicaid is November through April.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.402	Page 19

b. Simultaneous Income Changes

In situations where a case has simultaneous income changes which cause LIFC Medicaid ineligibility, such as new or increased earned income plus an increase in spousal support, the eligibility worker must determine if the case would have been ineligible due to new or increased earnings. This requires that the eligibility worker recalculate the LIFC income eligibility only considering the increased earned income.

- 1) If the family would have been ineligible solely due to the increase in earned income, it will be considered the reason for LIFC Medicaid ineligibility and the family is eligible for the twelve-month Medicaid extension.
- 2) If, however, the family would have continued to be eligible for LIFC Medicaid if the only change had been increased earnings, the other changes which occurred simultaneously will be the reason for LIFC Medicaid ineligibility. The family is **not** eligible for the twelve-month Medicaid extension. If the reason for LIFC Medicaid ineligibility was due to the receipt of or increase in spousal support, evaluate the family's eligibility for the four-month extension in M1520.401.

2. Extension Ends

Entitlement to Medicaid under this extension terminates at the end of the first month in which there is no longer a child under 18 (or if in school, a child who is expected to graduate before or in the month he turns 19), living in the home, the family fails to comply with the reporting requirements in 1520.402 D below, or at the end of the extension period.

The individuals must be evaluated for continuing Medicaid eligibility prior to cancellation. Cancel coverage for any individuals in the family who are no longer eligible and send advance notice of the cancellation. Individuals who meet a MN covered group must be given an opportunity for an MN determination prior to the worker taking action to cancel the Medicaid coverage and unless the individual has Medicare, a referral to the HIM must be made.

D. Notice and Reporting Requirements

The Virginia Case Management System (VaCMS) generates the appropriate report forms and notices when the worker has approved extended Medicaid in the system. Instructions for managing an extended Medicaid case are contained in the "Extended Medicaid in the VaCMS" Quick Reference Guide (QRG) available in VaCMS.

1. LIFC Medicaid Cancellation Month

When LIFC Medicaid is canceled, the family must be notified of its entitlement to extended Medicaid coverage for six months, and that Medicaid coverage will terminate if the child(ren) in the home turns age 18, or turns age 19 if the child is in school and is expected to graduate before or in the month he turns 19. Use the VaCMS-generated Notice of Extended Medicaid Coverage form.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.402	Page 20

a. Notice and Instructions

The family must be instructed to retain verifications of all earnings received during each month of the extension and attach verifications of the first three-month period's earnings to the agency by the 21st day of the fourth month in the extension period. The instructions are on the Notice of Extended Medicaid Coverage and on the second page of the notice, which is the Medicaid Extension Earnings Report.

2. Third Month of Extension

In the third month of extension, the unit must be notified again that it must return the Medicaid Extension Earnings Report, with the earnings verifications attached, to the agency by the 21st of the following month (the fourth month).

This notice will be generated by VaCMS if the correct Follow-up Code and effective date of the 12-month extension are entered.

The notice will state that if the earnings report and verifications are not received by the 21st day of the fourth month, Medicaid coverage will be canceled effective the last day of the sixth month, and that the family will not be eligible for any additional Medicaid extension.

3. Fourth Month of Extension

a. Report Received Timely

If the first three-month period's report is received by the 21st day of the fourth month, and the family continues to include a child, entitlement to Extended Medicaid continues. The worker must update VaCMS when the report is received in order for Extended Medicaid to continue. No action is taken on the first three-month period's earnings.

*VaCMS will cancel coverage at **cut-off** of the sixth extension month. If the worker receives the report prior to cutoff and the family continues to include a child, reinstate the Extended coverage. If the report is not received, the agency must reopen coverage for any individuals who remain eligible in another Medicaid covered group or in FAMIS and must notify the individual of the reopened coverage.*

b. Notice Requirements

VaCMS will generate the advance notice and cancel coverage at the end of the sixth month if the initial Follow-up Code and Date were entered correctly, and the code is **not** updated because the report was not received on time. If the code was not entered correctly, the agency must manually send the Advance Notice of Proposed Action and must cancel the ineligible individual's coverage after the Medicaid cut-off date in the fifth month. The effective date of cancellation will be the last day of the sixth month in the extension period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.402	Page 21

c. Report Not Received Timely

If the first three-month period's report is not received by the 21st day of the fourth month, the family is not eligible for the additional six-month extension. Medicaid must be canceled effective the last day of the sixth month in the extension period for any individuals who are not eligible for coverage in another Medicaid covered group or for FAMIS. Individuals who meet a MN covered group must be given an opportunity for an MN determination prior to the worker taking action to cancel the Medicaid coverage and unless the individual has Medicare, a referral to the HIM must be made.

4. Sixth Month of Extension

In the sixth month of extension, the family must be notified that it must return the "Medicaid Extension Earnings Report" for the previous three-month period (the fourth through the sixth month), with the earnings verifications for those three months attached, to the agency by the 21st day of the seventh month of extension.

The notice must state that if this three-month period's report and verifications are not returned by the 21st day of the seventh month, Medicaid coverage will be canceled effective the last day of the eighth month of extension.

VaCMS will generate this notice if the Follow-up Code in the base case information is correct. If it is not correct, the agency must manually send this notice.

5. Seventh Month of Extension

a. Report Received Timely

If the second three-month period's report is received by the 21st of the seventh month, update VaCMS immediately upon receipt of the report and verifications. The family will continue to be eligible for extended Medicaid coverage unless:

- 1) no child under age 18, or if in school, a child who is expected to graduate before or in the month he turns 19, lives with the family;
- 2) the parent or caretaker/relative had no earnings in one or more of the previous three months, unless the lack of earnings was due to:
 - the parent's or caretaker/relative's involuntary lay-off,
 - the business closed,
 - the parent's or caretaker/relative's illness or injury,
 - other good cause (such as serious illness of child in the home which required the parent's or caretaker/relative's absence from work);
- 3) the family's average gross monthly **earned** income (earned income only; unearned income is not counted) less costs for child care that was necessary for the employment of the caretaker/relative, during the preceding three-month period exceeds the 185% Federal Poverty Level (FPL) appropriate to the family unit size. See M1520, Appendix 2, for the 185% FPL income limits.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.402	Page 22

b. Calculate Family's Gross Earned Income

- 1) The family's gross earned income means the earned income of all family members who worked in the preceding three-month period. "Gross" earned income is total earned income before any deductions or disregards and profit from self-employment. All earned income must be counted, including students' earned income, Workforce Investment Act (WIA) earned income, children's earned income, etc. No exclusions or disregards are allowed. Use policy in M0720.200 for determining profit from self-employment.
 - 2) child care costs that are "necessary for the caretaker/relative's employment" are expenses that are the responsibility of the caretaker/relative for child care that if not provided would prevent the caretaker/relative from being employed.
- 2) To calculate average gross monthly income:
- add each month's cost of child care necessary for the caretaker/relative's employment; the result is the three-month period's cost of child care necessary for the caretaker/relative's employment.
 - add the family unit's total gross earned income received in each of the 3 months; the result is the family's total gross earned income.
 - subtract the three-month period's cost of child care necessary for the caretaker/relative's employment from the family's total gross earned income.
 - divide the remainder by 3; the result is the average monthly earned income.
 - compare the average monthly earned income to the monthly 185% FPL for the appropriate number of family unit members (see M1520, Appendix 2).

c. Family No Longer Entitled To Extended Medicaid

If the family is not entitled to further Medicaid coverage because of one of the reasons in item M1520.402 D.5.a above, each individual's eligibility for Medicaid in another covered group or for FAMIS must be determined before canceling coverage. Individuals who meet a MN covered group must be given an opportunity for an MN determination prior to the worker taking action to cancel the Medicaid coverage and unless the individual has Medicare, a referral to the HIM must be made.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.402	Page 23

d. Family Remains Entitled To Extended Medicaid

If the family remains eligible for Extended Medicaid, no action is required until the ninth month of extension, except to be sure that the extended Medicaid information in VaCMS is up to date.

e. Report Not Received Timely

If the second three-month period's report and verifications are not received by the 21st day of the seventh month, the family's Medicaid coverage must be canceled for individuals who are not eligible for Medicaid in another covered group or for FAMIS unless the family establishes good cause for failure to report on a timely basis. Examples of good cause for failure to report timely are:

- illness or injury of family member(s) who is capable of obtaining and sending the material;
- agency failure to send the report notice to the family in the proper month of the extension.

Individuals who meet a MN covered group must be given an opportunity for an MN determination prior to the worker taking action to cancel the Medicaid coverage and unless the individual has Medicare, a referral to the HIM must be made.

VaCMS will generate the advance notice and cancel coverage if the report is not received on time and the code is not changed. Cancellation is effective the last of the eighth month of extension.

If an individual's continuing eligibility is not reviewed by the **cut-off date** of the eighth extension month and coverage is cancelled, the agency must then reopen coverage and notify the recipient if he is subsequently found eligible. If an individual remains eligible, change the individual's enrollment to the appropriate aid category before the **cut-off date** of the eighth extension month.

6. Ninth Month of Extension

In the ninth month of extension, the family must be notified that it must return the "Medicaid Extension Earnings Report" with earnings verifications attached, for the previous three-month period (seventh through ninth month) to the agency by the 21st day of the tenth month of the extension.

The notice must state that if the report and verifications are not returned by 21st day of the tenth month, Medicaid coverage will be canceled effective the last day of the eleventh month of extension.

VaCMS will generate this notice if the correct Follow-up Code is in the base case information.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2019
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.402	Page 24

7. Tenth Month of Extension

a. Report Received Timely

If the third three-month period's report is received by the 21st of the tenth month, update VaCMS immediately upon receipt of the report and verifications. The family continues to be eligible for Medicaid unless one of the items in M1520.402 D.5 above applies. Calculate the family's income using the procedures in M1520.402 D.5 above.

b. Family No Longer Entitled To Extended Medicaid

If the family is not entitled to **extended** Medicaid coverage, review each individual's eligibility for Medicaid in another category or for FAMIS. If the individual is not eligible, cancel Medicaid after sending the **Advance Notice of Proposed Action**. Cancellation is effective the last day of the eleventh month of extension. Individuals who meet a MN covered group must be given an opportunity for an MN determination prior to the worker taking action to cancel the Medicaid coverage and unless the individual has Medicare, a referral to the HIM must be made.

c. Family Remains Entitled To Extended Medicaid

If the family remains entitled to Extended Medicaid coverage, a redetermination of the family's Medicaid eligibility must be completed by the Medicaid cut-off in the twelfth month.

d. Report Not Received Timely

If the third three-month period's report and verifications are not received by the 21st of the tenth month, Medicaid coverage must be canceled for individuals who are not eligible for Medicaid in another covered group or for FAMIS unless the family establishes good cause for failure to report timely (see M1520.402 D.5 above for good cause). Individuals who meet a MN covered group must be given an opportunity for an MN determination prior to the worker taking action to cancel the Medicaid coverage and unless the individual has Medicare, a referral to the HIM must be made.

VaCMS will cancel coverage and generate the advance notice if the report is not received on time and the Follow-up Code is not changed. Cancellation is effective the last day of the eleventh month of extension.

8. Twelfth Month of Extension

Before Medicaid cut-off in the twelfth month, complete the family's redetermination. VaCMS will cancel coverage and generate the advance notice after cut-off of the twelfth month, if the Follow-up Code was updated correctly. Therefore, for any of the family members that remain eligible for Medicaid or FAMIS, the AC and the Follow-up Code must be changed before cut-off of the twelfth month.

Individuals who meet a MN covered group must be given an opportunity for an MN determination prior to the worker taking action to cancel the Medicaid coverage and unless the individual has Medicare, a referral to the HIM must be made.

Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.500	Page 24a

M1520.500 CASE TRANSFERS

A. Introduction

Applications and ongoing cases are transferred only when the individual retains residence in Virginia.

B. Nursing Facility and Assisted Living Facility (ALF)

When an individual is admitted to a nursing facility or an ALF from a community living arrangement, the case is not transferred, but remains with the Virginia locality in which the individual last lived outside of an institution. Community living arrangements do not include medical facilities, ALFs or group homes with four or more beds.

When an applicant/recipient is discharged from a nursing facility or ALF to a community living arrangement not in the Virginia locality that had responsibility for the individual's case while he was in the nursing facility or ALF, the case is transferred to the new locality.

If the local agencies involved agree the case should remain with the original agency, then the case would not be transferred.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2020
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.500	Page 25

D. Cases From Outstationed Workers

Medicaid applications taken and Medicaid cases approved by outstationed workers, such as the workers stationed at the University of Virginia (UVA) and Virginia Commonwealth University-Medical College of Virginia (VCU-MCV) hospitals, must be transferred to the LDSS where the applicant/enrollee lives. Medicaid cases and applications are **not** transferred from LDSS to outstationed workers.

1. Confirm Receipt

The receiving LDSS must confirm receipt of the case by completing the Case Record Transfer Form and returning the copy to the outstationed worker.

2. Review Eligibility

LDSS workers must review (partial review) the Medicaid eligibility determination in approved cases transferred from an outstationed worker, and must take any necessary corrective action.

3. Corrective Action

If an eligibility error(s) is found, do not send the case back. Correct the error(s), send the notice to the case head if required, and refer the case to the LDSS supervisor for possible contact with the outstationed worker's supervisor.

E. Local Agency to Local Agency

When a Medicaid applicant/enrollee (including a Medicaid CBC waiver services enrollee) moves from one locality to live in a community living arrangement (not a medical facility, an ALF, or group home with 4 or more beds) in another locality within the state of Virginia, the following procedures apply:

1. Sending Locality Responsibilities

a. Medical Assistance Case with No Other Benefit Programs Attached

The sending locality must ensure that the ongoing case is current and complete before transferring the case. If the annual renewal has been completed within the past 10 months, a partial review based on known information, as to whether or not the enrollee will meet a covered group and the income and resource limits in the new locality, must be completed before transferring the case.

If the case is in a current case action in VaCMS, the agency must complete the case action before transferring the case. If the individual applies for other benefits programs in another locality, the sending LDSS has 7 calendar days from the time they receive information indicating the individual has moved to complete the case action and transfer the case to the new locality.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.500	Page 26

If the annual renewal is due in the month the LDSS plans to transfer the case, the following month, or is overdue, the renewal must be completed before transferring the case. If the enrollee applies for other benefit programs in another locality, the sending LDSS must transfer the case to the new locality by the end of the next business day after they receive information indicating the enrollee has moved, provided the agency has not started the redetermination case action in VaCMS.

If the individual applies for other benefits in the new locality and the case is in the redetermination case action in VaCMS, the sending LDSS has 7 calendar days from the time they receive information indicating the individual has moved to complete the case action and transfer the case to the new locality. The worker will update VaCMS immediately with the new address so the information transfers over to *MES* to assure managed care continuity but will maintain ownership of the case in their FIPS until the renewal is completed.

The sending LDSS must process the renewal if a renewal or application is submitted during the reconsideration period and the enrollee indicates he has moved on the application or renewal form.

If the case is closed and in the reconsideration period, and the individual applies for other benefits programs in another locality, the case will be transferred to the new locality automatically when the new locality associates the application for other benefits with the closed case. The new locality will be responsible for processing the renewal if it is submitting within the reconsideration period.

b. Medical Assistance Case with Other Benefit Programs Attached

The sending locality must ensure that the MA program attached to the ongoing case is current and complete before transferring the case. If the annual renewal has been completed within the past 10 months, a partial review based on known information, as to whether or not the recipient will meet a covered group and the income and resource limits in the new locality, must be completed before transferring the case. If the case is in a current case action the agency must complete the case action before transferring the case.

If the annual MA renewal is due in the month the LDSS plans to transfer the case, the following month, or is overdue, the renewal must be completed before transferring the case. If the individual submits his interim or renewal for other benefit programs in another locality, the sending LDSS must transfer the case to the new locality by the end of the next business day after they receive information indicating the individual has moved, provided the agency has not started the redetermination case action in VaCMS.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.500	Page 27

If the individual submits his renewal for other benefits in the new locality and the case is in the redetermination case action, the sending LDSS has 7 calendar days from the time they receive information indicating the individual has moved to complete the case action and transfer the case to the new locality. The worker will update VaCMS immediately with the new address so the information transfers over to *MES* to assure managed care continuity but will maintain ownership of the case in their FIPS until the renewal is completed.

The sending LDSS must process the renewal if a renewal or application is submitted during the reconsideration period and the individual indicates he has moved on the application or renewal form.

If the MA is closed and in the reconsideration period, and the individual submits a renewal for other benefit programs in another locality, the sending LDSS will transfer the case to the new locality and the new locality will be responsible for processing the renewal if it is submitted within the reconsideration period.

c. Transfer Pending Medical Assistance Applications

Pending applications or cases in Intake/Screening in VaCMS must be transferred to the new locality for an eligibility determination.

d. Foster Care & Adoption Assistance

Foster care and adoption assistance Medicaid cases are not transferred unless custody or responsibility for services and/or payment is transferred.

e. Sending Transferred Cases

If the renewal or the partial review indicates that the enrollee(s) will continue to be eligible for Medical Assistance in the new locality, the sending locality must update the enrollment system. Transfer the electronic case, and if applicable, send the additional case record materials to the enrollee's locality of residence with a completed Case Record Transfer Form.

Required Document Management Imaging System (DMIS) items must be uploaded to VaCMS before case transfer. Document within VaCMS to indicate if there are documents uploaded to DMIS and/or additional case record materials outside of VaCMS. If additional case record materials exist, the materials and a completed Case Record Transfer Form must be sent by certified mail, delivered personally and a receipt obtained or, at the agency's discretion, the case may be sent via the courier pouch.

If the annual renewal or the partial review finds that eligibility no longer exists for one or all enrollees in the case, the agency must take the necessary action, including advance notice to the individuals, to cancel the ineligible individuals' coverage.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2017
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.500	Page 28

**2. Receiving
Locality
Responsibilities**

a. Confirm Receipt

The receiving agency must confirm receipt of the additional case record materials by completing the Case Record Transfer Form and returning the copy to the sending agency. If VaCMS indicates no additional case record materials, no follow up action is required.

b. Process Pending Applications

When a pending application is transferred, the receiving agency makes the eligibility determination and takes all necessary action, including sending the notice and enrolling eligible individuals.

c. Review Eligibility

LDSS workers must review (partial review) the Medicaid eligibility determination for cases transferred from other LDSS and must take any necessary corrective action.

d. Corrective Action

If an eligibility error(s) is found or the case is overdue for renewal, do not send the case back. Correct the error(s), and/or complete the renewal, send the notice to the case head if required, and refer the case to the LDSS supervisor for possible contact with the sending agency's supervisor.

**3. Decision Pathway
for Case Transfers**

*When an enrollee reports a change of address, use the steps below as guidance. **If a case is held before transfer to complete an action, immediately update the address to ensure managed care continuity.***

a. Enrollee Reports Change of Address

Step 1:

Is the case current and complete? This means the case is not in any case action and the renewal has been completed within the last 10 months.

-If Yes, go to Step 2.

-If No, go to Step 4.

Step 2:

Has the person applied for other programs?

-If yes, the worker has 7 calendar days to complete a partial review and transfer the case.

-If no, go to Step 3.

Step 3:

Has the person submitted an interim or renewal for other programs?

-If yes, the worker has by the end of the next business day to transfer the case.

-If no, the worker has 30 days to transfer the case per change policy.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2017
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.500	Page 29

*Step 4:**What is incomplete?**-If the case is in a case action, go to Step 5.**-If the case is coming due, due or overdue for a renewal, go to Step 6.**Step 5:**Has the person applied for other programs?**-If yes, the worker has 7 calendar days to complete the action, a partial review, and transfer the case.**-If no, the worker has 30 days to transfer the case per change policy.**Step 6:**Has the person submitted an application, interim or renewal for other programs?**-If yes, go to step 7.**-If no, the worker must complete the renewal before transferring the case.**Step 7:**Is the case in redetermination action?**-If yes, the worker has 7 calendar days to complete the action, a partial review, and transfer the case.**-If no, the worker has by the end of the next business day to complete the action and transfer the case.***b. Enrollee Submits Renewal During Reconsideration Period That Includes a Change of Address:***Step 1:**Are there other benefit programs other than MA active on the case?**-If yes, go to Step 2.**-If no, go to Step 4.**Step 2:**Has the person submitted an interim or renewal for other programs?**-If yes, go to Step 3.**-If no, the worker must complete the renewal before transferring the case.**Step 3:**Is the case in any action?**-If yes, the worker has 7 calendar days to complete the action, a partial review, and transfer the case.**-If no, the worker has by the end of the next business day to complete the action and transfer the case.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date April 2022
Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.500	Page 30

Step 4:

Has the person submitted an application for other programs?

-If yes, the worker has 7 calendar days to complete a partial review and transfer the case.

-If no, the worker must complete the renewal before transferring the case.

F. Spenddown Cases

Cases in spenddown status (denied or canceled and placed on a spenddown) must be transferred when the applicant notifies the agency that he/she has moved to a new Virginia locality.

1. Sending Locality Responsibilities

Within 10 working days of notification that the applicant has moved, the case must be transferred to the new locality, following the policies in M1520.500 E.1.e. The sending agency must:

- inform the applicant of the receiving agency's name, address, and telephone number;
- deduct all known spenddown items from the spenddown balance on the worksheet before sending the case record.

2. Receiving Locality Responsibilities

The receiving locality must review the case following the policies in M1520.500 E.2.

G. Receiving LDSS Case Management Procedure

To identify and manage transferred Medicaid cases, use the report titled "Caseworker Alpha Case/Enrollee Listing." This report is posted in the Data Warehouse Medicaid Management Reports. It is updated on or about the 22nd of each month. The LDSS can also use the Case Assignment function in VaCMS to view current caseloads.

M1550.000 DBHDS FACILITIES

M1550.100 GENERAL PRINCIPLES

A. Introduction

This subchapter contains a list and a brief description of the DBHDS facilities (M1550.200).

Prior to July 1, 2020, the Virginia Department of Social Services (VDSS) had eligibility workers, called Medicaid Technicians, located in Department of Behavioral Health and Developmental Services (DBHDS) facilities to determine the patients' eligibility for Medicaid. On July 1, 2020, VDSS suspended operations of the Medicaid Technicians.

Effective July 1, 2020, local DSS will process applications submitted by patients of DBHDS facilities and maintain cases for enrolled individuals who reside in DBHDS facilities.

M1550.200 DBHDS FACILITIES

A. Introduction

Three types of medical facilities are administered by DBHDS: training centers, psychiatric hospitals, and a general hospital with nursing facility beds. Below is a brief description of each type of facility.

1. South-eastern Virginia Training Center

Southeastern Virginia Training Center in Chesapeake is an institution and medical center for individuals diagnosed with an intellectual or developmental disability. Some patients may be employed and have earned income. Patients of any age may be Medicaid eligible if they meet all nonfinancial and financial Medicaid eligibility requirements.

2. Psychiatric Hospitals

Psychiatric hospitals are medical facilities – institutions for the treatment of mental diseases (IMDs) – which provide care and services to mentally ill patients. There are two types of psychiatric hospitals: intensive psychiatric and psychiatric/chronically mentally ill. These hospitals may have patients of any age, although two of them are dedicated to geriatric patients and one serves only adolescents.

Manual Title Virginia Medical Assistance Eligibility	Chapter M15	Page Revision Date July 2020
Subchapter Subject M1550 DBHDS FACILITIES	Page ending with M1550.300	Page 2

Federal regulations in 42 CFR 435.1008 prohibit federal financial participation (FFP) in most Medicaid services provided to patients residing in a psychiatric hospital unless they are:

- under age 21 years (if treatment began before age 21 and continues, they may be eligible up to age 22), or
- age 65 years or older,

and they meet all non-financial and financial Medicaid eligibility requirements.

An individual who is age 22 or over, but under age 65 and who is enrolled in a Medicaid at the time of admission to an IMD may remain enrolled in Medicaid. Do not cancel coverage. The Department of Medical Assistance Services (DMAS) will coordinate with the Centers for Medicare and Medicaid Services (CMS) to ensure that no unauthorized FFP occurs.

The following are psychiatric hospitals, offering differing levels of care:

Eastern State Hospital – Williamsburg

Central State Hospital – Petersburg

- c. Western State Hospital – Staunton
- d. Northern Virginia Mental Health Institute – Falls Church
- e. Southern Virginia Mental Health Institute – Danville
- f. Southwestern Virginia Mental Health Institute – Marion
- g. Piedmont Geriatric Hospital – Burkeville
- h. Catawba Hospital – Catawba
- i. Commonwealth Center for Children and Adolescents (CCCA) – Staunton (formerly Dejarnette Center)

CCCA is a psychiatric hospital for adolescents between the ages of 4 and 18. Children are provided schooling, counseling and medication. Most children have not been determined disabled. A child in CCCA can be Medicaid-eligible if the child meets all nonfinancial and financial Medicaid eligibility requirements.

2. General Hospital

General hospitals are medical facilities which provide care and services to acutely physically ill patients in the DBHDS facilities. The general hospitals may have patients of any age. There are general hospital acute care units within Eastern State and Western State Hospitals, and the Hiram Davis Medical Center general hospital located on the campus of Central State Hospital in Petersburg. Hiram Davis provides medical and surgical treatment for patients from any DBHDS facility. Hiram Davis also has some beds certified for nursing facility level of care.

Patients in the general hospitals may be Medicaid eligible if they meet all non-financial and financial Medicaid eligibility requirements.

M1600.00 APPEALS PROCESS

M1610.100 PURPOSE AND SCOPE

A. Legal Base

The Social Security Act requires that the State Plan for Medical Assistance provide individuals affected by the administration of the Medical Assistance Program an opportunity for a fair hearing. The act establishes the right of any individual to appeal and receive a fair hearing before the administering agency, the Department of Medical Assistance Services (DMAS), when DMAS or any of its designated agents:

- takes an action to terminate, deny, suspend, or reduce benefits,
- fails to take an application for medical assistance,
- fails to act on an application for medical assistance with reasonable promptness, or
- takes any other action that adversely affects receipt of medical assistance.

This chapter applies to client appeals resulting from eligibility determinations made by the Virginia Department of Social Services, as well as its local offices. It also applies to eligibility determinations made by the Department of Medical Assistance Services and its agents, including Cover Virginia.

Many Medicaid members are enrolled with a Managed Care Organization (MCO). The MCO appeals process differs from the Eligibility appeals process and the procedures contained within this chapter do not apply to MCO appeals.

B. Participants

The DMAS Appeals Division provides the Hearing Officer who makes arrangements for the fair hearing. The Appeals Division is separate and apart from operational divisions and units within and outside of DMAS. The Division provides a neutral forum for appeals. The Hearing Officer is an impartial decision-maker who will conduct hearings, decide on questions of evidence, procedure and law, and render a written final decision. The Hearing Officer is one who has not been directly involved in the initial adverse action which is the issue of the appeal.

The *Agency or Contractor* taking the action being appealed and the appellant (the individual appealing some aspect of entitlement to medical assistance or its scope of services) or their representative must participate in the hearing. Most hearings will be conducted by telephone.

Appeals that result from a self-directed application in the eligibility and enrollment system are handled by the local department of social services (LDSS) that houses *processed* the application.

C. *Ex Parte* Communication

***Ex parte* communication with the Hearing Officer is strictly prohibited.** *Ex parte* communication is any off-the-record communication (oral or written) between the Hearing Officer and an interested party outside the presence of the other parties to the proceeding during the life of the appeal proceeding.

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1620.100	Page 2

The Hearing Officer cannot discuss the substantive issues of an appeal with anyone outside of the hearing. Therefore, it is not appropriate to contact the Hearing Officer to discuss the Agency's action prior to or after the hearing.

Any information provided to the Hearing Officer must be provided to all parties of the proceeding. However, as noted in M1620.100, it is appropriate to notify all parties to the appeal when an action is taken by an Agency to resolve the issue of the appeal. Communication is also allowed for *administrative* reasons such as scheduling hearings, canceling hearings, and indicating a desire to withdraw an appeal.

D. Notification and Rights

At the time of application or redetermination, and at the time of any action or proposed action affecting eligibility for medical assistance, medical services or patient pay, every applicant for and *enrollee* of medical assistance shall be informed in writing of the right to a hearing. Appellants shall also be notified of the method by which they may obtain a hearing, and of their right to represent themselves at the hearing or to be represented by an authorized representative such as an attorney, relative, friend, or other spokesperson.

M1620.100 LOCAL AGENCY CONFERENCE

A. Definition and Scope

The Local Agency Conference is an informal process outside of the standard appeal process and does not involve the DMAS Appeals Division. At the conference, the Agency must:

- *give the applicant/enrollee an explanation of the action;*
- *allow the applicant/enrollee to present any information to support their disagreement with the action; and*
- *allow the applicant/enrollee to represent themselves or be represented by an authorized representative such as a legal counsel, a friend, or a relative.*

B. Time Limits

A dissatisfied applicant or enrollee must be given the opportunity to request a Local Agency Conference. If a conference is requested, it must be scheduled within 10 business days of receiving the request.

C. The Conference and Right to Appeal

The Local Agency Conference must not be used as a barrier to the individual's right to a fair hearing. Participation in a conference does not extend the 30-day time limit for requesting an appeal.

D. Failure to Request a Conference

The applicant's or enrollee's failure to request a conference does not affect the right to appeal within 30 days of the Notice of Action on Benefits and does not affect the right to continued eligibility if the appeal is requested to the DMAS Appeals Division prior to the effective date of the action.

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1630.100	Page 3

E. Decision Notification

The Local Agency Conference may or may not result in a change in the Agency's decision to take the action in question; however, an Agency may reverse its decision at any time between making the original decision and when a decision is rendered by the Hearing Officer.

If the Agency decides not to take the adverse action indicated on the notice, the Agency must inform the appellant in writing. The Agency must send a new notice regarding the changed action. The Agency must send a copy of the new notice to the DMAS Appeals Division.

If the Agency's decision is to stand by its action, the applicant/enrollee must be informed, but written notice of this decision is not required.

M1630.100 APPEAL REQUEST PROCEDURES

A. Appeal Definition

An appeal is a request for a fair hearing. The request must be a clear expression by an applicant or enrollee, their legal representative (such as a guardian, conservator, or person having power of attorney), or authorized representative acting at *their* request, of a desire to present their case to a higher authority.

B. Appeal Request

An applicant may submit an appeal using a "Virginia Medicaid/FAMIS Appeal Request Form," which is available from DMAS at <https://www.dmas.virginia.gov/appeals/>. Applicants may also write their own letters to request an appeal. The DMAS Appeals Division also accepts telephonic appeal requests.

C. How to File an Appeal Request

- 1. Electronically. Via the Appeals Information Management System (AIMS) portal at <https://www.dmas.virginia.gov/appeals/> or email an appeal request to appeals@dmas.virginia.gov**
- 2. By fax.** Fax an appeal request to DMAS at **(804) 452-5454**
- 3. By mail or in person.** Send or bring an appeal request to:
Department of Medical Assistance Services
Appeals Division
600 East Broad Street
Richmond, Virginia 23219
- 4. By phone.** Call the Appeals Division at **(804) 371-8488 (TTY: 1-800-828-1120)**.

C. Assuring the Right to Appeal

The right to appeal must not be limited or interfered with in any way. When requested to do so, the Agency must assist the applicant/enrollee in preparing and submitting a request for a fair hearing. *The Agency may not discourage an applicant/enrollee from requesting an appeal and may not pressure an appellant to withdraw an appeal that they have already filed.*

D. Appeal Time Standards

A request for an appeal must be made within 30 days of receipt of notification that Medicaid coverage or medical services has been denied, terminated, reduced, adversely affected, or that it has not been acted upon with reasonable promptness. Notification is presumed received by the applicant/enrollee within five days of the date the notice was mailed, unless the applicant/enrollee demonstrates that the notice was not received in the five-day period through no fault of his/her own.

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1640.100	Page 4

An appeal request shall be deemed to be filed timely if it is mailed, faxed, electronically transmitted, or otherwise delivered to the DMAS Appeals Division before the end of last day of filing (30 days plus five mailing days after the date the Agency mailed the notice of adverse action). The date of filing will be determined by:

- the postmark date,
- the date of an internal DMAS receipt date-stamp, or

the date the request was faxed or hand-delivered.

In computing the time period, the day of the act or event from which the period of time begins to run shall be excluded, and the last day included. If the time limit would expire on a weekend or state or federal holiday, it shall be extended until the next regular business day.

The DMAS Appeals Division will, at its discretion, grant an extension of the time limit for requesting *an appeal* if failure to comply with the time limit is due to a good cause such as illness of the appellant or their representative, failure to have been notified of the right to appeal, delay due to the postal service or to an incorrect address, or other unusual or unavoidable circumstances.

M1640.100 CONTINUED COVERAGE PENDING APPEAL DECISION

A. Appeal Validation

Following receipt of a written request for a hearing, the DMAS Appeals Division will determine whether the request *is valid*. A *valid* appeal is one that *involves* an action over which the DMAS Appeals Division has hearing authority, and that is received within the required time limit or extended time limit. During the process of validating an appeal request, a representative of the DMAS Appeals Division may contact the Agency to request a copy of the notice of the adverse action. Upon receipt of such a request, the Agency must immediately send a copy of the notice to the DMAS Appeals Division.

When an appeal is determined to be valid, the DMAS Appeals Division will send official notification to the Agency and identify the issue and Hearing Officer.

B. Coverage May Continue

When an appeal is received and validated, the DMAS Appeals Division decides if Medicaid coverage must continue and notifies the Agency. The Agency should not continue coverage due to the appeal until it has been contacted by the Appeals Division. Upon being informed, by telephone or correspondence, that the enrollee is eligible to receive continued coverage, the Agency must reinstate coverage immediately.

An enrollee's Medicaid coverage must continue until a final appeal decision is made when an appeal hearing is requested prior to the effective date of the action stated on the *Notice of Action on Benefits*, or when the appeal is requested after the effective date but within 10 days of the *Notice of Action on Benefits*.

In the case of a patient pay adjustment, the patient pay obligation must return to the amount that was effective prior to the change shown on the Notice of Obligation for Long Term Care Costs that is the subject of the appeal.

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1650.100	Page 5

- C. When Continued Coverage Does Not Apply** Coverage **will not** continue *through the date of the appeal decision* when:
- *an appeal hearing is requested after the effective date of action, or more than 10 days after the Notice of Action on Benefits if the appellant is given less than 10 days of advanced notice; or*
 - the sole issue under appeal is one of Federal or State law or policy, and the Agency promptly informs the appellant that services will be terminated or reduced pending the appeal hearing decision.*
- D. Recovery of Continued Coverage Costs** When the Hearing Officer determines that the appellant is not eligible for coverage, the cost of medical care received during the period of continued coverage may be recovered by DMAS, to the extent they were furnished solely by reason of this section. (See M1670.100)

M1650.100 PRE-HEARING ACTIONS

- A. Invalidation** A request for an appeal may be invalidated if it was not filed within the time limit imposed or if it was not filed by the applicant/enrollee or an authorized representative. *The Hearing Officer shall issue a final decision.*
- 1. Appeal Not Filed Timely** If DMAS determines that the appellant has failed to file a timely appeal, DMAS shall notify the appellant or the appellant's representative of the opportunity to show good cause for the late appeal.
- If there is no response, or if after evaluating the response, the Hearing Officer determines that the reason for failing to file a timely appeal does not meet good cause criteria, the appeal request will be considered invalid *and the Hearing Officer will issue the appropriate final decision.*
- 2. Factual Dispute of Timeliness** If a factual dispute exists about the timeliness of the request for an appeal, the Hearing Officer shall receive testimony and evidence at the hearing prior to receiving testimony and evidence about the substantive issue of the appeal. A decision on the timeliness issue will be made prior to a determination of whether to make a decision about the substantive issue of the appeal.
- 3. When Individual Filing Appeal Is Not the Appellant** If the individual filing the appeal is not the appellant or an authorized representative of the appellant, DMAS will request that the appellant and/or representative provide proof of authorization to represent the appellant. If proof is not provided, the appeal request will be considered invalid *and the Hearing Officer will issue the appropriate final decision.*
- B. Administrative Dismissal** A request for an appeal may be administratively dismissed without a hearing if the appellant has no right to a hearing. *The Hearing Officer shall issue a final decision.*
- 1. No Adverse Action Taken** If DMAS learns that no adverse action was taken prior to the date of the appeal request, *the Hearing Officer will issue a final decision dismissing the appeal.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1650.100	Page 6

2. Disability Decision Rescinded By DDS

If the appellant's Medicaid application is returned to a pending status because the Disability Determination Services analyst rescinds the denial of disability, *the Hearing Officer will issue a final decision dismissing the appeal.*

C. Withdrawal

If the appellant requests that the appeal be withdrawn, *the Hearing Officer will send the appellant a letter acknowledging the withdrawal and no further action will be taken on the appeal. A copy of the letter will be sent to the Agency.*

- *The appellant must provide the Appeals Division with a statement clearly indicating that they wish to withdraw their appeal. The statement or form must be mailed, e-mailed, or faxed to the DMAS Appeals Division.*
- *In lieu of a written statement, the appellant may make a recorded verbal statement clearly indicating that they wish to withdraw their appeal by calling the Appeals Division at (804) 371-8488. Verbal notification to the LDSS by the appellant to withdraw an appeal is **not** sufficient.*

D. Failure to Appear

If the appellant or their representative fails to appear at the scheduled hearing, and does not reply within 10 days to the Hearing Officer's request for an explanation that meets good cause criteria, or if the appellant does reply and the Hearing Officer decides that the reply does not meet good cause criteria, the appeal will be closed as "abandoned," *and the Hearing Officer will issue a final decision.*

E. Administrative Resolution

If, upon reevaluation by the LDSS, the appellant's coverage is reinstated to the full amount of coverage that was in effect prior to closure or reduction of benefits, the appeal will be closed as administratively resolved, *and the Hearing Officer will issue a final decision.*

NOTE: *The Agency should not assume that any new Notice of Action on Benefits automatically ends the appeal. The Agency must send any new Notices to the Appeals Division, and the Appeals Division will decide whether the appeal is administratively resolved. The Agency will receive a copy of final letters for administrative closures.*

F. Judgment on the Record

If the Hearing Officer determines from the record that the Agency's action was clearly in error and that the case should be resolved in the appellant's favor, he shall issue a judgment on the record instead of holding a hearing. The Hearing Officer will provide the Agency with a clear explanation of the reason(s) for issuing a judgment on the record and which actions must be taken by the Agency to correct the case. The decision to issue a judgment on the record is at the Hearing Officer's discretion

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1660.100	Page 7

G. Remand to the Agency Prior to the Hearing

If the Hearing Officer determines from the record that the case might be resolved in the appellant's favor if the Agency obtains and develops additional information, documentation, or verification, they may remand the case to the Agency for action consistent with the Hearing Officer's written instructions. The Agency must complete the remand evaluation within 30 days or 45 days as applicable.

H. Defective Notices

If the appealed Notice of Action on Benefits is defective on its face, the Hearing Officer may remand the appeal to the Agency for the issuance of a legally compliant Notice.

For Notices reducing or terminating existing coverage or services, the Hearing Officer will issue a decision that finds in favor of the appellant by ordering the Agency/contractor to reinstate the existing level of coverage or services at issue for a period of at least 30 calendar days; and Requires the Agency/contractor to issue a new compliant notice prior to the end of the 30 calendar day period by reviewing the same application or service authorization request. If the Agency/contractor requires additional information to process the application or service authorization request, they must ensure that the information is requested and obtained in order to timely issue the new compliant notice.

For Notices concerning new applications for eligibility or requests for new services, the Hearing Officer may issue a decision remanding the Notice to the entity that issued it and order that, within a reasonable period determined by the Hearing Officer, a new compliant Notice be issued to the member on the same eligibility application or service authorization request. If the Agency/contractor requires additional information to process the application or service authorization request, they must ensure that the information is requested and obtained in order to timely issue the new compliant notice. Alternatively, the appellant will be given the option to waive the deficient notice and continue with the State Fair Hearing process.

M1660.100 SCHEDULING THE HEARING

A. Scheduling and Location

The Hearing Officer will select a date and time for the hearing. Typically, hearings are scheduled at least three weeks in advance.

Hearings will be held at the local Agency if a local department of social services office is responsible for the action. The applicant/enrollee will be at the Agency. The Hearing Officer will participate in any hearing by telephone unless the appellant requests a face-to-face hearing. Appellants may also request to participate in their hearing telephonically, rather than appearing at the local Agency.

Hearings regarding actions taken by Contractors will be conducted telephonically.

B. Confirmation Letter

The schedule letter is mailed to the appellant and representative, and a copy is mailed to the Agency.

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1670.100	Page 8

The schedule letter contains information about summary due dates and other pertinent information.

If the Agency representative cannot be available on the date and time selected by the Hearing Officer, he/she must notify the DMAS Appeals Division as soon as possible and request an alternate date and time for the hearing.

M1670.100 AGENCY APPEAL SUMMARY

A. Agency Appeal Summary Form

Upon notification that a fair hearing has been requested, the Agency must complete an Agency Appeal Summary. There is a form for the Agency Appeal Summary (form #032-03-805) available on *Fusion*.

When preparing the Agency Appeal Summary, the Agency must consider all documents submitted up until that point, even if the information/documents were submitted for the first time during the appeal process, as discussed below at M1680.100 (A)(5). The Agency Appeal Summary must thoroughly explain the facts, policy, and other relevant information that support the Agency's position on the appeal. The Agency must submit all documents relevant to the Agency's determination with the Agency Appeal Summary.

If new documentation submitted by the appellant during the appeals process would not result in a finding of MA eligibility, then the Agency or Contractor must produce an appeal summary explaining why the new documentation did not result in a finding of eligibility and should attend the hearing prepared to explain why the Agency or Contractor maintains its position on the appeal.

B. Send to Appeals Division and Appellant

The Agency must send one copy of the Agency Appeal Summary and all relevant documentation to the following parties by the due date specified by the Appeals Division at the time of the notification:

- *Department of Medical Assistance Services, Appeals Division*
 - *Electronically via the AIMS portal at www.dmas.virginia.gov/appeals. Use of the AIMS portal is the preferred method for filing the appeal summary with DMAS.*
 - *Via USPS: 600 East Broad Street, Appeals Division
Richmond, Virginia 23219*
 - *Via email: appeals@dmas.virginia.gov*
 - *Via fax: 804-452-5454*
- *The appellant or their authorized representative, if the appellant has designated a representative for the appeal.*

The Agency must keep a copy of the Agency Appeal Summary and all relevant documentation, including applications, notices, and DMAS appeal decisions for its records.

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1680.100	Page 9

- C. Deadline for Submission** *In most cases, the Agency Appeal Summary must be submitted to the DMAS Appeals Division and the appellant or their authorized representative within 21 days after the Agency or Contractor is notified of the appeal. The only exception is when the Appeals Division certifies an expedited appeal*

M1680.100 THE HEARING PROCEDURE

- A. Hearing Procedure** The hearing will be conducted in an informal manner. Formal rules of evidence do not apply in these proceedings. The appellant is entitled to guarantees of fair hearings established in *Goldberg v. Kelly*, 397 US 245 (1970). The proceedings will be governed by the following rules:
- 1. Record** The Hearing Officer will swear-in all hearing participants who will be presenting evidence or facts and will record the hearing proceedings.
 - 2. Appellant** The appellant will present *their* own case or have it presented by an authorized representative. *They* will be allowed to bring witnesses, establish all pertinent facts and circumstances, advance any testimony or evidence, and question witnesses called on *their* own behalf and by the Agency.
 - 3. Agency Representatives** *The worker at the Agency* who took the action being appealed and/or the worker's supervisor should be present at the hearing, and must be prepared to explain the Agency's action. The Agency may be represented by its county or city attorney. The Agency has the authority to ask its county or city attorney to attend the hearing.

When the action being appealed is a disability decision made by the DDS, a representative from DDS must be present at the hearing. When the action being appealed is a denial of a medical or dental covered service, a representative from DMAS or its contractor who made the decision must be present at the hearing.
 - 4. Opportunity to Examine Documents** The appellant or *their* representative must be given the opportunity to examine all documents and records to be used at the hearing, at a time before the hearing or during the hearing. Copies of case record information must be made available free of charge to the appellant at *their* request.
 - 5. De Novo Hearing** *The DMAS state fair hearing is a de novo hearing in front of a DMAS Hearing Officer. That means that the DMAS Hearing Officer will issue an entirely new determination based upon all relevant evidence that the appellant offers during the appeal process. This includes evidence that may not have been available to the Agency or Contractor at the time the appealed eligibility determination was made. The DMAS Hearing Officer will review all information that was submitted for the initial eligibility determination, as well as any additional documentation and testimony that is submitted during the appeal process. Appellants who wish for additional documentation to be reviewed may submit it with their appeal request, prior to the scheduled hearing, during the hearing itself, or after the hearing if the Hearing Officer agrees to hold the record open for submission of additional documentation.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1680.100	Page 10

Further, a de novo hearing is a hearing that starts over from the beginning. This means the Hearing Officer must allow the appellant to develop the record fully. The record will consist of any relevant evidence, documentation, and testimony, regardless of whether it was available at the time of the adverse determination. The Hearing Officer's decision will be based solely on the record developed during the de novo hearing process, and it will include an explanation of how the facts apply to the relevant laws, regulations, and policies.

Agencies and Contractors will receive a copy of any new documentation that has been submitted to the DMAS Appeals Division during the appeal process to determine whether it is possible to approve MA coverage. If the Agency or Contractor receives new documentation from the appellant independently during the appeal process, copies of such documentation must be sent to the DMAS Appeals Division. The Agency or Contractor can use new documentation to determine that the appellant is eligible for coverage. If the Agency or Contractor determines that the appellant is eligible, then they shall issue a new Notice of Action on Benefits and provide it to all parties to the appeal. The Hearing Officer must then decide whether it is appropriate to resolve the appeal based upon the new Notice of Action on Benefits.

If the new documentation submitted by the appellant would not result in a finding of MA eligibility, then the Agency or Contractor must produce an appeal summary explaining why the new documentation did not result in a finding of eligibility and must attend the hearing prepared to explain why the Agency or Contractor maintains its position on the appeal.

After the hearing, the DMAS Hearing Officer will issue a decision as to whether or not the appellant is approved for coverage based upon all of the documentation, evidence, and testimony provided by the appellant and the Agency or Contractor.

B. Hearing Officer Evaluation and Decision

1. Evaluation

Following the hearing, the Hearing Officer will prepare a decision taking into account the Agency Appeal Summary, evidence provided by the appellant or their representative, testimony, and additional information provided by the parties. The Hearing Officer *will evaluate* all evidence, research laws, regulations and policy, and *will decide* if the applicant or recipient is *approved for coverage*.

2. Hearing Officer Decision

Examples of the Hearing Officer's decisions include:

a. Sustain

When the Hearing Officer's decision *is consistent with the Agency's action*, the decision is "sustained."

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1680.100	Page 11

b. Reverse

When the Hearing Officer's decision *overturns the Agency's action, including when the Hearing Officer finds the appellant eligible for Medical Assistance under the de novo hearing process*, the decision is "reversed."

c. Remand

When The Hearing Officer sends the case back to the Agency for additional evaluation, the decision is "remanded." The Hearing Officer's decision will include instructions that must be followed when completing the remand evaluation.

3. Failure to Provide Requested Information

If the *Agency* denies an application or terminates coverage because of failure to provide requested information, the *Hearing Officer* can hold the hearing record open for a period of time to allow the appellant to submit additional information *to receive a de novo eligibility determination. The Hearing Officer may decide to reconvene the hearing if appropriate.*

C. Local Agency Action

The decision of the Hearing Officer is the final administrative action taken on the appeal. The local *Agency or Contractor* must comply with the Hearing Officer's decision.

1. Agency Action - Sustained Cases

If the Hearing Officer's decision is to sustain the Agency's action, and coverage was continued during the appeal process, the case must be closed without an additional notice to the enrollee from the Agency. The Hearing Officer's decision letter to the appellant is the appropriate official notice of cancellation.

The Agency must take action to close the case in the Medicaid computer using cancel reason "015" effective the date the Agency receives the decision.

2. Agency Action - Remanded Cases

a. Do Not Send Documents to Hearing Officer

If the Hearing Officer's decision is to remand the case to the local Agency, the local Agency must not send documentation of the evaluation or a copy of the remand notice to the Hearing Officer.

b. Enrollment Actions

If the Hearing Officer's decision is to remand the case for further evaluation and coverage was continued during the appeal process, coverage must be continued until the local Agency completes the evaluation and makes a new decision.

If the remand evaluation results in the appellant's continuous eligibility, the Agency must notify the appellant in writing of *their* continuing eligibility for coverage.

If the remand evaluation results in the appellant's continuous eligibility and coverage was *not* continued during the appeal process, the local Agency must reinstate coverage back to the original termination date (no break in coverage) and notify the appellant of their continued eligibility.

Manual Title Virginia Medical Assistance Eligibility	Chapter M16	Page Revision Date July 2021
Subchapter Subject M16 APPEALS PROCESS	Page ending with M1690.100	Page 12

If the remand evaluation results in the appellant's ineligibility and coverage was continued during the appeal process, the enrollee's coverage must be canceled at the completion of the evaluation, and the appellant must be notified in writing.

c. Take Action in 30 or 45 Days

The Agency must complete the remand evaluation within 30 days or 45 days *according to the Hearing Officer's instructions in the decision.*

Agency Action-Reversed Cases

Following a Hearing Officer's decision to reverse an Agency's action to deny, reduce, or terminate coverage, the Agency must reinstate coverage retroactive to the date of closure or month of application (including retroactive coverage months, if applicable) *according to the Hearing Officer's instructions in the decision.*

M1690.100 RECOVERY OF BENEFITS PAID DURING APPEAL

A. Applicable Circumstances

The Medicaid Program may recover expenses paid on behalf of appellants whose Medicaid coverage was continued during the appeal process, when the Agency's proposed action is upheld by the Hearing Officer.

DMAS will be responsible for recovering these expenses from the appellant, not the service provider. The appellant will be notified, after the hearing decision is made, of how much money if any is owed to the Medicaid Program.

B. Recovery Period

Medicaid expenditures for services received from the original effective date of the proposed adverse action (as stated on the notice) until the actual cancellation of Medicaid coverage or payment will be recovered.

M1700 MEDICAID FRAUD AND NON-FRAUD RECOVERY

M1700.100 INTRODUCTION

A. Administering Agency The Department of Medical Assistance Services (DMAS) investigates and accepts referrals regarding fraudulent and non-fraudulent payments made by the Medicaid Program. DMAS has the authority to recover any payment incorrectly made for services received by a Medicaid recipient or former Medicaid recipient. DMAS will attempt to recover these payments from the recipient or the recipient's income, assets, or estate, unless such property is otherwise exempt from collection efforts by State or Federal law or regulation.

The DMAS Recipient Audit Unit (RAU) is responsible for the investigation of allegations of acts of fraud or abuse committed by recipients of the Medicaid and the Family Access to Medical Insurance Security Plan (FAMIS) programs. The RAU recovers overpayments due to recipient fraud, abuse, and overpaid benefits through voluntary repayments and criminal prosecution of recipient fraud.

The Third Party Liability Unit (TPL) at DMAS is responsible for investigating and recovering funds paid by DMAS from recipients' estates, trust accounts, annuities and/or other health insurance policies. This unit performs investigations to find "third party resources" that result when Medicaid pays medical costs that a third party should have paid. Medicaid is always the payer of last resort.

B. Utilization Review The DMAS Recipient Monitoring Unit is responsible for reviewing all Medicaid and FAMIS covered services of recipients who utilize services at a frequency or an amount that is not medically necessary in accordance with utilization guidelines established by the state. Only recipients who are excluded, pursuant to 12VAC30-120-370 B, from receiving care from a managed care organization are reviewed and evaluated.

M1700.200 FRAUD

A. Definitions Fraud is defined as follows:

An intentional deception or misrepresentation made by a person with the knowledge that the deception could result in some unauthorized benefit to himself or some other person. It includes any act that constitutes fraud under applicable Federal or State law. (42 CFR 455.2)

Abuse is defined as follows:

Beneficiary practices that result in unnecessary cost to the Medicaid program (42 CFR 455.2)

B. DMAS Authority DMAS has sole authority over cases of suspected Medicaid fraud when eligibility for a public assistance payment is not involved (Medicaid only cases). The local department of social services (LDSS) must refer all Medicaid cases involving suspected fraud to the DMAS Recipient Audit Unit, 600 E. Broad Street, Suite 1300, Richmond, Virginia 23219, using the Notice of Recipient Fraud/Non-Fraud (form #DMAS 751R) available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>. The following information must be provided when making a referral:

Manual Title Virginia Medical Assistance Eligibility	Chapter M17	Page Revision Date October 2019
Subchapter Subject MEDICAID FRAUD AND NON-FRAUD RECOVERY	Page ending with M1700.200	Page 2

- confirmation that ongoing eligibility has been reviewed (in relation to the allegation) with evaluation results attached;
- reason(s) for and estimated period of ineligibility for Medicaid;
- the recipient's name and Medicaid enrollee identification number;
- the recipient's Social Security number;
- applicable Medicaid applications or review forms for the referral/ineligibility period;
- address and telephone number of any attorney-in fact, authorized representative, or other individual who assisted in the application process;
- relevant covered group, income, resource, and/or asset transfer documentation for the time period in question;
- any record of communication between the agency and the client or representative, such as case narratives, letters, and notices; and
- information obtained from the agency's fraud investigation, including names and addresses of knowledgeable individuals for testimony and/or interviews.

1. Amount of Loss

There is no fiscal threshold for any case for fraudulent and non-fraudulent erroneous payments made by the Medicaid Program.

In order to determine the amount of the loss of Medicaid funds related to the enrollee's eligibility when LDSS has jurisdiction because of participation in another public assistance program, a Medicaid Claims Request (form #DMAS 750R, available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, must be sent to DMAS to obtain the amount of the loss. The local agency should allow a three-week turnaround for the documents. There may be exceptional circumstances when claims can be provided within a shorter time, i.e., expedited trial dates. Once the information is received and the agency determines that it will not make a joint criminal prosecution referral, the LDSS must send DMAS the Notice of Recipient Fraud/Non-Fraud. DMAS will determine if administrative non-fraud recovery is appropriate.

2. Recipient Fraud

a. Medical Assistance Only

The LDSS must refer cases of suspected fraud involving only medical assistance to the RAU for investigation using the DMAS 751R form. The LDSS must provide the RAU with the recipient's identifying information, address, and information regarding the circumstances of the suspected fraud. The LDSS is also responsible for reviewing and taking appropriate action for ongoing eligibility or termination of coverage, as appropriate. The RAU will determine the amount of the misspent funds and pursue recovery and/or legal action as appropriate.

Manual Title Virginia Medical Assistance Eligibility	Chapter M17	Page Revision Date October 2016
Subchapter Subject MEDICAID FRAUD AND NON-FRAUD RECOVERY	Page ending with M1700.200	Page 3

b. Cases in which Medicaid is received with TANF, AG, and other money payment public assistance programs.

The LDSS is responsible for the investigation of suspected fraud involving cases with combined Medicaid and Auxiliary Grant (AG); Medicaid and TANF; and other money payment public assistance programs. The final disposition on all money payment fraud cases shall be communicated to the RAU no later than 5 business days after disposition.

c. Cases in which Medicaid is received with Supplemental Nutrition Assistance Program (SNAP), Energy Assistance, and other non money payment public assistance programs

The LDSS must refer suspected fraud involving Medicaid cases combined with SNAP, Energy Assistance or other non money payment public assistance programs to the RAU using the DMAS 751R form. The local agency shall coordinate cases pending referral for prosecution with the RAU so that Medicaid may take concurrent action.

3. Provider Fraud

Cases of suspected fraud involving enrolled providers of medical services to Medicaid recipients shall be referred to the Medicaid Fraud Control Unit in the Office of the Attorney General, and a copy of the referral correspondence shall be sent to the Provider Review Unit at the Department of Medical Assistance Services.

C. Medicaid Ineligibility Following Fraud Conviction

1. Period of Eligibility

An individual who has been convicted of Medicaid fraud is ineligible for Medicaid for a period of 12 months beginning with the month of fraud conviction. Action to cancel the individual's Medicaid coverage shall be taken in the month of conviction or in the month the agency learns of the conviction, using cancel reason 014 (42 United States Code §1320a-7b.(a)(6)(ii); 12 Virginia Administrative Code 30-10-70).

2. Who is Ineligible

a. TANF or Families and Children (F&C) Cases

Only the parent/caretaker of a TANF/Medicaid or F&C Medicaid case is ineligible for Medicaid when the parent/caretaker has been convicted of Medicaid fraud. The TANF payment made to the caretaker on a child's behalf shall not be affected.

b. Aged, Blind, Disabled (ABD) or Pregnant Women Cases

In an ABD or pregnant woman case, only the individual found guilty of Medicaid fraud will be ineligible. If only one spouse of a married couple is convicted, the eligibility of the innocent spouse is not affected.

Manual Title Virginia Medical Assistance Eligibility	Chapter M17	Page Revision Date October 2022
Subchapter Subject MEDICAID FRAUD AND NON-FRAUD RECOVERY	Page ending with M1700.300	Page 4

2. Family Unit

If both spouses of an eligible couple are found guilty of fraud, neither is eligible for Medicaid. If only one member of a family unit is convicted of fraud, only that member's Medicaid coverage is canceled. The fraud conviction does not affect the composition of the family unit or the treatment of the family unit's income or resources. The convicted individual is included in the family unit according to Medicaid policy, but is not eligible for Medicaid coverage and is not enrolled.

M1700.300 NON-FRAUD RECOVERY

A. Authority

Any person who, without intent to violate this article, obtains benefits or payments under medical assistance to which he is not entitled shall be liable for any excess benefits or payments received. (COV 32.1-321.2)

B. Recovery of Erroneous Payments

DMAS has the authority to investigate cases and recover expenditures made for services received by ineligible enrollees without fraudulent intent. Examples of when recovery of expenditures is possible include, but are not limited to:

- eligibility errors due to recipient misunderstanding,
- agency errors,
- medical services received during the appeal process, if the agency's cancellation action is upheld.
- long-term care (LTC) patient pay underpayments totaling \$1,500 or more.

Complete and send the Notice of Recipient LTC Patient Pay Underpayment (form #DMAS752R) located at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, to:

Department of Medical Assistance Services
Recipient Audit Unit,
600 E. Broad Street, Suite 1300,
Richmond, Virginia 23219

The form can be faxed to 804-452-5472 or emailed to recipientfraud@dmass.virginia.gov.

Underpayments less than \$1,500 can be collected by adjusting the ongoing patient pay (see M1470.900 for patient pay adjustments).

C. Post-eligibility Investigations

1. Methodology

The RAU conducts post eligibility investigations. Medicaid nonfinancial and financial requirements are reviewed and applied in accordance to Medicaid policy. See Chapter M02 for the nonfinancial eligibility requirements, and Chapters M06 and M11 for resource requirements.

RAU investigations are based on projected income consistent with the eligibility policies for counting ongoing income referenced in Chapters M04, M07, and M08. Post-eligibility determinations are made using a point-to-point method in which the income estimation period begins with an event that would have triggered a partial review under *M1520.100*. The end point is the next scheduled renewal that the LDSS actually completed.

Manual Title Virginia Medical Assistance Eligibility	Chapter M17	Page Revision Date April 2022
Subchapter Subject MEDICAID FRAUD AND NON-FRAUD RECOVERY	Page ending with M1700.300	Page 4a

2. Non-financial Issues

Investigations or audits of non-financial attestations by an enrollee (such as residency, pregnancy and household composition), that later become questionable due to the receipt of information that puts their eligibility into question, RAU has the discretion to request verification from the enrollee or obtain a third party statement. The following are some common non-financial circumstances where the RAU may require additional verifications when the recipient eligibility is questionable:

a. Residency

If an enrollee's Virginia residency is questionable, RAU may request or obtain documents such as school records, receipt of social service benefits and medical records as sources of evidence to validate the recipient's Virginia resident or non-resident status. RAU utilizes the PARIS match to identify recipients who have received benefits in other states and Virginia concurrently.

b. Pregnancy

When a recipient's pregnancy is questionable, the RAU may require the recipient to provide verification of pregnancy or the termination of her pregnancy. The RAU may also use medical records, if available, to verify termination of pregnancy.

c. Household composition

If the enrollee's household composition is in question (such as undeclared spouse, parent, or a unreported change of status of a child in the home, the RAU may require a written statement from the enrollee, a third party or other verifying evidence.

D. Uncompensated Asset Transfers

Individuals receiving long-term care services (LTC) who transfer assets and do not receive adequate compensation are subject to the imposition of a penalty period during which Medicaid cannot pay for long-term care services. When an uncompensated

Manual Title Virginia Medical Assistance Eligibility	Chapter M17	Page Revision Date April 2017
Subchapter Subject MEDICAID FRAUD AND NON-FRAUD RECOVERY	Page ending with M1700.300	Page 5

transfer resulted in a penalty period during which LTC services were received, a referral must be made to the RAU to recover the misspent dollars. RAU staff will contact the recipient or the recipient's authorized representative to pursue recovery.

Section §20-88.02 of the Code of Virginia also allows DMAS to seek recovery from the **transferee** (recipient of the transfer) if the amount of the uncompensated transfer is \$25,000 or more and occurred within 30 months of the individual becoming eligible for or receiving Medicaid LTC services. The transferees may be liable to reimburse Medicaid for expenditures up to the amount of funds spent on the enrollee or the amount of the uncompensated transfer, whichever is less.

E. Recovery of Correctly Paid Funds

Within specific restrictions, DMAS may recover funds correctly paid for medical services received by eligible recipients.

1. Deceased Recipient's Estate

Under federal regulations and state law, DMAS may make a claim against a deceased enrollee's estate when the recipient was age 55 or over. The recovery may include any Medicaid payments made on his/her behalf. This claim may be waived if there are surviving dependents. (**42 CFR §433.36; Va. Code §32.1-326.1 and 32.1-327**).

Section 1917(b)(1)(C)(ii) of the Social Security Act was amended by the Deficit Reduction Act of 2005 to exempt assets disregarded under a "qualified" Long-term Care (LTC) Partnership Policy from estate recovery, as defined in clause (iii) of 1917(b)(1)(C). The same amount of assets that was disregarded in the Medicaid eligibility determination for an individual under an LTC Partnership Policy will be protected during estate recovery.

Referrals should be made to DMAS for estate recovery when the deceased recipient is over 55, has no surviving spouse, no children under 21 or a disabled/blind child of any age.

2. Insurance Settlements and Similar Recoveries

Settlements related to personal injuries are a form of third party liability (TPL). When a Medicaid enrollee has received an insurance settlement or similar settlement from a law suit related to a medical condition or injury, DMAS may seek recovery of any amount of medical assistance expended on the enrollee prior to the receipt of the settlement. Generally, the insurance company notifies DMAS of the settlement; however, if an agency discovers that an enrollee received a settlement, the agency shall report it to DMAS. An insurance settlement that is sent directly to a recipient, in his name only, should be reviewed for its impact on the recipient's eligibility.

3. Trusts

Refer trust documents, including irrevocable, discretionary, pooled, and special needs trusts, to DMAS TPL for potential recovery at the time of recipient's (beneficiary's) death. Refer trust documents in all instances in which a Medicaid recipient is a beneficiary of a trust and the trustee refuses to make the assets available for the medical expenses of the recipient. Include a copy of the Medical Assistance Program Consultant's evaluation of the trust with the referral form, if available.

Include in the referral any corrective action that has been or will be taken by the LDSS, as well as the name of the supervisor of the person submitting the form. The supervisor's signature is not required.

Manual Title Virginia Medical Assistance Eligibility	Chapter M17	Page Revision Date October 2019
Subchapter Subject MEDICAID FRAUD AND NON-FRAUD RECOVERY	Page ending with M1700.400	Page 6

4. Notification to DMAS

Referrals must be made to the Third Party Liability Unit when: a recipient has received funds from a settlement; DSS has received information concerning a recipient being in an accident; DSS has information where a recipient has other third party payers; or the recipient is the beneficiary of a trust. The cases should be referred to DMAS using the Notice to DMAS of Estate Recovery/TPL/Trust Form (DMAS 753R) located at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, to make referrals to the TPL unit. The form should be completed and sent to:

Department of Medical Assistance Services
Third Party Liability Unit
600 East Broad Street, Suite 1300
Richmond, Virginia 23219

The form may be faxed to 804-786-0729.

M1700.400 RECOVERY RESPONSIBILITIES: LDSS AND DMAS

A. VDSS/LDSS Responsibilities in Loss Prevention Efforts

VDSS Medicaid operates under an interagency agreement with DMAS which lists specific responsibilities of VDSS and, by extension, the LDSS, for active participation in loss prevention efforts. The responsibilities of the LDSS fall under the interagency agreement and are neither optional nor discretionary for the LDSS. VDSS shall supervise the programmatic activities of the LDSS to ensure compliance.

B. LDSS Requirements

LDSS must participate in the identification, tracking, and correction of eligibility errors. LDSS must also determine and review ongoing or current recipient eligibility. **The DMAS RAU does not determine ongoing recipient eligibility, but rather reviews recipient eligibility in relation to allegations of fraud.** LDSS shall:

1. Report Individuals

Report to DMAS RAU every known instance relating to a non-entitled individual's use of Medicaid services, regardless of the reason for non-entitlement such as:

- instances where evidence of fraud may exist;
- errors involving eligibility discovered by the LDSS in which it appears there has been deliberate misrepresentation by an applicant/recipient with intent to defraud;
- eligibility errors discovered by the LDSS, independent of other audit or quality control functions, including cases in which the individual was enrolled incorrectly, added in error, not cancelled timely, allowed to remain on Medicaid during the conviction sanction period or when information known to the agency would render ineligibility;
- cases in which the LDSS discovers that the enrollee failed to report information that impacts eligibility; and
- LTC patient pay underpayments resulting from any cause totaling \$1,500 or more.

Manual Title Virginia Medical Assistance Eligibility	Chapter M17	Page Revision Date July 2021
Subchapter Subject MEDICAID FRAUD AND NON-FRAUD RECOVERY	Page ending with M1700.400	Page 7

2. PARIS Match Data

The Public Assistance Reporting Information System (PARIS) is a Federal computer matching initiative that the Virginia Department of Social Services (VDSS) participates in quarterly. VDSS participates in the data exchange with all active Medicaid enrollees and they are matched for the receipt of Veteran benefits and enrollment in multiple state's Medicaid programs. Each public assistance report is matched by social security number.

The worker must evaluate all matches for current and ongoing eligibility and take appropriate case action within 30 days. Multiple matches must be assessed as a whole for the entire case. Workers must document findings in VaCMS under Case Comments. Once the evaluation of the match is completed and the case comments are documented, send the **Public Assistance Reporting Information System (PARIS) Notice of Recipient Fraud/Non-Fraud Recovery, (form #DMAS 754R)** to the DMAS Program Integrity Division, where steps will be conducted to complete the match and Benefit Impact Screen (BIS). Procedures for researching and reporting PARIS matched individuals are found in the PARIS User Guide at <https://fusion.dss.virginia.gov/ac/Compliance-Home/FRAUD-MANAGEMENT/PARIS-Public-Assistance-Reporting-Information-System>.

Complete and send the **Public Assistance Reporting Information System (PARIS) Notice of Recipient Fraud/Non-Fraud Recovery (form #DMAS 754R)** located at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, to

Department of Medical Assistance Services
Recipient Audit Unit,
600 E. Broad Street, Suite 1300,
Richmond, Virginia 23219

The form may be faxed to 804-452-5472 or emailed to recipientfraud@dmass.virginia.gov.

3. Corrective Action

Report to the DMAS RAU corrective action taken on all discovered eligibility errors. Corrective action is a function of the loss prevention process. All corrected errors shall be reported to DMAS.

4. Cancel Coverage

Cancel the eligibility of all persons convicted of public assistance fraud or medical assistance fraud to the extent allowable under federal and state regulations, using the cancel code for fraud convictions (Cancel Code 014).

5. Incarcerated Individuals/ Offenders

The Cover Virginia Incarcerated Unit (CVIU) is responsible for evaluating PARIS matches for offenders whose cases are being held at the CVIU and reporting findings to the RAU as outlined in M1700.400 B.1 above.

C. DMAS Response

The RAU shall send a referral acknowledgement letter to the LDSS worker making the referral. RAU may send out additional communication to the LDSS should additional verifications/documentation be required to complete the investigation.

Manual Title Virginia Medical Assistance Eligibility	Chapter M17	Page Revision Date January 2020
Subchapter Subject MEDICAID FRAUD AND NON-FRAUD RECOVERY	Page ending with M1700.400	Page 8

D. Recipient Audit Reporting

The RAU has two prevention efforts for reporting fraud and abuse of Medicaid Services by individuals within the community. Both referral methods should be given to the individual by the LDSS. The individual may remain anonymous.

- The individual may send an e-mail to recipientfraud@dmas.virginia.gov.
- The individual can call the Recipient Audit fraud and abuse hotline. Both a local and a toll free number are available 24 hours daily for reporting suspected fraud and abuse: local (804) 786-1066; and toll free (866) 486-1971.

E. Statute of Limitations

There is no "statute of limitations" for Medicaid fraud; cases that are referred for fraud shall be flagged to ensure that the information is not purged.

M1800 MEDICAL SERVICES

M1810.100 MEDICAID ELIGIBILITY CARD

A. Medicaid Card Issuance

A Medicaid card is issued to an individual who has been found eligible for Medicaid and is enrolled with the Department of Medical Assistance Services (DMAS). The card is plastic with the enrollee's name, gender and birth date on the front, and a strip on the back that providers can "swipe" to ascertain the type of coverage and the begin date of coverage. The card is intended to be permanent. Presentation of the card to the Medicaid-enrolled (certified) provider of medical services authorizes the provider to bill Medicaid for the needed services, if such services are covered by the Medical Assistance Program and DMAS has pre-authorized the service, when pre-authorization is required.

Exception: The following recipients do not receive a Medicaid card:

- individuals eligible for Medicare premium payment only,
- individuals enrolled in a closed period of coverage in the past with no ongoing coverage, and
- *incarcerated individuals eligible for Medicaid payment of inpatient hospitalization services only.*

B. Use of the Medicaid Card

1. General

Local social services departments must provide recipients with information concerning use of the Medicaid card. This includes information that misuse of the card is fraud and can result in prosecution. Examples of misuse include:

- using the card following cancellation of eligibility,
- alteration of names, dates, or other information to secure medical care to which the individual is not entitled, and
- knowingly permitting another person to use an individual's card to secure medical care.

2. Foster Care Children in Institutional Facilities

The local department of social services (LDSS) should use the local department's address when enrolling a foster care child whose custody is held by the local department of social services and who is placed in an institution. Upon receipt of the Medicaid card, it should be sent to the appropriate institution for use on the child's behalf. The local department has the responsibility of advising the child caring institution of the medical and dental services covered by Medicaid.

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date May 2015
Subchapter Subject MEDICAL SERVICES	Page ending with M1820.100	Page 2

3. Nursing Facility Patients

Patients in nursing facilities receive Medicaid cards. The nursing facility also receives a computer-generated list at the first of the month which lists all eligible Medicaid patients in that facility.

This *report* reflects only those Medicaid-eligible patients for whom the nursing facility has submitted an "admission packet."

DMAS staff enters the patient information into the system and assigns a patient control number to the facility for use in billing Medicaid for the patient's care.

When a patient dies or is discharged from the facility, the facility is responsible for notifying DMAS and the LDSS of the date of discharge or death. Long-term care (LTC) providers have been instructed to notify the LDSS of death or discharge via the Medicaid Long-term Care Communication Form (DMAS-225).

M1820.100 SERVICE PROVIDERS

A. Enrollment Requirement

Providers of medical services must be enrolled by DMAS to receive Medicaid payment for their services. Lists of enrolled providers are available to local departments of social services and enrollees from DMAS and are available online at www.dmas.virginia.gov.

B. Out-of-State Providers

1. Covered Services

Medicaid will cover medical services rendered by out-of-state providers when the use of such providers is:

- a. the general custom of the eligible individual (e.g., a recipient living near the border of another state),
- b. needed by a non IV-E Foster Care child placed outside Virginia,
- c. necessitated when an eligible person is temporarily outside Virginia and has a medical emergency, or
- d. indicated because of referral to an out-of-state facility when preauthorized by DMAS.

2. Provider Enrollment

In instances where an out-of-state provider is not currently enrolled as a DMAS provider, DMAS will accept the provider's initial billing and will contact the provider to determine the provider's wish to become enrolled so that subsequent services can be paid through the computerized Medicaid claims processing system.

M1830.100 MANAGED CARE

A. General Information

DMAS provides Medicaid coverage to enrollees primarily through two delivery systems: fee-for-service (FFS) and managed care. FFS benefits are administered by DMAS through participating providers within the traditional Medicaid program rules. Most Virginia Medicaid enrollees *including individuals with other forms of health insurance (TPL)* are required to receive medical care through a managed care organization.

B. Medallion Programs

The Medallion 4.0 managed care program is administered through DMAS' contracted managed care organizations (MCO).

Individuals eligible for Medallion 4.0 include non-institutionalized enrollees in both Families & Children (F&C) and Aged, Blind or Disabled (ABD) covered groups. Some enrollees in the groups below are not Medallion 4.0 eligible because they meet exclusionary criteria. The following is a **partial** list of enrollees excluded from managed care enrollment:

- Enrollees who are inpatients in state mental hospitals,
- Enrollees who are in long-stay hospitals, nursing facilities, or intermediate care facilities for the intellectually disabled,
- Enrollees who meet a spenddown and are enrolled for a closed period of coverage,
- Enrollees who are participating in Plan First,
- Enrollees under age 21 in Level C residential facilities,
- Enrollees who have an eligibility period that is less than three months or who have an eligibility period that is only retroactive.

All Medallion 4.0 health plans offer enhanced benefits to members including, but not limited to:

- Adult Dental
- Vision for adults
- Cell phone
- Centering pregnancy program
- GED for Foster Care
- Sports physical at no cost (under age 21)
- Swimming lessons for members six (6) years and younger
- Boys and Girls Club membership (6-18 olds)
- Free meal delivery after inpatient hospital stays

Note: Not all health plans will offer all of the same enhanced benefits

Enrollees excluded from mandatory managed care enrollment shall receive Medicaid services under the current fee-for-service system. When enrollees no longer meet the criteria for exclusion, they shall be required to enroll in the appropriate managed care program.

Enrollees and their families may contact the Medallion 4.0 Helpline at 1-800-643-2273 for information and assistance.

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date October 2018
Subchapter Subject MEDICAL SERVICES	Page ending with M1830.100	Page 4

**C. Managed Care
HelpLine**

Eligible individuals can enroll in an MCO or obtain additional information, as well as assistance with coverage issues, by calling the Managed Care HelpLine at 1-800-643-2273 (TTY/TDD 1-800-817-6608). The Helpline is available Monday through Friday from 8:30 a.m. until 6:00 p.m. Information is available online at www.viriniamanagedcare.com.

**D. Family Access to
Medical
Insurance
Security Plan
(FAMIS)
Managed Care**

FAMIS benefits are administered through DMAS contracted MCOs or through FAMIS fee-for-service. The DMAS contracted MCOs for FAMIS are the same as those contracted with DMAS for Medallion 3.0.

In all areas of the Commonwealth, FAMIS enrollees have the choice between 2 or more MCOs. When a child is first enrolled in FAMIS, he or she is able to access health care through the FAMIS fee-for-service program. Within 1 or 2 months after FAMIS enrollment, the child will be enrolled with a FAMIS MCO.

FAMIS benefits are slightly different than the benefits that children enrolled in Medicaid receive. There are benefit limitations and small co-payments similar to those associated with commercial group health insurance. The following is a partial list of services (while covered under Medicaid) are **NOT** covered under FAMIS.

- Early and Period Screening Diagnosis and Treatment (EPSDT) services are not covered for FAMIS MCO members. Many of the services that are covered as EPSDT services by Medicaid are covered under FAMIS MCO's well child and immunization benefits. EPSDT services **are** covered for FAMIS FFS members because they receive the Medicaid benefit package.
- Psychiatric treatment in free standing facilities is not covered under FAMIS. However, psychiatric treatment is covered when provided in a psychiatric unit of an acute hospital.
- Routine transportation to and from medical appointments is not covered for FAMIS MCO enrollees. Children enrolled in FAMIS FFS may receive non-emergency transportation services. Emergency transportation is covered for both FAMIS MCO and FAMIS FFS enrollees.
- Intensive in-home, therapeutic day treatment, mental health crisis intervention, and case management for children at risk of or experiencing a serious emotional disturbance are covered under FAMIS. Other community mental health rehabilitation services are not covered.

Eligible FAMIS individuals can enroll in an MCO or obtain additional information, as well as assistance with coverage issues, by calling Cover Virginia at 1-855-242-8282, Monday through Friday from 8:00 a.m. until 7:00 p.m. and Saturdays from 9:00am – noon. Information is also available online at www.covervirginia.org.

A summary of FAMIS covered services can be found online at:
<http://coverva.org/mat/FAMIS%20Covered%20Services.pdf>.

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date April 2019
Subchapter Subject MEDICAL SERVICES	Page ending with M1830.100	Page 5

**E. Commonwealth
Coordinated Care
(CCC) Plus**

Effective August 1, 2017, the CCC Plus Medicaid managed care program was implemented. CCC Plus operates statewide through a network of managed care plans across six regions as a mandatory program serving adults and children with disabilities and complex care needs. Individuals in nursing facilities and the home and community based waivers, as well as dually-eligible individuals (those with both Medicare and Medicaid) receive Medicaid through CCC Plus. Individuals receiving services through the Developmental Disabilities waivers are currently enrolled in CCC Plus only for their non-waiver services.

*The following is a **partial** list of enrollees excluded from enrollment in CCC Plus:*

- *Limited covered groups – Plan First, Qualified Medicare Beneficiaries (QMB) only, Special Low income Medicare Beneficiaries (SLMB), and Qualified Individuals (QI);*
- *Enrollees in specialized settings – intermediate care facilities for individuals with intellectual disability (ICF-ID), Veterans’ nursing facilities, psychiatric residential treatment facilities (PRTF), the Virginia Home, and the Piedmont, Catawba and Hancock state facilities;*
- *Enrollees in hospice care (CCC Plus who elect hospice will remain in CCC Plus);*
- *Enrollees in other programs – Medicaid or FAMIS Medallion 4.0 managed care, and the Program for All-inclusive Care for the Elderly (PACE).*

Medicaid Expansion enrollees receive the same amount, duration and scope of services as other CCC Plus Program Members, with the following four (4) additional federally-required essential health benefits.

- *Annual adult wellness exams;*
- *Individual and group smoking cessation counseling;*
- *Nutritional counseling for individuals with obesity or chronic medical diseases;*
- *Recommended adult vaccines or immunizations.*

Enrollees and their families may contact the CCC Plus Helpline at 1-844-374-9159 for information and assistance.

**G. Enrollment
Corrections/
Changes**

DMAS pays a capitation rate for every month an individual is enrolled in managed care regardless of whether the individual receives medical services during the month. If an individual is incorrectly enrolled in a Medicaid managed care program, the eligibility worker must refer the case to DMAS at the following address for possible recovery of expenditures (see chapter M1700):

Recipient Audit Unit
Department of Medical Assistance Services
600 East Broad Street, Suite 1300
Richmond, VA 23219

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date October 2017
Subchapter Subject MEDICAL SERVICES	Page ending with M1840.100	Page 6

M1840.100 UTILIZATION REVIEW AND CLIENT MEDICAL MANAGEMENT

A. Utilization Review

Federal regulations require the Department of Medical Assistance Services (DMAS) to regularly review recipients' use and need for the covered medical services they receive. Regulations require that Medicaid pay only for medically necessary covered medical services. Medicaid cannot pay for duplicate services since they are not necessary.

DMAS staff in the Program Integrity Division reviews provider claims and recipient utilization histories for medical necessity. If it is determined that services were not medically necessary, providers are obligated to reimburse DMAS for any Medicaid payment they have received.

B. Client Medical Management (CMM) Program

An enrollee's utilization of Medicaid cards for physicians' services and pharmaceutical services is monitored regularly by DMAS. Whenever the utilization of one or both of these services is unusually high, the services will be reviewed for medical necessity. If some services are considered not medically necessary, recipients who are not enrolled in a managed care program will be placed in the CMM Program and required to select a primary physician and/or pharmacy or both.

Individuals identified as high utilizers will receive a letter of notification with instructions about selecting primary providers and identifying those providers to DMAS. Individuals who do not respond to the letter within the specified time will have their primary physician and pharmacy designated by DMAS.

For recipients who have been placed in the CMM Program, Medicaid payment for physicians' services will be limited to those services rendered by the primary physician (including a physician providing services to the patients of the primary physician when the primary physician is not available), physicians seen on referral from the primary physician, and emergency medical services.

Prescriptions may be filled by a non-designated pharmacy only in emergency situations when the designated pharmacy is closed or cannot readily obtain the drug.

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date October 2017
Subchapter Subject MEDICAL SERVICES	Page ending with M1850.100	Page 6a

M1850.100 COVERED SERVICES

A. General Information

Information on Medicaid covered services is provided to assist the eligibility worker in responding to general inquiries from applicants/recipients. Individuals who have problems with bills or services from providers of care should be referred as follows:

- Refer FFS Medicaid enrollees to the DMAS Recipient Helpline at 804-786-6145. Refer individuals who need assistance with transportation to the DMAS transportation broker at 1-866-386-8331.
- Refer individuals enrolled in managed care to the Managed Care HelpLine at 1-800-643-2273 or directly to their MCO. Individuals in managed care who need assistance with transportation must contact their MCO directly.

B. Copayments

a. Medicaid Enrollees without Medicare

Most Medicaid covered services have a “copayment,” which is the portion of the cost of the service for which the recipient is responsible. Copayment amounts range from \$1.00 to \$3.00 for most services. There is a \$100.00 copayment per admission for inpatient hospital stays. The provider collects the copayment directly from the enrollee at the time the service is provided.

b. Medicare Beneficiaries

Individuals with Medicare and full-benefit Medicaid (dual eligibles) and Qualified Medicare Beneficiaries (QMB) are responsible for Medicaid copayments only. Medicaid covers the remainder of the Medicare copayment for these individuals. However, a provider is allowed to collect the Medicare copayment at the time of service. If the provider requires the individual to pay the Medicare copayment, the individual must be reimbursed or credited the difference between the Medicare and Medicaid copayments once the provider receives payment of the Medicaid claim.

B. Individuals Exempt from Copayments

The following individuals are exempt from the Medicaid copayments:

- children under 21 years old,
- *pregnant women*,
- individuals who receive long-term care services in a nursing facility, rehabilitation hospital, or long-stay hospital, and
- individuals receiving Medicaid community-based care (CBC) waiver services and hospice care.

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date January 2022
Subchapter Subject MEDICAL SERVICES	Page ending with M1850.100	Page 7

C. Services with No Copayments

The following services do not have copayments:

- emergency-room services,
- pregnancy-related services,
- family planning services, and
- dialysis services.

D. Covered Services

The services listed below are covered:

- case management services;
- certified pediatric nurse and family nurse practitioner services;
- clinical psychologist services;
- community-based services for individuals with intellectual disabilities, including day health rehabilitation services and case management;
- dental services for children enrolled in Medicaid and FAMIS, pregnant women enrolled in Medicaid, FAMIS MOMS, and FAMIS Prenatal Coverage, and effective July 1, 2021, all other adults with **full** Medicaid benefits.
- emergency hospital services;
- Early Periodic Screening, Diagnostic and Treatment (EPSDT) services;
- family planning services;
- Federally Qualified Health Center clinic services;
- home and community-based care waiver services (see subchapter M1440);
- home health services: nurse, aide, supplies, treatment, physical therapy, occupational therapy, and speech therapy services;
- hospice services;
- inpatient hospital services;
- Intensive Behavioral Dietary Counseling, for individuals in MEDICAID WORKS;
- intermediate care facility services for the intellectually disabled (ICF-ID);
- laboratory and x-ray services;

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date January 2022
Subchapter Subject MEDICAL SERVICES	Page ending with M1850.100	Page 8

- Medicare premiums: Hospital Insurance (Part A); Supplemental Medical Insurance (Part B) for the Categorically Needy (CN) and Medically Needy (MN);
- *behavioral health services, including clinic services, outpatient psychiatric services, mental health case management, psychosocial rehabilitation, mental health skill building, therapeutic day treatment for children and adolescents, intensive in-home services for children and adolescents, mental health partial hospitalization, mental health intensive outpatient, assertive community treatment, applied behavior analysis, multisystemic therapy, functional family therapy, mobile crisis response, community stabilization, 23-hour crisis stabilization, residential crisis stabilization unit services, therapeutic group homes and psychiatric residential treatment services.*
- nurse-midwife services;
- nursing facility care;
- other clinic services: services provided by rehabilitation agencies, ambulatory surgical centers, renal dialysis clinics, and local health departments;
- outpatient hospital services;
- personal assistance services, for individuals in MEDICAID WORKS;
- physical therapy and related services;
- physician services;
- podiatrist services;
- prescribed drugs;
- prosthetic devices;
- Rural Health Clinic services;
- skilled nursing facility services for individuals under age 21 years;
- substance abuse services;
- transplant services;
- transportation to receive medical services; and
- vision services.

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date May 2015
Subchapter Subject MEDICAL SERVICES	Page ending with M1860.100	Page 9

M1860.100 SERVICES RECEIVED OUTSIDE VIRGINIA

- A. General** Medicaid must pay for covered medical services received by any eligible person who is temporarily absent from Virginia if the medical service provider agrees to accept Medicaid payment.
- B. Out-of-State Institutional Placements** Virginia Medicaid will cover an *enrollee* who is placed in an *LTC* facility in another state only if the placement is preauthorized by the DMAS Long Term Care Section.
- A child in IV-E Foster Care who is placed in an institution outside Virginia is eligible for Medicaid through the state in which he resides. A child in non-IV-E Foster Care is eligible for Virginia Medicaid when the child is in an institution outside Virginia, since the child is considered to be a resident of the locality which holds custody.

M2000.000 EXTRA HELP - MEDICARE PART D LOW-INCOME SUBSIDY

M2010.100 EXTRA HELP GENERAL INFORMATION

A. Introduction

The Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003 (Public Law 108-173) amended Title XVIII of the Social Security Act by establishing Medicare Part D, the Voluntary Prescription Drug Benefit Program for individuals who are entitled to Medicare Part A and/or enrolled in Medicare Part B.

B. Medicaid and Medicare Part D Prescription Drug Coverage

For the purposes of Medicare Part D, *individuals* who are eligible for both Medicare and Medicaid benefits are considered *dually eligible*. Effective January 1, 2006, Medicaid *does not* provide prescription drug coverage for *dually eligible individuals*. *These individuals* receive their prescription drug coverage through Medicare Part D. *Medicaid will only cover prescription medication that cannot be covered by Medicare under the MMA, including some controlled medications.*

Medicare beneficiaries who are not eligible for Medicaid and who choose to participate in Medicare Part D are subject to cost-sharing obligations, including monthly premiums, deductibles, and copayments.

C Extra Help Low Income Subsidy

Extra Help is the subsidy provided under Medicare Part D that reduces out-of-pocket expenses for Medicare Part D enrollees who, based on their income and resources, are determined to be low-income. *Extra Help is the public name for the subsidy program; the Social Security Administration (SSA) generally refers to the subsidy as Low-Income Subsidy (LIS) in its contacts with state Medicaid programs. There are two levels of the LIS - the partial subsidy and the full subsidy. The individual's income and resources determine the level of subsidy an eligible individual receives.*

1. Dually Eligible Individuals Have Full LIS – No Premiums, Deductibles or Copays

Dually eligible individuals are automatically eligible for the *full LIS* and are enrolled using data matches from the Department of Medical Assistance Services (DMAS) and the Centers for Medicare and Medicaid Services (CMS). *Under the full LIS, dually eligible individuals* have no Medicare Part D premiums, deductibles, or threshold costs. All dually eligible individuals except those in nursing facilities have copayments ranging from \$1 to \$5 per prescription.

2. Non Dually Eligible Individuals

Medicare beneficiaries who are not eligible for Medicaid must apply for the subsidy and be determined eligible in order to receive assistance with their Medicare Part D cost-sharing obligations. More information about the benefits available under the LIS for non-dually eligible individuals is available on-line at <http://www.centerforbenefits.org>.

D. LIS Medicaid Applications

Effective January 1, 2011, all applications for the Extra Help LIS made to SSA are also considered applications for Medicaid. The SSA transmits data on all LIS applicants residing in Virginia to the Virginia Department of Social Services. A pre-populated Application for Adult Medical Assistance is generated by the Medicaid LIS system for individuals who are not currently enrolled in Medicaid and transmitted to the appropriate local agency. See M0120.300 B.10 for additional information about LIS Medicaid applications.

Manual Title Virginia Medical Assistance Eligibility	Chapter M20	Page Revision Date October 2011
Subchapter Subject M20 – EXTRA HELP	Page ending with M2010.100	Page 2

E. *Extra Help LIS Eligibility for Non Dual Eligibles*

Individuals who are not dually eligible and *not* automatically eligible for the LIS may be eligible for the LIS if all of the following are met:

- he is a resident of the United States,
- he is entitled to Medicare Part A and/or enrolled in Medicare Part B,
- he and his spouse, if married and living together, have countable income less than 150% of the federal poverty level (FPL) for his assistance unit size,
- he, and his spouse if married, has countable resources within the limits *for the LIS*, and
- he resides in the service area of a Part D prescription drug plan (service area does not include facilities in which individuals are incarcerated but otherwise covers the 50 States, District of Columbia, and U.S. Territories).

F. *LDSS Responsibilities*

The MMA mandates that eligibility for the Extra Help LIS can be determined by both the Social Security Administration (SSA) and the states. The local department of social services (LDSS) may also assist an individual with applying for Extra Help from the SSA in several ways, such as helping complete and/or submit the subsidy application directly to SSA, referrals to the SSA toll-free helpline, and helping to complete the on-line SSA application form. When the LDSS assists the individual with the application but does not determine eligibility, the LDSS does not have responsibility for the case.

1. *Individual Requests LDSS Determine LIS Eligibility*

*If an individual requests that the LDSS determine his eligibility for Extra Help, inform the individual that, when the Social Security Administration determines eligibility for Extra Help, the SSA is able to verify most income and resources **without** requesting documentation from the individual. Indicate that assistance with completing the application for the Extra Help LIS can also be provided by the SSA.*

2. *LDSS Responsibility for LIS Applications*

LDSS must determine eligibility for the LIS only in situations where an individual specifically requests that the agency do so. If such a request is made, the LDSS must comply with the request and must:

- determine eligibility,
- enroll the recipient if eligible,
- provide notice,
- participate in appeals,
- comply with reporting requirements, and
- provide ongoing case maintenance, including notices, appeals, and redeterminations, unless the applicant is later found to be deemed eligible for Extra Help or has been found eligible by SSA.

If the LDSS is required to determine an individual's eligibility for the LIS, contact a regional Medical Assistance Program Consultant for additional instructions.

M2100.000 FAMILY ACCESS TO MEDICAL INSURANCE SECURITY PLAN (FAMIS)

M2110.100 FAMIS GENERAL INFORMATION

A. Introduction

The Balanced Budget Act of 1997 created the State Children's Health Insurance Program, enacted as Title XXI of the Social Security Act, to provide funds to States to enable them to initiate the provision of child health insurance to **uninsured low-income children**.

FAMIS is not an entitlement program, which means that if funds for this program are exhausted, no additional individuals will receive benefits under the program. The Department of Medical Assistance Services (DMAS) will notify the Department of Social Services (DSS) Central Office if funds for this program run out.

Children found eligible for FAMIS receive benefits described in the State's Title XXI Child Health Insurance Program. Eligible children are enrolled for benefits effective the first day of the child's application month if all eligibility requirements are met in that month, but no earlier than the date of the child's birth.

Retroactive coverage is only available to an eligible child who was born within the 3 months prior to the FAMIS application month. Eligibility for FAMIS coverage will be effective retroactive to the child's date of birth if the child would have met all eligibility criteria during that time.

Eligibility for FAMIS is determined by either the local DSS, including a DSS outstationed site, or the Cover Virginia Central Processing Unit (CPU). *Approved* applications processed by the Cover Virginia CPU will be transferred to the appropriate local DSS for case maintenance.

B. Legal Basis

The 1998 Acts of Assembly, Chapter 464, authorized Virginia's Children's Health Insurance Program by creating the Children's Medical Security Insurance Plan for uninsured children under 19 years of age. In August 2001, the program was revised and renamed the Family Access to Medical Insurance Security Plan (FAMIS).

C. Policy

FAMIS covers uninsured low-income children under age 19 who are not eligible for Medicaid (children's Medicaid) and whose gross family income is less than or equal to 200% of the federal poverty level (FPL) for the individual's household size (see M2130.100 for the definition of the FAMIS household and Appendix 1 for the income limits).

Manual Title Virginia Medical Assistance Eligibility	Chapter M21	Page Revision Date July 2021
Subchapter Subject FAMIS	Page ending with M2120.100	Page 2

M2120.100 NONFINANCIAL ELIGIBILITY REQUIREMENTS

A. Introduction

The child must meet, with certain exceptions, the Medicaid Nonfinancial Eligibility Requirements in chapter M02 and the nonfinancial eligibility requirements imposed by FAMIS.

B. M02 Requirements

The nonfinancial eligibility requirements in chapter M02 that must be met for FAMIS eligibility are:

- the citizenship and alienage requirements, with the exception noted in M2120.100 C below;
- Virginia residency requirements;
- Provision of a Social Security Number (SSN) or proof of application for an SSN.
- Assignment of rights to payment for medical care from any liable third party is a condition of eligibility for the child;
- institutional status requirements regarding inmates of a public institution.

C. FAMIS Alien Status Requirements

Lawfully residing children under age 19 meet the FAMIS alien requirements without regard to their date of arrival or length of time in the U.S. The lawfully residing alien groups are contained in section M0220.314.

Exception to M02:

FAMIS does **not** provide emergency services only coverage for non-citizens who are not lawfully residing in the U.S., such as illegal aliens or those whose lawful admission status has expired. These aliens are not eligible for FAMIS.

If the child meets the definition of a pregnant woman in M0310.124 and does not meet the definition of a lawfully residing child under 19 in M0220.314, use Chapter M23 to evaluate the child for eligibility under FAMIS Prenatal Coverage.

D. FAMIS Nonfinancial Requirements

The child must meet the following FAMIS nonfinancial requirements:

1. Age Requirement

The child must be under age 19 for at least one day during the month. No verification is required.

A child no longer meets the age requirements for FAMIS effective the end of the month in which the child reaches age 19 years, provided he was under age 19 on the first day of the month. If the child was born on the first day of the month, his eligibility ends the last day of the month prior to the month he reaches age 19.

2. Uninsured Child

The child must be uninsured, that is, he must not be covered under any health insurance plan offering hospital and medical benefits. See M2120.200.

3. IMD Prohibition

The child cannot be an inpatient in an institution for the treatment of mental diseases (IMD).

Manual Title Virginia Medical Assistance Eligibility	Chapter M21	Page Revision Date October 2016
Subchapter Subject FAMIS	Page ending with M2120.200	Page 3

M2120.200 HEALTH INSURANCE COVERAGE

A. Introduction

The intent of FAMIS is to provide health coverage to low-income uninsured children. Eligibility for this program is prohibited when a child has creditable health insurance coverage, *except for a child who was enrolled in the Health Insurance Premium Payment (HIPP) Program while covered by Medicaid and who subsequently becomes income eligible for FAMIS.*

B. Definitions

1. Creditable Coverage

For the purposes of FAMIS, creditable coverage means coverage of the individual under any of the following:

- church plans and governmental plans;
- health insurance coverage, either group or individual insurance;
- military-sponsored health care;
- a state health benefits risk pool;
- the federal Employees Health Benefits Plan;
- Medicare
- a public health plan; and
- any other health benefit plan under section 5(e) of the Peace Corps Act.

The definition of creditable coverage includes short-term limited coverage.

2. Health Benefit Plan

“Health benefit plan” is defined in the Virginia Bureau of Insurance Regulations (14VAC5-234-30) and means:

- “any accident and health insurance policy or certificate,
- health services plan contract,
- health maintenance organization subscriber contract,
- plan provided by a Multiple Employer Welfare Arrangement (MEWA)”.

Manual Title Virginia Medical Assistance Eligibility	Chapter M21	Page Revision Date October 2021
Subchapter Subject FAMIS	Page ending with M2130.100	Page 4

Health benefit plan does not mean:

- Medicaid, FAMIS Plus, or State/Local Hospitalization;
- accident only;
- credit or disability insurance;
- long-term care insurance;
- dental only or vision only insurance;
- specified disease insurance;
- hospital confinement indemnity coverage;
- limited benefit health coverage;
- coverage issued as a supplement to liability insurance;
- insurance arising out of workers' compensation or similar law;
- automobile medical payment insurance; or
- insurance under which benefits are payable with or without regard to fault and that is statutorily required to be contained in any liability insurance policy or equivalent self-insurance.

3. Insured means having creditable health insurance coverage or coverage under a health benefit plan.

4. Uninsured means having no insurance; having insurance that is not creditable; having coverage which is not defined as a health benefit plan, or having a health insurance plan that does not have a network of providers in the area where the child resides.

C. Policy

A nonfinancial requirement of FAMIS is that the child be uninsured. A child **cannot**:

- have creditable health insurance coverage;
- have coverage under a group health plan (TRICARE, federal employee benefit plan, private group insurance such as Anthem, etc.) or Medicare;

If the child's health insurance is terminated on a day other than the last day of the month, FAMIS coverage begins effective the day after the insurance ended if all other eligibility requirements are met.

M2130.100 FINANCIAL ELIGIBILITY

A. Financial Eligibility

1. Asset Transfer Asset transfer rules do not apply to FAMIS.

2. Resources Resources are not evaluated for FAMIS.

3. Income **a. Countable Income**

FAMIS uses the MAGI methodology for counting income contained in chapter M04.

To the maximum extent possible, *attested* income must be verified by information obtained from electronic data sources, such as the federal hub or another reliable data source, prior to requesting paystubs or employer statements.

FAMIS uses MAGI methodology for estimating income (see chapter M04).

Manual Title Virginia Medical Assistance Eligibility	Chapter M21	Page Revision Date October 2021
Subchapter Subject FAMIS	Page ending with M2140.100	Page 5

b. Household Size

FAMIS uses MAGI methodology for determining household size (see Chapter M04).

c. Available Gross Income

Retroactive period (for newborns only) – available income is the gross income actually received in each month in the retroactive period.

Application month and ongoing months - available income is the average gross monthly income that is expected to be received in the application and ongoing months.

d. Income Limits

The FAMIS income limit is 200% of the FPL (see Appendix 1 to this subchapter) for the number of individuals in the FAMIS assistance unit. Per MAGI policy in chapter M04, a 5% FPL income disregard is applicable.

5. Spenddown

Spenddown does not apply to FAMIS. If the household's gross income exceeds the FAMIS income limits, the child is not eligible for the FAMIS program regardless of medical expenses.

M2140.100 APPLICATION and CASE PROCEDURES

A. Application Requirements

The policies in subchapters M0120 and M0130 apply.

B. Eligibility Determination

When an application is received and the child is not eligible for Medicaid due to excess income, determine eligibility for FAMIS. In order to complete an eligibility determination, both the FAMIS nonfinancial requirements in M2120.100 and the financial requirements in M2130.100 must be met

The applicant/enrollee must be notified in writing of the required information and the deadline by which the information must be received. Applications must be acted on as soon as possible, but no later than 45 days from the date the signed application was received.

C. Entitlement and Enrollment

1. Begin Date

Children determined eligible for FAMIS are enrolled for benefits effective the first day of the child's application month if all eligibility requirements are met in that month, **but no earlier than the date of the child's birth.**

If the child's health insurance is terminated on a day other than the last day of the month, FAMIS coverage begins effective the day after the insurance ended if all other eligibility requirements are met.

Manual Title Virginia Medical Assistance Eligibility	Chapter M21	Page Revision Date October 2022
Subchapter Subject FAMIS	Page ending with M2140.100	Page 6

2. Retroactive Coverage For Newborns Only

Retroactive coverage is available ONLY to an eligible child who was born within the 3 months prior to the FAMIS application month. Eligibility for FAMIS coverage will be effective retroactive to the child's date of birth if the child was born within the retroactive period and would have met all eligibility criteria during the retroactive period.

The following eligibility requirements must be met in order for a newborn child to be enrolled in FAMIS for retroactive FAMIS coverage:

- a. Retroactive coverage must be requested on the application form or in a later contact.
- b. The child's date of birth must be within the three months immediately preceding the application month (month in which the agency receives the signed application form for the child).
- c. The child must meet all the FAMIS eligibility requirements during the retroactive period.

3. FAMIS Aid Categories

The aid categories (ACs) for FAMIS are:

AC	Meaning
006	child under age 6 with income > 150% FPL and ≤ 200% FPL
007	child 6 – 19 with income > 150% FPL and ≤ 200% FPL
008	child under age 6 with income > 143% FPL and ≤ 150% FPL
009	child 6 – 19 with income > 143% FPL and ≤ 150% FPL
010	FAMIS deemed newborn <1 year old
014	FAMIS deemed newborn above 150% FPL

D. Notification Requirements

The eligibility worker must send a Notice of Action on Medicaid and FAMIS to the family informing them of the action taken the application. The notice must include the eligibility determination for both Medicaid and FAMIS.

If the child is ineligible for both Medicaid and FAMIS, the family must be sent a notice that the child is not eligible for either program. A referral to the Health Insurance Marketplace must be made, and the child must be given the opportunity to have a Medicaid medically needy evaluation if he is under 18 years. Along with the notice, request verification of resources using Appendix E, which can be found at: <http://www.coverva.org/mat/APPENDIX%20E%20Medically%20Needy%20application.pdf> (Application for Health Insurance and Help Paying Costs (Medical Needy Spenddown). Advise the family that if the signed application is returned within 10 calendar days, the original application date will be honored.

E. Transitions Between Medicaid And FAMIS (Changes and Renewals)

When excess income for Medicaid causes the child's eligibility to change from Medicaid to FAMIS, the new income must be verified or determined reasonably compatible using an electronic data source such as the federal Hub or another reliable data source prior to requesting paystubs or employer statements. For all case actions effective *August 26, 2022*, if the income attested to by the applicant is within 20% of the income information obtained from electronic sources OR both sources are below the applicable income limit, no additional verification is required. If the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return.

Manual Title Virginia Medical Assistance Eligibility	Chapter M21	Page Revision Date January 2018
Subchapter Subject FAMIS	Page ending with M2150.100	Page 7

F. FAMIS Select

Under the FAMIS program, a family, whose child(ren) are determined eligible for FAMIS and who has access to health insurance through an employer or wishes to purchase a private policy, has the option of enrolling the family in that health plan. “FAMIS Select” allows the choice of the private or employer’s insurance instead of FAMIS. Children enrolled in FAMIS whose families have access to private or employer sponsored health insurance coverage may qualify to have the State pay part of the family’s share of the health insurance premium.

If a child is enrolled in FAMIS and the family is interested in more information about FAMIS Select (and has access to health insurance), they may contact DMAS about the benefits of enrolling in the FAMIS Select component of FAMIS and information about how to participate in the program. Participation in the FAMIS Select component is voluntary.

G. 12-Month Continuous Coverage

Children under age 19 who are enrolled in FAMIS are entitled to 12 months of continuous coverage provided the family continues to reside in Virginia and the family income is less than or equal to 200% of the FPL.

Exception—If an individual enrolled in FAMIS becomes pregnant, reinstate her coverage in FAMIS MOMS. Her FAMIS MOMS coverage continues through the last day of the 12th month following the month in which the pregnancy ends. When her pregnancy ends, she will be redetermined for coverage in other covered groups.

Children enrolled in FAMIS who subsequently apply for Medicaid and are found eligible must have their FAMIS coverage cancelled so they can be reinstated in Medicaid.

H. Renewal Period Extension For Declared Disaster Areas

Effective January 1, 2017, if the Governor or the Federal Emergency Management Agency (FEMA) declares Virginia or any area in Virginia to be a disaster area, children enrolled in FAMIS who reside in the declared disaster area may be granted a 90-day extension of the continuous coverage period before their next renewal is due.

The extension of the renewal period applies only to children in a declared disaster area (1) for whom an ex parte renewal cannot be completed and (2) who do not return a renewal form or complete an online or telephonic renewal prior to the renewal due date.

The next 12-month continuous eligibility period begins the month after the renewal completion date.

M2150.100 REVIEW OF ADVERSE ACTIONS**A. Case Reviews**

An applicant for FAMIS may request a review of an adverse determination regarding eligibility for FAMIS. FAMIS reviews follow the procedures established by Medicaid for client appeals (see chapter M16).

The payment of medical services on the part of any child or any right to participate in the program is not subject to review if funds for FAMIS are exhausted.

M2200.000 FAMIS MOMS

M2210.100 FAMIS MOMS GENERAL INFORMATION

A. Introduction

The 2005 Appropriations Act directed the Department of Medical Assistance Services (DMAS) to expand medical coverage to uninsured pregnant women who are ineligible for Medicaid and have income in excess of the Medicaid limits, but whose family income is less than or equal to 200% of the federal poverty level (FPL). The Family Access to Medical Insurance Security (FAMIS) MOMS program was subsequently established. FAMIS MOMS was closed to new applications from January 1, 2014 until November 30, 2014. Enrollment in the program resumed on December 1, 2014.

Eligibility for FAMIS MOMS is determined by either the local DSS, including a DSS outstationed site, or the Cover Virginia Central Processing Unit (CPU). Applications processed by the Cover Virginia CPU will be transferred to the appropriate local DSS for case maintenance.

Eligible women are enrolled for benefits effective the first day of the application month if all eligibility requirements are met in that month. There is no retroactive coverage in FAMIS MOMS. Pregnant women found eligible for FAMIS MOMS receive the same benefits as Medicaid pregnant women, including comprehensive dental services. An eligible woman will receive coverage through her pregnancy and *for 12 months following the end of the month in which her pregnancy ends, regardless of income changes.*

B. Policy Principles

FAMIS MOMS covers uninsured low-income pregnant women who are not eligible for Medicaid due to excess income, and whose countable income is less than or equal to 200% of the FPL.

A pregnant woman is eligible for FAMIS MOMS if all of the following are met:

- she is not eligible for Medicaid and has income in excess of the Medicaid limits;
- she is a resident of Virginia;
- she is uninsured;
- she is not an inmate of a public institution;
- she is **not** an inpatient in an institution for mental diseases *at the time of application/reevaluation*; and
- she has countable family income less than or equal to 200% FPL.

Manual Title Virginia Medical Assistance Eligibility	Chapter M22	Page Revision Date July 2022
Subchapter Subject FAMIS MOMS	Page ending with M2220.100	Page 2

M2220.100 NONFINANCIAL ELIGIBILITY REQUIREMENTS

A. Policy

The pregnant woman must meet, with certain exceptions, the Medicaid nonfinancial eligibility requirements in Chapter M02 and the nonfinancial eligibility requirements imposed by FAMIS.

B. M02 Applicable Requirements

The Medicaid nonfinancial eligibility requirements in Chapter M02 that must be met are:

- citizenship or alien status, with the exception noted in M2220.100 C below;
- Virginia residency requirements;
- Provision of a Social Security Number (SSN) or proof of application for an SSN;
- assignment of rights;
- application for other benefits;
- institutional status requirements regarding inmates of a public institution.

C. FAMIS MOMS Alien Status Requirements

Lawfully residing pregnant women meet the FAMIS alien requirements without regard to their date of arrival or length of time in the U.S. The lawfully residing alien groups are contained in section M0220.314.

Exception to M02:

FAMIS MOMS does **not** provide emergency services only coverage for non-citizens who are not lawfully residing in the U.S., such as illegal aliens or those whose lawful admission status has expired. These aliens are not eligible for FAMIS MOMS but may be eligible for FAMIS Prenatal Coverage if they apply for coverage no later than the month their child is born. **Use Chapter M23 to evaluate the pregnant woman for eligibility under FAMIS Prenatal Coverage.**

D. FAMIS MOMS Covered Group Requirements

1. Declaration of Pregnancy

The woman's pregnancy is declared on the application and requires no further verification unless the agency has received conflicting information. See M0310.124 for the definition of a pregnant woman.

2. Must be Uninsured

The pregnant woman must be uninsured; that is, she must not be covered under any creditable health insurance plan offering hospital and medical benefits. If a pregnant woman has creditable health insurance that does not cover pregnancy, labor and/or delivery services, the pregnant woman is ineligible for FAMIS MOMS because she is insured. *If the pregnant woman obtains health insurance coverage after enrollment, she remains eligible for FAMIS MOMS coverage.*

3. IMD Prohibition

The pregnant woman cannot be in inpatient in an institution for the treatment of mental diseases (IMD) *at the time of application/reevaluation.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M22	Page Revision Date May 2015
Subchapter Subject FAMIS MOMS	Page ending with M2220.200	Page 3

M2220.200 HEALTH INSURANCE COVERAGE

A. Introduction

The intent of FAMIS MOMS is to provide health coverage to low-income uninsured pregnant women. A pregnant woman who has creditable health insurance coverage is not eligible for FAMIS MOMS.

B. Definitions

1. Creditable Coverage

For the purposes of FAMIS MOMS, creditable coverage means coverage of the individual under any of the following:

- church plans and governmental plans;
- health insurance coverage, either group or individual insurance;
- military-sponsored health care;
- a state health benefits risk pool;
- the federal Employees Health Benefits Plan; Medicare;
- a public health plan; and
- any other health benefit plan under section 5(e) of the Peace Corps Act.
- The definition of creditable coverage includes short-term limited coverage.

2. Employer-Sponsored Dependent Health Insurance

Employer-sponsored dependent health insurance means the employer pays a portion of the premium payment. COBRA coverage in which the employer makes no contribution to the payment of the premium is not employer-sponsored insurance.

3. Health Benefit Plan

“Health benefit plan” is defined in the Virginia Bureau of Insurance Regulations (14VAC5-234-30) and means:

- any accident and health insurance policy or certificate,
- health services plan contract,
- health maintenance organization subscriber contract,
- plan provided by a Multiple Employer Welfare Arrangement (MEWA)”.

Manual Title Virginia Medical Assistance Eligibility	Chapter M22	Page Revision Date June 2016
Subchapter Subject FAMIS MOMS	Page ending with M2220.300	Page 4

Health benefit plan does NOT mean:

- Medicaid;
- accident only;
- credit or disability insurance;
- long-term care insurance;
- dental only or vision only insurance;
- specified disease insurance;
- hospital confinement indemnity coverage;
- limited benefit health coverage;
- coverage issued as a supplement to liability insurance;
- insurance arising out of workers' compensation or similar law;
- automobile medical payment insurance; or
- insurance under which benefits are payable with or without regard to fault and that is statutorily required to be contained in any liability insurance policy or equivalent self-insurance.

4. Insured means having creditable health insurance coverage or coverage under a health benefit plan. A woman is considered to be insured if she is covered by a creditable health insurance plan, even if the policy or plan does not cover pregnancy-related services.

5. Uninsured means having no insurance; having insurance that is not creditable; having coverage which is not defined as a health benefit plan, or having a health insurance plan that does not have a network of providers in the area where the pregnant woman resides.

C. Policy

1. Must be Uninsured A nonfinancial requirement of FAMIS MOMS is that the pregnant woman be uninsured. A pregnant woman **cannot**:

- have creditable health insurance coverage; or
- have coverage under a group health plan (TRICARE, federal employee benefit plan, private group insurance such as Anthem, etc.) or Medicare.

2. Prior Insurance Prior insurance coverage is not a factor as long as the pregnant woman is uninsured during the month for which FAMIS MOMS eligibility is being determined.

M2220.300 NO CHILD SUPPORT COOPERATION REQUIREMENTS

A. Policy There are no requirements for FAMIS MOMS applicants or recipients to cooperate in pursuing support from an absent parent.

Manual Title Virginia Medical Assistance Eligibility	Chapter M22	Page Revision Date July 2022
Subchapter Subject FAMIS MOMS	Page ending with M2240.100	Page 5

M2230.100 FINANCIAL ELIGIBILITY

A. Financial Eligibility

1. Income

Modified Adjusted Gross Income (MAGI) methodology contained in Chapter M04 is used for the FAMIS MOMS income evaluation. To the maximum extent possible, attested income must be verified by information obtained from electronic data sources, such as the federal hub or another reliable data source, prior to requesting paystubs or employer statements. For all case actions effective October 26, 2019, if the income attested to by the applicant is within 10% of the income information obtained from electronic sources OR both sources are below the applicable income limit, no additional verification is required. If the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return.

The FAMIS MOMS income limit is 200% of the FPL (see Appendix 1 to this chapter) for the number of individuals in the pregnant woman's MAGI household composition as defined in M04. The pregnant woman is counted as herself plus the number of children she is expected to deliver. Per MAGI policy in chapter M04, a 5% FPL income disregard is applicable.

2. Resources

Resources are not evaluated for FAMIS MOMS.

3. No Spenddown

Spenddown does not apply to FAMIS MOMS. If countable income exceeds the FAMIS MOMS income limit, the pregnant woman is not eligible for the FAMIS MOMS program. She must be referred to the Health Insurance Marketplace and be given the opportunity to have a MN Medicaid evaluation.

M2240.100 APPLICATION and CASE PROCEDURES

A. Application Requirements

The policies in subchapters M0120 and M0130 apply.

B. Eligibility Determination

1. Pregnant Individual Under Age 19

Process an application by a pregnant *individual* under age 19 in the following order:

- .Determine eligibility for Medicaid as a pregnant woman; if not eligible because of excess income, go to item *b*.
- . Determine eligibility for FAMIS MOMS; if not eligible because of excess income, go to item *c* .
- a. If she is not eligible for FAMIS MOMS because of excess income, she must be referred to the Health Insurance Marketplace and given the opportunity to have a Medically Needy evaluation completed.

Manual Title Virginia Medical Assistance Eligibility	Chapter M22	Page Revision Date July 2022
Subchapter Subject FAMIS MOMS	Page ending with M2240.100	Page 6

2. 7 Calendar Day Processing

Applications for pregnant women must be processed as soon as possible, but no later than seven (7) calendar days from the date the signed application was filed. If all necessary verifications are not received, the application continues to pend until the 45 day processing time limit is met.

3. Notice Requirements

The applicant/recipient must be notified in writing of the required information and the deadline by which the information must be received.

The agency must have all necessary verifications within 7 calendar days in order to determine eligibility. If the agency does not receive the verifications within the 7 calendar days, the worker must send the applicant written notice on the 7th day. The notice must state why action on the application could not be taken, specify what documentation is necessary in order to determine eligibility, and give a deadline of at least 10 calendar days to submit the verification.

Once all necessary verifications for the pregnant woman are received, an eligibility determination must be made immediately and the applicant must be notified of the decision.

C. Case Setup Procedures for Approved Cases

A woman enrolled as FAMIS MOMS may have the same base case number in the Medicaid Enterprise System (MES—formerly the Virginia Medicaid Management Information System [MMIS]) as Medicaid enrollees.

D. Entitlement and Enrollment

1. Dates of Coverage

Pregnant women determined eligible for FAMIS MOMS are enrolled for benefits effective the first day of the application month, if all eligibility requirements are met in that month. *FAMIS MOMS coverage ends the last day of the 12th month after the end of the month in which the pregnancy ends.*

2. No Retroactive Coverage

There is no retroactive coverage in the FAMIS MOMS program.

3. Aid Category

The FAMIS MOMS aid category (AC) is “005.”

E. Notification Requirements

Written notice must be sent to the pregnant woman informing her of the action taken on the application. The notice must include the eligibility determination results for both Medicaid and FAMIS MOMS, as well as a referral to the Health Insurance Marketplace, if applicable.

If the pregnant woman is ineligible for both Medicaid and FAMIS MOMS due to excess income, she must be sent a written notice that she is not eligible for either program and that her case has been referred to the Health Insurance Marketplace. She must also be given the opportunity to have a Medicaid medically needy evaluation completed. Send the notice and a request for information about her resources to the pregnant woman and advise her that if the resource information is returned within 10 days the original application date will be honored.

Manual Title Virginia Medical Assistance Eligibility	Chapter M22	Page Revision Date October 2017
Subchapter Subject FAMIS MOMS	Page ending with M2250.100	Page 7

**F. Application Not
Required for
Newborn**

The newborn child born to a FAMIS MOMS enrollee is deemed eligible for FAMIS coverage until his first birthday. Follow the procedures for enrolling a newborn in M0330.802, using the appropriate AC as follows:

AC 010 = mother's income > 143% FPL but \leq 150% FPL

AC 014 = mother's income > 150% FPL but \leq 200% FPL.

Act on the enrollment of a deemed newborn as soon as feasible when the birth is reported to the local DSS office or to DMAS.

M2250.100 REVIEW OF ADVERSE ACTIONS

An applicant for FAMIS MOMS may request a review of an adverse determination regarding eligibility for FAMIS MOMS. FAMIS MOMS follows the procedures established by Medicaid for client appeals (see Chapter M16).

The payment of medical services on the part of any pregnant woman or any right to participate in the program is not subject to review if the reason for denial or cancellation is that funds for the FAMIS MOMS program are exhausted.

M2300.000 FAMIS PRENATAL COVERAGE

M2310.100 FAMIS PRENATAL COVERAGE GENERAL INFORMATION

A. Introduction

The 2021 Special Sessions I Appropriations Act directed the Department of Medical Assistance Services (DMAS) to amend the Family Access to Medical Insurance Security Plan (FAMIS) and expand medical coverage to uninsured pregnant women and their unborn children

- who are ineligible for full-benefit Medicaid or FAMIS Moms due to the woman's immigration status and
- whose Modified Adjusted Gross Income (MAGI) household income is less than or equal to 200% of the federal poverty level (FPL).

FAMIS Prenatal Coverage is effective beginning July 1, 2021.

Eligibility for FAMIS Prenatal Coverage is determined by either the local DSS, including a DSS outstationed site, or the Cover Virginia Central Processing Unit (CPU). Applications processed by the Cover Virginia CPU will be transferred to the appropriate local DSS for case maintenance.

Eligible women are enrolled for benefits effective the first day of the application month if all eligibility requirements are met in that month. There is no retroactive coverage in FAMIS Prenatal Coverage. If the woman applies for coverage after the month in which the child is born but within the application's retroactive period, she may be eligible for Medicaid coverage of the labor and delivery as emergency services if the woman's countable MAGI household income is within the Medicaid limit. See M0220.400.

Pregnant women found eligible for FAMIS Prenatal Coverage receive the same benefits as Medicaid and FAMIS MOMS pregnant women, including comprehensive dental services.

An eligible woman will receive coverage through her pregnancy and the end of the month in which the 60th day following the end of the pregnancy occurs. An infant born to a woman enrolled in FAMIS Prenatal Coverage will receive ongoing coverage beginning on the date of the infant's birth. The infant's coverage will be in Medicaid or FAMIS, based on the mother's MAGI household unit income at the time of application. The infant's birth is evaluated as a case change; an application does not need to be submitted for the infant.

B. Policy Principles

FAMIS Prenatal Coverage covers uninsured low-income pregnant women who are not eligible for Medicaid or FAMIS MOMS due to the woman's immigration status and whose countable income is less than or equal to 200% of the FPL.

A pregnant woman **of any age** is eligible for FAMIS Prenatal Coverage if all of the following are met:

- she applies for coverage while pregnant or in the month of the birth of her infant child;

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M23	July 2021
Subchapter Subject	Page ending with	Page
FAMIS PRENATAL COVERAGE	M2320.100	2

- she does not meet the definition of a **lawfully residing non-citizen pregnant woman in M0220.314**.
- she is a resident of Virginia;
- she is uninsured;
- she is not an inmate of a public institution;
- she is not an inpatient in an institution for mental diseases; and
- she has countable MAGI household income less than or equal to 205% FP (200% FPL plus 5% FPL disregard)..

M2320.100 NONFINANCIAL ELIGIBILITY REQUIREMENTS

A. Policy

The pregnant woman must meet, with certain exceptions, the Medicaid nonfinancial eligibility requirements in Chapter M02 and must be uninsured.

B. M02 Applicable Requirements

The Medicaid nonfinancial eligibility requirements in Chapter M02 that must be met are:

- Virginia residency requirements (M0230)
- assignment of rights (M0250)
- application for other benefits (M0270)
- institutional status requirements regarding inmates of a public institution (M0280).

The Social Security Number (SSN) requirement does not apply to the pregnant woman.

C. Alien Status and FAMIS Prenatal Coverage

FAMIS Prenatal Coverage is limited to a pregnant woman of any age who **does not** meet the lawfully residing alien status requirement for pregnant women for full-benefit coverage in M0220.314 and who applies for coverage while pregnant or no later than the month in which the infant is born.

A pregnant woman who does not meet the lawfully residing alien status requirement and who applies for coverage after the month in which the child is born but within the application's retroactive period may be eligible for Medicaid coverage of the labor and delivery as emergency services if the woman's countable MAGI household income is within the Medicaid or limit or she is eligible as Medically Needy. See M0220.400.

D. FAMIS Prenatal Coverage Covered Group Requirements

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M23	July 2021
Subchapter Subject	Page ending with	Page
FAMIS PRENATAL COVERAGE	M2320.200	3

1. **Declaration of Pregnancy** The woman's pregnancy and the number of unborn children are declared on the application and require no further verification unless the agency has received conflicting information. See M0310.124 for the definition of a pregnant woman.
2. **Must be Uninsured** The pregnant woman must be uninsured; that is, she must not be covered under any creditable health insurance plan offering hospital and medical benefits. If a pregnant woman has creditable health insurance that does not cover pregnancy, labor and/or delivery services, the pregnant woman is ineligible for FAMIS Prenatal Coverage because she is insured.
3. **IMD Prohibition** The pregnant woman cannot be an inpatient in an institution for mental diseases (IMD).

M2320.200 HEALTH INSURANCE COVERAGE

- A. Introduction** A pregnant woman who has creditable health insurance coverage is not eligible for FAMIS Prenatal Coverage.

FAMIS Prenatal coverage provides the same coverage as FAMIS MOMS, including coverage of prenatal care, other medical care, dental care, and transportation to received covered services. Pregnant women enrolled in FAMIS Prenatal Coverage will receive care through a managed care organization (see M1830.100)

B. Definitions

1. **Creditable Coverage** For the purposes of FAMIS Prenatal Coverage, creditable coverage means coverage of the individual under any of the following:
 - church plans and governmental plans;
 - health insurance coverage, either group or individual insurance;
 - military-sponsored health care;
 - a state health benefits risk pool;
 - the federal Employees Health Benefits Plan; Medicare;
 - a public health plan; and
 - any other health benefit plan under section 5(e) of the Peace Corps Act.
 - The definition of creditable coverage includes short-term limited coverage.
2. **Employer-Sponsored Dependent Health Insurance** Employer-sponsored dependent health insurance means the employer pays a portion of the premium payment. COBRA coverage in which the employer makes no contribution to the payment of the premium is not employer-sponsored insurance.
3. **Health Benefit Plan** "Health benefit plan" is defined in the Virginia Bureau of Insurance Regulations (14VAC5-234-30) and means:
 - any accident and health insurance policy or certificate,
 - health services plan contract,
 - health maintenance organization subscriber contract,
 - plan provided by a Multiple Employer Welfare Arrangement (MEWA)".

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M23	July 2021
Subchapter Subject	Page ending with	Page
FAMIS PRENATAL COVERAGE	M2320.300	4

Health benefit plan does NOT mean:

- Medicaid;
- accident only;
- credit or disability insurance;
- long-term care insurance;
- dental only or vision only insurance;
- specified disease insurance;
- hospital confinement indemnity coverage;
- limited benefit health coverage;
- coverage issued as a supplement to liability insurance;
- insurance arising out of workers' compensation or similar law;
- automobile medical payment insurance; or
- insurance under which benefits are payable with or without regard to fault and that is statutorily required to be contained in any liability insurance policy or equivalent self-insurance.

4. Insured means having creditable health insurance coverage or coverage under a health benefit plan. A woman is considered to be insured if she is covered by a creditable health insurance plan, even if the policy or plan does not cover pregnancy-related services.

5. Uninsured means having no insurance; having insurance that is not creditable; having coverage which is not defined as a health benefit plan, or having a health insurance plan that does not have a network of providers in the area where the pregnant woman resides.

C. Policy

1. Must be Uninsured A nonfinancial requirement of FAMIS Prenatal Coverage is that the pregnant woman be uninsured. A pregnant woman **cannot**:

- have creditable health insurance coverage; or
- have coverage under a group health plan (TRICARE, federal employee benefit plan, private group insurance such as Anthem, etc.) or Medicare.

2. Prior Insurance Prior insurance coverage is not a factor as long as the pregnant woman is uninsured during the month for which FAMIS Prenatal Coverage eligibility is being determined.

M2320.300 NO CHILD SUPPORT COOPERATION REQUIREMENTS

A. Policy There are no requirements for FAMIS Prenatal Coverage applicants or members to cooperate in pursuing support from an absent parent.

Manual Title Virginia Medical Assistance Eligibility	Chapter M23	Page Revision Date October 2022
Subchapter Subject FAMIS PRENATAL COVERAGE	Page ending with M2340.100	Page 5

M2330.100 FINANCIAL ELIGIBILITY

A. Financial Eligibility

1. Income

MAGI methodology contained in Chapter M04 is used for the FAMIS Prenatal Coverage income evaluation. To the maximum extent possible, attested income must be verified by information obtained from electronic data sources, such as the federal hub or another reliable data source, prior to requesting paystubs or employer statements. If the income attested to by the applicant is within 20% of the income information obtained from electronic sources OR both sources are below the applicable income limit, no additional verification is required. If the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return. If the documentation is delayed in the mail due to no fault of the applicant, accept delayed documentation and complete application processing.

The FAMIS Prenatal Coverage income limit is 200% of the FPL (see Appendix 1 to this chapter) for the number of individuals in the pregnant woman's MAGI household composition as defined in M04. The pregnant woman is counted as herself plus the number of children she is expected to deliver. Per MAGI policy in chapter M04, a 5% FPL income disregard is applicable.

2. Resources

Resources are not evaluated for FAMIS Prenatal Coverage.

3. No Spenddown

Spenddown does not apply to FAMIS Prenatal Coverage. If countable income exceeds the FAMIS Prenatal Coverage income limit, the pregnant woman is not eligible for the FAMIS Prenatal Coverage program. If the woman has no documentation of immigration status, DO NOT make a referral to the Health Insurance Marketplace

M2340.100 APPLICATION and CASE PROCEDURES

A. Application Requirements

The policies in subchapters M0120 and M0130 apply.

B. Eligibility Determination

1. 7 Calendar Day Processing

Applications for pregnant women must be processed as soon as possible, but no later than seven (7) calendar days from the date the signed application was filed. If all necessary verifications are not received, the application continues to pend until the 45 day processing time limit is met.

2. Notice Requirements

The applicant/recipient must be notified in writing of the required information and the deadline by which the information must be received.

The agency must have all necessary verifications within 7 calendar days in order to determine eligibility. If the agency does not receive the verifications within the 7 calendar days, the worker must send the applicant written notice on the 7th day. The notice must state why action on the application could not be taken, specify what documentation is necessary in order to determine eligibility, and give a deadline of at least 10 calendar days to submit the verification.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M23	October 2022
Subchapter Subject	Page ending with	Page
FAMIS PRENATAL COVERAGE	M2340.100	6

Once all necessary verifications for the pregnant woman are received, an eligibility determination must be made immediately and the applicant must be notified of the decision.

**C. Case Setup
Procedures for
Approved Cases**

A woman enrolled as FAMIS Prenatal Coverage may have the same base case number in the Medicaid Enterprise System (MES—formerly the Virginia Medicaid Management Information System [MMIS]) as Medicaid enrollees.

**D. Entitlement and
Enrollment**

**1. Begin Date of
Coverage**

Pregnant women determined eligible for FAMIS Prenatal Coverage are enrolled for benefits effective the first day of the application month, if all eligibility requirements are met in that month.

**2. No Retroactive
Coverage**

There is no retroactive coverage in the FAMIS Prenatal Coverage program.

3. Aid Categories

The FAMIS Prenatal Coverage aid categories (AC)* are:

- 110 for pregnant women with income $\leq 143\%$ FPL
- 111 for pregnant women with income $>143\%$ FPL but $\leq 200\%$ FPL.

Note: A change in the MMIS enrollment system was effective July 1, 2022 to display the FAMIS Prenatal aid categories AC110 / AC111. Anyone enrolled prior to July 1, 2022 will remain in aid category AC005 if eligibility is not run and updated to the new AC.

4. Coverage Period

After her eligibility is established as a pregnant woman, the woman's FAMIS Prenatal Coverage entitlement continues through her pregnancy and the 60-day period following the end of her pregnancy regardless of income changes. Her coverage ends the last day of the month in which the 60th postpartum day occurs. The 12-month coverage period for pregnant women in Medicaid and FAMIS MOMS is not applicable to FAMIS Prenatal Coverage.

**E. Notification
Requirements**

Written notice must be sent to the pregnant woman informing her of the action taken on the application. The notice must include the eligibility determination results for FAMIS Prenatal Coverage.

If the woman is not eligible for FAMIS Prenatal Coverage and has no documentation of immigration status, DO NOT make a referral to the Health Insurance Marketplace.

**F. Enrolling Infant Born
to a Woman in
FAMIS Prenatal
Coverage**

For women assigned to AC 110 under a fee for service (FFS) arrangement, her labor and delivery services are paid as emergency services, and the newborn is considered a deemed-eligible newborn. When the birth of the child born to a women enrolled in FAMIS Prenatal Coverage is reported, review the available systems to determine if the mother is assigned to AC110 under FFS. If so, the child is enrolled as a deemed newborn in AC 093.

An infant born to a woman in FAMIS Prenatal Coverage who is assigned to AC 111 and/or enrolled in managed care must be evaluated for ongoing coverage. The enrollment is treated as a change in circumstances. The infant is not considered a deemed-eligible newborn but has rather been enrolled prenatally through the mother's enrollment in FAMIS Prenatal Coverage. The infant's birth is treated as an "add a person" case change in the enrollment system. Follow the procedures in M2340.100 F.1 – F.3 below.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M23	October 2021
Subchapter Subject	Page ending with	Page
FAMIS PRENATAL COVERAGE	M2340.100	7

.Name, date of birth, sex (gender)

- Information about the infant's MAGI household and income, if not available in the case record

Unless the agency has information about the infant's father living in the home (i.e. for another program), use only the mother's reported income to enroll the infant. Do not request information about the father or the father's income unless the agency has information about the father living in the home and his income.

Note: The infant is not required to provide an SSN or proof of application for an SSN in order to be enrolled. Follow the procedures in M0240.200 B.3 90 days following the infant's enrollment to determine if an SSN has been assigned. If the SSN number has not yet been issued at 90 days, obtain the SSN or proof of application for an SSN at the first renewal of the infant's coverage.

2. Enrollment and Aid Category

Update the case with the new infant's information, enrolling the child as a Medicaid child under 19 or in FAMIS, as appropriate based on the mother's countable income at the time of application. Use the appropriate AC below to enroll the infant:

- Medicaid AC 090 for income $> 109\% \text{ FPL} \leq 143\% \text{ FPL}$
- Medicaid AC 091 for income $\leq 109\% \text{ FPL}$
- FAMIS AC 006 for income $> 150\% \text{ FPL}$ and $\leq 200\% \text{ FPL}$
- FAMIS AC 008 for income $> 143\% \text{ FPL}$ and $\leq 150\% \text{ FPL}$

3. Renewal

The infant's first renewal is due 12 months from the month of the infant's enrollment.

G. Examples

Example 1

Rose is pregnant and is carrying one unborn child. She was born outside the U.S. She applies for Medicaid on October 27, 2021. She reported on the application that she visited the emergency room in August 2021. The retroactive period for her application is July – September 2021.

Rose is unable to verify that she is lawfully residing in the U.S.; therefore, she cannot be eligible for full-benefit Medicaid or FAMIS Moms and is evaluated for FAMIS Prenatal Coverage. Her verified countable monthly income is \$1,756 per month, which is under the income limit for FAMIS Prenatal Coverage for her MAGI household size of two. She is approved for FAMIS Prenatal coverage and enrolled effective October 1, 2021, in AC 110, based on her countable income of under 143% FPL (see M23, Appendix 1). She is enrolled in Managed Care, so her infant will not be considered a deemed-eligible newborn.

Because she received an emergency service during the retroactive period and her income is under the Medicaid limit for a pregnant woman, she is evaluated for Emergency Services coverage.

Rose's son, AJ, is born on February 25, 2022, and is enrolled in AC 090 beginning February 25, 2022. His Medicaid renewal is due in January 2023. Rose's FAMIS Prenatal Coverage ends on April 30, 2022.

Manual Title Virginia Medical Assistance Eligibility	Chapter M23	Page Revision Date July 2021
Subchapter Subject FAMIS PRENATAL COVERAGE	Page ending with M2350.100	Page 8

Example 2

Jo lives with her husband Al and daughter Em, who was born on October 31, 2021. Jo was born outside the U.S. She applies for Medical Assistance on November 25, 2021 and requests retroactive coverage for her pregnancy. She does not request coverage for her husband.

Jo is unable to verify that she is lawfully residing in the U.S.; therefore, she cannot be eligible for full-benefit Medicaid or FAMIS Moms. Because Jo applied for coverage the month after her infant's birth, she cannot be eligible for FAMIS Prenatal Coverage

Jo's MAGI household consists of three people—Jo, her infant, and her husband. The verified countable monthly income for the household is \$3,473.

Jo's countable income is over the limit of 143% FPL for Medicaid and has excess resources for Medically Needy eligibility; therefore, she cannot be approved for Medicaid coverage of emergency services for the labor and delivery.

Em is determined to be eligible for FAMIS, which covers an eligible child who was born within the 3 months prior to the application month. Em is enrolled effective October 31, 2021, in AC 006. Her renewal is due in September 2022.

The eligibility worker sends a Notice of Action indicating Jo is not eligible for Medicaid or FAMIS Prenatal Coverage and Em has been enrolled in FAMIS.

M2350.100 REVIEW OF ADVERSE ACTIONS

An applicant for FAMIS Prenatal Coverage may request a review of an adverse determination regarding eligibility for FAMIS Prenatal Coverage. FAMIS Prenatal Coverage follows the procedures established by Medicaid for client appeals (see Chapter M16).

The payment of medical services on the part of any pregnant woman or any right to participate in the program is not subject to review if the reason for denial or cancellation is that funds for the FAMIS Prenatal Coverage program are exhausted.

Virginia Medical Assistance Eligibility Manual
Transmittal #DMAS-26

The following acronyms are contained in this letter:

- COVID – Coronavirus Disease
- DMAS – Department of Medical Assistance Services
- DOC – Department of Corrections
- FC – Foster Care
- IMD – Institution for the Treatment of Mental Diseases
- LDSS – Local Department of Social Services
- LIFC – Low Income Families with Children
- LTSS – Long-term Services and Supports
- MAGI – Modified Adjusted Gross Income
- NABD – Non-Aged, Blind or Disabled
- PHE – Public Health Emergency
- TN – Transmittal

TN #DMAS-26 includes policy clarifications, updates and revisions. Unless otherwise noted in the Cover Letter and/or policy, all provisions included in this transmittal are effective with eligibility determinations and post-eligibility (patient pay) calculations made on or after January 1, 2023. Note that COVID-19 PHE guidelines continue until the emergency is over and are not referenced in Medical Assistance Eligibility Policy.

The following changes are contained in TN #DMAS-26:

Changed Pages	Changes
Subchapter M0130.200	Reasonable Compatibility income determination applies to applications, reapplications, case changes and renewals.

TN #DMAS-26

January 1, 2023

Page 2

Changed Pages	Changes
Subchapter M0140.200	Clarifies that an approved offender is enrolled in full Medicaid upon release.
Subchapter M0220	Removes references to the requirement that certain non-citizens have 40 qualifying quarters of work history to be a “qualified alien.”
Subchapter M0280.300	Clarifies offender status if in DOC CCAP program.
Chapter M03, Appendix 1	Updates contact information for DDS Regional office and remove individual office contacts.
Subchapter M0310	Modifies name of aid category of former foster care children and removes requirement to have been in FC in Virginia.
Subchapter M0320.203	Updates COLA and Medicare changes for 2023.
Subchapter M0330.220	Clarifies that if the individual’s income exceeds the LIFC income limit, the individual is not eligible as LIFC. Individuals should then be evaluated as MAGI prior to extension evaluation.
Subchapter M0450.400	Clarifies that if the individual does not provide the necessary verifications for the gap-filling evaluation the application should be denied.
Subchapter M0530, Appendix 1	Updates the NABD deeming standard for 2023.
Subchapter M0810.002	Updates SSI amounts for 2023.
Subchapter M0820	Updates Student Earned Income Exclusion for 2023.
Subchapter M0830	Removes reference to SPARK; clarifies that SSA increase disregard applies to intake as well as ongoing evaluations. Adds reference to disregarding KinGap payments.
Subchapter M1110	Updates the MSP resource limits for 2023.
Subchapter M1420	Clarifies that an LTSS authorization is not required prior to determining financial eligibility using rules for institutionalized individuals. If the individual meets the definition of institutionalization they are evaluated using these rules.

TN #DMAS-26

January 1, 2023

Changed Pages	Changes
Subchapter M1450.830	Adds email address to send 225 to DMAS.
Subchapter M1460	Updates the home equity limit and Student Earned Income Exclusion.
Subchapter M1470	Updates the Special Earnings Allowance.
Subchapter M1480	Updates the home equity limit, the spousal resource standards, the maximum monthly maintenance needs allowance, the personal maintenance allowance, and the special earnings allowance.
Subchapter M1520	Clarifies that if ineligible for the Medicaid extensions, individuals must be evaluated for eligibility other covered groups (including MAGI) prior to medically needy evaluation. Also clarifies that an auxiliary grant (AG) case should be retained by the agency issuing the grant.
Subchapter M1850	Removes references to Medicaid co-pays.

Please retain this TN letter for future reference. Should you have questions about information contained in this transmittal, please contact Cindy Olson, Director, DMAS Eligibility and Enrollment Services Division, at cindy.olson@dmass.virginia.gov or (804) 225-4282.

Sincerely,

Sarah Hatton

TN #DMAS-21	10/1/21	Page 14
TN #DMAS-20	7/1/21	Page 2 Page 2a is a runover page.
TN #DMAS-18	1/1/21	Pages 4, 8, 13

Manual Title Virginia Medical Assistance Eligibility	Chapter M01	Page Revision Date January 2023
Subchapter Subject M0130 APPLICATION PROCESSING	Page ending with M0130.200	Page 10

from these available sources, including the VEC, may be used if the information is less than 12 months old. The agency must include in each applicant's case record facts to support the agency's decision on the case.

1. **Resources** The value of all countable, non-excluded resources must be verified. If an applicant's attested resources are over the resource limit, the applicant or authorized representative must be given the opportunity to provide verification of the resources. All available resource verification system(s) must be searched prior to requesting information from the applicant.
2. **Use of Federal Income Tax Data** The Hub provides verification of income reported to the IRS. Income information reported to the IRS may be used for eligibility determinations for Families and Children (F&C), MAGI Adults, and ABD covered groups when IRS information is available. The income reported on the application is compared to the data obtained from the Hub for reasonable compatibility per M0420.100. When IRS verification is used for an ABD individual, reasonable compatibility is acceptable as verification of earned (i.e. taxable) income.

Note: Reasonable compatibility applies to applications, reapplications *and renewals*.
3. **SSA Data** Social Security and/or Supplemental Security Income must be verified through SSA. The Federal Hub links to SSA data. SOLQ-I may also be used. The State Data Exchange (SDX) system should only be used as an alternate method when the Hub or SOLQ-I is not available.
4. **Income** For all case actions effective *August 26, 2022*, the applicant's attested income, including when the applicant attests to having zero (\$0.00) income, is considered the verified income if the income attested to by the applicant is within 20% of the income reported by electronic data sources OR both sources are below the applicable income limit.

If the attested income is under the income limit and the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return. If the applicant meets a MN covered group, verification of income **is required** to determine spenddown liability based on actual income received.

For individuals requesting long-term services and supports (LTSS), verification of income is required to calculate the patient pay. See M1470.

If the attested income is over the income limit and the individual does not meet a Medically Needy (MN) covered group, deny the application.

If the individual agrees that the discovered countable income was received, determine if the on-line information can be used to evaluate current/ongoing eligibility. If the discovered information is not sufficient to evaluate eligibility, send a written request for needed verifications and allow at least ten calendar days for the return of the verifications.

If the individual reports the income has stopped, ask when the income stopped to ensure all income needed to correctly determine prospective and retroactive eligibility (if appropriate) is evaluated. Note the date of termination of income (last pay received) in the record. If the income stopped during a month that is being evaluated for eligibility, the individual must provide verification of the termination of income.

**C. Offender
Application
Processing**

An application is not to be refused or denied because an applicant is incarcerated. A person is not required to have had an inpatient hospitalization in order to apply for Medicaid. The agency must evaluate the eligibility of all MA enrollees, with respect to circumstances that may change, at least every 12 months unless the enrollee is pregnant (see M1520.200 p.9).

**1. New
Application**

An offender who does not have active Medicaid coverage may apply while incarcerated. Coverage is based on the month of application and can include up to three months of coverage (if requested) prior to the month of application, provided eligibility requirements are met.

Ongoing coverage in AC 108 or AC 109 is effective the first day of the month of application or the date when incarceration begins, whichever is later.

**2. Re-entry
Process**

A medical assistance application for an offender with no active Medicaid coverage and an anticipated release date within 45 days is handled as part of a “Re-Entry” process and will follow the same procedure as a New Application (ref M0140.200.C.1). If the offender is approved the case will have a redetermination conducted for ongoing Medicaid coverage. This is a new application and an eligibility determination for Medicaid coverage will be made based on the information as reported or known at the time of release from the facility. *If approved the member will be enrolled upon release.*

If the person is approved but is unable to or does not provide a post-release address where he will reside (e.g. reports as homeless or moving to a temporary shelter) the case will be transferred to the LDSS of his pre-incarceration, if known. If there is no known address, or the individual lived outside of Virginia prior to incarceration and intends to remain in the state, transfer the case to the LDSS where the correctional facility is physically located.

If the application is approved the worker will confirm that a new Commonwealth of Virginia Medicaid Card has been generated and a copy of the Notice of Action sent to the anticipated post-release address.

**3. Emergency
Services**

A non-citizen who meets all Medicaid eligibility requirements except for immigration status, and has received an inpatient hospitalization, may qualify for coverage of emergency medical care. This care must have been provided in a hospital emergency room or as an inpatient in a hospital. Determine eligibility for emergency services using policy in M0220.400 and enroll eligible individuals using the procedures in M0220.600 D.

For cases processed at the Cover Virginia Incarcerated Unit (CVIU) the individual will be enrolled in the appropriate AC 112 or AC 113 and the case will be retained at the CVIU for ongoing case maintenance.

Emergency Services coverage in AC 112 or AC 113 is effective the first day of the month of application, the first day of the retroactive period, or the date when incarceration begins, whichever is earliest.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M02	January 2023
Subchapter Subject	Page ending with	Page
M0220.000 CITIZENSHIP & ALIEN REQUIREMENTS	Appendix 3	2

- D. Information received through SVES will not report earnings for the current year nor possibly the last year's earnings (i.e. the lag period). The SVES report will also not include employment that is not covered under Social Security (i.e. not requiring payment of FICA/Social Security tax). The applicant must provide verification of earnings through pay stubs, W-2 forms, tax records, employer records, or other documents, if quarters of the lag period or non-covered employment are needed.

If the alien believes the information from SSA is inaccurate or incomplete, beyond the current two-year lag period, advise the applicant to provide the verification to SSA to correct the inaccurate income records.

In evaluating the verification received directly from the applicant or through SVES, **exclude** any quarter, beginning January 1997, in which the person who earned the quarter received benefits from the TANF, SSI, or Medicaid, or SNAP Programs or the food assistance block grant program in Puerto Rico.

- E. In situations when consent to release information through SVES cannot be obtained from a parent or spouse, other than death, request information about quarters of coverage directly from the Social Security Administration. Complete or obtain from the applicant a Request for Quarters of Coverage (QC) History Based on Relation form, SSA-513. The form specify the period(s) for which the verification is requested. Submit the completed form to:

Social Security Administration
P.O. Box 33015
Baltimore, Maryland 21290-3015

- F. When the SSA is unable to determine if a quarter should be allowed, the SVES inquiry will show "Z" or "#" codes. *The requirement for a 40-quarter work minimum was eliminated effective April 1, 2021.* Use Form SSA-512, "Request to Resolve Questionable Quarters of Coverage (QC)," to resolve quarters before 1978. A copy of the SVES report must accompany the completed form. Submit Form SSA-512 to:

Social Security Administration
Office of Central Records Operations
P.O. Box 33015
Baltimore, Maryland 21290-3015

For questionable quarters for 1978 *thru March 31, 2021*, the applicant must complete Form SSA-7008. "Request for Correction of Earnings." This form is available at local SSA offices. At the top of the form write "Welfare Reform." Submit the form and proof of earnings to:

Social Security Administration
Office of Central Records Operations
P.O. Box 30016
Baltimore, Maryland 21290-3016

Manual Title Virginia Medical Assistance Eligibility	Chapter M02	Page Revision Date January 2023
Subchapter Subject M0220.000 CITIZENSHIP & ALIEN REQUIREMENTS	Page ending with Appendix 3	Page 3

II. Establishing Quarters:

The requirement for a 40-quarter work minimum was eliminated effective April 1, 2021. Use the following information to (1) determine whether the applicant's earnings as reported in section I.A were sufficient to establish quarters of coverage and (2) to determine the number of QQ during lag periods and when the reported employment is not a covered earning for Social Security reporting purposes:

- A quarter is a period of 3 calendar months ending with March 31, June 30, September 30 and December 31 of any year.
- Social Security quarters of coverage are credits earned by working at a job or as a self-employed individual. A maximum of four credits or quarters can be earned each year.
- For 1978 and later, credits are based solely on the total yearly amount of earnings. The number of creditable QQ are obtained by dividing the total earned income by the increment amount for the year. All types of earnings follow this rule. The amount of earnings needed to earn a credit increases and is different for each year. The amount of earnings needed for each credit and the amount needed for a year in order to receive four credits are listed below.
- A current year quarter may be included in the 40-quarter computation. Use the current year amount as the divisor to determine the number of quarters available.

If you need to use quarters before 1978:

- A credit was earned for each calendar quarter in which an individual was paid \$50 or more in wages (including agricultural wages for 1951-1955);
- Four credits were earned for each taxable year in which an individual's net earnings from self-employment were \$400 or more; and/or
- A credit was earned for each \$100 (limited to a total of 4) of agricultural wages paid during the year for years 1955-1977.

Year	Increment Amount	Amount Required for 4 QCs
2013	\$1,160	\$4,640
2012	\$1,130	\$4,520
2010 – 2011	\$1,120	\$4,480
2009	\$1,090	\$4,360
2008	\$1,050	\$4,200
2007	\$1,000	\$4,000
2006	\$970	\$3880

Manual Title Virginia Medical Assistance Eligibility	Chapter M02	Page Revision Date January 2023
Subchapter Subject M0280 INSTITUTIONAL STATUS REQUIREMENTS	Page ending with M0280.300	Page 6

M0280.300 INMATE OF A PUBLIC INSTITUTION

A. Policy

Inmates of public institutions fall into three groups:

- individuals living in ineligible public institutions;
- incarcerated adults; and
- juveniles in detention.

An individual is an inmate of a public institution from the date of admission to the public institution until discharge, or from the date of actual incarceration in a prison, county or city jail or juvenile detention facility *and considered* incarcerated until permanent release, bail, probation or parole. *An offender sentenced to the Community Corrections Alternative Program (CCAP) are confined in a DOC facility are not considered released, and are not a parolee or probationer.*

Incarcerated individuals (adults and juveniles) who are hospitalized can be eligible for Medicaid payment limited to services received during an inpatient hospitalization, provided they meet all other Medicaid eligibility requirements.

An individual released from jail under a court probation order due to a medical emergency is NOT an inmate of a public institution because he is no longer incarcerated.

B. Public Residential Facility Residents

An individual who lives in a public residential facility that serves more than 16 residents is NOT eligible for Medicaid.

A public residential facility that does not meet the definition of a “publicly operated community residence” in section M0280.100 above, is an “ineligible public institution.”

The following are ineligible public institutions:

- public residential institutions with more than 16 beds
- residential facilities located on the grounds of, or adjacent to, a public institution with more than 16 beds:

D. Juveniles in Detention

In determining whether a juvenile (individual under age 21 years) is incarcerated, the federal Medicaid regulations distinguish between the nature of the detention, pre- and post- disposition situations, and types of facilities.

1. Held for Care, Protection or Best Interest

A juvenile who is in a detention center due to care, protection or in the best interest of the child can be eligible for full benefit Medicaid or Family Access to Medical Insurance Security (FAMIS) coverage.

2. Held for Criminal Activity

a. Prior to Court Disposition

The following juveniles can be eligible for Medicaid payment limited to services received during an inpatient hospitalization.

Manual Title Virginia Medical Assistance Eligibility	Chapter M02	Page Revision Date January 2023
Subchapter Subject M0280 INSTITUTIONAL STATUS REQUIREMENTS	Page ending with M0280.301	Page 9

G. Probation, Parole, Conditional Release, Furlough

An individual released from prison or jail on probation, parole, or release order, with a condition of:

- home arrest
- community services
- outpatient treatment
- inpatient treatment (not inpatient hospitalization)

is not an inmate of a public institution and may be eligible for Medicaid.

An individual released from prison or jail under a court order due to a medical emergency, medical treatment, or pregnancy is NOT an inmate of a public institution and may be eligible for Medicaid.

An individual released from a correctional facility on furlough, for example during a pregnancy, is not an inmate of a public institution while furloughed and may be eligible for Medicaid.

For an offender sentenced to the DOC Community Corrections Alternative Program (CCAP) refer to M0280.140.A

H. Juvenile in Detention Center Due to Care, Protection, Best Interest

A minor in a juvenile detention center prior to disposition (judgment) due to care, protection or the best interest of the child (e.g., Child Protective Services [CPS]), if there is a specific plan for that child that makes the detention center stay temporary, is NOT an inmate of a public institution and may be eligible for Medicaid.

This could include a juvenile awaiting placement but who is still physically present in the juvenile detention center.

I. Juvenile on Probation in Secure Treatment Center

A minor placed on probation by a juvenile court and placed in a secure treatment facility is NOT an inmate of a public institution and may be eligible for Medicaid.

J. Juvenile On Conditional Probation

A minor placed on probation by a juvenile court with, as a condition of probation, treatment in a psychiatric hospital or a residential treatment center, or treatment as an outpatient may be eligible for Medicaid.

However, if the minor is NOT on probation but is ordered to the treatment facility, he remains an inmate of a public institution and not eligible for full benefit Medicaid. He may be eligible for Medicaid coverage limited to inpatient hospitalization.

K. Juvenile On Probation in Secure Treatment Center

A minor placed on probation by a juvenile court and placed in a secure treatment facility may be eligible for Medicaid.

Subchapter Subject M0310 GENERAL RULES & PROCEDURES	Page ending with M0310.114	Page 28b

The levels of administrative review are in the following order:

- a. reconsideration,
- b. the hearing before an administrative law judge (ALJ), and
- c. the Appeals Council

For example: An individual is enrolled in Medicaid as disabled. However, his SSA claim is denied at the ALJ hearing level. If the individual fails to appeal the ALJ decision to the Appeals Council and the Appeals Council does not decide on its own to review the case, the ALJ decision becomes the final decision once the 60-day deadline for requesting further review has passed. Because the individual no longer meets the disabled definition for another covered group, his Medicaid coverage must be canceled.

2. RRB Denial, Termination and RRB Appeal

If RRB denies disability, the disability definition is not met. If the individual has been enrolled in Medicaid as disabled and is not eligible in another covered group, send an advance notice to the recipient to cancel Medicaid.

Persons who believe that their claims have not been adjudicated correctly may ask for reconsideration by the Board's Office of Programs. If not satisfied with that review, the applicant may appeal to the Board's Bureau of Hearings and Appeals. Further, if the individual timely appeals the RRB disability decision, Medicaid coverage must be reinstated until the final decision on the RRB appeal is made. The individual must provide verification that he filed a timely appeal with RRB and must provide verification of the decisions made at all levels of appeal in order for Medicaid to continue during the process.

3. Subsequent SSA/SSI Disability Decisions

If the individual appeals a disability denial and the decision is subsequently reversed, reopen and re-evaluate the denied Medicaid application as long as the disability onset month is prior to the month of application or is no later than 90 days after the month of application. If the individual has moved to another locality in Virginia, it is the responsibility of the agency that processed the application to reopen the application and determine eligibility prior to transferring the case. See M1510.104.

M0310.113 RESERVED

M0310.114 FAMILIES & CHILDREN (F&C)

"Families & Children (F&C)" is the group of individuals that consists of

- children under 19,
- pregnant women,
- specified subgroups of children under age 21,
- *Former Foster Care Children* under age 26 (effective January 1, 2014), and
- parent/caretakers of dependent children under age 18.

Also included in the F&C groups are individuals eligible only for family planning services (Plan First) and participants in BCCPTA.

Note: There was no COLA in 2010, 2011 or 2016.

The Cost-of-living calculation formula

(The formula is the current Title II Benefit divided by the percentage increase to equal the benefit amount before the COLA change):

- a.
$$\frac{\text{Current Title II Benefit}}{8.2 \text{ (1/23 Increase)}} = \text{Benefit Before 1/23 COLA}$$
- b.
$$\frac{\text{Benefit Before 1/23 COLA}}{1.059 \text{ (1/22 Increase)}} = \text{Benefit Before 1/22 COLA}$$
- c.
$$\frac{\text{Benefit Before 1/22 COLA}}{1.013 \text{ (1/21 Increase)}} = \text{Benefit Before 1/21 COLA}$$
- d.
$$\frac{\text{Benefit Before 1/21 COLA}}{1.016 \text{ (1/20 Increase)}} = \text{Benefit Before 1/20 COLA}$$

5. Medicare Premiums

a. Medicare Part B premium amounts:

1-1-23	\$164.90
1-1-22	\$170.10
1-1-21	\$148.50
1-1-20	\$144.60
1-1-19	\$135.50
1-1-18	\$134.00

Note: These figures are based on the individual becoming entitled to Medicare during the year listed. The individual's actual Medicare Part B premium may differ depending on when he became entitled to Medicare. **Verify the individual's Medicare Part B premium in SVES or SOLQ-I if it is necessary to know the premium amount for Medicaid eligibility or post-eligibility purposes.**

b. Medicare Part A premium amount:

1-1-23	\$506.00
1-1-22	\$499.00
1-1-21	\$471.00
1-1-20	\$458.00
1-1-19	\$437.00
1-1-18	\$422.00

Contact a Medical Assistance Program Consultant for amounts for years prior to 2016.

6. Evaluation

Individuals who are eligible when a cost-of-living increase is excluded are eligible.

Manual Title Virginia Medical Assistance Eligibility	Chapter M03	Page Revision Date January 2023
Subchapter Subject M0330.000 FAMILIES & CHILDREN GROUPS	Page ending with M0330.200	Page 10

A LIFC child must meet the definition of a dependent child in M0310.111. The adult with whom the child lives must be the child's parent or caretaker-relative, as defined in M0310.107. The presence of a parent in the home does not impact a stepparent's eligibility in the LIFC covered group. Both the parent and stepparent may be eligible in the LIFC covered group. When a parent(s) is in the home, no relative (i.e. caretaker/relative) other than another parent or a stepparent can be eligible for Medicaid in the LIFC covered group.

C. Financial Eligibility

Modified Adjusted Gross Income (MAGI) methodology is applicable to the LIFC covered group. The policies and procedures contained in Chapter M04 are used to determine eligibility for LIFC individuals.

1. Basis For Eligibility ("Assistance Unit")

The basis for financial eligibility is the LIFC individual's MAGI household. See M0430.100.

2. Resources

There is no resource test for the LIFC covered group.

3. Income

The income limits, policies and procedures used to determine eligibility in the LIFC covered group are contained in Chapter M04.

4. Income Exceeds Limit

If the individual's income exceeds the LIFC income limit, the individual is not eligible as LIFC. *Individuals should then be evaluated as MAGI. If over the MAGI limit, LIFC families who have been enrolled in Medicaid for at least three of the past six months and who are no longer eligible due to excess earned income must be evaluated for continued eligibility in LIFC Extended Medicaid. See M1520.400.* Ineligible individuals must be referred to the Health Insurance Marketplace for evaluation for the APTC. Spenddown does not apply to the LIFC income limits.

D. Entitlement

Entitlement to Medicaid as an LIFC individual begins the first day of the month in which the Medicaid application is filed, if all eligibility factors are met in that month. Retroactive entitlement, up to three months prior to application, is applicable if all Medicaid eligibility criteria were met during the retroactive period.

E. Enrollment

The ACs for individuals in the LIFC covered group are:

- 081 for an LIFC individual in a family with one or no parent in the home;
- 083 for LIFC individuals in a two-parent (including a stepparent) household.

Manual Title Virginia Medical Assistance Eligibility	Chapter M04	Page Revision Date January 2023
Subchapter Subject M04 MODIFIED ADJUSTED GROSS INCOME (MAGI)	Page ending with M0450.400	Page 34

- First, add together income already received for the year. Do not convert the income.
- Next, calculate the projected income for the remainder of the year based on the current monthly income, unless the individual's income is expected to change (e.g. current employment is terminating).
- Add income already received to projected income to obtain the **annual** projected income for the current calendar year.
- Compare the **annual** projected income to the 100% FPL **annual** income limits for the MAGI household size in M04, Appendix 1.
- If the **annual** income is less than or equal to 100% FPL, compare the **annual** income to the **annual** income limit for the individual's covered group.
- For the individual to be eligible for Medicaid or FAMIS as a result of applying the gap-filling rule, the countable income must be no more than the **annual** income limit for the individual's covered group. The 5% income disregard used for the Medicaid/FAMIS MAGI determination does not apply. See M04 Appendices 2-6 for income limits.

3. Renewals

A renewal of eligibility must be completed in January of the following year and annually thereafter. At the time of initial enrollment, change the renewal date to January of the following year. Evaluate the individual's eligibility using Medicaid/FAMIS MAGI methodology before applying gap-filling methodology. A gap-filling evaluation may not be necessary for future eligibility determinations/renewals since tax dependency status and/or income may have changed.

If a woman who is eligible based on gap-filling methodology is pregnant or in the post-partum period in January, do not complete the renewal until the month in which the 60th day following the end of the pregnancy occurs.

4. Individual Not Eligible Using Gap-filling Methodology

If the individual's household income is determined to be over the Medicaid and FAMIS income limits after the gap-filling rule evaluation **and** he meets a MN covered group, he must be offered the opportunity to be placed on a MN spenddown. *If the individual does not provide the necessary verifications for the gap-filling evaluation the application should be denied.*

A. Example Situation – Coverage Gap and Gap Filling Rule

A 10-year-old child lives with both parents, who are not married, and the child is expected to be claimed as a tax dependent by one parent. His parents apply for the APTC through the federal HIM, which uses tax filers income methodology. The child is determined to not be eligible for the APTC because his countable income is below the lower income threshold (it is too low) for APTC eligibility.

The HIM refers the application to Virginia for a Medicaid/FAMIS eligibility determination. The child meets a tax dependent exception in M0430.100 B.2 (he lives with both parents, is claimed as a tax dependent by one parent, and the parents do not expect to file jointly). The child's eligibility for Medicaid or FAMIS is determined using non-filer methodology. Because he is under 19 and both parents are in his household, the income of both parents is counted. His household income with the 5% FPL disregard is over the limit for both Medicaid and FAMIS.

Deeming Allocations

The deeming policy determines how much of a legally responsible relative's income is deemed to the applicant/recipient. The allocation amount increases automatically whenever the SSI payment limit increases.

NBD (Non-blind/disabled) Child Allocation

The NBD child allocation is equal to the difference between the SSI payment for two persons and the SSI payment for one person.

SSI payment for couple - SSI payment for one person = NBD child allocation

$$2023: \$1,371 - \$914 = \$457$$

$$2022: \$1,261 - \$841 = \$420$$

$$2021: \$1,191 - \$794 = \$397$$

Parental Living Allowance

The living allowance for one parent living with the child is the SSI payment for one person.

SSI payment for one person = *\$914 for 2023*; \$841 for 2022; \$794 for 2021

The living allowance for both parents living with the child is the SSI payment for a couple.

SSI payment for both parents = *\$1,371 for 2023*; \$1,261 for 2022; \$1,191 for 2021.

Deeming Standard

The NABD (non-age/blind/disabled) spouse deeming standard is the difference between the SSI payment for two persons and the SSI payment for one person.

SSI payment for couple - SSI payment for one person = deeming standard

$$2023: \$1,371 - \$914 = \$457$$

$$2022: \$1,261 - \$841 = \$420$$

$$2021: \$1,191 - \$794 = \$397$$

Subchapter Subject M0810 GENERAL - ABD INCOME RULES	Page ending with M0810.002	Page 1

GENERAL

M0810.001 INCOME AND ELIGIBILITY

A. Introduction The following sections explain how to treat income in the Medicaid program. This chapter explains how we count income.

B. Policy Principles

- 1. Who is Eligible** An individual is eligible for Medicaid if the person:
 - meets a covered group; and
 - meets the nonfinancial requirements; and
 - meets the covered group's resource limits; and
 - meets the covered group's income limits.
- 2. General Income Rules**
 - Count income on a monthly basis.
 - Not all income counts in determining eligibility.
 - If an individual's countable income exceeds a classification's monthly limit, a medically needy spenddown may be established, if appropriate.

M0810.002 INCOME LIMITS

A. Income Limits The Medicaid covered group determines which income limit to use to determine eligibility.

- 1. Categorically Needy** Supplemental Security Income (SSI) and State Supplement (Auxiliary Grant) recipient's money payments meet the income eligibility criteria in the ABD Categorically Needy covered group.

- 2. Categorically Needy Protected Cases Only**

Categorically-Needy Protected Covered Groups Which Use SSI Income Limits		
Family Unit Size	2022 Monthly Amount	2023 Monthly Amount
1	\$841	\$914
2	\$1,261	\$1,371
Individual or Couple Whose Total Food and Shelter Needs Are Contributed to Him or Them		
Family Unit Size	2022 Monthly Amount	2023 Monthly Amount
1	\$561	\$589
2	\$841	\$894

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date January 2023
Subchapter Subject M0810 GENERAL - ABD INCOME RULES	Page ending with M0810.002	Page 2

**3. Categorically
Needy 300% of
SSI**

For the covered groups that use the 300% of SSI income limit, all income is counted (even excluded income) when screening at 300% of SSI. Do not count any monies which are defined as “what is not income” in S0815.000.

Family Size Unit	2022 Monthly Amount	2023 Monthly Amount
1	\$2,523	\$2,742

**4. ABD Medically

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date January 2023
Subchapter Subject M0820 EARNED INCOME	Page ending with M0820.500	Page 30

3. Other Earned Income

Then, other income exclusions are applied, in the following order, to the rest of earned income in the month:

- a. Federal earned income tax credit payments.
- b. Up to \$10 of earned income in a month if it is infrequent or irregular.
- c. *For 2023, up to \$2,220 per month, but not more than \$8,950 in a calendar year, of the earned income of a blind or disabled student child.*

For 2022, up to \$2,040 per month, but not more than \$8,230 in a calendar year, of the earned income of a blind or disabled student child.

For 2021, up to \$1,930 per month, but not more than \$7,770 in a calendar year, of the earned income of a blind or disabled student child.
- d. Any portion of the \$20 monthly general income exclusion which has not been excluded from unearned income in that same month.
- e. \$65 of earned income in a month.
- f. Earned income of disabled individuals used to pay impairment-related work expenses.
- g. One-half of remaining earned income in a month.
- h. Earned income of blind individuals used to meet work expenses.
- i. Any earned income used to fulfill an approved plan to achieve self-support.

4. Unused Exclusion

Earned income is never reduced below zero. Any unused earned income exclusion is never applied to unearned income.

Any unused portion of a monthly exclusion cannot be carried over for use in subsequent months.

5. Couples

The \$20 general and \$65 earned income exclusions are applied only once to a couple, even when both members (whether eligible or ineligible) have income, since the couple's earned income is combined in determining Medicaid eligibility.

B. References

For exclusions which apply to both earned and unearned income, see:

- S0810.410 for infrequent/irregular income
- S0810.420 \$20 general exclusion
- M0810.430 amount to fulfill a plan for achieving self-support

For exclusions applicable only to earned income, see S0820.510 - S0820.570.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date January 2023
Subchapter Subject M0820 EARNED INCOME	Page ending with S0820.510	Page 31

S0820.510 STUDENT CHILD EARNED INCOME EXCLUSION

A. Policy

1. General

For a blind or disabled child who is a student regularly attending school, earned income is excluded under this provision, limited to the maximum amounts shown below.

For Months	Up to per month	But not more than in a calendar year
<i>In calendar year 2023</i>	\$2,220	\$8,950
<i>In calendar year 2022</i>	\$2,040	\$8,230
<i>In calendar year 2021</i>	\$1,930	\$7,770

2. Qualifying for the Exclusion

The individual must be:

- a child under age 22; and
- a student regularly attending school.

3. Earnings Received Prior to Month of Eligibility

Earnings received prior to the month of eligibility do not count toward the yearly limit.

4. Future Increases

The monthly and yearly limits will be adjusted annually based on increases in the cost of living index. Under this calculation, these amounts will never be lower than the previous year's amounts. However, there may be years when no increases result from the calculation.

B. Procedure

1. Application of the Exclusion

Apply the exclusion:

- consecutively to months in which there is earned income until the exclusion is exhausted or the individual is no longer a child; and
- only to a student child's own income.

2. School Attendance and Earnings

Develop the following factors and record them:

- whether the child was regularly attending school in at least 1 month of the current calendar quarter, or expects to attend school for at least 1 month in the next calendar quarter, and
- the amount of the child's earned income (including payments from Neighborhood Youth corps, Work-Study, and similar programs).

Verify wages of a student child even if they are alleged to be \$65 or less per month.

Subchapter Subject M0830 UNEARNED INCOME	Page ending with M0830.211	Page 24

SMI premiums for January - March 1987, April - June 1987, and July - September 1987. A Title II check sent in July 1987 includes full benefits for January - June 1987 and refunds SMI premiums for August - September 1987, which will be withheld from future checks. For Medicaid purposes, the part of the check which represents full benefits for January - June 1987 is unearned income in July 1987 and the refunded SMI premiums for August - September 1987 are not income.

4. Retroactive State Buy-In

When a State "buys-in" for Medicare on behalf of an individual, a different amount of Title II income may be posted because of the Title II rounding provisions.

5. Underpayments

Title II benefits can be received in regular monthly checks (or by direct deposit) or in retroactive payments. If an individual receives a check because of an underpayment, charge the amount of the check (plus any SMI premiums withheld) as unearned income in the month received; do not look back and allocate an underpayment being made in the current month to prior months. See S0830.010 B. on counting retroactive RSDI benefits for an offset period. See S1120.022 for the treatment of reissued Title II monies in change-of-payee situations.

6. Facility of Payment Provisions

When a Title II auxiliary or survivor beneficiary who is subject to work deductions receives Title II benefits in his name because of the facility (something that makes an operation or action easier) of payment provisions but the benefits are those of other beneficiaries, the amount of Title II benefits of each of the involved beneficiaries must be determined separately. Count the benefits as income to the appropriate beneficiaries.

M0830.211 SPECIAL EXCLUSION OF TITLE II COLA FOR CERTAIN ABD COVERED GROUPS

A. Policy

The cost-of-living adjustment (COLA) in the individual's Social Security Title II benefit is excluded through the month following the month in which the new federal poverty limits (FPLs) are published when determining the income eligibility of an individual in the following ABD covered groups:

- Qualified Medicare Beneficiary (QMB)
- Special Low-income Medicare Beneficiary (SLMB),
- Qualified Individuals (QI), and
- ABD with Income \leq 80% FPL (ABD 80% FPL).

B. Procedure

Exclude the COLA in the individual's SSA Title II benefit until the first day of the second month following the publication month of the new FPL. Local agency staff are notified of the FPL publication *via a broadcast on the VDSS intranet site*.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date January 2023
Subchapter Subject M0830 UNEARNED INCOME	Page ending with S0830.215	Page 24a

C. Example

A QMB-only Medicaid recipient with SSA Title II benefits receives a COLA in the benefit payment for January. The worker does not take any action on this change in income until the FPL broadcast has been posted on *the DSS website*. The FPL change is published on January 31, and LDSS are notified by the FPL broadcast posted on February 3. The worker recalculates the enrollee's income for March 1, based on the recipient's increased Title II benefit and the new QMB income limit which was effective January 31.

Note: COLA exclusion pertains to both ongoing and intake cases.

S0830.215 BLACK LUNG BENEFITS

A. Introduction

1. Types of Black Lung Benefits

Black Lung (BL) benefits are paid to miners and their survivors under the provisions of the Federal Mine Safety and Health Act (FMSHA).

Benefits under **Part B** of the FMSHA are paid by the **Social Security Administration** (SSA) and benefits under **Part C** of the FMSHA are paid by the **Department of Labor** (DOL).

2. Payment Dates

In general, Part B benefits are paid on the third of the month while Part C benefits are paid on the fifteenth of the month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M08	Page Revision Date January 2023
Subchapter Subject M0830 UNEARNED INCOME	Page ending with M0830.410	Page 50

M0830.410 FOSTER CARE

A. Definitions

1. Foster Care

An individual is considered to be in foster care when:

- a public or private nonprofit agency places the individual under a specific placement program; and
- the placement is in a home or facility which is licensed or otherwise approved by the State to provide care; and
- the placing agency retains responsibility for continuing supervision of the need for such placement and the care provided.

NOTE: When determining the eligibility of a child in foster care refer to the Family & Children's Policy. This section (S0830.410) is to be used only when evaluating the eligibility of a provider of foster care when the provider is the applicant.

2. Foster Care Payment

For Medicaid purposes, a foster care payment is a payment made to the provider for the purpose of meeting the needs of the individual in foster care.

NOTE: An agency may make an additional payment to the foster care provider for his or her own use (e.g., an incentive or service payment not intended to support the child). While these two payments may be combined and termed the "foster care payment" by the issuing agency, only the part which is provided to meet the needs of the individual in care is the foster care payment for Medicaid purposes. *This could include payment(s) such as KinGap, the kinship care program, would provide.*

B. Policy

a. Foster Care Provider

- Foster care payments (as defined in A.2. above) are not income to the provider.
- Amounts paid to a provider of foster care in addition to the foster care payment are income to the provider.

C. Procedure

1. Foster Care Payments to Providers of Foster Care

- Assume that the payment made to the provider is a foster care payment** (i.e., is to meet the needs of the individual in care) and is not income to the provider, unless there is evidence to the contrary.
- If the provider is a Medicaid recipient or deemor and evidence indicates a payment includes additional monies above the foster care payment,** verify the purpose(s) of the payment and the amounts involved using documents in the individual's possession, or regional

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date January 2023
Subchapter Subject ABD RESOURCES - GENERAL	Page ending with M1110.003	Page 2

M1110.003 RESOURCE LIMITS

A. Introduction

The resource limit is the maximum dollar amount of countable assets an individual, couple, or family may own and still meet the established criteria for Medical Assistance in an ABD category. These amounts are established by law.

B. Policy Principles

1. Resource Ineligibility

An individual (or couple) with countable resources in excess of the applicable limit is not eligible for Medicaid.

2. Resource Limits

ABD Eligible Group	One Person	Two People
Categorically Needy Medically Needy	\$2,000	\$3,000
ABD with Income \leq 80% FPL	\$2,000	\$3,000
QDWI	\$4,000	\$6,000
QMB SLMB QI	Calendar Year 2021 \$7,970 2022 \$8,400 2023 \$9,090	Calendar Year 2021 \$11,960 2022 \$12,600 2023 \$13,630

3. Change in Marital Status

A change in marital status can result in a change to the applicable resource limit. The resource limit change is effective with the month that we begin treating both members of a couple as individuals. For example, separation from an ineligible spouse can change the limit from \$3,000 to \$2,000. See M1110.530 B.

4. Reduction of Excess Resources

Month of Application

Excess resources throughout the month of application causes ineligibility for the application month. Reduction of excess resources within the application month can cause resource eligibility for that month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.100	Page 1

M1420.000 AUTHORIZATION FOR MEDICAID LTSS

M1420.100 MEDICAID LTSS AUTHORIZATION REQUIREMENTS

A. Introduction

Medicaid covers long-term services and supports (LTSS) in a medical facility or community-based setting for individuals whose mental or physical condition requires assistance with activities of daily living. For Medicaid to cover LTSS, the individual must:

- meet the definition of an institutionalized individual in subchapter M1410. The individual's eligibility as an institutionalized individual may be determined when the individual is already in a medical facility at the time of the application, or the individual has been authorized to receive LTSS and it is anticipated that they are likely to receive the services for 30 or more consecutive days. If it is known at the time the application is processed that the individual did not or will not meet the 30 consecutive day requirement, the individual is not to be treated as an institutionalized individual.
- meet all Medicaid non-financial eligibility requirements in Chapter M02;
- be financially eligible based on the policy and procedures in subchapter M1460 for unmarried individuals and married institutionalized individuals without a community spouse or subchapter M1480 for institutionalized individuals with a community spouse; and
- Meet the asset transfer policies in subchapter M1450.

This subchapter describes the LTSS authorization required for the types of LTSS, which are facility-based care, home-and-community-based (HCBS) services covered under a Section 1915(c) waiver, and the Program for All Inclusive Care for the Elderly (PACE).

B. Operating Policies

1. Payment Authorization

An LTSS authorization is needed for Medicaid payment of nursing facility (medical institution), HCBS waiver, and PACE services for Medicaid recipients. The authorization *is not required* for the local DSS to determine financial eligibility using the more liberal rules for institutionalized individuals, including the 300% SSI covered group and the special rules for married institutionalized individuals with a community spouse. *If the individual meets the definition of institutionalization they are evaluated using these rules.* The appropriate authorization document (form or screen print) *or documentation of institutionalization* must be maintained in the individual's case record.

2. Authorization Documents

a. Nursing facility-based care, the Commonwealth Coordinated Care Plus Waiver, and PACE

The Medicaid LTSS Authorization Form, DMAS 96 or the equivalent information printed from the electronic Medicaid LTSS Screening system (eMLS) or the Minimum Data Survey (MDS) can be used to authorize nursing facility-based care, the Commonwealth Coordinated Care (CCC) Plus Waiver, and PACE. The Authorization form certifies the type of LTSS service

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.200	Page 2

If documentation is not available when placement needs to be made, verbal assurance from a screener that the form approving LTSS will be mailed or electronically available is sufficient to determine Medicaid eligibility as an institutionalized individual. This information must be received prior to approval and enrollment in Medicaid as an institutionalized individual.

b. The Community Living Waiver, Building Independence Waiver, and Family and Individual Supports Waiver.

The Waiver Authorization System (WaMS) (see M1420, Appendix 3) or Intellectual Disability On-line System (IDOLS) are used to authorize services received under the Community Living (CL) Waiver, Building Independence (BI) Waiver, and Family and Individual Supports Waiver. Copies of the authorization screens *or a 225 Communication form stating services have started* are acceptable.

3. Authorization Not Received

If the appropriate documentation authorizing LTSS is not received, Medicaid eligibility for an individual who is living in the community must be determined as a non-institutionalized individual.

4. Continuing Authorization

Providers re-evaluate the individual's level of care periodically. The authorization for Medicaid payment of LTSS may be rescinded by the physician or by DMAS at any point that the individual is determined to no longer meet the required Medicaid level of care criteria via level of care review process.

When an individual is no longer eligible for a HCBS Waiver service, the EW must re-evaluate the individual's eligibility as a non-institutionalized individual.

When an individual leaves the PACE program and no longer receives LTSS services, the EW must re-evaluate the individual's eligibility as a non-institutionalized individual.

Facilities document the level of care using the Minimum Data Survey (MDS). For an individual in a nursing facility who no longer meets the level of care but continues to reside in the facility, **continue to use the eligibility rules for institutional individuals** even though the individual no longer meets the level of care criteria. Medicaid will not make a payment to the facility for LTSS.

M1420.200 RESPONSIBILITY FOR THE LTSS AUTHORIZATION

A. Introduction

The process for completing the required assessment and authorizing services depends on the type of LTSS.

B. Nursing Facility

In order to qualify for nursing facility care, an individual must be determined to meet functional criteria, have a medical or nursing need and be at risk of nursing facility or hospital placement within 30 days without services. An assessment known as the LTSS Screening is completed by a designated screener. For individuals who apply for Medicaid after entering a nursing facility, medical staff at facilities document the level of care needed using the Minimum Data Survey (MDS). **The Eligibility Worker does not need to see any screening authorization if the individual applying is already a resident of a nursing facility when the Medicaid application is filed.**

C. Send DMAS Notice

The agency worker must send a copy of the DMAS-225 to:

Department of Medical Assistance Services
Eligibility and Enrollment Services Division
600 E. Broad St., Suite 1300
Richmond, VA 23219.

Or email to DMASEvaluation@dmass.virginia.gov.

The copy of the DMAS-225 must be signed and dated by the worker, and must show the worker number and the local agency's FIPS code.

Any information the agency receives about the individual's subsequent receipt of compensation which shortens the penalty period must be sent to *DMAS* at the above address.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.150	Page 3

11. Old Bills

Old bills are unpaid medical, dental, or remedial care expenses which:

- were incurred prior to the Medicaid application month and the application's retroactive period,
- were not fully deducted from (counted in) any previous spenddown budget period where the spenddown was met, and
- remain a liability to the individual.

EXCEPTION: Bills paid by a state or local program and which meet the definition of “old bills” are treated as old bills even though they are not the individual’s liability.

12. Projected Expenses

Expenses for services that have not yet been incurred but are reasonably expected to be incurred are projected expenses.

13. Spenddown Liability

The spenddown liability is the amount by which the individual’s countable income exceeds the MNIL for the budget period.

M1460.150 SUBSTANTIAL HOME EQUITY PRECLUDES ELIGIBILITY FOR LTSS

A. Applicability

The policy in this section applies to nursing facility and CBC/PACE patients, including MAGI Adults effective January 1, 2019, who meet the requirements for LTC services, now called long term services and supports (LTSS), on or after January 1, 2006. This includes individuals who filed reapplications after a break in Medicaid eligibility. It does **not apply** to Medicaid recipients who were approved for LTSS prior to January 1, 2006, and who maintain continuous Medicaid eligibility.

For Medicaid applicants or enrollees approved for LTSS on or after July 1, 2006, the amount of equity in the home at the time of the initial LTSS determination and at each renewal must be evaluated.

B. Policy

Individuals with equity value (tax assessed value minus encumbrances) in home property that exceeds the limit are NOT eligible for Medicaid payment of LTSS unless the home is occupied by

- a spouse,
- a dependent child under age 21 years, or
- a blind or disabled child of any age.

If substantial home equity exists, the individual is not evaluated for or eligible for the Medicaid payment of LTSS. Do not evaluate asset transfers.

An individual with excess home equity is not eligible in the 300% of SSI covered group, but may be eligible for Medicaid payment of covered services other than LTSS if he is eligible in another covered group. Evaluate eligibility for an individual with substantial home equity in other covered groups.

1. Home Equity Limit

The applicable home equity limit is based on the date of the application or request for LTC coverage. The home equity limit is:

- Effective January 1, 2021: \$603,000
- Effective January 1, 2022: \$636,000
- *Effective January 1, 2023: \$688,000*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1460.000 LTC FINANCIAL ELIGIBILITY	Page ending with M1460.611	Page 35

6. **Domestic Travel Tickets** Gifts of domestic travel tickets [1612(b)(15)].
7. **Victim's Compensation** Victim's compensation provided by a state.
8. **Tech-related Assistance** Tech-Related Assistance for Individuals with Disabilities [ref. P.L. 100-407].
9. **\$20 General Exclusion** \$20 a month general income exclusion for the unit.

EXCEPTION: Certain veterans (VA) benefits are not subject to the \$20 income exclusion. Refer to subchapter S0830 for complete explanation of which VA payments are entitled to the \$20 general exclusion.
10. **PASS Income** Any unearned income used to fulfill an SSI approved plan to achieve self-support (PASS). See item 12 below for earned income used to fulfill a PASS [1612(b) (4)(A) & (B)].
11. **Earned Income Exclusions** The following earned income exclusions are not deducted for the 300% SSI group:
 - a. For 2023, up to \$2,220 per month, but not more than \$8,950 in a calendar year, of the earned income of a blind or disabled student child.

 For 2022, up to \$2,040 per month, but not more than \$8,230 in a calendar year, of the earned income of a blind or disabled student child.
 - b. Any portion of the \$20 monthly general income exclusion which has not been excluded from unearned income in that same month [1612(b) (2)(A)].
 - c. \$65 of earned income in a month [1612(b) (4)(C)].
 - d. IRWE - earned income of disabled individuals used to pay impairment-related work expenses [1612(b) (4)(B)].
 - e. One-half of remaining earned income in a month [1612(b) (4)(C)].
 - f. BWE - Earned income of blind individuals used to meet work expenses [1612(b) (4)(A)].
 - g. Earned income used to fulfill an SSI approved plan to achieve self-support (PASS) [1612(b) (4)(A) & (B)].
12. **Child Support** Child support payments received from an absent parent for a blind or Disabled child [1612(b) (9)].

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.410	Page 19

M1470.410 MEDICAID CBC - PERSONAL MAINTENANCE ALLOWANCE

A. Individuals

For the month of entry and subsequent months, deduct from the patient's gross monthly countable income a personal maintenance allowance (PMA). The amount of the allowance depends upon under which Medicaid CBC waiver the patient receives LTC services.

The total amount of the PMA cannot exceed 300% SSI.

1. Basic Maintenance Allowance

Patients receiving Medicaid CBC under the following waivers are allowed a monthly basic PMA:

- Commonwealth Coordinated Care Plus (CCC Plus) Waiver (formerly the Elderly or Disabled with Consumer-Direction Waiver and the Technology-Assisted Individuals Waiver),
- Community Living (CL) Waiver (formerly Intellectual Disabilities Waiver),
- Family and Individual Supports (IS) Waiver (formerly Individual and Family Developmental Disabilities Support Waiver), and
- Building Independence (BI) Waiver (formerly Day Support Waiver).

Individuals enrolled in the Program for All Inclusive Care for the Elderly (PACE) are also allowed the basic PMA.

The PMA is:

- January 1, 2021 through December 31, 2021: \$1,311
- January 1, 2022 through December 31, 2022: \$1,388
- *January 1, 2023 through December 31, 2023: \$1508*

Contact a Medical Assistance Program Consultant for the PMA in effect for years prior to 2021.

2. Guardianship Fee

Deduct an amount up to 5% of the patient's gross monthly income (including amounts not counted as income and excluded income) for guardianship fees, if the patient has a legally appointed guardian or conservator AND the guardian or conservator charges a fee. The guardianship **filing** fees CANNOT be deducted from the individual's income. Document how it was determined that the guardian/conservator charges a fee and the amount of the fee.

No deduction is allowed if the patient's guardian receives a payment for providing guardianship services from a public agency or organization that receives funding for guardianship services.

No deduction is allowed for representative payee or "power of attorney" fees or expenses.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.420	Page 20

- 3. Special Earnings Allowance for Recipients in CCC Plus, CL, IS and BI Waivers**
- Deduct the following special earnings allowance if the patient is working (the work does NOT have to be part of treatment). The special earnings allowance is deducted from earned income only. Deduct:
- for individuals employed 20 hours or more per week, all earned income up to 300% of SSI (\$2,742 in 2023) per month.
 - for individuals employed at least 8 but less than 20 hours per week, all earned income up to 200% of SSI (\$1,828 in 2023) per month.

- 4. Example – Special Earnings Allowance (Using January 2018 figures)**
- A working patient receiving CCC Plus Waiver services is employed 18 hours per week. His income is gross earnings of \$1228.80 per month and SSA of \$300 monthly. His special earnings allowance is calculated by comparing his gross earned income (\$1128.80) to the 200% of SSI maximum (\$1,500.00). His gross earned income is less than 200% of SSI; therefore, he is entitled to a special earnings allowance. His personal maintenance allowance is computed as follows:

\$ 1,238.00 CBC basic maintenance allowance
+ 1,128.80 special earnings allowance
\$ 2,366.80 PMA

Because the PMA may not exceed 300% of SSI, the PMA for the patient in this example must be reduced to \$2,250.00.

B. Couples

The Medicaid CBC waivers do not specify personal maintenance allowances for a married couple living together when both spouses receive Medicaid CBC because each spouse is considered an individual for patient pay purposes. The individual maintenance allowance in section M1470.410 applies to each spouse in a couple when each receives Medicaid CBC.

M1470.420 DEPENDENT CHILD ALLOWANCE

A. Unmarried Individual, or Married Individual With No Community Spouse

For an unmarried Medicaid CBC patient, or a married Medicaid CBC patient without a community spouse, who has a dependent child(ren) under age 21 years in the community:

- Calculate the difference between the appropriate MN income limit for the **child's** home locality for the number of children in the home and the child(ren)'s gross monthly income. If the children are living in different homes, the children's allowances are calculated separately using the MN income limit for the number of the patient's dependent children in each home.
- The result is the dependent child allowance. If the result is greater than \$0, deduct it from the patient's income as the dependent child allowance. If the result is \$0 or less, do not deduct a dependent child allowance.

Do not deduct an allowance if the child(ren)'s monthly income exceeds the MN income limit in the child's home locality for the number of dependent children in the home. Do not deduct an allowance for any other family member.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.015	Page 7

- 27. Spousal Share** means ½ of the couple's combined countable resources at the beginning of the **first** continuous period of institutionalization, as determined by a resource assessment.
- 28. Spouse** means a person who is legally married to another person under Virginia law.
- 29. Waiver Services** means Medicaid-reimbursed home or community-based services covered under a 1915(c) waiver approved by the Secretary of the United States Department of Health and Human Services.

M1480.015 SUBSTANTIAL HOME EQUITY PRECLUDES ELIGIBILITY FOR LONG-TERM CARE

- A. Applicability** The policy in this section applies to nursing facility and CBC/PACE patients, who meet the requirements for LTC services, now called long term services and supports (LTSS), on or after January 1, 2006. This includes individuals who filed reapplications after a break in Medicaid eligibility. It does **not apply** to Medicaid recipients who were approved for LTSS prior to January 1, 2006, and who maintain continuous Medicaid eligibility.

For Medicaid applicants or enrollees approved for LTSS on or after July 1, 2006, the amount of equity in the home at the time of the initial LTC determination and at each renewal must be evaluated. For the purposes of the home equity evaluation, the definition of the home in M1130.100 A.2 is used; the home means the house and lot used as the principal residence and all contiguous property, as long as the value of the land, exclusive of the lot occupied by the house, does not exceed \$5,000.

- B. Policy** Individuals with equity value (tax assessed value minus encumbrances) in home property that exceeds the limit are NOT eligible for Medicaid payment of long-term care services unless the home is occupied by:

- a spouse,
- a dependent child under age 21 years, or
- a blind or disabled child of any age.

If substantial home equity exists, the individual is not evaluated for or eligible for the Medicaid payment of LTSS. Do not evaluate asset transfers.

An individual with excess home equity is not eligible in the 300% of SSI covered group, but may be eligible for Medicaid payment of covered services other than LTSS if he is eligible in another covered group. Evaluate eligibility for an individual with substantial home equity in other covered groups.

- 1. Home Equity Limit** The applicable home equity limit is based on the date of the application or request for LTSS coverage. Effective January 1, 2011, the home equity limit is subject to change annually. The home equity limit is:
- Effective January 1, 2021: \$603,000
 - Effective January 1, 2022: \$636,000
 - *Effective January 1, 2023: \$688,000*
- 2. Reverse Mortgages** Reverse mortgages **do not** reduce equity value until the individual begins receiving the reverse mortgage payments from the lender.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.232	Page 18c

2. After Eligibility is Established

Once an institutionalized spouse has established Medicaid eligibility as an institutionalized spouse, count only the institutionalized spouse's resources when determining the institutionalized spouse's Medicaid eligibility. Do not count or deem the community spouse's resources available to the institutionalized spouse.

If an institutionalized spouse's Medicaid coverage was cancelled and he reapplies as an institutionalized individual, use only the resources of the institutionalized spouse for his eligibility determination.

M1480.231 SPOUSAL RESOURCE STANDARDS

A. Introduction

This section provides the amounts and the effective dates of the standards used to determine an institutionalized spouse's initial and ongoing resource eligibility. Use the standard in effect on the date of the institutionalized spouse's Medicaid application. Definitions of the terms are found in section M1480.010.

B. Spousal Resource Standard

\$29,724 1-1-23

\$27,480 1-1-22

\$26,076 1-1-21

C. Maximum Spousal Resource Standard

\$148,620 1-1-23

\$137,400 1-1-22

\$130,380 1-1-21

M1480.232 INITIAL ELIGIBILITY DETERMINATION PERIOD

A. Policy

The initial eligibility determination period begins with the month of application. If the institutionalized spouse is eligible for the month of application, the initial eligibility determination period will both begin and end with that month.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.420	Page 66

After eligibility is established, the usual reporting and notification processes apply. Send written notice for the month(s) during which the individual establishes Medicaid eligibility. VaCMS will generate the “Notice of Patient Pay Responsibility” and it will be sent to the individual or his authorized representative.

M1480.400 PATIENT PAY

- A. Introduction** This section contains the policy and procedures for determining an institutionalized spouse’s (as defined in section M1480.010 above) patient pay in all covered groups.
- B. Married With Institutionalized Spouse in a Facility** For a married long-term services and support (LTSS) patient with an institutionalized spouse in a facility, **NO** amount of the patient’s income is deducted for the spouse’s needs in the patient pay calculation.

M1480.410 MAINTENANCE STANDARDS & ALLOWANCES

Introduction This subsection contains the standards and their effective dates that are used to determine the community spouse’s and other family members’ income allowances. The income allowances are deducted from the institutionalized spouse’s gross monthly income when determining the monthly patient pay amount. Definitions of these terms are in section M1480.010 above.

B. Monthly Maintenance Needs Allowance	\$2,177.50	7-1-21	
	\$2,288.75	7-1-22	
C. Maximum Monthly Maintenance Needs Allowance	\$3,259.50	1-1-21	
	\$3,435.00	1-1-22	
	\$3,715.50	1-1-23	
D. Excess Shelter Standard	\$653.25	7-1-21	
	\$686.63	7-1-22	
E. Utility Standard Deduction (SNAP)	\$322.00	1 - 3 household members	10-1-21
	\$402.00	4 or more household members	10-1-21
	\$374.00	1 - 3 household members	10-1-22
	\$473.00	4 or more household members	10-1-22

M1480.420 PATIENT PAY FOR ABD 80% FPL AND 300% SSI INSTITUTIONALIZED SPOUSE

- A. Policy** After a 300% SSI or ABD 80% FPL institutionalized spouse has been found eligible for Medicaid, determine his patient pay (post-eligibility treatment of income).

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 69

\$875 gross earned income
 - 75 first \$75 per month
 800 remainder
 - 2
 400 ½ remainder
 + 75 first \$75 per month
 \$475 which is > \$190

His personal needs allowance is calculated as follows:

\$ 40.00 basic personal needs allowance
 +190.00 special earnings allowance
 + 17.50 guardianship fee (2% of \$875)
 \$247.50 personal needs allowance

2. Medicaid CBC Waiver Services and PACE

a. Basic Maintenance Allowance

For the Commonwealth Coordinated Care Plus (CC Plus) Waiver (formerly the Elderly or Disabled with Consumer Direction Waiver and the Technology-Assisted Individuals Waiver), Community Living (CL) Waiver (formerly Intellectual Disabilities Waiver), Family and Individual Supports (IS) Waiver (formerly Individual and Family Developmental Disabilities Support Waiver), Building Independence (BI) Waiver (formerly Day Support Waiver), or PACE, deduct the appropriate maintenance allowance for one person as follows:

- January 1, 2021 through December 31, 2021: \$1,311
- January 1, 2022 through December 31, 2022: \$1,388
- *January 1, 2023 through December 31, 2023: \$1,509*

Contact a Medical Assistance Program Consultant for the amount in effect for years prior to 2017.

b. Guardian Fee

Deduct the actual fee a guardian or conservator charges, up to a maximum of 5% of the patient's actual gross income (including amounts not counted as income and excluded amounts) for guardianship fees, IF:

- * the patient has a legally appointed guardian or conservator AND
- * the guardian or conservator charges a fee.

Document how you determined that the guardian/conservator charges a fee and the amount of the fee.

NOTES: No deduction is allowed for representative payee or "power of attorney" fees or expenses. No deduction is allowed if the patient's guardian receives a payment for providing guardianship services from a public agency or organization that receives funding for guardianship services. The guardianship filing fees CANNOT be deducted from the individual's income.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date January 2023
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.430	Page 70

c. Special Earnings Allowance For CCC Plus, CL, IS, and BI Waivers

[EXAMPLE #19 was deleted]

For the CCC Plus, CL, IS, and BI waivers, deduct the following special earnings allowance if the patient is working (the work does NOT have to be part of treatment). The special earnings allowance is deducted from earned income only. Deduct:

- for individuals employed 20 hours or more per week, all earned income up to 300% of SSI (\$2,742 in 2023) per month.
- for individuals employed at least 4 but less than 20 hours per week, all earned income up to 200% of SSI (\$1,822 in 2023) per month.

The total of the basic maintenance allowance, the guardianship fee and the special earnings allowance cannot exceed 300% SSI.

EXAMPLE #20: (Using January 2000 figures)

A working patient in the CL Waiver is employed 18 hours per week. He has gross earnings of \$928.80 per month and SS of \$300 monthly. His special earnings allowance is calculated first:

\$ 928.80	gross earned income
- <u>1,024.00</u>	200% SSI maximum
\$ 0	remainder

\$928.80 = special earnings allowance

His personal maintenance allowance is calculated as follows:

\$ 512.00	maintenance allowance
+ <u>928.80</u>	special earnings allowance
\$1,440.80	personal maintenance allowance

7. Enrollee Requests Cancellation

An enrollee may request cancellation of his and/or his children's medical assistance coverage at any time. The request can be verbal or written. A written withdrawal request must be placed in the case record. A verbal request for withdrawal can be accepted only from the enrollee or case head, or his authorized representative. A verbal request must be documented in the case record with the date and time the withdrawal request was received, the name of the person who made the withdrawal request, and the signature and title of the agency staff person who took the call.

When the enrollee requests cancellation of Medicaid, the local department must send adequate notice using the Notice of Action to the enrollee no later than the effective date of cancellation.

On the notice:

- check the "other" block and list the reason as "Medicaid coverage cancelled at the enrollee's request,"
- include the effective date of cancellation and instruct the enrollee to discontinue using the card after that date, and
- instruct the enrollee to retain the Medicaid card for future use in case coverage is reinstated within the next 12 months (the system will generate a new card after 12 months).

M1520.400 EXTENSIONS OF MEDICAID COVERAGE

A. Policy

Medicaid families may be eligible for an extended period of Medicaid coverage when the family meets all the requirements for the Low Income Families with Children (LIFC) covered group except income.

LIFC families who received Medicaid in three of the last six months and who became ineligible for Medicaid due to increased income from spousal support may be eligible for a four-month extension.

LIFC families who received Medicaid in three of the last six months and who became ineligible for Medicaid due to an increase in earnings may be eligible for a twelve-month extension. Earnings could increase because of a new job, a raise in the rate of pay or more hours are being worked.

Prior to evaluating *the case* for the Medicaid extensions, review the household's eligibility in the *MAGI* covered groups. If eligible, update *the renewal date(s)*. If *anyone in the household* is ineligible in a *MAGI* group, evaluate eligibility for the Medicaid extensions.

MAGI methodology for the formation of households does not apply to individuals in Extended Medicaid. The family unit policies in M0520 apply to Extended Medicaid.

If a child under 18 is ineligible for FAMIS, the child must be

Subchapter Subject M1520 MEDICAL ASSISTANCE ELIGIBILITY REVIEW	Page ending with M1520.500	Page 24a

M1520.500 CASE TRANSFERS

A. Introduction

Applications and ongoing cases are transferred only when the individual retains residence in Virginia.

B. Nursing Facility and Assisted Living Facility (ALF)

When an individual is admitted to a nursing facility or an ALF from a community living arrangement, the case is not transferred, but remains with the Virginia locality in which the individual last lived outside of an institution. Community living arrangements do not include medical facilities, ALFs or group homes with four or more beds.

When an applicant/recipient is discharged from a nursing facility or ALF to a community living arrangement not in the Virginia locality that had responsibility for the individual's case while he was in the nursing facility or ALF, the case is transferred to the new locality.

If the local agencies involved agree the case should remain with the original agency, then the case would not be transferred.

C. Auxiliary Grant (AG)

See M0320.102 regarding a recipient receiving an Auxiliary Grant (AG) and eligible for Medicaid. The approved member's case should be retained by the agency (locality) which is issuing the grant. Eligibility workers should refer to processing guidelines provided by VDSS and DARS.

Subchapter Subject MEDICAL SERVICES	Page ending with M1850.100	Page 6a

M1850.100 COVERED SERVICES

A. General Information

Information on Medicaid covered services is provided to assist the eligibility worker in responding to general inquiries from applicants/recipients. Individuals who have problems with bills or services from providers of care should be referred as follows:

- Refer FFS Medicaid enrollees to the DMAS Recipient Helpline at 804-786-6145. Refer individuals who need assistance with transportation to the DMAS transportation broker at 1-866-386-8331.
- Refer individuals enrolled in managed care to the Managed Care HelpLine at 1-800-643-2273 or directly to their MCO. Individuals in managed care who need assistance with transportation must contact their MCO directly.

B. Copayments

a. Medicaid Enrollees without Medicare

Medicaid covered services *no longer* have a “copayment,” which is the portion of the cost of the service for which the recipient is responsible.

b. Medicare Beneficiaries

Medicaid covers the Medicare copayment for individuals with Medicare and full-benefit Medicaid (dual eligibles) and Qualified Medicare Beneficiaries (QMB). However, a provider is allowed to collect the Medicare copayment at the time of service. If the provider requires the individual to pay the Medicare copayment, the individual must be reimbursed or credited the Medicare copayment once the provider receives payment of the Medicaid claim.

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date January 2023
Subchapter Subject MEDICAL SERVICES	Page ending with M1850.100	Page 7

C. Covered Services

The services listed below are covered:

- case management services;
- certified pediatric nurse and family nurse practitioner services;
- clinical psychologist services;
- community-based services for individuals with intellectual disabilities, including day health rehabilitation services and case management;
- dental services for children enrolled in Medicaid and FAMIS, pregnant women enrolled in Medicaid, FAMIS MOMS, and FAMIS Prenatal Coverage, and effective July 1, 2021, all other adults with **full** Medicaid benefits.
- *dialysis services*;
- emergency hospital services;
- Early Periodic Screening, Diagnostic and Treatment (EPSDT) services;
- family planning services;
- Federally Qualified Health Center clinic services;
- home and community-based care waiver services (see subchapter M1440);
- home health services: nurse, aide, supplies, treatment, physical therapy, occupational therapy, and speech therapy services;
- hospice services;
- inpatient hospital services;
- Intensive Behavioral Dietary Counseling, for individuals in MEDICAID WORKS;
- intermediate care facility services for the intellectually disabled (ICF-ID);
- laboratory and x-ray services;
- Medicare premiums: Hospital Insurance (Part A); Supplemental Medical Insurance (Part B) for the Categorically Needy (CN) and Medically Needy (MN);

Manual Title Virginia Medical Assistance Eligibility	Chapter M18	Page Revision Date January 2023
Subchapter Subject MEDICAL SERVICES	Page ending with M1850.100	Page 8

- behavioral health services, including clinic services, outpatient psychiatric services, mental health case management, psychosocial rehabilitation, mental health skill building, therapeutic day treatment for children and adolescents, intensive in-home services for children and adolescents, mental health partial hospitalization, mental health intensive outpatient, assertive community treatment, applied behavior analysis, multisystemic therapy, functional family therapy, mobile crisis response, community stabilization, 23-hour crisis stabilization, residential crisis stabilization unit services, therapeutic group homes and psychiatric residential treatment services.
- nurse-midwife services;
- nursing facility care;
- other clinic services: services provided by rehabilitation agencies, ambulatory surgical centers, renal dialysis clinics, and local health departments;
- outpatient hospital services;
- personal assistance services, for individuals in MEDICAID WORKS;
- physical therapy and related services;
- physician services;
- podiatrist services;
- *pregnancy related services*
- prescribed drugs;
- prosthetic devices;
- Rural Health Clinic services;
- skilled nursing facility services for individuals under age 21 years;
- substance abuse services;
- transplant services;
- transportation to receive medical services; and
- vision services.

Virginia Medical Assistance Eligibility Manual
Transmittal #DMAS-25

The following acronyms are contained in this letter:

- COVID – Coronavirus Disease
- DMAS – Department of Medical Assistance Services
- FAMIS – Family Access to Medical Insurance Security
- LDSS – Local Department of Social Services
- LTSS – Long-term Services and Supports
- MDS – Minimum Data Survey
- PHE – Public Health Emergency
- TN – Transmittal

TN #DMAS-25 includes policy clarifications, updates and revisions. Unless otherwise noted in the Cover Letter and/or policy, all provisions included in this transmittal are effective with eligibility determinations and post-eligibility (patient pay) calculations made on or after October 1, 2022. Note that COVID-19 PHE guidelines continue until the emergency is over and are not referenced in Medical Assistance Eligibility Policy.

The following changes are contained in TN #DMAS-25:

Changed Pages	Changes
Subchapter M0120 page 7	Clarified that an undocumented parent under 18 can apply for FAMIS Prenatal Coverage since the coverage is for the unborn child, but once coverage closes any subsequent applications for the minor prior to turning 18 need to be signed by someone legally authorized to sign for on the minor's behalf.
Subchapter M0130 Pages 9,10	For all case actions effective August 26, 2022, if the income attested to by the applicant is within 20% of the income information obtained from electronic sources it is reasonably compatible

TN #DMAS-25

October 1, 2022

Page 2

Changed Pages	Changes
Subchapter M0140 Pages 1, 3, 5	Clarified the Emergency Services and pre-release application process for offenders. Updated policy references.
Subchapter M0220 Table of Contents Pages 14d, 22 Appendix 4 added page 2	Updated Table of Contents, added information about Ukrainian Humanitarian Paroles and incarcerated individuals applying for Emergency Services.
Chapter M04 Pages 15 and 16	Clarifies policy regarding income of tax dependents of any age.
Subchapter M0710 Page 2	For all case actions effective August 26, 2022, if the income attested to by the applicant is within 20% of the income information obtained from electronic sources it is reasonably compatible
Subchapter M1410 Page 2a	Clarified definitions of Assisted Living Facility/Memory Care Unit and Independent Living Facility
Subchapter M1420 Table of Contents Pages 1-3, 5	Added information about nursing facility use of Minimum Data Survey (MDS) and LTSS Screening Special Circumstances

Subchapter Subject M0120 MEDICAL ASSISTANCE APPLICATION	Page ending with M0120.200	Page 7

If the child was emancipated by the court, request the child's signature on the application. If the application is mailed to the child, allow 10 calendar days for the signed application form to be returned.

If the application form is not signed by the applicant, the guardian, the custodial adult, or the emancipated child and returned to the agency by the specified date, deny the application because it is invalid.

2. Non-custodial Parent Applying for Child

Eligibility for a child is based on the income of the parent with whom the child lives. If a non-custodial parent applies for his child, he must give written permission for the eligibility worker to contact the custodial parent. The eligibility worker must obtain the custodial parent's income information, written permission to verify income using available online data sources, and other information necessary to verify and calculate countable income, including Social Security Number and residence address. If either the non-custodial parent or the custodial parent fail to give the necessary permission, the child's eligibility cannot be determined using the application filed by the non-custodial parent.

3. Minor Parent Applying for Child

Parent(s) under age 18 years may apply for MA for *their* own child because *they are* the parent of the child. *An undocumented minor can apply for FAMIS Prenatal Coverage since the coverage is considered to be for the unborn child. If the individual is eligible, the parent can then be enrolled for the duration of the pregnancy and the 60 day postpartum period. Any future applications filed for the minor prior to turning age 18 would need to be signed by someone who is legally authorized to sign on the individual's behalf.*

4. Foster Care Child

a. IV-E

The Title IV-E Foster Care & Medicaid Application form, available at <https://fusion.dss.virginia.gov/Portals/%5Bdfs%5D/Files/Copy%20of%20032-03-0636-06-eng.xlsx>, is used for the IV-E Foster Care eligibility determination. A separate MA application is **not** required for a child who has been determined eligible for Title IV-E Foster Care. However, if there is a non-custodial agreement for the IV-E eligible child, the parent or legal guardian must sign an MA application for the child.

b. Non-IV-E

The Cover Virginia Application for Health Coverage & Help Paying Costs is used for the MA eligibility determination of a **non-IV-E** Foster Care child. Applications for non-IV-E Foster Care children may also be filed online. The MA application for a non-IV-E child who is in foster care must be signed by an authorized employee of the public or private agency that has custody of the child. Exception: If the child has been placed with and is living with a parent or care-taker relative, the parent or care-taker relative can sign the application.

If there is a non-custodial agreement, an MA application form must be filed and the parent or legal guardian must sign the application.

Manual Title Virginia Medical Assistance Eligibility	Chapter M01	Page Revision Date October 2022
Subchapter Subject M0130 APPLICATION PROCESSING	Page ending with M0130.200	Page 9

If the client is eligible for benefits to be used exclusively for the payment of medical expenses (i.e. an insurance settlement), but there is no TPL code for that benefit, the worker must email the information to the DMAS TPL Unit at TPLUnit@dmass.virginia.gov, or send the information to:

DMAS Third Party Liability Section
600 East Broad Street, Suite 1300
Richmond, Virginia 23219

G. Health Insurance Premium Payment (HIPP) Program

The HIPP program is a cost-savings program for individuals enrolled in Medicaid which may reimburse some or all of the employee portion of the employer group health insurance premium. Eligibility for HIPP is determined by the HIPP Unit at DMAS. Participation in HIPP is voluntary.

The local DSS agency must give each applicant or enrollee who reports that he or someone in his family is employed more than 30 hours each week and is eligible for health insurance coverage under an employer's group health plan must be given a HIPP Fact Sheet, which provides a brief description of the program and the contact information for the HIPP Unit at DMAS. The HIPP Fact Sheet is available at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>. Enrollees and other members of the public may contact the HIPP Unit for additional information at hippcustomerservice@dmass.virginia.gov.

If the health insurance policy holder lives outside of the home, a HIPP Consent Form must be completed by both the policy holder and the parent/authorized representative so the DMAS HIPP Unit can process the HIPP application. If the form is required, the DMAS HIPP Unit will send it to the applicant for completion.

H. Verification of Financial Eligibility Requirements

The eligibility worker must verify the following financial eligibility requirements:

- the value of all countable, non-excluded resources;
- asset transfer information for individuals in need of long-term care services, including the date of transfer, asset value, and compensation received.
- earned and unearned income. For all case actions effective *August 26, 2022*, if the income attested to by the applicant is within 20% of the income information obtained from electronic sources OR both sources are below the applicable income limit, no additional verification is required.

If the attested income is under the income limit and the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return. If the applicant meets a Medically Needy (MN) covered group, verification of income **is required** to determine spenddown liability.

If the attested income is over the income limit and the individual does not meet a Medically Needy (MN) covered group, deny the application.

The agency must utilize online systems information verifications that are available to the agency without requiring verifications from the individual or family. The agency has ready access to Supplemental Nutrition Assistance Program (SNAP) and TANF records, some wage and payment information, and information from SSA through SVES or SOLQ-I. Verification of income

Manual Title Virginia Medical Assistance Eligibility	Chapter M01	Page Revision Date October 2022
Subchapter Subject M0130 APPLICATION PROCESSING	Page ending with M0130.200	Page 10

from these available sources, including the VEC, may be used if the information is less than 12 months old. The agency must include in each applicant's case record facts to support the agency's decision on the case.

1. **Resources** The value of all countable, non-excluded resources must be verified. If an applicant's attested resources are over the resource limit, the applicant or authorized representative must be given the opportunity to provide verification of the resources. All available resource verification system(s) must be searched prior to requesting information from the applicant.
2. **Use of Federal Income Tax Data** The Hub provides verification of income reported to the IRS. Income information reported to the IRS may be used for eligibility determinations for Families and Children (F&C), MAGI Adults, and ABD covered groups when IRS information is available. The income reported on the application is compared to the data obtained from the Hub for reasonable compatibility per M0420.100. When IRS verification is used for an ABD individual, reasonable compatibility is acceptable as verification of earned (i.e. taxable) income.

Note: Reasonable compatibility only applies to applications or reapplications; it does not apply to renewals.
3. **SSA Data** Social Security and/or Supplemental Security Income must be verified through SSA. The Federal Hub links to SSA data. SOLQ-I may also be used. The State Data Exchange (SDX) system should only be used as an alternate method when the Hub or SOLQ-I is not available.
4. **Income** For all case actions effective *August 26, 2022*, the applicant's attested income, including when the applicant attests to having zero (\$0.00) income, is considered the verified income if the income attested to by the applicant is within 20% of the income reported by electronic data sources OR both sources are below the applicable income limit.

If the attested income is under the income limit and the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return. If the applicant meets a MN covered group, verification of income **is required** to determine spenddown liability based on actual income received.

For individuals requesting long-term services and supports (LTSS), verification of income is required to calculate the patient pay. See M1470.

If the attested income is over the income limit and the individual does not meet a Medically Needy (MN) covered group, deny the application.

If the individual agrees that the discovered countable income was received, determine if the on-line information can be used to evaluate current/ongoing eligibility. If the discovered information is not sufficient to evaluate eligibility, send a written request for needed verifications and allow at least ten calendar days for the return of the verifications.

If the individual reports the income has stopped, ask when the income stopped to ensure all income needed to correctly determine prospective and retroactive eligibility (if appropriate) is evaluated. Note the date of termination of income (last pay received) in the record. If the income stopped during a month that is being evaluated for eligibility, the individual must provide verification of the termination of income.

Manual Title Virginia Medical Assistance Eligibility	Chapter M01	Page Revision Date October 2022
Subchapter Subject M0140 INCARCERATED INDIVIDUALS	Page ending with M0140.001	Page 1

M0140.000 Incarcerated Individuals General Information

A. Introduction

An incarcerated individual, or offender, is an inmate of a public institution. Inmates include those under the authority of the Virginia Department of Corrections (DOC), held in a regional or local jail, those on work release, and inmates of a Virginia Department of Juvenile Justice (DJJ) facility.

For juveniles not in a facility but within the authority of DJJ, see section M0280.300 D. See section M0280.301 regarding an individual who is not considered to be an inmate of a public institution.

An individual released from jail under a court probation order due to a medical emergency is NOT an inmate of a public institution because he is no longer incarcerated.

B. Policy Principles

An individual is not eligible for full benefit Medicaid coverage while incarcerated. These individuals may apply for medical assistance and (if approved) receive coverage limited to inpatient hospitalization services. Inpatient hospitalization may include long-term inpatient services, such as admission to a rehabilitation facility.

The offender must meet eligibility requirements for a full-benefit covered group. Medicaid non-financial eligibility requirements include

- Virginia residency requirements (see M0230)
- Citizenship or immigration status (see M0220)
- A Social Security Number (SSN) or proof of application for an SSN (see M0240)
- Institutional status requirement of being an inmate in a public institution (see M0280)

Medicaid financial eligibility requirements for the individuals covered group include

- Resources (if applicable) within resource limit (Chapter M06 for F&C; Chapter S11 for ABD)
- Income within income limit (Chapter M04 & M07 for F&C covered groups; Chapter S08 for ABD covered groups)

C. Covered Group

The individual is evaluated for eligibility in the covered group in which they would otherwise be eligible except for being incarcerated. The primary covered groups an offender may meet include:

- MAGI Adults (M0330.250)
- Pregnant Women (M0330.400)
- Child Under Age 19 (M0330.300)
- Aged, Blind or Disabled (M0320.300)
- Former Foster Care Child Under Age 26 Years (M0330.109)

D. Immigration Status Requirements

An incarcerated person must meet immigration requirements (see M0220). A non-citizen who meets all Medicaid eligibility requirements except for immigration status and has received an inpatient hospitalization may be evaluated for coverage as an Emergency Services Alien see M0140.200.C.3

Manual Title Virginia Medical Assistance Eligibility	Chapter M01	Page Revision Date October 2022
Subchapter Subject M0140 INCARCERATED INDIVIDUALS	Page ending with M0140.200	Page 3

**A. Offender
Application
Processing**

An application is not to be refused or denied because an applicant is incarcerated. A person is not required to have had an inpatient hospitalization in order to apply for Medicaid. The agency must evaluate the eligibility of all MA enrollees, with respect to circumstances that may change, at least every 12 months unless the enrollee is pregnant (see M1520.200 p.9).

**1. New
Application**

An offender who does not have active Medicaid coverage may apply while incarcerated. Coverage is based on the month of application and can include up to three months of coverage (if requested) prior to the month of application, provided eligibility requirements are met.

Ongoing coverage in AC 108 or AC 109 is effective the first day of the month of application or the date when incarceration begins, whichever is later.

**2. Re-entry
Process**

A medical assistance application for an offender with no active Medicaid coverage and an anticipated release date within 45 days is handled as part of a “Re-Entry” process *and will follow the same procedure as a New Application (ref M0140.200.C.1).* *If the offender is approved the case will have a redetermination conducted for ongoing Medicaid coverage.* This is a new application and an eligibility determination for Medicaid coverage will be made based on the information as reported or known at the time of release from the facility.

If the person is approved but is unable to or does not provide a post-release address where he will reside (e.g. reports as homeless or moving to a temporary shelter) the case will be transferred to the LDSS of his pre-incarceration, if known. If there is no known address, or the individual lived outside of Virginia prior to incarceration and intends to remain in the state, transfer the case to the LDSS where the correctional facility is physically located.

If the application is approved the worker will confirm that a new Commonwealth of Virginia Medicaid Card has been generated and a copy of the Notice of Action sent to the anticipated post-release address.

**3. Emergency
Services**

A non-citizen who meets all Medicaid eligibility requirements except for immigration status, and has received an inpatient hospitalization, may qualify for coverage of emergency medical care. This care must have been provided in a hospital emergency room or as an inpatient in a hospital. Determine eligibility for emergency services using policy in M0220.400 and enroll eligible individuals using the procedures in M0220.600 D.

For cases processed at the Cover Virginia Incarcerated Unit (CVIU) the individual will be enrolled in the appropriate AC 112 or AC 113 and the case will be retained at the CVIU for ongoing case maintenance.

Emergency Services coverage in AC 112 or AC 113 is effective the first day of the month of application, the first day of the retroactive period, or the date when incarceration begins, whichever is earliest

Manual Title Virginia Medical Assistance Eligibility	Chapter M01	Page Revision Date October 2022
Subchapter Subject M0140 INCARCERATED INDIVIDUALS	Page ending with M0140.300	Page 5

The worker will confirm a new Commonwealth of Virginia Medicaid Card has been generated and copy of the Notice of Action sent to the post-release address.

If eligibility for ongoing Medicaid is denied, cancel existing Medicaid coverage the day prior to actual date of release.

An offender with active Medicaid coverage (AC108/109) and released to the community before a Pre-Release Review can be conducted by the CVIU will transfer the offender's case to the locality for review. The CVIU will send a CPU to LDSS Communication Form to alert the locality for the need to review the member for ongoing Medicaid coverage and any other requested benefits.

**1. Release to a
Community
Living
Arrangement**

An offender entering a household with existing benefits after incarceration may affect Medicaid eligibility for those in the household.

The CVIU will process Pre-Release Reviews if approved, the case will be assigned to the locality where the ex-offender plans to reside.

If the person is approved but cannot or will not provide an address where he will reside (e.g. reports as homeless or moving to a temporary shelter), the case will be transferred to the LDSS of his pre-incarceration, if known. If there is no known address or the individual lived outside of Virginia prior to incarceration and intends to remain in the state, transfer the case to the LDSS where the correctional facility is physically located.

**2. Release to an
Institutional
Placement,
LTSS, or
HCBS**

When an offender is being released and needs to be placed in an institution or receive home and community-based services (HCBS), the CVIU will collaborate with LDSS in the locality where the individual will be residing for processing the application to ensure the eligible individual can receive necessary medical support/services when released.

A. Split Cases

For case maintenance, an offender with active Medicaid coverage in aid category 108 or 109 should be placed in his own case in VaCMS and assigned to the CVIU. If the incarcerated individual is the case name and other household members with active coverage are on the case, the local agency will be responsible for removing any other member(s), setting up a new case, and transferring the offender's case to the CVIU.

- Afghan or Iraqi Special Immigrant (as defined in M0220.310 above *and in M0220, Appendix 4*),
- *Ukraine Humanitarian Parolees (see Appendix 4)*

who entered the U.S. on or after 8-22-96 and who meets all other Medicaid eligibility requirements is eligible for the full package of Medicaid covered services available to the alien's covered group during the first 7 years of residence in the U.S. After 7 years of residence in the U.S., the refugee, Amerasian, asylee, deportee, Cuban or Haitian entrant, victim of a severe form of trafficking, or Afghan or Iraqi Special Immigrant who entered the U.S. on or after 8-22-96 is no longer eligible for full Medicaid benefits and is eligible for emergency services only.

2. LPR

Effective 4-1-21, after five years of residence in the U.S., an LPR who entered the U.S. on or after 8-22-96 is eligible for the **full package of Medicaid benefits** available to the covered group he/she meets if he/she meets all other Medicaid eligibility requirements.

For eligibility determinations for months prior to April 2021, LPRs who DO NOT have at least 40 qualifying quarters of work remain emergency services aliens after 5 years have passed from the date of entry into the U.S.

C. Entitlement & Enrollment for those Eligible

The Medicaid entitlement policy and enrollment procedures for full benefit qualified aliens who entered the U.S. on or after 8-22-96 are found in section M0220.600 below.

The Medicaid entitlement policy and enrollment procedures for emergency services qualified aliens who entered the U.S. on or after 8-22-96 are found in section M0220.700 below.

Manual Title Virginia Medical Assistance Eligibility	Chapter M02	Page Revision Date October 2022
Subchapter Subject M0220.000 CITIZENSHIP & ALIEN REQUIREMENTS	Page ending with M0220.500	Page 22

3. Entry Date THIS FIELD MUST BE ENTERED. Enter the date on which the alien entered the U.S., except for asylees and deportees. For asylees, enter the date asylum was granted. For deportees, enter the date deportation withholding was granted.

4. Appl Dt In this field, Application Date, enter the date of the alien's Medicaid application upon which the eligibility coverage period is based.

5. Coverage Begin Date In this field, Coverage Begin Date, enter the date the alien's Medicaid entitlement begins.

6. Coverage End Date Enter data in this field only if eligibility is a closed period of eligibility in the past. Enter the date the alien's Medicaid entitlement ended.

7. AC Enter the AC code applicable to the alien's covered group.

D. Emergency Services Only Aliens

Unqualified aliens, and qualified aliens eligible for emergency services only are eligible for Medicaid coverage of emergency medical care only. This care must be provided in a hospital emergency room or as an inpatient in a hospital.

Effective July 1, 2022, an emergency services only alien who meets all other Medicaid eligibility requirements is enrolled in Medicaid with ongoing coverage. Emergency services are no longer certified by the LDSS or DMAS, and the LDSS does not obtain an emergency services certification.

Applications received prior to July 1, 2022, are subject to the policies and procedures in M0220, Appendix 9. For an individual whose certification period begins prior to July 1, 2022 and expires on or after July 1, 2022, re-evaluate the individual's eligibility for ongoing coverage.

An emergency services alien will be assigned to one of the following Aid Categories (AC) by VaCMS:

- AC 112 for adults in Modified Adjusted Gross Income (MAGI) based covered groups
- AC 113 for children and adults in non-MAGI Families and Children's (F&C) and all Medically Needy (MN) covered groups.

For cases processed at Cover Virginia, the individual will be enrolled in the appropriate AC, and the case will be transferred to the local agency for ongoing case maintenance. *For CVIU incarcerated individuals refer to Policy M0140.200.3 C.*

Once an emergency services alien is found eligible in VaCMS, the enrollment will transfer into the Medicaid enrollment system. Any claims for emergency services will be sent by the provider or treating physician to DMAS for review and reimbursement. Medicaid coverage for emergency services only aliens will be restricted to emergency services (including dialysis).

Appropriate notice must be sent to the applicant of the status of his application and the duration of his eligibility. The notice must specify that their Medicaid coverage is limited to emergency services.

Manual Title Virginia Medical Assistance Eligibility	Chapter M02	Page Revision Date January 2022
Subchapter Subject M0220.000 CITIZENSHIP & ALIEN REQUIREMENTS	Page ending with Appendix 4	Page 1

Afghan Special Immigrants

The majority of Afghan special immigrants entering into the U.S. fall into one of three groups:

1. Holders of a Special Immigrant Visa,
2. Special Immigrant Parolees (SIP), who are individuals granted Special Immigrant (SI/SQ) Parole (per section 602(B)(1) AAPA/Section 1059(a) NDAA 2006), and
3. Non Special Immigrant Parolees entering the United States without SI/SQ parole due to the urgent nature of their arrival (Humanitarian status).

The United States Congress passed a Continuing Resolution on October 1, 2021, allowing individuals with a humanitarian parole status to receive full Medicaid (within certain parameters). Section 2502 of the [Continuing Resolution](#) provides that certain Afghan nationals who receive parole “shall be eligible for resettlement assistance, entitlement programs, and other benefits available to refugees” to include Medicaid, until March 1, 2023 (or until their parole expires). Eligible parolees are those who either:

- Were paroled into the United States between July 31, 2021, and September 30, 2022
- Are a qualifying relative of someone who received parole in that period (CR section 2502(a)(1)(B)), even if they receive parole after Sept 30, 2022.

Individuals with (1) SIV status, (2) SIP status, and (3) Humanitarian Parolee Status issued between July 31, 2021, and September 30, 2021, are qualified for evaluation in Medicaid and FAMIS without a five-year residency bar (provided that all other eligibility requirements are met).

Exception: Humanitarian Parolees who arrived **before July 31, 2021**, are eligible only for Medicaid coverage of emergency medical services and Health Insurance Marketplace coverage. Many of these individuals have already been enrolled in subsidized Marketplace coverage or have been granted asylum and are therefore eligible for Medicaid or FAMIS without the 5-year bar.

Children under 19 years and pregnant women with SIV, SIP, or Humanitarian status meet the definition of lawfully residing aliens for Medicaid and FAMIS/FAMIS MOMS coverage.

Afghan Special Immigrant visa holders will have either (1) a passport or I-94 form indicating category SI1, SI2, SI3, SQ1, SQ2, or SQ3 and bearing the Department of Homeland Security stamp or notation or an I-151 (“green card”) indicating SI6, SI7, SI8, SQ6, SQ7, or SQ8.

Special Immigrant Parolees will have an I-94 form noting SQ or SI Parole (per section 602(B)(1) AAPA/Sec 1059(a) NDAA 2006).

If an individual has attested to eligible immigration status and is found otherwise eligible for Medicaid, but verification of that status cannot be obtained, do not deny or delay coverage. Enroll the individual and give a 90-day reasonable opportunity period.

Subchapter Subject M0220.000 CITIZENSHIP & ALIEN REQUIREMENTS	Page ending with Appendix 4	Page 2

Ukraine Humanitarian Parolees

The U.S. Department of Homeland Security (DHS) is providing support and humanitarian relief to Ukrainians who have been displaced by Russia's February 24, 2022 invasion and fled Ukraine. The United States Congress passed the Additional Ukraine Supplemental Appropriations Act (AUSAA) and was signed on May 21, 2022 by President Biden. This measure confers eligibility for all Ukrainian Humanitarian Parolees for mainstream federal benefits as well as resettlement services funded by the Office Refugee Resettlement (ORR).

Certain Ukraine nationals entering the U.S. may be eligible for health coverage through Medicaid, the Children's Health Insurance Program (CHIP), the Health Insurance Marketplace, or Refugee Medical Assistance (RMA). These individuals may be granted a range of lawful non-citizen statuses, including parole, temporary protected status (TPS), immigrant and nonimmigrant visas, and refugee or asylees. The primary non-citizen immigrant statuses include:

1. Parolees: Ukrainian nationals who enter the United States as parolees on or **between February 24, 2022 and September 30, 2023** are eligible for Medicaid or CHIP to the same extent as refugees, without a five-year waiting period, if they meet other eligibility requirements. These Ukrainian parolees are considered "qualified non-citizens" for purposes of Medicaid and CHIP eligibility since they are eligible for the same benefits as refugees.

Ukrainian nationals who are paroled into the U.S. **after September 30, 2023** and are the spouse or child of a parolee described above, or who is the parent, legal guardian, or primary caregiver of a parolee described above who is determined to be an unaccompanied child will also be eligible for Medicaid and CHIP to the same extent as refugees.

2. Temporary Protected Status (TPS): Ukrainian nationals (and individuals having no nationality who last habitually resided in Ukraine) are eligible to apply for TPS. This includes Ukrainians granted TPS or have pending applications for TPS and who have been granted employment authorization. The TPS designation is effective **April 19, 2022 and will remain in effect through October 19, 2023**.
3. Refugees: Some Ukrainian nationals may be granted refugee status and resettled into the U.S. are eligible for full Medicaid or CHIP benefits, without application of the five-year waiting period, if they otherwise meet all other Medicaid eligibility requirements.
4. Lawfully Residing individual: Children under age 19 and pregnant women who are in one of the lawfully residing non-citizen alien groups (see M0220.314) and meet the definition of a lawfully residing alien for Medicaid and FAMIS/FAMIS MOMS coverage may be eligible for assistance.
5. Emergency Services: Ukrainian non-citizens who do not qualify for full Medicaid benefits based on their immigration status may be eligible for "emergency services Medicaid" if they meet all other eligibility requirements. An individual eligible only for emergency Medicaid is permitted to enroll in Marketplace coverage if they meet all Marketplace eligibility requirements.

Ukrainian parolees will generally have foreign passports with a DHS stamp admitting them with a PAR, DT, or UHP Class of Admission (COA). DHS will be using the existing COA code DT and PAR for some Ukrainians who were paroled into the U.S. Additional COA code(s) will be programmed into Hub logic in early fall of 2022.

If an individual has attested to eligible immigration status and is found otherwise eligible for Medicaid, but verification of that status cannot be obtained, do not deny or delay coverage. Enroll the individual and give a 90-day reasonable opportunity period.

Manual Title Virginia Medical Assistance Eligibility	Chapter M04	Page Revision Date October 2022
Subchapter Subject M04 MODIFIED ADJUSTED GROSS INCOME (MAGI)	Page ending with M0420.100	Page 5

1. **Dependent Child** means a child under age 18, or age 18 and a full-time student in a secondary school is expected is to graduate prior to his 19th birthday, and who lives with his parent or caretaker-relative.
2. **Family** means the tax filer (including married tax filers filing jointly) and all claimed tax dependents.
3. **Family Size** means the number of persons counted as an individual's household. The family size of a pregnant woman's household includes the pregnant woman plus the number of children she is expected to deliver. When determining the family size of other individuals who have a pregnant woman in their household, the pregnant woman is counted as just one person.
4. **Household**

A household is determined by tax dependency. Parents, children and siblings are included in the same household. A child claimed by non-custodial parent is evaluated for eligibility in the household in which he is living and is also counted in the family size of the parent claiming him as a dependent. There can be multiple households living in the home.

This definition is different from the use of the word household in other programs such as the Supplemental Nutrition Assistance Program (SNAP).
5. **MAGI Adult** is an individual between the ages of 19-64 who is not eligible for or enrolled in Medicare and who has income at or below 138% of FPL.
6. **Non-filer Household** means individuals who do not expect to file a Federal tax return and/or do not expect to be claimed as a tax dependent for the taxable year in which an initial determination or renewal of eligibility is being made. A non-filer household can also be a child who lives in the household with his custodial parent who is claimed on his non-custodial parent's taxes.
7. **Parent** for the purposes of MAGI methodology, means a natural, biological, adoptive, or stepparent. When both the child's parent and stepparent are living in the home with the dependent child, both may be eligible in the LIFC covered group.
8. **Reasonable Compatibility**

means the income attested to (declared) by the applicant is within 20% of income information obtained from electronic sources OR that both the attested income and any electronic income verification are below the applicable income limit. If the income from both sources meets the 20% requirement or the income from both sources is below the limit, then the attestation is considered verified.

The applicant's income reported on the application is compared through a match with income verification available from electronic income sources. The eligibility/enrollment system will compare the reported income with the income from the data match and determine if reasonable compatibility exists. If reasonable compatibility exists, the income will be labeled verified, and no further verification of the income is necessary.

If reasonable compatibility does not exist or income data was not available through available electronic sources and the attestation is below the medical assistance income level, additional verification of income is required.

Manual Title Virginia Medical Assistance Eligibility	Chapter M04	Page Revision Date October 2022
Subchapter Subject M04 MODIFIED ADJUSTED GROSS INCOME (MAGI)	Page ending with M0440.100	Page 15

The reported income of a child must be verified regardless of whether or not the attested income is above or below the tax-filing threshold amount.

If an income calculation must be made, use the information in subchapter M0710 for estimating income, subchapter M0720 for sources of earned income, and subchapter M0730 for sources of unearned income with the exceptions in B. below. The sources of income listed in this section are organized in table form in M04, Appendix 7.

A. MAGI Income Rules

1. Income That is Counted

- a. Gross earned income is counted. There are no earned income disregards.
- b. Earnings and unearned income, including Social Security benefits, of everyone in the household are counted, except the income of
 - a tax dependent *of any age* who is claimed by his parent(s), or
 - a child under 19 in a non-filer household who is living with a parent or parents

who is not required to file taxes because the tax filing threshold is not met.

For children and tax dependents, Social Security income only counts toward the total household income if the individual is required to file a federal tax return. *Any Social Security benefits the child or dependent may receive do not count as unearned income in determining whether the tax filing threshold is met.*

- c. Income of a child under 19 in a non-filer household who is NOT living with a parent or parents and who is not required to file taxes because the tax filing threshold is not met.

When determining the total household income of a child who is NOT living with a parent (for example, living with a grandparent) *or an individual being claimed by a non-parent*, the *dependent's* income is always counted in determining *their own* eligibility, even if the income is below the tax filing threshold.

Effective, January 1, 2022, the Tax Filing Threshold for MAGI income counting purposes is \$1,100 in unearned income and \$12,550 in earned income. Social Security benefits do not count as unearned income in determining whether the tax filing threshold is met.

- d. Interest, including tax-exempt interest, is counted.
- e. Foreign income is counted.
- f. Stepparent income is counted.

Manual Title Virginia Medical Assistance Eligibility	Chapter M04	Page Revision Date October 2022
--	-----------------------	---

Subchapter Subject M04 MODIFIED ADJUSTED GROSS INCOME (MAGI)	Page ending with M0440.100	Page 16
--	--------------------------------------	-------------------

- g. Effective January 1, 2019, alimony received is not countable.
Alimony received prior to January 1, 2019, is countable. An individual whose divorce decree was finalized prior to January 1, 2019, has the option with the IRS to adopt the new IRS alimony rule by modifying the divorce agreement. If an individual whose divorce decree was finalized prior to January 1, 2019, does not want alimony received on or after January 1, 2019 to be countable for the MAGI income determination, the individual must provide a copy of the modified divorce agreement to the eligibility worker.
- h. An amount received as a lump sum is counted only in the month received
- i. Military pay based upon age or years of service (other types of military pay are also counted and excluded; see M0720.290)
- j. Census income.
- k. Unemployment Compensation is counted as unearned income.

Exception: Additional benefits of \$600 per week paid under the under the Federal Pandemic Unemployment Compensation program are not counted. See M0440.100 B.2.n.

2. Income That is Not Counted

- a. Child support received is not counted as income (it is not taxable income).
- b. Workers Compensation is not counted.
- c. When a child *or other dependent* is included in a parent or stepparent's household, the *individual's* income is not countable as household income unless *they are* required to file taxes because the tax-filing threshold is met. Any Social Security benefits the individual may have do not count in determining whether the tax filing threshold is met.
- d. Veterans benefits which are **not** taxable in IRS Publication 525 are not counted:
 - Education, training, and subsistence allowances,
 - Disability compensation and pension payments for disabilities paid either to veterans or their families,
 - Veterans' insurance proceeds and dividends paid either to veterans or their beneficiaries, including the proceeds of a veteran's endowment policy paid before death,
 - Grants for homes designed for wheelchair living and motor vehicles for veterans who lost their sight or the use of their limbs,
 - Interest on insurance dividends left on deposit with the VA,
 - Benefits under a dependent-care assistance program,
 - The death gratuity paid to a survivor of a member of the Armed Forces who died after September 10, 2001, or
 - Payments made under the VA's compensated work therapy program.
- e. For divorce agreements finalized on or after January 1, 2019, no deduction is allowed for alimony paid. For divorce agreements finalized prior to January 1, 2019, alimony **paid** to a separated or former spouse outside the home is deducted from countable income.

Subchapter Subject M0710.000 GENERAL - F & C INCOME RULES	Page ending with M0710.001	Page 2

**C. Individual
Income Eligibility**

An individual's income eligibility is based on the total countable income available to his/her FU/BU.

Each source of income received by a member of the FU/BU is evaluated and the countable amount determined based on the policy in this chapter. The countable amount of each FU/BU member's income is added to the countable amount of the income of all other FU/BU members. That total is used to determine the income eligibility of each individual within that FU/BU. The FU/BU's total countable income is compared to the income limit that is applicable to the individual's classification and to the number of members in the FU/BU.

D. Policy Principles

1. Income

Everything an individual owns and all monies received are assets. Monies received are income in the month received when the monies are cash or its equivalent.

Income may be either earned or unearned. See M0720 for earned income and M0730 for unearned income.

2. Verification

The agency must utilize online systems information verifications that are available to the agency without requiring verifications from the individual or family. The agency has ready access to Supplemental Nutrition Assistance Program (SNAP) and TANF records, some wage and payment information, and information from SSA through SVES or SOLQ-I. Verification of income from available sources, including the VEC, may be used if it is dated within the previous 12 months. See M0130.001.B.3.

For all case actions effective *August 26, 2022*, if the income attested to by the applicant is within 20% of the income information obtained from electronic sources OR both sources are below the applicable income limit, no additional verification is required. If the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return.

All income other than Workforce Investment Act and the earned income of a student under age 19 must be verified. When attempts to verify income are unsuccessful because the person or organization who is to provide the information cannot be located or refuses to provide the information to both the applicant/recipient and the eligibility worker, a third party statement, a collateral contact, or as a last resort, the applicant's/recipient's written statement can be used as verification and to determine the amount of income to be counted.

Failure of the applicant/enrollee to verify his income results in the agency's inability to determine Medicaid eligibility and the applicant/enrollee's Medicaid coverage must be denied or canceled.

Manual Title Virginia Medical Assistance Eligibility	Chapter M11	Page Revision Date October 2022
Subchapter Subject M1140.000 TYPES OF COUNTABLE RESOURCES	Page ending with M1140.500	Page 33

M1140.500 WORKERS' COMPENSATION MEDICARE SET-ASIDE ARRANGEMENT ACCOUNTS

A. Introduction

A Workers' Compensation Medicare Set-aside Arrangement (WCMSA) is an arrangement which allocates a portion of a Workers' Compensation settlement for future medical expenses. The initial amounts of any set asides are determined on a case-by-case basis and are reviewed by the Centers for Medicare and Medicaid Services (CMS). Most WCMSAs will be placed in interest bearing accounts and are self-administered by applicants/enrollees, or by a competent administrator.

Funds authorized by a WCMSA are unearned income in the month of receipt, and any amount retained following the month of receipt is a countable resource. Section S0830.235 contains information on Workers' Compensation payments.

B. Operating Policy

1. Ownership

Assume that the person designated as owner in the account title owns all the funds in the account.

2. Right to Withdraw Funds

Absent evidence to the contrary, assume that the person shown as owner in the account title has the legal right to withdraw funds from the account.

3. Fiduciaries

A fiduciary's right to withdraw funds is the same as the owner's right to withdraw them.

4. Right to Use for Support and Maintenance

Although funds are intended for specific medical expenses, there are no legal restrictions as to how an individual uses the funds. Assume that an individual who owns and has the legal right to withdraw funds from a WCMSA also has the legal right to use them for his own support and maintenance.

C. Development and Documentation

The development and documentation instructions for checking and savings accounts contained in section S1140.200 apply to WCMSA accounts.

Subchapter Subject M1410.000 GENERAL RULES FOR LONG-TERM CARE	Page ending with M1410.010	Page 2a

6. Medical Institution (Facility)

A **medical institution** is an institution (facility) that:

- is organized to provide medical care, including nursing and convalescent care,
- has the necessary professional personnel, equipment, and facilities to manage the medical, nursing and other health needs of patients,
- is authorized under state law to provide medical care, and
- is staffed by professional personnel who are responsible to the institution for professional medical and nursing services.

An acute care hospital is a medical institution.

7. Patient

An individual who is receiving needed professional services that are directed by a licensed practitioner of the healing arts toward maintenance, improvement, or protection of health or lessening of illness, disability, or pain, is a **patient**.

8. Inpatient

An **inpatient** is a patient who has been admitted to a medical institution on the recommendation of a physician or dentist **and** who:

- receives room, board, and professional services in the institution for a 24-hour period or longer, **or**
- is expected by the institution to receive room, board, and professional services in the institution for a 24-hour period or longer even though it later develops that the patient dies, is discharged or is transferred to another facility, and does not actually stay in the institution for 24 hours.

9. Assisted Living Facility (ALF) / Memory Care Unit

An assisted living facility (ALF) or memory care unit are not long-term care facilities or a Medicaid medical institution. An ALF or memory care unit may be located within the same setting or campus such as a continuing care or a long-term care facility, however the level of care differs from that of a Medicaid medical institution.

10. Independent living facility

A senior living center/senior apartment/retirement community are independent living arrangements or residences and are not medical institutions.

M1420.000 AUTHORIZATION FOR MEDICAID LTSS

M1420.100 MEDICAID LTSS AUTHORIZATION REQUIREMENTS

A. Introduction

Medicaid covers long-term services and supports (LTSS) in a medical facility or community-based setting for individuals whose mental or physical condition requires assistance with activities of daily living. For Medicaid to cover LTSS, the individual must:

- meet the definition of an institutionalized individual in subchapter M1410. The individual's eligibility as an institutionalized individual may be determined when the individual is already in a medical facility at the time of the application, or the individual has been authorized to receive LTSS and it is anticipated that they are likely to receive the services for 30 or more consecutive days. If it is known at the time the application is processed that the individual did not or will not meet the 30 consecutive day requirement, the individual is not to be treated as an institutionalized individual.
- meet all Medicaid non-financial eligibility requirements in Chapter M02;
- be financially eligible based on the policy and procedures in subchapter M1460 for unmarried individuals and married institutionalized individuals without a community spouse or subchapter M1480 for institutionalized individuals with a community spouse; and
- Meet the asset transfer policies in subchapter M1450.

This subchapter describes the LTSS authorization required for the types of LTSS, which are facility-based care, home-and-community-based (HCBS) services covered under a Section 1915(c) waiver, and the Program for All Inclusive Care for the Elderly (PACE).

B. Operating Policies

1. Payment Authorization

An LTSS authorization is needed for Medicaid payment of nursing facility (medical institution), HCBS waiver, and PACE services for Medicaid recipients. The authorization allows the local DSS to determine financial eligibility using the more liberal rules for institutionalized individuals, including the 300% SSI covered group and the special rules for married institutionalized individuals with a community spouse. The appropriate authorization document (form or screen print) must be maintained in the individual's case record

2. Required Authorization Documents

a. Nursing facility-based care, the Commonwealth Coordinated Care Plus Waiver, and PACE

The Medicaid LTSS Authorization Form, DMAS 96 or the equivalent information printed from the electronic Medicaid LTSS Screening system (eMLS) or the *Minimum Data Survey (MDS)* is used to authorize nursing facility-based care, the Commonwealth Coordinated Care (CCC) Plus Waiver, and PACE. The Authorization form certifies the type of LTSS service

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.200	Page 2

If documentation is not available when placement needs to be made, verbal assurance from a screener that the form approving LTSS will be mailed or *electronically available* is sufficient to determine Medicaid eligibility as an institutionalized individual. This information must be received prior to approval and enrollment in Medicaid as an institutionalized individual.

b. The Community Living Waiver, Building Independence Waiver, and Family and Individual Supports Waiver.

The Waiver Authorization System (WaMS) (see M1420, Appendix 3) or Intellectual Disability On-line System (IDOLS) are used to authorize services received under the Community Living (CL) Waiver, Building Independence (BI) Waiver, and Family and Individual Supports Waiver. Copies of the authorization screens are acceptable.

3. Authorization Not Received

If the appropriate documentation authorizing LTSS is not received, Medicaid eligibility for an individual who is living in the community must be determined as a non-institutionalized individual.

4. Continuing Authorization

Providers re-evaluate the individual's level of care periodically. The authorization for Medicaid payment of LTSS may be rescinded by the physician or by DMAS at any point that the individual is determined to no longer meet the required Medicaid level of care criteria via level of care review process.

When an individual is no longer eligible for a HCBS Waiver service, the EW must re-evaluate the individual's eligibility as a non-institutionalized individual.

When an individual leaves the PACE program and no longer receives LTSS services, the EW must re-evaluate the individual's eligibility as a non-institutionalized individual.

Facilities document the level of care using the Minimum Data Survey (MDS). For an individual in a nursing facility who no longer meets the level of care but continues to reside in the facility, **continue to use the eligibility rules for institutional individuals** even though the individual no longer meets the level of care criteria. Medicaid will not make a payment to the facility for LTSS.

M1420.200 RESPONSIBILITY FOR THE LTSS AUTHORIZATION

A. Introduction

The process for completing the required assessment and authorizing services depends on the type of LTSS.

B. Nursing Facility

In order to qualify for nursing facility care, an individual must be determined to meet functional criteria, have a medical or nursing need and be at risk of nursing facility or hospital placement within 30 days without services. An assessment known as the LTSS Screening is completed by a designated screener. *For individuals who apply for Medicaid after entering a nursing facility, medical staff at facilities document the level of care needed using the Minimum Data Survey (MDS). The Eligibility Worker does not need to see any screening authorization if the individual applying is already a resident of a nursing facility when the Medicaid application is filed.*

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.200	Page 3

The screener's approval for Medicaid LTSS for new admissions must be substantiated in the case record by a DMAS-96 or the equivalent information from the eMLS system, *WaMS printout or the Minimum Data Survey (MDS)*. Medicaid payment for LTSS cannot begin prior to the date the DMAS-96 is *signed by the physician* and prior authorization of services for the individual has been given to the provider by DMAS or the managed care plan.

An overview of the screening requirements when an individual needs nursing home care is listed below:

- For hospital patients who are currently enrolled in Medicaid and will be admitted to a nursing facility with Medicaid as the payment source, the screening is completed by hospital staff.
- Nursing facilities are permitted to admit individuals who are discharged directly from a hospital to a nursing facility for skilled services without an LTSS screening if the skilled services are not covered in whole or partially by Virginia Medicaid. Once the individual is admitted to the nursing facility, if the individual requests an LTSS screening or applies for Medicaid coverage for LTSS, nursing facility staff *will conduct a LTSS screening. The Eligibility Worker does not need to see the screening authorization if the individual applying is already a resident of a nursing facility when the Medicaid application is filed. DMAS will not pay for LTSS services unless the facility has documented that the applicant meets the nursing facility level of care.*
- For individuals who are not inpatients in a hospital or are incarcerated prior to nursing facility admission, the screening is completed by local community-based teams (CBT) composed of agencies contracting with the Department of Medical Assistance Services (DMAS). The community-based teams usually consist of the local health department physician, a local health department nurse, and a local social services department service worker. Incarcerated individuals will be screened by the community-based team in the locality in which the facility is located.

C. CCC Plus Waiver

Effective July 1, 2017, the Elderly or Disabled with Consumer-Direction (EDCD) Waiver and the Technology Assisted (Tech) Waiver were combined and are known as the Commonwealth Coordinated Care Plus (CCC Plus) Waiver. Community-based teams, hospital screening teams and nursing facility screening teams are authorized to screen individuals for the CCC Plus Waiver. See M1420.400 C for more information.

An individual screened and approved for the CCC Plus Waiver will have a DMAS-96 signed and dated by the screener and the physician (*or the nurse practitioner or the physician's assistant working with the physician*) or the equivalent information printed from the eMLS system.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.200	Page 4

If the individual elects consumer-directed services, DMAS or its contractor must give final authorization. If services are not authorized, the service facilitator will notify the LDSS, and the EW must re-evaluate the individual's eligibility as a non-institutionalized individual.

For individuals who qualify for Private Duty Nursing (PDN) under the CCC Plus Waiver, a Medicaid LTSS Communication form (DMAS-225) and a Commonwealth Coordinated Care Plus Waiver PDN Level of Care Eligibility form (DMAS-108 for Adults or DMAS-109 for children) will be completed and sent to the LDSS.

D. *Program for All Inclusive Care for the Elderly (PACE)*

Community-based screening teams, hospital screening teams and nursing facility screening teams are authorized to screen individuals for PACE. If the individual is screened and approved for LTSS, the team will inform the individual about any PACE program that serves the individual's locality. Individuals approved for PACE will have a DMAS-96 signed and dated by the screener and the supervising physician (or the nurse practitioner or the physician's assistant working with the physician) or the equivalent information printed from the eMLS system.

E. *Community Living Waiver*

Local Community Services Boards (CSBs) are authorized to screen individuals for the Community Living Waiver. Final authorizations for waiver services are made by Department of Behavioral Health and Developmental Services (DBHDS) staff.

Individuals screened and approved for the Community Living Waiver will have a printout of the WaMS or Intellectual Disability On-line System (IDOLS) authorization screen completed by the DBHDS representative. The screen print will be accompanied by a completed DMAS-225 form identifying the client, the Community Services Board providing the service, and begin date of service.

F. *Family and Individual Supports Waiver*

CSBs are authorized to screen individuals for the Family and Individual Supports Waiver. Final authorizations for waiver services are made by DBHDS staff.

Individuals screened and approved for the Family and Individual Supports Waiver will have a printout of the WaMS or IDOLS authorization screen completed by the DBHDS representative. The screen print will be accompanied by a completed DMAS-225 form identifying the client, the Community Services Board providing the service, and begin date of service.

G. *Building Independence Waiver*

Local CSB and DBHDS case managers are authorized to screen individuals for the Building Independence Waiver. Final authorizations for waiver services are made by DBHDS staff.

Individuals screened and approved for the Building Independence Waiver will have a printout of the WaMS or IDOLS authorization screen completed by the DBHDS representative. The screen print will be accompanied by a completed DMAS-225 form identifying the client, the Community Services Board providing the service, and begin date of service.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1420.000 AUTHORIZATION FOR MEDICAID LTSS	Page ending with M1420.300	Page 5

M1420.300 COMMUNICATION PROCEDURES

A. Introduction

To ensure that nursing facility, PACE placement or receipt of Medicaid HCBS services are arranged as quickly as possible, there must be prompt communication between screeners and eligibility staff.

B. Procedures

1. LDSS Contact

The LDSS should designate an appropriate staff member for screeners to contact. Local social services, hospital staff, CBTs and nursing facilities should be given the name and contact information for that person to facilitate timely communication between screeners and eligibility staff.

2. Screeners

Screeners must inform the individual's eligibility worker when the screening process has been completed.

3. Eligibility Worker (EW) Action

The EW must inform both the individual and the provider once eligibility for Medicaid payment of LTSS has been determined. If the individual is found eligible for Medicaid and written assurance of approval by the screening team, DMAS, or the managed care plan has been received (DMAS-96, WaMS printout or the *Minimum Data Survey [MDS]*), the eligibility worker must give the LTSS provider the enrollee's Medicaid identification number.

M1420.400 LTSS SCREENING EXCLUSIONS (Special Circumstances)

A. Purpose

The screening certification authorizes the local DSS to determine financial eligibility using the more liberal rules for institutionalized individuals, including the 300% SSI covered group and the special rules for married institutionalized individuals with a community spouse. The Eligibility Worker does not need to see any screening authorization if the individual applying is already a resident of a nursing facility when the Medicaid application is filed.

B. Screening Special Circumstances

Screening for LTSS is NOT required when:

- the individual is a resident in a nursing facility, receiving CCC Plus Waiver services or in PACE at the time of application and was admitted to the service prior to July 1, 2019;*
- the individual resides out of state (either in a community, hospital or nursing facility setting) and seeks direct admission to a nursing facility;*
- the individual is an inpatient at an in-state owned/operated facility licensed by DBHDS, in-state or out of state Veterans hospital, military hospital or VA Medical Center, and seeks direct admission to a nursing facility;*
- the individual enters a nursing facility directly from the CCC Plus Waiver or PACE services;*
- the individual is being enrolled in Medicaid hospice.*

Subchapter Subject M1430.000 FACILITY CARE	Page ending with M1430.010	Page 1

M1430.000 FACILITY CARE

A. Introduction Medicaid covers care provided in a facility to persons whose physical or mental condition requires nursing supervision and assistance with activities of daily living.

This subchapter (M1430) contains the specific policy and rules that apply to individuals needing or receiving long-term supports and services (LTSS), also referred to as long-term care (LTC) services in medical institutions (facilities).

B. Definitions Definitions for terms used when policy is addressing types of *LTSS*, institutionalization, and individuals who are receiving that care are found in Subchapter M1410.

M1430.010 TYPES OF FACILITIES & CARE

A. Introduction This section contains descriptions of the types of medical facilities in which Medicaid provides payment for services received by eligible patients. *Also refer to M1410.010.B for additional guidance.*

B. Medical Facility Defined A **medical facility** is an institution that:

- is organized to provide medical care, including nursing and convalescent care,
- has the necessary professional personnel, equipment, and facilities to manage the medical, nursing and other health needs of patients,
- is authorized under state law to provide medical care, and
- is staffed by professional personnel who are responsible to the institution for professional medical and nursing services.

C. Types of Medical Facilities The following are types of medical facilities in which Medicaid will cover part of the cost of care:

1. Chronic Disease Hospitals **Chronic disease hospitals** are specially certified hospitals, also called "long-stay hospitals". There are two of these hospitals enrolled as Virginia Medicaid providers:

- Hospital for Sick Children in Washington, D.C.;
- Lake Taylor Hospital in Norfolk, Virginia.

2. Intermediate Care Facilities for the Intellectually Disabled (ICF-ID) An **ICF-ID** is an institution for the intellectually disabled or persons with related conditions is an institution or a distinct part of an institution that

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1450.000 TRANSFER OF ASSETS	Page ending with M1450.630	Page 36

**1. Penalty Periods
Cannot Overlap**

When multiple asset transfers result in multiple penalty periods, the penalty periods cannot overlap. One penalty period must be completed prior to the beginning of the next penalty period.

2. Nursing Facility

If the individual in a nursing facility meets all Medicaid eligibility requirements, he is eligible for Medicaid payment of all other covered services.

**3. HCBS, PACE,
Hospice**

a. Transfer Reported at Application

If the individual has been screened and approved for or is receiving Medicaid HCBS, PACE, or hospice services, he cannot be eligible for Medicaid in the 300% of SSI covered group or for the Medicaid payment of LTSS in any other covered group. The individual's Medicaid eligibility in other covered groups must be determined. His penalty period cannot be imposed unless and until he is (1) eligible for Medicaid in a full-benefit covered group other than the 300% of SSI covered group, (2) he meets a spenddown and would otherwise be eligible for the Medicaid payment of LTSS, or (3) he is admitted to a nursing facility.

An individual outside a medical facility (i.e. living in the community) does not meet the definition of an institutionalized person if he is not receiving Medicaid covered HCBS, PACE or hospice services. Therefore, an individual for whom a penalty period is imposed cannot be eligible for Medicaid unless the individual is eligible for Medicaid outside the 300% SSI covered group.

Any penalty periods imposed under the rules effective April 17, 2018 through October 1, 2022 are valid and continue until the penalty period is exhausted.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1470 PATIENT PAY	Page ending with M1470.420	Page 20

- 3. Special Earnings Allowance for Recipients in CCC Plus, CL, IS and BI Waivers**
- Deduct the following special earnings allowance if the patient is working (the work does NOT have to be part of treatment). The special earnings allowance is deducted from earned income only. Deduct:
- for individuals employed 20 hours or more per week, all earned income up to 300% of SSI (\$2,523 in 2022) per month.
 - for individuals employed at least 8 but less than 20 hours per week, all earned income up to 200% of SSI (\$1,682 in 2022) per month.

- 4. Example – Special Earnings Allowance (Using January 2018 figures)**
- A working patient receiving CCC Plus Waiver services is employed 18 hours per week. His income is gross earnings of \$1228.80 per month and SSA of \$300 monthly. His special earnings allowance is calculated by comparing his gross earned income (\$1128.80) to the 200% of SSI maximum (\$1,500.00). His gross earned income is less than 200% of SSI; therefore, he is entitled to a special earnings allowance. His personal maintenance allowance is computed as follows:

\$ 1,238.00 CBC basic maintenance allowance
+ 1,128.80 special earnings allowance
\$ 2,366.80 PMA

Because the PMA may not exceed 300% of SSI, the PMA for the patient in this example must be reduced to \$2,250.00.

B. Couples

The Medicaid CBC waivers do not specify personal maintenance allowances for a married couple living together when both spouses receive Medicaid CBC because each spouse is considered an individual for patient pay purposes. The individual maintenance allowance in section M1470.410 applies to each spouse in a couple when each receives Medicaid CBC.

M1470.420 DEPENDENT CHILD ALLOWANCE

- A. Unmarried Individual, or Married Individual With No Community Spouse**
- For an unmarried Medicaid CBC patient, or a married Medicaid CBC patient without a community spouse, who has a dependent child(ren) under age 21 years in the community:
- Calculate the difference between the appropriate MN income limit for the **child's** home locality for the number of children in the home and the child(ren)'s gross monthly income. If the children are living in different homes, the children's allowances are calculated separately using the MN income limit for the number of the patient's dependent children in each home.

Manual Title Virginia Medical Assistance Eligibility	Chapter M14	Page Revision Date October 2022
Subchapter Subject M1480 MARRIED INSTITUTIONALIZED INDIVIDUALS	Page ending with M1480.420	Page 66

After eligibility is established, the usual reporting and notification processes apply. Send written notice for the month(s) during which the individual establishes Medicaid eligibility. VaCMS will generate the “Notice of Patient Pay Responsibility” and it will be sent to the individual or his authorized representative.

M1480.400 PATIENT PAY

- A. Introduction** This section contains the policy and procedures for determining an institutionalized spouse’s (as defined in section M1480.010 above) patient pay in all covered groups.
- B. Married With Institutionalized Spouse in a Facility** For a married long-term services and support (LTSS) patient with an institutionalized spouse in a facility, **NO** amount of the patient’s income is deducted for the spouse’s needs in the patient pay calculation.

M1480.410 MAINTENANCE STANDARDS & ALLOWANCES

Introduction This subsection contains the standards and their effective dates that are used to determine the community spouse’s and other family members’ income allowances. The income allowances are deducted from the institutionalized spouse’s gross monthly income when determining the monthly patient pay amount. Definitions of these terms are in section M1480.010 above.

B. Monthly Maintenance Needs Allowance	\$2,177.50	7-1-21	
	\$2,288.75	7-1-22	
C. Maximum Monthly Maintenance Needs Allowance	\$3,259.50	1-1-21	
	\$3,435.00	1-1-22	
D. Excess Shelter Standard	\$653.25	7-1-21	
	\$686.63	7-1-22	
E. Utility Standard Deduction (SNAP)	\$322.00	1 - 3 household members	10-1-21
	\$402.00	4 or more household members	10-1-21
	\$374.00	1 - 3 household members	10-1-22
	\$473.00	4 or more household members	10-1-22

M1480.420 PATIENT PAY FOR ABD 80% FPL AND 300% SSI INSTITUTIONALIZED SPOUSE

- A. Policy** After a 300% SSI or ABD 80% FPL institutionalized spouse has been found eligible for Medicaid, determine his patient pay (post-eligibility treatment of income).

Manual Title Virginia Medical Assistance Eligibility	Chapter M17	Page Revision Date October 2022
Subchapter Subject MEDICAID FRAUD AND NON-FRAUD RECOVERY	Page ending with M1700.300	Page 4

2. Family Unit

If both spouses of an eligible couple are found guilty of fraud, neither is eligible for Medicaid. If only one member of a family unit is convicted of fraud, only that member's Medicaid coverage is canceled. The fraud conviction does not affect the composition of the family unit or the treatment of the family unit's income or resources. The convicted individual is included in the family unit according to Medicaid policy, but is not eligible for Medicaid coverage and is not enrolled.

M1700.300 NON-FRAUD RECOVERY

A. Authority

Any person who, without intent to violate this article, obtains benefits or payments under medical assistance to which he is not entitled shall be liable for any excess benefits or payments received. (COV 32.1-321.2)

B. Recovery of Erroneous Payments

DMAS has the authority to investigate cases and recover expenditures made for services received by ineligible enrollees without fraudulent intent. Examples of when recovery of expenditures is possible include, but are not limited to:

- eligibility errors due to recipient misunderstanding,
- agency errors,
- medical services received during the appeal process, if the agency's cancellation action is upheld.
- long-term care (LTC) patient pay underpayments totaling \$1,500 or more.

Complete and send the Notice of Recipient LTC Patient Pay Underpayment (form #DMAS752R) located at <https://fusion.dss.virginia.gov/bp/BP-Home/Medical-Assistance/Forms>, to:

Department of Medical Assistance Services
Recipient Audit Unit,
600 E. Broad Street, Suite 1300,
Richmond, Virginia 23219

The form can be faxed to 804-452-5472 or emailed to recipientfraud@dmass.virginia.gov.

Underpayments less than \$1,500 can be collected by adjusting the ongoing patient pay (see M1470.900 for patient pay adjustments).

C. Post-eligibility Investigations

1. Methodology

The RAU conducts post eligibility investigations. Medicaid nonfinancial and financial requirements are reviewed and applied in accordance to Medicaid policy. See Chapter M02 for the nonfinancial eligibility requirements, and Chapters M06 and M11 for resource requirements.

RAU investigations are based on projected income consistent with the eligibility policies for counting ongoing income referenced in Chapters M04, M07, and M08. Post-eligibility determinations are made using a point-to-point method in which the income estimation period begins with an event that would have triggered a partial review under *M1520.100*. The end point is the next scheduled renewal that the LDSS actually completed.

Manual Title Virginia Medical Assistance Eligibility	Chapter M21	Page Revision Date October 2022
Subchapter Subject FAMIS	Page ending with M2140.100	Page 6

1. Retroactive Coverage For Newborns Only

Retroactive coverage is available ONLY to an eligible child who was born within the 3 months prior to the FAMIS application month. Eligibility for FAMIS coverage will be effective retroactive to the child's date of birth if the child was born within the retroactive period and would have met all eligibility criteria during the retroactive period.

The following eligibility requirements must be met in order for a newborn child to be enrolled in FAMIS for retroactive FAMIS coverage:

- Retroactive coverage must be requested on the application form or in a later contact.
- The child's date of birth must be within the three months immediately preceding the application month (month in which the agency receives the signed application form for the child).
- The child must meet all the FAMIS eligibility requirements during the retroactive period.

2. FAMIS Aid Categories

The aid categories (ACs) for FAMIS are:

AC	Meaning
006	child under age 6 with income > 150% FPL and ≤ 200% FPL
007	child 6 – 19 with income > 150% FPL and ≤ 200% FPL
008	child under age 6 with income > 143% FPL and ≤ 150% FPL
009	child 6 – 19 with income > 143% FPL and ≤ 150% FPL
010	FAMIS deemed newborn <1 year old
014	FAMIS deemed newborn above 150% FPL

D. Notification Requirements

The eligibility worker must send a Notice of Action on Medicaid and FAMIS to the family informing them of the action taken the application. The notice must include the eligibility determination for both Medicaid and FAMIS.

If the child is ineligible for both Medicaid and FAMIS, the family must be sent a notice that the child is not eligible for either program. A referral to the Health Insurance Marketplace must be made, and the child must be given the opportunity to have a Medicaid medically needy evaluation if he is under 18 years. Along with the notice, request verification of resources using Appendix E, which can be found at: <http://www.coverva.org/mat/APPENDIX%20E%20Medically%20Needy%20application.pdf> (Application for Health Insurance and Help Paying Costs (Medical Needy Spenddown). Advise the family that if the signed application is returned within 10 calendar days, the original application date will be honored.

E. Transitions Between Medicaid And FAMIS (Changes and Renewals)

When excess income for Medicaid causes the child's eligibility to change from Medicaid to FAMIS, the new income must be verified or determined reasonably compatible using an electronic data source such as the federal Hub or another reliable data source prior to requesting paystubs or employer statements. For all case actions effective *August 26, 2022*, if the income attested to by the applicant is within 20% of the income information obtained from electronic sources OR both sources are below the applicable income limit, no additional verification is required. If the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return.

M23 Changes

Changed With	Effective Date	Pages Changed
TN #DMAS-25	10/1/22	Pages 5 & 6. Adjust pages 7-8.
TN #DMAS-24	7/1/22	Page 6

Manual Title Virginia Medical Assistance Eligibility	Chapter M23	Page Revision Date October 2022
Subchapter Subject FAMIS PRENATAL COVERAGE	Page ending with M2340.100	Page 5

M2330.100 FINANCIAL ELIGIBILITY

A. Financial Eligibility

1. Income

MAGI methodology contained in Chapter M04 is used for the FAMIS Prenatal Coverage income evaluation. To the maximum extent possible, attested income must be verified by information obtained from electronic data sources, such as the federal hub or another reliable data source, prior to requesting paystubs or employer statements. If the income attested to by the applicant is within 20% of the income information obtained from electronic sources OR both sources are below the applicable income limit, no additional verification is required. If the reasonable compatibility standard is not met, request verification of income and allow a minimum of 10 days to return. If the documentation is delayed in the mail due to no fault of the applicant, accept delayed documentation and complete application processing.

The FAMIS Prenatal Coverage income limit is 200% of the FPL (see Appendix 1 to this chapter) for the number of individuals in the pregnant woman's MAGI household composition as defined in M04. The pregnant woman is counted as herself plus the number of children she is expected to deliver. Per MAGI policy in chapter M04, a 5% FPL income disregard is applicable.

2. Resources

Resources are not evaluated for FAMIS Prenatal Coverage.

3. No Spenddown

Spenddown does not apply to FAMIS Prenatal Coverage. If countable income exceeds the FAMIS Prenatal Coverage income limit, the pregnant woman is not eligible for the FAMIS Prenatal Coverage program. If the woman has no documentation of immigration status, DO NOT make a referral to the Health Insurance Marketplace

M2340.100 APPLICATION and CASE PROCEDURES

A. Application Requirements

The policies in subchapters M0120 and M0130 apply.

B. Eligibility Determination

1. 7 Calendar Day Processing

Applications for pregnant women must be processed as soon as possible, but no later than seven (7) calendar days from the date the signed application was filed. If all necessary verifications are not received, the application continues to pend until the 45 day processing time limit is met.

2. Notice Requirements

The applicant/recipient must be notified in writing of the required information and the deadline by which the information must be received.

The agency must have all necessary verifications within 7 calendar days in order to determine eligibility. If the agency does not receive the verifications within the 7 calendar days, the worker must send the applicant written notice on the 7th day. The notice must state why action on the application could not be taken, specify what documentation is necessary in order to determine eligibility, and give a deadline of at least 10 calendar days to submit the verification.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M23	October 2022
Subchapter Subject	Page ending with	Page
FAMIS PRENATAL COVERAGE	M2340.100	6

Once all necessary verifications for the pregnant woman are received, an eligibility determination must be made immediately and the applicant must be notified of the decision.

**C. Case Setup
Procedures for
Approved Cases**

A woman enrolled as FAMIS Prenatal Coverage may have the same base case number in the Medicaid Enterprise System (MES—formerly the Virginia Medicaid Management Information System [MMIS]) as Medicaid enrollees.

**D. Entitlement and
Enrollment**

**1. Begin Date of
Coverage**

Pregnant women determined eligible for FAMIS Prenatal Coverage are enrolled for benefits effective the first day of the application month, if all eligibility requirements are met in that month.

**2. No Retroactive
Coverage**

There is no retroactive coverage in the FAMIS Prenatal Coverage program.

3. Aid Categories

The FAMIS Prenatal Coverage aid categories (AC)* are:

- 110 for pregnant women with income \leq 143% FPL
- 111 for pregnant women with income $>$ 143% FPL but \leq 200% FPL.

Note: A change in the MMIS enrollment system was effective July 1, 2022 to display the FAMIS Prenatal aid categories AC110 / AC111. Anyone enrolled prior to July 1, 2022 will remain in aid category AC005 if eligibility is not run and updated to the new AC.

4. Coverage Period

After her eligibility is established as a pregnant woman, the woman's FAMIS Prenatal Coverage entitlement continues through her pregnancy and the 60-day period following the end of her pregnancy regardless of income changes. Her coverage ends the last day of the month in which the 60th postpartum day occurs. The 12-month coverage period for pregnant women in Medicaid and FAMIS MOMS is not applicable to FAMIS Prenatal Coverage.

**E. Notification
Requirements**

Written notice must be sent to the pregnant woman informing her of the action taken on the application. The notice must include the eligibility determination results for FAMIS Prenatal Coverage.

If the woman is not eligible for FAMIS Prenatal Coverage and has no documentation of immigration status, DO NOT make a referral to the Health Insurance Marketplace.

**F. Enrolling Infant Born
to a Woman in
FAMIS Prenatal
Coverage**

For women assigned to AC 110 under a fee for service (FFS) arrangement, her labor and delivery services are paid as emergency services, and the newborn is considered a deemed-eligible newborn. When the birth of the child born to a woman enrolled in FAMIS Prenatal Coverage is reported, review the available systems to determine if the mother is assigned to AC110 under FFS. If so, the child is enrolled as a deemed newborn in AC 093.

An infant born to a woman in FAMIS Prenatal Coverage who is assigned to AC 111 and/or enrolled in managed care must be evaluated for ongoing coverage. The enrollment is treated as a change in circumstances. The infant is not considered a deemed-eligible newborn but has rather been enrolled prenatally through the mother's enrollment in FAMIS Prenatal Coverage. The infant's birth is treated as an "add a person" case change in the enrollment system. Follow the procedures in M2340.100 F.1 – F.3 below.

Manual Title	Chapter	Page Revision Date
Virginia Medical Assistance Eligibility	M23	October 2021
Subchapter Subject	Page ending with	Page
FAMIS PRENATAL COVERAGE	M2340.100	7

1. Required Information

To enroll the infant, the worker must have the information below. Use existing case data if possible. If additional information is needed, send a request for verification.

Name, date of birth, sex (gender)

- Information about the infant's MAGI household and income, if not available in the case record.

Unless the agency has information about the infant's father living in the home (i.e. for another program), use only the mother's reported income to enroll the infant. Do not request information about the father or the father's income unless the agency has information about the father living in the home and his income.

Note: The infant is not required to provide an SSN or proof of application for an SSN in order to be enrolled. Follow the procedures in M0240.200 B.3 90 days following the infant's enrollment to determine if an SSN has been assigned. If the SSN number has not yet been issued at 90 days, obtain the SSN or proof of application for an SSN at the first renewal of the infant's coverage.

2. Enrollment and Aid Category

Update the case with the new infant's information, enrolling the child as a Medicaid child under 19 or in FAMIS, as appropriate based on the mother's countable income at the time of application. Use the appropriate AC below to enroll the infant:

- Medicaid AC 090 for income $> 109\%$ FPL $\leq 143\%$ FPL
- Medicaid AC 091 for income $\leq 109\%$ FPL
- FAMIS AC 006 for income $> 150\%$ FPL and $\leq 200\%$ FPL
- FAMIS AC 008 for income $> 143\%$ FPL and $\leq 150\%$ FPL

3. Renewal

The infant's first renewal is due 12 months from the month of the infant's enrollment.

G. Examples

Example 1

Rose is pregnant and is carrying one unborn child. She was born outside the U.S. She applies for Medicaid on October 27, 2021. She reported on the application that she visited the emergency room in August 2021. The retroactive period for her application is July – September 2021.

Rose is unable to verify that she is lawfully residing in the U.S.; therefore, she cannot be eligible for full-benefit Medicaid or FAMIS Moms and is evaluated for FAMIS Prenatal Coverage. Her verified countable monthly income is \$1,756 per month, which is under the income limit for FAMIS Prenatal Coverage for her MAGI household size of two. She is approved for FAMIS Prenatal coverage and enrolled effective October 1, 2021, in AC 110, based on her countable income of under 143% FPL (see M23, Appendix 1). She is enrolled in Managed Care, so her infant will not be considered a deemed-eligible newborn.

Because she received an emergency service during the retroactive period and her income is under the Medicaid limit for a pregnant woman, she is evaluated for Emergency Services coverage.

Manual Title Virginia Medical Assistance Eligibility	Chapter M23	Page Revision Date July 2021
Subchapter Subject FAMIS PRENATAL COVERAGE	Page ending with M2350.100	Page 8

Rose's son, AJ, is born on February 25, 2022, and is enrolled in AC 090 beginning February 25, 2022. His Medicaid renewal is due in January 2023. Rose's FAMIS Prenatal Coverage ends on April 30, 2022.

Example 2

Jo lives with her husband Al and daughter Em, who was born on October 31, 2021. Jo was born outside the U.S. She applies for Medical Assistance on November 25, 2021 and requests retroactive coverage for her pregnancy. She does not request coverage for her husband.

Jo is unable to verify that she is lawfully residing in the U.S.; therefore, she cannot be eligible for full-benefit Medicaid or FAMIS Moms. Because Jo applied for coverage the month after her infant's birth, she cannot be eligible for FAMIS Prenatal Coverage

Jo's MAGI household consists of three people—Jo, her infant, and her husband. The verified countable monthly income for the household is \$3,473.

Jo's countable income is over the limit of 143% FPL for Medicaid and has excess resources for Medically Needy eligibility; therefore, she cannot be approved for Medicaid coverage of emergency services for the labor and delivery.

Em is determined to be eligible for FAMIS, which covers an eligible child who was born within the 3 months prior to the application month. Em is enrolled effective October 31, 2021, in AC 006. Her renewal is due in September 2022.

The eligibility worker sends a Notice of Action indicating Jo is not eligible for Medicaid or FAMIS Prenatal Coverage and Em has been enrolled in FAMIS.

M2350.100 REVIEW OF ADVERSE ACTIONS

An applicant for FAMIS Prenatal Coverage may request a review of an adverse determination regarding eligibility for FAMIS Prenatal Coverage. FAMIS Prenatal Coverage follows the procedures established by Medicaid for client appeals (see Chapter M16).

The payment of medical services on the part of any pregnant woman or any right to participate in the program is not subject to review if the reason for denial or cancellation is that funds for the FAMIS Prenatal Coverage program are exhausted.

DEPARTMENT OF HEALTH & HUMAN SERVICES
Centers for Medicare & Medicaid Services
7500 Security Boulevard, Mail Stop S2-26-12
Baltimore, Maryland 21244-1850

CMCS Informational Bulletin

DATE: November 18, 2022

FROM: Daniel Tsai, Deputy Administrator and Director
Center for Medicaid and CHIP Services (CMCS)

SUBJECT: **2023 SSI and Spousal Impoverishment Standards**

This CMCS Informational Bulletin provides an update on the 2023 Supplemental Security Income (SSI) and Spousal Impoverishment Standards.

Certain Medicaid income and resource standards are adjusted beginning each January in accordance with changes in the SSI federal benefit rate (FBR) and the Consumer Price Index (CPI). Many states offer, for example, categorical eligibility to individuals who are not receiving SSI but who meet the financial eligibility requirements of the program, as authorized by section 1902(a)(10)(A)(ii)(I) of the Social Security Act (“the Act”). Similarly, most states have adopted the “special income level” institutional eligibility category authorized under section 1902(a)(10)(A)(ii)(V) of the Act, the maximum income standard for which is 300% of the SSI FBR. Additionally, certain eligibility standards relating to coverage of long-term services and supports, including the home equity limitation in section 1917(f) of the Act and elements of the spousal impoverishment statute in section 1924 of the Act, are increased each year based on increases in the CPI for All Urban Consumers (CPI-U).

Included with this Informational Bulletin is the *2023 SSI and Spousal Impoverishment Standards* chart that displays the new standards. These standards are also available on Medicaid.gov at <https://www.medicaid.gov/medicaid/eligibility/spousal-impoverishment/index.html>. States must update their standards in accordance with this information for the changes that become effective on January 1, 2023.

If you have any questions or need additional information, please contact Gene Coffey, Technical Director, Division of Medicaid Eligibility Policy at 410-786-2234 or Gene.Coffey@cms.hhs.gov.

2023
